Art. 214 . Hij die stoffen of voorwerpen vervaardigt of voorhanden heeft waarvan hij weet dat zij bestemd zijn tot het namaken, vervalsen of in waarde verminderen van muntspeciën of het namaken of vervalsen van munt- of bankbiljetten, wordt gestraft met gevangenisstraf van ten hoogste vier jaren of geldboete van de vierde categorie.

Art. 214bis . Bij veroordeling wegens een der in deze titel omschreven misdrijven worden:

1° de valse, vervalste of geschonden muntspeciën;

2° de valse of vervalste munt- of bankbiljetten;

3° de stoffen of voorwerpen, uit hun aard bestemd tot het namaken, vervalsen of in waarde verminderen van muntspeciën of het namaken of vervalsen van munt- of bankbiljetten; voor zover daarmee het misdrijf is gepleegd of zij het voorwerp daarvan hebben uitgemaakt, verbeurd verklaard, ongeacht aan wie de voorwerpen toebehoren.

Art. 215 . Bij veroordeling wegens een der in de artikelen 208-211 omschreven misdrijven, kan ontzetting van de in artikel 28, eerste lid , onder 1°, 2° en 4°, vermelde rechten worden uitgesproken.

TITEL XI Valsheid in zegels en merken

Art. 216 . - 1. Met gevangenisstraf van ten hoogste zes jaren of geldboete van de vijfde categorie wordt gestraft:

1° hij die van rijkswege uitgegeven zegels namaakt of vervalst, met het oogmerk om die zegels als echt en onvervalst te gebruiken of door anderen te doen gebruiken.

2° hij die, met gelijk oogmerk, zodanige zegels vervaardigt door wederrechtelijk gebruik te maken van echte stempels.

- 2. Het bepaalde in het eerste lid is van overeenkomstige toepassing op zegels die worden uitgegeven krachtens artikel 2, eerste lid , onder c, van de Postwet (Stb. 1988, 522).

Art. 217 . Met gevangenisstraf van ten hoogste vijf jaren of geldboete van de vijfde categorie wordt gestraft:

1° hij die op platina, gouden of zilveren werken valse rijksmerken of door de wet vereiste meestertekens plaatst of echte vervalst, met het oogmerk om die werken te gebruiken of door anderen te doen gebruiken alsof de daarop geplaatste merken of tekens echt en onvervalst waren;

2° hij die, met gelijk oogmerk, op de bedoelde werken merken of tekens plaatst door wederrechtelijk gebruik te maken van echte stempels;

3° hij die echte rijksmerken of door de wet vereiste meestertekens inzet, aanvoegt of overbrengt in, aan of op andere platina, gouden of zilveren werken dan die waaraan zij oorspronkelijk zijn aangebracht, met het oogmerk om die werken te gebruiken of door anderen te doen gebruiken alsof de bedoelde merken of tekens oorspronkelijk daarop waren geplaatst.

Art. 218 . Met gevangenisstraf van ten hoogste drie jaren of geldboete van de vijfde categorie wordt gestraft:

1° hij die op voorwerpen aan ijk onderworpen valse ijkmerken plaatst of echte vervalst, met het oogmerk om die voorwerpen te gebruiken

of door anderen te doen gebruiken alsof de daarop geplaatste merken echt en onvervalst waren;

2° hij die, met gelijk oogmerk, op de bedoelde voorwerpen merken plaatst door wederrechtelijk gebruik te maken van echte stempels.

Art. 219 . Met gevangenisstraf van ten hoogste twee jaren of geldboete van de vijfde categorie wordt gestraft:

1° hij die andere dan de in de artikelen 217 en 218 bedoelde merken, die krachtens wettelijk voorschrift op goederen of hun verpakking

moeten of kunnen worden geplaatst, daarop valselijk plaatst of echte vervalst, met het oogmerk om die goederen te gebruiken of door

anderen te doen gebruiken alsof de daarop geplaatste merken echt en onvervalst waren;

2° hij die, met gelijk oogmerk, op de bedoelde goederen of hun verpakking merken plaatst door wederrechtelijk gebruik te maken van

echte stempels;

3° hij die echte merken gebruikt voor goederen of hun verpakking waarvoor die merken niet bestemd zijn, met het oogmerk om die

goederen te gebruiken of door anderen te doen gebruiken alsof de bedoelde merken daarvoor bestemd waren.

Art. 220 . Hij die opzettelijk valse, vervalste of wederrechtelijk vervaardigde zegels, tekens of merken, of de voorwerpen waaraan zij

wederrechtelijk verbonden zijn, gebruikt, verkoopt, te koop aanbiedt, aflevert, ten verkoop in voorraad heeft of binnen het Rijk in Europa

invoert, als waren die zegels, tekens of merken echt en onvervalst en niet wederrechtelijk vervaardigd of wederrechtelijk aan de

voorwerpen verbonden, wordt gestraft met dezelfde straffen als in de artikelen 216-219 zijn bepaald, naar de daar gemaakte

onderscheidingen.

Art. 221 . - 1. Hij die voorwerpen aan ijk onderworpen ontdoet van het daarop geplaatste afkeuringsmerk, met het oogmerk om die

voorwerpen te gebruiken of door anderen te doen gebruiken als waren zij niet afgekeurd, wordt gestraft met gevangenisstraf van ten

hoogste een jaar of geldboete van de vierde categorie.

- 2. Met dezelfde straf wordt gestraft hij die opzettelijk deze van het afkeuringsmerk ontdane voorwerpen gebruikt, verkoopt, te koop

aanbiedt, aflevert of ten verkoop in voorraad heeft, als waren zij niet afgekeurd.

Art. 222 . - 1. Hij die van zegels als bedoeld in artikel 216 welke reeds tot gebruik hebben gediend ontdoet van het merk bestemd om ze voor verder gebruik ongeschikt te maken, met het oogmerk om die zegels te gebruiken of door anderen te doen gebruiken als waren zij nog niet gebruikt, wordt gestraft met gevangenisstraf van ten hoogste drie jaren of geldboete van de vijfde categorie.

- 2. Met dezelfde straffen wordt gestraft hij die opzettelijk deze van dat merk ontdane zegels gebruikt, verkoopt, te koop aanbiedt, aflevert, ten verkoop in voorraad heeft of binnen het Rijk in Europa invoert, als waren zij nog niet gebruikt.

Art. 222bis . De bepalingen van de artikelen 216 , 219 , 220 en 222 zijn naar de daar gemaakte onderscheidingen mede van toepassing, indien de daarin omschreven feiten worden gepleegd met betrekking tot zegels of merken van de Nederlandse Antillen, Aruba, een buitenlandse mogendheid of een volkenrechtelijke organisatie.

Art. 223 . Hij die stoffen of voorwerpen voorhanden heeft waarvan hij weet dat zij bestemd zijn tot het plegen van enig in artikel 216 of in artikel 222bis in verband met artikel 216 omschreven misdrijf, wordt gestraft met gevangenisstraf van ten hoogste zes maanden of geldboete van de vierde categorie.

Art. 224 . Bij veroordeling wegens een der in de artikelen 216-222bis omschreven misdrijven, kan ontzetting van de in artikel 28, eerste lid , onder 1^o, 2^o en 4^o, vermelde rechten worden uitgesproken.

TITEL XII Valsheid in geschriften

Art. 225 . - 1. Hij die een geschrift dat bestemd is om tot bewijs van enig feit te dienen, valselijk opmaakt of vervalst, met het oogmerk om het als echt en onvervalst te gebruiken of door anderen te doen gebruiken, wordt als schuldig aan valsheid in geschrift gestraft, met gevangenisstraf van ten hoogste zes jaren of geldboete van de vijfde categorie.

- 2. Met dezelfde straf wordt gestraft hij die opzettelijk gebruik maakt van het valse of vervalste geschrift als ware het echt en onvervalst dan wel opzettelijk zodanig geschrift aflevert of voorhanden heeft, terwijl hij weet of redelijkerwijs moet vermoeden dat dit geschrift bestemd is voor zodanig gebruik.

Art. 226 . - 1. De schuldige aan valsheid in geschrift wordt gestraft met gevangenisstraf van ten hoogste zeven jaren of geldboete van de vijfde categorie, indien zij gepleegd is:

1° in authentieke akten;

2° in schuldbrieven of certificaten van schuld van enige staat, enige provincie, gemeente of openbare instelling;

3° in aandelen of schuldbrieven of certificaten van aandeel of schuld van enige vereniging, stichting of vennootschap;

4° in talons, dividend- of rentebewijzen behorende tot een der onder de beide voorgaande nummers omschreven stukken, of in de

bewijzen in plaats van deze stukken uitgegeven;

5° in voor omloop bestemd krediet- of handelspapier.

- 2. Met dezelfde straf wordt gestraft hij die opzettelijk gebruik maakt van enig in het eerste lid vermeld vals of vervalst geschrift als ware

het echt en onvervalst, dan wel opzettelijk zodanig geschrift aflevert of voorhanden heeft, terwijl hij weet of redelijkerwijs moet

vermoeden dat dit geschrift bestemd is voor zodanig gebruik.

Art. 227 . - 1. Hij die in een authentieke akte een valse opgave doet opnemen aangaande een feit van welks waarheid de akte moet doen

blijken, met het oogmerk om die akte te gebruiken of door anderen te doen gebruiken als ware zijn opgave in overeenstemming met de

waarheid, wordt gestraft met gevangenisstraf van ten hoogste zes jaren of geldboete van de vijfde categorie.

- 2. Met dezelfde straf wordt gestraft hij die opzettelijk gebruik maakt van de akte als ware de inhoud in overeenstemming met de

waarheid dan wel opzettelijk de akte aflevert of voorhanden heeft, terwijl hij weet of redelijkerwijs moet vermoeden dat die akte bestemd

is voor zodanig gebruik.

Art. 228 . - 1. De arts of verloskundige die opzettelijk een valse verklaring afgeeft nopens een geboorte, een oorzaak van overlijden dan

wel nopens het al of niet bestaan of bestaan hebben van ziekten, zwakheden of gebreken, wordt gestraft met gevangenisstraf van ten

hoogste drie jaren of geldboete van de vierde categorie.

- 2. Indien de verklaring wordt afgegeven met het oogmerk om iemand in een psychiatrisch ziekenhuis te doen opnemen of terughouden,

wordt gevangenisstraf van ten hoogste zeven jaren en zes maanden of geldboete van de vijfde categorie opgelegd.

- 3. Met dezelfde straffen wordt gestraft hij die opzettelijk van de valse verklaring gebruik maakt als ware de inhoud in overeenstemming

met de waarheid.

Art. 229 . - 1. Hij die een schriftelijke geneeskundige verklaring nopens een oorzaak van overlijden, dan wel nopens het al of niet bestaan

of bestaan hebben van ziekten, zwakheden of gebreken valselijk opmaakt of vervalst, met het oogmerk

om het openbaar gezag of verzekeraars te misleiden, wordt gestraft met gevangenisstraf van ten hoogste drie jaren of geldboete van de vierde categorie.

- 2. Met dezelfde straf wordt gestraft hij die, met gelijk oogmerk, van de valse of vervalste verklaring gebruik maakt als ware zij echt en onvervalst.

Art. 230 . - 1. Hij die een getuigschrift van goed gedrag, bekwaamheid, armoede, gebreken of andere omstandigheden valselijk opmaakt of vervalst, met het oogmerk om het te gebruiken of door anderen te doen gebruiken tot het verkrijgen van een indienststelling of tot het opwekken van welwillendheid en hulpbetoon, wordt gestraft met gevangenisstraf van ten hoogste een jaar of geldboete van de derde categorie.

- 2. Met dezelfde straf wordt gestraft hij die opzettelijk gebruik maakt van enig in het eerste lid vermeld vals of vervalst getuigschrift als ware het echt en onvervalst.

Art. 231 . - 1. Hij die een reisdocument valselijk opmaakt of vervalst, of een zodanig stuk op grond van valse gegevens doet verstrekken dan wel een aan hem of een ander verstrekt reisdocument ter beschikking stelt van een derde, met het oogmerk het door deze te doen gebruiken als ware het aan hem verstrekt, wordt gestraft met gevangenisstraf van ten hoogste vier jaren of geldboete van de vierde categorie.

- 2. Met dezelfde straf wordt gestraft hij die in het bezit is van een reisdocument waarvan hij weet of redelijkerwijs moet vermoeden, dat het vals of vervalst is, dan wel opzettelijk gebruik maakt van een niet op zijn naam gesteld reisdocument.

Art. 232 . - 1. Hij die opzettelijk een betaalpas of waardekaart bedoeld voor het verrichten van betalingen langs geautomatiseerde weg, valselijk opmaakt of vervalst, met het oogmerk zichzelf of een ander te bevoordelen, wordt gestraft met gevangenisstraf van ten hoogste zes jaren of geldboete van de vijfde categorie.

- 2. Met dezelfde straf wordt bedreigd hij die opzettelijk gebruik maakt van een valse of vervalste betaalpas of waardekaart als ware deze echt en onvervalst.

Art. 233 . Vervallen.

Art. 234 . Hij die stoffen of voorwerpen voorhanden heeft waarvan hij weet dat zij bestemd zijn tot het

plegen van enig in artikel 226,
eerste lid , onder 2°-5°, omschreven misdrijf, wordt gestraft met gevangenisstraf van ten hoogste zes maanden of geldboete van de derde categorie.

Art. 235 . Bij veroordeling wegens een der in de artikelen 225-229 omschreven misdrijven, kan ontzetting van de in artikel 28, eerste lid , onder 1°, 2° en 4°, vermelde rechten worden uitgesproken.

TITEL XIII Misdrijven tegen de burgerlijke staat

Art. 236 . - 1. Hij die door enige handeling opzettelijk eens anders afstamming onzeker maakt, wordt, als schuldig aan verduistering van staat, gestraft met gevangenisstraf van ten hoogste vijf jaren of geldboete van de vierde categorie.

- 2. Ontzetting van de in artikel 28, eerste lid , onder 1°, 2° en 4°, vermelde rechten kan worden uitgesproken.

- 3. Vervolging heeft niet plaats dan nadat een verzoek tot inroeping of tot betwisting van staat is gedaan en de burgerlijke rechter daarop een eindbeslissing heeft gegeven. Indien het verzoek echter door het stilzitten van partijen onvoldoende voortgang vindt, kan vervolging ook plaats hebben nadat de burgerlijke rechter heeft beslist dat er een begin van bewijs is.

Art. 237 . - 1. Met gevangenisstraf van ten hoogste vier jaren of geldboete van de vierde categorie wordt gestraft:

1° hij die opzettelijk een dubbel huwelijk aangaat;

2° hij die een huwelijk aangaat, wetende dat de wederpartij daardoor een dubbel huwelijk aangaat.

- 2. Indien hij die opzettelijk een dubbel huwelijk aangaat, aan de wederpartij zijn gehuwde staat heeft verzwegen, wordt hij gestraft met gevangenisstraf van ten hoogste zes jaren of geldboete van de vierde categorie.

- 3. Ontzetting van de in artikel 28, eerste lid , onder 1°, 2° en 4°, vermelde rechten kan worden uitgesproken.

Art. 238 . De ongehuwde die een huwelijk aangaat, opzettelijk aan de wederpartij verzwijgende dat daartegen enig wettig beletsel bestaat, wordt, indien op grond van dat beletsel de nietigheid van het huwelijk is uitgesproken, gestraft met gevangenisstraf van ten hoogste vier jaren of geldboete van de vierde categorie.

TITEL XIV Misdrijven tegen de zeden

Art. 239 . Met gevangenisstraf van ten hoogste drie maanden of geldboete van de tweede categorie wordt gestraft schennis van de

eerbaarheid:

1° op of aan een plaats, voor het openbaar verkeer bestemd;

2° op een andere dan onder 1° bedoelde openbare plaats, toegankelijk voor personen beneden de leeftijd van zestien jaar;

3° op een niet openbare plaats, indien een ander daarbij zijns ondanks tegenwoordig is.

Art. 240 . Met gevangenisstraf van ten hoogste twee maanden of geldboete van de derde categorie wordt gestraft hij die weet of ernstige

redenen heeft om te vermoeden dat een afbeelding of voorwerp aanstotelijk voor de eerbaarheid is en die afbeelding of dat voorwerp:

1° op of aan een plaats, voor het openbaar verkeer bestemd, openlijk tentoonstelt of aanbiedt;

2° aan iemand, anders dan op diens verzoek, toezendt.

Art. 240a . Met gevangenisstraf van ten hoogste twee maanden of geldboete van de tweede categorie wordt gestraft hij die een

afbeelding of voorwerp, waarvan de vertoning schadelijk is te achten voor personen beneden de leeftijd van zestien jaar, verstrekt,

aanbiedt of vertoont aan een minderjarige van wie hij weet of redelijkerwijs moet vermoeden, dat deze jonger is dan zestien jaar.

Art. 240b . - 1. Met gevangenisstraf van ten hoogste vier jaren of geldboete van de vijfde categorie wordt gestraft degene die een

afbeelding - of een gegevensdrager, bevattende een afbeelding - van een seksuele gedraging, waarbij iemand die kennelijk de leeftijd

van zestien jaar nog niet heeft bereikt, is betrokken, verspreidt, openlijk tentoonstelt, vervaardigt, invoert, doorvoert, uitvoert of in voorraad

heeft.

- 2. Niet strafbaar is degene, die een dergelijke afbeelding in voorraad heeft waarvan vaststaat dat hij deze voor een wetenschappelijk, educatief of therapeutisch doel gebruikt.

- 3. Met gevangenisstraf van ten hoogste zes jaren of geldboete van de vijfde categorie wordt gestraft degene die van het plegen van een

van de misdrijven, omschreven in het eerste lid, een beroep of een gewoonte maakt.

Art. 240bis t/m 241 . Vervallen.

Art. 242 . Hij die door geweld of een andere feitelijkheid of bedreiging met geweld of een andere feitelijkheid iemand dwingt tot het

ondergaan van handelingen die bestaan uit of mede bestaan uit het seksueel binnendringen van het lichaam, wordt als schuldig aan

verkrachting gestraft met gevangenisstraf van ten hoogste twaalf jaren of geldboete van de vijfde categorie.

Art. 243 . Hij die met iemand van wie hij weet dat hij in staat van bewusteloosheid of lichamelijke onmacht verkeert, dan wel aan een zodanige gebrekkige ontwikkeling of ziekelijke stoornis van zijn geestvermogens lijdt dat hij niet of onvolkomen in staat is zijn wil daaromtrent te bepalen of kenbaar te maken of daartegen weerstand te bieden, handelingen pleegt die bestaan uit of mede bestaan uit het seksueel binnendringen van het lichaam, wordt gestraft met gevangenisstraf van ten hoogste acht jaren of geldboete van de vijfde categorie.

Art. 244 . Hij die met iemand beneden de leeftijd van twaalf jaren handelingen pleegt die bestaan uit of mede bestaan uit het seksueel binnendringen van het lichaam, wordt gestraft met gevangenisstraf van ten hoogste twaalf jaren of geldboete van de vijfde categorie.

Art. 245 . - 1. Hij die met iemand, die de leeftijd van twaalf jaren maar nog niet die van zestien jaren heeft bereikt, buiten echt, ontuchtige handelingen pleegt die bestaan uit of mede bestaan uit het seksueel binnendringen van het lichaam, wordt gestraft met gevangenisstraf van ten hoogste acht jaren of geldboete van de vijfde categorie.

- 2. Vervolging heeft, buiten de gevallen van de artikelen 248 en 249 , niet plaats dan op klacht.

- 3. Tot de klacht bedoeld in het tweede lid is naast de wettelijke vertegenwoordiger in burgerlijke zaken, bedoeld in artikel 65, eerste lid , tevens bevoegd de raad voor de kindbescherming.

- 4. In afwijking van het bepaalde in de artikelen 64 tot en met 66 is degene ten aanzien van wie het feit is gepleegd te allen tijde tot de klacht gerechtigd, in dier voege dat de termijn gedurende welke de klacht kan worden ingediend eindigt op de dag waarop de verjaringstermijn, bedoeld in artikel 70 , eindigt.

Art. 246 . Hij die door geweld of een andere feitelijkheid of bedreiging met geweld of een andere feitelijkheid iemand dwingt tot het plegen of dulden van ontuchtige handelingen, wordt, als schuldig aan feitelijke aanranding van de eerbaarheid, gestraft met gevangenisstraf van ten hoogste acht jaren of geldboete van de vijfde categorie.

Art. 247 . - 1. Hij die met iemand van wie hij weet dat hij in staat van bewusteloosheid of lichamenlijk onmacht verkeert, dan wel aan een zodanige gebrekkige ontwikkeling of ziekelijke stoornis van zijn geestvermogens lijdt dat hij niet of onvolkomen in staat is zijn wil daaromtrent te bepalen of kenbaar te maken of daartegen weerstand te bieden of met iemand beneden de leeftijd van zestien jaren buiten

echt ontuchtige handelingen pleegt of laatstgemelde tot het plegen of dulden van zodanige handelingen buiten echt met een derde verleidt,

wordt gestraft met een gevangenisstraf van ten hoogste zes jaren of geldboete van de vierde categorie.

- 2. Indien de in het eerste lid bedoelde persoon beneden de leeftijd van zestien jaren, twaalf jaren of ouder is, heeft vervolging, buiten de gevallen van de artikelen 248 en 249 , niet plaats dan op klacht.

- 3. Het derde en vierde lid van artikel 245 zijn van overeenkomstige toepassing.

Art. 248 . - 1. Indien een der in de artikelen 243 en 245-247 omschreven misdrijven zwaar lichamelijk letsel ten gevolge heeft, wordt

gevangenisstraf van ten hoogste twaalf jaren of geldboete van de vijfde categorie opgelegd.

- 2. Indien een der in de artikelen 242-247 omschreven misdrijven de dood ten gevolge heeft, wordt gevangenisstraf van ten hoogste vijftien jaren of geldboete van de vijfde categorie opgelegd.

Art. 248bis . Vervallen.

Art. 248ter . - 1. Hij die door giften of beloften van geld of goed, misbruik van uit feitelijke verhoudingen voortvloeiend overwicht of

misleiding een minderjarige van onbesproken gedrag, wiens minderjarigheid hij kent of redelijkerwijs moet vermoeden, opzettelijk

beweegt ontuchtige handelingen met hem te plegen of zodanige handelingen van hem te dulden, wordt gestraft met gevangenisstraf van

ten hoogste vier jaren of geldboete van de vierde categorie.

- 2. Het tweede , derde en vierde lid van artikel 245 zijn van overeenkomstige toepassing.

Art. 249 . - 1. Hij die ontucht pleegt met zijn minderjarig kind, stiefkind of pleegkind, zijn pupil, een aan zijn zorg, opleiding of

waakzaamheid toevertrouwde minderjarige of zijn minderjarige bediende of ondergeschikte, wordt gestraft met gevangenisstraf van ten

hoogste zes jaren of geldboete van de vierde categorie.

- 2. Met dezelfde straf wordt gestraft:

1° de ambtenaar die ontucht pleegt met een persoon aan zijn gezag onderworpen of aan zijn waakzaamheid toevertrouwd of aanbevolen;

2° de bestuurder, arts, onderwijzer, beambte, opzichter of bediende in een gevangenis, rijksinrichting voor kinderbescherming, weeshuis,

ziekenhuis, of instelling van weldadigheid, die ontucht pleegt met een persoon daarin opgenomen;

3° degene die, werkzaam in de gezondheidszorg of maatschappelijke zorg, ontucht pleegt met iemand die zich als patiënt of cliënt aan zijn

hulp of zorg heeft toevertrouwd.

Art. 250 . - 1. Wordt gestraft:

1° met gevangenisstraf van ten hoogste vier jaren of geldboete van de vierde categorie, hij die het plegen van ontucht door zijn minderjarig kind, stiefkind of pleegkind, zijn pupil, een aan zijn zorg, opleiding of waakzaamheid toevertrouwde minderjarige of zijn minderjarige bediende of ondergeschikte met een derde opzettelijk teweegbrengt of bevordert;

2° met gevangenisstraf van ten hoogste drie jaren of geldboete van de vierde categorie, hij die, buiten de gevallen genoemd onder 1°, het plegen van ontucht door een minderjarige wiens minderjarigheid hij kent of redelijkerwijs moet vermoeden, met een derde opzettelijk teweegbrengt of bevordert.

- 2. Indien de schuldige van het plegen van het misdrijf een gewoonte maakt, kunnen de gevangenisstraffen met een derde worden verhoogd.

Art. 250bis . Hij die van het opzettelijk teweegbrengen of bevorderen van ontucht door anderen met derden een beroep of een gewoonte maakt, wordt gestraft met gevangenisstraf van ten hoogste een jaar of geldboete van de derde categorie.

Art. 250ter . - 1. Als schuldig aan mensenhandel wordt gestraft met gevangenisstraf van ten hoogste zes jaren of geldboete van de vijfde categorie:

1° degene die een ander door geweld of een andere feitelijkheid of door bedreiging met geweld of een andere feitelijkheid dan wel door misbruik van uit feitelijke verhoudingen voortvloeiend overwicht of door misleiding tot prostitutie brengt, dan wel onder voornoemde omstandigheden enige handeling onderneemt waarvan hij of zij weet of redelijkerwijs moet vermoeden dat die ander daardoor in de prostitutie belandt;

2° degene die een persoon aanwerft, medeneemt of ontvoert met het oogmerk die persoon in een ander land in de prostitutie te brengen;

3° degene die een ander tot prostitutie brengt, dan wel ten aanzien van een ander enige handeling onderneemt waarvan hij of zij weet of redelijkerwijs moet vermoeden dat die ander daardoor in de prostitutie belandt, indien die ander minderjarig is.

- 2. Met gevangenisstraf van ten hoogste acht jaren of geldboete van de vijfde categorie wordt gestraft: 1° mensenhandel door twee of meer verenigde personen;

2° mensenhandel ten aanzien van een persoon die de leeftijd van zestien jaren nog niet heeft bereikt;

3° mensenhandel, indien geweld of een andere feitelijkheid als bedoeld in het eerste lid, zwaar lichamelijk letsel ten gevolge heeft.

- 3. Mensenhandel door twee of meer verenigde personen onder de omstandigheden, bedoeld in het tweede lid, onder 2° of 3°, wordt gestraft met gevangenisstraf van ten hoogste tien jaren of geldboete van de vijfde categorie.

Art. 251 . - 1. Bij veroordeling wegens een der in de artikelen 242-247 en 248ter-250ter omschreven misdrijven, kan ontzetting van de

in artikel 28, eerste lid , onder 1°, 2° en 4°, vermelde rechten worden uitgesproken.

- 2. Indien de schuldige aan een der misdrijven in de artikelen 248ter-250ter omschreven, het misdrijf in zijn beroep begaat, kan hij van de uitoefening van dat beroep worden ontzet.

Art. 251bis . Vervallen.

Art. 252 . - 1. Met gevangenisstraf van ten hoogste negen maanden of geldboete van de derde categorie wordt gestraft:

1° hij die aan iemand die in kennelijke staat van dronkenschap verkeert, bedwelmende drank verkoopt of toedient;

2° hij die een kind beneden de leeftijd van zestien jaren dronken maakt;

3° hij die iemand door geweld of bedreiging met geweld dwingt tot het gebruik van bedwelmende drank.

- 2. Indien het feit zwaar lichamelijk letsel ten gevolge heeft, wordt de schuldige gestraft met gevangenisstraf van ten hoogste zes jaren of geldboete van de vierde categorie.

- 3. Indien het feit de dood ten gevolge heeft, wordt hij gestraft met gevangenisstraf van ten hoogste negen jaren of geldboete van de vijfde categorie.

- 4. Indien de schuldige het misdrijf in zijn beroep begaat, kan hij van de uitoefening van dat beroep worden ontzet.

Art. 253 . Hij die een onder zijn wettig gezag staand kind beneden de leeftijd van twaalf jaren aan een ander afstaat of overlaat, wetende dat het tot of bij het uitoefenen van bedelarij, van gevaarlijke kunstverrichtingen of van gevaarlijke of de gezondheid ondermijnende arbeid zal worden gebruikt, wordt gestraft met gevangenisstraf van ten hoogste drie jaren of geldboete van de vierde categorie.

Art. 254 t/m 254bis . Vervallen.

TITEL XV Verlating van hulpbehoevenden

Art. 255 . Hij die opzettelijk iemand tot wiens onderhoud, verpleging of verzorging hij krachtens wet of overeenkomst verplicht is, in een hulpeloze toestand brengt of laat, wordt gestraft met gevangenisstraf van ten hoogste twee jaren of geldboete van de vierde categorie.

Art. 256 . Hij die een kind beneden de leeftijd van zeven jaren te vondeling legt of, met het oogmerk om er zich van te ontdoen, verlaat,

wordt gestraft met gevangenisstraf van ten hoogste vier jaren en zes maanden of geldboete van de vierde categorie.

Art. 257 . - 1. Indien een der in de artikelen 255 en 256 omschreven feiten zwaar lichamelijk letsel ten gevolge heeft, wordt de schuldige gestraft met gevangenisstraf van ten hoogste zeven jaren en zes maanden of geldboete van de vijfde categorie.

- 2. Indien een van deze feiten de dood ten gevolge heeft, wordt hij gestraft met gevangenisstraf van ten hoogste negen jaren of geldboete van de vijfde categorie.

Art. 258 . Indien de schuldige aan het in artikel 256 omschreven misdrijf de vader of de moeder is, kunnen te zijnen aanzien de in de artikelen 256 en 257 bepaalde gevangenisstraffen met een derde worden verhoogd.

Art. 259 . Indien de moeder onder de werking van vrees voor de ontdekking van haar bevalling haar kind kort na de geboorte te vondeling legt of, met het oogmerk om er zich van te ontdoen, verlaat, wordt het maximum der in de artikelen 256 en 257 vermelde gevangenisstraffen tot de helft verminderd en wordt de in artikel 257 vermelde geldboete tot de vierde categorie teruggebracht.

Art. 260 . Bij veroordeling wegens een der in de artikelen 255-259 omschreven misdrijven, kan ontzetting van de in artikel 28, eerste lid , onder 4^o, vermelde rechten worden uitgesproken.

TITEL XVI Belediging

Art. 261 . - 1. Hij die opzettelijk iemands eer of goede naam aanrandt, door telastlegging van een bepaald feit, met het kennelijke doel om daaraan ruchtbaarheid te geven, wordt, als schuldig aan smaad, gestraft met gevangenisstraf van ten hoogste zes maanden of geldboete van de derde categorie.

- 2. Indien dit geschiedt door middel van geschriften of afbeeldingen, verspreid, openlijk tentoongesteld of aangeslagen, of door geschriften waarvan de inhoud openlijk ten gehore wordt gebracht, wordt de dader, als schuldig aan smaadschrift, gestraft met gevangenisstraf van ten hoogste een jaar of geldboete van de derde categorie.

- 3. Noch smaad, noch smaadschrift bestaat voor zover de dader heeft gehandeld tot noodzakelijke verdediging, of te goeder trouw heeft kunnen aannemen dat het te last gelegde waar was en dat het algemeen belang de telastlegging eiste.

Art. 262 . - 1. Hij die het misdrijf van smaad of smaadschrift pleegt, wetende dat het te last gelegde feit in strijd met de waarheid is, wordt, als schuldig aan laster, gestraft met gevangenisstraf van ten hoogste twee jaren of geldboete van de vierde categorie.

- 2. Ontzetting van de in artikel 28, eerste lid , onder 1° en 2°, vermelde rechten kan worden uitgesproken.

Art. 263 t/m 264 . Vervallen.

Art. 265 . - 1. Indien de beledigde aan het te last gelegde feit bij rechterlijk gewijsde onherroepelijk is schuldig verklaard, is veroordeling wegens laster uitgesloten.

- 2. Indien hij van het te last gelegde feit bij rechterlijk gewijsde onherroepelijk is vrijgesproken, wordt dat gewijsde als volkomen bewijs van de onwaarheid van het feit aangemerkt.

- 3. Indien tegen de beledigde wegens het hem te last gelegde feit een strafvervolgning is aangevangen, wordt de vervolging wegens laster geschorst totdat bij gewijsde onherroepelijk over het te last gelegde feit is beslist.

Art. 266 . - 1. Elke opzettelijke belediging die niet het karakter van smaad of smaadschrift draagt, hetzij in het openbaar mondeling of bij geschrift of afbeelding, hetzij iemand, in zijn tegenwoordigheid mondeling of door feitelijkheden, hetzij door een toegezonden of aangeboden geschrift of afbeelding, aangedaan, wordt, als eenvoudige belediging, gestraft met gevangenisstraf van ten hoogste drie maanden of geldboete van de tweede categorie.

- 2. Niet als eenvoudige belediging strafbaar zijn gedragingen die ertoe strekken een oordeel te geven over de behartiging van openbare belangen, en die er niet op zijn gericht ook in ander opzicht of zwaarder te grieven dan uit die strekking voortvloeit.

Art. 267 . De in de voorgaande artikelen van deze titel bepaalde gevangenisstraffen kunnen met een derde worden verhoogd, indien de belediging wordt aangedaan aan:

1° het openbaar gezag, een openbaar lichaam of een openbare instelling;

2° een ambtenaar gedurende of ter zake van de rechtmatige uitoefening van zijn bediening;

3° het hoofd of een lid van de regering van een bevriende staat.

Art. 268 . - 1. Hij die opzettelijk tegen een bepaald persoon bij de overheid een valse klacht of aangifte schriftelijk inlevert of in schrift doet brengen, waardoor de eer of goede naam van die persoon wordt aangerand, wordt, als schuldig aan lasterlijke aanklacht, gestraft met

gevangenisstraf van ten hoogste twee jaren of geldboete van de vierde categorie.

- 2. Ontzetting van de in artikel 28, eerste lid , onder 1° en 2°, vermelde rechten kan worden uitgesproken.

Art. 269 . Belediging, strafbaar krachtens deze titel, wordt niet vervolgd dan op klacht van hem tegen wie het misdrijf is gepleegd, behalve in de gevallen voorzien in artikel 267 , aanhef en onder 1° en 2°.

Art. 270 . - 1. Hij die ten aanzien van een overledene een feit pleegt dat, ware deze nog in leven, als smaadschrift of smaad zou zijn gekenmerkt, wordt gestraft met gevangenisstraf van ten hoogste drie maanden of geldboete van de tweede categorie.

- 2. Dit misdrijf wordt niet vervolgd dan op klacht hetzij van een der bloedverwanten of aangehuwden van de overledene in de rechte linie of zijlinie tot de tweede graad, hetzij van zijn echtgenoot.

Art. 271 . - 1. Hij die een geschrift of afbeelding van beledigende of voor een overledene smadelijke inhoud verspreidt, openlijk tentoonstelt of aanslaat of, om verspreid, openlijk tentoongesteld of aangeslagen te worden, in voorraad heeft, wordt, indien hij weet of ernstige reden heeft om te vermoeden dat de inhoud van het geschrift of de afbeelding van zodanige aard is, gestraft met gevangenisstraf van ten hoogste drie maanden of geldboete van de tweede categorie.

- 2. Met dezelfde straf wordt gestraft hij die, met gelijke wetenschap of een gelijke reden tot vermoeden, de inhoud van een zodanig geschrift openlijk ten gehore brengt.

- 3. Indien de schuldige een van de misdrijven omschreven in dit artikel in zijn beroep begaat en er tijdens het plegen van het misdrijf nog geen twee jaren zijn verlopen sedert een vroegere veroordeling van de schuldige wegens een van deze misdrijven onherroepelijk is geworden, kan hij van de uitoefening van dat beroep worden ontzet.

- 4. De misdrijven worden niet vervolgd dan op klacht van de in artikel 269 en het tweede lid van artikel 270 aangewezen personen, behalve in de gevallen voorzien in artikel 267 , aanhef en onder 1° en 2°.

TITEL XVII Schending van geheimen

Art. 272 . - 1. Hij die enig geheim waarvan hij weet of redelijkerwijs moet vermoeden dat hij uit hoofde van ambt, beroep of wettelijk voorschrift dan wel van vroeger ambt of beroep verplicht is het te bewaren, opzettelijk schendt, wordt gestraft met gevangenisstraf van

ten hoogste een jaar of geldboete van de vierde categorie.

- 2. Indien dit misdrijf tegen een bepaald persoon gepleegd is, wordt het slechts vervolgd op diens klacht.

Art. 273 . - 1. Met gevangenisstraf van ten hoogste zes maanden of geldboete van de vierde categorie wordt gestraft hij die opzettelijk

1° aangaande een onderneming van handel, nijverheid of dienstverlening bij welke hij werkzaam is of is geweest, bijzonderheden

waarvan hem geheimhouding is opgelegd, bekend gemaakt of

2° gegevens die door misdrijf zijn verkregen uit een geautomatiseerd werk van een onderneming van handel, nijverheid of dienstverlening

en die betrekking hebben op deze onderneming, bekend maakt of uit winstbejag gebruikt, indien deze gegevens ten tijde van de

bekendmaking of het gebruik niet algemeen bekend waren en daaruit enig nadeel kan ontstaan.

- 2. Niet strafbaar is hij die te goeder trouw heeft kunnen aannemen dat het algemeen belang de bekendmaking vereiste.

- 3. Geen vervolging heeft plaats dan op klacht van het bestuur van de onderneming.

TITEL XVIII Misdrijven tegen de persoonlijke vrijheid

Art. 274 . Hij die voor eigen of vreemde rekening slavenhandel drijft of opzettelijk daaraan middellijk of onmiddellijk deelneemt, wordt

gestraft met gevangenisstraf van ten hoogste twaalf jaren of geldboete van de vijfde categorie.

Art. 275 . - 1. Hij die als schipper dienst neemt of dienst doet op een vaartuig, wetende dat het tot het drijven van slavenhandel bestemd

is, of het daartoe gebruikende, wordt gestraft met gevangenisstraf van ten hoogste twaalf jaren of geldboete van de vijfde categorie.

- 2. Indien het vervoer de dood van een of meer slaven ten gevolge heeft, wordt de schipper gestraft met gevangenisstraf van ten hoogste

vijftien jaren of geldboete van de vijfde categorie.

Art. 276 . Hij die als schepeling dienst neemt op een vaartuig, wetende dat het tot het drijven van slavenhandel bestemd is of gebruikt

wordt, of vrijwillig in dienst blijft na die bestemming of dit gebruik te hebben vernomen, wordt gestraft met gevangenisstraf van ten

hoogste negen jaren of geldboete van de vijfde categorie.

Art. 277 . Hij die voor eigen of vreemde rekening middellijk of onmiddellijk medewerkt tot het verhuren, vervoeren of verzekeren van

een vaartuig, wetende dat het tot het drijven van slavenhandel bestemd is, wordt gestraft met gevangenisstraf van ten hoogste acht jaren

of geldboete van de vijfde categorie.

Art. 278 . Hij die iemand over de grenzen van het Rijk in Europa voert, met het oogmerk om hem wederrechtelijk onder de macht van een ander te brengen of om hem in hulpeloze toestand te verplaatsen, wordt, als schuldig aan mensenroof, gestraft met gevangenisstraf van ten hoogste twaalf jaren of geldboete van de vijfde categorie.

Art. 279 . - 1. Hij die opzettelijk een minderjarige onttrekt aan het wettig over hem gesteld gezag of aan het opzicht van degene die dit desbevoegd over hem uitoefent, wordt gestraft met gevangenisstraf van ten hoogste zes jaren of geldboete van de vierde categorie.

- 2. Gevangenisstraf van ten hoogste negen jaren of geldboete van de vijfde categorie wordt opgelegd indien list, geweld of bedreiging met geweld is gebezigd, of indien de minderjarige beneden de twaalf jaren oud is.

Art. 280 . - 1. Hij die opzettelijk een minderjarige die onttrokken is of zich onttrokken heeft aan het wettig over hem gesteld gezag of aan het opzicht van degene die dit desbevoegd over hem uitoefent, verbergt of aan de nasporing van de ambtenaren van de justitie of politie onttrekt, wordt gestraft met gevangenisstraf van ten hoogste drie jaren of geldboete van de vierde categorie of, indien de minderjarige beneden de twaalf jaren oud is, met gevangenisstraf van ten hoogste zes jaren of geldboete van de vierde categorie.

- 2. Het voorgaande is niet van toepassing op hem die

- a. de raad voor de kindbescherming onverwijld de verblijfplaats van de minderjarige meedeelt; of
- b. op grond van de Wet op de jeugdhulpverlening voor bekostiging in aanmerking is gebracht en handelt overeenkomstig de artikelen 25 en 26 van die wet; of
- c. handelt in het kader van zorgvuldige hulpverlening aan de minderjarige.

- 3. Van zorgvuldige hulpverlening vormen de onverwijld melding dat hulp wordt verleend alsmede de onverwijld bekendmaking van de identiteit van de hulpverlener en zijn plaats van verblijf of vestiging aan degene die het gezag over de minderjarige uitoefent, bestanddelen.

Art. 281 . - 1. Als schuldig aan schaking wordt gestraft:

1° met gevangenisstraf van ten hoogste zes jaren of geldboete van de vierde categorie, hij die een minderjarige vrouw, zonder de wil van

haar ouders of voogden doch met haar toestemming, wegvoert, met het oogmerk om zich haar bezit in of buiten echt te verzekeren;

2° met gevangenisstraf van ten hoogste negen jaren of geldboete van de vijfde categorie, hij die een vrouw door list, geweld of bedreiging

met geweld wegvoert, met het oogmerk om zich haar bezit in of buiten echt te verzekeren.

- 2. Geen vervolging heeft plaats dan op klacht.

- 3. De klacht geschiedt:

a. indien de vrouw tijdens de wegvoering minderjarig is, hetzij door haarzelf, hetzij door iemand wiens toestemming zij tot het aangaan van

een huwelijk behoeft;

b. indien zij tijdens de wegvoering meerderjarig is, hetzij door haarzelf, hetzij door haar echtgenoot.

- 4. Indien de schaker met de weggevoerde een huwelijk heeft gesloten, heeft geen veroordeling plaats, dan nadat de nietigheid van het huwelijk is uitgesproken.

Art. 282 . - 1. Hij die opzettelijk iemand wederrechtelijk van de vrijheid berooft of beroofd houdt, wordt gestraft met gevangenisstraf van ten hoogste acht jaren of geldboete van de vijfde categorie.

- 2. Indien het feit zwaar lichamelijk letsel ten gevolge heeft, wordt de schuldige gestraft met gevangenisstraf van ten hoogste negen jaren of geldboete van de vijfde categorie.

- 3. Indien het feit de dood ten gevolge heeft, wordt hij gestraft met gevangenisstraf van ten hoogste twaalf jaren of geldboete van de vijfde categorie.

- 4. De in dit artikel bepaalde straffen zijn ook van toepassing op hem die opzettelijk tot de wederrechtelijke vrijheidsberoving een plaats verschaft.

Art. 282a . - 1. Hij die opzettelijk iemand wederrechtelijk van de vrijheid berooft of beroofd houdt met het oogmerk een ander te dwingen iets te doen of niet te doen wordt als schuldig aan gijzeling gestraft met gevangenisstraf van ten hoogste vijftien jaren of geldboete van de vijfde categorie.

- 2. Indien het feit de dood ten gevolge heeft wordt hij gestraft met levenslange gevangenisstraf of tijdelijke van ten hoogste twintig jaren of geldboete van de vijfde categorie.

- 3. Het vierde lid van artikel 282 is toepasselijk.

Art. 283 . - 1. Hij aan wiens schuld te wijten is dat iemand wederrechtelijk van de vrijheid beroofd wordt of beroofd blijft, wordt gestraft met hechtenis van ten hoogste drie maanden of geldboete van de tweede categorie.

- 2. Indien het feit zwaar lichamelijk letsel ten gevolge heeft, wordt de schuldige gestraft met hechtenis van ten hoogste negen maanden of geldboete van de derde categorie.

- 3. Indien het feit de dood ten gevolge heeft, wordt hij gestraft met hechtenis van ten hoogste een jaar of geldboete van de derde categorie.

Art. 284 . - 1. Met gevangenisstraf van ten hoogste negen maanden of geldboete van de derde categorie wordt gestraft:

1° hij die een ander door geweld of enige andere feitelijkheid of door bedreiging met geweld of enige andere feitelijkheid, gericht hetzij tegen die ander hetzij tegen derden, wederrechtelijk dwingt iets te doen, niet te doen of te dulden;

2° hij die een ander door bedreiging met smaad of smaadschrift dwingt iets te doen, niet te doen of te dulden.

- 2. In het geval onder 2° omschreven wordt het misdrijf niet vervolgd dan op klacht van hem tegen wie het gepleegd is.

Art. 284a . Hij die een ander door bedreiging met diefstal of afpersing van splijtstof, als bedoeld in artikel 1, eerste lid , onder b, van de Kernenergiewet (Stb. 1963, 82), gericht tegen die ander of tegen derden wederrechtelijk dwingt iets te doen, niet te doen of te dulden, wordt gestraft met gevangenisstraf van ten hoogste een jaar en zes maanden of geldboete van de vierde categorie.

Art. 285 . - 1. Bedreiging met openlijk geweld met verenigde krachten tegen personen of goederen, met geweld tegen een internationaal beschermd persoon of diens beschermde goederen, met enig misdrijf waardoor de algemene veiligheid van personen of goederen in gevaar wordt gebracht, met verkrachting, met feitelijke aanranding van de eerbaarheid, met enig misdrijf tegen het leven gericht, met gijzeling, met zware mishandeling of met brandstichting, wordt gestraft met gevangenisstraf van ten hoogste twee jaren of geldboete van de vierde categorie.

- 2. Indien deze bedreiging schriftelijk en onder een bepaalde voorwaarde geschiedt, wordt ze gestraft met gevangenisstraf van ten hoogste vier jaren of geldboete van de vierde categorie.

Art. 285a . Hij die opzettelijk mondeling, door gebaren, bij geschrift of afbeelding zich jegens een persoon uit, kennelijk om diens vrijheid om naar waarheid of geweten ten overstaan van een rechter of ambtenaar een verklaring af te leggen te beïnvloeden, terwijl hij weet of ernstige reden heeft te vermoeden dat die verklaring zal worden afgelegd, wordt gestraft met gevangenisstraf van ten hoogste vier jaren of geldboete van de vierde categorie.

Art. 286 . Bij veroordeling wegens een der in artikelen 274-282 en in het tweede lid van artikel 285 omschreven misdrijven, kan ontzetting van de in artikel 28, eerste lid , onder 1°, 2° en 4°, vermelde rechten worden uitgesproken.

TITEL XIX Misdrijven tegen het leven gericht

Art. 287 . Hij die opzettelijk een ander van het leven berooft, wordt, als schuldig aan doodslag, gestraft met gevangenisstraf van ten hoogste vijftien jaren of geldboete van de vijfde categorie.

Art. 288 . Doodslag gevolgd, vergezeld of voorafgegaan van een strafbaar feit en gepleegd met het oogmerk om de uitvoering van dat feit voor te bereiden of gemakkelijk te maken, of om, bij betrapping op heter daad, aan zichzelf of andere deelnemers aan dat feit hetzij straffeloosheid hetzij het bezit van het wederrechtelijk verkregene te verzekeren, wordt gestraft met levenslange gevangenisstraf of tijdelijke van ten hoogste twintig jaren of geldboete van de vijfde categorie.

Art. 289 . Hij die opzettelijk en met voorbedachten rade een ander van het leven berooft, wordt, als schuldig aan moord, gestraft met levenslange gevangenisstraf of tijdelijke van ten hoogste twintig jaren of geldboete van de vijfde categorie.

Art. 290 . De moeder die, onder de werking van vrees voor de ontdekking van haar bevalling, haar kind bij of kort na de geboorte opzettelijk van het leven berooft, wordt, als schuldig aan kinderdoodslag, gestraft met gevangenisstraf van ten hoogste zes jaren of geldboete van de vierde categorie.

Art. 291 . De moeder die, ter uitvoering van een onder de werking van vrees voor de ontdekking van haar aanstaande bevalling genomen besluit, haar kind bij of kort na de geboorte opzettelijk van het leven berooft, wordt, als schuldig aan kindermoord, gestraft met gevangenisstraf van ten hoogste negen jaren of geldboete van de vijfde categorie.

Art. 292 . De in de artikelen 290 en 291 omschreven misdrijven worden ten aanzien van anderen die er aan deelnemen als doodslag of als moord aangemerkt.

Art. 293 . Hij die een ander op zijn uitdrukkelijk en ernstig verlangen van het leven berooft, wordt gestraft met gevangenisstraf van ten hoogste twaalf jaren of geldboete van de vijfde categorie.

Art. 294 . Hij die opzettelijk een ander tot zelfmoord aanzet, hem daarbij behulpzaam is of hem de middelen daartoe verschaft, wordt, indien de zelfmoord volgt, gestraft met gevangenisstraf van ten hoogste drie jaren of geldboete van de

vierde categorie.

Art. 295 . Bij veroordeling wegens doodslag, wegens moord of wegens een der in de artikelen 293 en 296 omschreven misdrijven, kan ontzetting van de in artikel 28, eerste lid , onder 1°, 2° en 4°, vermelde rechten worden uitgesproken.

TITEL XIXA Afbreking van zwangerschap

Art. 296 . - 1. Hij die een vrouw een behandeling geeft, terwijl hij weet of redelijkerwijs moet vermoeden dat daardoor zwangerschap kan worden afgebroken, wordt gestraft met gevangenisstraf van ten hoogste vier jaar en zes maanden of geldboete van de vierde categorie.

- 2. Indien het feit de dood van de vrouw ten gevolge heeft, wordt gevangenisstraf van ten hoogste zes jaren opgelegd of geldboete van de vierde categorie.

- 3. Indien het feit is begaan zonder toestemming van de vrouw, wordt gevangenisstraf van ten hoogste twaalf jaren opgelegd of geldboete van de vijfde categorie.

- 4. Indien het feit is begaan zonder toestemming van de vrouw en tevens haar dood ten gevolge heeft, wordt gevangenisstraf van ten hoogste vijftien jaren opgelegd of geldboete van de vijfde categorie.

- 5. Het in het eerste lid bedoelde feit is niet strafbaar, indien de behandeling is verricht door een arts in een ziekenhuis of kliniek waarin zodanige behandeling volgens de Wet afbreking zwangerschap mag worden verricht.

Art. 297 t/m 299 . Vervallen.

TITEL XX Mishandeling

Art. 300 . - 1. Mishandeling wordt gestraft met gevangenisstraf van ten hoogste twee jaren of geldboete van de vierde categorie.

- 2. Indien het feit zwaar lichamelijk letsel ten gevolge heeft, wordt de schuldige gestraft met gevangenisstraf van ten hoogste vier jaren of geldboete van de vierde categorie.

- 3. Indien het feit de dood ten gevolge heeft, wordt hij gestraft met gevangenisstraf van ten hoogste zes jaren of geldboete van de vierde categorie.

- 4. Met mishandeling wordt gelijkgesteld opzettelijke benadeling van de gezondheid.

- 5. Poging tot dit misdrijf is niet strafbaar.

Art. 301 . - 1. Mishandeling gepleegd met voorbedachten rade wordt gestraft met gevangenisstraf van

ten hoogste drie jaren of
geldboete van de vierde categorie.

- 2. Indien het feit zwaar lichamenlijk letsel ten gevolge heeft, wordt de schuldige gestraft met
gevangenisstraf van ten hoogste zes jaren of
geldboete van de vierde categorie.

- 3. Indien het feit de dood ten gevolge heeft, wordt hij gestraft met gevangenisstraf van ten hoogste
negen jaren of geldboete van de
vijfde categorie.

Art. 302 . - 1. Hij die aan een ander opzettelijk zwaar lichamenlijk letsel toebrengt, wordt, als schuldig
aan zware mishandeling, gestraft

met gevangenisstraf van ten hoogste acht jaren of geldboete van de vijfde categorie.

- 2. Indien het feit de dood ten gevolge heeft, wordt de schuldige gestraft met gevangenisstraf van ten
hoogste tien jaren of geldboete van
de vijfde categorie.

Art. 303 . - 1. Zware mishandeling gepleegd met voorbedachten rade wordt gestraft met gevangenisstraf
van ten hoogste twaalf jaren of
geldboete van de vijfde categorie.

- 2. Indien het feit de dood ten gevolge heeft, wordt de schuldige gestraft met gevangenisstraf van ten
hoogste vijftien jaren of geldboete
van de vijfde categorie.

Art. 304 . De in de artikelen 300-303 bepaalde gevangenisstraffen kunnen met een derde worden
verhoogd:

1° ten aanzien van de schuldige die het misdrijf begaat tegen zijn moeder, zijn vader tot wie hij in
familierechtelijke betrekking staat, zijn
echtgenoot of zijn kind;

2° indien het misdrijf wordt gepleegd tegen een ambtenaar gedurende of ter zake van de rechtmatige
uitoefening van zijn bediening;

3° indien het misdrijf wordt gepleegd door toediening van voor het leven of de gezondheid schadelijke
stoffen.

Art. 305 . Bij veroordeling wegens een der in de artikelen 301 en 303 omschreven misdrijven kan
ontzetting van de in artikel 28, eerste lid

, onder 1°, 2° en 4°, vermelde rechten worden uitgesproken.

Art. 306 . Zij die opzettelijk deelnemen aan een aanval of vechterij waarin onderscheiden personen zijn
gewikkeld, worden, behoudens

ieders verantwoordelijkheid voor de bijzondere door hem bedreven feiten, gestraft:

1° met gevangenisstraf van ten hoogste twee jaren of geldboete van de vierde categorie, indien de aanval
of vechterij alleen zwaar

lichamelijk letsel ten gevolge heeft;

2° met gevangenisstraf van ten hoogste drie jaren of geldboete van de vierde categorie, indien de aanval of vechterij iemands dood ten gevolge heeft.

TITEL XXI Veroorzaken van de dood of van lichamelijk letsel door schuld

Art. 307 . Hij aan wiens schuld de dood van een ander te wijten is, wordt gestraft met gevangenisstraf of hechtenis van ten hoogste negen maanden of geldboete van de vierde categorie.

Art. 308 . Hij aan wiens schuld te wijten is dat een ander zwaar lichamelijk letsel bekomt of zodanig lichamelijk letsel waaruit tijdelijke ziekte of verhindering in de uitoefening van zijn ambts- of beroepsbezigheden ontstaat, wordt gestraft met gevangenisstraf of hechtenis van ten hoogste zes maanden of geldboete van de vierde categorie.

Art. 309 . Indien de in deze titel omschreven misdrijven worden gepleegd in de uitoefening van enig ambt of beroep, kan de gevangenisstraf met een derde worden verhoogd, kan ontzetting worden uitgesproken van de uitoefening van het beroep waarin het misdrijf is gepleegd, en kan de rechter de openbaarmaking van zijn uitspraak gelasten.

TITEL XXII Diefstal en stroperij

Art. 310 . Hij die enig goed dat geheel of ten dele aan een ander toebehoort wegneemt, met het oogmerk om het zich wederrechtelijk toe te eigenen, wordt, als schuldig aan diefstal, gestraft met gevangenisstraf van ten hoogste vier jaren of geldboete van de vierde categorie.

Art. 311 . - 1. Met gevangenisstraf van ten hoogste zes jaren of geldboete van de vierde categorie wordt gestraft:

1° diefstal van vee uit de weide;

2° diefstal bij gelegenheid van brand, ontploffing, watersnood, schipbreuk, stranding, spoorwegongeval, oproer, mouterij of oorlogsnood;

3° diefstal gedurende de voor de nachtrust bestemde tijd, in een woning of op een besloten erf waarop een woning staat, door iemand die zich aldaar buiten weten of tegen de wil van de rechthebbende bevindt;

4° diefstal door twee of meer verenigde personen;

5° diefstal waarbij de schuldige zich de toegang tot de plaats van het misdrijf heeft verschaft of het weg te nemen goed onder zijn bereik

heeft gebracht door middel van braak, verbreking of inklimming, van valse sleutels, van een valse order

of een vals kostuum.

- 2. Indien de onder 3° omschreven diefstal vergezeld gaat van een der in onder 4° en 5° vermelde omstandigheden, wordt gevangenisstraf van ten hoogste negen jaren of geldboete van de vijfde categorie opgelegd.

Art. 312 . - 1. Met gevangenisstraf van ten hoogste negen jaren of geldboete van de vijfde categorie wordt gestraft diefstal,

voorafgegaan, vergezeld of gevolgd van geweld of bedreiging met geweld tegen personen, gepleegd met het oogmerk om die diefstal voor

te bereiden of gemakkelijk te maken, of om, bij betrapping op heter daad, aan zichzelf of andere deelnemers aan het misdrijf hetzij de

vlucht mogelijk te maken, hetzij het bezit van het gestolene te verzekeren.

- 2. Gevangenisstraf van ten hoogste twaalf jaren of geldboete van de vijfde categorie wordt opgelegd:

1° indien het feit wordt gepleegd hetzij gedurende de voor de nachtrust bestemde tijd in een woning of op een besloten erf waarop een

woning staat; hetzij op de openbare weg; hetzij in een spoortrein die in beweging is;

2° indien het feit wordt gepleegd door twee of meer verenigde personen;

3° indien de schuldige zich de toegang tot de plaats van het misdrijf heeft verschaft door middel van braak of inklimming, van valse sleutels,

van een valse order of een vals kostuum;

4° indien het feit zwaar lichamelijk letsel ten gevolge heeft.

- 3. Gevangenisstraf van ten hoogste vijftien jaren of geldboete van de vijfde categorie wordt opgelegd, indien het feit de dood ten gevolge

heeft.

Art. 313 . Bij veroordeling wegens diefstal kan ontzetting van de in artikel 28, eerste lid , onder 1°, 2° en 4°, vermelde rechten worden uitgesproken.

Art. 314 . - 1. Hij die, zonder geweld of bedreiging met geweld tegen personen, geheel of ten dele aan een ander toebehorende klei,

bagger, ongesneden veen, zand, aarde, grind, puin, mestspeciën, zoden, plaggen, heide, helm, wier, riet, biezen, mos, onbewerkt en niet

vervoerd hak- of sprokkelhout, ongeplukte of afgevallen boomvruchten of bladeren, te veld staand gras of te veld staande of na de oogst

achtergebleven veldvruchten wegneemt, met het oogmerk om zich die voorwerpen wederrechtelijk toe te eigenen, wordt, als schuldig

aan stroperij, gestraft met gevangenisstraf van ten hoogste een maand of geldboete van de tweede categorie.

- 2. Indien tijdens het plegen van het misdrijf nog geen twee jaren zijn verlopen sedert een vroegere veroordeling van de schuldige

wegens gelijk misdrijf onherroepelijk is geworden, wordt hij gestraft met gevangenisstraf van ten hoogste twee maanden of geldboete van

de tweede categorie.

Art. 315 . - 1. Met gevangenisstraf van ten hoogste drie jaren of geldboete van de vierde categorie wordt gestraft:

1° stroperij gepleegd met behulp van vaartuigen, wagens, trek- of lastdieren;

2° stroperij gepleegd onder een of meer der in artikel 311, eerste lid , onder 2°-5°, vermelde omstandigheden.

- 2. Ontzetting van de in artikel 28, eerste lid , onder 1°, 2° en 4°, vermelde rechten kan worden uitgesproken.

Art. 316 . - 1. Indien de dader van of medeplichtige aan een der in deze titel omschreven misdrijven de niet van tafel en bed of van

goederen gescheiden echtgenoot is van hem tegen wie het misdrijf is gepleegd, is de strafvervolging tegen die dader of die medeplichtige uitgesloten.

- 2. Indien hij zijn van tafel en bed of van goederen gescheiden echtgenoot is of zijn bloed- of aanverwant, hetzij in de rechte linie, hetzij in

de tweede graad van de zijlinie, heeft de vervolging, voor zover hem betreft, alleen plaats op een tegen hem gerichte klacht van degene tegen wie het misdrijf is gepleegd.

- 3. Indien het vorige lid van toepassing is, neemt de termijn bedoeld in artikel 66 een aanvang op de dag nadat de identiteit van de verdachte aan de tot de klacht gerechtigde bekend werd.

TITEL XXIII Afpersing en afdreiging

Art. 317 . - 1. Hij die, met het oogmerk om zich of een ander wederrechtelijk te bevoordelen, door geweld of bedreiging met geweld

iemand dwingt hetzij tot de afgifte van enig goed dat geheel of ten dele aan deze of aan een derde toebehoort, hetzij tot het aangaan van

een schuld of het teniet doen van een inschuld, hetzij tot het ter beschikking stellen van gegevens met geldswaarde in het handelsverkeer,

wordt, als schuldig aan afpersing, gestraft met gevangenisstraf van ten hoogste negen jaren of geldboete van de vijfde categorie.

- 2. Met dezelfde straf wordt gestraft hij die de dwang, bedoeld in het eerste lid, uitoefent door de bedreiging dat gegevens die door middel

van een geautomatiseerd werk zijn opgeslagen, onbruikbaar of ontoegankelijk zullen worden gemaakt of zullen worden gewist.

- 3. De bepalingen van het tweede en derde lid van artikel 312 zijn op dit misdrijf van toepassing.

Art. 318 . - 1. Hij die, met het oogmerk om zich of een ander wederrechtelijk te bevoordelen, door bedreiging met smaad, smaadschrift of

openbaring van een geheim iemand dwingt hetzij tot de afgifte van enig goed dat geheel of ten dele aan deze of aan een derde toebehoort,
hetzij tot het aangaan van een schuld of het teniet doen van een inschuld, hetzij tot het ter beschikking stellen van gegevens met
geldswaarde in het handelsverkeer, wordt als schuldig aan afdreiging, gestraft met gevangenisstraf van ten hoogste drie jaren of geldboete van de vijfde categorie.

- 2. Dit misdrijf wordt niet vervolgd dan op klacht van hem tegen wie het gepleegd is.

Art. 319 . De bepaling van artikel 316 is op de in deze titel omschreven misdrijven van toepassing.

Art. 320 . Bij veroordeling wegens een der in deze titel omschreven misdrijven, kan ontzetting van de in artikel 28, eerste lid , onder 1°, 2° en 4°, vermelde rechten worden uitgesproken.

TITEL XXIV Verduistering

Art. 321 . Hij die opzettelijk enig goed dat geheel of ten dele aan een ander toebehoort en dat hij anders dan door misdrijf onder zich heeft,
wederrechtelijk zich toeëigent, wordt, als schuldig aan verduistering, gestraft met gevangenisstraf van ten hoogste drie jaren of geldboete van de vijfde categorie.

Art. 322 . Verduistering gepleegd door hem die het goed uit hoofde van zijn persoonlijke dienstbetrekking of van zijn beroep, of tegen geldelijke vergoeding onder zich heeft, wordt gestraft met gevangenisstraf van ten hoogste vier jaren of geldboete van de vijfde categorie.

Art. 323 . Verduistering gepleegd door hem wie het goed uit noodzaak in bewaring is gegeven, of door voogden, curators, bewindvoerders, uitvoerders van uiterste wilsbeschikkingen of beheerders van instellingen van weldadigheid of van stichtingen, ten opzichte van enig goed dat zij als zodanig onder zich hebben, wordt gestraft met gevangenisstraf van ten hoogste vijf jaren of geldboete van de vijfde categorie.

Art. 324 . De bepaling van artikel 316 is op de in deze titel omschreven misdrijven van toepassing.

Art. 325 . - 1. Bij veroordeling wegens een der in deze titel omschreven misdrijven, kan de rechter de openbaarmaking van zijn uitspraak gelasten en ontzetting uitspreken van de in artikel 28, eerste lid , onder 1°, 2° en 4°, vermelde rechten.
- 2. Indien de schuldige het misdrijf in zijn beroep begaat, kan hij van de uitoefening van dat beroep

worden ontzet.

TITEL XXV Bedrog

Art. 326 . Hij die, met het oogmerk om zich of een ander wederrechtelijk te bevoordelen, hetzij door het aannemen van een valse naam of van een valse hoedanigheid, hetzij door listige kunstgrepen, hetzij door een samenweefsel van verdichtsels, iemand beweegt tot de afgifte van enig goed, tot het ter beschikking stellen van gegevens met geldswaarde in het handelsverkeer, tot het aangaan van een schuld of tot het teniet doen van een inschuld, wordt, als schuldig aan oplichting, gestraft met gevangenisstraf van ten hoogste drie jaren of geldboete van de vijfde categorie.

Art. 326a . Hij die een beroep of een gewoonte maakt van het kopen van goederen met het oogmerk om zonder volledige betaling zich of een ander de beschikking over die goederen te verzekeren, wordt gestraft met gevangenisstraf van ten hoogste drie jaren of geldboete van de vijfde categorie.

Art. 326bis . Vervallen.

Art. 326b . Met gevangenisstraf van ten hoogste twee jaren of geldboete van de vijfde categorie wordt gestraft:

1° hij die op of in een werk van letterkunde, wetenschap, kunst of nijverheid valselijk enige naam of enig teken plaatst, of de echte naam of het echte teken vervalst, met het oogmerk om daardoor aannemelijk te maken, dat dat werk zou zijn van de hand van degene wiens naam of teken hij daarop of daarin aanbracht;

2° hij die opzettelijk een werk van letterkunde, wetenschap, kunst of nijverheid, waarop of waarin valselijk enige naam of enig teken is geplaatst, of de echte naam of het echte teken is vervalst, verkoopt, te koop aanbiedt, aflevert, ten verkoop in voorraad heeft of binnen het

Rijk in Europa invoert, als ware dat werk van de hand van degene wiens naam of teken daarop of daarin valselijk is aangebracht.

Art. 326c . - 1. Hij die, met het oogmerk daarvoor niet volledig te betalen, door een technische ingreep of met behulp van valse signalen, gebruik maakt van een dienst die via telecommunicatie aan het publiek wordt aangeboden, wordt gestraft met gevangenisstraf van ten hoogste drie jaren of geldboete van de vijfde categorie.

- 2. Met gevangenisstraf van een jaar of geldboete van de derde categorie wordt gestraft hij die

opzettelijk een voorwerp dat kennelijk is bestemd, of gegevens die kennelijk zijn bestemd, tot het plegen van het misdrijf, bedoeld in het eerste lid,

- a. openlijk ter verspreiding aanbiedt;
- b. ter verspreiding of met het oog op de invoer in Nederland voorhanden heeft of
- c. uit winstbejag vervaardigt of bewaart.

- 3. Hij die van het plegen van misdrijven als bedoeld in het tweede lid, zijn beroep maakt of het plegen van deze misdrijven als bedrijf uitoefent wordt gestraft hetzij met gevangenisstraf van ten hoogste drie jaren en geldboete van de vijfde categorie, hetzij met één van deze straffen.

Art. 327 . Hij die door listige kunstgrepen de verzekeraar in dwaling brengt ten opzichte van omstandigheden tot de verzekering betrekking hebbende, zodat deze een overeenkomst sluit die hij niet of niet onder dezelfde voorwaarden zou hebben gesloten indien hij de ware staat van zaken gekend had, wordt gestraft met gevangenisstraf van ten hoogste een jaar of geldboete van de vijfde categorie.

Art. 328 . Hij die, met het oogmerk om zich of een ander, ten nadele van de verzekeraar, wederrechtelijk te bevoordelen, brand sticht of een ontploffing teweegbrengt in enig tegen brandgevaar verzekerd goed, of een vaartuig of luchtvaartuig dat verzekerd is of waarvan de zich aan boord bevindende zaken of de te verdienen vracht zijn verzekerd, doet zinken, stranden of verongelukken, vernielt, onbruikbaar maakt of beschadigt, wordt gestraft met gevangenisstraf van ten hoogste vier jaren of geldboete van de vijfde categorie.

Art. 328bis . Hij die, om het handels- of bedrijfsdebiet van zichzelf of van een ander te vestigen, te behouden of uit te breiden, enige bedrieglijke handeling pleegt tot misleiding van het publiek of van een bepaald persoon, wordt, indien daaruit enig nadeel voor concurrenten van hem of van die ander kan ontstaan, als schuldig aan oneerlijke mededinging, gestraft met gevangenisstraf van ten hoogste een jaar of geldboete van de vijfde categorie.

Art. 328ter . - 1. Hij die, anders dan als ambtenaar, werkzaam zijnde in dienstbetrekking of optredend als lasthebber, naar aanleiding van hetgeen hij in zijn betrekking of bij de uitvoering van zijn last heeft gedaan of nagelaten dan wel zal doen of nalaten, een gift of belofte aanneemt en dit aannemen in strijd met de goede trouw verzwijgt tegenover zijn werkgever of lastgever, wordt gestraft met gevangenisstraf van ten hoogste een jaar of geldboete van de vijfde categorie.

- 2. Met gelijke straf wordt gestraft hij die aan iemand die, anders dan als ambtenaar, werkzaam is in dienstbetrekking of optreedt als lasthebber, naar aanleiding van hetgeen deze in zijn betrekking of bij de uitvoering van zijn last heeft gedaan of nagelaten dan wel zal doen of nalaten, een gift of belofte doet van die aard of onder zodanige omstandigheden, dat hij redelijkerwijs moet aannemen dat deze de gift of belofte in strijd met de goede trouw zal verzwijgen tegenover zijn werkgever of lastgever.

Art. 328quater . - 1. Met gevangenisstraf van ten hoogste vier jaren of geldboete van de vijfde categorie wordt gestraft hij die een gift of een belofte aanneemt naar aanleiding van hetgeen hij heeft gedaan of nagelaten dan wel zal doen of nalaten in verband met een op hem of op de persoon bij wie hij in dienst is, rustende wettelijke plicht tot

- het verstrekken van inlichtingen betreffende telecommunicatie aan de ambtenaren van de justitie of politie, dan wel
- het verlenen van medewerking aan het aftappen of opnemen van telecommunicatie.

- 2. Met gelijke straf wordt gestraft hij die een ander een gift of een belofte doet naar aanleiding van hetgeen deze heeft gedaan of nagelaten dan wel zal doen of nalaten in verband met een op hem of op de persoon bij wie hij in dienst is, rustende wettelijke plicht als bedoeld in het eerste lid.

Art. 329 . Met gevangenisstraf van ten hoogste een jaar of geldboete van de vijfde categorie wordt gestraft de verkoper die de koper bedriegt:

- 1° door hem die een bepaald aangewezen voorwerp kocht, opzettelijk iets anders daarvoor in de plaats te leveren;
- 2° ten opzichte van de aard, de hoedanigheid of de hoeveelheid van het geleverde, door het aanwenden van listige kunstgrepen.

Art. 329bis . De houder van een cognossement die opzettelijk over verschillende exemplaren daarvan onder bezwarende titel beschikt ten behoeve van verschillende verkrijgers, wordt gestraft met gevangenisstraf van ten hoogste twee jaren of geldboete van de vijfde categorie.

Art. 330 . - 1. Hij die eet- of drinkwaren of geneesmiddelen verkoopt, te koop aanbiedt of aflevert, wetende dat zij vervalst zijn en die vervalsing verzwijgende, wordt gestraft met gevangenisstraf van ten hoogste drie jaren of geldboete van de vijfde categorie.

- 2. Eet- of drinkwaren of geneesmiddelen zijn vervalst wanneer door bijmenging van vreemde bestanddelen hun waarde of hun bruikbaarheid verminderd is.

Art. 331 . - 1. Met gevangenisstraf van ten hoogste zes jaren of geldboete van de vijfde categorie wordt gestraft de aannemer of de bouwmeester van enig werk of de verkoper van bouwmaterialen die bij de uitvoering van het werk of de levering van de materialen enige bedrieglijke handeling pleegt, ten gevolge waarvan de veiligheid van personen of goederen of de veiligheid van de staat in tijd van oorlog kan worden in gevaar gebracht.

- 2. Met dezelfde straf wordt gestraft hij die, met het opzicht over het werk of over de levering van de materialen belast, de bedrieglijke handeling opzettelijk toelaat.

Art. 332 . - 1. Hij die, bij levering van benodigdheden ten dienste van de vloot of het leger, enige bedrieglijke handeling pleegt, ten gevolge waarvan de veiligheid van de staat in tijd van oorlog kan worden in gevaar gebracht, wordt gestraft met gevangenisstraf van ten hoogste zes jaren of geldboete van de vijfde categorie.

- 2. Met dezelfde straf wordt gestraft hij die, met het opzicht over de levering van de goederen belast, de bedrieglijke handeling opzettelijk toelaat.

Art. 333 . Hij die, met het oogmerk om zich of een ander wederrechtelijk te bevoordelen, hetgeen tot afbakening van de grenzen van erven dient vernielt, verplaatst, verwijdert of onbruikbaar maakt, wordt gestraft met gevangenisstraf van ten hoogste twee jaren of geldboete van de vijfde categorie.

Art. 334 . Hij die, met het oogmerk om zich of een ander wederrechtelijk te bevoordelen, door het verspreiden van een leugenachtig bericht de prijs van koopwaren, fondsen of geldswaardig papier doet stijgen of dalen, wordt gestraft met gevangenisstraf van ten hoogste twee jaren of geldboete van de vijfde categorie.

Art. 335 . Vervallen.

Art. 336 . De koopman, de bestuurder, beherende vennoot of commissaris van een rechtspersoon of vennootschap, die opzettelijk een onware staat of een onware balans, winst- en verliesrekening, staat van baten en lasten of toelichting op een van die stukken openbaar maakt of zodanige openbaarmaking opzettelijk toelaat, wordt gestraft met gevangenisstraf van ten hoogste een jaar of geldboete van de vijfde categorie.

Art. 336a . Vervallen.

Art. 337 . - 1. Hij die opzettelijk:

- a. valse, vervalste of wederrechtelijk vervaardigde merken,
 - b. waren, die zelf of op hun verpakking valselijk zijn voorzien van de handelsnaam van een ander of van het merk waarop een ander recht heeft,
 - c. waren, die ter aanduiding van herkomst, valselijk van de naam van een bepaalde plaats, met bijvoeging van een verdichte handelsnaam, zijn voorzien,
 - d. waren, waarop of op de verpakking waarvan een handelsnaam van een ander of een merk waarop een ander recht heeft, zij het dan ook met een geringe afwijking, is nagebootst of
 - e. waren of onderdelen daarvan die valselijk hetzelfde uiterlijk vertonen als een tekening of model waarop een ander recht heeft, dan wel daarmede slechts ondergeschikte verschillen vertonen, invoert, doorvoert of uitvoert, verkoopt, te koop aanbiedt, aflevert, uitdeelt of in voorraad heeft, wordt gestraft met gevangenisstraf van ten hoogste één jaar of geldboete van de vijfde categorie.
- 2. Indien de schuldige van het plegen van het misdrijf, genoemd in het eerste lid, zijn beroep maakt of het plegen van dit misdrijf als bedrijf uitoefent, wordt hij gestraft met gevangenisstraf van ten hoogste vier jaren of geldboete van de vijfde categorie.
- 3. Indien door het plegen van het misdrijf, genoemd in het eerste lid, gemeen gevaar voor personen of goederen te duchten is, wordt de schuldige gestraft met gevangenisstraf van ten hoogste vier jaren of geldboete van de vijfde categorie.

Art. 338 . De bepaling van artikel 316 is op de in deze titel omschreven misdrijven van toepassing.

Art. 339 . - 1. Bij veroordeling wegens een der in deze titel omschreven misdrijven, kan de rechter de openbaarmaking van zijn uitspraak gelasten en de schuldige worden ontzet van de uitoefening van het beroep waarin hij het misdrijf begaan heeft.

- 2. Bij veroordeling wegens een der in de artikelen 326 , 328 , 331 en 332 omschreven misdrijven kan ontzetting van de in artikel 28, eerste lid , onder 1°, 2° en 4°, vermelde rechten worden uitgesproken.

TITEL XXVI Benadeling van schuldeisers of rechthebbenden

Art. 340 . Hij die in staat van faillissement is verklaard, wordt, als schuldig aan eenvoudige bankbreuk, gestraft met gevangenisstraf van ten hoogste een jaar of geldboete van de vijfde categorie:

1° indien zijn verteringen buitensporig zijn geweest;

2° indien hij, met het oogmerk om zijn faillissement uit te stellen, wetende dat het daardoor niet kon worden voorkomen, op bezwarende voorwaarden geldopnemingen heeft gedaan;

3° indien hij de boeken, bescheiden en andere gegevensdragers waarmee hij ingevolge artikel 15a van Boek 3 van het Burgerlijk Wetboek een administratie gevoerd heeft en de boeken, bescheiden en andere gegevensdragers die hij ingevolge dat artikel bewaard heeft, niet in ongeschonden staat te voorschijn brengt.

Art. 341 . Als schuldig aan bedriegelijke bankbreuk wordt gestraft hetzij met gevangenisstraf van ten hoogste zes jaren en geldboete van de vijfde categorie, hetzij met één van deze straffen, hij:

a. die in staat van faillissement is verklaard, indien hij ter bedrieglijke verkorting van de rechten van zijn schuldeisers:

1° hetzij lasten verdicht heeft of verdicht, hetzij baten niet verantwoord heeft of niet verantwoordt, hetzij enig goed aan de boedel

onttrokken heeft of onttrekt;

2° enig goed hetzij om niet, hetzij klaarblijkelijk beneden de waarde heeft vervreemd;

3° ter gelegenheid van zijn faillissement of op een tijdstip waarop hij wist dat het faillissement niet kon worden voorkomen, een van zijn schuldeisers op enige wijze bevoordeeld heeft of bevoordeelt;

4° niet voldaan heeft of niet voldoet aan de op hem rustende verplichtingen ten opzichte van het voeren van een administratie ingevolge

artikel 15a van Boek 3 van het Burgerlijk Wetboek, en het bewaren en te voorschijn brengen van boeken, bescheiden en gegevensdragers in dat artikel bedoeld;

b. te wiens aanzien de schuldsaneringsregeling natuurlijke personen van toepassing is verklaard, indien hij ter bedrieglijke verkorting van de rechten die zijn schuldeisers jegens de boedel kunnen doen gelden:

1° hetzij lasten verdicht heeft of verdicht, hetzij baten niet verantwoord heeft of niet verantwoordt, hetzij enig goed aan de boedel

onttrokken heeft of onttrekt;

2° enig goed hetzij om niet, hetzij klaarblijkelijk beneden de waarde heeft vervreemd;

3° ter gelegenheid van de toepassing van de schuldsaneringsregeling natuurlijke personen of op een tijdstip waarop hij wist dat hij niet zou

kunnen voortgaan met het betalen van zijn schulden, een van zijn schuldeisers op enige wijze bevoordeeld heeft of bevoordeelt;

4° niet voldaan heeft of niet voldoet aan de op hem rustende verplichtingen ten opzichte van het voeren van een administratie ingevolge

artikel 15a van Boek 3 van het Burgerlijk Wetboek, en het bewaren en te voorschijn brengen van boeken, bescheiden en gegevensdragers in dat artikel bedoeld.

Art. 342 . De bestuurder of commissaris van een rechtspersoon welke in staat van faillissement is verklaard, wordt gestraft met gevangenisstraf van ten hoogste een jaar of geldboete van de vijfde categorie:

1° indien hij heeft medegewerkt of zijn toestemming gegeven tot enige handeling, in strijd met enige wettige bepaling van statuten of reglementen, waaraan de door de rechtspersoon geleden verliezen geheel of grotendeels zijn te wijten;

2° indien hij, met het oogmerk om het faillissement van de rechtspersoon uit te stellen, wetende dat het daardoor niet kon worden voorkomen, heeft medegewerkt of zijn toestemming gegeven tot het doen van geldopnemingen op bezwarende voorwaarden;

3° indien aan hem te wijten is, dat aan de in artikel 10, eerste lid , van Boek 2 van het Burgerlijk Wetboek, artikel 15a, eerste lid , van boek 3 van het Burgerlijk Wetboek of artikel 5, eerste lid , van de Wet op de formeel buitenlandse vennootschappen in samenhang met artikel 10, eerste lid , van boek 2 van het Burgerlijk Wetboek omschreven verplichtingen niet is voldaan of dat de boeken, bescheiden en andere gegevensdragers, waarmee volgens die artikelen administratie gevoerd is, en de boeken, bescheiden en andere gegevensdragers die ingevolge die artikelen zijn bewaard, niet in ongeschonden staat worden te voorschijn gebracht.

Art. 343 . De bestuurder of commissaris van een rechtspersoon welke in staat van faillissement is verklaard, wordt gestraft met gevangenisstraf van ten hoogste zes jaren of geldboete van de vijfde categorie, indien hij ter bedrieglijke verkorting van de rechten der schuldeisers van de rechtspersoon:

1° hetzij lasten verdicht heeft of verdicht, hetzij baten niet verantwoord heeft of niet verantwoordt, hetzij enig goed aan de boedel onttrokken heeft of onttrekt;

2° enig goed hetzij om niet, hetzij klaarblijkelijk beneden de waarde heeft vervreemd;

3° ter gelegenheid van het faillissement of op een tijdstip waarop hij wist dat het faillissement niet kon worden voorkomen, een van de schuldeisers op enige wijze bevoordeeld heeft of bevoordeelt;

4° niet voldaan heeft of niet voldoet aan de op hem rustende verplichtingen ten opzichte van het voeren van een administratie ingevolge artikel 10, eerste lid , van Boek 2 van het Burgerlijk Wetboek, artikel 15a, eerste lid , van boek 3 van het Burgerlijk Wetboek of artikel 5, eerste lid , van de Wet op de formeel buitenlandse vennootschappen in samenhang met artikel 10, eerste lid , van boek 2 van het Burgerlijk Wetboek, en het bewaren en te voorschijn brengen van boeken, bescheiden en andere gegevensdragers in die artikelen bedoeld.

Art. 344 . Hetzij met gevangenisstraf van ten hoogste vier jaren en zes maanden en geldboete van de

vijfde categorie, hetzij met één van deze straffen wordt gestraft hij die:

1° in geval van faillissement, of in het vooruitzicht daarvan, indien het faillissement is gevolgd, ter bedrieglijke verkorting van de rechten der schuldeisers, enig goed aan de boedel onttrekt, of betaling aanneemt, hetzij van een niet opeisbare schuld, hetzij van een opeisbare schuld, in het laatste geval wetende dat het faillissement van de schuldenaar reeds was aangevraagd of ten gevolge van overleg met de schuldenaar;

2° bij verificatie van de schuldvorderingen in geval van faillissement, een niet bestaande schuldvordering voorwendt of een bestaande tot een verhoogd bedrag doet gelden;

3° in geval de schuldsaneringsregeling natuurlijke personen van toepassing is verklaard, of in het vooruitzicht daarvan, indien de toepassing wordt uitgesproken, ter bedrieglijke verkorting van de rechten die de schuldeisers jegens de boedel kunnen doen gelden, enig goed aan de boedel onttrekt, of betaling aanneemt op een vordering ten aanzien waarvan de schuldsaneringsregeling werkt, hetzij niet opeisbaar, hetzij opeisbaar, in het laatste geval wetende dat het verzoek tot het van toepassing verklaren van de schuldsaneringsregeling natuurlijke personen reeds was ingediend of tengevolge van overleg met de schuldenaar;

4° bij de verificatie van vorderingen in de schuldsaneringsregeling natuurlijke personen, een niet bestaande schuldvordering voorwendt of een bestaande tot een verhoogd bedrag doet gelden.

Art. 345 . - 1. De schuldeiser die tot een aangeboden gerechtelijk akkoord toetreedt ten gevolge van een overeenkomst hetzij met de schuldenaar, hetzij met een derde, waarbij hij bijzondere voordelen heeft bedongen, wordt, in geval van aanneming van het akkoord, gestraft met gevangenisstraf van ten hoogste een jaar of geldboete van de vijfde categorie.

- 2. Gelijke straf wordt in hetzelfde geval toegepast op de schuldenaar of, indien deze een rechtspersoon is, op de bestuurder of commissaris, die zodanige overeenkomst sluit.

Art. 346 . Vervallen.

Art. 347 . De bestuurder of commissaris van een rechtspersoon die, buiten het geval van artikel 342 , zijn medewerking heeft verleend of zijn toestemming gegeven tot enige handeling in strijd met enige wettige bepaling van de statuten of reglementen, tengevolge waarvan de rechtspersoon ernstig nadeel ondervindt, wordt gestraft met geldboete van de vijfde categorie.

Art. 348 . - 1. Hij die opzettelijk zijn eigen goed of, ten behoeve van degene aan wie het toebehoort, een

hem niet toebehorend goed

onttrekt aan een pandrecht, een retentierecht of een recht van vruchtgebruik of gebruik van een ander, wordt gestraft met een

gevangenisstraf van ten hoogste een jaar en zes maanden.

- 2. Met dezelfde straf wordt gestraft hij die opzettelijk een goed dat is onderworpen aan een pandrecht, een retentierecht of een recht

van vruchtgebruik of gebruik van een ander, vernielt, beschadigt of onbruikbaar maakt.

- 3. De bepaling van artikel 316 is op deze misdrijven van toepassing.

Art. 349 . - 1. Bij veroordeling wegens een der in de artikelen 341 , 343 en 344 omschreven misdrijven, kan de schuldige worden ontzet

van de in artikel 28, eerste lid , onder 1°, 2° en 4°, vermelde rechten.

- 2. Bij veroordeling wegens een der in de artikelen 340-345 omschreven misdrijven, kan openbaarmaking van de rechterlijke uitspraak

worden gelast.

Art. 349bis t/m 349quater . Vervallen.

TITEL XXVII Vernieling of beschadiging

Art. 350 . - 1. Hij die opzettelijk en wederrechtelijk enig goed dat geheel of ten dele aan een ander toebehoort, vernielt, beschadigt,

onbruikbaar maakt of wegmaakt, wordt gestraft met gevangenisstraf van ten hoogste twee jaren of geldboete van de vierde categorie.

- 2. Gelijke straf wordt toegepast op hem die opzettelijk en wederrechtelijk een dier dat geheel of ten dele aan een ander toebehoort,

doodt, beschadigt, onbruikbaar maakt of wegmaakt.

Art. 350a . - 1. Hij die opzettelijk en wederrechtelijk gegevens die door middel van een geautomatiseerd werk zijn opgeslagen, worden

verwerkt of overgedragen, verandert, wist, onbruikbaar of ontoegankelijk maakt, dan wel andere gegevens daaraan toevoegt, wordt

gestraft met gevangenisstraf van ten hoogste twee jaren of geldboete van de vierde categorie.

- 2. Hij die het feit, bedoeld in het eerste lid, pleegt na door tussenkomst van een openbaar telecommunicatienetwerk, wederrechtelijk in

een geautomatiseerd werk te zijn binnengedrongen en daar ernstige schade met betrekking tot die gegevens veroorzaakt, wordt gestraft

met gevangenisstraf van ten hoogste vier jaren of geldboete van de vierde categorie.

- 3. Hij die opzettelijk en wederrechtelijk gegevens ter beschikking stelt of verspreidt die bedoeld zijn om schade aan te richten door

zichzelf te vermenigvuldigen in een geautomatiseerd werk, wordt gestraft met gevangenisstraf van ten hoogste vier jaren of geldboete van

de vijfde categorie.

- 4. Niet strafbaar is degenen die het feit, bedoeld in het derde lid, pleegt met het oogmerk om schade als gevolg van deze gegevens te beperken.

Art. 350b . - 1. Hij aan wiens schuld te wijten is dat gegevens die door middel van een geautomatiseerd werk zijn opgeslagen, worden verwerkt of overgedragen, wederrechtelijk worden veranderd, gewist, onbruikbaar of ontoegankelijk gemaakt, dan wel dat andere gegevens daaraan worden toegevoegd, wordt, indien daardoor ernstige schade met betrekking tot die gegevens wordt veroorzaakt, gestraft met gevangenisstraf of hechtenis van ten hoogste een maand of geldboete van de tweede categorie.

- 2. Hij aan wiens schuld te wijten is dat gegevens wederrechtelijk ter beschikking gesteld of verspreid worden die bedoeld zijn om schade aan te richten door zichzelf te vermenigvuldigen in een geautomatiseerd werk, wordt gestraft met gevangenisstraf of hechtenis van ten hoogste een maand of geldboete van de tweede categorie.

Art. 351 . Hij die spoorweg- of elektriciteitswerken, geautomatiseerde werken voor opslag of verwerking van gegevens of werken voor telecommunicatie, werken dienend tot waterkering, waterlozing, gas- of waterleiding of riolering, voor zover deze werken ten algemene nutte gebezigd worden, dan wel goederen of werken ten behoeve van de landsverdediging, opzettelijk en wederrechtelijk vernielt, beschadigt, onbruikbaar maakt, onklaar maakt of weg maakt, wordt gestraft met gevangenisstraf van ten hoogste drie jaren of geldboete van de vierde categorie.

Art. 351bis . Hij aan wiens schuld te wijten is dat enig in het vorig artikel bedoeld goed of werk, vernield, beschadigt, onbruikbaar gemaakt, onklaar gemaakt of weggemaakt wordt, wordt gestraft met hechtenis van ten hoogste een maand of geldboete van de tweede categorie.

Art. 352 . Hij die opzettelijk en wederrechtelijk enig gebouw, vaartuig of zijn lading, installatie ter zee of luchtvaartuig dat geheel of ten dele aan een ander toebehoort, vernielt, beschadigt, onbruikbaar maakt of onklaar maakt, wordt gestraft met gevangenisstraf van ten hoogste vier jaren of geldboete van de vierde categorie.

Art. 353 . De bepaling van artikel 316 is op de in deze titel omschreven misdrijven van toepassing.

Art. 354 . Indien een der in deze titel omschreven misdrijven arglistig gepleegd wordt, of daarvan levensgevaar voor een ander is te duchten, kan de gevangenisstraf met een derde worden verhoogd.

TITEL XXVIII Ambtsmisdrijven

Art. 355 . Met gevangenisstraf van ten hoogste drie jaren of geldboete van de vierde categorie, worden gestraft de hoofden van ministeriële departementen:

1° die hun medeondertekening verlenen aan koninklijke besluiten of koninklijke beschikkingen, wetende dat daardoor de Grondwet of

andere wetten of algemene maatregelen van inwendig bestuur van de staat worden geschonden;

2° die uitvoering geven aan koninklijke besluiten of koninklijke beschikkingen, wetende dat deze niet van de vereiste medeondertekening

van een der hoofden van de ministeriële departementen zijn voorzien;

3° die beschikkingen nemen of bevelen geven of bestaande beschikkingen of bevelen handhaven, wetende dat daardoor de Grondwet of

andere wetten of algemene maatregelen van inwendig bestuur van de staat worden geschonden;

4° die opzettelijk nalaten uitvoering te geven aan de bepalingen van de Grondwet of andere wetten of algemene maatregelen van

inwendig bestuur van de staat, voor zover die uitvoering wegens de aard van het onderwerp tot hun ministeriële departementen behoort of uitdrukkelijk hun is opgedragen.

Art. 356 . Met hechtenis van ten hoogste zes maanden of geldboete van de derde categorie worden gestraft de hoofden van ministeriële departementen aan wier grove schuld te wijten is dat de in artikel 355 , onder 4°, omschreven uitvoering wordt nagelaten.

Art. 357 . De bevelhebber van de gewapende macht die weigert of opzettelijk nalaat op de wettige vordering van het bevoegde burgerlijk gezag de onder zijn bevel staande macht aan te wenden, wordt gestraft met gevangenisstraf van ten hoogste drie jaren of geldboete van de vierde categorie.

Art. 358 . - 1. De ambtenaar die opzettelijk de bijstand van de gewapende macht inroept tegen de uitvoering van wettelijke voorschriften, van wettige bevelen van het openbaar gezag of van rechterlijke uitspraken of bevellschriften, wordt gestraft met gevangenisstraf van ten hoogste zes jaren of geldboete van de vierde categorie.

- 2. Indien die uitvoering daardoor wordt verhinderd, wordt de schuldige gestraft met gevangenisstraf van ten hoogste negen jaren of

geldboete van de vijfde categorie.

Art. 358bis t/m 358quater . Vervallen.

Art. 359 . De ambtenaar of een ander met enige openbare dienst voortdurend of tijdelijk belast persoon, die opzettelijk geld of geldswaardig papier dat hij in zijn bediening onder zich heeft, verduistert of toelaat dat het door een ander weggenomen of verduisterd wordt, of die ander daarbij als medeplichtige ter zijde staat, wordt gestraft met gevangenisstraf van ten hoogste zes jaren of geldboete van de vijfde categorie.

Art. 360 . De ambtenaar of een ander met enige openbare dienst voortdurend of tijdelijk belast persoon, die opzettelijk boeken of registers, uitsluitend bestemd tot controle van de administratie, valselijk opmaakt of vervalst, wordt gestraft met gevangenisstraf van ten hoogste drie jaren of geldboete van de vijfde categorie.

Art. 361 . De ambtenaar of een ander met enige openbare dienst voortdurend of tijdelijk belast persoon, die opzettelijk zaken bestemd om voor de bevoegde macht tot overtuiging of bewijs te dienen, akten, bescheiden of registers, welke hij in zijn bediening onder zich heeft verduistert, vernielt, beschadigt of onbruikbaar maakt, of toelaat dat zij door een ander worden weggemaakt, vernield, beschadigd of onbruikbaar gemaakt, of die ander daarbij als medeplichtige ter zijde staat, wordt gestraft met gevangenisstraf van ten hoogste vier jaren en zes maanden of geldboete van de vijfde categorie.

Art. 362 . De ambtenaar die een gift of belofte aanneemt, wetende dat zij hem gedaan wordt ten einde hem te bewegen om, zonder daardoor in strijd met zijn plicht te handelen, in zijn bediening iets te doen of na te laten, wordt gestraft met gevangenisstraf van ten hoogste drie maanden of geldboete van de vijfde categorie.

Art. 363 . Met gevangenisstraf van ten hoogste vier jaren of geldboete van de vijfde categorie wordt gestraft de ambtenaar:

- 1° die een gift of belofte aanneemt, wetende dat zij hem gedaan wordt ten einde hem te bewegen om, in strijd met zijn plicht, in zijn bediening iets te doen of na te laten;
- 2° die een gift of belofte aanneemt, wetende dat zij hem gedaan wordt ten gevolge of naar aanleiding van hetgeen door hem, in strijd met zijn plicht, in zijn bediening is gedaan of nagelaten.

Art. 364 . - 1. De rechter die een gift of belofte aanneemt, wetende dat zij hem gedaan wordt ten einde invloed te oefenen op de beslissing van een aan zijn oordeel onderworpen zaak, wordt gestraft met gevangenisstraf van ten hoogste negen jaren of geldboete van de vijfde categorie.

- 2. Indien die gift of belofte wordt aangenomen met het bewustzijn dat zij gedaan wordt om een veroordeling in een strafzaak te verkrijgen, wordt de rechter gestraft met gevangenisstraf van ten hoogste twaalf jaren of geldboete van de vijfde categorie.

Art. 365 . De ambtenaar die door misbruik van gezag iemand dwingt iets te doen, niet te doen of te dulden, wordt gestraft met gevangenisstraf van ten hoogste twee jaren of geldboete van de vierde categorie.

Art. 366 . De ambtenaar die in de uitoefening van zijn bediening, als verschuldigd aan hemzelf, aan een ander ambtenaar of aan enige openbare kas, vordert of ontvangt of bij een uitbetaling terughoudt hetgeen hij weet dat niet verschuldigd is, wordt, als schuldig aan knevelarij, gestraft met gevangenisstraf van ten hoogste zes jaren of geldboete van de vijfde categorie.

Art. 367 . - 1. De ambtenaar die, belast met de bewaking van iemand die op openbaar gezag of krachtens rechterlijke uitspraak of beschikking van de vrijheid is beroofd, hem opzettelijk laat ontsnappen of bevrijdt of bij zijn bevrijding of zelfbevrijding behulpzaam is, wordt gestraft met gevangenisstraf van ten hoogste drie jaren of geldboete van de vierde categorie.

- 2. Indien de ontsnapping, bevrijding of zelfbevrijding aan zijn schuld te wijten is, wordt hij gestraft met hechtenis van ten hoogste twee maanden of geldboete van de tweede categorie.

Art. 368 . - 1. Met gevangenisstraf van ten hoogste drie jaren of geldboete van de vierde categorie wordt gestraft:

1° de ambtenaar, met het opsporen van strafbare feiten belast, die opzettelijk niet voldoet aan de vordering om van een wederrechtelijke vrijheidsberoving te doen blijken of daarvan aan de hogere macht opzettelijk niet onverwijld kennis geeft;

2° de ambtenaar die, na in de uitoefening van zijn bediening kennis te hebben bekomen dat iemand op onwettige wijze van de vrijheid is beroofd, opzettelijk nalaat daarvan onverwijld kennis te geven aan een ambtenaar met het opsporen van strafbare feiten belast.

- 2. De ambtenaar aan wiens schuld enig in dit artikel omschreven verzuim te wijten is, wordt gestraft met hechtenis van ten hoogste drie maanden of geldboete van de tweede categorie.

Art. 369 . Met gevangenisstraf van ten hoogste een jaar of geldboete van de derde categorie wordt gestraft het hoofd van een gesticht, bestemd tot opsluiting van veroordeelden, voorlopig aangehouden en of gegijzelden, of van een rijksinrichting voor kindbescherming of een psychiatrisch ziekenhuis, die weigert te voldoen aan een wettige vordering om iemand die in het gesticht of psychiatrisch ziekenhuis is opgenomen te vertonen, of om inzage te geven van het register van inschrijving of van de akte waarvan de wet de inschrijving vordert.

Art. 370 . - 1. De ambtenaar die, met overschrijding van zijn bevoegdheid of zonder inachtneming van de bij de wet bepaalde vormen, in de woning of het besloten lokaal of erf, bij een ander in gebruik, diens ondanks binnentreedt of, wederrechtelijk aldaar vertoevende, zich niet op de vordering van of vanwege de rechthebbende aanstonds verwijdert, wordt gestraft met gevangenisstraf van ten hoogste een jaar of geldboete van de derde categorie.

- 2. Met gelijke straf wordt gestraft de ambtenaar die ter gelegenheid van een huiszoeking met overschrijding van zijn bevoegdheid of zonder inachtneming van de bij de wet bepaalde vormen, geschriften, boeken of andere papieren onderzoekt of in beslag neemt.

Art. 371 . - 1. De ambtenaar die, met overschrijding van zijn bevoegdheid, zich doet overleggen of in beslag neemt een aan enige openbare instelling van vervoer toevertrouwde brief, briefkaart, stuk of pakket, of een telegrafisch bericht dat zich in handen bevindt van een ambtenaar van de telegrafie of van andere personen belast met de dienst van een ten algemenen nutte gebezigde telegraafinrichting, wordt gestraft met gevangenisstraf van ten hoogste twee jaren of geldboete van de vierde categorie.

- 2. Dezelfde straf wordt opgelegd aan de ambtenaar die, met overschrijding van zijn bevoegdheid, zich door een ambtenaar van de telefonie of door andere personen belast met de dienst van een ten algemenen nutte gebezigde telefooninrichting, doet inlichten ter zake van enig verkeer hetwelk door tussenkomst van die instelling is geschied.

Art. 372 . De ambtenaar van of een persoon werkzaam bij enige openbare instelling van vervoer die een aan zodanige instelling toevertrouwde brief, gesloten stuk of pakket opzettelijk en wederrechtelijk opent, daarvan inzage neemt of de inhoud aan een ander bekendmaakt, wordt gestraft met gevangenisstraf van ten hoogste een jaar en zes maanden of geldboete van de vierde categorie.

Art. 373 . - 1. De ambtenaar van of een persoon werkzaam bij enige openbare instelling van vervoer die

een aan zodanige instelling toevertrouwde brief, briefkaart, stuk of pakket opzettelijk aan een ander dan de rechthebbende afgeeft, vernietigt, wegmaakt, zich toeëigent, of de inhoud wijzigt of enig daarin gesloten voorwerp zich toeëigent, wordt gestraft met gevangenisstraf van ten hoogste vier jaren of geldboete van de vierde categorie.

- 2. Indien zodanig stuk of voorwerp geldswaarde heeft, wordt de toeëigening gestraft met gevangenisstraf van ten hoogste zes jaren of geldboete van de vierde categorie.

Art. 374 . De ambtenaar van de telegrafie of enig ander persoon belast met het toezicht op of met de dienst van een ten algemenen nutte gebezigde telegraafinrichting, wordt gestraft:

1° met gevangenisstraf van ten hoogste een jaar en zes maanden of geldboete van de vierde categorie, indien hij de inhoud van een aan de telegrafie of aan zodanige inrichting toevertrouwd bericht opzettelijk en wederrechtelijk aan een ander bekendmaakt of een telegram opzettelijk en wederrechtelijk opent, daarvan inzage neemt of de inhoud aan een ander bekendmaakt; 2° met gevangenisstraf van ten hoogste vier jaren of geldboete van de vierde categorie, indien hij een aan de telegrafie of aan zodanige inrichting toevertrouwd bericht of een telegram opzettelijk aan een ander dan de rechthebbende afgeeft, vernietigt, wegmaakt, zich toeëigent of de inhoud wijzigt.

Art. 374bis . Met gevangenisstraf van ten hoogste een jaar en zes maanden of geldboete van de vierde categorie wordt gestraft de ambtenaar of enig ander persoon belast met het toezicht op of met de dienst ten behoeve van een openbaar telecommunicatienetwerk of een openbare telecommunicatiedienst:

1° die opzettelijk en wederrechtelijk een door tussenkomst van deze infrastructuur verzorgde, niet voor hem of niet mede voor hem bestemde gegevensoverdracht afluistert, aftapt of opneemt; 2° die de beschikking heeft over een voorwerp waaraan, naar hij weet of redelijkerwijs moet vermoeden, een gegeven kan worden ontleend, dat door wederrechtelijk afluisteren, aftappen of opnemen van zodanige gegevensoverdracht is verkregen; 3° die opzettelijk en wederrechtelijk de inhoud van zodanige gegevensoverdracht aan een ander bekendmaakt; 4° die opzettelijk en wederrechtelijk een voorwerp waaraan een gegeven omtrent de inhoud van zodanige gegevensoverdracht kan worden ontleend, ter beschikking stelt van een ander.

Art. 375 . De ambtenaar van enige openbare instelling van vervoer of van de telegrafie of telefonie of

enig ander in de artikelen 372 tot en met 374 bis bedoeld persoon, die opzettelijk toelaat dat een ander een der in deze artikelen vermelde feiten pleegt, of die ander daarbij als medeplichtige ter zijde staat, wordt gestraft met de straffen en naar de onderscheidingen in die bepalingen vastgesteld.

Art. 376 . Met gevangenisstraf van ten hoogste zes maanden of geldboete van de vijfde categorie wordt gestraft de ambtenaar die opzettelijk deelneemt, middellijk of onmiddellijk, aan aannemingen of leveranties waarover hem op het tijdstip van de handeling geheel of ten dele het bestuur of toezicht is opgedragen.

Art. 377 . De ambtenaar van het muntwezen, behalve de muntmeester, of degene, in dienst van een waarborginstelling als bedoeld in artikel 7 van de Waarborgwet 1986, die handel drijft in edele metalen of daarvan vervaardigde voorwerpen, of opzettelijk aan zodanige handel middellijk of onmiddellijk deelneemt, wordt gestraft met gevangenisstraf van ten hoogste zes maanden of geldboete van de derde categorie.

Art. 378 . Degene, in dienst van een waarborginstelling als bedoeld in artikel 7 van de Waarborgwet 1986, die een te zijnen kantore aangeboden goud- of zilverwerk afdrukt of natrekt of daarvan een beschrijving geeft aan een ander dan die van ambtswege bevoegd is haar te vorderen, wordt gestraft met geldboete van de tweede categorie.

Art. 379 . - 1. De ambtenaar van de burgerlijke stand die meewerkt aan iemands huwelijksvoltrekking, wetende dat deze daardoor een dubbel huwelijk aangaat, wordt gestraft met gevangenisstraf van ten hoogste zes jaren of geldboete van de vierde categorie.

- 2. De ambtenaar van de burgerlijke stand die meewerkt aan iemands huwelijksvoltrekking, wetende dat daartegen enig ander wettig beletsel bestaat, wordt gestraft met gevangenisstraf van ten hoogste twee jaren of geldboete van de vierde categorie.

Art. 380 . - 1. Bij veroordeling wegens een der in de artikelen 355 , 357 en 358 omschreven misdrijven kan ontzetting van het in artikel 28, eerste lid , onder 3^o, vermelde recht worden uitgesproken.

- 2. Bij veroordeling wegens een der in de artikelen 359 , 363 , 364 , 366 , 373 , laatste lid, en 379 eerste lid , omschreven misdrijven kan ontzetting van het in artikel 28, eerste lid , onder 4^o, vermelde recht worden uitgesproken.

TITEL XXIX Scheepvaart- en luchtvaartmisdrijven

Art. 381 . - 1. Als schuldig aan zeeroof wordt gestraft:

1° met gevangenisstraf van ten hoogste twaalf jaren of geldboete van de vijfde categorie, hij die als schipper dienst neemt of dienst doet op een vaartuig, wetende dat het bestemd is of het gebruikende om in open zee daden van geweld te plegen tegen andere vaartuigen of tegen zich daarop bevindende personen of goederen, zonder door een oorlogvoerende mogendheid daartoe te zijn gemachtigd of tot de oorlogsmarine van een erkende mogendheid te behoren;

2° met gevangenisstraf van ten hoogste negen jaren of geldboete van de vijfde categorie, hij die, bekend met deze bestemming of dit gebruik, als schepeling dienst neemt op zodanig vaartuig of vrijwillig in dienst blijft na daarmede bekend te zijn geworden.

- 2. Met het gemis van machtiging wordt gelijkgesteld het overschrijden van de machtiging alsmede het voorzien zijn van machtigingen afkomstig van tegen elkander oorlog voerende mogendheden.

- 3. Artikel 81 blijft buiten toepassing.

- 4. Het in de vorige leden ten aanzien van de schipper en de schepeling bepaalde is van overeenkomstige toepassing ten aanzien van de gezagvoerder onderscheidenlijk het lid van de bemanning van een luchtvaartuig. Onder vaartuig wordt in de vorige leden luchtvaartuig begrepen en onder open zee het luchtruim daarboven.

Art. 382 . Indien de in artikel 381 omschreven daden van geweld de dood van een der zich op het aangevallen vaartuig of luchtvaartuig bevindende personen ten gevolge hebben, wordt de schipper of de gezagvoerder van het luchtvaartuig en worden zij die aan de daden van geweld hebben deelgenomen, met gevangenisstraf van ten hoogste vijftien jaren of geldboete van de vijfde categorie gestraft.

Art. 383 . Hij die voor eigen of vreemde rekening een vaartuig of luchtvaartuig uitrust met de in artikel 381 omschreven bestemming, wordt gestraft met gevangenisstraf van ten hoogste twaalf jaren of geldboete van de vijfde categorie.

Art. 384 . Hij die voor eigen of vreemde rekening middellijk of onmiddellijk medewerkt tot het verhuren, vervoeren of verzekeren van een vaartuig of luchtvaartuig, wetende dat het de in artikel 381 omschreven bestemming heeft, wordt gestraft met gevangenisstraf van ten hoogste acht jaren of geldboete van de vijfde categorie.

Art. 385 . Hij die een Nederlands vaartuig opzettelijk in de macht van zeeroovers brengt, wordt gestraft:

1° indien hij de schipper is met gevangenisstraf van ten hoogste twaalf jaren of geldboete van de vijfde categorie;

2° in alle andere gevallen met gevangenisstraf van ten hoogste negen jaren of geldboete van de vijfde categorie.

Art. 385a . - 1. Hij die een luchtvaartuig door geweld, bedreiging met geweld of vreesaanjaging in zijn macht brengt of houdt dan wel van zijn route doet afwijken, wordt gestraft met gevangenisstraf van ten hoogste twaalf jaren of geldboete van de vijfde categorie.

- 2. Indien twee of meer personen gezamenlijk of ten gevolge van samenspanning het feit plegen, of indien het feit zwaar lichamelijk letsel ten gevolge heeft, dan wel het feit is gepleegd met het oogmerk iemand wederrechtelijk van zijn vrijheid te beroven of beroofd te houden,

wordt gevangenisstraf van ten hoogste vijftien jaren of geldboete van de vijfde categorie opgelegd.

- 3. Indien het feit de dood ten gevolge heeft, wordt levenslange gevangenisstraf of tijdelijke van ten hoogste twintig jaren of geldboete van de vijfde categorie opgelegd.

- 4. De straffen in het eerste lid bepaald, zijn toepasselijk op degene die de in dit lid omschreven misdrijven pleegt ten aanzien van een vaartuig en een installatie ter zee.

Art. 385b . - 1. Hij die opzettelijk een daad van geweld begaat tegen iemand die zich aan boord van een luchtvaartuig in vlucht bevindt, wordt gestraft:

1° met gevangenisstraf van ten hoogste negen jaren of geldboete van de vijfde categorie, indien daarvan gevaar voor de veiligheid van het luchtvaartuig te duchten is;

2° met gevangenisstraf van ten hoogste twaalf jaren of geldboete van de vijfde categorie, indien daarvan gevaar voor de veiligheid van het luchtvaartuig te duchten is en het feit zwaar lichamelijk letsel voor een ander ten gevolge heeft;

3° met gevangenisstraf van ten hoogste vijftien jaren of geldboete van de vijfde categorie, indien daarvan gevaar voor de veiligheid van het luchtvaartuig te duchten is en het feit iemands dood ten gevolge heeft.

- 2. De straffen in het eerste lid bepaald, zijn toepasselijk op degene die de in dit lid omschreven misdrijven pleegt ten aanzien van een vaartuig en een installatie ter zee. Onder gevaar voor de veiligheid van het luchtvaartuig wordt in het eerste lid tevens begrepen gevaar voor de veilige vaart van het vaartuig.

Art. 385c . Hij die opzettelijk gegevens doorgeeft waarvan hij weet of ernstige reden heeft om te vermoeden dat zij onjuist zijn, wordt, indien daarvan gevaar voor een luchtvaartuig in vlucht of voor de veilige vaart van een vaartuig te duchten is, gestraft met gevangenisstraf

van ten hoogste vier jaren of geldboete van de vierde categorie.

Art. 385d . Hij die opzettelijk met gebruikmaking van een vuurwapen, een ontplofbare of anderszins gemeengevaarlijke stof of enig ander gemeengevaarlijk voorwerp, een daad van geweld begaat tegen iemand die zich in of in de onmiddellijke nabijheid van de vertrek- of aankomstruimten van een luchthaven bevindt, wordt gestraft:

1° met gevangenisstraf van ten hoogste negen jaren of geldboete van de vijfde categorie, indien daardoor levensgevaar voor andere

gebruikers van de luchthaven te duchten valt;

2° met gevangenisstraf van ten hoogste twaalf jaren of geldboete van de vijfde categorie, indien daardoor levensgevaar voor andere

gebruikers van de luchthaven te duchten valt en het feit zwaar lichamelijk letsel voor een ander ten gevolge heeft;

3° met gevangenisstraf van ten hoogste vijftien jaren of geldboete van de vijfde categorie, indien daardoor levensgevaar voor andere

gebruikers van de luchthaven te duchten valt en het feit iemands dood ten gevolge heeft.

Art. 386 . De opvarende van een Nederlands schip die zich wederrechtelijk van het schip meester maakt, wordt gestraft met gevangenisstraf van ten hoogste zes jaren of geldboete van de vierde categorie.

Art. 387 . De schipper van een Nederlands schip die het schip aan de eigenaar of de rederij onttrekt en ten eigen bate gebruikt, wordt gestraft met gevangenisstraf van ten hoogste zeven jaren en zes maanden of geldboete van de vijfde categorie.

Art. 388 . Met gevangenisstraf van ten hoogste vier jaren of geldboete van de vierde categorie wordt gestraft de Nederlander die zonder vergunning van de Nederlandse regering een kaperbrief aanneemt, of als schipper dienst neemt of dienst doet op een vaartuig, wetende dat het zonder vergunning van de Nederlandse regering voor de kaapvaart bestemd is.

Art. 389 . De Nederlander die als schepeling dienst neemt op een vaartuig, wetende dat het zonder vergunning van de Nederlandse regering voor de kaapvaart bestemd is of gebruikt wordt, of vrijwillig in dienst blijft na die bestemming of dat gebruik te hebben vernomen, wordt gestraft met gevangenisstraf van ten hoogste drie jaren of geldboete van de vierde categorie.

Art. 389bis . - 1. De schipper van een Nederlands vaartuig die een scheepsverklaring doet opmaken waarvan hij weet dat de inhoud in strijd is met de waarheid, wordt gestraft met gevangenisstraf van ten hoogste vier jaren of geldboete van

de vierde categorie.

- 2. De schepelingen die medewerken tot het doen opmaken van een scheepsverklaring waarvan zij weten dat de inhoud in strijd is met de waarheid, worden gestraft met gevangenisstraf van ten hoogste twee jaren of geldboete van de vierde categorie.

Art. 389ter . Hij die ter voldoening aan het voorschrift van het vierde lid van artikel 194 , van het vijfde lid van artikel 784 , van het eerste lid onder a ten derde van artikel 786 of van het vierde lid van artikel 1303 van Boek 8 van het Burgerlijk Wetboek een schriftelijke verklaring overlegt van welke hij weet dat de inhoud in strijd is met de waarheid, wordt gestraft met gevangenisstraf van ten hoogste vier jaren of geldboete van de vierde categorie.

Art. 390 . De schipper van een Nederlands vaartuig die gedurende de reis zich opzettelijk aan het voeren van het vaartuig onttrekt, wordt, indien die gedraging de veiligheid van de opvarenden, het vaartuig of de zaken aan boord daarvan in gevaar brengt, gestraft met gevangenisstraf van ten hoogste een jaar of geldboete van de derde categorie.

Art. 391 t/m 394bis . Vervallen.

Art. 395 . - 1. De opvarende van een Nederlands schip of zeevissersschip die aan boord de schipper, of de schepeling die aan boord of in dienst een meerdere in rang feitelijk aanrandt, zich met geweld of bedreiging met geweld tegen hem verzet of hem opzettelijk van zijn vrijheid van handelen berooft, wordt, als schuldig aan insubordinatie, gestraft met gevangenisstraf van ten hoogste twee jaren of geldboete van de vierde categorie.

- 2. De schuldige wordt gestraft:

1° met gevangenisstraf van ten hoogste drie jaren of geldboete van de vierde categorie, indien het misdrijf of de daarmede gepaard gaande feitelijkheden enig lichamelijk letsel ten gevolge hebben;

2° met gevangenisstraf van ten hoogste zeven jaren en zes maanden of geldboete van de vijfde categorie, indien zij zwaar lichamelijk letsel ten gevolge hebben;

3° met gevangenisstraf van ten hoogste twaalf jaren of geldboete van de vijfde categorie, indien zij de dood ten gevolge hebben.

Art. 396 . - 1. Insubordinatie gepleegd door twee of meer verenigde personen, wordt, als mouterij, gestraft met gevangenisstraf van ten hoogste zes jaren of geldboete van de vierde categorie.

- 2. De schuldige wordt gestraft:

1° met gevangenisstraf van ten hoogste zeven jaren en zes maanden of geldboete van de vijfde categorie, indien het door hem gepleegde

misdrijf of de daarbij door hem gepleegde feitelikheden enig lichamelijk letsel ten gevolge hebben;

2° met gevangenisstraf van ten hoogste twaalf jaren of geldboete van de vijfde categorie, indien zij zwaar lichamelijk letsel ten gevolge hebben;

3° met gevangenisstraf van ten hoogste vijftien jaren of geldboete van de vijfde categorie, indien zij de dood ten gevolge hebben.

Art. 397 . Hij die aan boord van een Nederlands schip of zeevissersschip tot muiterij op dat schip of vaartuig opruit, wordt gestraft met gevangenisstraf van ten hoogste vijf jaren of geldboete van de vierde categorie.

Art. 398 t/m 399 . Vervallen.

Art. 400 . - 1. Met gevangenisstraf van ten hoogste zes maanden of geldboete van de derde categorie wordt gestraft:

1° de opvarende van een Nederlands vaartuig die opzettelijk niet gehoorzaamt aan enig bevel van de schipper in het belang van de veiligheid aan boord gegeven;

2° de opvarende van een Nederlands vaartuig die, wetende dat de schipper van zijn vrijheid van handelen beroofd is, hem niet naar vermogen te hulp komt;

3° de opvarende van een Nederlands vaartuig die, kennis dragende van een voornemen tot het plegen van insubordinatie, opzettelijk nalaat daarvan tijdig aan de schipper kennis te geven;

4° de opvarende, niet zijnde schepeling, van een Nederlands vaartuig die opzettelijk niet gehoorzaamt aan enig bevel van de schipper tot handhaving van de orde en tucht aan boord gegeven.

- 2. De onder 3° vermelde bepaling is niet van toepassing indien de insubordinatie niet is gevolgd.

Art. 401 . De in de artikelen 386 , 389 , 395-397 en 400 bepaalde gevangenisstraffen kunnen met een derde worden verhoogd, indien de schuldige aan een der in die artikelen omschreven misdrijven scheepsofficier is.

Art. 402 . De schipper van een Nederlands schip die, met het oogmerk om zich of een ander wederrechtelijk te bevoordelen of zodanige

bevoordeling te bedekken, hetzij het schip verkoopt, hetzij geld opneemt op het schip, het scheepstoebehoren of de scheepsvoorraad,

hetzij zaken aan boord van het schip of zaken van de scheepsvoorraad verkoopt of verpand, hetzij verdichte schaden of uitgaven in

rekening brengt, hetzij niet zorgt dat aan boord de vereiste dagboeken overeenkomstig de wettelijke voorschriften worden gehouden,
hetzij bij het verlaten van het schip niet zorgt voor het behoud van de scheepspapieren, wordt gestraft met gevangenisstraf van ten hoogste zes jaren of geldboete van de vierde categorie.

Art. 403 . De schipper van een Nederlands schip die, met het oogmerk om zich of een ander wederrechtelijk te bevoordelen of zodanige bevoordeling te bedekken, van koers verandert, wordt gestraft met gevangenisstraf van ten hoogste drie jaren of geldboete van de vierde categorie.

Art. 404 . Vervallen.

Art. 405 . - 1. De schipper van een Nederlands vaartuig die, buiten noodzaak en buiten voorkennis van de eigenaar of de rederij, handelingen pleegt of gedooft, wetende dat deze het vaartuig of de zaken aan boord daarvan aan opbrenging, aanhouding of ophouding kunnen blootstellen, wordt gestraft met gevangenisstraf van ten hoogste een jaar of geldboete van de derde categorie.

- 2. De opvarende die, buiten noodzaak en buiten voorkennis van de schipper, met gelijke wetenschap gelijke handelingen pleegt, wordt gestraft met gevangenisstraf van ten hoogste negen maanden of geldboete van de derde categorie.

Art. 406 . De schipper van een Nederlands schip die opzettelijk buiten noodzaak aan een opvarende niet verschaft datgene wat hij verplicht is hem te verschaffen, wordt gestraft met gevangenisstraf van ten hoogste twee jaren of geldboete van de vierde categorie.

Art. 407 . De schipper van een Nederlands schip die opzettelijk buiten noodzaak of in strijd met enig wettelijk voorschrift goederen werpt, wordt gestraft met gevangenisstraf van ten hoogste twee jaren of geldboete van de vierde categorie.

Art. 408 . Hij die zaken aan boord van een vaartuig, opzettelijk en wederrechtelijk vernielt, beschadigt of onbruikbaar maakt, wordt gestraft met gevangenisstraf van ten hoogste twee jaren of geldboete van de vierde categorie.

Art. 409 . De schipper die de Nederlandse vlag voert, wetende dat hij daartoe niet gerechtigd is, wordt gestraft met gevangenisstraf van ten hoogste een jaar of geldboete van de derde categorie.

Art. 410 . De schipper die opzettelijk door het voeren van enig onderscheidingsteken aan zijn vaartuig

de schijn geeft alsof het een Nederlands oorlogsvaartuig ware, of een loodsvaartuig in Nederlandse wateren of zeegaten dienst doende, wordt gestraft met gevangenisstraf van ten hoogste drie maanden of geldboete van de tweede categorie.

Art. 411 . Hij die buiten noodzaak op een Nederlands vaartuig optreedt als schipper, stuurman of machinist, wetende dat hij ingevolge wettelijk voorschrift daartoe onbevoegd is, wordt gestraft met gevangenisstraf van ten hoogste zes maanden of geldboete van de derde categorie.

Art. 412 . De schipper van een Nederlands schip die zonder geldige reden weigert te voldoen aan een wettelijke vordering om een beklaagde of veroordeelde benevens de tot zijn zaak betrekkelijke stukken aan boord te nemen, wordt gestraft met een gevangenisstraf van ten hoogste drie maanden of geldboete van de tweede categorie.

Art. 413 . - 1. De schipper van een Nederlands schip die een beklaagde of veroordeelde die hij op een wettelijke vordering aan boord genomen heeft, opzettelijk laat ontsnappen of bevrijdt, of bij zijn bevrijding of zelfbevrijding behulpzaam is, wordt gestraft met gevangenisstraf van ten hoogste drie jaren of geldboete van de vierde categorie.
- 2. Indien de ontsnapping, bevrijding of zelfbevrijding aan zijn schuld is te wijten, wordt hij gestraft met hechtenis van ten hoogste twee maanden of geldboete van de tweede categorie.

Art. 414 . De schipper die de krachtens het eerste lid van artikel 358a of van artikel 785 van het Wetboek van Koophandel op hem rustende verplichting tot hulpverlening, opzettelijk niet nakomt, wordt gestraft met gevangenisstraf van ten hoogste drie jaren of geldboete van de vierde categorie.

Art. 415 . Bij veroordeling wegens een der in de artikelen 381-387 , 402 en 403 omschreven misdrijven kan ontzetting van de in artikel 28, eerste lid , onder 1^o, 2^o en 4^o, vermelde rechten worden uitgesproken.

TITEL XXX Begunstiging

Art. 416 . - 1. Als schuldig aan opzetheling wordt gestraft met gevangenisstraf van ten hoogste vier jaren of geldboete van de vijfde categorie:
a. hij die een goed verwerft, voorhanden heeft of overdraagt, dan wel een persoonlijk recht op of een

zakelijk recht ten aanzien van een goed vestigt of overdraagt, terwijl hij ten tijde van de verwerving of het voorhanden krijgen van het goed dan wel het vestigen van het recht wist dat het een door misdrijf verkregen goed betrof;

b. hij die opzettelijk uit winstbejag een door misdrijf verkregen goed voorhanden heeft of overdraagt, dan wel een persoonlijk recht op of zakelijk recht ten aanzien van een door misdrijf verkregen goed overdraagt.

- 2. Met dezelfde straf wordt gestraft hij die opzettelijk uit de opbrengst van enig door misdrijf verkregen goed voordeel trekt.

Art. 417 . Hij die van het plegen van opzetheling een gewoonte maakt, wordt gestraft met gevangenisstraf van ten hoogste zes jaren of geldboete van de vijfde categorie.

Art. 417bis . - 1. Als schuldig aan schuldheiling wordt gestraft met gevangenisstraf van ten hoogste een jaar of geldboete van de vijfde categorie:

a. hij die een goed verwerft, voorhanden heeft of overdraagt, dan wel een persoonlijk recht op of zakelijk recht ten aanzien van een goed vestigt of overdraagt, terwijl hij ten tijde van de verwerving of het voorhanden krijgen van het goed dan wel het vestigen van het recht

redelijkerwijs had moeten vermoeden dat het een door misdrijf verkregen goed betrof;

b. hij die uit winstbejag een goed voorhanden heeft of overdraagt dan wel een persoonlijk recht op of zakelijk recht ten aanzien van een goed overdraagt, terwijl hij redelijkerwijs moet vermoeden dat het een door misdrijf verkregen goed betreft.

- 2. Met dezelfde straf wordt gestraft hij die uit de opbrengst van enig goed voordeel trekt, terwijl hij redelijkerwijs moet vermoeden dat het een door misdrijf verkregen goed betreft.

Art. 417ter . Bij veroordeling wegens een der in de artikelen 416-417bis omschreven misdrijven kan ontzetting van de in artikel 28, eerste lid , onder 1^o, 2^o en 4^o, vermelde rechten worden uitgesproken en kan de schuldige worden ontzet van de uitoefening van het beroep waarin hij het misdrijf begaan heeft.

Art. 418 . Hij die enig geschrift of enige afbeelding uitgeeft van strafbare aard, wordt gestraft met gevangenisstraf of hechtenis van ten hoogste een jaar of geldboete van de derde categorie, indien:

1^o de dader noch bekend is, noch op de eerste aanmaning nadat tot het instellen van een gerechtelijk vooronderzoek is overgegaan, is bekendgemaakt;

2^o de uitgever wist of moest verwachten dat de dader op het tijdstip van de uitgave strafrechtelijk niet

vervolgbaar of buiten het Rijk in Europa gevestigd zou zijn.

Art. 419 . Hij die enig geschrift of enige afbeelding drukt van strafbare aard, wordt gestraft met gevangenisstraf of hechtenis van ten hoogste een jaar of geldboete van de derde categorie, indien:

1° de persoon op wiens last het stuk gedrukt is noch bekend is, noch op de eerste aanmaning nadat tot het instellen van een gerechtelijk vooronderzoek is overgegaan, is bekendgemaakt;
2° de drukker wist of moest verwachten dat de persoon op wiens last het stuk gedrukt is, op het tijdstip van de uitgave strafrechtelijk niet vervolgbaar of buiten het Rijk in Europa gevestigd zou zijn.

Art. 420 . Indien de aard van het geschrift of de afbeelding een misdrijf oplevert dat alleen op klacht vervolgbaar is, kan de uitgever of drukker in de gevallen der beide voorgaande artikelen alleen vervolgd worden op klacht van hem tegen wie dat misdrijf gepleegd is.

TITEL XXXI Bepalingen over herhaling van misdrijf aan verschillende titels gemeen

Art. 421 . De in de artikelen 105 , 174 , 208-212 , 216-222bis , 225-229 , 310-312 , 315 , 317 , 318 , 321-323 , 326-332 , 341 , 343 , 344 , 359 , 361 , 366 , 373 , laatste lid, 402 , 416 en 417 bepaalde gevangenisstraf kan met een derde worden verhoogd, indien tijdens het plegen van het misdrijf nog geen vijf jaren zijn verlopen sedert de schuldige hetzij een tegen hem wegens een der in die artikelen omschreven misdrijven uitgesproken gevangenisstraf, hetzij een wegens diefstal, verduistering, heling, het opzettelijk voordeel trekken uit de opbrengst van enig door misdrijf verkregen goed, of bedrog krachtens de militaire wetten opgelegde straf, geheel of ten dele heeft ondergaan, of sedert die straf hem geheel is kwijtgescholden; of indien tijdens het plegen van het misdrijf het recht tot uitvoering van die straf nog niet is verjaard.

Art. 422 . De in de artikelen 108, eerste lid , 109 , 110 , 115, eerste lid , 116 , 141 , 181 , 182 , 287 , 290 , 291 , 293 , 296 , 300-303 , 381 , 382 , 395 en 396 bepaalde gevangenisstraf, alsmede de tijdelijke gevangenisstraf op te leggen krachtens de artikelen 92 , 108, tweede lid , 115, tweede lid , 288 en 289 , kan met een derde worden verhoogd, indien tijdens het plegen van het misdrijf nog geen vijf jaren zijn verlopen sedert de schuldige hetzij een tegen hem wegens een der in die artikelen omschreven misdrijven uitgesproken gevangenisstraf, hetzij een

wegens gewelddadig verzet tegen of mishandeling van meerderen of schildwachten, of van geweldenarijen tegen personen krachtens de militaire wetten opgelegde straf geheel of ten dele heeft ondergaan, of sedert die straf hem geheel is kwijtgescholden; of indien tijdens het plegen van het misdrijf het recht tot uitvoering van die straf nog niet is verjaard.

Art. 423 . De in de artikelen 111-113 , 117-119 , 261-271 , 418 en 419 bepaalde gevangenisstraf of hechtenis kan met een derde worden verhoogd, indien tijdens het plegen van het misdrijf nog geen vijf jaren zijn verlopen sedert de schuldige een tegen hem wegens een der in die artikelen omschreven misdrijven uitgesproken gevangenisstraf geheel of ten dele heeft ondergaan, of sedert die straf hem geheel is kwijtgescholden; of indien tijdens het plegen van het misdrijf het recht tot uitvoering van die straf nog niet is verjaard.

TITEL I Overtredingen betreffende de algemene veiligheid van personen en goederen

Art. 424 . - 1. Hij die op of aan de openbare weg of op enige voor het publiek toegankelijke plaats tegen personen of goederen enige baldadigheid pleegt waardoor gevaar of nadeel kan worden teweeggebracht, wordt, als schuldig aan straatschenderij, gestraft met geldboete van de eerste categorie.

- 2. Indien tijdens het plegen van de overtreding nog geen jaar is verlopen sedert een vroegere veroordeling van de schuldige wegens gelijke overtreding onherroepelijk is geworden, kan hechtenis van ten hoogste drie dagen of geldboete van de eerste categorie worden opgelegd.

Art. 425 . Met hechtenis van ten hoogste zes maanden of geldboete van de derde categorie wordt gestraft:

1° hij die een dier op een mens aanhitst of een onder zijn hoede staand dier, wanneer het een mens

aanvalt, niet terughoudt;

2° hij die geen voldoende zorg draagt voor het onschadelijk houden van een onder zijn hoede staand gevaarlijk dier.

Art. 426 . - 1. Hij die, terwijl hij in staat van dronkenschap verkeert, hetzij in het openbaar het verkeer belemmert of de orde verstoort, hetzij eens anders veiligheid bedreigt, hetzij enige handeling verricht waarbij, tot voorkoming van gevaar voor leven of gezondheid van derden, bijzondere omzichtigheid of voorzorgen worden vereist, wordt gestraft met hechtenis van ten hoogste zes dagen of geldboete van de eerste categorie.

- 2. Indien tijdens het plegen van de overtreding nog geen jaar is verlopen sedert een vroegere veroordeling van de schuldige wegens gelijke of de in artikel 453 omschreven overtreding onherroepelijk is geworden, wordt hij gestraft met hechtenis van ten hoogste twee weken of geldboete van de tweede categorie.

Art. 426bis . Hij die wederrechtelijk op de openbare weg een ander in zijn vrijheid van beweging belemmert of met een of meer anderen zich aan een ander tegen diens uitdrukkelijk verklaarde wil blijft opdringen of hem op hinderlijke wijze blijft volgen, wordt gestraft met hechtenis van ten hoogste een maand of geldboete van de tweede categorie.

Art. 427 . Met geldboete van de eerste categorie wordt gestraft:

1° de eigenaar of gebruiker die ten opzichte van toegangen tot of openingen van kluizen, kelders, onderaardse lokalen en ruimten, waar die op de openbare weg uitkomen, niet de nodige voorzorgsmaatregelen neemt ten behoeve van de veiligheid van de voorbijgangers;

2° hij die niet zorgt dat een door hem of op zijn last op een openbare weg gedane op- of uitgraving of een door hem of op zijn last op de openbare weg geplaatst voorwerp behoorlijk verlicht en van de gebruikelijke tekens voorzien is;

3° hij die bij een verrichting op of aan de openbare weg niet de nodige maatregelen neemt om voorbijgangers tegen mogelijk gevaar te waarschuwen;

4° hij die iets plaatst op of aan, of werpt of uitgiet uit een gebouw, op zodanige wijze dat door of ten gevolge daarvan iemand die van de openbare weg gebruik maakt, nadeel kan ondervinden;

5° hij die op de openbare weg een rij-, trek- of lastdier laat staan, zonder de nodige voorzorgsmaatregelen tegen het aanrichten van schade te hebben genomen;

6° hij die zonder verlof van het bevoegd gezag, enige openbare land- of waterweg verspert of het verkeer daarop belemmert.

Art. 428 . Hij die, zonder verlof van de burgemeester of van de door deze aangewezen ambtenaar, een of meer eigen onroerende zaken in brand steekt, wordt gestraft met geldboete van de eerste categorie.

Art. 429 . Met hechtenis van ten hoogste veertien dagen of geldboete van de tweede categorie wordt gestraft:

1° hij die een vuurwapen afschiet, een vuurwerk ontsteekt of een vuur aanlegt, voedt of onderhoudt op zo korte afstand van gebouwen of

goederen, dat daardoor brandgevaar kan ontstaan;

2° hij die, anders dan in de gevallen toegelaten bij of krachtens de Luchtvaartwet , een ballon oplaat waaraan brandende stoffen gehecht

zijn;

3° hij die door gebrek aan de nodige omzichtigheid of voorzorg gevaar voor bos-, heide-, helm-, gras- of veenbrand doet ontstaan;

4° hij die wederrechtelijk in oppervlaktewateren enige stof aanbrengt waardoor nadeel kan ontstaan in verband met het gebruik dat

gewoonlijk van die wateren wordt gemaakt;

5° hij die een vlieger oplaat of in de lucht heeft aan een lijn die zich geheel of ten dele bevindt binnen een afstand van vijfhonderd meter van

een bovengrondse elektrische hoogspanningsleiding.

TITEL II Overtredingen betreffende de openbare orde

Art. 429bis . Hij die op een van de openbare weg zichtbare plaats woorden of afbeeldingen stelt of gesteld houdt, die, als smalende godslasteringen, voor godsdienstige gevoelens krenkend zijn, wordt gestraft met hechtenis van ten hoogste een maand of geldboete van de tweede categorie.

Art. 429ter . Vervallen.

Art. 429quater . Hij die in de uitoefening van een ambt, beroep of bedrijf personen discrimineert wegens hun ras, hun godsdienst, hun levensovertuiging, hun geslacht of hun hetero- of homoseksuele gerichtheid wordt gestraft met hechtenis van ten hoogste twee maanden of geldboete van de derde categorie.

Art. 429quinquies . Hij die zonder daartoe gerechtigd te zijn zich op een verboden plaats bevindt, wordt gestraft met hechtenis van ten hoogste zes maanden of geldboete van de derde categorie.

Art. 429sexies . - 1. Hij die een door hem wederrechtelijk in gebruik genomen woning of gebouw,

waarvan het gebruik door de rechthebbende niet meer dan twaalf maanden voorafgaande aan die wederrechtelijke ingebruikname is beëindigd, op vordering van of vanwege de rechthebbende niet aanstonds ontruimt, wordt gestraft met hechtenis van ten hoogste vier maanden of geldboete van de derde categorie.

- 2. Met dezelfde straf wordt gestraft hij die, vertoevende in een wederrechtelijk in gebruik genomen woning of gebouw, waarvan het gebruik door de rechthebbende niet meer dan twaalf maanden voorafgaande aan die wederrechtelijke ingebruikname is beëindigd, zich op de vordering van of vanwege de rechthebbende niet aanstonds verwijdert.

Art. 430 . Hij die zonder verlof van het bevoegd gezag een opneming doet, een tekening of beschrijving maakt van enig militair werk, of die openbaar maakt, wordt gestraft met hechtenis van ten hoogste twee maanden of geldboete van de derde categorie.

Art. 430a . Hij die zich buiten een door de gemeenteraad als geschikt voor ongeklede openbare recreatie aangewezen plaats, ongekleeft bevindt op of aan een voor het openbaar verkeer bestemde plaats die voor ongeklede recreatie niet geschikt is, wordt gestraft met geldboete van de eerste categorie.

Art. 431 . Met geldboete van de eerste categorie wordt gestraft hij die rumoer of burengerucht verwekt waardoor de nachtrust kan worden verstoord.

Art. 432 . Met hechtenis van ten hoogste twaalf dagen of geldboete van de eerste categorie wordt gestraft:

1° als schuldig aan bedelarij, hij die in het openbaar bedelt;

2° als schuldig aan landloperij, hij die zonder middelen van bestaan rondzwerft;

3° hij die als souteneur uit de ontucht van een vrouw voordeel trekt.

Art. 433 . Bedelarij of landloperij, gepleegd door drie of meer personen boven de leeftijd van zestien jaren, wordt gestraft met hechtenis van ten hoogste drie maanden of geldboete van de tweede categorie.

Art. 434 . Vervallen.

Art. 435 . Met geldboete van de tweede categorie wordt gestraft:

1° hij die zonder daartoe gerechtigd te zijn een Nederlandse adellijke titel voert of een Nederlands ordeteken draagt;

2° hij die zonder 's Konings verlof waar dit vereist wordt, een vreemd ordeteken, titel, rang of waardigheid aanneemt;

3° hij die zonder daartoe gerechtigd te zijn de titel van advocaat of van procureur, dan wel een der in de artikelen 7.20 en 7.22 van de Wet

op het hoger onderwijs en wetenschappelijk onderzoek genoemde titels voert;

4° hij die, door het bevoegd gezag naar zijn identiteitsgegevens gevraagd, een valse naam, voornaam, geboortedatum, geboorteplaats, adres waarop hij in de basisadministratie persoonsgegevens als ingezetene staat ingeschreven of woon- of verblijfplaats opgeeft.

Art. 435a . Hij die in het openbaar kledingstukken of opzichtige onderscheidingstekens draagt of voert, welke uitdrukking zijn van een bepaald staatkundig streven, wordt gestraft met hechtenis van ten hoogste twaalf dagen of geldboete van de tweede categorie.

Art. 435b . - 1. Hij die, zonder daartoe gerechtigd te zijn, gebruik maakt van woorden, uitdrukkingen of kentekens, die aanduiden of de indruk kunnen wekken dat zijn optreden is bevorderd dan wel de steun of de erkenning geniet van rijkswege, vanwege de Nederlandse Antillen, Aruba of een buitenlandse mogendheid dan wel vanwege een volkenrechtelijke organisatie, wordt gestraft met hechtenis van ten hoogste een maand of geldboete van de tweede categorie.

- 2. Vervallen.

- 3. Bij veroordeling wegens de in het eerste lid omschreven overtreding, kan openbaarmaking van de rechterlijke uitspraak worden gelast.

Art. 435c . Hij die, zonder daartoe gerechtigd te zijn, gebruik maakt van het rode-kruisteken of van de woorden 'Rode Kruis' of 'Kruis van Genève', of van daarmede door de wetten en gebruiken van de oorlog gelijkgestelde tekens of woorden, dan wel van tekens of woorden die daarvan een nabootsing zijn, wordt gestraft met hechtenis van ten hoogste een maand of geldboete van de tweede categorie.

Art. 435d . Met hechtenis van ten hoogste een maand of geldboete van de tweede categorie wordt gestraft hij die het wapen van het

Zwitserse Eedgenootschap of een teken hetwelk een nabootsing daarvan vormt, gebruikt:

1° hetzij als fabrieks- of handelsmerk of als onderdeel van zulk een merk;

2° hetzij met een doel, strijdig met de eerlijkheid in de handel;

3° hetzij onder omstandigheden die het Zwitserse nationale gevoel zouden kunnen krenken.

Art. 435e . Hij die, anders dan in besloten kring, door tussenkomst van een ten algemenen nutte of mede

ten algemenen nutte gebezigde telefooninrichting, goederen of diensten tegen betaling aanbiedt, daarbij te kennen gevend of de indruk wekkend dat de opbrengst geheel of ten dele voor een liefdadig of ideëel doel is bestemd, wordt gestraft met geldboete van de derde categorie.

Art. 435f . Hij die bij gelegenheid van een voetbalwedstrijd waaraan een club uit het betaald voetbal of een vertegenwoordigend voetbalelftal deelneemt, niet terstond voldoet aan een vordering tot inzage van een document als bedoeld in artikel 1 van de Wet op de identificatieplicht (Stb. 1993, 660) of van een geldig rijbewijs dat is afgegeven op basis van de Wegenverkeerswet dan wel een geldig rijbewijs als bedoeld in artikel 107 van de Wegenverkeerswet 1994, welke vordering wordt gedaan door bij of krachtens artikel 141 van het Wetboek van Strafvordering aangewezen ambtenaren of door bepaalde door Onze Minister van Justitie aangewezen categorieën van andere personen, met de opsporing van strafbare feiten belast, voor zover dit redelijkerwijs voor de vervulling van hun taak nodig is bij de handhaving van de openbare orde en bij de opsporing van strafbare feiten, wordt gestraft met hechtenis van ten hoogste twee maanden of geldboete van de tweede categorie.

Art. 435g . Vervallen.

Art. 436 . - 1. Hij die, niet toegelaten tot de uitoefening van een beroep waartoe de wet een toelating vordert, buiten noodzaak dat beroep uitoefent, wordt gestraft met geldboete van de tweede categorie.

- 2. Hij die, toegelaten tot de uitoefening van een beroep waartoe de wet een toelating vordert, buiten noodzaak in de uitoefening van dat beroep de grenzen van zijn bevoegdheid overschrijdt, wordt gestraft met geldboete van de tweede categorie.

- 3. Indien tijdens het plegen van de overtreding nog geen twee jaren zijn verlopen sedert een vroegere veroordeling van de schuldige wegens gelijke overtreding onherroepelijk is geworden, kan in het geval van het eerste lid hechtenis van ten hoogste twee maanden of geldboete van de derde categorie, in het geval van het tweede lid hechtenis van ten hoogste een maand of geldboete van de derde categorie worden opgelegd.

Art. 436a . - 1. Degene die te kennen geeft of de indruk wekt dat hij makelaar is, zonder dit te zijn of terwijl hij als zodanig is geschorst, wordt gestraft met een geldboete van de tweede categorie.

- 2. Met gelijke straf wordt gestraft de makelaar die het bepaalde in de tweede zin van artikel 66 of in

artikel 66b van het Wetboek van Koophandel overtreedt.

- 3. Indien een vennootschap of rechtspersoon die niet voldoet aan de in artikel 66a van het Wetboek van Koophandel gestelde

voorwaarden, te kennen geeft of de indruk wekt dat zij zich op het gebied van de makelaardij beweegt, of indien een vennootschap of

rechtspersoon het bepaalde in de tweede zin van het eerste lid of in de tweede zin van het tweede lid van artikel 66a dan wel het bepaalde

in artikel 66b van het Wetboek van Koophandel overtreedt, wordt deze gestraft met een geldboete van de tweede categorie.

- 4. Indien ten tijde van het plegen van een der in de eerste twee leden omschreven overtredingen nog geen jaar is verlopen sedert een

vroegere veroordeling van de schuldige wegens een van die overtredingen onherroepelijk is geworden, wordt hij gestraft met hechtenis

van ten hoogste twee weken of geldboete van de derde categorie.

- 5. Het bepaalde in het vorige lid is van overeenkomstige toepassing op de beherende vennoten en bestuurders van een vennootschap of

rechtspersoon met betrekking tot een in het derde lid omschreven overtreding.

Art. 437 . - 1. Met hechtenis van ten hoogste zes maanden of geldboete van de derde categorie wordt gestraft de bij algemene maatregel

van bestuur aangewezen handelaar die in de uitoefening van zijn beroep of bedrijf:

a. niet met inachtneming van de bij algemene maatregel van bestuur te stellen regels aantekening houdt van alle gebruikte of ongeregelde

goederen die hij heeft verworven dan wel voorhanden heeft,

b. een gebruikt of ongeregeld goed verwerft van iemand, zonder dat diegene zijn identiteitsgegevens heeft opgegeven of zonder dat hij die

gegevens in zijn administratie heeft aangetekend,

c. nalaat zijn administratie op eerste aanvraag ter inzage te geven aan een daartoe door de burgemeester aangewezen ambtenaar.

d. nalaat een gebruikt of ongeregeld goed dat hij heeft verworven of voorhanden heeft, op eerste vordering van een ambtenaar als bedoeld

in onderdeel c, ter bezichtiging af te staan en deze te laten zien waar dit goed in zijn administratie staat ingeschreven,

e. een goed dat bij hem door of vanwege de politie met een duidelijke schriftelijke omschrijving als door misdrijf aan de rechthebbende is

onttrokken of als verloren is aangegeven, verwerft of voorhanden heeft,

f. aan een hem schriftelijk uitgereikt last van een ambtenaar, zoals bedoeld in onderdeel c, tot het gedurende een daarbij aangegeven tijd,

veertien dagen niet te boven gaande, bewaren of in bewaring geven van een goed dat hij voorhanden heeft, of aan een hem bij die last

gegeven aanwijzing, geen gevolg geeft, of

g. nalaat de van hem bij schriftelijke vordering van een ambtenaar, zoals bedoeld in onderdeel c,

gevraagde opgaven betreffende door hem

verworven of bij hem voorhanden zijnde goederen binnen de termijn, bij de vordering gesteld, naar waarheid te verschaffen.

- 2. Met dezelfde straf wordt gestraft de voor de handelaar uit het eerste lid optredende persoon die een feit begaat als in dit lid onder a tot

en met g omschreven;

- 3. De schuldige kan worden ontzet van de uitoefening van het beroep waarin hij de overtreding begaat.

- 4. Onder ongeregelde goederen worden verstaan goederen die wegens hun aard of uitvoering, hun herkomst of de staat waarin zij

verkeren, niet tot de algemeen gangbare goederen kunnen worden gerekend.

Art. 437bis . - 1. Met hechtenis van ten hoogste zes maanden of geldboete van de derde categorie wordt gestraft de handelaar die op grond van artikel 437 bij algemene maatregel van bestuur is aangewezen en in de oefening van zijn beroep of bedrijf:

a. een goed van een minderjarige verwerft, of

b. een goed van iemand van wie hij weet of redelijkwijs moet vermoeden dat hij is opgenomen in een strafinrichting, rijksinrichting voor kindbescherming of krankzinnigengesticht, verwerft.

- 2. Met dezelfde straf wordt gestraft de voor de handelaar uit het eerste lid optredende persoon die een feit begaat als in dit lid onder a en

b omschreven.

- 3. De schuldige kan worden ontzet van de uitoefening van het beroep waarin hij de overtreding heeft begaan.

Art. 437ter . - 1. De handelaar aangewezen bij algemene maatregel van bestuur op grond van artikel 437 , die een verordening door de raad van een gemeente ter bestrijding van heling uitgevaardigd en afgekondigd, overtreedt, wordt gestraft met hechtenis van ten hoogste drie maanden of geldboete van de derde categorie.

- 2. Met dezelfde straf wordt gestraft hij die van opkopen een beroep of gewoonte maakt, zonder daarvan te voren de burgemeester of een door die burgemeester aangewezen ambtenaar schriftelijk in kennis te hebben gesteld.

Art. 437quater . Hij die enig voorschrift ter voorkoming van gevaar voor begunstiging van misdrijven, bij algemene maatregel van bestuur met betrekking tot het verkeer op bepaalde daarbij aan te wijzen watergebieden vastgesteld, overtreedt, wordt gestraft met hechtenis van ten hoogste drie maanden of geldboete van de derde categorie.

Art. 438 . - 1. Hij die er zijn beroep van maakt aan personen nachtverblijf te verschaffen wordt gestraft met hechtenis van ten hoogste een maand of geldboete van de tweede categorie indien hij:

1e. nalaat zich onverwijld bij aankomst van de persoon die in de door hem gehouden inrichting de nacht zal doorbrengen een geldig

reisdocument of identiteitsbewijs te doen overleggen;

2e. geen doorlopend register houdt of nalaat daarin onverwijld bij de aankomst van die persoon zijn naam, beroep of betrekking,

woonplaats en dag van aankomst aan te tekenen of te doen aantekenen alsmede zelf daarin aantekening te houden of te doen houden van

de aard van het overgelegde document, en, bij het vertrek, de dag van het vertrek;

3e. nalaat dat register op aanvraag te vertonen aan de burgemeester dan wel aan de door deze aangewezen ambtenaar.

- 2. Met dezelfde straf wordt de gelijke nalatigheid gestraft van degene die er zijn beroep of een gewoonte van maakt aan meerderjarige

personen een terrein, daaronder begrepen iedere binnenhaven of elk binnenwater ingericht tot het afmeren van pleziervaartuigen, al of

niet met daarbij behorende voorzieningen, ter beschikking te stellen voor het houden van nachtverblijf of voor het plaatsen dan wel

geplaatst houden van kampeermiddelen of daartoe enig bouwwerk, niet zijnde een inrichting als bedoeld in het eerste lid, ter beschikking

stelt.

- 3. Op nachtverblijf, verschaft aan meereizende echtgenoten, minderjarige kinderen of aan reisgezelschappen, is het voorgaande niet van

toepassing.

Art. 439 . - 1. Met hechtenis van ten hoogste een maand of geldboete van de tweede categorie wordt gestraft:

1° hij die van een krijgsman beneden de rang van officier goederen behorende tot de kleding, uitrusting of wapening koopt, inruilt, als

geschenk aanneemt, in pand, gebruik of bewaring neemt, of zodanige goederen voor een krijgsman beneden de rang van officier verkoopt,

ruilt, ten geschenke, in pand, gebruik of bewaring geeft, zonder schriftelijke vergunning door of vanwege de bevelvoerende officier

afgegeven;

2° hij die, een gewoonte makende van het kopen van zodanige goederen, de bij algemene maatregel van inwendig bestuur gegeven

voorschriften omtrent het daarvan te houden register niet naleeft.

- 2. Indien tijdens het plegen van de overtreding nog geen twee jaren zijn verlopen sedert een vroegere veroordeling van de schuldige

wegens een van deze overtredingen onherroepelijk is geworden, kan de straf van hechtenis worden verdubbeld.

Art. 440 . Hij die drukwerken of andere voorwerpen in een vorm die ze op munt- of bankbiljetten, op muntspeciën, op van rijksmerken

voorziene platina, gouden of zilveren werken, op postzegels of op reisdocumenten doet gelijken,

vervaardigt, verspreidt of ter verspreiding
in voorraad heeft, wordt gestraft met geldboete van de tweede categorie.

Art. 441 . Met hechtenis van ten hoogste drie maanden of geldboete van de derde categorie wordt gestraft hij die de inhoud of de strekking van hetgeen door middel van een onder zijn beheer staande of door hem gebruikt radio-ontvangapparaat is opgevangen en, naar hij redelijkerwijs moet vermoeden, niet voor hem of mede voor hem bestemd is, hetzij aan een ander meedeelt, indien hij redelijkerwijs moet vermoeden, dat dan openlijke bekendmaking van de inhoud of de strekking volgen zal en zodanige bekendmaking volgt, hetzij openlijk bekend maakt.

Art. 441a . Hij die openlijk of door verspreiding van enig geschrift ongevraagd een voorwerp als verkrijgbaar dan wel als bij hem voorhanden aanwijst en daarbij de aandacht vestigt op de geschiktheid daarvan als technisch hulpmiddel voor het heimelijk afluisteren, aftappen of opnemen van gesprekken, telecommunicatie of andere gegevensoverdracht door een geautomatiseerd werk of als onderdeel van zulk een hulpmiddel, wordt gestraft met hechtenis van ten hoogste twee maanden of geldboete van de derde categorie.

Art. 441b . Met hechtenis van ten hoogste twee maanden of geldboete van de derde categorie wordt gestraft hij die, gebruik makende van een daartoe aangebracht technisch hulpmiddel waarvan de aanwezigheid niet op duidelijke wijze kenbaar is gemaakt, in een voor het publiek toegankelijke besloten ruimte, waarin spijzen, dranken of andere waren aan particulieren worden geleverd, van een daarin aanwezige persoon een afbeelding vervaardigt.

Art. 442 . Met hechtenis van ten hoogste drie maanden of geldboete van de derde categorie wordt gestraft:

1° hij die, surséance van betaling verkregen hebbende, eigenmachtig daden verricht waartoe de medewerking van bewindvoerders door de wet wordt gevorderd;

2° de bestuurder of commissaris van een rechtspersoon welke surséance van betaling verkregen heeft, die eigenmachtig daden verricht waartoe de medewerking van bewindvoerders door de wet wordt gevorderd.

Art. 442a . Hij die zonder voorafgaande schriftelijke toestemming van de raad voor de kindbescherming een kind beneden de leeftijd van zes maanden hetwelk niet onder voogdij van een rechtspersoon staat als pleegkind opneemt, wordt

gestraft met hechtenis van ten hoogste drie weken of geldboete van de tweede categorie.

TITEL III Overtredingen betreffende het openbaar gezag

Art. 443 . Hij die een algemeen voorschrift van politie, krachtens de Gemeentewet in buitengewone omstandigheden door de burgemeester of de commissaris van de Koning in de provincie uitgevaardigd en afgekondigd, overtreedt, wordt gestraft met hechtenis van ten hoogste drie maanden of geldboete van de tweede categorie.

Art. 444 . Hij die, wettelijk als getuige, als deskundige of als tolk opgeroepen, wederrechtelijk wegblijft, wordt gestraft met geldboete van de eerste categorie.

Art. 445 . Hij die in zaken van minderjarigen of van onder curatele te stellen of gestelde personen, of van hen die in een psychiatrisch ziekenhuis zijn opgenomen, als bloedverwant, aangehuwde, echtgenoot, voogd, curator, voor de rechter geroepen om te worden gehoord, noch in persoon noch, waar dit is toegelaten, door tussenkomst van een gemachtigde verschijnt, zonder geldige reden van verschoning, wordt gestraft met geldboete van de eerste categorie.

Art. 446 . Hij die, bij het bestaan van gevaar voor de algemene veiligheid van personen of goederen of bij ontdekking van een misdrijf op heter daad, het hulpbetoon weigert dat de openbare macht van hem vordert en waartoe hij, zonder zich aan dadelijk gevaar bloot te stellen, in staat is, wordt gestraft met geldboete van de eerste categorie.

Art. 446a . Met een hechtenis van ten hoogste drie maanden of geldboete van de tweede categorie wordt gestraft hij die,
1° nadat hij een bevoegdheid als bedoeld in artikel 539b, eerste lid , van het Wetboek van Strafvordering heeft uitgeoefend, dan wel
2° nadat hem buiten het rechtsgebied van een rechtbank een aangehouden verdachte of een in beslag genomen voorwerp is overgeleverd, dan wel
3° nadat hij buiten het rechtsgebied van een rechtbank op last van het openbaar ministerie een persoon heeft aangehouden, niet onverwijld en op de snelst mogelijke wijze aan een bevoegde officier van justitie kennis geeft van de gegevens, bedoeld in artikel 539b, tweede en derde lid , van het Wetboek van Strafvordering, of nalaat te trachten ten spoedigste aanwijzingen van de officier van justitie te

verkrijgen als bedoeld in het derde lid van dat artikel.

Art. 447 . Hij die een bekendmaking, vanwege het bevoegd gezag in het openbaar gedaan, wederrechtelijk afscheurt, onleesbaar maakt of beschadigt, wordt gestraft met geldboete van de eerste categorie.

Art. 447a . Met geldboete van de tweede categorie wordt gestraft:

1° hij die niet of niet behoorlijk voldoet aan enige verplichting, opgelegd in artikel 195 van Boek 8 van het Burgerlijk Wetboek in verband

met de artikelen 192 en 178 derde lid van Boek 8 van het Burgerlijk Wetboek, of opgelegd in de artikelen 785 en 786 van Boek 8 van het

Burgerlijk Wetboek in verband met de artikelen 782 en 178 derde lid , naast artikel 771 van Boek 8 van dat Wetboek of in de algemene

maatregelen van bestuur bedoeld in de artikelen 231 en 841 van Boek 8 van het Burgerlijk Wetboek;

2° hij die het brandmerk, de benaming of kentekens op een teboekstaand schip, voorgeschreven in de onder 1° genoemde algemene

maatregel van bestuur, verwijdert, verandert dan wel onduidelijk of onzichtbaar maakt op een andere wijze dan volgens die algemene

maatregel van bestuur geoorloofd is;

3° hij die niet of niet behoorlijk voldoet aan de verplichting, opgelegd in artikel 1304, tweede lid , van Boek 8 van het Burgerlijk Wetboek, of

aan enige verplichting, opgelegd in een algemene maatregel van bestuur, uitgevaardigd krachtens artikel 1321 van Boek 8 van het

Burgerlijk Wetboek.

Art. 447b . Hij die een reisdocument dat in zijn bezit is, maar waarvan hij niet de houder is, of dat ingevolge een wettelijke bepaling moet

worden ingeleverd, niet terstond wanneer hem dit mondeling door een daartoe bevoegde ambtenaar is bevolen, dan wel binnen veertien

dagen, nadat hem dit bij aangetekend schrijven in persoon is medegedeeld inlevert, wordt gestraft met geldboete van de tweede categorie.

TITEL IV Overtredingen betreffende de burgerlijke staat

Art. 448 . Hij die niet voldoet aan een wettelijke verplichting tot aangifte aan de ambtenaar van de burgerlijke stand voor de registers van geboorte of overlijden, wordt gestraft met geldboete van de eerste categorie.

Art. 449 . - 1. De bedienaar van de godsdienst die, voordat partijen hem hebben doen blijken dat hun huwelijk ten overstaan van de ambtenaar van de burgerlijke stand is voltrokken, enige godsdienstige plechtigheid daartoe betrekkelijk verricht, wordt gestraft met

geldboete van de tweede categorie.

- 2. Indien tijdens het plegen van de overtreding nog geen twee jaren zijn verlopen sedert een vroegere veroordeling van de schuldige wegens gelijke overtreding onherroepelijk is geworden, kan hechtenis van ten hoogste twee maanden of geldboete van de tweede categorie worden opgelegd.

TITEL V Overtreding betreffende hulpbehoevenden

Art. 450 . Hij die, getuige van het ogenblikkelijk levensgevaar waarin een ander verkeert, nalaat deze die hulp te verlenen of te verschaffen die hij hem, zonder gevaar voor zichzelf of anderen redelijkerwijs te kunnen duchten, verlenen of verschaffen kan, wordt, indien de dood van de hulpbehoevende volgt, gestraft met hechtenis van ten hoogste drie maanden of geldboete van de tweede categorie.

TITEL VI Overtredingen betreffende de zeden

Art. 451 t/m 452 . Vervallen.

Art. 453 . - 1. Hij die zich in kennelijke staat van dronkenschap op de openbare weg bevindt, wordt gestraft met geldboete van de eerste categorie.

- 2. Indien tijdens het plegen van de overtreding nog geen jaar is verlopen sedert een vroegere veroordeling van de schuldige wegens gelijke of de in artikel 426 omschreven overtreding onherroepelijk is geworden, kan hechtenis van ten hoogste drie dagen of geldboete van de eerste categorie worden opgelegd.

- 3. Bij tweede herhaling binnen een jaar nadat de eerste veroordeling wegens herhaling onherroepelijk geworden is, wordt hechtenis van ten hoogste twee weken of geldboete van de tweede categorie opgelegd.

- 4. Bij derde of volgende herhalingen gepleegd telkens binnen een jaar nadat de laatste veroordeling wegens tweede of volgende herhaling onherroepelijk geworden is, wordt hechtenis opgelegd van ten hoogste drie weken of geldboete van de tweede categorie.

Art. 454 t/m 457 . Vervallen.

TITEL VII Overtredingen betreffende de veldpolitie

Art. 458 . Hij die, zonder daartoe gerechtigd te zijn, zijn niet uitvliegend pluimgedierte laat lopen in tuinen of op enige grond die bezaaid,

bepoot of beplant is, wordt gestraft met geldboete van de eerste categorie.

Art. 459 . Hij die, zonder daartoe gerechtigd te zijn, vee laat lopen in tuinen, hakbossen of rijswaarden, op enig wei- of hooiland of op enige grond die bezaaid, bepoot of beplant is, of die ter bezaaiing, bepoting of beplanting is gereedgemaakt, wordt gestraft met geldboete van de eerste categorie.

Art. 460 . Hij die zich, zonder daartoe gerechtigd te zijn, bevindt op enige grond die bezaaid, bepoot of beplant is, of die ter bezaaiing, bepoting of beplanting is gereedgemaakt, of gedurende de maanden mei tot en met oktober op enig wei- of hooiland, wordt gestraft met geldboete van de eerste categorie.

Art. 461 . Hij die, zonder daartoe gerechtigd te zijn, zich op eens anders grond waarvan de toegang op een voor hem bijkbare wijze door de rechthebbende is verboden, bevindt of daar vee laat lopen, wordt gestraft met geldboete van de eerste categorie.

TITEL VIII Ambtsovertredingen

Art. 462 . De ambtenaar, bevoegd tot de uitgifte van afschriften of uittreksels van vonnissen, die zodanig afschrift of uittreksel uitgeeft alvorens het vonnis behoorlijk is ondertekend, wordt gestraft met geldboete van de eerste categorie.

Art. 463 . De ambtenaar die zonder verlof van het bevoegd gezag afschrift maakt of uittreksel neemt van geheime regeringsbescheiden of die openbaar maakt, wordt gestraft met hechtenis van ten hoogste twee maanden of geldboete van de tweede categorie.

Art. 464 . Het hoofd van een gesticht, bestemd tot opsluiting van veroordeelden, voorlopig aangehouden en of gegijzelden, of van een rijksinrichting voor kindbescherming of psychiatrisch ziekenhuis, die iemand in het gesticht of ziekenhuis opneemt of houdt zonder zich het bevel van de bevoegde macht of de rechterlijke uitspraak te hebben laten vertonen, of die nalaat van deze opneming en van het bevel of de uitspraak op grond waarvan zij geschiedt, in zijn registers de vereiste inschrijving te doen, wordt gestraft met hechtenis van ten hoogste een maand of geldboete van de tweede categorie.

Art. 465 . De ambtenaar van de burgerlijke stand die nalaat vóór de voltrekking van een huwelijk zich de bewijsstukken of verklaringen te

laten geven die door enig wettelijk voorschrift worden gevorderd, wordt gestraft met geldboete van de tweede categorie.

Art. 466 . De ambtenaar van de burgerlijke stand die in strijd handelt met enig wettelijk voorschrift omtrent de registers of de akten van de burgerlijke stand of omtrent de formaliteiten vóór of de voltrekking van een huwelijk, wordt gestraft met geldboete van de eerste categorie.

Art. 467 . De ambtenaar van de burgerlijke stand die nalaat een akte in de registers op te nemen, wordt gestraft met geldboete van de tweede categorie.

Art. 468 . Met geldboete van de eerste categorie wordt gestraft:
1° de ambtenaar van de burgerlijke stand die nalaat aan het bevoegd gezag de opgaven te doen die enig wettelijk voorschrift van hem vordert;
2° de ambtenaar die nalaat aan de ambtenaar van de burgerlijke stand de opgaven te doen die enig wettelijk voorschrift van hem vordert.

TITEL IX Scheepvaartovertrredingen

Art. 469 . De schipper van een Nederlands vaartuig die naar zee vertrekt alvorens hij de in artikel 451 van het Wetboek van Koophandel vereiste monsterrol heeft opgemaakt of bijgesteld, heeft ondertekend en heeft gezonden aan het Hoofd van de Scheepvaartinspectie, wordt gestraft met geldboete van de tweede categorie.

Art. 470 . De schipper die niet alle door of krachtens wettelijke bepalingen gevorderde scheepspapieren, boeken, bescheiden of andere gegevensdragers aan boord heeft, wordt gestraft met geldboete van de eerste categorie.

Art. 470a . De schipper van een Nederlands vaartuig die daarmee een reis onderneemt zonder dat voor zijn schip een, door artikel 407 van het Wetboek van Koophandel vereist, certificaat voor de verblijven is afgegeven en nog geldig is, wordt gestraft met hechtenis van ten hoogste een maand of geldboete van de tweede categorie.

Art. 471 . - 1. Met geldboete van de tweede categorie wordt gestraft:
1° de schipper van een Nederlands vaartuig die niet zorgt dat aan boord van zijn vaartuig de bij de wet vereiste dagboeken overeenkomstig de wettelijke voorschriften worden gehouden of die dagboeken niet vertoont wanneer

de wet dit vordert;

2° de schipper van een Nederlands schip die het register van strafbare feiten, bedoeld in artikel 539u van het Wetboek van Strafvordering,

niet overeenkomstig de wettelijke voorschriften houdt of niet vertoont wanneer de wet dit vordert;

3° vervallen;

4° de eigenaar, de rompbevrachter, de boekhouder of schipper van een Nederlands vaartuig die weigert aan belanghebbenden op hun

aanvraag inzage of, tegen betaling van de kosten, afschrift te verstrekken van de aan boord van het vaartuig gehouden dagboeken.

- 2. Indien tijdens het plegen van de overtreding nog geen twee jaren zijn verlopen sedert een vroegere veroordeling van de schuldige

wegens een van deze overtredingen onherroepelijk is geworden, kan hechtenis van ten hoogste twee maanden of geldboete van de

tweede categorie worden opgelegd.

Art. 471a . Hij die het bepaalde bij artikel 539u van het Wetboek van Strafvordering overtreedt wordt gestraft met hechtenis van ten hoogste drie maanden of geldboete van de tweede categorie.

Art. 472 . De schipper van een Nederlands vaartuig die niet voldoet aan zijn wettelijke verplichting betreffende de inschrijving en kennisgeving van geboorten of sterfgevallen die gedurende een zeereis plaats hebben, wordt gestraft met geldboete van de eerste categorie.

Art. 473 t/m 473a . Vervallen.

Art. 474 . De schipper die niet voldoet aan de verplichtingen bedoeld in het tweede lid van artikel 358a of van artikel 785 van het Wetboek van Koophandel, wordt gestraft met hechtenis van ten hoogste drie maanden of geldboete van de tweede categorie.

Art. 475 . De eigenaar zowel als de rompbevrachter, die de hem in het derde lid van artikel 451e van het Wetboek van Koophandel opgelegde verplichting, en de schipper die een der hem in het eerste en derde lid van dat artikel opgelegde verplichtingen niet nakomt, worden gestraft met geldboete van de tweede categorie.

Art. 476 . De eigenaar, de rompbevrachter en de schipper van een Nederlands vaartuig aan boord waarvan personen als schepelingen werkzaam zijn in strijd met het verbod van artikel 406 of artikel 452s van het Wetboek van Koophandel, worden gestraft met geldboete

van de eerste categorie voor iedere persoon die aldus werkzaam is.

Art. 477 t/m 478 . Vervallen. Algemene slotbepaling

Art. 479 . Het in werking treden van dit wetboek wordt nader bij de wet geregeld.

Wet op de telecommunicatievoorzieningen

Hoofdstuk 13 Bevoegd aftappen

Artikel 13.1

1. Aanbieders van openbare telecommunicatienetwerken en openbare telecommunicatiediensten stellen hun telecommunicatienetwerken en telecommunicatiediensten uitsluitend beschikbaar aan gebruikers indien deze aftapbaar zijn.
2. Bij of krachtens algemene maatregel van bestuur kunnen regels worden gesteld met betrekking tot de technische aftapbaarheid van openbare telecommunicatienetwerken en openbare telecommunicatiediensten.

In het Beleidsvoornemen bevoegd aftappen telecommunicatie (kamerstukken II 1995/96, 24 679, nr. 1) is aangegeven dat voorkomen moet worden dat criminelen interceptie kunnen ontlopen doordat zij gebruik maken van niet-aftapbare, openbare telecommunicatiesystemen. Veel van de moderne openbare telecommunicatiesystemen zijn als gevolg van de daarin gebruikte technologie in beginsel niet of slechts moeilijk aftapbaar. Onder meer daarin schuilt voor criminelen het voordeel van het gebruik van deze systemen. Gezien de noodzaak om in het kader van de criminaliteitsbestrijding en de veiligheid van de staat af te kunnen tappen, wordt als hoofdregel in dit artikel daarom voorgesteld dat zowel aanbieders van openbare telecommunicatienetwerken als aanbieders van openbare telecommunicatiediensten hun netwerken respectievelijk diensten slechts mogen aanbieden indien die netwerken en diensten aftapbaar zijn, zodat die door de bevoegde autoriteiten kunnen worden afgetapt. De verplichting tot het aftapbaar zijn geldt vanaf het moment van inwerkingtreding van de wet. In artikel 20.12 is een overgangsbepaling opgenomen voor reeds bestaande openbare telecommunicatienetwerken en -diensten die op het moment van inwerkingtreding van de wet nog niet aftapbaar zijn. Aanbieders van dergelijke netwerken en diensten hebben negen maanden de tijd om hun netwerken en diensten aftapbaar te maken.

Omdat in de moderne systemen ook aanbieders van openbare telecommunicatiediensten ten behoeve van hun dienstvoorziening schakelmiddelen kunnen exploiteren dient de aftapbaarheid zich niet te beperken tot de (kale) netwerken. Het is niet uitgesloten dat ook de aanbieders van openbare telecommunicatiediensten technische tapfaciliteiten zullen moeten plaatsen.

Artikel 13.2

1. Aanbieders van openbare telecommunicatienetwerken zijn verplicht medewerking te verlenen aan de uitvoering van een bevoegd gegeven bijzondere last tot het aftappen of opnemen van telecommunicatie die over hun telecommunicatienetwerken wordt afgewikkeld.
2. Aanbieders van openbare telecommunicatiediensten zijn verplicht medewerking te verlenen aan de uitvoering van een bevoegd gegeven bijzondere last tot het aftappen of opnemen van door hen verzorgde telecommunicatie.
3. Bij of krachtens algemene maatregel van bestuur kunnen regels worden gesteld met betrekking tot de te nemen organisatorische en personele maatregelen en te treffen voorzieningen met betrekking tot aftappen.

In het kader van het bevoegd aftappen is niet alleen van belang de verplichting tot het aftapbaar zijn van telecommunicatienetwerken en -diensten, maar evenzeer de verplichting om medewerking te verlenen aan een

bevoegd gegeven last tot aftappen. In de WTV is deze medewerkingsverplichting beperkt tot de houder van de concessie, de houders van een infrastructuurvergunning, bepaalde houders van een registratie en de houders van een vergunning als bedoeld in hoofdstuk IIA van de WTV. Door het nu voorgestelde artikel 13.2 krijgt deze verplichting een ruimere werking. Hij wordt van toepassing op alle aanbieders van openbare telecommunicatienetwerken en alle aanbieders van openbare telecommunicatiediensten. Bij de in het derde lid bedoelde algemene maatregel van bestuur kunnen regels worden gesteld met betrekking tot de te nemen organisatorische en personele maatregelen en de te treffen voorzieningen met betrekking tot aftappen. Hierbij moet bijvoorbeeld worden gedacht aan regels die kunnen worden gesteld met betrekking tot de bereikbaarheid van aanbieders en ten aanzien van de aanlevering van de afgetapte of opgenomen informatie aan de bevoegde autoriteiten.

Artikel 13.3

Bij of krachtens algemene maatregel van bestuur kunnen regels worden gesteld met betrekking tot het beslechten van geschillen tussen aanbieders en de bevoegde autoriteiten over de voorzieningen door middel van welke de door een tap te verkrijgen telecommunicatie door aanbieders wordt doorgegeven.

Door middel van de in dit artikel bedoelde algemene maatregel van bestuur kunnen regels worden gesteld over het beslechten van geschillen tussen aanbieders en de bevoegde autoriteiten over de voorzieningen door middel van welke de door een tap verkregen telecommunicatie door aanbieders wordt doorgegeven. Daarbij valt aan het volgende te denken. Het is van belang dat er overeenstemming bestaat tussen de bevoegde autoriteiten en de aanbieders over de apparatuur waarmee en de wijze waarop de inhoud van de af te tappen telecommunicatie door de aanbieders aan de lastgever wordt aangeleverd. Voorkomen moet bijvoorbeeld worden dat bepaalde apparatuur niet uitwisselbaar is. Ook kan aan de orde komen of de desbetreffende telecommunicatie door middel van huurlijnen dan wel via kieslijnen wordt doorgegeven naar de lastgever. Bij dergelijke geschillen moet de Minister van Verkeer en Waterstaat een beslissing kunnen nemen.

Artikel 13.4

1. Aanbieders van openbare telecommunicatienetwerken en openbare telecommunicatiediensten zijn verplicht medewerking te verlenen aan de bevoegde autoriteiten met betrekking tot het verstrekken van alle benodigde informatie die noodzakelijk is teneinde een bijzondere last als bedoeld in artikel 13.2, eerste en tweede lid, te kunnen geven.
2. Bij of krachtens algemene maatregel van bestuur kunnen regels worden gesteld met betrekking tot de wijze van verstrekking van informatie en de wijze waarop daartoe de gegevens beschikbaar worden gehouden.

De medewerkingsplicht, bedoeld in artikel 13.2 strekt zich uit tot het verlenen van medewerking aan de daadwerkelijke uitvoering van een bevoegd gegeven last tot aftappen. Het onderhavige artikel heeft betrekking op een andersoortige medewerkingsverplichting: het verstrekken van informatie aan de autoriteiten die een last tot aftappen gaan geven. De medewerkingsverplichting geldt niet alleen voor aanbieders van openbare telecommunicatienetwerken maar ook voor aanbieders van openbare telecommunicatiediensten. Immers voor wat betreft het verstrekken van informatie zullen de netwerkbeheerders in toenemende mate afhankelijk zijn van de aanbieders van openbare telecommunicatiediensten, bij wie steeds meer essentiële gegevens ondergebracht zijn en daarmee aangewezen zijn op onderling te sluiten privaatrechtelijke contracten of te maken afspraken (zogenaamde ketenaansprakelijkheid). Daarvan zouden dan op hun beurt ook de bevoegde instanties afhankelijk worden. Ondergetekende acht deze ontwikkeling niet wenselijk.

Ten behoeve van de facturering bewaren de aanbieders de zogenaamde abonneegegevens als naam, adres, woonplaats en nummer. In het eerste lid worden alleen deze gegevens bedoeld die door de aanbieders ter beschikking moeten worden gesteld om een bijzondere last te kunnen opstellen. In het tweede lid is voorzien in de mogelijkheid bij of krachtens algemene maatregel van bestuur nadere regels te geven voor een uniforme wijze van verstrekking van informatie en een uniforme wijze waarop de gegevens daartoe beschikbaar worden gehouden. Het gaat met betrekking tot deze informatie niet uitsluitend om de abonneegegevens bedoeld in het eerste lid, ook de zogenaamde verkeersgegevens als begin, duur en einde van een verbinding, nummer van de opgeroepene of de feitelijke bestemming, en in geval van doorschakeling de tussenliggende nummers, die verplicht worden verstrekt ingevolge artikel 125f van het Wetboek van strafvordering, alsmede de vrijwillige verstrekking van gegevens door aanbieders op grond van een dringende en gewichtige reden in de zin van artikel 11, tweede lid, van de Wet persoonsregistraties kunnen hieronder worden begrepen. De termijn gedurende welke deze gegevens kunnen worden bewaard wordt geregeld in artikel 11.5, te weten niet langer dan normaal gesproken nodig is met het oog op de eigen bedrijfsvoering, tenzij bij of krachtens wet anders is bepaald. Uit jurisprudentie van het Hof Amsterdam, NJ 1994, 710, blijkt dat artikel 125f van het Wetboek van Strafvordering ook van toepassing is op de verstrekking van verkeersgegevens over telecommunicatie die nog moet worden afgewikkeld. De aanbieder dient alleen van de abonnee waarop de vordering van 125f van het Wetboek van Strafvordering betrekking heeft de verlangde gegevens te vergaren en vervolgens aan de strafrechtelijke autoriteiten ter beschikking te stellen.

Artikel 13.5

1. Aanbieders van openbare telecommunicatienetwerken en openbare telecommunicatiediensten zijn verplicht gegevens met betrekking tot een bijzondere last als bedoeld in artikel 13.2 en informatieverstrekkingen als bedoeld in artikel 13.4 te beveiligen tegen kennisneming door onbevoegden alsmede geheimhouding te betrachten met betrekking tot deze gegevens.
2. Bij algemene maatregel van bestuur kunnen regels worden gesteld met betrekking tot de te nemen maatregelen in verband met de beveiliging, bedoeld in het eerste lid.

Voor de rijksdienst gelden voor de beveiliging van staatsgeheimen de "Aanwijzingen voor de bescherming van staatsgeheimen en vitale onderdelen bij de Rijksdienst" (SDU, maart 1989). Het buiten de rijksdienst brengen van staatsgeheimen kan alleen indien voldoende zekerheid bestaat dat de beveiliging overeenkomstig de bepalingen van deze aanwijzingen zal plaatsvinden. Uit de systematiek van de aanwijzingen vloeit voort dat het verzekeren van een adequate beveiliging bij andere organisaties (zoals particuliere bedrijven) het meeste adequaat bij wet geregeld kan worden. Dit is de zorg van de ministers, onder wier verantwoordelijkheid die organisaties werkzaam zijn. Gegevens betreffende aftappen en informatieverstrekkingen die in het belang van de staat geheim moeten worden gehouden, zijn formele staatsgeheimen en worden bij de overheid aan een beveiligingsregime onderworpen. Deze gegevens dienen ook bij aanbieders van openbare telecommunicatienetwerken en openbare diensten op gelijkwaardige wijze en op basis van een wettelijke bepaling te worden beveiligd. De gegevens waar het hier om gaat zijn bijvoorbeeld abonneegegevens en het feit dat er een tap geplaatst is.

Artikel 13.6

1. De investerings-, exploitatie- en onderhoudskosten voor de technische voorzieningen die door aanbieders van openbare telecommunicatienetwerken en openbare telecommunicatiediensten zijn of worden gemaakt teneinde te kunnen voldoen aan de artikelen 13.1, 13.4, en 13.5 komen te hunner laste.
2. Aanbieders van openbare telecommunicatienetwerken en openbare telecommunicatiediensten hebben

aanspraak op vergoeding uit 's Rijks kas van de door hen gemaakte administratiekosten en personeelskosten rechtstreeks voortvloeiend uit het voldoen aan een last als bedoeld in artikel 13.2, eerste en tweede lid, onderscheidenlijk het verstrekken van informatie als bedoeld in artikel 13.4.

3. Bij ministeriële regeling worden regels gesteld met betrekking tot de vaststelling en vergoeding van de kosten, bedoeld in het tweede lid.

Toen PTT nog staatsbedrijf was, zijn de kosten die gemaakt moesten worden om een telecommunicatiesysteem aftapbaar te maken en houden steeds door de staat betaald. De staat is sinds 1989 geen netwerkbeheerder meer. Toch moet die staat kunnen blijven aftappen. Dit wordt door de toenemende technologische complexiteit steeds moeilijker.

De aanbieders van openbare telecommunicatienetwerken en openbare diensten tappen niet zelf af -dit is voorbehouden aan bevoegde instanties- maar faciliteren slechts het aftappen door op grond van wettelijke bepalingen tijdig organisatorische en technische maatregelen te treffen. Om te kunnen voldoen aan deze wettelijke bepalingen moeten kosten gemaakt worden. Deze kosten vloeien dus voort uit wettelijke verplichtingen en hebben geen betrekking op het aftappen zelf. Vanuit dit oogpunt ligt het voor de hand dat deze kosten niet langer door de staat maar door de aanbieders gedragen worden.

Daarnaast spelen ook budgettaire overwegingen voor de staat een rol. Het aftappen van telecommunicatie wordt een steeds belangrijker, zo niet onmisbaar middel bij de bestrijding van met name de georganiseerde criminaliteit en de bescherming van de staatsveiligheid. Het brengt in toenemende mate ook kosten voor de staat met zich mee. Deze kostenstijging wordt enerzijds veroorzaakt doordat opsporingsinstanties bij de bestrijding van de criminaliteit vaker dan voorheen het middel van de telefoontap moeten gebruiken, en anderzijds doordat het aftapbaar maken van nieuwe vormen van telecommunicatie ook voor de staat steeds opnieuw investeringen vereist. Daarbij valt bijvoorbeeld te denken aan de aanpassing van de tapkamers. De staat wordt kortom geconfronteerd met de gevolgen van de technische ontwikkelingen op het gebied van de telecommunicatie in de vorm van steeds hogere rekeningen voor het aftappen.

Bijkomend voordeel is dat zodoende een prikkel wordt ingebouwd om op de meest voordelige wijze de aftapbaarheid te realiseren, zodat een kostprijsverhogend effect van de te treffen voorzieningen beperkt kan blijven. Het verdisconteren van de gemaakte kosten in de bedrijfsvoering is verder een ondernemersverantwoordelijkheid. Bij de wet van 23 november 1995 tot wijziging van de Wet op de telecommunicatievoorzieningen in verband met het aftappen van GSM is de WTV in die zin gewijzigd dat de investeringskosten alsmede de jaarlijkse onderhouds- en exploitatiekosten, die verband houden met het aftappen, ten laste komen van de GSM-vergunninghouders. Bij de behandeling van dat wetsvoorstel heeft ondergetekende aangekondigd dat de voor GSM ingezette lijn op dit punt zal worden doorgetrokken naar alle openbare telecommunicatienetwerken en -diensten in Nederland. In het eerste lid van het onderhavige artikel wordt deze verplichting vormgegeven en wordt tevens geregeld dat ook de technische inspanningen die gedaan moeten worden ten behoeve van het verstrekken van informatie en ten behoeve van de beveiliging voor rekening van de hier bedoelde aanbieders hieronder vallen. Het beleid met betrekking tot de financiering van het aftappen van GSM wordt hiermee ook op andere telecommunicatiesystemen in Nederland van toepassing verklaard.

De staat zelf blijft ook niet zonder kosten. Het Ministerie van Binnenlandse Zaken zal de veiligheidsonderzoeken betalen. Kosten die gepaard gaan met de inrichting van tapkamers en de huur van aftaplijnen zullen voor de Ministeries van Binnenlandse Zaken en van Justitie blijven. De kosten die rechtstreeks uit een individuele tap of informatieverstrekking voortvloeien, en die door de aanbieders van openbare telecommunicatienetwerken en -diensten daadwerkelijk worden gemaakt -bedoeld worden de administratie- en personeelskosten-, behoren ook tot de opsporings- en vervolgingskosten en zullen daarom door de staat worden vergoed. Ook de regionale politiekorpsen die de tapkamers bezitten, zullen uit het aan hen door de Minister van Binnenlandse Zaken toegekende budget moeten bijdragen aan de vergoeding van deze kosten. Een en ander is geregeld in het tweede

lid van dit artikel. In voornemen 7 van het Beleidsvoornemen bevoegd aftappen telecommunicatie (kamerstukken II 1995/96, 24 679, nr. 1) is aangegeven dat het redelijk wordt geacht om ten aanzien van bepaalde (in bijlage 4 van het Beleidsvoornemen aangegeven) systemen en diensten die reeds in Nederland operationeel zijn, maar nog niet aftapbaar, een eenmalige tegemoetkoming in de kosten te geven aan aanbieders van openbare telecommunicatienetwerken en -diensten teneinde bedoelde systemen alsnog aftapbaar te maken. Bedoelde tegemoetkomingen worden niet ingevolge het onderhavige wetsvoorstel verstrekt. Rekening dient te worden gehouden met het feit dat dergelijke financiële tegemoetkomingen mogelijk als steunmaatregel in de zin van artikel 92, eerste lid, van het EG-verdrag zijn aan te merken en dat als voorgenomen steunmaatregel overeenkomstig artikel 93, derde lid, van het EG-verdrag moet worden aangemeld bij de Europese Commissie.

Artikel 13.7

Onze Minister kan in het belang van de veiligheid van de staat of de handhaving van de strafrechtelijke rechtsorde bij beschikking bepalen dat een of meer artikelen van dit hoofdstuk van overeenkomstige toepassing zijn op aanbieders van een niet openbaar telecommunicatienetwerk, een niet openbare telecommunicatiedienst of aanbieders van huurlijnen indien het netwerk, de dienst of een huurlijn feitelijk openstaat voor derden.

Voor wat betreft het bevoegd aftappen geldt als hoofdregel dat slechts openbare telecommunicatienetwerken en -diensten aftapbaar moeten zijn. Deze verplichting is neergelegd in artikel 13.1. Toch kunnen zich situaties voordoen waarbij het nodig kan zijn dat ook telecommunicatienetwerken en -diensten moeten kunnen worden afgetapt die formeel juridisch worden aangemerkt als zijnde niet openbaar. Te denken valt bijvoorbeeld aan bedrijfsnetwerken van een concern en zogenoemde gesloten gebruikersgroepen. De noodzaak om bepalingen van dit hoofdstuk op dergelijke netten en op diensten van toepassing te verklaren kan ontstaan als het feitelijke gebruik ervan zich beperkt tot de bedoelde groep maar ook ongeselecteerde personen (derden) in de gelegenheid worden gesteld om er gebruik van te maken. In dat geval moet Onze Minister de mogelijkheid hebben om op een snelle wijze netwerken en diensten aan te wijzen waarvoor de aftapverplichting evenzeer geldt als voor de openbare netten en diensten. Artikel 13.7 voorziet in deze mogelijkheid.

Artikel 13.8

Van de verplichtingen die voortvloeien uit dit hoofdstuk kan Onze Minister in overeenstemming met Onze Minister van Binnenlandse Zaken en Onze Minister van Justitie in bijzondere gevallen ontheffing verlenen. Aan een ontheffing kunnen voorschriften en beperkingen worden verbonden.

In de praktijk kunnen zich gevallen voordoen waarop de bepalingen van dit hoofdstuk in volle omvang van toepassing zijn zonder dat daarvoor gerechtvaardigde gronden aanwezig zijn. Hiervan kan bijvoorbeeld sprake zijn als een activiteit op het gebied van telecommunicatie volgens de definities moet worden aangemerkt als het aanbieden van een openbaar telecommunicatienetwerk of een openbare telecommunicatiedienst maar waarvan de noodzaak om die te kunnen aftappen geen noemenswaardige betekenis heeft. De noodzaak tot ontheffing van de aftapverplichtingen kan gezien de snelle ontwikkelingen op telecommunicatiegebied slechts van geval tot geval worden beoordeeld. Ook kan het belang van het kunnen aftappen van een netwerk of een dienst in de loop van de tijd zich wijzigen. Daarom is het belangrijk dat met het bestuurlijke instrument van een ontheffing soepel kan worden ingespeeld op specifieke situaties. Het belang van de veiligheid van de staat en de strafrechtelijke handhaving van de rechtsorde wordt gewaarborgd doordat een ontheffing alleen mogelijk is met toestemming van de Minister van Binnenlandse Zaken en de Minister van Justitie.

The A-Z of Conspiracy

As everyone knows, we are never allowed to know who is really controlling our lives/the country/the world. But is this knowledge a dangerous thing? To clear up this question beyond reasonable doubt Life provides a comprehensive guide to the theoretical corridors and sinister back offices in which true power (and general paranoia) may (or may not) lie

02/12/95

THE GUARDIAN

Conspiracy theories are the will-o'-the-wisps of the modern world. They provide an alternative history to the authorised version of events, a coherent demonology in a godless, devil-less age.

Conspiracy theories fill a human need. They make some sense of the cruel narrative that is the 20th century. They turn the random violence of a lone madman into an act of orchestrated malice. In this way the loss of a figure like Kennedy becomes somehow more comprehensible. To be angry is more bearable than to be uncertain. This soothing function can be at odds with truth, however.

Alternative conspiracist history is as flawed as the 'authorised' version. Worse, a conspiracist view can suppress awkward pieces of information by toying with the notion that events have been covered up by the authorities to suit their own ends: encounters with alien space ships, the real makers of the Lockerbie bomb and the truth about Rudolf Hess have all been hidden from the public but the higher officers of the state are in the know.

Some of the conspiracy theories which date from earlier this century have more ignoble, murkier origins. Anti-semites were behind the Protocols of the Elders of Zion, the Jewish Conspiracy and countless others. Their modern equivalents are put about by neo-Nazi cliques. Again, these conspiracy theories have a human function. Failure in life is more bearable if 'the truth' is that the Jews/the blacks/the Illuminati have conspired against you, it allows you to ignore the fact that you are a spotty social inadequate with bad breath and too-tight lederhosen. The conspiracy theorist is the bane of the working journalist. The need for some sliver of evidence to support assertions is secondary to the spell of the theory: that, for the conspiracy theorist, is its charm. This difficulty is compounded by the fact that not all conspiracy theories are untrue. Those in power across the world do prefer to keep embarrassing truths secret; they do cover up; they do, from time to time, kill people who get in the way.

True or not, a rattling good conspiracy theory requires the following qualities:

- 1 it must be difficult, better still, impossible, to understand at first glance.
- 2 it must contain a spaghetti-heap of leads, all of which cannot be followed up. There must always be one more lead left to chase.
- 3 The story should speak to a 'wider' truth about our society, through a series of disconnected or unconnected or unfalsifiable propositions.
- 4 There should be no easy way of verifying it.

The theories below demonstrate all of these qualities to a greater or lesser degree. To savour our A-Z properly, we suggest readers mull over it with deadpan credulousness in the small hours of the morning

listening to the theme music from The X-Files and drinking black coffee.

A IS FOR ALIEN ENCOUNTERS that are being covered up by the authorities. Perhaps the best-documented close encounter of the third kind took place on 27 December 1980, when airmen at two RAF stations in East Anglia witnessed something extraordinary. First radar operators at RAF Watton in Norfolk picked up an oddity on their screens. Then RAF Phantom pilots reported seeing intense bright lights in the sky. Former radar operator Mal Scurrah said: 'As the Phantoms got close the hovering object shot upwards at phenomenal speed " monitored at more than 1,000 mph.' Later, airmen stationed at RAF Woodbridge in Suffolk investigated a mystery fire in Rendlesham Forest. Sergeant Jim Penniston witnessed the encounter with airman John Burroughs. Penniston said: 'The air was filled with electricity and we saw an object about the size of a tank. It was triangular, moulded of black glass and had symbols on it. Suddenly it shot off faster than any aircraft I have ever observed.' The next day the object returned. Base commander Lt Col Charles Halt saw the flying saucer himself: 'I couldn't believe what I was seeing. It looked like the rising sun with a black pulsating centre. It appeared to be dripping molten metal.' Halt acted coolly, taping and photographing the object engineered by 'an intelligence which didn't originate on Earth'. His tape and film were confiscated by visiting US defence officials. Former British Chief of Defence Staff Lord Hill-Norton has claimed: 'Someone is sitting on information that should be in the public domain.'

Believability: 9/10

(Possible explanation: what the airmen saw may not have been a UFO, but a prototype of the Stealth bomber, which has a black triangular shape, a strange radar print and was, in 1980, ultra-secret. Project Aurora, a new ultra-ultra-secret Pentagon Black Budget reconnaissance aircraft, is probably responsible for all subsequent UFO sightings.)

B IS FOR THE BILDERBERG GROUP, which organises semi-secret annual three-day meetings of the European-Atlantic great and good from the worlds of business, diplomacy and politics. The first meetings were organised in 1954 by eminence grise Joseph Retinger, the then secretary general of the newly fledged, CIA-funded European Movement. Karl Otto Pohl, then president of Deutsche Bundesbank, David Rockefeller, Lord Carrington and Governor Bill Clinton of Arkansas were among recent delegates. Denis Healey was at that first meeting and, having retired, discusses Bilderberg in his autobiography, *The Time Of My Life*. Bilderberg is one of the transnational groups suspected by the European-American far Right of being part of the secret elite power structure. Even the Financial Times column 'Lombard' has noted: 'If the Bilderberg group is not a conspiracy of some sort, it is conducted in such a way as to give a remarkably good imitation of one.'

Believability: 8/10

C IS FOR CEAUSESCU, who was tried and executed on Christmas Day to hush up the complicity of Romania's new leaders in his crimes. The videotape of the Christmas Day show trial of Nicolae and Elena Ceausescu is an absorbing spectacle. Time and again, Ceausescu and his wife turn on their interrogators and accuse them of knowing the answers to the questions they have posed. Prosecutor: 'What do you know about the Securitate?' Elena: 'They are sitting across from us here.' The old witch was right, of course, because sitting in the courtroom were secret police chiefs like Colonel Magureanu, who had been party to the attack on civilians in Timisoara which had triggered the revolution. He was later promoted by the leader of the conspirators, Ion Iliescu " a former Ceausescu crony " to head the renamed secret police, the 'Romanian Information Service'. Iliescu became and remains president, the tainted hero of a tainted revolution.

Believability: 10/10

D IS FOR 'DEEP THROAT', the mole in the Nixon administration guiding the Washington Post journalists, Woodward and Bernstein, to the Watergate story. 'Throat' remains unidentified. In his book Hidden Agenda (1984) Jim Hougan nominated both Nixon's chief of staff, Alexander Haig, and National Security Agency boss, Admiral Bobby Ray Inman, as candidates; Colodny and Gettlin also fingered Haig in their book Silent Coup (1991). Barbara Newman, for Channel 4's Dispatches, came up with the head of the FBI field office in Washington, the late Bob Kunkle. He was allegedly leaking for the FBI, which was disgruntled by the Nixon cover-up.

Believability: 10/10

(Cynics suspect 'Deep Throat' was merely a dramatic device or a ploy to keep newspaper lawyers quiet.)

E IS FOR ELECTRICITY PYLONS, which fry our brains. A number of protesters have complained that electro-magnetic waves in overhead electricity pylons have led to depression, headaches, mental and physical ill-health. No government ministry has placed much credence on these complaints. The epidemiology of environmental effect is notoriously hard to prove, but all good conspiracists believe there is no smoke without a secret ray.

Believability: 7/10

F IS FOR FREEMASONS, who club together to better themselves in the world. The majority of active freemasons have sworn not to divulge the secrets of the craft, on pain of having their tongues 'cut out by the root and buried in the sand below low-water mark'. Other masons who have tried to break ranks have come to sticky ends, like 'God's Banker' Roberto Calvi, found hanging from Blackfriars Bridge in 1982.

So it is hard to determine just how much influence is wielded by the grown men who like to dress in black suits, wear aprons, bare their breasts and roll up their trouser legs. Not very much, say some sceptics, who suspect that the masons have more control over, say, haberdashery in Herefordshire than the British state. But freemasons still hold some sway in the corridors of power. The Rt Hon the Lord Templeman and Rt Hon Lord Justice Balcombe, both freemasons, are two of the most senior judges in the land; junior Foreign Office minister Tony Baldry, former Tory MP David Trippier and back bench MPs Sir Peter Emery and Sir Gerard Vaughan are all on the square. Many police officers, too, remain true to their masonic oaths of secrecy. In 1993 at a Police Federation conference a motion urging police officers to reveal membership of the masonic brotherhood was debated. An officer from Merseyside said it did not matter if officers 'wore a goatskin or rolled up their trouser leg'. Another said that freemasonry was 'not all mumbo-jumbo'. A third police officer, mocking the calls for more openness about freemasonry in the ranks, put a paper bag over his head. Finally a member of the Metropolitan branch came to the rostrum to announce the vote. 'I'm not telling,' he said to laughter. 'It's a secret.' The opponents of freemasonry lost the vote.

Believability: 8/10

G IS FOR THE GEMSTONE FILE, the conspiracy theory which first surfaced in 1975. Originally a precis by American journalist Stephania Caruana of allegations made in letters by American chemist Bruce Roberts, now deceased, Gemstone attributes much of post-war America's ills to the power of Aristotle Onassis, who had the Kennedys and Dr King assassinated, seized the Howard Hughes empire, did a deal with the Mafia, etc. The subject of a couple of book-length studies to date, Gemstone has appeared in five or six different versions, each one containing new material. Most striking is the 'Kiwi Gemstone' in which specifically New Zealand incidents have been embedded in the original American narrative. Authorless, floating round the world in samizdat form, Gemstone is a perfect, small-scale disinformation vehicle for anyone who cares to use it.

Believability: 0/10

H IS FOR HESS, locked up in Spandau prison because he knew all about the secret 1941 negotiations between Britain and Nazi Germany. Rudolf Hess's flight in May 1941 remains one of the most bizarre episodes of the Second World War. Lord James Douglas-Hamilton, son of the Duke of Hamilton, the Scottish landowner to whom Hess presented his plans, said: 'Hess's proposals consisted of a limited peace deal under which Germany would have allowed Britain a free hand in her empire in return for Britain allowing Germany a free hand in Europe and Russia. His so-called peace plans would have meant the enslavement of Europe.' Hess was arrested, tried to commit suicide, went mad, was sentenced to life imprisonment and, at the age of 93, hanged himself in Spandau prison. Or not, as the case may be. One theory has it that the Churchill government, in a hideously clever propaganda campaign against the Nazis, ran a double, 'Hess Two'. Evidence supporting the double theory emerged when a Dutch TV journalist, Karel Hille, disclosed that he had got the Most Secret file on Hess via an unnamed British historian who had been given it by the late MI6 spymaster Sir Maurice Oldfield. Oldfield had, allegedly,

stolen the file from the MI6 archive. That the man, 'Hess Two', who killed himself in prison was not the real Hess is backed by Hugh Thomas, a Welsh surgeon, who, in the early 1970s, was consultant to the British Military Hospital in West Berlin. Thomas examined 'Hess Two' and found him to lack the scars the real Hess should have had after a wound he received in 1917. MI6 had 'Hess Two' hanged because they didn't want the truth to come out. Then the killers burnt the evidence, including an electrical flex, with which he was murdered.

Believability: 5/10

(Hess was mad. His 1917 wound was pea-sized.)

I IS FOR THE ILLUMINATI, the secret society controlling all the other secret societies. An 18th-century masonic splinter group begun by Adam Weishaupt, the Illuminati were said to be the hidden force behind the French Revolution. After the First World War they were re-launched into the English-speaking world by one Nesta Webster who credited them with organising the Russian October Revolution too. In 1921 the Spectator described Weishaupt as a 'Prussian with criminal instincts and lunatic perversions . . . {who} shunted continental freemasonry on to Antinomian and revolutionary lines.' In the demonology of the Anglo-American far Right, the Illuminati largely replaced the Jews as the spider at the centre of the web. These theories were brilliantly parodied in the Illuminatus! trilogy (1976) by Robert Anton Wilson and Robert Shea.

Believability: 0/10

J IS FOR JAMES JESUS ANGLETON, the orchid-growing, poetry-writing, paranoid head of CIA counter intelligence throughout much of the Cold War. Angleton believed the CIA and all other spy networks to be so much gorgonzola, riddled with KGB moles. In his search for these moles Angleton paralysed large chunks of the CIA for years at a stretch and blighted the careers of many senior officers. It was Angleton who insisted in the 1960s that MI5 investigate Harold Wilson, a task taken up enthusiastically by Peter Wright and his circle in MI5. Angleton's overarching idiocy was to believe the KGB defector Golitsyn, who claimed that the friction between the Soviet Union and Mao's China in the late 1960s was a fake to deceive the West. Despite the collapse of the Soviet Union, Golitsyn remains convinced that it is all a black propaganda ploy. However, the confession of top CIA man Aldrich Ames that he was a KGB mole have proved some of Angleton's fears correct.

Believability: 6/10

K IS FOR KENNEDY, killed by almost anyone you care to mention. According to Captain James T Kirk of the Starship Enterprise, the 'first rule of assassination is kill the assassins'. The killing of Lee Harvey Oswald by Jack Ruby set a hare running that has never stopped. Instead of Oswald's courtroom confession or denial of guilt providing some explanation of the killing of the president, the assassination of the assassin let conjecture reign. So many had a hand in his murder it is too tedious to name them all.

Oliver Stone argued in his film JFK that Lyndon Baines Johnson was the man behind the conspiracy. The KGB, the Mafia, the Cubans, the FBI and the masons are all contenders. Perhaps the best JFK conspiracy theory is that he is, after all, still alive, but kept a permanent prisoner by the National Security Council.

Believability: 1/10

L IS FOR LOCKERBIE. On 21 December 1988, 270 people were murdered when Pan Am 103 exploded over Scotland. Six years later no one has been convicted of the crime, although investigators on both sides of the Atlantic have consistently pointed the finger at two Libyan intelligence officers who they believe planted the bomb on a plane from Malta before it was transferred at Frankfurt on to the fatal flight. UN sanctions are enforced against Tripoli until Colonel Gadaffi agrees to hand over the two for trial.

Others are not convinced by the official line. Tales of suitcases of heroin recovered at the crash site by mysterious American intelligence officers point to a joint CIA/Drug Enforcement Administration operation that was fatally compromised by Syrian and Iranian-backed Palestinian terrorists. American spooks were running `controlled' deliveries of Lebanese heroin through Frankfurt airport in return for information about the whereabouts of the hostages in Beirut. The terrorists were aware of this and switched the dope-filled Samsonite case with one containing the bomb. Among those killed were Matthew Gannon, the CIA's deputy head of station in Beirut, and Major Charles McKee, a Defence Intelligence Agency officer allegedly in charge of a hostage rescue team. Some students of the tragedy have gone so far as to suggest that McKee was flying home to blow the whistle, disgusted that deals were being struck with dope dealers in order to gain intelligence on the kidnap victims.

Believability: 8/10

M IS FOR DAVID MELLOR, got at by Mossad after his pro-Palestinian outburst in 1988 on the West Bank. The Israelis were out to topple Mellor after he became the most prominent critic in the British Government of their conduct in the Occupied Territories.

First, they managed to secure his removal as junior Foreign Office minister, threatening to stop passing on intelligence information about the hostages in Beirut unless Mellor was moved. Second, they arranged for the clandestine phone-tapping operation which led to the highly embarrassing `toe-sucking' allegations.

The result: Mellor was forced to quit the Cabinet.

Believability: 5/10

N IS FOR NOSTRADAMUS, the 16th- century psychic seer who predicted Napoleon, Hitler and the killing of John Kennedy. The seer's muddily-written quatrains have spawned more than 200 books, a propaganda war between the Nazis and the Allies during the Second World War, a movie, an American

TV spin-off show, Monopoly-style board games, a virtual reality game and even a watch, which ticks down the seconds from 1 January 1995 to the millennium.

Whitstable housewife Valerie Hewitt, author of *Nostradamus: His Key To The Centuries* (Heinemann, 1994), predicts that Prince Charles will be crowned this year. 'It will be something sudden that will affect the Queen, an illness " whether it is political or genuine it doesn't matter. And Diana will be offered the chance to become Queen. But Charles's reign will be short and William could be king before he's 18.' In 1993 she predicted that George Bush would stay as president.

Rival Nostradamus buff John Hogue is more apocalyptic. He plumps for nuclear disaster or terrorism in 1996, World War III before the millennium and Aids " `a very great plague . . . with a great scab' " and the ozone hole killing off two-thirds of the world population. He quotes the prophet's vision of the future: `So many {die} that no one will know the true owners of fields and houses. The weeds in the city streets will rise higher than the knees, and there shall be a total desolation of the clergy.'

Believability: 0/10

(The verses of Nostradamus clearly refer to events and places in the 16th century. For example, nowhere does he mention `Hitler', only `Hister', the contemporary name for the Lower Danube.)

P IS FOR PROMIS SOFTWARE, stolen from a Washington law firm. In 1982 a Washington DC computer firm, Inslaw, developed a programme called Promis (Prosecutors' Management Information System) which it supplied to the US Justice Department for \$10 million. A year later, Justice stopped all payments and Inslaw went bankrupt. A ruling in 1987 at a bankruptcy court concluded that the Justice Department `took, converted and stole Promis software through trickery, fraud and deceit', which is a little embarrassing for the department charged with upholding the rule of law.

So far, so what? It is only when people started to probe into why Justice had acted in such a way that it gets interesting, prompting one investigator to claim that the case `was a lot dirtier for the department than Watergate had been, both in its breadth and depth'.

It turns out that (allegedly) the men behind the theft of the software were all Reagan appointees who helped engineer the 1980 `October Surprise', whereby the Republicans struck a deal with the Iranians not to release American Embassy hostages from Tehran until after Reagan was safely in the White House. The software was then sold on to foreign intelligence agencies across the globe, (a) to generate revenue for covert operations not authorised by Congress; and (b) to make it easier for US operatives to hack into the software.

The story was chased by US freelance Danny Casolaro. A year after making himself known to the Inslaw people he was found dead in a motel room in West Virginia. The official verdict was suicide, but Elliott Richardson, the Attorney General under Nixon, hired by Inslaw to investigate the case, concluded: `It's hard to come up with any reason for Casolaro's death other than he was deliberately murdered because he was so close to uncovering sinister elements in what he called `the Octopus'.'

Believability: 7/10

Q IS FOR CARROLL QUIGLEY, the granddaddy of all modern American conspiracists. Quigley's

1,340-page volume *Tragedy And Hope " History Of The World In Our Time* (1966) included a dozen pages on the existence of a hitherto unknown secret society, run by Alfred, Lord Milner, Lloyd George's Chef de Cabinet, funded by Cecil Rhodes's estate. The group, said Quigley, who claimed to have access to its papers, organised the Round Table groups in the Commonwealth, the Royal Institute For International Affairs in London and its counterpart in the US between the wars.

For far-Right groups such as the John Birch Society these pages were proof, from an `insider', of the great conspiracy they had always suspected. Not the communists, not the Jews, not even the Illuminati, but the Perpetual Hidden Government " the PHG! Quigley's revelations are behind much of the recent talk of One Worlders and New World Orders and are part of Republican presidential hopeful Pat Robertson's world view. Among Quigley's students at Georgetown University was Bill Clinton, and the conspiracists got quite excited when President Clinton referred to the impact Quigley made on him in his inauguration speech.

Believability: 4/10

R IS FOR JAMES RUSBRIDGER, killed and framed as a sex pervert by MI5. Rusbridger was a tremendous irritant to the security services. His letters to newspapers poured scorn on the Official Secrets Act; his books, such as *The Intelligence Game*, cast doubt on the official version of events. But where Rusbridger, aged 65 at the time of his death, really annoyed the spooks was when he unearthed Britain's code-cracking secrets, in particular the story that the British had cracked Japanese naval codes in advance of the attack on Pearl Harbour.

He was bright, hale and hearty for his age when he was discovered in February 1994 at his home, dressed in a green protective suit for use in nuclear, biological or chemical warfare, green overalls, a black plastic mackintosh and thick rubber gloves. His face was covered by a gas mask and he was also wearing a sou'wester. His body was suspended from two ropes, attached to shackles fastened to a piece of wood across the open loft hatch, and was surrounded by pictures of men and mainly black women in bondage. Consultant pathologist Dr Yasai Sivathondan said he died from asphyxia due to hanging `in keeping with a form of sexual strangulation'.

His death occasioned a piece by Sunday Times reporter James Adams, whose own books boast of contacts with British intelligence. Adams quoted senior intelligence officials as saying Rusbridger never had any connection with any branch of British intelligence: "His death was as much a fantasy as his life," said one source . . . Rusbridger's interest in intelligence seems to have coincided with his conviction for theft in 1977.' Such an extensive posthumous demolition job by intelligence officials would perhaps only be merited by someone who had been a serious thorn in their side.

Believability: 7/10

S IS FOR THE SUICIDES OF THE SCIENTISTS WHO WORKED FOR MARCONI. In 1988 a host of brilliant researchers working for the defence giant killed themselves in a variety of ways: one drove his petrol-laden car into a disused Little Chef, another jumped off the Clifton suspension bridge, a third electrocuted himself. The deaths appeared to be a case of life imitating art " in this case, an episode

of the 1960s Avengers series which features a number of brilliant scientists killing themselves. The first problem is that there was no linkage between the deaths. Second, suicide is 10 times more common than murder in Britain. Third, men kill themselves more violently than women. Fourth, scientists are more ingenious than the rest of the population, so one would expect them to kill themselves violently and bizarrely. Fifth, the defence business employs huge numbers of scientists, and Marconi is a big employer.

When the numbers are crunched, there is no statistical aberration in the number of suicides by Marconi scientists. It is too good a story for a newspaper to kill, however.

Believability: 0/10

U IS FOR THE UNIFIED CONSPIRACY THEORY, or the Grand Unified Conspiracy Theory, which knits all the other conspiracy theories into a coherent tapestry.

Believability: 1/10

V IS FOR VATICAN, which knocks off the popes it doesn't like. The markedly short reign of John Paul I has given rise to this particular crock of conjecture.

Old men can die quite quickly, even if they are popes. However, rumours persist in the Vatican that John Paul I was going to clean out the Augean stables of the pontiff's finances and expose the scandalous links between the Mafia, the freemasons and senior cardinals in the Roman Catholic Church.

Believability: 2/10

W IS FOR COLIN WALLACE, who was forced to resign from the Ministry of Defence in 1975 when he leaked information about a covert MI5 operation, 'Clockwork Orange'. Wallace, an Ulsterman, claimed he had been involved in the operation, which had been designed to destabilise paramilitary organisations in the Province through disinformation. Wallace alleged that the scope of the operation had been extended to include mainland politicians viewed as 'politically soft or leftist', a list which included Harold Wilson, Edward Heath and Jeremy Thorpe. Wallace claims it was in his remit to discredit these 'targets' using unfounded smear stories about sexual impropriety.

He also alleged, in a memo to army chiefs, that a Belfast boys' home named Kincora was being used as a homosexual trap for intelligence gathering against prominent Unionist politicians. In 1990 an inquiry conducted by James Calcutt QC found Wallace's dismissal to be unsafe and ordered the Ministry to award him pounds 30,000 in compensation. The inquiry was not, however, empowered to make any judgment on Wallace's allegations.

Believability: 7/10

X IS FOR MR X, the third man who allegedly went to bed with two senior Conservative politicians, now in the Cabinet, all at the same time. This is a conspiracy theory never to be told.

Believability: 10/10

Y IS FOR YAKUZA, the Japanese mafia who run the world. The Yakuza are the world's richest and most powerful gangsters. They control many of the big-name Japanese corporations that now have huge leverage in the major western economies. Nothing can be done to loosen the grip of the Yakuza on the world economy.

Believability: 8/10

Z IS FOR THE ZAGREB OPERATION, when the NKVD inducted Robert Maxwell as a Soviet double agent. Maxwell was never clear about how he escaped from Nazi-occupied Germany. In fact, he was given secret passage through Nazi-allied Croatia by Communist partisans, then loyal to the Soviet Union, in return for a lifetime as a spy.

While passing through Zagreb Maxwell was recruited by an officer of the NKVD " the forerunner to the KGB " and was told to travel to Britain and ingratiate himself with the British Establishment.

Maxwell did brilliantly, becoming first a war hero then a respected publisher. The NKVD and KGB helped Maxwell out from time to time, smoothing his path in arranging deals with Eastern Bloc scientific publishers and the like. Maxwell prospered.

It was only in 1991 that the Israeli secret service, Mossad, came across the truth when they bought up a senior KGB archivist who sold them the Operation Zagreb file. Maxwell " who Mossad thought had been working for them " was terminated by a crack unit of Israeli frogmen.

Believability: 6/10

Danish Intelligence Services:

Danish Civil Security Service (DCSS)

Danish Defense Intelligence Service (DDIS)

Danish Police Intelligence Services

[*Return to Home*](#)

GENERAL BACKGROUND

The Danish Criminal Code dates from 1930. The rules governing criminal procedure are found in the Administration of Justice Act 1916. Both these codes have been revised and supplemented.

Investigations concerning criminal offences are handled by the police and only rarely by other authorities (such as customs authorities). The less serious cases, normally those where the punishment stipulated for the crime is only a fine, are administered by the chiefs of police and police lawyers. More serious cases are investigated by the police, but the decision as to whether a suspect should be charged and representation before the court are in the hands of the prosecution proper. The Danish system of prosecution follows the principle of opportunity, which means that the chief of police (acting as prosecutor in misdemeanour cases) and the prosecutors may decide to close cases when the "public interest" does not call for adjudication and punishment.

The police service is organised on a national basis, and is headed by a chief of police. Similarly, prosecutors are organised nationally under the Director of Public Prosecution. Both organisations are under the direct supervision of the Minister of Justice.

The court system comprises district courts, high courts and the Supreme Court. The most serious cases are brought directly before the high courts where the question of guilt is decided by a jury. Misdemeanour cases and cases where the suspect has confessed are handled by a single judge in the district court, but in cases concerning more serious crimes the courts will usually consist of one or more professional judges acting together with one or more lay judges.

The minimum age of criminal responsibility is 15 years. Children under this age are dealt with by the local welfare authority. Also cases involving youths between 15 and 18 years may be dealt with by such authorities should the prosecutor decide to waive prosecution.

Intentional homicide. During the period covered by the Third Survey, the number of reported homicides has remained roughly steady at around 300 per year. However, most of these cases are attempts, and those actually being killed number about 70 per year. In 1986, 62 people were found guilty of murder, and 85 of attempted murder.

Assault. There has been a steady increase in the number of reported cases of assault, from 5 462 cases in 1980 to 6 708 in 1986 (23 %). The number of those found guilty was about the same in 1986 as in 1980 (3 500).

Robbery and Theft. Thefts and robberies show an upward trend of about 20 % during the period 1980-86. Robberies have increased from about 1 400 to about 1 800, and theft from 339 000 to 408 000. The number of those found guilty of theft was 27 800 in 1986, which is 31 % higher than the corresponding number in 1980.

The Danish Crime Prevention Council, established in 1971, is initiating a number of projects. The main philosophy of the Council's proposal is that crime prevention is a matter for society as a whole and not only for the law enforcement agencies.

GEOGRAPHY

Location: Northern Europe, bordering the Baltic Sea and the North Sea, on a peninsula north of Germany

Geographic coordinates: 56 00 N, 10 00 E

Map references: Europe

Area:

total: 43,094 sq km

land: 42,394 sq km

water: 700 sq km

note: includes the island of Bornholm in the Baltic Sea and the rest of metropolitan Denmark, but excludes the Faroe Islands and Greenland

Area-comparative: slightly less than twice the size of Massachusetts

Land boundaries:

total: 68 km

border countries: Germany 68 km

Coastline: 7,314 km

Maritime claims:

contiguous zone: 4 nm

continental shelf: 200-m depth or to the depth of exploitation

exclusive economic zone: 200 nm

territorial sea: 3 nm

Climate: temperate; humid and overcast; mild, windy winters and cool summers

Terrain: low and flat to gently rolling plains

Elevation extremes:

lowest point: Lammefjord -7 m

highest point: Ejer Bavnehoj 173 m

Natural resources: petroleum, natural gas, fish, salt, limestone, stone, gravel and sand

Land use:

arable land: 60%

permanent crops: 0%

permanent pastures: 5%

forests and woodland: 10%

other: 25% (1993 est.)

Irrigated land: 4,350 sq km (1993 est.)

Natural hazards: flooding is a threat in some areas of the country (e.g., parts of Jutland, along the southern coast of the island of Lolland) that are protected from the sea by a system of dikes

Environment-current issues: air pollution, principally from vehicle and power plant emissions; nitrogen and phosphorus pollution of the North Sea; drinking and surface water becoming polluted from animal wastes and pesticides

Environment-international agreements:

party to: Air Pollution, Air Pollution-Nitrogen Oxides, Air Pollution-Sulphur 85, Air Pollution-Sulphur 94, Air Pollution-Volatile Organic Compounds, Antarctic Treaty, Biodiversity, Climate Change, Desertification, Endangered Species, Environmental Modification, Hazardous Wastes, Marine Dumping, Marine Life Conservation, Nuclear Test Ban, Ozone Layer Protection, Ship Pollution, Tropical Timber 83, Tropical Timber 94, Wetlands, Whaling signed, but not ratified: Antarctic-Environmental Protocol, Law of the Sea

Geography-note: controls Danish Straits (Skagerrak and Kattegat) linking Baltic and North Seas; about one-quarter of the population lives in Copenhagen

PEOPLE

Population: 5,333,617 (July 1998 est.)

Age structure:

0-14 years: 18% (male 496,886; female 471,891)

15-64 years: 67% (male 1,807,384; female 1,760,353)

65 years and over: 15% (male 330,385; female 466,718) (July 1998 est.)

Population growth rate: 0.49% (1998 est.)

Birth rate: 12.18 births/1,000 population (1998 est.)

Death rate: 11.08 deaths/1,000 population (1998 est.)

Net migration rate: 3.77 migrant(s)/1,000 population (1998 est.)

Sex ratio:

at birth: 1.05 male(s)/female

under 15 years: 1.05 male(s)/female

15-64 years: 1.03 male(s)/female

65 years and over: 0.71 male(s)/female (1998 est.)

Infant mortality rate: 5.17 deaths/1,000 live births (1998 est.)

Life expectancy at birth:

total population: 76.31 years

male: 73.64 years

female: 79.12 years (1998 est.)

Total fertility rate: 1.68 children born/woman (1998 est.)

Nationality:

noun: Dane(s)

adjective: Danish

Ethnic groups: Scandinavian, Eskimo, Faroese, German

Religions: Evangelical Lutheran 91%, other Protestant and Roman Catholic 2%, other 7% (1988)

Languages: Danish, Faroese, Greenlandic (an Eskimo dialect), German (small minority)

Literacy:

definition: age 15 and over can read and write

total population: 99% (1980 est.)

male: NA%

female: NA%

GOVERNMENT

Country name:

conventional long form: Kingdom of Denmark

conventional short form: Denmark

local long form: Kongeriget Danmark

local short form: Danmark

Data code: DA

Government type: constitutional monarchy

National capital: Copenhagen

Administrative divisions: metropolitan Denmark-14 counties (amter, singular-amt) and 2 kommunes*;
(stad); Arhus, Bornholm, Fredericksberg*, Frederiksborg, Fyn, Kobenhavn, Kobenhavn*, Nordjylland,
Ribe, Ringkobing, Roskilde, Sonderjylland, Storstrom, Vejle, Vestsjælland, Viborg note: see separate
entries for the Faroe Islands and Greenland, which are part of the Danish realm and self-governing
administrative divisions

Independence: in 10th century first organized as a unified state; in 1849 became a constitutional
monarchy

National holiday: Birthday of the Queen, 16 April (1940)

Constitution: 1849 was the original constitution; there was a major overhaul 5 June 1953, allowing for a
unicameral legislature and a female chief of state

Legal system: civil law system; judicial review of legislative acts; accepts compulsory ICJ jurisdiction,
with reservations

Suffrage: 18 years of age; universal

Executive branch:

chief of state: Queen MARGRETHE II (since 14 January 1972); Heir Apparent Crown Prince
FREDERIK, elder son of the queen (born 26 May 1968)

head of government: Prime Minister Poul Nyrup RASMUSSEN (since 25 January 1993)

cabinet: Cabinet appointed by the queen

elections: none; the queen is a constitutional monarch; prime minister appointed by the queen

Legislative branch: unicameral Parliament or Folketing (179 seats; members are elected on the basis of
proportional representation to serve four-year terms)

elections: last held 11 March 1998 (next to be held NA 2002)

election results: percent of vote by party-NA; seats by party-progovernment parties: Social Democrats
65, Socialist People's Party 13, Radical Liberal Party 7,

Unity Party 5; opposition: Progress Party 42, Conservative People's Party 16, Danish People's Party 13,
Center Democrats 8, other parties 10

Judicial branch: Supreme Court, judges are appointed by the monarch for life

Political parties and leaders: Social Democratic Party [Poul Nyrup RASMUSSEN]; Conservative Party [Torben RECHENDORFF]; Liberal Party [Uffe ELLEMANN-JENSEN]; Socialist People's Party [Holger K. NIELSEN]; Progress Party [Kirsten JAKOBSEN]; Center Democratic Party [Mimi JAKOBSEN]; Social Liberal Party [Marianne JELVED]; Unity Party [none]; Danish People's Party [Pia KJAERGAARD]; Radical Liberal Party [Margrethe VESTAGER]; Conservative People's Party [Torben RECHENDORFF]

International organization participation: AfDB, AG (observer), AsDB, Australia Group, BIS, CBSS, CCC, CE, CERN, EAPC, EBRD, ECE, EIB, ESA, EU, FAO, G- 9, IADB, IAEA, IBRD, ICAO, ICC, ICFTU, ICRM, IDA, IEA, IFAD, IFC, IFRC, IHO, ILO, IMF, IMO, Inmarsat, Intelsat, Interpol, IOC, IOM, ISO, ITU, MTCR, NATO, NC, NEA, NIB, NSG, OECD, OSCE, PCA, UN, UNCTAD, UNESCO, UNHCR, UNIDO, UNIKOM, UNMIBH, UNMOGIP, UNMOP, UNMOT, UNOMIG, UNPREDEP, UNTSO, UPU, WEU (observer), WHO, WIPO, WMO, WTrO, ZC

Diplomatic representation in the US:

chief of mission: Ambassador Knud-Erik TYGESEN

chancery: 3200 Whitehaven Street NW, Washington, DC 20008

telephone: [1] (202) 234-4300

FAX: [1] (202) 328-1470

consulate(s) general: Chicago, Los Angeles, and New York

Diplomatic representation from the US:

chief of mission: Ambassador Edward E. ELSON

embassy: Dag Hammarskjolds Alle 24, 2100 Copenhagen

mailing address: PSC 73, APO AE 09716

telephone: [45] (31) 42 31 44

FAX: [45] (35) 43 02 23

Flag description: red with a white cross that extends to the edges of the flag; the vertical part of the cross is shifted to the hoist side, and that design element of the Dannebrog (Danish flag) was subsequently adopted by the other Nordic countries of Finland, Iceland, Norway, and Sweden

ECONOMY

Economy-overview: This thoroughly modern market economy features high-tech agriculture, up-to-date small-scale and corporate industry, extensive

government welfare measures, comfortable living standards, and high dependence on foreign trade. Denmark is a net exporter of food. The center-left coalition government will concentrate on reducing the persistently high unemployment rate and the budget deficit as well as following the previous government's policies of maintaining low inflation and a current account surplus. The coalition also vows to maintain a stable currency. The coalition has lowered marginal income taxes while maintaining overall tax revenues; boosted industrial competitiveness through labor market and tax reforms and increased research and development funds; and improved welfare services for the neediest while cutting paperwork and delays. Prime Minister RASMUSSEN's reforms focus on adapting Denmark to the criteria for European integration by 1999; Copenhagen has won from the European Union (EU) the right to opt out of the European Monetary Union (EMU). Denmark is, in fact, one of the few EU countries likely to fit into the EMU on time. Growth may fall off slightly to 2.8% in 1998, and inflation may rise to 2.5%.

GDP: purchasing power parity-\$122.5 billion (1997 est.)

GDP-real growth rate: 3% (1997 est.)

GDP-per capita: purchasing power parity-\$23,200 (1997 est.)

GDP-composition by sector:

agriculture: 4%

industry: 27%

services: 69% (1995)

Inflation rate-consumer price index: 2.2% (1997 est.)

Labor force:

total: 2,895,950

by occupation: private services 40%, government services 30%, manufacturing and mining 19%, construction 6%, agriculture, forestry, and fishing 5% (1995)

Unemployment rate: 7.9% (1997 est.)

Budget:

revenues: \$62.1 billion

expenditures: \$66.4 billion, including capital expenditures of \$NA (1996 est.)

Industries: food processing, machinery and equipment, textiles and clothing, chemical products, electronics, construction, furniture, and other wood products, shipbuilding

Industrial production growth rate: 1.3% (1996)

Electricity-capacity: 10.604 million kW (1995)

Electricity-production: 34.244 billion kWh (1995)

Electricity-consumption per capita: 6,432 kWh (1995)

Agriculture-products: grain, potatoes, rape, sugar beets; meat, dairy products; fish

Exports:

total value: \$48.8 billion (f.o.b., 1996)

commodities: machinery and instruments 25%, meat and meat products, fuels, dairy products, ships, fish, chemicals

partners: Germany 22.5%, Sweden 9.7%, UK 7.9%, Norway 5.9%, France 5.4%, Netherlands 4.4%, US 4.0% (1995)

Imports:

total value: \$43.2 billion (c.i.f., 1996)

commodities: machinery and equipment, petroleum 25%, chemicals, grain and foodstuffs, textiles, paper

partners: Germany 21.7%, Sweden 11.7%, Netherlands 7.0%, UK 6.6%, France 5.2%, Norway 4.9%, US 4.7%, Japan 3.5%, FSU 1.7% (1995)

Debt-external: \$44 billion (1996 est.)

Economic aid:

donor: ODA, \$1.34 billion (1993)

Currency: 1 Danish krone (DKr) = 100 oere

Exchange rates: Danish kroner (DKr) per US\$1-6.916 (January 1998), 6.604 (1997), 5.799 (1996), 5.602 (1995), 6.361 (1994), 6.484 (1993)

Fiscal year: calendar year

COMMUNICATIONS

Telephones: 4.025 million (1995 est.), of which 822,000 are mobile telephones

Telephone system: excellent telephone and telegraph services

domestic: buried and submarine cables and microwave radio relay form trunk network, four cellular radio communications systems

international: 18 submarine fiber-optic cables linking Denmark with Norway, Sweden, Russia, Poland, Germany, Netherlands, UK, Faroe Islands, Iceland, and

Canada; satellite earth stations-6 Intelsat, 10 Eutelsat, 1 Orion, 1 Inmarsat (Blaavand-Atlantic-East);

note-the Nordic countries (Denmark, Finland, Iceland,

Norway, and Sweden) share the Danish earth station and the Eik, Norway, station for world-wide

Inmarsat access

Radio broadcast stations: AM 2, FM 3, shortwave 0

Radios: NA

Television broadcast stations: 50 (1996 est.)

Televisions: 3 million (1996 est.)

TRANSPORTATION

Railways:

total: 3,358 km (510 km privately owned and operated)

standard gauge: 3,358 km 1.435-m gauge (440 km electrified; 760 km double track) (1996)

Highways:

total: 71,600 km

paved: 71,600 km (including 880 km of expressways)

unpaved: 0 km (1996 est.)

Waterways: 417 km

Pipelines: crude oil 110 km; petroleum products 578 km; natural gas 700 km

Ports and harbors: Alborg, Arhus, Copenhagen, Esbjerg, Fredericia, Grena, Koge, Odense, Struer

Merchant marine:

total: 327 ships (1,000 GRT or over) totaling 4,972,331 GRT/6,894,091 DWT

ships by type: bulk 14, cargo 118, chemical tanker 16, container 76, liquefied gas tanker 24, livestock carrier 6, oil tanker 25, railcar carrier 1, refrigerated cargo 14,

roll-on/roll-off cargo 22, short-sea passenger 9, specialized tanker 2

note: Denmark has created its own internal register, called the Danish International Ship register (DIS);

DIS ships do not have to meet Danish manning

regulations, and they amount to a flag of convenience within the Danish register (1997 est.)

Airports: 118 (1997 est.)

Airports-with paved runways:

total: 28

over 3,047 m: 2

2,438 to 3,047 m: 7

1,524 to 2,437 m: 3

914 to 1,523 m: 13

under 914 m: 3 (1997 est.)

Airports-with unpaved runways:

total: 90

1,524 to 2,437 m: 1

914 to 1,523 m: 7

under 914 m: 82 (1997 est.)

MILITARY

Military branches: Royal Danish Army, Royal Danish Navy, Royal Danish Air Force, Home Guard

Military manpower-military age: 20 years of age

Military manpower-availability:

males age 15-49: 1,324,150 (1998 est.)

Military manpower-fit for military service:

males: 1,137,563 (1998 est.)

Military manpower-reaching military age annually:

males: 32,918 (1998 est.)

Military expenditures-dollar figure: \$2.9 billion (1997 est.)

Military expenditures-percent of GDP: 1.6% (1997 est.)

TRANSNATIONAL ISSUES

Disputes-international: Rockall continental shelf dispute involving Iceland, Ireland, and the UK (Ireland and the UK have signed a boundary agreement in the

Rockall area)

GENERAL OVERVIEW

2. Legal System.

In the 18th and 19th centuries the criminal justice system developed into an adversarial system. According to the Administration of Justice Act from 1916, both the pre-trial proceedings and the trial itself follow this system. This process also includes the questioning of witnesses and the accused by the presiding judge. It follows from the principle of material truth that the judge is obliged to elucidate all vague points of the case.

The criminal justice system is administered by the Ministry of Justice, the Minister of Justice being head of office regarding Denmark as well as Greenland. The police, the courts when seen as an administrative body, and the correctional system all stand under the immediate authority of the Minister of Justice.

3. History of the Criminal Justice System.

In the year 1660, Denmark was made an absolute monarchy and in 1683 a new set of laws, Christian den Femtes Danske Lov, was issued. These statutes were much influenced by municipal law. In the following centuries, with these laws becoming increasingly obsolete, the Supreme Court played a prominent role in interpreting and completing statutory law.

In 1848 democracy was introduced in the kingdom of Denmark and in 1866 a modern criminal code was issued. The first clause of the general part stated the principle of legality which is *nulla poena sine lege*. The criminal code of today, Straffeloven, af 15. April 1930 entered into force in 1933.

In 1953 the large Arctic island of Greenland which had been colonized by Denmark was made part of the country. In the year 1954, a criminal code especially for Greenland was issued in which sanctions were based on the old traditions of the people.

Thus, Greenland's criminal justice system is solely offender treatment oriented, although this criminal policy causes increasing difficulties in a modern society. Figures and information about Greenland's criminal justice are not included in the following.

CRIME

1. Classification of Crimes.

* Legal classification. Criminal offenses are defined either in the special part of the Criminal Code or in separate statutes. The general conditions for imposing criminal penalties are found in the general part of the Criminal Code which also apply to separate statutes. The sanctions described in the general part of the Criminal Code are the same whether the criminal offense consists of a violation of the Criminal

Code or of separate statutes.

The substantive Danish criminal law is monistic, meaning that violations of the law never have been divided into categories like felony/misdemeanor, crime/delicts or the like. It does not mean, however, that major offenses are treated in the same manner as petty offenses in all respects.

* Age of criminal responsibility. The age of criminal responsibility is 15 years.

* Drug offenses. According to the Criminal Code the mere possession of narcotic drugs is criminalized. However, the law is not enforced regarding possession of very small amounts meant for the drug addict's own consumption. Possession and selling is penalized in a special law on drugs containing the possibility of imprisonment for a period of up to two years. Serious cases of trafficking of drugs are punished with imprisonment within a range of one month to ten years according to the Criminal Code.

2. Crime Statistics.

The definition of homicide is intentional killing. Burglary is included in the figures on theft in general. Attempts are included unless otherwise specified. Persons convicted in 1992 and rate of conviction over 15 years.

The overall percentage of the reported crime that was cleared amounted to 21.8% in 1992.

* Crime regions. Being a homogeneous country Denmark has no special crime regions. The distribution of crime in rural and urban districts mirrors the relative residency distribution of the population and is shown in Table 3.

VICTIMS

1. Groups Most Victimized by Crime.

A survey has shown that about 25% of the population was victimized in 1986 by criminal acts such as theft, vandalism and violence. Of these, 14% had experienced theft, 12% vandalism and 6% violence. More men than women were victimized. The difference between age groups was apparent. More than one third of young people between 16- 24 years were victimized against less than one eighth of old people over 65 years of age. The greatest risk of experiencing criminality was found among young men in urban areas.

2. Victims' Assistance Agencies.

Private crisis centers for victims of violence and rape are found in all major towns. According to the Law of Compensation to Victims of Violent Acts the victim has the right to receive compensation from the state and a scale for paying damages has been established.

3. Role of Victim in Prosecution and Sentencing.

The victim has no right to be a party to the proceedings under the penal aspects of the case. They are notified of the action taken by the prosecution. In a very limited number of cases the victim is permitted to prosecute, i.e. offenses against personal honor and special cases where the public prosecutor has decided not to pursue the matter. The victim may be called as a witness under the normal rules regarding witnesses.

4. Victims' Rights Legislation.

The victim has the right to present civil claims under the criminal process. Victims of certain violent crimes such as sexual assault may receive legal assistance during the criminal proceedings. A sexual assault victim is also entitled to request that the courtroom be cleared while he or she is giving evidence.

POLICE

1. Administration.

The state police is a department of the Ministry of Justice. There is no longer a municipal police and the military police only has authority over soldiers according to the Military Criminal Code. Denmark is divided into 54 police districts (excluding the Faeroe Islands and Greenland), each headed by a local chief of police. The National Commissioner reports to the Minister of Justice. For administrative purposes the police are subdivided into plain-clothes criminal investigators, uniformed patrolmen, traffic police officers, immigration police, and other categories.

2. Resources.

* Expenditures. In the year 1993 the expenditure grant totaled DKK 4.4 billion, of which employee costs accounted for 77%.

* Number of police. At the end of 1993 the number of police personnel was 10,247, of which 8,123 served in the uniform branch. Legal staff totaled 369 and the number of civilian clerical staff was 2,093. The ethnic origin and gender distribution of the police force has not been reported.

3. Technology.

* Availability of police automobiles. In 1993 the number of service vehicles was 2,245, each running about 28,000 km per year. The number of police turn-outs amounted to 471,076.

* Electronic equipment. The police are equipped with radio communication, and computers. Recently, data terminals have been installed in police cars in order to facilitate access to offender records on turn-outs.

* Weapons. The police force is armed with defensive weapons like tear gas. Watercannons are not used. The police use 7.65 caliber pistols. Battle uniforms consist of helmets, visors and plastic shields. Bulletproof vests are only used in case of threats of gunfire and the like.

4. Training and Qualifications.

New recruits are required to be in good physical condition, good personal and economic condition, and should have achieved good grades in school. New recruits are usually required to be between 21 and 29 years of age, of Danish citizenship and without any convictions.

The basic training of police personnel takes 3 years. The training comprises both school education and training of a more practical nature. School education, which consists of 2 courses of 8 months each, takes place at the Police Academy in Copenhagen. The rest of the training time is spent on the job. The Police Academy also presents special courses and leadership courses. All chiefs of police hold a master's degree in law from a university.

5. Discretion.

* Use of force. A policeman on duty is armed with a pistol and a baton. According to the rules issued by the National Commissioner the pistol and baton may be used when considered necessary, mainly to avert damage to a person, or to arrest dangerous criminals. Firearms may also be used to avert dangerous attacks on state institutions and to disperse an unlawful assembly which is considered to intend a dangerous attack of such kind. The use of firearms and police batons must be reported to the National Commissioner in writing. In the year 1993, 245 reports concerning the use of and threats of using firearms were filed. There were 359 reports concerning the use of police batons.

* Stop/apprehend a suspect. Coercive measures must be based on law and they must respect the principle of proportionality, and they may not violate fundamental rights. According to the Administration of Justice Act the police may apprehend a person in order to establish his or her identity. In order to take a person suspected of criminal acts into custody, the suspicion must be strong and concern fairly serious offense.

* Decision to arrest. Arrests are made by the police on their own discretion. According to the Constitution, arrests for a period of more than 24 hours have to be decided by the court. The maximum period of a prolonged arrest is 72 hours. When the grounds for detention no longer exist the person must be released and the time of the release be reported. Detention on remand can only be decided by a court. A person who is suspected of a criminal act will in many cases be released after questioning in the police station, even if the person is formally charged with a crime.

* Search and seizure. Suspects and their homes or any other place where relevant objects or wanted persons are presumably to be found may be searched. The conditions for this measure depend on whether it is a public place or a private home, whether it is necessary to act with short notice, or whether

the person consents to the search. Two independent witnesses will be summoned to the search unless the suspect waives his rights. Compensation may be awarded for the infamy caused by an improper search. Objects of proof or loot may be seized wherever they are found.

* Confessions. Suspects are not obligated to testify. According to the Administration of Justice Act the police may under no circumstances put pressure on the suspect or use any kind of force in order to make him or her speak. On the other hand, the accused must submit to an examination of his body if the police wish to look for traces of a fight or conduct blood analysis. The accused may also be ordered by the court to undergo a psychiatric examination, possibly in a mental hospital.

6. Accountability.

According to the Administration of Justice Act complaints over police behavior are dealt with by a lokalnaevn or local committee. In such cases the committee consists of the chief of police, two police staff members, members pointed out by the municipality and a representative for the defense lawyer's association. The local committee decides whether to investigate the matter. The investigation itself may be carried out by the public prosecutor or by the city court. The committee may refuse to investigate if the complaint is considered unfounded or if the case is considered to have been adequately seen into.

PROSECUTORIAL AND JUDICIAL PROCESS

1. Rights of the Accused.

* Rights of the accused at trial. The accused is to be regarded as an active subject with the benefit of the presumption of innocence. He has the right to be heard, to present evidence, to put questions to witnesses, and to take remedies. He is also to some extent an object of investigatory measures such as finger-printing and blood tests for alcohol. He may also have to submit to coercive measures such as arrest and search of his home.

The accused is under no obligation actively to contribute to the prosecution and neither pressure nor cunning may be applied in view of obtaining statements. Devices such as the lie-detector or methods like narco-analysis or hypnosis are inadmissible.

* Assistance to the accused. Everyone accused has the right to legal assistance by counsel of his own choice. Defense counsel is mandatory in all criminal cases of a more serious nature, regardless of the financial situation of the accused. The defense counselor is appointed either at the request of the accused or, more often, chosen by the court from a body of qualified lawyers previously selected by the Ministry of Justice. The police must inform the accused of his right to a publicly assigned defense counsel. If the convicted is unable to pay his defense counsel the Treasury will in most cases provide the lawyer's fee and cover other costs. In case of acquittal the State will nearly always cover all costs. It is the right of the accused to have his defense counsel present during police interrogation and court

hearings, and he is entitled to consult with counsel in private at all times. The counselor is informed of the evidence gathered by the police but in some cases he may not notify the accused of the contents.

2. Procedures.

* Preparatory procedures for bringing a suspect to trial. The first step in the criminal proceedings is the police inquiry. While investigating, the police do not act as agents of the government but exercise their functions objectively as fact-finders.

* Official who conducts prosecution. The local chief of police, who has a law degree together with his deputies, has the authority to prosecute in nearly all cases. In the most serious cases are referred to the district attorney, who is also in charge of the cases for the High Court which entail jury cases and appellate cases. The Director of public prosecution conducts criminal cases for the Supreme Court.

* Alternatives to trial. Prosecution may be abandoned in cases where a conviction cannot be expected because of lack of evidence, or charges may be withdrawn in cases against young people or first-time offenders. Withdrawal of charges often will be combined with conditions similar to those imposed by a suspended sentence. Conditional withdrawal of charges only takes place in minor cases, where the accused has made an unqualified confession which is found to be true by the court. Unconditional withdrawal of charges is used in two different situations. In rare cases charges against a suspect are dropped when there are special mitigating circumstances in accordance with the principle of opportunity. More often, the public prosecutor may reduce the charges if further prosecution will cause difficulties, costs, or a prolonged period in court out of proportion to the importance of the case or the expected sentence. This may be the case, for instance, in big tax evasion cases or fraud cases.

* Pre-trial incarceration conditions. A person against whom criminal prosecution is initiated is not automatically subject to detention on remand. Detention must be applied in accordance with the principle of proportionality. Thus, it cannot be used if the actual crime in fact only carries a fine or lenient imprisonment. Beside these conditions the general rules are: Firstly, there must exist a reasonable suspicion that an arrestable offense has been committed, i.e. an offense which carries a maximum penalty for at least one year and six months, e.g. ordinary theft and burglary. Secondly, one or more of the following special grounds for detention must be present: Serious reasons to believe that the accused will either abscond, that he might commit further offenses of the same sort if left at large, or that he will meddle with the evidence. On specifically listed serious grounds detention may also be used in order to protect the public sense of justice. The court may decide that a prisoner on remand is to be isolated inside the prison. The decision has to be renewed at least every second week. The average length of stays in remand prison is estimated to be between two and four weeks.

* Bail procedure. In cases where remand detention is applicable the court may choose to release the accused conditionally if the purpose of remand detention can be obtained in a more lenient manner. Release on bail has been used in very rare cases and is not a usual part of the criminal justice system.

* Proportion of pre-trial offenders incarcerated. In 1992, the proportion of persons with prison sentences who previously had been held in pre-trial incarceration was estimated to be 27%. There were also 23,781 convictions with unsuspended or suspended prison sentences in comparison to 6,407 cases of remand detention.

JUDICIAL SYSTEM

1. Administration.

The court system in criminal matters consists of the Supreme Court, two high courts and 84 city courts. A major part of all criminal cases are resolved with the participation of two lay judges in addition to the city court judge. Their votes carry the same weight on all questions. In the rare cases where a jury is instituted by the Administration of Justice Act, twelve jurors participate in the case in addition to three high court judges. In jury cases the united lay votes carry the same weight as the professional judges' votes.

2. Judges.

* Number of judges. There are 15 supreme court judges, 69 high court judges, and 195 judges in the city courts.

* Appointment and qualifications. The judges all have high university law degrees prior to their engagement by the Ministry of Justice. After a decade or more of work in the courts or in the Ministry of Justice the judge will, according to the Constitution, be appointed for life or until his or her retirement at the age of 70.

3. Special Courts.

Denmark has no special courts in criminal matters besides the ordinary court system. Thus, juvenile cases, which are often settled by a conditional withdrawal of charges, are handled by the city court judges.

4. Procedure.

Confessions may influence the sentence in a mitigating direction but the Administration of Justice Act does not allow guilty pleas where the accused is allowed to confess to a lesser crime. There is no information on how the majority of criminal cases are resolved.

PENALTIES AND SENTENCING

1. Sentencing Process.

* Who determines the sentence? The sentence is determined by the presiding judges.

* Which persons have input into the sentencing process? In preparing the case the police are governed by the principle of objectivity which means that the police are obliged to look at circumstances that speak for as well as against the accused. A social report is developed if it is considered possible that the personal conditions of the accused may influence the determination of the penalty. The police write such a report in cases where the sentence may be suspended, or where charges may be conditionally withdrawn, as well as in cases regarding the mentally unfit where measures other than punishment are considered. In some cases the accused may be required to undergo a psychiatric examination in a mental hospital.

All kinds of evidence, including witnesses' statements, are supposed to be laid before the court during the criminal proceedings on which basis the court decides the sentence. In minor cases and cases where the accused has made a full confession the court consists of one city court judge. In all criminal cases of first instance where the permissible sentence is more severe than a fine, two lay judges will participate in the trial.

2. Types of Penalties.

* Range of penalties. The penalties are described in the general part of the Criminal Code. They are: fines, lenient prison (7 to 30 days), prison (1 month to 16 years or imprisonment for life), and community service orders. Prison sentences and fines may be conditionally suspended and there is a list of conditions such as probation, abstaining from drug abuse, and payment of damages that may be stipulated. The maximum penalty is imprisonment for a lifetime which is prescribed for homicide and a few other crimes of equal gravity. In most cases these persons will be given a conditional royal pardon after approximately 12-14 years of imprisonment.

The penalty for a typical offense is supposed to be within the lower half of the penalty range for the crime, giving room for mitigating as well as aggravating circumstances. If the case comprises more than one criminal act the penalty must be contained within the ranges of the most serious offense so that penalties for different offenses are not accumulated in an absolute way.

Each statute in the special part of the Criminal Code will tell the kind of penalty applicable for the crime and the upper range of its duration. This gives the court the opportunity to choose the actual penalty freely within the ranges. The penalty ranges for theft go from fines for petty theft to up to four years imprisonment for aggravated theft. Violent attacks and assault are usually punished with prison sentences from one to four years.

PRISON

1. Description.

* Number of prisons and type. The correctional service controls 15 prisons, one institution for inmates needing psychiatric treatment, and 40 local jails. Five of the prisons and the psychiatric institution are closed in that they are secured by an external ring wall as well as by internal precautions like secured

buildings, and electronic security systems combined with relatively dense staffing. The staff does not carry arms. Being used as remand detention institutions, the local jails are also closed. The remaining nine prisons are open institutions which actually means that the inmates are physically able to leave the institution. Two of the closed prisons have both male and female inmates. In one of these prisons there is cohabitation between men and women within units. There are also two open prison departments for women.

* Number of prison beds. In 1992 the prison capacity totaled 3,797 and the jail capacity totaled 1,615.

* Average daily/number of prisoners. In 1992 there was a daily average prison population of 3,597: 3,412 men and 185 women. The local jails have a daily average population of 1,531.

* Number of annual admissions. The number of annual admissions after conviction in 1992 was 9,741 persons.

* Actual or estimated proportion of inmates incarcerated. As admissions are not distributed by types of crime a comparison must be made among unsuspended convictions to prison in 1992 which total 8,153.

| Crime Type | Annual Admissions | Daily Average |
|-----------------|-------------------|---------------|
| Drug Crimes | N/A | 7% |
| Violent Crimes | N/A | 18% |
| Property Crimes | N/A | 58% |
| Sex Crimes | N/A | 2% |
| Other | N/A | 15% |
| Total | N/A | 100% |

2. Administration.

* Administration. All prisons and jails are state institutions administered by the Ministry of Justice's Department of Prisons and Probation.

* Prison guards. In 1992 the prison guards, inclusive of vocational staff, totaled about 2,600 persons. The prison staff also consists of about 680 social welfare officers, teachers, health officers, vicars, and office clerks. Thus, the inmate - prison staff ratio is almost 1:1. The prison staff is a mixed group of men and women but figures on the gender distribution are not available. Women are much appreciated in prison guard functions.

* **Training and qualifications.** The basic qualifications are good physical condition, good personal and economic conditions, and good school attainments. New recruits are usually required to be between 21 and 29 years of age, of Danish citizenship and having never been convicted. The prison staff education takes place at the Prison Educational Center. As is the case with the police chiefs, the prison wardens possess university law degrees.

* **Expenditure on the prison system.** In 1993 the total expenditure on the prison system was 1,307 million Danish crowns. A revenue of 119 million Danish crowns, corresponding to 9% of the total expenditure, comes from the sale of inmate products.

* **Number of prisoners awaiting trial.** Information not available.

3. Prison Conditions.

* **Remissions.** The policies of the correctional service are governed by the following three principles:

a. **Normalization.** As a starting point the inmate is placed in the open prison closest to his home in order to preserve family contacts and to pave the way for a gradual release from the prison. There must be specific reasons for instituting control of inmates' correspondence. Visits by next-of-kin take place in secluded visiting rooms with a couch. In the open prisons weekend leaves are granted every third week to prisoners with a low risk of recidivism. A prisoner in a closed institution may obtain similar rights to weekend leave when he has served one fourth of his sentence. At some time during incarceration about one third of the prisoners in closed prisons are granted occasional leaves. The total number of leaves per year is about 57,000. More than half of these are so-called work leaves where an inmate leaves the prison to go to work or to take part in educational activities in society.

b. **Self-administration.** The inmate is responsible for his own daily life. Important elements of this approach are that food must be bought and cooked by the inmate to which end he is paid a fixed amount of money per day. The inmate is also responsible for his personal hygiene, clothes' laundry and repair. The prison encourages the inmates to make meaningful use of leisure hours by providing opportunity for sports and other structuralized activities.

c. **Release on parole and after-care.** According to a provision of the Criminal Code more than 90% of the inmates are released on parole after having served two thirds of their sentences. Almost 10% of these will be released after serving between one half and two thirds of the time, due to special grounds. Royal pardon is possible according to the Constitution, but rare. Outside of imprisonment for life which necessitates the use of pardoning, royal pardon is more commonly used in connection with short-term sentences where the convicted cannot endure the prison stay because of severe illness or the like. In such cases the pardon is normally conditioned on the payment of a fine.

The probation and after-care system has local offices in about 30 towns all over the country. These offices attend to persons with suspended sentences on probation, parolees under supervision, and handles the supervision of certain mentally aberrant persons who have been sentenced to ambulant treatment. The serving of community service orders also rests with the probation and after-care system.

* **Work/education.** While serving his sentence the inmate is obliged to work for which he is paid a small

hourly salary. The prison administration tries to ensure that the working places equate those found in modern society. In order to encourage inmates to educate themselves the same amount is paid to inmates who choose to go to the prison school instead of going to work.

* Amenities/privileges. The prison provides health care and necessary dental care. Sick inmates will be hospitalized in ordinary hospitals.

EXTRADITION AND TREATIES

* Extradition. The criminal justice system of Denmark respects human rights pronounced in the European Convention for the Protection of Human Rights and Fundamental Freedoms, Rome 1950, and the Standard Minimum Rules for the Treatment of Prisoners as recommended by the Committee of Ministers of the Council of Europe in 1987.

Denmark has entered into bilateral extradition treaties with the USA, Canada, Great Britain and Belgium. On a multilateral basis, Denmark has ratified the European Convention on extradition from 1957. Extradition to and from Finland, Iceland, Norway and Sweden takes place according to similar laws passed in each country.

* Exchange of prisoners. Denmark has also ratified European conventions on transfer of criminals and criminal proceedings. As a consequence of special regulations the transfer of criminals as well as the transfer of criminal proceedings takes place on a regular basis inside Scandinavia.

* Specified conditions. In contrast with extradition to other countries, the legislation on extradition inside Scandinavia does not exempt its own nationals from prosecution.

[Top](#)

A Defence Technique

1.

The attacker grabs your wrist (generally the one that is front-most). Notice also that his left hand is poised for a possible punch.

2.

Quickly lift your left leg (or whichever one is closest to him) and extend it to his front most knee. Notice that this forces him off balance and throws him backwards. It also releases the strength of his grip.

3.

Drop your weight slightly forward as you place your foot back onto the ground. Lift your free arm up and smash him to the base of the nose. This will drive him back and give you the opportunity to flee to safety.

(In Emma's opinion this could kill him instantly)

4.

If desired, follow up with a stomp to the groin.

GENERAL OVERVIEW

1. Political system.

Finland is a republic with a strongly centralized government. The country is divided into twelve

provinces, which in turn are divided into 248 police districts, each generally comprising one or two municipalities.

2. Legal system.

The Criminal Law is elaborated in the Criminal Code (1889) and separate statutes such as the Young Offenders Act (1939), the Narcotics Act (1972), the Traffic Act (1981) and the Conditional Sentences Act (1918). The Criminal Code is divided into a "general part" with provisions on jurisdiction, age of criminal responsibility, justification and excuse, sentencing and forfeiture, and a "special part" with provisions defining the different offenses and establishing the levels of punishment.

The law on criminal procedure is contained in the Code of Judicial Procedure (1734). Since its initial adoption, the Code of Judicial Procedure has been amended several times, with extensive reforms most recently in 1991. In the administration of justice, the country is divided into six appellate districts and 95 judicial districts.

3. History of criminal justice system.

The Finnish legal system developed during the seven centuries (ca. 1150-1809) when Finland was part of the Swedish kingdom. For this reason, the legal system shares many characteristics with the other Scandinavian legal systems. Strict legalism (an emphasis on the rule of law) and a developed set of democratic controls on the exercise of discretion are the two premier features of Finnish law. The approach to the investigation of offenses can be termed inquisitorial, with increasingly strong adversarial elements.

The Criminal Code has been amended extensively since its original adoption in 1889. It is currently undergoing a total reform. One third of its provisions were amended by an Act of Parliament in 1990, and a third by an Act of Parliament in 1995. The purpose of the reform is to ensure that the Criminal Code defines and deals with all crimes consistently, while taking into account the fundamental changes in society that have occurred over the past several decades.

CRIME

1. Classification of crimes.

* Legal classification.

In Finland, there are no general distinctions or categories of crime. Rather, offense distinctions are based on the expected punishment for the offense, or the "penal latitude" defined by law. For example, a person may be held in pre-trial custody if the maximum punishment for the offense is imprisonment for over 1 year.

* Age of criminal responsibility.

The age of criminal responsibility is 15 years. Children who commit offenses below this age are not brought before a court. These cases are dealt with by municipal social welfare boards. Youths between the ages of 15 and 18 benefit from a reduction of the sentencing scale.

* Drug offenses.

Finland has an extremely restrictive approach to drugs. With the obvious exception of controlled medical drugs, the preparation, transport, possession, use, import, export and sale of any drugs defined by the international convention to which Finland has acceded, is illegal.

2. Crime statistics

* Murder.

Each year, some 30 murders and 100 incidents of manslaughter are reported to the police. These figures do not include attempts. In 1990, 23 murders and 122 incidents of manslaughter were reported to the police. Homicides are divided into murder and manslaughter. Murder is defined as the killing of a person with deliberate intent, for gain, with particular cruelty or brutality, in a manner that causes general danger, or the killing of a civil servant.

* Rape.

In 1990, 381 rapes or attempted rapes were reported to the police. Rape is defined as "using violence or the threat of violence to force a woman into sexual intercourse against her will". Marital rape is not covered by the definition.

* Theft.

In 1990, 125,909 thefts and 4,800 aggravated thefts were reported to the police. The figures include attempts. Theft is defined as the "unauthorized taking of chattels from the possession of another person." If the property in question is of "special value, or the theft resulted in a relatively serious loss to the victim taking into consideration the circumstances of the victim, or the offender took advantage of the helpless condition of the victim, or the offender was armed with a gun, explosives, or other similar dangerous implements, or the offense involved breaking into a residence and the offense as a whole is deemed aggravated," the offense may be classified as aggravated theft. Theft of motor vehicles is criminalized separately.

* Serious drug offense.

In 1990, the police recorded a total of 2536 drug offenses, of which 267 were classified as "serious drug offenses." The figures include attempts. A drug offense is defined as serious if: "1) the offense involves a particularly dangerous drug or a large amount of drugs, 2) considerable financial gain is sought, 3) the offender acted as part of a group especially organized for the large-scale commission of such an offense, 4) the offense seriously endangers the life or health of several people, or 5) drugs are given to minors or are otherwise distributed in an unscrupulous manner, and the offense as a whole is deemed aggravated."

* Crime regions.

Among the Scandinavian countries, Finland has a reputation for having a greater violent crime problem. However, a recent victimization study showed that Finland was in the middle range among Western European countries in respect to violent offenses.

VICTIMS

1. Groups most victimized by crime.

Victimization surveys indicate that the typical victim of a violent offense is a young, urban male. For property offenses, the victimization surveys indicate that the growth in the number of these offenses is being borne by businesses. The risk of an individual being the victim of a property offense has remained stable for the past decade.

2. Victims' assistance agencies.

National victim hot lines were established in Finland in 1994. Both volunteer groups and municipalities operate shelters for victims of domestic violence. In addition, the health care and social security systems aid victims of crime.

3. Role of victim in prosecution and sentencing.

The victim of a crime plays an important role in Finnish law. The victim has the right to prosecute an offense, independent of the decision of the public prosecutor. The victim can take part in all stages of the prosecution. For example, the victim may submit evidence, suggest questions and comment on the evidence. The victim may request compensation in connection with the criminal proceedings. Compensation may also be claimed from the state for an injury or injury-related loss arising from any offense. In this regard, the Finnish scheme is among the most generous in the world.

4. Victims' rights legislation.

No separate victims' rights legislation exists in Finland. Several provisions in the Code of Judicial Procedure and the Criminal Code ensure the right of the victim to access to justice, to redress and to be heard. In theory, victims have extremely broad rights and possibilities of being involved in the resolution of the case. In practice, as is the case in all other countries, the rights may remain unused due, for example, to lack of awareness of the rights or to practical problems.

POLICE

1. Administration.

The Finnish police are organized on an hierarchical national basis under the authority of the Ministry of the Interior and subject to the Police Act. The chain of command is totally independent of the military structure.

2. Resources.

* Expenditures.

During the 1990 calendar year, the budget of the national police force was 2,053,564,000 Finnmarks.

* Number of Police.

Finland has a total of 11,942 police personnel, of whom some 20% are women (1990 data).

3. Technology.

* Availability of police automobiles.

Police are well-equipped with a variety of motor vehicles both for patrolling and for special purposes. Currently, the most common patrol car being acquired is the Ford Mondeo.

* Electronic equipment.

The police have at their disposal modern computer and telecommunications equipment.

* Weapons.

Police patrol officers are armed with a .38 caliber pistol or revolver. A special unit based in Helsinki, known colloquially as the "Beagle Boys" is trained in a variety of weapons and special tactics. For example, this unit might be used for the arrest of an offender who is suspected of being armed and dangerous. The Beagle Boys are also trained in anti-terrorist tactics. As of this writing, Finland has not had the need to use the unit for this purpose.

4. Training of police.

Training on the entry level is provided in the Police Institute. The basic course is divided into two modules of 11 and 6 months, with a one- year period of on-the-job training between the two. Further training is provided in the Police Academy, where intermediate courses last 6 months, and advanced courses last 12 months.

5. Discretion.

* Use of force. The statutory basis for the rights and responsibilities of the police is provided by the Police Act, the Pre-Trial Investigation Act and the Coercive Means of Investigation Act. In brief, these statutes state that the use of force by police should be in proportion to the seriousness of the suspected offense in question, and force should be used only if less intrusive means would be inappropriate. For example deadly force can only be used in self-defense or in defense of another person against whom an immediate and potentially fatal assault is occurring or is about to occur.

* Stop/apprehend suspect: The police may stop and question anyone if it is regarded as necessary for their work. A person may be apprehended if a standing arrest or remand warrant has been issued, or if the conditions for an arrest are present and the matter will not tolerate a delay. Any person has the right to apprehend an offender caught in the act or escaping from the scene of a crime if the offense may be punishable by imprisonment or if the offense is petty assault, petty theft, petty embezzlement, petty unauthorized use, petty vandalism, or petty fraud.

* Decision to arrest. A person may be arrested and held in pre-trial custody if the person is suspected of having committed an offense for which the maximum sentence is imprisonment for over one year, or if it is probable that he or she will attempt to evade or obstruct justice, or continue his or her criminal

activity.

The police are granted the discretion to caution the offender if the offense is minor and would not have led to a punishment more severe than a fine.

* Search and seizure. Chapters 4 and 5 of the Coercive Means of Investigation Act contain detailed provisions on search and seizure. The main rule regarding search is that it may be carried out if the suspected offense is punishable by at least 6 months imprisonment and the search is necessary for the investigation of the offense. The decision is usually made by a senior police officer; however, if the matter brooks no delay, the search may be carried out by a policeman. The rule regarding seizure is that an object may be seized if there is cause to assume that it may be used as evidence in a criminal case, if it has been criminally obtained, or if the court will order it confiscated.

* Confessions. There is no specific provision on the weight of a confession as evidence. Finnish courts apply the rule of "free assessment of evidence;" with the exception of statements obtained through the use of torture, no evidence is ipso facto inadmissible. In practice, courts seek collaborative evidence to confirm a confession.

6. Accountability.

Complaints against the police may be dealt with internally, by the superiors of the police officer in question, or externally, by the Parliamentary Ombudsman. The Ombudsman is empowered to obtain any information necessary in his investigations. He also has the power to issue cautions and reprimands, and suggest that disciplinary action be undertaken.

PROSECUTORIAL AND JUDICIAL PROCESS

1. Rights of the accused.

* Rights of the accused. A person who is suspected of an offense has the standard rights, including the right to counsel, the right to be informed of the charges and the right to a speedy trial.

* Assistance to the accused. If he or she cannot afford counsel, assistance can be provided by the municipal legal aid office. Persons held in custody have the right to representation by a member of the Bar Association at state expense.

2. Procedures.

* Preparatory procedures for bringing a suspect to trial. It is the responsibility of the police to investigate offenses. The customs and taxation authorities maintain investigative powers in their field. The results of the investigation are turned over to the public prosecutor, who decides whether the facts are sufficient to warrant prosecution.

Simplified procedures are used in the case of petty crime. Minor traffic offenses are dealt with by a "petty fine" imposed by the police according to a tariff. Petty fines cannot be converted into

imprisonment. "Summary penal orders" can be used for all offenses subject to a maximum punishment of, at most, 6 months of imprisonment, provided that the prosecutor calls for the imposition of a fine. The penal order is issued by the police under the supervision of the prosecutor, and it is approved by the court. Most offenders pay the fine, but the offender has the right to challenge the penal order in court. Defaulters may be sentenced to prison.

* Official who conducts prosecution. The public prosecutor or the victim conducts the prosecution. In urban areas, the public prosecutor holds a full-time position. In rural areas, the public prosecutor is usually the district police chief or the assistant police chief. Public prosecutors are under the supervision of the Chancellor of Justice.

* Alternatives to trial. The Finnish system does not use plea bargaining, nor does it recognize medical or other treatment as an alternative to the criminal justice process except in the case of manifest insanity. However, those defendants who are found guilty but who are not sentenced on the grounds that they have been found criminally irresponsible are turned over to the National Board of Medicine. The Board considers the need for involuntary commitment in a mental hospital.

There are two alternatives to court proceedings. The first is the transfer to the municipal social welfare board. This option, though not often used, is limited to cases that involve offenders between the ages of 15 and 20. The second option is mediation, the use of which has gradually increased in Finland since the mid-1980s. The number of cases disposed of in mediation number approximately 5,000 per year. Mediation is primarily, but not solely, used in the case of juvenile offenders.

The Finnish prosecutorial system has traditionally been very legalistic, with tight restraints on the use of discretion. These restraints were eased in 1990, when the public prosecutor was given the right to waive charges in three cases: (a) when the offense was petty and the expected punishment would be at most a fine or, in the case of offenders below the age of 18, six months' imprisonment, as long as the offense was not deemed to have been due to a blatant disregard of the law; (b) the suspect was already to be charged with other, similar offenses, and the combined punishment would not be essentially affected by the new charges in question; and (c) the waiving of charges is merited on other grounds of equity.

* Proportion of prosecuted cases going to trial. Most cases are dealt with through summary penal fines. Of the 393,586 persons convicted during 1990, only 81,697 (21%) went to full trial.

* Pre-trial incarceration conditions. Although no statistics are available on the proportion of persons held in pre-trial custody who are later sentenced to imprisonment, this proportion is undoubtedly quite high, and probably in excess of 80%.

* Bail procedure. Bail is not available in Finland. However, it should be noted that the Coercive Means of Investigation Act places tight restrictions on the use and length of custody.

* Proportion of pre-trial offenders incarcerated. At the end of 1991, 264 prisoners were awaiting trial. This low figure does not include person in police custody; estimates are unavailable. In general, only persons charged with serious offences are placed in pretrial custody; most suspects are released on their

own recognizance, or are not even arrested.

JUDICIAL SYSTEM

1. Administration. The general court system has three tiers: the Supreme Court, six Courts of Appeal, and 95 lower courts. Lower court cases can be appealed in part or in full by the prosecutor, the defendant or the victim in the Court of Appeal. Cases dealt with by the Court of Appeal can be brought to the Supreme Court only if the Supreme Court grants leave of appeal.

Until the end of 1993, the lower courts were divided into city courts and rural courts. At the end of 1993, the lower courts were unified, with, in most cases, one professional judge and three lay judges participating in the consideration of each case. When required by the complexity of the case or other factors, the composition of the court can be augmented by an additional professional judge. Cases involving defendants charged with offenses punishable by at most eighteen months imprisonment can be decided by a single judge.

2. Special courts.

* Military courts. The only special criminal court existing in the Finnish system is the military court. Certain lower courts are designated as potential military courts. When deciding a case involving a military offense, the composition of the court will be augmented by one professional judge trained in military criminal law. The charges are brought by a military prosecutor. In all other respects, the procedure followed is the same as in the general courts.

3. Judges.

* Number of judges. At the end of 1990, Finland had 661 professional judges.

* Appointment, training, and qualifications. Lower court judges are appointed by the Supreme Court. Court of Appeal and Supreme Court judges are appointed by the President of the Republic. The basic qualifications are a legal education followed by a minimum of one years' practice as a court clerk and some practice as an apprentice judge.

PENALTIES AND SENTENCING

1. Sentencing process. The sentence is imposed by the court at the end of the trial. No separate sentencing hearings are held. If the defendant is a juvenile and the threatened punishment is imprisonment, a social history report is prepared by the local social welfare board or the Probation and Parole Association.

2. Types of penalties

* Range of penalties. The sanctions that can be imposed by the court include day-fines, community

service, suspended imprisonment, and imprisonment. Day-fines are imposed in between 1 and 120 units, at roughly one-third the gross daily income of the offender. Sentences of imprisonment for up to two years can be suspended; this suspension rarely involves supervision. The general minimum sentence of imprisonment is 14 days, and the general maximum is 12 years. Murder is punishable by life imprisonment.

Of the some 400,000 persons brought to court each year, over 310,000 are sentenced to a fine through summary proceedings, and over 50,000 are sentenced to a fine following full criminal proceedings. Some 17,000 are sentenced to suspended imprisonment, and some 12,000 are sentenced to imprisonment.

In 1991, the median sentence of imprisonment was 3.6 months. Those leaving prison have served a median term of 5.5 months; The discrepancy is due to the additive policy used to sentence recidivists. The sentences of imprisonment are typically imposed for aggravated drunken driving (over 40% of all sentences of imprisonment imposed during a year) and for aggravated theft, theft, and motor vehicle theft (some 30%).

In 1990, only 356 persons were sentenced to imprisonment for 2 years or more; the offenses in question were typically homicide, attempted homicide, aggravated assault, robbery and aggravated theft. The sentence is affected not only by the definition of the offense but also by any aggravating and mitigating factors noted in the general part of the Criminal Code. Among the aggravating factors are the commission of the crime as a member of an organized group, commission of several separate offenses, and a criminal record if it can be shown that the record demonstrates blatant disregard for the law. Among the mitigating factors are sudden pressures on the offender to commit the offense, the youth of the offender, and the attempt of the offender to assist in clearing the offense or limiting the harm caused by the offense.

* Death penalty. Finland has totally abolished the use of capital punishment which was last used in peace time in 1826.

PRISON

1. Description.

* Number of prisons and type. Finland has a network of 15 closed prisons, 21 open prisons or sections of prisons, a juvenile prison, a prison mental hospital, a prison hospital and two social rehabilitation institutes. All prisons are administered by the National Prison Administration, which is subordinate to the Ministry of Justice.

* Number of prison beds. The prisons contain a total of 4,210 beds.

* Number of annual admissions. During 1991, a total of 8,874 persons entered prison.

* Average daily population/Number of prisoners. The daily average population in prison in Finland has been decreasing since the late 1950s. At the end of 1991, the prisons held 3,067 male prisoners and 108

female prisoners over the age of 20. The also held 21 persons who were 20 years of age or younger.

* Actual or estimated proportions of inmates incarcerated for:

Proportion of inmates incarcerated for:

| | |
|-------------------|------|
| Drug offenses | 3% |
| Violent offenses | 24% |
| Property offenses | 36% |
| Drunken driving | 18% |
| Oother offenses | 19% |
| Total | 100% |

2. Administration.

* Number of prison guards. The total prison staff is 2,608 persons (1990 data), of whom 308 are classified as managerial, 1,624 as custodial, 257 as treatment and 419 as "other".

* Training and qualifications. The training is provided by the Prison Training Service. The basic course lasts 13 months, and includes three months of on-the-job training.

* Expenditure on prison system. During the 1990 calendar year, the budget of the prison administration department was 533 million Finnmarks.

3. Prison conditions.

* Remissions. Prisoners who have served a sentence of at least one month are normally granted automatic parole after having served two-thirds of their sentence. First-time prisoners are released on parole after having served one-half of their sentence. Persons on parole are subject to supervision.

* Work/education. Prisoners are required to work, although they may be allowed to study instead.

* Amenities/privileges. By law, the essence of imprisonment is solely the deprivation of liberty. In all other respects, life in prison should be arranged in such a way that it resembles life in free society as much as possible. Prison furloughs (leave) are granted relatively liberally.

EXTRADITION AND TREATIES

* Extradition. Finland has entered into a number of bilateral and multilateral agreements on extradition

and other mutual assistance. The oldest agreements are among the Nordic countries; for example, the 1960 Nordic Agreement on the extradition of offenders and the 1963 Nordic Agreement on the enforcement of sentences were adopted through the enactment of parallel legislation in all the Nordic countries. Finland has also had agreements on legal assistance with the former USSR (1978), Poland (1980) and Hungary (1981) as well as a separate agreement on "skyjacking" with the former USSR (1975). In 1990, Finland became a member of the Council of Europe, and has signed, among others, the European Convention for the Protection of Human Rights and Fundamental Freedoms (1990), the European Convention on Extradition (1971) and the European Convention on Mutual Assistance in Criminal Matters (1981).

Finland refuses to extradite a Finnish national or a person suspected of a military or a political offense, unless such an offense involves homicide or attempted homicide with intent. Finnish law will not allow extradition if there is the danger that the accused will be persecuted on the basis of racial, national, religious, or political grounds, or of allegiance, or political circumstance.

[Top](#)

GENERAL BACKGROUND

The Finnish Penal Code was enacted in 1889. It has undergone extensive revision. The Finnish Code was decisively influenced by the Penal Code of Sweden, of which Finland was part until 1809.

Crimes are usually investigated by the police. Certain offences are investigated by customs and tax authorities. The Ministry of the Interior supervises the police. The results of police investigations are turned over to the prosecutor, who in the cities is a fulltime prosecutor. In the rural areas the prosecution is handled by the district police chief. As prosecutors, all of these officials are under the supervision of the Chancellor of Justice.

Simplified procedures are used in the case of petty crime. Minor traffic offences are dealt with by a "petty fine" set by the police according to a fixed tariff. Petty fines cannot be converted to imprisonment. "Penal orders" can be used for all offences with a maximum punishment of six months of imprisonment or less, provided that the prosecutor only calls for a fine. The penal order sets out the punishment in dayfines. Finland adopted the dayfine system in 1921, as the first Nordic country to do so. The penal order is issued by the police and approved by the court. Most offenders pay the fine immediately but the offender has the option of challenging the penal order in court. Defaulters may be sentenced to prison.

The Finnish system is a very legalistic one with the exercise of discretion being closely circumscribed. The system is based on mandatory prosecution, where the prosecutor is allowed to waive prosecution only on certain conditions stipulated in law. If the offence is a so-called complainant offence, the consent of the complainant is a prerequisite for prosecution. The complainant may in all cases personally institute court proceedings, regardless of the decision of the prosecutor. The minimum age of criminal responsibility is 15 years. Offenders below this age are dealt with solely by the social authorities. If the

offender was under 18 at the time of the offence a more lenient set of penalties is available.

Selected offences

Intentional homicide. The number of homicides has increased in the time period 1981 to 1986. In 1986, 334 cases were recorded; most of these (191) were attempts. The clearance rate was 94 %. In 1986, 61 people were sentenced for a completed offence of intentional homicide and 71 for attempted homicide.

Assault. The assault trend shows a marked rise at the beginning of the time period covered by the survey but has become more stable towards its end. Victimization surveys indicate that the real risk of falling victim to an assault has remained constant over the period. Of the 16 707 offences recorded in 1986, 1 820 were classified as aggravated assault and 12 010 as petty assault. The clearance rate was 77 %. The rate per 100 000 population was 339. 9 113 offenders were convicted of assault in 1986.

Robbery. The robbery trend was downward from 1981 to 1986. 1 584 robberies were recorded in 1986. Robberies are usually committed by young people and are concentrated in the cities. The clearance rate was 55 %. 524 people were convicted of robbery in 1986.

Theft. Theft offences seem to increase in the long run, although with marked annual fluctuations. In 1986 the total number of theft offences (excluding car theft) increased by 3 % to 128 090. This corresponds to a rate of 2 600 per 100 000 population. The clearance rate was 39 %. 24 % of the theft offences were shoplifting or other such petty offences. In 1986 25 821 people were convicted for theft offences.

Clearance rate. The clearance rate in Finland is rather high compared with other Nordic countries. The difference, which is discernible in all major crime categories, cannot be explained by different practices in counting crimes or computing the clearance rate. The powers of the police to hold suspects in custody for a considerable length of time (before the law reform which came into force in 1989) and the "rural elements" of the offence and offender structure have been offered as explanations of the high clearance rate.

STATISTICS --BACKGROUND

CRIMINAL JUSTICE STATISTICS (1970-1980) Background

A. The statistics on reported offenders refer to the number of accused before courts of first instance. Unfortunately, police statistics do not give age or sex breakdowns, as these statistics are based on offences and not offenders, reported to the police. Also, no statistics are available on the sex breakdown of 15 - 20 year olds before the courts. It should be kept in mind that, as the offender data below are based on court statistics, many of the cases deal with offences perpetrated the previous year or even earlier.

B. A rough rule of thumb in estimating the number of "offenders reported" to the police from the number of persons accused before courts of first instance would be that 2/3 of the reported offences lead to a formal accusation before a court. The remainder consist of e.g. a) cases not cleared by the police; b) cases where it is ascertained that no offence has been committed; c) cases where the perpetrator cannot be held criminally liable (e.g. he is a small child); d) the victim withdraws his complaint; and so on.

C. "Fraud and other types of white-collar crime" includes fraud and embezzlement. "White-collar crime" does not exist as a separate category in the statistics.

D. "kidnapping" in the popular sense of the word does not exist as a separate criminalized act. Should it occur, it would probably be dealt with by the courts as a combination of illegal restraint of freedom of movement (penal law chapter 25) and extortion (penal law chapter 31, paragraph 4).

E. "Drunkenness" is no longer criminalized in Finland.

Sanctions - Background

In 1986 353 930 people were prosecuted and 346 331 (including 268 300 people on whom penal orders had been imposed) were sentenced in courts of first instance. These figures include minor traffic violators and those convicted of other petty offences which in Finland are included in the concept of "crime". 11 467 people were sentenced to unconditional prison in 1986, 15 601 received a suspended sentence and 319 074 were fined. On 1 October 1986 the prison population, which has steadily declined since 1975, was 3 998. The average time served for adult prisoners released in 1986 was 2,2 months. There were 25 prisoners serving a life sentence. 540 or 13,5 % of the total prison population were awaiting trial.

In 1986 Finland had 34 prisons including labour colonies and other open institutions. 12 prisons had less than 100 inmates and none had over 400 inmates.

Criminal Justice Personnel and resources - background

Finland reports the following personnel engaged in crime control duties in 1986:

11 589 police officers, of whom 2 562 were female (this figure does not contain the 3 580 semi-military frontier guards); 380 prosecutors, of whom 19 were female; 718 full-time judges dealing with criminal cases and 45 part-time judges dealing with criminal cases (of these, 17 were full-time and 14 part-time lay persons); and 2 337 prison staff, of whom 1 399 were custodial and 198 treatment.

The resources allocated to the various criminal justice agencies in 1986 were as follows:

police 1 511 000 000 FIM (392,7 million USD)
prosecution 18 000 000 FIM (4,7 million USD)

courts 557 000 000 FIM (144,8 million USD)
prisons 536 400 000 FIM (139,4 million USD)
non-instit.services 32 500 000 FIM (8,4 million USD)

The figures refer to the total expenditure of the service in question, including expenditure not related to crime. The crime-related expenditure on the police is estimated to be 375 937 000 marks (97,7 million USD).

SPECIAL ISSUES

Alcohol and drugs. The per capita consumption of alcohol is not particularly high in Finland but drinking habits favour intemperate drinking, which may lead to violence. Most serious crimes of violence are committed under the influence of alcohol. Drug use, on the other hand, is limited. Both crime statistics and anonymous surveys indicate that there are few drug users in Finland compared with other Nordic countries.

Criminal justice. The many reforms designed to reduce the high number of prisoners have begun to have an effect: prison use has been steadily declining since 1975. The total revision of penal legislation, which has been under way since 1972 and which will result in new legislation to be enacted during the early 1990s, can be expected to bring about additional reductions.

GEOGRAPHY

Location: Northern Europe, bordering the Baltic Sea, Gulf of Bothnia, and Gulf of Finland, between Sweden and Russia

Geographic coordinates: 64 00 N, 26 00 E

Map references: Europe

Area:

total: 337,030 sq km

land: 305,470 sq km

water: 31,560 sq km

Area-comparative: slightly smaller than Montana

Land boundaries:

total: 2,628 km

border countries: Norway 729 km, Sweden 586 km, Russia 1,313 km

Coastline: 1,126 km (excludes islands and coastal indentations)

Maritime claims:

contiguous zone: 6 nm

continental shelf: 200-m depth or to the depth of exploitation

exclusive fishing zone: 12 nm

territorial sea: 12 nm (in the Gulf of Finland-3 nm)

Climate: cold temperate; potentially subarctic, but comparatively mild because of moderating influence of the North Atlantic Current, Baltic Sea, and more than 60,000 lakes

Terrain: mostly low, flat to rolling plains interspersed with lakes and low hills

Elevation extremes:

lowest point: Baltic Sea 0 m

highest point: Haltiatunturi 1,328 m

Natural resources: timber, copper, zinc, iron ore, silver

Land use:

arable land: 8%

permanent crops: NA%

permanent pastures: 0%

forests and woodland: 76%

other: 16% (1993 est.)

Irrigated land: 640 sq km (1993 est.)

Natural hazards: NA

Environment-current issues: air pollution from manufacturing and power plants contributing to acid rain; water pollution from industrial wastes, agricultural chemicals; habitat loss threatens wildlife populations

Environment-international agreements:

party to: Air Pollution, Air Pollution-Nitrogen Oxides, Air Pollution-Sulphur 85, Air Pollution-Volatile Organic Compounds, Antarctic-Environmental Protocol,

Antarctic Treaty, Biodiversity, Climate Change, Desertification, Endangered Species, Environmental Modification, Hazardous Wastes, Law of the Sea, Marine

Dumping, Marine Life Conservation, Nuclear Test Ban, Ozone Layer Protection, Ship Pollution, Tropical Timber 83, Tropical Timber 94, Wetlands, Whaling
signed, but not ratified: Air Pollution-Sulphur 94

Geography-note: long boundary with Russia; Helsinki is northernmost national capital on European continent; population concentrated on small southwestern coastal plain

PEOPLE

Population: 5,149,242 (July 1998 est.)

Age structure:

0-14 years: 19% (male 488,974; female 469,343)

15-64 years: 67% (male 1,736,883; female 1,700,466)

65 years and over: 14% (male 284,929; female 468,647) (July 1998 est.)

Population growth rate: 0.2% (1998 est.)

Birth rate: 11.24 births/1,000 population (1998 est.)

Death rate: 9.65 deaths/1,000 population (1998 est.)

Net migration rate: 0.45 migrant(s)/1,000 population (1998 est.)

Sex ratio:

at birth: 1.04 male(s)/female

under 15 years: 1.04 male(s)/female

15-64 years: 1.02 male(s)/female

65 years and over: 0.61 male(s)/female (1998 est.)

Infant mortality rate: 3.82 deaths/1,000 live births (1998 est.)

Life expectancy at birth:

total population: 77.15 years

male: 73.61 years

female: 80.83 years (1998 est.)

Total fertility rate: 1.73 children born/woman (1998 est.)

Nationality:

noun: Finn(s)

adjective: Finnish

Ethnic groups: Finn 93%, Swede 6%, Lapp 0.11%, Gypsy 0.12%, Tatar 0.02%

Religions: Evangelical Lutheran 89%, Greek Orthodox 1%, none 9%, other 1%

Languages: Finnish 93.5% (official), Swedish 6.3% (official), small Lapp- and Russian-speaking minorities

Literacy:

definition: age 15 and over can read and write

total population: 100% (1980 est.)

male: NA%

female: NA%

GOVERNMENT

Country name:

conventional long form: Republic of Finland

conventional short form: Finland

local long form: Suomen Tasavalta

local short form: Suomi

Data code: FI

Government type: republic

National capital: Helsinki

Administrative divisions: 6 provinces (laanit, singular-laani); Aland, Etela-Suomen Laani, Ita-Suomen Lanni, Lansi-Suomen Laani, Lappi, Oulun Laani

Independence: 6 December 1917 (from Russia)

National holiday: Independence Day, 6 December (1917)

Constitution: 17 July 1919

Legal system: civil law system based on Swedish law; Supreme Court may request legislation interpreting or modifying laws; accepts compulsory ICJ

jurisdiction, with reservations

Suffrage: 18 years of age; universal

Executive branch:

chief of state: President Martti AHTISAARI (since 1 March 1994)

head of government: Prime Minister Paavo LIPPONEN (since 13 April 1995) and Deputy Prime Minister Sauli NIINISTO (since 13 April 1995)

cabinet: Council of State or Valtioneuvosto appointed by the president, responsible to Parliament

elections: president elected by popular vote for a six-year term; election last held 31 January-6 February 1994 (next to be held NA January 2000); prime minister

and deputy prime minister appointed by the president

election results: Martti AHTISAARI elected president; percent of vote-Martti AHTISAARI 54%, Elisabeth REHN 46%

Legislative branch: unicameral Parliament or Eduskunta (200 seats; members are elected by popular vote on a proportional basis to serve four-year terms)

elections: last held 19 March 1995 (next to be held NA March 1999)

election results: percent of vote by party-Social Democratic Party 28.3%, Center Party 19.9%, National Coalition (Conservative) Party 17.9%, Leftist Alliance

(Communist) 11.2%, Swedish People's Party 5.1%, Green League 6.5%, Ecology Party 0.3%, Rural 1.3%, Finnish Christian League 3.0%, Liberal People's Party

0.6%, Young Finns 2.8%; seats by party-Social Democratic Party 63, Center Party 44, National Coalition (Conservative) Party 39, Leftist Alliance (Communist)

22, Swedish People's Party 11, Green League 9, Ecology Party 1, Rural 1, Finnish Christian League 7, Young Finns 2, Aaland Islands 1

Judicial branch: Supreme Court or Korkein Oikeus, judges appointed by the president

Political parties and leaders:

government coalition: Social Democratic Party [Paavo LIPPONEN]; National Coalition (conservative) Party [Sauli NIINISTO]; Leftist Alliance (Communist)

composed of People's Democratic League and Democratic Alternative [Claes ANDERSSON]; Swedish People's Party [(Johan) Ole NORRBACK]; Green League [Pekka HAAVISTO]

other: Center Party [Esko AHO]; Finnish Christian League [C. P. Bjarne KALLIS]; Rural Party [Raimo VISTBACKA]; Liberal People's Party [Pekka RYTILA];

Greens Ecological Party or EPV [Eugen PARKATTI]; Young Finns [Risto PENTTILA]

Political pressure groups and leaders: Finnish Communist Party-Unity [Yrjo HAKANEN];

Constitutional Rightist Party; Finnish Pensioners Party; Communist

Workers Party [Timo LAHDENMAKI]

International organization participation: AfDB, AG (observer), AsDB, Australia Group, BIS, CBSS, CCC, CE, CERN, EAPC, EBRD, ECE, EIB, ESA, EU, FAO, G- 9, IADB, IAEA, IBRD, ICAO, ICC, ICFTU, ICRM, IDA, IEA, IFAD, IFC, IFRCs, IHO, ILO, IMF, IMO, Inmarsat, Intelsat, Interpol, IOC, IOM, ISO, ITU, MTCR, NAM (guest), NC, NEA, NIB, NSG, OAS (observer), OECD, OSCE, PCA, PFP, UN, UNCTAD, UNESCO, UNFICYP, UNHCR, UNIDO, UNIFIL, UNIKOM, UNMIBH, UNMOGIP, UNMOP, UNPREDEP, UNTSO, UPU, WEU (observer), WFTU, WHO, WIPO, WMO, WToO, WTrO, ZC

Diplomatic representation in the US:

chief of mission: Ambassador Jaakko Tapani LAAJAVA
 chancery: 3301 Massachusetts Avenue NW, Washington, DC 20008
 telephone: [1] (202) 298-5800
 FAX: [1] (202) 298-6030

Diplomatic representation from the US:

chief of mission: Ambassador Derek N. SHEARER
 embassy: Itainen Puistotie 14A, FIN-00140, Helsinki
 mailing address: APO AE 09723
 telephone: [358] (9) 171931
 FAX: [358] (9) 174681

Flag description: white with a blue cross that extends to the edges of the flag; the vertical part of the cross is shifted to the hoist side in the style of the Dannebrog

ECONOMY

Economy-overview: Finland has a highly industrialized, largely free-market economy, with per capita output roughly that of the UK, France, Germany, and Italy.

Its key economic sector is manufacturing-principally the wood, metals, and engineering industries.

Trade is important, with the export of goods representing about 30% of GDP. Except for timber and several minerals, Finland depends on imports of raw materials, energy, and some components for manufactured goods.

Because of the climate, agricultural development is limited to maintaining self-sufficiency in basic products. Forestry, an important export earner, provides a secondary occupation for the rural population. The economy has come back from the recession of 1990-92, which had been caused by economic overheating, depressed foreign markets, and the dismantling of the barter system between Finland and the former Soviet Union under which Soviet oil and gas had been exchanged for Finnish manufactured goods. The Finns voted in an October 1994 referendum to enter the EU, and Finland officially joined the Union on 1 January

1995. Attempts to cut the unacceptably high rate of unemployment and increasing integration with Western Europe will dominate the economic picture over the next few years. Despite high unemployment and moderate GDP growth of 3.9% anticipated for 1998, inflation is forecast to rise to 2.5%

GDP: purchasing power parity-\$102.1 billion (1997 est.)

GDP-real growth rate: 4.6% (1997 est.)

GDP-per capita: purchasing power parity-\$20,000 (1997 est.)

GDP-composition by sector:

agriculture: 7%

industry: 37%

services: 56% (1995)

Inflation rate-consumer price index: 1.2% (1997 est.)

Labor force:

total: 2.533 million

by occupation: public services 30.4%, industry 20.9%, commerce 15.0%, finance, insurance, and business services 10.2%, agriculture and forestry 8.6%, transport and communications 7.7%, construction 7.2%

Unemployment rate: 14.6% (1997 est.)

Budget:

revenues: \$33 billion

expenditures: \$40 billion, including capital expenditures of \$NA (1996 est.)

Industries: metal products, shipbuilding, pulp and paper, copper refining, foodstuffs, chemicals, textiles, clothing

Industrial production growth rate: 7.4% (1995)

Electricity-capacity: 14.143 million kW (1995)

Electricity-production: 58.626 billion kWh (1995)

Electricity-consumption per capita: 13,181 kWh (1995)

Agriculture-products: cereals, sugar beets, potatoes; dairy cattle; annual fish catch about 160,000 metric tons

Exports:
total value: \$38.4 billion (f.o.b., 1996)
commodities: paper and pulp, machinery, chemicals, metals, timber
partners: EU 46.5% (Germany 13.4%, UK 10.4%), Sweden 10.1%, US 6.7%, Japan 2.6%, Russia 4.8% (1995)

Imports:
total value: \$29.3 billion (c.i.f., 1996)
commodities: foodstuffs, petroleum and petroleum products, chemicals, transport equipment, iron and steel, machinery, textile yarn and fabrics, fodder grains
partners: EU 44% (Germany 16.6%, UK 8.0%), Sweden 11.7%, US 7.1%, Russia 7.1%, Japan 6.3% (1995)

Debt-external: \$30 billion (December 1993)

Economic aid:
donor: ODA, \$355 million (1993)

Currency: 1 markka (FMk) or Finmark = 100 pennia

Exchange rates: markkaa (FMk) per US\$1-5.4948 (January 19987), 5.1914 (1997), 4.5936 (1996), 4.3667 (1995), 5.2235 (1994), 5.7123 (1993)

Fiscal year: calendar year

COMMUNICATIONS

Telephones: 2.5 million (1995 est.)

Telephone system: good service from cable and microwave radio relay network
domestic: cable and microwave radio relay
international: 1 submarine cable; satellite earth stations-access to Intelsat transmission service via a Swedish satellite earth station, 1 Inmarsat (Atlantic and Indian Ocean regions); note-Finland shares the Inmarsat earth station with the other Nordic countries (Denmark, Iceland, Norway, and Sweden)

Radio broadcast stations: AM 6, FM 105, shortwave 0

Radios: 4.98 million (1991 est.)

Television broadcast stations: 235

Televisions: 1.92 million (1995 est.)

TRANSPORTATION

Railways:

total: 5,859 km

broad gauge: 5,859 km 1.524-m gauge (2,073 km electrified; 480 km double- or more-track) (1996)

Highways:

total: 77,782 km

paved: 49,780 km (including 431 km of expressways)

unpaved: 28,002 km (1996 est.)

Waterways: 6,675 km total (including Saimaa Canal); 3,700 km suitable for steamers

Pipelines: natural gas 580 km

Ports and harbors: Hamina, Helsinki, Kokkola, Kotka, Loviisa, Oulu, Pori, Rauma, Turku, Uusikaupunki, Varkaus

Merchant marine:

total: 93 ships (1,000 GRT or over) totaling 1,069,794 GRT/1,127,087 DWT

ships by type: bulk 8, cargo 22, chemical tanker 5, oil tanker 11, passenger 1, railcar carrier 1, roll-on/roll-off cargo 34, short-sea passenger 11 (1997 est.)

Airports: 158 (1997 est.)

Airports-with paved runways:

total: 69

over 3,047 m: 3

2,438 to 3,047 m: 23

1,524 to 2,437 m: 13

914 to 1,523 m: 21

under 914 m: 9 (1997 est.)

Airports-with unpaved runways:

total: 89

914 to 1,523 m: 5

under 914 m: 84 (1997 est.)

MILITARY

Military branches: Army, Navy, Air Force, Frontier Guard (includes Sea Guard)

Military manpower-military age: 17 years of age

Military manpower-availability: males age 15-49: 1,286,563 (1998 est.)

Military manpower-fit for military service: males: 1,059,657 (1998 est.)

Military manpower-reaching military age annually: males: 33,492 (1998 est.)

Military expenditures-dollar figure: \$1.9 billion (1995)

Military expenditures-percent of GDP: 1.6% (1995)

TRANSNATIONAL ISSUES

Disputes-international: none

Illicit drugs: minor transshipment point for Latin American cocaine for the West European market

GENERAL OVERVIEW

1. Political system.

Norway is a unified state in which governmental power is divided between the judiciary, executive and legislative branches, each of which are mutually independent. The executive branch is made up of the King and members of the Cabinet.

Legislative power is vested in the national parliament (Stortinget), which is composed of 157 members who are democratically elected on a geographical basis. Although the parliament is unicameral, it divides into two chambers (the Lagting and Odelsting) for the purpose of passing legislation. Both chambers must approve a bill before it can be passed. The bill must also be approved by the King sitting in council with the Cabinet, although this is a mere formality. In theory, the judiciary can exercise some influence upon the legislative process since it has an unwritten power to set aside any legislation it finds to be unconstitutional. However, this power is rarely exercised. (Administration of Justice in Norway, 1980: 88).

For administrative and political purposes, the country is divided into 19 counties (fylker) and approximately 450 municipalities (kommuner). While the various counties and municipalities are responsible for running a large number of vital welfare services, responsibility for organizing and financing the criminal justice system lies primarily with central government agencies, most notably the Ministry of Justice and Police.

2. Legal system.

It is difficult to classify the Norwegian legal system solely by reference to the various ideal categories of legal systems which are commonly cited. This is because the Norwegian legal system has largely been set up on a national level. The Norwegian system is most similar to the legal systems of the other Nordic countries, particularly those of Denmark and Sweden.

Norway does not have a general codification of private or public law corresponding to the Code Civil or B?rgerliches Gesetzbuch in civil law countries. It instead has comprehensive statutes codifying, among other things, central aspects of the criminal law and the administration of justice.

Norwegian courts do not attach the same weight to judicial precedents as members of the judiciary in common law countries traditionally have done. Neither are Norwegian courts bound by intricate rules concerning the admissibility of evidence; the basic rule is that all evidence is admissible. Court procedure is relatively informal and simple, and there is a strong lay influence in the judicial assessment of criminal matters and, to a lesser extent, civil matters. This lay influence is created through the use of both a jury system and a system whereby lay judges (without formal legal qualifications) sit with professional judges in the hearing of cases.

3. History of the criminal justice system.

The roots of the Norwegian legal system can be traced back more than 1,000 years to the institution of the Allting. This was a public gathering of yeomen, who convened to settle disputes and make laws for the local district. These types of meetings were in existence well before the country was united as one kingdom under King Harald Haarfagre in the late 9th century. During the 10th century, there arose the institution of the Lagting, which was a more formal and less localized body exercising legislative, judicial, and executive powers in relation to a particular area. These bodies were composed of appointed representatives of local communities, officials of the King, and members of the clergy.

In the late 13th century, under the direction of King Magnus Lagabote (Magnus the Lawmender), the regional laws created by the Lagting were gathered together and codified under one national law called the Landslov. The second major codification of Norwegian law took place in 1687, during the period

when Norway was in union with, and ruled by, Denmark. This codification was initiated by the Danish King, Christian V. Upon dissolution of the union with Denmark at the end of the Napoleonic Wars, Norway adopted a Constitution on May 17, 1814. Amongst other things, the Constitution provided for the establishment of a parliamentary democracy and a constitutional monarchy.

Of particular relevance for the administration of criminal justice are Articles 20, 96, 99, and 102 of the Constitution. Article 20 empowers the King to pardon criminals, while Article 96 bans interrogation by torture and holds that no one may be convicted "except according to law", or be punished "except after a court judgement". Article 99 states that no one "may be taken into custody except in the cases determined by law and in the manner prescribed by law", and Article 102 bans the searching of private homes "except in criminal cases." Another relevant constitutional provision is Article 94, which provides for the publication of "a new general civil and criminal code."

The first comprehensive penal code was enacted in 1842. This was replaced by the General Civil Penal Code of May 22, 1902. While this Code is still in force, it is important to note that a Criminal Law Commission was appointed in 1980 to draft a new code. So far, work by the Commission has resulted in several amendments to the existing Code, plus a draft set of general provisions for the proposed new code. The draft set of new general provisions have not yet been sent out for a general hearing. (Almindelig borgerlig Straffelov 22. mai 1902 nr. 10; Ny straffelov - alminnelig bestemmelser, 1992; Oie, 1993).

Special rules on judicial procedure for criminal cases were first codified in statute form in 1887. This statute was replaced by the Act on Rules of Judicial Procedure in Penal Cases, which entered into force on January 1, 1986. Several important changes to this Act have been proposed recently. The bulk of these amendments were approved by Parliament on June 11, 1993 and entered into force in 1994. They were not expected to enter into force until 1994. (Lov om rettergangsmåten i straffesaker 22. mai 1981 nr. 25, the "Criminal Procedure Act"; To-instansbehandling, anke og juryordning i straffesaker, 1992; Oie, 1993).

The Penal Code and Criminal Procedure Act are the two main laws governing the civil administration of criminal justice in Norway. The military administration of criminal justice is governed by two corresponding laws: the Military Penal Code of 1902 (Militær Straffelov 22. mai 1902 nr. 13) and Military Criminal Procedures Act of 1900 (Lov om Rettergangsmaaden i militære Straffesager 29. mars 1900 nr. 2).

CRIME

1. Classification of Crime.

*Legal classification. The Penal Code groups criminal offenses into felonies (forbrytelser) and misdemeanors (forseelser). The Criminal Law Commission, set up to draft a new Penal Code, has proposed the distinction between felonies and misdemeanors be eventually dropped from criminal law. (It is important to note that, unless otherwise specified, all legal references in this report are to laws as they existed on September 1, 1993. [Ny straffelov - alminnelige bestemmelser, 1992: 21]).

Felonies are, with some exceptions, offenses with a maximum penalty exceeding 3 months' imprisonment. The majority of felonies are defined and listed in Part 2 of the Penal Code, such as perjury, arson, racial discrimination, rape, defaulting on obligation to support dependents, slander and

libel, larceny, embezzlement, damaging information and communication systems, murder, blackmail and robbery, fraud and breach of trust. (Penal Code Sect. 2, 163- 165, 167, 148, 135a, 192, 219, 246-248, 257-260, 255-256, 151b, 233, 266-269, 270-278).

Misdemeanors are generally minor offenses carrying a maximum penalty of 3 months' imprisonment. Examples of these types of offenses are found in Part 3 of the Penal Code. All breaches of the Road Traffic Act are defined as misdemeanors irrespective of whether or not they carry a maximum penalty of more than 3 months' imprisonment. (Vegtrafikklov 18. juni 1965 nr. 4; Penal Code, Sect. 31).

*Age of criminal responsibility. The minimum age at which one can be held criminally liable is 15. (Penal Code, Sect.46; Proposed new Penal Code, Sect. 37).

*Drug offenses. Drug offenses are set out in Sections 162 and 162a of the Penal Code and Section 22 and 43 of the Medicinal Goods Act. The drugs covered by these laws are listed in the Narcotics Regulations issued by the Ministry of Social Affairs (Forskrift om narkotika m.v. 30. juni 1978 nr. 8). There are some 250 substances listed; salts and derivatives of the listed substances are also categorized as narcotics.

An ordinary drug offense pursuant to the Penal Code involves the illegal manufacture, introduction, acquisition, storage (as opposed to possession/ besittelse), or transfer of narcotics, and is punished by a fine or imprisonment of up to 2 years. Imprisonment for a serious drug offense (grov narkotikaforbrytelse) can be imposed for a maximum of 10 years. (Lov om legemidler m.v. 20. juni 1964 nr. 5; Penal Code, Sect. 162).

Whether or not a drug offense is judged as serious (grov) depends on the type of drug involved, its quantity and the nature of the offense. If the quantity is "very significant", imprisonment will be imposed for a period of 3 to 15 years. In "particularly aggravating circumstances" (soerdeles skjerpene omstendigheter), an offender can be imprisoned for up to 21 years. (Andenaes and Bratholm, 1991: 289-291; Penal Code, Sect. 162).

A similar hierarchy of sanctions is provided for those who receive or make a profit from a drug offense or who assist other persons in receiving or making such a profit. A drug offense under the Medicinal Goods Act is defined as the illegal possession or use of narcotics, and the purchasing of narcotics under false pretenses. (Penal Code, Sect. 22, 43, 162a).

Note that, prima facie, the laws make no distinction between different kinds of narcotics; marihuana is treated the same as heroin or cocaine. The use of drugs in sport is not encompassed by the above laws. (Andenaes and Bratholm, 1991: 288-289).

2. Crime statistics.

The following crime statistics cover offenses reported to the police in 1991. The statistics are based on information entered into the country's central crime registration system, STRASAK, and on the results of questionnaires completed by police districts which in 1991 were not yet connected to STRASAK. Most of the statistics are taken from Kriminalstatistikk 1991/Criminal Statistics 1991, published in 1993 by the Central Bureau of Statistics. The definitions of the offenses upon which the statistics are based

are taken from provisions of the Penal Code. The total number of reported felonies for 1991 was 252,311. The total number of reported misdemeanors was 99,066. (Criminal Statistics 1991, 1993: 19).

*Murder. In 1991, there were 50 incidents of murder reported to police. (Criminal Statistics 1991, 1993: 19).

A person is guilty of murder (drap) if he or she intentionally "brings about" (forvolder) or "assists in bringing about" (medvirker) the death of another person. (Penal Code, Sect. 233).

*Rape. In 1991, 387 incidents of rape were reported to the police. (Criminal Statistics 1991, 1993: 19).

A person is guilty of rape (voldtekt) if he or she, either by using violence or making someone fear for their life or health, forces someone, or assists in forcing someone, to have "indecent intercourse." The concept of indecent intercourse (utuktig omgang) includes but is not limited to sexual intercourse involving penetration. (Andenaes and Bratholm, 1991: 103; Penal Code, Sect. 192).

*Larceny. In 1991, there were 177,071 incidents of larceny reported to police, accounting for 70.2% of all reported felonies. Of the total number of larcenies, 68,408 were cases of simple/ minor larceny (simpelt tyveri), 85,976 were cases of serious/aggravated larceny (grovt tyveri) and 22,697 were cases of motor-vehicle theft. Motor-vehicle theft is defined in a self-explanatory manner in Section 260 of the Penal Code. (Criminal Statistics 1991, 1993: 19).

A person is guilty of larceny if he or she takes, or assists in taking, an object which, in whole or in part, belongs to another person, with the intention of making an unjustified gain (vinning) for himself or herself or for others. Whether the larceny is simple/minor or serious/aggravated depends on a variety of factors, including the value of the stolen goods, whether or not the larceny took place on public premises, and whether or not it involved burglary, use of weapons, explosives or the like. (Penal Code, Sect. 257-258).

*Serious drug offense. In 1991, there were 13,063 drug-related crimes reported to police, accounting for 5.2% of all reported felonies. Of these, there were 6,780 ordinary drug offenses and 588 serious drug offenses in relation to the Penal Code, while 5,695 incidents constituted drug offenses in relation to the Medicinal Goods Act. The number of reported drug offenses has increased five-fold during the last decade, and twenty-fold since 1970. (Criminal Statistics 1991, 1993: 19; Kriminalitet og rettsvesen, 1992: 25).

*Crime regions. Crime statistics for Norway show that the rate of investigated felonies increases with the rate of population density. This would also appear to be the case with reported felonies. (Kriminalitet og rettsvesen, 1992: 27).

In 1991, Oslo county had the highest rate of investigated felonies, at 124 per 1,000 inhabitants. The counties of Vestfold, Aust-Agder, Buskerud, Vest-Agder and Ostfold had the next highest rates, with figures between 67 and 56 per 1,000 inhabitants. All of these counties have approximately 75% of their

inhabitants living in developed (tettbygde) areas. The counties with the lowest rates of investigated felonies, Sogn-Fjordane (15 felonies per 1,000 inhabitants) and More-Romsdal (18 felonies per 1,000 inhabitants) have only approximately 50% of their population living in developed areas. The average rate of investigated felonies for the country as a whole was 52 per 1,000 inhabitants.

VICTIMS

1. Groups most victimized by crime.

Information on victims of crime has been gathered as part of general surveys on living conditions in Norway (Levekårsundersøkelser). This information is presented in summary form by the Central Bureau of Statistics in its publication, *Kriminalitet og rettsvesen* (2nd ed, 1992) at pages 15-20. All of the data cited below are derived from this publication.

In surveys on living conditions carried out in 1983, 1987 and 1991, a representative sample of the Norwegian population between 16 and 79 years old were asked whether or not they had been subjected to some form of violence or threat of violence during the previous year. Of those asked in 1991, 5%, or approximately 170,000 persons, answered in the affirmative. (The survey figures for 1987 and 1983 were 5% and 4%, respectively.) Approximately a third of those persons answering yes had suffered manifest bodily injury as a result of the violence.

In 1991, approximately 11% of surveyed males between 16 and 24 years old had been subjected to violence or the threat of violence. The equivalent figures for females between 16 and 24 years old, for males over 45 years of age, and for females over 45 years of age were approximately 9%, 3% and 2%, respectively. The figure for those living in urban areas was approximately 7%; it was 2% for those living in rural areas.

Approximately half of those persons who had been subjected to violence or the threat of violence had been subjected to it several times during the year. Women, more than men, were subject to violence in their own home; men, more than women, were subject to violence while out in restaurants, bars, cafes, or other public places.

Murder victims are usually males. In 1990, for example, 35 of the 46 reported murder victims were men; 3 of the victims were under 15 years old. In the age groups of 15-20, 21-30 and 31-40, 8, 12 and 12 persons had become murder victims, respectively. In a third of the cases, the victim and offender were members of the same family or living together. In two-thirds of the cases, both were under the influence of drugs or alcohol. In almost half of the cases, the murder was the result of an argument. In 1991, 14% of the population, or approximately 480,000 persons, reported that they had possessions stolen or damaged during that year. Half of these cases concerned theft: 20%, both theft and damage; 30%, damage only. Of those persons living in large towns, 21% reported having had possessions stolen. The corresponding figure for those living in rural areas was 8%.

There are several weaknesses with these victim surveys. For example, they do not include persons under 16 years old or provide detailed information on the socio-economic status of crime victims. It is worth noting that in 1992, a special committee appointed by the Ministry of Justice and Police to investigate the legal position of crime victims criticized the paucity of detailed crime victim data in Norway. The committee recommended, among other things, that the system whereby statistics are collated on criminal offenses reported to and investigated by the police should be extended to include

essential data on the victims of those offenses. (Sterkere vern og økt støtte for kriminalitetsofre, 1992: 8, 13).

2. Victims' assistance agencies.

As of 1990, there were 46 crisis centers spread throughout Norway offering assistance to women and children who had been subject to rape or other physical or psychological abuse. There were also 41 crisis telephone services for women, along with several telephone services for men who have been the victims of incest. Children who are victims of incest are offered assistance by a support center in Oslo (Stottesenter mot incest), which has been operating since 1986. (Sterkere vern og økt støtte for kriminalitetsofre, 1992: 70).

A national association for victims of violence (Landsforening for voldsofre og motarbeiding av vold) was established in 1989, with the aim of assisting victims and campaigning for measures to reduce the extent of violence in Norwegian society. Very few programs are in place that specialize in providing support for elderly victims of violence. One such program has been initiated in the town of Skien and another in Manglerud, Oslo. (Sterkere vern og økt støtte for kriminalitetsofre, 1992: 70-71).

Most of the above programs are run on a private, voluntary basis. Some funding is provided by the State, such as for the crisis centers for women.

3. Role of victim in prosecution and sentencing.

In Norwegian law, the crime victim plays a peripheral role in the prosecution and sentencing process. It is the State which is accorded the responsibility of prosecuting and sentencing criminal offenders. The victim's role in this process is limited generally to providing, as a witness, evidence on the matter in question. It should be noted that there is presently no system whereby a "Victim Impact Statement" is made out and submitted to the court as a supplement to the pre-sentence report, although the introduction of such a system has recently been recommended. (Sterkere vern og økt støtte for kriminalitetsofre, 1992: 36).

In certain situations, the victim will have extended rights in the prosecution process, such as in cases where the victim institutes a private prosecution or becomes a party to the prosecution. The victim will then have a right, for instance, to examine witnesses. The victim will also have a right to be acquainted with case documents during the main court hearing. Generally, this right is not expressly accorded to victims, even though they do have a right to be acquainted with case documents during the pre-trial investigation. (Criminal Procedures Act, Sect. 242,404,402).

Since 1991, it has been possible for the prosecuting authority to decide that certain criminal matters may be settled out of court through negotiations between the offender and victim, with an extra-judicial body called the Conflict Board (konfliktretten) present as an arbitrator. Several conditions must be fulfilled before this can occur. The offense must not be so serious as to incur imprisonment, the offender must be proved guilty of the alleged offense, and both the offender and victim must consent to the matter being settled out of court in the way described. (Criminal Procedures Act, Sect. 71a).

4. Victims' rights legislation.

There is no victims' rights legislation as such. Rather, provisions giving victims certain rights have been incorporated into more general laws, such as the Criminal Procedures Act (CPA), the Injury

Compensation Act (Lov om skadeserstatning 13. juni 1969 nr. 26) and the Legal Aid Act (Lov om fri rettshjelp 13. juni 1980 nr. 35).

An example of such a provision is Section 456 of the Criminal Procedures Act, which states that a compensation claim ordered to be paid to a victim takes priority over a claim by the State that the offender pay a fine. In addition, Section 107a provides that in cases involving a contravention of Sections 192 to 196 of the Penal Code (sexual offenses), the victim is entitled to the assistance of a lawyer, who is paid by the State. The lawyer is permitted to be present during the main hearing of the case, is given limited rights to assist the victim when he or she is questioned in court, and must be given access to the case documents. In most other cases, it is the victim who must bear the costs of engaging a lawyer to assist him or her during the prosecution process. (Criminal Procedures Act, Sect. 107c,264a). Women who have been mistreated or abused are entitled to free legal advice, irrespective of their assets or income. They are also entitled to the free assistance of a lawyer during the prosecution process, although this lawyer does not have the same rights as those lawyers appointed pursuant to Section 107a of the Criminal Procedures Act. Victims of violence are also allowed free legal advice irrespective of their assets or income (Ministry of Justice, Circulars G-38/89, G-62/87, G-101/83). A victim has the right to demand compensation for losses suffered as a result of being physically or mentally injured by an offender. The type of loss for which compensation can be claimed is usually economic only, although there are certain exceptions noted in the Injury Compensation Act. Compensation can be demanded from the offender, by mounting a civil legal claim, for example, or from the State. (Injury Compensation Act, Sect. 3-2, 3-3, 3-5; State Regulations of January 23, 1981).

POLICE

1. Administration.

There are 5 police regions, among which are 54 police districts. The districts are led by police commissioners (Politimestre), who have as their immediate subordinates, deputy police commissioners (Politiinspektorer), assistant commissioners (Politiadjutanter) and superintendents (Politifullmektiger). Police commissioners and deputy police commissioners are appointed by the King in Council. The other two classes of officials are appointed by the Ministry of Justice and Police. (Kriminalitet og rettsvesen, 1992: 40; Public Prosecution Authorities and Police in Norway, 1992: 4).

The police force is administered directly by the Ministry of Justice and Police. It is also subordinate to the Public Prosecution Authority (den offentlige p?talemyndighet) with regard to the investigation and prosecution of crimes. The police commissioners and their immediate subordinates form the first instance of the Public Prosecution Authority, which is headed by the Director General of Public Prosecutions (Riksadvokaten). (Administration of Justice in Norway, 1980: 51; Criminal Procedures Act, Sect. 55).

The Director General is appointed by, and directly accountable to, the King, independent of the Ministry of Justice. He or she is assisted by 40 Public Prosecutors or State Attorneys (Statsadvokater), 37 of whom are assigned to particular geographical jurisdictions. There are 9 such jurisdictions. In addition, there are 8 Public Prosecutors attached to the recently established Central Unit for the Investigation and Prosecution of Economic and Environmental Crime. All Public Prosecutors or State Attorneys are lawyers and appointed by the King. (Norges Statskalender 1993, 1993: 194-195; Politi og p?

talemyndighet, 1988: 12-13).

In rural areas, police duties are carried out by sheriffs (Lensmenn), each of whom has general administrative authority in relation to a defined district. There are 370 such districts. (Politi og p? talemyndighet, 1988: 28). As a police officer, a sheriff is accountable to the local police commissioner. (Police Act, Sect. 6).

There are several special units to the police force, all of which are administered centrally. These include the National Bureau of Crime Investigation (Kriminalpolitisen - "Kripos"), the Police Security Service (Politiets Overv?kingstjeneste), the Police Computing Service (Politiets Datatjeneste), the Police Equipment Service (Politiets Materielltjeneste) and the Mobile Police (Utrykningspolitiet). There is also a small specialist anti-terror squad based in Oslo. (Public Prosecution Authorities and Police in Norway, 1992: 6-7).

The functions and tasks of the police are many and varied, ranging from the usual maintenance of law and order, the investigation and prevention of crime, to more specialized administrative tasks, such as immigration control and control of lotteries and gambling. The main rules governing the functions and tasks of the police force are found in the Police Act of 1936 (Lov om politiet 13. mars 1936 nr. 3), the Police Instruction of 1990 (Alminnelig tjenesteinstruks for politiet 22. juni 1990), the Surveillance Instruction of 1977 (Overv?kingsinstruks 25. november 1977), the Weapon Instruction of 1989 (V? peninstruks for politiet 1. august 1989), the Criminal Procedures Act of 1981 and the Prosecution Instruction of 1985. (Forskrift om ordningen av p?talemyndigheten 28. juni 1985 nr. 1679).

It should be noted that the fundamental right of police to maintain public order is based on customary law and not set down in statute. However, this right was included in a proposal for a new Police Act, drafted in 1991 and submitted to Parliament in 1994. (Odelstingsproposisjon nr. 83, 1992-1993).

The police are completely independent of the military forces. In certain emergency situations, such as rescue operations and natural catastrophes, the police can seek the assistance of the military when there are insufficient civilian resources to cope with the situation. In such cases, the military forces are under command of the police and must follow the laws which regulate police actions. (Police Instruction, Chapt. 14).

2. Resources.

*Expenditures. In 1993, the police force was allocated NOK 2,857,267,000. The sheriff force was allocated NOK 875,548,000. These sums do not include money allocated to the Norwegian Police Academy or the Police Equipment Service. (Driscoll, 1993).

*Number of police. In 1993, there were 6,827 police officers, including officers serving in the sheriff force.

As of 1991, there were 374 female police/sheriff officers. While there are no figures available on the number of female officers for 1992 and 1993, it is estimated that in 1993 women comprised about 8%-9% of police officers and 4% of sheriff officers. As of 1993, there were 2 female police commissioners. All police officers in 1993 had a Norwegian background, except for one woman from Pakistan. There were also several other officers who were born in other countries but adopted and raised by Norwegian families. (Driscoll, 1993).

3. Technology.

*Availability of police automobiles. As of August 1993, there were approximately 1,620 police automobiles. Approximately 1,000 of these were State-owned; the rest were rented. In addition, there were 86 motorcycles, all of which were State-owned. (Hagen, 1993).

*Electronic equipment. Computer technology is used by the police force for a variety of purposes, including reporting crimes, gathering and processing crime statistics, budgeting, accreditation of officials and fingerprinting. (An Automated Fingerprint Identification System [AFIS] has been in use with the National Bureau of Crime Investigation since the beginning of 1985. [Politiets Datatjeneste, 1993: 25]).

All police and sheriff stations have on-line links to a central computer network maintained by the Police Computing Service. At present, police cars are not mounted with mini-computer terminals, but there are plans to mount a fleet of police cars with such equipment later this year. Mobile telephones, radio equipment and radar guns are also widely used. (Haukaas, 1993; Politiets ?rbok 1991, 1991: 18-21; Politiets Datatjeneste, 1993).

*Weapons. The most common type of weapon with which police arm themselves is a wooden baton. There are 2 main types of guns available for use by ordinary police officers: US carabiners (30 caliber) and Smith & Wesson revolvers (model 10). Machine guns are available to specially selected police units, such as the anti-terror squad. There are light bullet-proof vests for approximately half of the operative police force. They are distributed unequally between the various police districts depending on need. Almost all police officers on patrol in Oslo have bullet-proof vests. There are also approximately 2,000 heavy bullet-proof vests and helmets distributed between the police districts. (Hagen, 1993).

4. Training and qualifications.

Persons seeking to be recruited into the police force as ordinary service personnel must be between 21 and 30 years old, have Norwegian citizenship, and be of good health, character and standing. (Police Act, Sect. 13). They must also have completed a 3-year training course run by the National Police Academy (Politihogskolen) in Oslo. This training course involves 1 year of studies at the academy, followed by 1 year of practical training at police stations, and then a year of further study back at the academy. (Politihogskolen, 1993: 8). At present, there are no compulsory postgraduate courses for service personnel, although such courses have existed in the past. Those seeking to be recruited to the upper echelons of the police force, such as the rank of superintendent, must have completed a university degree in law. (Police Act, Sect. 4).

5. Discretion.

*Use of force. Section 67 of the Criminal Procedures Act provides the police with general authority to investigate and prosecute cases of crime. It also provides the police with authority to seek court permission to apply certain coercive measures, such as arrest and seizure of property, during the

investigation and prosecution process. These coercive measures are described in Chapters 14-17 of the Criminal Procedures Act and amplified in Chapters 8-11 of the Prosecution Instruction of 1985. Rules governing the use of weapons by police are contained in the Weapon Instruction (WI) of 1989 (V? peninstruks for politiet 1. august 1989). The instruction covers the use of guns, explosives, gas and batons. Batons and gas can only be used in "especially dangerous situations" or when police cannot carry through a task without being subject to a risk of injury. (Weapon Instruction, Sect. 17). Guns shall only be used as a "last option", when: (a) police or others are threatened by weapons or violence and the use of guns seems necessary to prevent the loss of human life or serious injury; or (b) it is necessary to immediately apprehend a person who is suspected of, or charged with, a serious violent offense, including attempts at such offenses, or a person who is otherwise seen as being of special danger to national security, to life or health; or (c) it is necessary to prevent serious damage to foreign property, or when especially important interests of society are threatened. (Weapon Instruction, Sect. 19).

Before using weapons, police must consider the danger or risk of injury to which outsiders will be subjected. If circumstances allow, they must initially warn a person that weapons will be used against him or her if he or she does not obey police orders. They must also fire a warning shot. Explosives can only be used in order to gain access to locked or barricaded premises, when the conditions in Section 19 of Weapon Instruction are fulfilled, and upon an order from a police commissioner. (Weapon Instruction, Sect. 20,22).

Police on routine patrol do not carry guns. Police commissioners can authorize that handguns be taken by police when patrolling by car. In such cases, the weapons and ammunition must be kept in locked cabinets in the patrol cars. Special police units can carry other types of weapons, if permitted by the Ministry of Justice. Police are allowed, on a case by case basis, to carry guns in certain dangerous situations. (Weapon Instruction, Sect. 5, Sect. 10-11).

*Decision to arrest. The major legal requirements that must be met before a person can be arrested by the police are provided in Chapter 14 of the Criminal Procedures Act. Generally, the decision to arrest a person must be made by an official of the Public Prosecuting Authority, which includes the higher-ranking police officials, or a court. An ordinary police officer or private citizen may make an arrest on his or her own initiative if delay "entails any risk." However, these sorts of arrests must subsequently be ratified as soon as possible by the Public Prosecuting Authority. (Criminal Procedures Act, Sect.175,176,179). There are no statistics available on the number of arrests made without a warrant. Whether a person is arrested depends primarily on the type of penalty for the offense he or she is suspected of having committed, along with the risk that he or she will try to evade prosecution and/or commit another crime. Section 171 of the Criminal Procedures Act states that any person who is suspected "with just cause" of committing a felony punishable by more than 6 months' imprisonment may be arrested when: (1) "there is reason to fear that he will evade prosecution or the execution of a sentence or other precautions"; (2) "there is an immediate risk that he will interfere with any evidence in the case..."; (3) "it is deemed necessary in order to prevent him from again committing a criminal act punishable by imprisonment for a term exceeding 6 months"; or (4) "he himself requests it for reasons that are found to be satisfactory.[...]" None of these four conditions need to be met in order to arrest a person suspected of a felony punishable by imprisonment of 10 years or more. Such a person may be arrested if he or she confesses to the felony or there are circumstances "that strengthen the suspicion to a

marked degree." (Criminal Procedures Act, Sect.171,172).

Persons "caught in the act" of committing a crime may be arrested irrespective of the penalty the crime incurs. This is also the case when there is "reason to fear" that a suspect will evade prosecution by fleeing abroad. After being arrested, a person must be brought before a court "as soon as possible and as far as possible on the day following the arrest", so that an order can be issued that the person be remanded in custody. (Criminal Procedures Act, Sect. 173,183-184).

It is possible for police to detain a person for up to 4 hours without arresting him or her. This temporary detention can be imposed on persons who "disturb the public peace and order", or who do not comply with a police request to give their name, age and place of residence, or who are found in the vicinity of a place where a felony is "deemed" to have occurred immediately beforehand. Further guidelines on when and how police may detain persons who disturb the public peace and order are provided in Chapt 9 of the Police Instruction. (Criminal Procedures Act, Sect.191).

*Search and seizure. The police may search a person's premises if that person "is with just cause suspected of any act punishable by law with imprisonment." The police may also conduct a bodily search of such a person "if there is reason to assume that it may lead to the discovery of evidence or of objects that may be seized." Pursuant to Sect. 157 of the Criminal Procedures Act, it is also possible to conduct a physical examination of a suspect during a court inquiry. (Criminal Procedures Act, Sect. 192,195)

In certain circumstances, police can search the premises of persons other than the suspect and to conduct bodily searches of these persons. All searches must be made pursuant to a court order, unless the person concerned consents to the search, is "caught in the act" or there is "strong suspicion" of an act punishable by more than 6 months' imprisonment and there is an "immediate risk that the purpose of the search will otherwise be thwarted." Searches should be conducted "as far as possible" in the presence of an independent witness. Upon being arrested, a person may also be searched in order to find and dispossess him or her of anything that may be used for the purpose of violence or escape. (Criminal Procedures Act, Sect. 178,192-195,197,198,199).

Any objects "deemed to be significant as evidence" may be seized. Seizure will normally be the result of a written decision of the Public Prosecution Authority or a court, but a police officer can effect a seizure on his or her own initiative "when carrying out a decision to make an arrest or search, and otherwise when delay entails a risk." Any seizure may be challenged in a court. (Criminal Procedures Act, generally Chapter 17, Sect. 203,205,206,208).

*Confessions. Police have no authority to order any person, including suspects, to make a statement. However, they can record any statements that are made by the suspect. Suspects must be informed that they are not obliged to make any statement, before they are examined. In addition, persons conducting an examination of a suspect, such as the police, prosecuting authority, and court, must not use "promises, false information, threats or coercion", or "any means that reduce the level of consciousness or ability of the person charged to make up his own mind freely." (Criminal Procedures Act, Sect. 92,230,232).

If the suspect admits to having committed a crime, he or she must then be asked whether s/he admits being guilty and liable to a penalty. If an unreserved confession is made, the suspect must be asked whether he or she consents to the case being adjudicated in a court of summary jurisdiction. (Criminal

Procedures Act, Sect. 233).

6. Accountability.

Complaints alleging that police have breached criminal law in carrying out their duties are handled by special investigatory bodies, independent of the Ministry of Justice and Police and subordinate to the Director General of Public Prosecutions (Riksadvokaten). All cases in which police actions have resulted in a person's death and/or serious bodily injury must be investigated by such bodies, irrespective of whether or not a complaint has been made. It is up to the Riksadvokat to decide whether or not to prosecute the police. (Prosecution Instruction; Sect.7-2, 34-6; cf Chapt 34; cf s 34-8).

Allegations of police acting in breach of discipline are handled by special committees (ansettelsesr?d) attached to each police department. Decisions reached by these committees can be appealed to the Ministry of Justice and Police. The Ministry also handles general complaints about police behavior. (Aukrust, 1993).

PROSECUTORIAL AND JUDICIAL PROCESS

1. Rights of the accused.

*Rights of the accused. The rights of the accused are described in the Criminal Procedures Act. The accused must be informed of the nature of the charge(s) brought against him or her upon being arrested and attending court for the first time. The accused must also be given the chance to refute the grounds on which the charge is based. (Criminal Procedures Act, Sect.90,92,171).

Although the accused has a general right to attend court proceedings and to summon and examine witnesses, the court can order him or her to leave the courtroom while a witness is being examined "if there is special reason to fear that an unreserved statement will not otherwise be made." The accused must be informed subsequently of the proceedings that occurred in his or her absence. In special circumstances, such as if national security interests are at stake, the accused may be entirely excluded from the proceedings. (Criminal Procedures Act, Sect. 135,245).

The court's verdict must be communicated to the accused as soon as possible, along with information on rights of appeal. Court judgements and orders are to be accompanied by reasons. (Criminal Procedures Act, Sect.39-41,43,52).

The accused has the right to bring appeals against court verdicts, both on questions of fact and questions of law. There are, however, several limitations on the exercise of this right. For example, appeals to the Supreme Court, which is the highest judicial body, can only take place if permitted by the Court's Appeals Selection Committee (Kjoerem?lsutvalget). Moreover, the general rule is that such appeals can only be based on alleged errors of law. In other words, the Supreme Court is unable to try questions of evidence related to the issue of guilt. (Administration of Justice in Norway, 1980: 65-66; Criminal Procedures Act, as amended new Chapt 23, Sect. 323, 1993).

The accused do not have the right to have their cases tried by jury. As a basic rule, however, appeals from verdicts reached by the court of first instance on cases concerning felonies punishable by more than 6 years' imprisonment are dealt with by the High Court (Lagmannsrett). In these cases, there is a

jury (lagrett) present to decide the question of guilt. (Criminal Procedures Act, new Chapt 24, as amended, 1993).

*Assistance to the accused. As a general rule, the accused is entitled to the assistance of defense counsel of his or her choice during all stages of the judicial process. The accused is also provided with the free assistance of defense counsel, chosen by the court, during the main court hearing. There are several exceptions to the latter rule, such as if the case involves a certain minor offense, like driving under the influence of alcohol, or when the accused has made an unreserved confession. However, these exceptions apply only in cases tried by the City or District Court. (Criminal Procedures Act, Sect. 94,96,100,107,262).

2. Procedures.

*Preparatory procedures for bringing a suspect to trial. Once a person has been arrested, he or she is brought before the court of examination and summary jurisdiction (forhørsretten). This court decides whether or not the person shall be remanded in custody. The prosecuting authority then prepares a formal indictment (tiltalebeslutning), which it serves on the accused. The indictment contains information on the time, place and object of the coming trial and legal details on the nature of the charge. (Criminal Procedures Act, Sect. 184,184a).

When the relevant 1993 amendments to the CPA enter into force, all criminal matters will initially be brought to the District and City Courts. Appeals will be brought before the High Court, though in special circumstances they will be able to go directly to the Supreme Court. Previously, the most serious criminal cases were tried by the High Court at first instance. It was also much easier to bring appeals from decisions reached by the District and City Courts directly before the Supreme Court, bypassing the High Court in the process. (Criminal Procedures Act, new as amended, Sect.5,6,8, 1993).

*Official who conducts prosecution. The Public Prosecution Authority is responsible for deciding whether to prosecute and for conducting the prosecution. For very serious felonies, such as murder, the decision to prosecute lies with the Director General of Public Prosecutions. Responsibility for prosecuting most other types of felonies lies with the State attorneys/Public Prosecutors. Police Commissioners and their immediate subordinates are also part of the Public Prosecution Authority and have the power to prosecute more minor cases, which are typically misdemeanors. (Administration of Justice in Norway, 1980: 51-52).

On August 27, 1993, a Royal Resolution was issued, extending police prosecution powers to encompass different types of felonies, such as breaking and entering, falsification of documents, larceny, fraud and vandalism. (Criminal Procedures Act, new as amended, cf newly amended, Sect.67, 1993).

*Alternatives to trial. Minor offenses can be settled by the police serving a writ prescribing payment of an optional fine (forelegg) upon the accused. This type of writ is usually served in minor traffic and customs offenses. If the fine is paid, there are no further judicial proceedings. If the fine is not paid, the matter can be prosecuted in court using simplified proceedings. For instance, a District Court judge could decide the matter summarily. This simplified court procedure is also employed when an accused

person makes an unreserved confession for a crime not punishable by more than 10 years' imprisonment, and the confession is corroborated by evidence. (Criminal Procedures Act, new as amended, Sect. 248, 1993; *Kriminalitet og rettsvesen*, 1992: 42).

An ordinary court trial can also be avoided: (a) in cases where the prosecuting authority decides not to prosecute, often with the condition that the offender undertakes not to engage in further criminal behavior; (b) in cases involving persons under the age of 18, which are left to be decided by municipal child welfare boards; and (c) in cases which can be settled by arbitration through the Conflict Board. (Criminal Procedures Act, Sect. 69; *Kriminalitet og rettsvesen*, 1992: 42).

*Proportion of prosecuted cases going to trial. Investigations of felonies completed by the police in 1991 resulted in 58,600 charges being brought against 22,400 persons; 70% of the charges, and approximately half of the persons charged, ended up in trial. (Criminal Statistics 1991, 1993: 29,144).

Of cases involving felonies which were investigated in 1991, 77% were not cleared up by the end of the year. Only 11% to 14% of cases involving larceny were successfully investigated, while figures for cases involving murder and serious drug offenses were 84% and 89%, respectively. Of those cases which were cleared up in 1991, 19.5% resulted in charges being laid, of which 69.5% went to trial. (Criminal Statistics 1991, 1993: 27,28,51).

Just as the proportion of cases successfully investigated varies by type of offense, so does the proportion of cases going to trial, though often to a smaller extent and not in the same pattern. Approximately 75% to 80% of charges involving larceny went to trial in 1991. The figures for ordinary drug crimes, serious drug crimes and murder were approximately 78%, 97% and 80%, respectively. These percentages were calculated using numerical data from Criminal Statistics 1991. (1993: 53-55).

Pre-trial incarceration conditions. A court of examination and summary jurisdiction (*forhørsretten*) can decide that an arrested person be remanded in custody if any of the conditions set out in Sections 171, 172 or 173 of the Criminal Procedures Act are fulfilled. Pre-trial incarceration shall be "as short as possible and must not exceed 4 weeks", but it can be extended by up to 4 weeks at a time. (Criminal Procedures Acts, Sect. 184, 185).

There is a provision for a person to forgo arrest or be released from custody subsequent to arrest if he or she gives certain guarantees. However, this practice is rarely applied. (Andenaes, 1993: 126; Criminal Procedures Act, Sect. 181,188).

*Proportion of pre-trial offenders incarcerated. In 1991, just over 20% (533 persons) of the total average number of prisoners were in custody awaiting trial. (Criminal Statistics 1991, 1993: 124,128).

JUDICIAL SYSTEM

1. Administration.

At the top of the judicial hierarchy is the Supreme Court (*Hoyesterett*), located in Oslo. Directly below the Supreme Court is the High Court (*Lagmannsrett*). There are 5 High Courts, each covering a separate

but parallel territorial jurisdiction in Eidsivating, Agder, Gulating, Frostating and H?logaland. Below the High Court are the District and City Courts (Herredsrett and Byrett), which function ordinarily as the courts of first instance. There are 98 District and City Courts. (Kriminalitet og rettsvesen, 1992: 72-73). The majority of criminal matters are settled summarily in the forh?rsrett. In 1990, for example, 35,200 criminal matters went to the District and City Courts, of which two-thirds, or 23,800, were settled in the forh?rsrett. Also in 1990, less than 2% of all criminal matters were handled by the High Court at first instance. (Kriminalitet og rettsvesen, 1992: 74).

2. Special courts.

The majority of special courts which have been established hear only particular kinds of civil matters. For instance, there is a Court of Impeachment (Riksretten) to hear criminal charges brought against government ministers, members of parliament and Supreme Court judges, although it is rarely used. (Administration of Justice in Norway, 1980: 88).

There is also the Court Martial which hears criminal charges on members of the military (Krigsretten). This court is made up of one professional judge and 2 military lay judges. (Administration of Justice in Norway, 1980: 83).

3. Judges.

*Number of judges. The Supreme Court is served by a Chief Justice (Justitiarius) and 17 judges. Attached to the High Court are 84 judges (lagdommere), while 238 judges (embetsdommere) and 156 deputy judges (dommerfullmektiger) are employed at the District and City Courts. (Kriminalitet og rettsvesen, 1992: 72-73).

*Appointment and qualifications. All judges are appointed by the King in Council upon the recommendation of the Ministry of Justice. To be appointed, judges must be Norwegian citizens, financially solvent, and have achieved high university grades when studying for their law degree. Jurists from all professional backgrounds can be appointed as judges. There is no formal system of promotion through the court hierarchy. Deputy judges tend to be relatively young and often have just graduated law school. (Administration of Justice in Norway, 1980: 89).

Lay judges can participate in the hearing of cases. Usually one professional judge and two lay judges hear criminal cases at the District and City Courts. Amendments to the CPA in 1993 have made it possible for more serious cases to be heard at first instance by two professional and three lay judges. Previously, these cases went straight to the High Court for a first instance hearing. (Criminal Procedures Act, new as amended, Sect. 276, 1993).

PENALTIES AND SENTENCING

1. Sentencing process.

*Who determines the sentence? Sentences issued by the courts of first instance (District and City

Courts) are determined by a collegium of two lay judges and one professional judge. However, 1993 amendments to the Criminal Procedures Act make it possible for this collegium to be expanded to three lay judges and two professional judges for more serious cases. The 1993 amendments also provide that sentences issued by the High Court are to be determined by three professional and four lay judges. (Lov om domstolene 13. august 1915 nr. 5). (Courts Act, cf Sect. 12,14; Criminal Procedures Act, new as amended, Sect. 276, 332, 1993).

In cases tried by jury, sentences will be determined by the professional judges, the jury foreman and three jury members. Sentences issued by the Supreme Court are always determined by professional judges. If application of the law is upheld, an appeal court cannot alter the sentence, "unless it finds that the penalty is obviously disproportionate to the criminal act committed." (Criminal Procedures Act, new as amended, Sect. 344,376e, 1993).

*Which persons have input into the sentencing process? Courts and the prosecuting authority can order that a social inquiry on the charged person be conducted in order to assist them in determining an appropriate penalty. (Criminal Procedures Act, Chapter 13). There is also provision for the appointment of various experts to serve either in the capacity of witnesses or in the capacity of lay judges. (Criminal Procedures Act, Chapter 11; Criminal Procedures Act, new as amended, Sect. 277,332, 1993).

2. Types of penalties.

*Range of penalties. The main types of penalties for criminal actions are imprisonment, social service, and fines. The maximum prison sentence is 21 years, of which approximately one such sentence is imposed each year. Crimes that are punished by imprisonment of up to 21 years include murder, rape and serious drug offenses. (Kriminalitet og rettsvesen, 1992: 58; Penal Code, Sect. 15; Penal Code, proposed new, Sect. 40).

Offenders can also receive a suspended prison sentence (betinget dom). Suspended prison sentences are usually given to young and/or first-time offenders for lesser crimes. In 1990, 1 in 3 felonies was punished with a suspended prison sentences, either alone or in addition to payment of fines. (Kriminalitet og rettsvesen, 1992: 58).

Community service involves an offender doing unpaid community work for a set time period, with a maximum of 360 hours. It is usually imposed for crimes which can be punished by up to 1 year in prison. It can be combined with payment of fines and, in special circumstances, with a short period of imprisonment. A subsidiary term of imprisonment (subsidiær fengselsstraff) is usually fixed at the same time that a penalty involving community service and/or payment of a fine is imposed. The subsidiary term of imprisonment takes effect if the community service is not carried out satisfactorily or the fine is not paid. (Penal Code, Sect. 28,28a-28c; Penal Code, proposed new, Sect. 40,53,57,61). Another type of penalty is detention (hefte), a form of custodia honesta rarely applied and dropped in the proposed new Penal Code. However, the proposed Code retains the penalty of preventive detention (forvaring). Persons who have repeatedly committed felonies of a serious nature and whom a court suspects will commit such crimes once released from prison can be held back in preventive detention. Other penalties which are retained in the proposed new Code include: forfeiture of public and/or private office; loss of the right to vote and to engage in certain enterprises; and prohibition from entering or staying in certain areas. (Penal Code, Sect. 29-33; Penal Code, proposed new, Chapter 9,10).

*Death penalty. There is no death penalty.

PRISON

1. Description.

*Number of prisons and type. On July 2, 1993, there were 48 prisons, of which 5 were central prisons (landsfengsler) and 43 were regional prisons (kretsfengsler, hjelpefengsler and arbeidskolonier). One of the central prisons (Bredtvedt) was for females only. Most other prisons contained prisoners of both sexes. Larger prisons had special sections just for women. There were no prisons solely used for juveniles. (Fridhov, 1993).

*Number of prison beds. On July 2, 1993, there were 1,831 places for prisoners in closed prison institutions (lukkede anstalter) and 941 places in open institutions (?pne anstalter)(Fridhov, 1993). In open institutions there are no special security measures taken to prevent prisoners escaping, unlike those taken in closed institutions.

*Number of annual admissions. In 1991, there were 11,497 new admissions and 550 re-admissions to penal institutions, indicating a 6% increase from the previous year. (Criminal Statistics 1991, 1993: 123, 129).

*Average daily population/number of prisoners. In 1991, the average daily number of prisoners was 2,548, of which 124, or approximately 5%, were women. A total of 4% of those admitted to prison in 1991 were foreign citizens residing in Norway, of which over half had originally come from Europe (mainly from northern Europe), 9% from America, 14% from Africa and 28% from Asia. A total of 5% of those admitted to prison were of unknown citizenship. (Criminal Statistics 1991, 1993: 125).

*Actual or estimated proportions of inmates incarcerated. The following is the percentage of convicted offenders admitted into prison in 1991 by crime type. (Criminal Statistics 1991, 1993: 126).

| | |
|---|-----|
| Drug Crimes | 9% |
| Violent Crimes (includes sexual offenses, various forms of bodily violence, murder) | 12% |
| Property Crimes (includes theft) | 15% |
| Other Crimes (includes fraud, drunken driving, traffic offenses) | 40% |
| Unknown | 24% |

2. Administration.

*Administration. All prisons in Norway are financed and administered by the State.

*Number of prison guards. On July 2, 1993, there were 1,534 prison guards. (Fridhov, 1993).

*Training and qualifications. Those seeking recruitment as prison officers must be Norwegian citizens, between 21 and 35 years old, and be of good health and character. They must also have successfully completed secondary schooling. (Lov om fengselsvesenet 12. desember 1958 nr. 7; Prison Act, Sect. 6). All recruits must then complete a 2 year course of study at the Norwegian Prison College (Fengselsskolen) in Oslo, followed by one year's compulsory service in the prison system. (Fridhov, 1993).

*Expenditure on prison system. In 1992, approximately NOK 1,200,000,000 was spent on prisons. This sum includes money spent on building and maintaining prison facilities but does not include money spent on education, health and culture programs for prisoners. (Fridhov, 1993).

3. Prison Conditions.

*Remissions. As a general rule, prisoners are released on parole before the period for which they have been sentenced has expired. Normally, they are released once they have served at least two-thirds of their sentence, which must at least be 2 months, including time spent in custody. In special circumstances, a prisoner can be released on parole after half of the sentence has expired, but this rarely occurs. (Andenaes, 1991: 357; Prison Act, Sect. 35,36).

*Work/education. There are compulsory work schemes for prisoners. However, those serving short prison sentences may avoid having to participate in these schemes if it is difficult to find appropriate work activities for them. Prisoners are paid for their work. (Prison Act, Sect. 17,18). Prisoners can participate in programs run by the Ministry of Education. These programs are offered at all educational levels (primary, secondary and tertiary). (Andenaes, 1991: 351).

*Amenities/privileges. Prisoners have visitation rights, postal correspondence rights, the right to lodge written complaints, and the right to be allowed outdoors for at least an hour each day. (Prison Act, Sect. 22-25).

Most prisons have a priest who holds regular church services for prisoners and helps organize social events. At the larger prisons, there are also social workers and sports and recreation advisors whom prisoners can consult. Prisoners are normally allowed to have televisions, radios and magazines in their cells. In special circumstances, they are also allowed to leave prison for short periods, such as to visit a sick relative. (Andenaes, 1991: 352; Prison Act, Sect. 34).

There are no special treatment programs for prisoners beyond ordinary medical services, although it is possible to transfer prisoners to other institutions for special treatment if necessary. It is also possible for a prisoner addicted to drugs to enter into a special contract with the prison authorities. In this contract, the prison authorities can offer and provide more privileges on the condition that the prisoner promises not to use drugs and agrees to undergo regular urine tests to ensure the promise is being kept.

(Fridhov, 1993; Kriminalitet og rettsvesen, 1992: 62; Prison Act, Sect. 12,32).

EXTRADITION AND TREATIES

*Extradition. All of the Nordic countries have enacted national laws giving them mutual extradition rights. (For Norway, see Act of 3 March 1961 on Extradition of Offenders to Denmark, Finland, Iceland and Sweden; for Sweden, see Act of 5 June 1959 on Extradition of Criminal Offenders to Denmark, Finland, Iceland and Norway; for Denmark, see Act of 3 February 1960 on Extradition of Legal Offenders to Finland, Iceland, Norway and Sweden; for Finland, see Act of 3 June 1960 on Extradition of Criminal Offenders between Finland and the other Nordic Countries.) Norway also ratified the Council of Europe Convention of December 13, 1957, giving it mutual extradition rights in relation to Austria, Cyprus, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Israel, Italy, Liechtenstein, Luxembourg, the Netherlands, Portugal, Spain, Sweden, Switzerland and Turkey. Bilateral extradition treaties have been concluded with Australia (September 9, 1985), Belgium (November 3, 1981), Estonia (April 3, 1930), Latvia (September 12, 1927) and the United States (June 9, 1977).

*Exchange and transfer of prisoners. Norwegian citizens or residents can serve prison sentences that were imposed by the courts in other Nordic countries in Norway, pursuant to Section 3 of the Act of 1963 on Enforcement of Penal Sentences Passed in the Nordic States. Citizens of the other Nordic countries are also allowed to serve Norwegian prison sentences in their respective home countries (Sect. 5). There are also corresponding provisions for serving suspended prison sentences (Chapt 3) and for the supervision of persons released on probation (Chapt 4). (Lov om fullbyrding av nordiske dommer p? straff m.v. 15. november 1963) Norway ratified the European Convention of May 28, 1970 on the International Validity of Criminal Judgements, and the European Convention of March 21, 1983 on the Transfer of Sentenced Persons. The provisions of these conventions are implemented in the Act of 1991 on Transfer of Sentenced Persons, which entered into force on April 1, 1993. This Act provides a legal basis for prisoner transfer arrangements with those European countries which are party to the above conventions. (Lov om overføring av domfelte 20. juli 1991 nr. 67)

*Specified conditions. Conditions for the extradition of foreign nationals from Norway are set out in the Act of 1975 on the Extradition of Offenders (Sect. 26 and 27). This Act does not apply to extradition matters in relation to the Nordic countries, nor does it override international agreements entered into by Norway prior to the Act's entry into force. The Act also provides a legal basis for the extradition of foreigners to countries which have not signed an extradition treaty with Norway. (Lov om utlevering av lovbrytere m.v. 13. juni 1975 nr. 39).

[Top](#)

GENERAL BACKGROUND

The muchamended Criminal Code of 1902 remains in force, but a substantial revision is being planned. The most recent of the minor amendments came on 1 January 1986, when a new Criminal Procedure Law came into force.

Offences are formally divided into "crimes" and "misdemeanours". In principle, an offence is a crime if it is punishable by more than 3 months imprisonment; otherwise it is only a misdemeanour (although there are some important exceptions). The division is important, since misdemeanour cases are processed differently from crimes, and the statistical data are less complete and reliable for misdemeanours.

Investigations of criminal offences are handled by the police and very rarely by other authorities. When the police have evidence indicating the guilt of a person, cases involving crimes are referred to the prosecutor, while misdemeanours are handled by the local chief of police and his or her legally trained staff. A right exists for police officers "on the beat" to give "warnings" and to "admonish" in cases of infractions, but is not regulated by law. On the prosecutorial level Norway utilizes the principle of opportunity, and prosecution is often waived, especially in respect of juvenile offenders. Most misdemeanour cases are settled either by "ticket fines" or a summary process whereby the offender agrees to pay a fine suggested by the chief of police. The defendant may instead choose to bring the case before the court.

The court system consists of district courts (98), superior courts (5) and the Supreme Court. The district courts usually consist of one professional judge and two lay judges, sitting as a group. The superior courts function partly as courts of first instance in serious cases where the crime in question is subject to more than 6 years imprisonment and partly as courts of second instance for cases referred by the district courts. When acting as courts of first instance they are jury courts, while lay judges participate when the superior courts are acting as courts of second instance. Both the lay judges and the jury members are randomly chosen from a list of citizens from the local community. Norway has no administrative courts. The autonomy of the parts of the criminal justice system is with the exceptions of the courts restricted, since the administration is planned by and responsible to the Ministry of Justice.

The age of criminal responsibility is fourteen years (increased to fifteen years in 1990). Most cases involving Penal Code offences committed by teenagers are referred to the communal (municipal) child welfare board by means of waiver of prosecution. The board members are appointed by local authorities. The district judge participates in those cases where the matter to be decided is whether to place a child in a foster home or institution and the parents oppose such a decision. The system is a part of the social welfare services and is subject to the Ministry of Social Affairs.

Sanctions - Background

In 1986 there were approximately 160 000 cases where a suspect was found guilty of an offence. 12 000 of these cases were crimes and the remaining 148 000 cases were misdemeanours. The criminal courts

handled 9 200 crime and 10 000 misdemeanour cases, while the rest were handled by prosecutors or chiefs of police by means of waiver of prosecution or summary process. Of the 160 000 cases, approximately 85 % resulted in fines, 10 % in probation, suspended sentences, waiver of prosecution etc., and 7 % in unconditional imprisonment. The length of the prison sentences was generally very short: 90 per cent of the unconditional sentences were less than 6 months.

The number of people admitted to Norwegian prisons in 1986 was 12 046, of whom 789 were returned for breaching parole. Of the remainder, 3 417 were awaiting trial, 417 were imprisoned for nonpayment of a fine and 7 423 were admitted under a sentence of imprisonment. The average daily number of people incarcerated per day during 1986 was 2 000. Of these 1 500 were serving a sentence, 46 were in preventive detention (a measure for offenders labelled "dangerous"), 16 were in prison because of nonpayment of a fine, and 432 were in custody awaiting trial.

According to the response to the Third United Nations Survey, in 1986 Norway had 46 prisons of which 38 had a capacity of less than 100 prisoners and 8 between 100 and 500 prisoners. Since 1975 Norway has had no special institution for young offenders. Maladjusted delinquents under the age of eighteen may be cared for by the social welfare services which operate some treatment institutions.

Criminal Justice Personnel and resources - background

Norway reports the following data on personnel for 1986:

Police personnel: 5 996

Prosecutors: 30 (in charge of crimes; the chiefs of police in charge of misdemeanour cases number around 250).

Professional judges: 429. Of these 387 deal with criminal cases as well as civil cases. There are no reliable figure for the number of lay judges and jurors.

Prison personnel: 1 538, of whom 1 003 were classified as custodial and 33 as treatment officers.

The monetary resources were allocated in the following manner in 1986:

| | |
|---|-------------------------------------|
| Police: | NOK 2 113 260 000 (352 210 000 USD) |
| Prosecution
(excluding police chiefs): | NOK 18 852 000 (3 137 500 USD) |
| Courts: | NOK 438 439 000 (73 073 000 USD) |
| Prisons: | NOK 520 600 000 (86 600 000 USD) |
| Community based services: | NOK 49 000 000 (8 200 000 USD) |

Selected Issues

The response to the Third Survey does not include - with one exception - any comments or answers to the questions concerning crime prevention strategies. The exception is a reference to a special bureau within the police, the Norwegian Police Data Processing Service. The response describes the aims and work of this Service and draws attention to the usefulness of a computer-based international system of information.

Norway is experimenting with community service in place of short-term imprisonment, and "conflict resolution boards". However, no figures or other information are presented.

When interpreting the figures concerning the use of imprisonment, attention is drawn to the importance placed on "drunken driving". Of all the sentences to unconditional imprisonment (for both crimes and misdemeanours) almost half were for this offence. However, the statistics may change in the light of changes in the law on drunken driving enacted in 1988.

GEOGRAPHY

Location: Northern Europe, bordering the North Sea and the North Atlantic Ocean, west of Sweden

Geographic coordinates: 62 00 N, 10 00 E

Map references: Europe

Area:

total: 324,220 sq km

land: 307,860 sq km

water: 16,360 sq km

Area-comparative: slightly larger than New Mexico

Land boundaries:

total: 2,515 km

border countries: Finland 729 km, Sweden 1,619 km, Russia 167 km

Coastline: 21,925 km (includes mainland 3,419 km, large islands 2,413 km, long fjords, numerous small islands, and minor indentations 16,093 km)

Maritime claims:

contiguous zone: 10 nm
continental shelf: 200 nm
exclusive economic zone: 200 nm
territorial sea: 4 nm

Climate: temperate along coast, modified by North Atlantic Current; colder interior; rainy year-round on west coast

Terrain: glaciated; mostly high plateaus and rugged mountains broken by fertile valleys; small, scattered plains; coastline deeply indented by fjords; arctic tundra in north

Elevation extremes:

lowest point: Norwegian Sea 0 m
highest point: Glittertinden 2,472 m

Natural resources: petroleum, copper, natural gas, pyrites, nickel, iron ore, zinc, lead, fish, timber, hydropower

Land use:

arable land: 3%
permanent crops: NA%
permanent pastures: 0%
forests and woodland: 27%
other: 70% (1993 est.)

Irrigated land: 970 sq km (1993 est.)

Natural hazards: NA

Environment-current issues: water pollution; acid rain damaging forests and adversely affecting lakes, threatening fish stocks; air pollution from vehicle emissions

Environment-international agreements:

party to: Air Pollution, Air Pollution-Nitrogen Oxides, Air Pollution-Sulphur 85, Air Pollution-Sulphur 94, Air Pollution-Volatile Organic Compounds, Antarctic-Environmental Protocol, Antarctic Treaty, Biodiversity, Climate Change, Desertification, Endangered Species, Environmental Modification, Hazardous Wastes, Law of the Sea, Marine Dumping, Nuclear Test Ban, Ozone Layer Protection, Ship Pollution, Tropical Timber 83, Tropical Timber 94, Wetlands, Whaling signed, but not ratified: none of the selected agreements

Geography-note: about two-thirds mountains; some 50,000 islands off its much indented coastline; strategic location adjacent to sea lanes and air routes in North Atlantic; one of most rugged and longest coastlines in world; Norway only NATO member having a land boundary with Russia

PEOPLE

Population: 4,419,955 (July 1998 est.)

Age structure:

0-14 years: 20% (male 444,373; female 420,940)

15-64 years: 65% (male 1,454,733; female 1,407,395)

65 years and over: 15% (male 288,056; female 404,458) (July 1998 est.)

Population growth rate: 0.44% (1998 est.)

Birth rate: 12.9 births/1,000 population (1998 est.)

Death rate: 10.17 deaths/1,000 population (1998 est.)

Net migration rate: 1.64 migrant(s)/1,000 population (1998 est.)

Sex ratio:

at birth: 1.06 male(s)/female

under 15 years: 1.06 male(s)/female

15-64 years: 1.03 male(s)/female

65 years and over: 0.71 male(s)/female (1998 est.)

Infant mortality rate: 5.01 deaths/1,000 live births (1998 est.)

Life expectancy at birth:

total population: 78.23 years

male: 75.42 years

female: 81.21 years (1998 est.)

Total fertility rate: 1.8 children born/woman (1998 est.)

Nationality:

noun: Norwegian(s)

adjective: Norwegian

Ethnic groups: Germanic (Nordic, Alpine, Baltic), Lapps (Sami) 20,000

Religions: Evangelical Lutheran 87.8% (state church), other Protestant and Roman Catholic 3.8%, none 3.2%, unknown 5.2% (1980)

Languages: Norwegian (official)
note: small Lapp- and Finnish-speaking minorities

Literacy:
definition: age 15 and over can read and write
total population: 99% (1976 est.)
male: NA%
female: NA%

GOVERNMENT

Country name:
conventional long form: Kingdom of Norway
conventional short form: Norway
local long form: Kongeriket Norge
local short form: Norge

Data code: NO

Government type: constitutional monarchy

National capital: Oslo

Administrative divisions: 19 provinces (fylker, singular-fylke); Akershus, Aust-Agder, Buskerud, Finnmark, Hedmark, Hordaland, More og Romsdal, Nordland, Nord-Trøndelag, Oppland, Oslo, Ostfold, Rogaland, Sogn og Fjordane, Sor-Trøndelag, Telemark, Troms, Vest-Agder, Vestfold

Dependent areas: Bouvet Island, Jan Mayen, Svalbard

Independence: 26 October 1905 (from Sweden)

National holiday: Constitution Day, 17 May (1814)

Constitution: 17 May 1814, modified in 1884

Legal system: mixture of customary law, civil law system, and common law traditions; Supreme Court renders advisory opinions to legislature when asked; accepts compulsory ICJ jurisdiction, with reservations

Suffrage: 18 years of age; universal

Executive branch:

chief of state: King HARALD V (since 17 January 1991); Heir Apparent Crown Prince HAAKON MAGNUS (born 20 July 1973)

head of government: Prime Minister Kjell Magne BONDEVIK (since 15 October 1997)

cabinet: State Council appointed by the king with the approval of the Parliament

elections: none; the king is a hereditary monarch; following parliamentary elections, the leader of the majority party or leader of a majority coalition is usually appointed prime minister by the king with the approval of the Parliament

Legislative branch: modified unicameral Parliament or Storting which, for certain purposes, divides itself into two chambers (165 seats; members are elected by popular vote by proportional representation to serve four-year terms)

elections: last held 15 September 1997 (next to be held NA September 2001)

election results: percent of vote by party-Labor 35%, Center Party 7.9%, Conservatives 14.3%, Christian People's 13.7%, Socialist Left 6%, Progress 15.3%,

Liberal Party 4.4%, other parties 1.6%; seats by party-Labor 65, Center Party 11, Conservatives 23, Christian People's 25, Socialist Left 9, Progress 25, Liberal Party 6, other parties 1

note: for certain purposes, the Parliament divides itself into two chambers and elects one-fourth of its membership to an upper house or Lagting; the 39-member Saami assembly has advisory functions on regional control of natural resources and decision-making capacity on matters relating to the preservation of the Saami culture

Judicial branch: Supreme Court or Hoyesterett, justices appointed by the king

Political parties and leaders: Labor Party [Thorbjorn JAGLAND]; Conservative Party [Jan PETERSEN]; Center Party [Anne ENGER LAHNSTEIN];

Christian People's Party [Valgerd HAUGLAND]; Socialist Left [Kjellbjoerg LUNDE]; Norwegian Communist [Kare Andre NILSEN]; Progress Party [Carl I.

HAGEN]; Liberal [Odd Einar DORUM]; Left Party; Red Electoral Alliance [Erling FOLKVORD]

International organization participation: AfDB, AsDB, Australia Group, BIS, CBSS, CCC, CE, CERN, EAPC, EBRD, ECE, EFTA, ESA, FAO, IADB, IAEA, IBRD, ICAO, ICC, ICFTU, ICRM, IEA, IFAD, IFC, IFRCS, IHO, ILO, IMF, IMO, Inmarsat, Intelsat, Interpol, IOC, IOM, ISO, ITU, MONUA, MTCR, NAM

(guest), NATO, NC, NEA, NIB, NSG, OECD, OSCE, PCA, UN, UNCRO, UNCTAD, UNESCO, UNHCR, UNIDO, UNIFIL, UNMIBH, UNMOP, UNPREDEP, UNTSO, UPU, WEU (associate), WHO, WIPO, WMO, WTrO, ZC

Diplomatic representation in the US:

chief of mission: Ambassador Tom-Erik VRAALSON

chancery: 2720 34th Street NW, Washington, DC 20008

telephone: [1] (202) 333-6000

FAX: [1] (202) 337-0870

consulate(s) general: Houston, Miami, Minneapolis, New York, and San Francisco

Diplomatic representation from the US:

chief of mission: Ambassador David HERMELIN

embassy: Drammensveien 18, 0244 Oslo

mailing address: PSC 69, Box 1000, APO AE 09707

telephone: [47] 22 44 85 50

FAX: [47] 22 44 33 63

Flag description: red with a blue cross outlined in white that extends to the edges of the flag; the vertical part of the cross is shifted to the hoist side in the style of the Dannebrog (Danish flag)

ECONOMY

Economy-overview: Norway is a prosperous bastion of welfare capitalism. The economy consists of a combination of free market activity and government intervention. The government controls key areas, such as the vital petroleum sector (through large-scale state enterprises), and extensively subsidizes agriculture, fishing, and areas with sparse resources. Norway maintains an extensive welfare system that helps propel public sector expenditures to more than 50% of GDP and results in one of the highest average tax levels in the world. A small country with a high dependence on international trade, Norway is basically an exporter of raw materials and semiprocessed goods, with an abundance of small- and medium-sized firms, and is ranked among the major shipping nations. The country is richly endowed with natural resources-petroleum, hydropower, fish, forests, and minerals-and is highly dependent on its oil sector. Only Saudi Arabia exports more oil than Norway. Norway imports more than half its food needs. Oslo opted to stay out of the EU during a referendum in November 1994. Economic growth in 1998 should be about the same as in 1997. Inflation probably will move up toward 3% because of tightness in labor markets. Despite their high per capita income-outstripped among major nations only by the US-and their generous welfare benefits, Norwegians worry about that time in the 21st century when the oil

and gas run out.

GDP: purchasing power parity-\$120.5 billion (1997 est.)

GDP-real growth rate: 3.5% (1997 est.)

GDP-per capita: purchasing power parity-\$27,400 (1997 est.)

GDP-composition by sector:

agriculture: 2.9%

industry: 34.7%

services: 62.4% (1991)

Inflation rate-consumer price index: 2% (1997 est.)

Labor force:

total: 2.13 million

by occupation: services 71%, industry 23%, agriculture, forestry, and fishing 6% (1993)

Unemployment rate: 2.6% (yearend 1997)

Budget:

revenues: \$48.6 billion

expenditures: \$53 billion, including capital expenditures of \$NA (1994 est.)

Industries: petroleum and gas, food processing, shipbuilding, pulp and paper products, metals, chemicals, timber, mining, textiles, fishing

Industrial production growth rate: 3% (1996 est.)

Electricity-capacity: 26.431 million kW (1995)

Electricity-production: 121.375 billion kWh (1995)

Electricity-consumption per capita: 26,547 kWh (1995)

Agriculture-products: oats, other grains; beef, milk; livestock output exceeds value of crops; among world's top 10 fishing nations; fish catch of 2.33 million metric tons in 1994

Exports:

total value: \$49.3 billion (f.o.b., 1996)

commodities: petroleum and petroleum products 43%, metals and products 11%, foodstuffs (mostly fish) 9%, chemicals and raw materials 25%, natural gas 6.0%, ships 5.4%

partners: EU 77.2% (UK 19.8%, Germany 12.7%, Netherlands 9.1%, France 7.8%, Sweden 9.8%), US 6.0% (1995)

Imports:

total value: \$35.1 billion (c.i.f., 1996)

commodities: machinery and equipment and manufactured consumer goods 54%, chemicals and other industrial inputs 39%, foodstuffs 6%

partners: EU 71.0% (Sweden 15.4%, Germany 13.8%, UK 9.7%, Denmark 7.5%, Netherlands 4.4%), US 6.6% (1995)

Debt-external: \$NA

Economic aid:

donor: ODA, \$1.014 billion (1993)

Currency: 1 Norwegian krone (Nkr) = 100 oere

Exchange rates: Norwegian kroner (Nkr) per US\$1-7.4875 (January 1998), 7.0734 (1997), 6.4498 (1996), 6.3352 (1995), 7.0576 (1994), 7.0941 (1993)

Fiscal year: calendar year

COMMUNICATIONS

Telephones: 2.39 million (1994 est.); 470,000 mobile phones in use in 1994

Telephone system: high-quality domestic and international telephone, telegraph, and telex services

domestic: NA domestic satellite earth stations

international: 2 buried coaxial cable systems; 4 coaxial submarine cables; satellite earth stations-NA

Eutelsat, NA Intelsat (Atlantic Ocean), and 1 Inmarsat

(Atlantic and Indian Ocean regions); note-Norway shares the Inmarsat earth station with the other Nordic countries (Denmark, Finland, Iceland, and Sweden)

Radio broadcast stations: AM 46, FM 493 (350 private and 143 government), shortwave 0

Radios: 3.3 million (1993 est.)

Television broadcast stations: 54 (repeaters 2,100)

Televisions: 1.5 million (1993 est.)

TRANSPORTATION

Railways:

total: 4,023 km

standard gauge: 4,023 km 1.435-m gauge (2,422 km electrified; 96 km double track) (1996)

Highways:

total: 91,323 km

paved: 65,753 km (including 106 km of expressways)

unpaved: 25,570 km (1996 est.)

Waterways: 1,577 km along west coast; 2.4 m draft vessels maximum

Pipelines: refined products 53 km

Ports and harbors: Bergen, Drammen, Floro, Hammerfest, Harstad, Haugesund, Kristiansand, Larvik, Narvik, Oslo, Porsgrunn, Stavanger, Tromso, Trondheim

Merchant marine:

total: 762 ships (1,000 GRT or over) totaling 21,042,709 GRT/33,839,476 DWT

ships by type: bulk 102, cargo 128, chemical tanker 91, combination bulk 9, combination ore/oil 38, container 18, liquefied gas tanker 91, multi-function large load

carrier 1, oil tanker 145, passenger 13, passenger-cargo 1, refrigerated cargo 13, roll-on/roll-off cargo 52, short-sea passenger 23, vehicle carrier 37

note: the government has created an internal register, the Norwegian International Ship register (NIS), as a subset of the Norwegian register; ships on the NIS

enjoy many benefits of flags of convenience and do not have to be crewed by Norwegians (1997 est.)

Airports: 102 (1997 est.)

Airports-with paved runways:

total: 65

over 3,047 m: 1

2,438 to 3,047 m: 11

1,524 to 2,437 m: 14

914 to 1,523 m: 11

under 914 m: 28 (1997 est.)

Airports-with unpaved runways:

total: 37
914 to 1,523 m: 5
under 914 m: 32 (1997 est.)

Heliports: 1 (1997 est.)

MILITARY

Military branches: Norwegian Army, Royal Norwegian Navy (includes Coast Artillery and Coast Guard), Royal Norwegian Air Force, Home Guard

Military manpower-military age: 20 years of age

Military manpower-availability:
males age 15-49: 1,107,727 (1998 est.)

Military manpower-fit for military service:
males: 921,368 (1998 est.)

Military manpower-reaching military age annually:
males: 27,406 (1998 est.)

Military expenditures-dollar figure: \$3.7 billion (1995)

Military expenditures-percent of GDP: 2.9% (1995)

TRANSNATIONAL ISSUES

Disputes-international: territorial claim in Antarctica (Queen Maud Land); Svalbard is the focus of a maritime boundary dispute in the Barents Sea between Norway and Russia

Illicit drugs: minor transshipment point for drugs shipped via the CIS and Baltic states for the European market; increasing domestic consumption of cannabis and amphetamines

GENERAL OVERVIEW

1. Political system.

Sweden is a Scandinavian country located in Northern Europe. The population of Sweden in 1993 was 8,745,109 inhabitants. The land area of Sweden is roughly the same size of France. Sweden is a constitutional monarchy with a parliamentary form of government. According to the Constitution, all public power derives from the people. Sweden's head of state, the King, has only ceremonial functions. The preeminent branch of the national government is the Parliament, or Riksdagen, which has 349 members in one chamber. The biggest political party is the Social Democratic Party which received 46% of the votes in the 1994 general election.

The Parliament must approve all national taxes, annual budgets and legislation. The decision-making powers of parliament are without limitation, beyond those based on specific rules in the Constitution, such as protection of free speech, the ban on capital punishment, and the independence of the court and State civil service in enforcing laws.

2. Legal system.

The Swedish legal system is accusatorial with a prosecutor representing the state and a defense attorney representing the defendant. However, the majority of crimes and offenses, in particular traffic offenses, are sanctioned by police officers or prosecutors in the form of summary fines.

Primary responsibility for the enforcement of legal rules devolves upon the courts and the various administrative authorities. The general courts enforce civil law and criminal law legislation.

3. History of the criminal justice system.

Swedish legislation is based on a strong domestic tradition of Germanic law, but it has also been influenced by foreign law. Swedish law is based to a considerable extent on written law, while case law plays a smaller though important role. The first penal law in Sweden came in 1734. This penal law was replaced in 1864 with a new penal law that was in turn replaced in 1965.

CRIME

1. Classification of Crimes.

*Legal classification. The Swedish Penal code does not differentiate between crimes and infractions. The classification of crime in the official crime statistics is based on the legal crime definitions given in the Penal Code. However, main groups of crimes are divided into sub-categories. These divisions are not systematic but are guided by general principles. The subdivisions have developed over a long period and have been determined from a pragmatic point of view. It is important to note that the Swedish crime statistics show all crimes reported to the police whether or not they turn out to be "founded" or not after investigation.

*Age of criminal responsibility. The age of criminal responsibility is 15. However, special rules in regards to sanctioning apply until the age of 21. Only if there are special grounds may an offender below the age of 18 be sentenced to imprisonment. Imprisonment for offenders below the age of 18 is uncommon. For offenders aged 18 but not yet 21 the courts may sentence the offender to imprisonment only if there are special grounds regarding the culpability of the crime or other special reasons.

*Drug offenses. According to Swedish law it is illegal to enter the country, to have in possession, or to buy or use narcotics. The use of narcotics was criminalized in 1988. The list of prohibited drugs involve all common types of narcotics, including cannabis, and the number of drugs on the list totals around 170. In an international perspective, Sweden has a very restrictive drug policy.

2. Crime statistics.

*Murder. The Swedish crime statistics include attempts but completed and attempted homicides are also shown separately. The definition of a completed homicide is all criminal cases causing the death of the victim regardless of whether they are charged as murder, manslaughter or assault combined with causing another persons death. In 1992 there were a total of 174 completed criminal homicides. The corresponding figure for 1993 was 173. However, a special analysis of all homicides recorded in 1992 showed that almost one third of the cases appearing in the statistics as completed homicides, in fact, were not. The accurate figure should be around 120 cases. This probably also holds for the 1993 figure. The level of homicide has been fairly constant in Sweden since the mid 1970s, fluctuating between 120 to 140 homicides annually.

*Rape. In 1993 there were 2,153 police recorded crimes of rape; of these 1,608 were completed; the rest were attempts. According to Swedish law a rape is defined as follows; if a person, by violence or by threat involving, or appearing to the threatened person as involving, imminent danger, forces the latter to copulate or have comparable sexual intercourse, he or she shall be sentenced for rape. Penetration of the woman's body is not necessary for a case to constitute a rape. Since 1984 a female can be charged with rape but such cases have been extremely rare.

*Theft. Serious property crimes are defined as burglaries and car thefts. In 1993 there were 155,704 recorded crimes of burglary and of these 20,200 were residential burglaries. Since the mid-1970s the level of recorded burglaries has fluctuated around a level of 130,000 to 150,000 crimes per year although during the three last years, 1991 to 1993, the level has been close to 155,000. The number of recorded car thefts in 1993 was 61,141 and of these 18,300 were attempts. During the 1980s the number of recorded thefts of cars has doubled from 34,301 in 1980 to 69,003 in 1989. However, in the last three years this crime has decreased from roughly 70,000 in 1991 to roughly 61,000 in 1993.

*Drug offenses. In 1993, 40,700 violations of the Narcotic Drugs Act were reported to the police. This figure is 40% higher than in 1990. Due to the method of counting drug offenses and the fact that this is

a crime category highly dependent on the level of police activity, it is difficult to draw any conclusion about the actual amount of crime and or about changes over time.

*Crime regions. Studies of regional crime trends since 1975 show that crime is increasingly concentrated in the big-city areas, and in particular in Stockholm, which is the area with the highest rate of crime. Although crime has increased since 1975 in all Swedish regions the rate of increase is much faster in the big-city regions.

VICTIMS

1. Groups most victimized by crime.

The largest empirical study of victims of crime in Sweden is the Study of Living Conditions (ULF). The study has been carried out annually since the mid 1970s. The result of the ULF Study shows that 7% of those questioned aged 16-74 stated that during the last 12 months (the study relates to the years 1990/91) they were subject to violence or threat of violence; 1% of those questioned stated that their injuries were so serious that they led to a visit to the doctor. The ULF also found that 29% of the people surveyed had suffered a theft in the last year. The results show that three groups are considered more vulnerable than others: (1) young men exposed to street violence, (2) single mothers of young children who are subject to violence in the home, (3) certain professional groups such as police officers, restaurant staff or medical staff who are subject to violence at work.

Regarding fear of crime, 15% of the adult population (16-84 years) stated that at some time during the past year they had refrained from going out in the evening because they were anxious about being assaulted, robbed or molested in some other way. The proportion was greatest among the elderly, among women and among those who live in big cities.

The development trends (from the end of the 1970s up to and including the end of the 1980s) for registered crime statistics and the results of the victim studies show two quite different patterns. While registered crime increased relatively sharply, the proportion of people stating in the victim study that they had been subject to various crimes of violence did not increase. In 1990 and 1991, however, the proportion of persons who, according to the victim study, stated they had been subject to crimes of violence also increased.

More than one fourth (29%) of those questioned stated that they had been subject to some form of the listed crimes of theft or damage during the past year (1990/1991). The results show that over 10% were subject to theft of and/or damage to bicycle, moped or motorcycle, that just under 9% were subject to theft of and/or damage to something in or on a car, that 6% had been subject to car theft and 2%, to theft and/or damage in the home.

The results also show that the risk of being subject to theft and/or damage is much greater in the big cities. Around 40% of those who reside in the big city regions stated that they had been subject to theft and/or damage. Also, more single persons with children had been subject to theft and/or damage. This may largely be explained by the fact that to a large extent they live in high-risk areas (blocks of flats in big cities). Foreign nationals also stated that they were subject to crimes of theft more frequently;

this may also be explained by different dwelling environments. More white-collar than blue-collar workers stated that they had been subject to theft and/or damage.

Again, regarding fear of crime, 22% of those questioned stated that they were anxious about being burgled. Anxiety is more common among women than among men, and among those who live in Stockholm than those who live in the north of Sweden. Those who are anxious about being subject to crimes of violence are also more anxious about being subject to theft and/or damage than others. There is a certain correlation between the results of the victim study and the crime statistics when crimes against property are considered; this was not the case with crimes of violence. Above all, increases may be seen in vehicle-related crimes, car thefts and thefts from and/or damage to items in or on the car both in victim data and the crime statistics.

2. Victims' assistance agencies.

A proposed victims' authority will administrate the new victims' fund and be responsible for supplying information concerning victims of crime. The victim or plaintiff may demand damages from the perpetrator. Compensation to the victim or plaintiff may also be paid by the government. Victims of crime are also entitled to one hour's free legal advice in accordance with the Legal Aid Act. The National Association of Victims' Assistance Agencies was founded in 1988 and the objective is that there should be one agency in each police district. As of 1993 there are 66 local agencies throughout the country. The agencies train support persons and help victims of crime and keep in contact with the municipal social services, social welfare officers, psychiatric clinics, insurance companies, the police, and lock and alarm experts. There are also around 125 women's agencies who work to help and protect women and children that have been subject to ill-treatment or sexual offenses.

3. Role of victim in prosecution and sentencing.

The victim or plaintiff has no actual function within the legal process. The only function of the victim or plaintiff is that of injured party or witness and he or she must not influence the investigation in any other manner.

4. Victims' rights legislation.

In accordance with a recent bill the Government proposed to form a victims' authority. The new authority will take over part of the responsibility of the Criminal Damage Board as regards considering cases for compensation on grounds of crime, known as criminal damage compensation.

According to the Social Services Act, the municipal social services are responsible for ensuring that those who live within the municipality obtain the help they need.

Victims of crime, above all women subject to crimes of violence or sexual offenses by former partners, have in recent years been given opportunities for protection. For example they may have bodyguards or what is known as a security package which consists of a mobile phone and an assault alarm. The prosecutor has also been given powers to impose restrictive orders on individuals who pose a threat to specific women in order to prevent events from being repeated or exacerbated.

POLICE

1. Administration.

The organization of the police system according to organization and administration report for budget year 1992/1993:

The Government and the Ministry of Justice

The National Police Board and The National Forensic Laboratory

County administrative boards (24)

County police commissioners (24)

Police authorities and police areas (117)

The areas of activity of the National Police Board are: (1)The National Police Board's central administrative authority, (2)The National Criminal Investigation Department, and (3)The National Police College. The National Police Board is also the governing authority for the National Forensic Laboratory (SKL).

In its role as a central administrative authority it is the task of the National Police Board to communicate the Government's priorities and guidelines for operation as well as following up and inspecting the police system. The Board should strive for sound methods as well as coordination and rationalization of police work. In its capacity as a central administrative authority, the Board also has the role of service body for the local police organization.

The National Police Board (RPS) manages certain police activities. This applies mainly to serious crime with national or international ramifications.

The management of police activities carried on by RPS is performed by the National Criminal Investigation Department. The National Investigation Department also provides reinforcements for local police organizations; reinforcement of other police authorities is around 75% of the National Investigation Department's operation. It may be a case of providing assistance in investigation work in connection with murder investigations and other serious crimes of violence, drug offenses or organized car theft for export. The National Investigation Department is also responsible for Swedish UN police activities as well as Interpol activities.

The National Forensic Laboratory (SKL) is the central Swedish laboratory for forensic investigations. SKL mainly carries out laboratory investigations when there is suspicion of crime.

The National Police Board is responsible for the activities of the National Police College. The Police College provides basic training of police officers, police management training, advanced courses, contract courses, research and development work.

The Security Police report directly to the National Police Commissioner. The security police gather information on situations that may be important for the external or internal safety of the nation and for combating terrorism.

The local police organization is divided into 117 police authorities or police areas. Beginning with the fiscal year 92/93 the funds of the local police organizations will be distributed between 26 secondary budgets, one for each county (24) as well as one for joint requirements and one for crime investigation activities. The overall responsibility for both activities and finances within the county's police force rests with the county administrative board.

Special areas outside the local organization are the marine police that maintain order and safety at sea. The marine police cooperate with customs and coast guard to guard the frontier and restricted areas. The marine police also assist in rescue assignments. The cost of the operation was SEK 31 millions for fiscal year 92/93.

The activities of the police force as regards aliens consist of basic investigation and exclusion or deportation. Other matters concerning aliens include nationality cases and extension of residence permits. Since 1992 investigations of applications for asylum have been dealt with by the National Immigration Board. Frontier control and airport guarding are, on the other hand, matters for the customs and police.

2. Resources.

*Expenditures. The total police expenditure for budget year 1992/1993 10,281,200,000 crowns. This is the budget for the police force in fiscal year 1992/93 net outcome in million crowns (SEK).

| | |
|--|----------|
| The National Police Board | 348,9 |
| The National Criminal Investigation Department | 205,6 |
| Total National Polive Board | 554,5 |
| The Police College | 0,001 |
| The National Forensic Laboratory | 42,9 |
| Total county budgets | 8,190.6 |
| Joint requirements within the policde force | 1,278 |
| Crime investigation costs | 123,1 |
| Total local police organization | 9,951.7 |
| Extra costs for European Soccer Cup | 34.4 |
| Equipment etc. | 57.6 |
| otal subsidy for the police system | 10,281.2 |

The cost for the Police College in budget year 92/93 amounted to SEK 186 millions. All training is paid for by funds from the local police organization.

*Number of police. On the last day of June 1993, a total of 27,045 persons were employed within the police system, including just under 2,000 trainees. Statistics on recruitment show that in budget year 92/93, 9% of those hired were of foreign origin. For the budget year 93/94 the equivalent proportion is 10%. Previously the proportion had been around 5%. Of the police personnel within the county organization, 15% are women. Of personnel within the National Police Board including the National Investigation Department, 6% are women.

This is the number of persons in the various parts of the police organization in the budget year 93/94. This list also includes trainee police commissioners, trainee police officers and personnel employed with subsidized salaries.

| | |
|--|--------|
| The National Police Board | 352 |
| The National Criminal Investigation Department | 349 |
| The Police College | 200 |
| SKL | 114 |
| The county organization, in total of whom: | 24,647 |
| police personnel | 17,812 |
| other personnel | 6,835 |

3. Technology.

*Availability of police automobiles. Vehicles within the police system are the responsibility of the various county organizations according to the new organization. Therefore there are no central statistics on this. Figures for 1991 show that there was a total of 2,654 vehicles reported within the police system. Of these 1,568 belonged to the uniformed and traffic police and are largely marked vehicles. In addition there are 800 unmarked vehicles belonging to the plain-clothes police as well as just under 300 other unmarked vehicles.

*Electronic equipment. The police system is at present expanding several communication systems. It is impossible to obtain any overall picture of all the technical equipment since it is the responsibility of various county authorities. Certain systems are being expanded centrally, e.g. the communication systems E 80 and RAR (Rational reporting routine). The RAR system is being expanded gradually and in June of 1994 around 20 police authorities were connected to the system.

*Weapons. The weapons available include pistols, tear-gas, sub-machine guns, shotguns, and hunting weapons. There is no information gathered centrally regarding other equipment such as protective vests.

4. Training and qualifications.

The Swedish training of police is carried out by the National Police College in Stockholm. There are basically two careers: one for uniformed police officers and one for criminal investigators. The qualifications for a new police officer recruit includes Swedish citizenship, a high school education, a minimum of one year work experience outside the police, good health and a suitable body for police work, a drivers license, the ability to swim, and having reached the age of 20 by or during the year of application. In August 1994, 5,812 persons applied for police officer training and of these 191 were

accepted, 51 of whom were females.

For a position as a criminal investigator a university degree in law is required. In 1991 700 persons applied to the police commissioner training program and 30 were accepted.

The training for police officer recruits is for three years including 10 months basic training at the police college, followed by 18 months as a trainee at one of the 117 police districts, and concluded with five months final training at the police college.

The training for police commissioner recruits lasts three years and includes theoretical studies at the Police College covering police work, analysis and planning, administration and workplace psychology. It also entails working as a trainee in all areas of the criminal justice system including the police, courts and prosecutors.

5. Discretion.

*Use of force. One of the powers of police officers in accordance with the Police Act, is use of force. A policeman may, to the extent other means are inadequate and when defensible in the circumstances, use force to carry out an action in the course of his duty, if (1) he is faced with violence or threat of violence, (2) someone who is to be detained, arrested or otherwise deprived of his freedom with the support of the law tries to escape or the policeman is otherwise faced with resistance when he is to deprive a person of freedom in this manner (3) it is a question of warding off a punishable act or danger to life, health or valuable property or extensive damage to the environment, (4) a policeman, with the support of the law, is to expel or remove a person from a certain area or space or execute or assist in a personal search or other similar measure in connection with confiscation or other retention of property or in connection with the type of search referred to in the Code of Judicial Procedure, (5) the policeman must in some other manner and with the support of the law gain access to, cordon off, seal, or evacuate a building, room or area, assist someone in the exercise of authority by means of such an action or a similar one or in the case of foreclosure, in accordance with procedure, or (6) the measure, in another case, is unavoidably necessary for maintenance of general order or safety and it is obvious that this cannot be carried out without force(1984:387).

*Stop/apprehend a suspect. Any person, who on probable grounds, is suspected of a crime for which one year's imprisonment or more is prescribed, may be detained if, taking into account the nature of the crime, the situation of the suspect or some other circumstance, there is a risk that he will abscond or otherwise evade legal proceedings, remove evidence or hinder the investigation, or continue his criminal activity. Suspects cannot be detained for crimes for which it is assumed that the suspect will be sentenced to pay a fine, other than in special cases, such as the suspect refusing to give his name, giving a false name or having no residence in the country and where it may be assumed that he might leave the country. An unknown person who it may be assumed is wanted by the police may be taken in for identification. The Code of Judicial Procedure chapter 24 is the source of this information.

*Decision to arrest. When a policeman receives information about a crime that falls under general prosecution, he must submit a report on this to his supervisor as soon as possible. A policeman may grant report concession in certain cases in accordance with rules announced by the Government. This applies in the first place to crimes where the sanctions would be no harsher than fines and the crime is of

an insignificant character.

*Search and seizure. Searches may take place if it may be suspected that a crime has been committed for which one year's imprisonment may be the punishment and objects are to be searched for that are to be confiscated or otherwise used in the investigation. The search is announced by the head of investigation, the prosecutor or the court. A policeman may undertake a search without a decision as above, if there is danger. A policeman may also perform a body search of the suspect if 1) crime has been committed that may lead to imprisonment, or 2) an object may be confiscated which may have significance for the investigation. A body search may take place if it may be assumed that the suspect possesses weapons or other dangerous objects, or in order to confirm his identity. For specific statutory guidelines see the Code of Judicial Procedure, chapter 28.

*Confessions. Confession is never binding. All alleged offenders must stand trial.

6. Accountability.

If there is a complaint about the police, it is reported to a police authority. The matter is investigated not by the police but is transferred to the office of the public prosecutor for investigation. If the matter is not considered to be a crime, it goes back to the police authority where the personnel disciplinary board decides whether disciplinary action is to be taken.

In the Stockholm police district the Section for Internal Investigations (CU), investigates reports that are directed against employees at the police authorities in Stockholm County, Gotland County and the National Police Board. The investigations are led by chief prosecutors at the Regional Prosecuting Authority in Stockholm and the prosecuting authority in Stockholm. The CU also deals with issues concerning suspension and dismissal of employees of the police authorities in Stockholm County; it consists of one chief superintendent, nine superintendents and eight administrative employees.

In 1993 a total of 1,048 reports were recorded against employees of the police authorities in Stockholm County. Of these 162 were reports of ill treatment. During this period just under 40,000 persons were deprived of their freedom in accordance with the investigative routine. Recently the Stockholm police have been trying out a system of citizen witnesses, i.e. laymen who observe work at the police station.

PROSECUTORIAL AND JUDICIAL PROCESS

1. Rights of the accused.

*Rights of the accused at trial. It is the task of the prosecutor to prove that the accused is guilty beyond reasonable doubt. The accused do not need to prove that they are innocent.

There are no jury trials. A decision to prosecute cannot be taken unless the suspect and his counsel has been informed of the suspicion and have had an opportunity to read and comment on the records as long as this can be done without harming the investigation.

The accused are initially tried by a panel of a professional judge, who always is a trained jurist or

lawyer, and three or five lay judges. In higher courts all panels consist of professional judges.

*Assistance to the accused. If necessary the court is required to ensure that the accused is provided with the assistance of a public defense counsel. Such a counsel is appointed by the court. Counsel for the defense must be a trained lawyer and a member of the Swedish Bar Association and is remunerated for his assistance to the defendant out of public funds. However, if the defendant is well off, he or she may be ordered to pay these costs if convicted. The defendant may, if he or she wishes, appoint a private counsel. There is no requirement that private counsel have legal training.

2. Procedures.

*Preparatory procedures for bringing a suspect to trial. The basic prosecutorial and judicial process can be described in the following stages. If there are reasons to believe that a criminal offense under public prosecution has been committed, a pre-trial investigation should be initiated to find out who is reasonably suspected of the crime and if there is sufficient evidence to prosecute him or her. The police or the public prosecutor initiate the pre-trial investigation. During the investigation every fact must be taken into consideration, whether it is in a suspect's favor or against. Normally the police carry out the pre-trial investigation, but, as soon as someone is reasonably suspected of the crime, the prosecutor takes over the case. However, the prosecutor has the right to assume control of the case at any stage in the pre-trial investigation if it is deemed advisable.

*Official who conducts prosecution. When the pre-trial investigation has been completed the public prosecutor decides whether to press charges or not. It is the prosecutor's duty to prosecute everyone who is reasonably suspected of having committed a crime and the prosecutor's judgement is that there is enough evidence to expect the court to find the suspect guilty.

*Alternatives to trial. Exceptions will often be made for juvenile offenders but in these cases, before a waiver of prosecution, the prosecutor is normally required to get in touch with the social welfare authorities and see to it that appropriate action will be taken. Also, for less serious offenses the prosecutor may decide, if the offender agrees to this, that the case will be resolved by a summary fine and not taken to trial. There is no plea bargaining and the accused cannot plead guilty to a lesser offence.

*Proportion of prosecuted cases going to trial. Since there is no plea bargaining, all persons prosecuted for a crime that carries a prison sentence must stand trial.

*Pre-trial incarceration conditions. The public prosecutor decides whether a suspect is to be kept under arrest. Twelve hours is the maximum period for which a suspect can be held without a warrant of arrest. The statutory maximum time for arrest is 48 hours. A request for a pre-trial detention order is normally made the same day as the arrest but in extreme cases this time may be extended to, but no longer than, the third day after the arrest.

Decisions to retain a person in detention are made by the court after hearing the issue at hand; the suspect, his counsel and the prosecutor are all present at this hearing. Normally, following a request for

pre-trial detention, the court should, on the same day hold a session to decide on detention but never more than four days should pass from the day the suspect was arrested. If the court decides to remand someone in custody it shall at the same time set a date on which the person shall be presented to the court.

A person can be detained only if he or she is suspected of an offense punishable by imprisonment for a year or more and it is likely that he or she will either flee or destroy evidence. An exception can be made to these requirements for detention if the suspect is not domiciled in Sweden and there is a risk that he or she will flee the country.

*Bail procedures. Sweden has no bail.

JUDICIAL SYSTEM

1. Administration.

Sweden has a three-tiered hierarchy of general courts; the district courts, the courts of appeal and the Supreme Court. Appeals against judgements of district courts can normally be carried to a court of appeal. Appeals against the decision of courts of appeal can be carried to the Supreme Court. However, the possibility of having an appeal heard in the Supreme Court is subject to special permission, such permission being given only if it is important for enforcement of the law that the appeal should be heard by the Supreme Court.

2. Judges.

*Number of judges. The number of judges in Sweden by level of general court:

| | | |
|-----------------|-----|-------|
| Supreme Court | 59 | (23) |
| Appeal Courts | 386 | (151) |
| District Courts | 609 | (489) |

The figures within brackets refer to the number of judges with a permanent position.

3. Special Courts.

In addition to the general courts there are administrative courts including the Supreme Administrative Court, the Administrative Courts of Appeal, the County Administrative Courts, the Labor Court, the Market Court and the Rent and Leasehold Tribunals.

4. Procedure.

The majority of cases are resolved by summary sentences and fines.

PENALTIES AND SENTENCES

1. Sentencing process.

*Who determines the sentence? The sentence is determined by the court upon a finding of guilt.

*Is there a special sentencing hearing? After the main hearing involving the presentation of the case, questioning of the suspect and witnesses, the court holds private discussions to consider the aggravating and mitigating circumstances. This discussion leads to a final decision on the case. The decision must be based only on facts that come to light at the main hearing. In general the decision and punishment or other sanctions are announced directly after the discussions.

*Which persons have input into the sentencing process? The prosecutor may decide on special measures before the case comes to court; for example, that the social services should deal with the case. In cases where the suspect may be assumed to be mentally disturbed, the court decides whether he should undergo examination by a forensic psychiatrist. If the examination reveals mental disorder, the court may choose to sentence the defendant to psychiatric treatment, with or without special consideration of discharge. Children and young people, addicts and mentally disturbed perpetrators may be handed over for special treatment.

2. Types of Penalties.

*Range of penalties. The Criminal Code lists the punishments and other sanctions a court may prescribe in a sentence. The term "punishment" refers to fines and imprisonment and the term "other consequences" refers mainly to suspended sentences, probation or special treatment.

Imprisonment may be prescribed for a specific period, from 14 days to 10 years. Longer sentences of up to 16 years may be imposed for several crimes. Life imprisonment is usually converted to a specific length of punishment of around 14-16 years.

The sanction is determined on several different bases. The seriousness of the crime, and the age and mental state of the perpetrator are all factors that are important. One general principle is that imprisonment should be avoided as far as possible. Thus, it is not possible in any unified manner to say that the normal punishment for a certain crime is a certain type of sanction; more serious forms of crime lead to more severe punishment.

These are the punishments meted out depending on the severity of the crime:

Conditional release usually takes place now after 2/3 of the sentence has been served. Between 1 July 1983 and 1 July 1993 general conditional release after half the sentence had been served applied.

Persons under 18 may not be sentenced to imprisonment in other than exceptional cases.

Psychiatric treatment is prescribed for crimes for which the sanction must be more severe than a fine and the defendant is suffering from a serious mental disorder.

Probation may be prescribed for crimes for which the sanction must be more severe than a fine.

Probation may be combined with special regulations such as contract care or community service program.

Conditional sentences may be prescribed for crimes for which the sanction must be more severe than a fine. A conditional sentence may be perceived as a conditional concession with a trial period of two years. The main rule now is that this sanction should be combined with a fine. A person who at the time of sentencing is under 21 years may be placed in the care of the social services. This sanction may be combined with a fine.

A person may be sentenced to treatment under the Care of Alcoholics and Drug Abusers Act if the crime would not lead to more severe punishment than one year's imprisonment. The person sentenced must be a drug abuser to the extent that he is a danger to himself or a close relative. Day-fines are calculated on the basis of how serious the crime is and the financial situation of the guilty party. Day-fines are prescribed by number and magnitude. The number must be no less than 30 and no more than 150 or, as joint punishment for several crimes, a maximum of 200. The size of the day-fine varies according to the financial situation of the defendant and varies between 30 SEK and 1,000 SEK.

Monetary fines are set at a minimum of 100 and a maximum of 2,000 SEK. The fine is used primarily for less serious forms of crime, e.g. traffic offenses.

The Prosecutor-General, and the National Police Board decide which crimes lead to on-the-spot fines. The fines are imposed directly by the police and the maximum fine is 1,200 SEK.

Standardized crimes are determined on a very special basis and are used a few times a year (around 20) exclusively for crimes against the Fisheries Ordinance.

An order of summary punishment is a form of fine that is issued by the prosecutor without court proceedings, usually for simpler forms of crime that would lead to a fine or in certain cases six months imprisonment. This sanction requires that the defendant approves the order, i.e. admits to the crime.

The prosecutor may decide not to prosecute a person even though he has committed a crime. This sanction is used primarily for young people (under 18) and in certain cases for drug abusers if they agree to treatment instead. If a person is already under supervision and commits more (minor) crimes, the prosecutor may decide not to prosecute if the sanction would be the same as what has already been imposed.

Forfeiture means that property falls to the state if it relates to profits of crime, tools of crime or objects produced by means of crime, e.g. forged bank notes. Instead of the property, its value may be declared forfeited. Expulsion means that a person who is not a Swedish national is forced to leave the country and is forbidden to return. If the guilty party has caused personal injury or destroyed property, he may be liable to pay damages to the plaintiff. In the case of serious traffic offenses or repeated minor traffic offenses, the guilty party's driving license may be withdrawn. Decisions on withdrawal of driving license are announced by the county administrative court not the district court.

Use of various sanctions in 1993 is shown in the table below. Usually a person brought to court has one sanction imposed on him. In 82% of all court cases in 1993, sanctions were decided on.

| Sanction | Number |
|--------------------------------|--------|
| Prison | 15,872 |
| Psychiatric treatment | 372 |
| Probation | 6,274 |
| with contract care | 620 |
| with community service program | 310 |

| | |
|-------------------------------------|---------|
| Conditional sentence | 11,916 |
| reatment within the social services | 1,480 |
| Fines | 111,560 |
| Day and monetary fings | 35,808 |
| Summary punishment | 75,752 |
| Failure to prosecute | 13,942 |
| Other sanctions | 2,964 |

Total persons santioned or prosecuted 164,380

To this may be added:

| | |
|-------------------|---------|
| On-the-spot fines | 199,144 |
|-------------------|---------|

*Death penalty. The death penalty was abolished in Sweden in 1921 for peace time and in 1973 also for war time (Hoflund 1993 p. 26).

PRISON

1. Description.

*Number of prisons and type. There are 77 Swedish prisons which are divided into national and local prisons. The national prisons mainly receive people with prison sentences of at least one year or who require extra security. The national prisons also include some that are high-security. The local institutions are primarily for those with prison sentences of up to one year although those with longer sentences are often transferred to local prison at the end of their prison term. As of July 1, 1994 the following number of prisons and prison beds applied.

*Number of prison beds.

| Type of prison | Number | Number of prison beds |
|----------------|--------|-----------------------|
| National | 17 | 1,904 |
| Local | 60 | 2,885 |

In addition to these prisons there are also a number of remand prisons.

*Average daily/number of prisoners. The average number of prisoners for the fiscal year 1992/1993 was 3,830.

*Number of annual admissions. The number of annual admissions for the year 1992 was 13,836. As of March 1, 1993, 26.8 % of the prisoners were foreign citizens and 5% were female.

* Actual or estimated proportion of inmates incarcerated. The distribution of the 1992 prisoners by

crime type is shown in the table below:

| Crime | Annual Admissions | As of
March 1, 1993 |
|-----------------|-------------------|------------------------|
| Violent crimes | 2,368 (17.1%) | 843 (19.6%) |
| Sex crimes | 270 (2.0%) | 200 (4.6%) |
| Property crimes | 3,139 (22.7%) | 848 (19.7%) |
| Robbery | 417 (3.0%) | 335 (7.8%) |
| Fraud | 1,139 (8.2%) | 415 (9.7%) |
| Drunken driving | 2,562 (18.5%) | 332 (7.7%) |
| Other traffic | 532 (3.8%) | 70 (1.6%) |
| Drug offenses | 1,298 (9.4%) | 826 (19.2%) |
| Other | 2,111 (15.3%) | 432 (10.0%) |

2. Administration.

*Administration. All Swedish prisons are state prisons.

*Prison guards. The number of prison guards as of March 1, 1994 was 4,126; 23% of whom were female.

*Training and qualifications. The requirement for prison guard recruits is that they either have at least two years of high school education or that they are at least 26 years of age and have four years of work experience. In addition they are required to have at least two years of high school training in English, Swedish and Social Science. Appointment decisions are based on personal interviews.

*Expenditures on the prison system. The total annual expenditures for the prison system were 3,377 million crowns (SEK) for the fiscal year 1992/1993.

*Number of prisoners awaiting trial. The annual average number of prisoners awaiting trial in the fiscal year 1992/1993 was 1,058.

3. Prison conditions.

*Remissions. No information obtained.

*Work/education. No information obtained.

*Amenities/privileges. No information obtained.

EXTRADITION AND TREATIES

*Extradition. A person who is suspected, accused or found guilty of a punishable act by a foreign state and is staying in Sweden may, by government decision, be extradited to that state in accordance with the act 1957:668. According to this act, the crime must have been perpetrated wholly or partly in Sweden. The act must be equivalent to a crime for which Swedish law prescribes at least one year's imprisonment. Swedish nationals may not be extradited, nor may persons who have committed political crimes or who risk being subject to persecution owing to political or religious affiliation.

According to the European Extradition Convention agreements apply between the following countries: Austria, Bulgaria, Cyprus, Czech Republic, Denmark, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Liechtenstein, Luxembourg, The Netherlands, Norway, Poland, Portugal, Slovakia, Spain, Sweden, Switzerland, Turkey, UK, Israel.

Otherwise the following extradition agreements apply between Sweden and Belgium and Sweden and non-European countries: USA, Australia, Canada and areas under the responsibility of the UK.

*Specific conditions. Within the Nordic countries special agreements apply. Swedish citizens may under certain circumstances be extradited to another Nordic country in accordance with act 1959:254 and for political crimes if the act has any equivalent in Swedish law.

In principle these European conventions apply:

The European Extradition Convention of 13 Dec. 1957.

The European Convention of 28 May 1970 on the international legal consequences of criminal sentences.

Transfer of legal proceedings in criminal cases, act 15 May 1972.

GEOGRAPHY

Location: Northern Europe, bordering the Baltic Sea, Gulf of Bothnia, Kattegat, and Skagerrak, between Finland and Norway

Geographic coordinates: 62 00 N, 15 00 E

Map references: Europe

Area:

total: 449,964 sq km

land: 410,928 sq km

water: 39,036 sq km

Area-comparative: slightly larger than California

Land boundaries:

total: 2,205 km

border countries: Finland 586 km, Norway 1,619 km

Coastline: 3,218 km

Maritime claims:

continental shelf: 200-m depth or to the depth of exploitation

exclusive economic zone: agreed boundaries or midlines

territorial sea: 12 nm (adjustments made to return a portion of straits to high seas)

Climate: temperate in south with cold, cloudy winters and cool, partly cloudy summers; subarctic in north

Terrain: mostly flat or gently rolling lowlands; mountains in west

Elevation extremes:

lowest point: Baltic Sea 0 m

highest point: Kebnekaise 2,111 m

Natural resources: zinc, iron ore, lead, copper, silver, timber, uranium, hydropower potential

Land use:

arable land: 7%

permanent crops: 0%

permanent pastures: 1%

forests and woodland: 68%

other: 24% (1993 est.)

Irrigated land: 1,150 sq km (1993 est.)

Natural hazards: ice floes in the surrounding waters, especially in the Gulf of Bothnia, can interfere with maritime traffic

Environment-current issues: acid rain damaging soils and lakes; pollution of the North Sea and the Baltic Sea

Environment-international agreements:

party to: Air Pollution, Air Pollution-Nitrogen Oxides, Air Pollution-Sulphur 85, Air Pollution-Sulphur 94, Air Pollution-Volatile Organic Compounds,

Antarctic-Environmental Protocol, Antarctic Treaty, Biodiversity, Climate Change, Desertification, Endangered Species, Environmental Modification, Hazardous

Wastes, Law of the Sea, Marine Dumping, Nuclear Test Ban, Ozone Layer Protection, Ship Pollution, Tropical Timber 83, Tropical Timber 94, Wetlands
signed, but not ratified: none of the selected agreements

Geography-note: strategic location along Danish Straits linking Baltic and North Seas

PEOPLE

Population: 8,886,738 (July 1998 est.)

Age structure:

0-14 years: 19% (male 852,520; female 808,600)

15-64 years: 64% (male 2,885,783; female 2,792,964)

65 years and over: 17% (male 653,631; female 893,240) (July 1998 est.)

Population growth rate: 0.26% (1998 est.)

Birth rate: 11.7 births/1,000 population (1998 est.)

Death rate: 10.78 deaths/1,000 population (1998 est.)

Net migration rate: 1.69 migrant(s)/1,000 population (1998 est.)

Sex ratio:

at birth: 1.05 male(s)/female

under 15 years: 1.05 male(s)/female

15-64 years: 1.03 male(s)/female

65 years and over: 0.73 male(s)/female (1998 est.)

Infant mortality rate: 3.93 deaths/1,000 live births (1998 est.)

Life expectancy at birth:

total population: 79.19 years

male: 76.52 years

female: 82 years (1998 est.)

Total fertility rate: 1.76 children born/woman (1998 est.)

Nationality:

noun: Swede(s)

adjective: Swedish

Ethnic groups: white, Lapp (Sami), foreign-born or first-generation immigrants 12% (Finns, Yugoslavs, Danes, Norwegians, Greeks, Turks)

Religions: Evangelical Lutheran 94%, Roman Catholic 1.5%, Pentecostal 1%, other 3.5% (1987)

Languages: Swedish

note: small Lapp- and Finnish-speaking minorities

Literacy:

definition: age 15 and over can read and write

total population: 99% (1979 est.)

male: NA%

female: NA%

GOVERNMENT

Country name:

conventional long form: Kingdom of Sweden

conventional short form: Sweden

local long form: Konungariket Sverige

local short form: Sverige

Data code: SW

Government type: constitutional monarchy

National capital: Stockholm

Administrative divisions: 24 provinces (lan, singular and plural); Alvsborgs Lan, Blekinge Lan, Gavleborgs Lan, Goteborgs och Bohus Lan, Gotlands Lan, Hallands Lan, Jamtlands Lan, Jonkopings Lan, Kalmar Lan, Kopparbergs Lan, Kristianstads Lan, Kronobergs Lan, Malmohus Lan, Norrbottens Lan, Orebro Lan, Ostergotlands Lan, Skaraborgs Lan, Sodermanlands Lan, Stockholms Lan, Uppsala Lan, Varmlands Lan, Vasterbottens Lan, Vasternorrlands Lan, Vastmanlands Lan

Independence: 6 June 1523, Gustav VASA was elected king; 6 June 1809, a constitutional monarchy was established

National holiday: Day of the Swedish Flag, 6 June

Constitution: 1 January 1975

Legal system: civil law system influenced by customary law; accepts compulsory ICJ jurisdiction, with reservations

Suffrage: 18 years of age; universal

Executive branch:

chief of state: King CARL XVI GUSTAF (since 19 September 1973); Heir Apparent Princess VICTORIA Ingrid Alice Desiree, daughter of the king (born 14 July 1977)

head of government: Prime Minister Goran PERSSON (since 21 March 1996)

cabinet: Cabinet appointed by the prime minister

elections: the king is a constitutional monarch; prime minister elected by the Parliament; election last held NA March 1996 (next to be held NA 1998)

election results: Goran PERSSON elected prime minister; percent of parliamentary vote - 183 votes out of 349

Legislative branch: unicameral Parliament or Riksdag (349 seats; members are elected by popular vote on a proportional representation basis to serve four-year terms)

elections: last held 18 September 1994 (next to be held 20 September 1998)

election results: percent of vote by party-Social Democrats 45.4%, Moderate Party (Conservatives) 22.3%, Center Party 7.7%, Liberals 7.2%, Left Party 6.2%,

Greens 5.8%, Christian Democrats 4.1%, New Democracy Party 1.2%; seats by party-Social Democrats 162, Moderate Party (Conservatives) 80, Center Party 27, Liberals 26, Left Party 22, Greens 18, Christian Democrats 14; note-the New Democracy Party did not receive a seat because parties require a minimum of 4.0% of votes for a seat in parliament

Judicial branch: Supreme Court or Hogsta Domstolen, judges are appointed by the government (prime minister and cabinet)

Political parties and leaders: Social Democratic Party [Goran PERSSON]; Moderate Party (conservative) [Carl BILDT]; Liberal People's Party [Maria LEISSNER]; Center Party; Christian Democratic Party [Alf SVENSSON]; New Democracy Party [Vivianne FRANZEN]; Left Party or VP (Communist) [Gudrun SCHYMAN]; Communist Workers' Party [Rolf HAGEL]; Green Party [no formal leader but party spokesperson is Briger SCHLAUG]

International organization participation: AfDB, AG (observer), AsDB, Australia Group, BIS, CBSS, CCC, CE, CERN, EAPC, EBRD, ECE, EIB, ESA, EU,

FAO, G- 6, G- 8, G- 9, G-10, IADB, IAEA, IBRD, ICAO, ICC, ICFTU, ICRM, IDA, IEA, IFAD, IFC, IFRCs, IHO, ILO, IMF, IMO, Inmarsat, Intelsat, Interpol, IOC, IOM, ISO, ITU, MINUGUA, MONUA, MTCR, NAM (guest), NC, NEA, NIB, NSG, OECD, OSCE, PCA, PFP, UN, UN Security Council (temporary), UNCTAD, UNESCO, UNHCR, UNIDO, UNIKOM, UNMIBH, UNMOGIP, UNMOP, UNOMIG, UNPREDEP, UNTSO, UPU, WEU (observer), WFTU, WHO, WIPO, WMO, WTrO, ZC

ECONOMY

Economy-overview: Aided by peace and neutrality for the whole twentieth century, Sweden has achieved an enviable standard of living under a mixed system of high-tech capitalism and extensive welfare benefits. It has a modern distribution system, excellent internal and external communications, and a skilled labor force.

Timber, hydropower, and iron ore constitute the resource base of an economy heavily oriented toward foreign trade. Privately owned firms account for about 90% of industrial output, of which the engineering sector accounts for 50% of output and exports. Agriculture accounts for only 2% of GDP and 2% of the jobs. In recent years, however, this extraordinarily favorable picture has been clouded by budgetary difficulties, inflation, high unemployment, and a gradual loss of competitiveness in international markets. To curb the budget deficit and bolster confidence in the economy, the government adopted an adjustment program in November 1994 that aims to eliminate the government budget deficit and to stabilize the debt to GDP ratio. Sweden has harmonized its economic policies with

those of the EU, which it joined at the start of 1995. Sweden has decided not to join the EMU (European Monetary Union). Annual GDP growth should edge up to 2.5% in 1998-99.

GDP: purchasing power parity-\$176.2 billion (1997 est.)

GDP-real growth rate: 2.1% (1997 est.)

GDP-per capita: purchasing power parity-\$19,700 (1997 est.)

GDP-composition by sector:

agriculture: 2%

industry: 27%

services: 71% (1993)

Inflation rate-consumer price index: 2% (1997 est.)

Labor force:

total: 4.552 million (84% unionized, 1992)

by occupation: community, social and personal services 38.3%, mining and manufacturing 21.2%, commerce, hotels, and restaurants 14.1%, banking, insurance

9.0%, communications 7.2%, construction 7.0%, agriculture, fishing, and forestry 3.2% (1991)

Unemployment rate: 6.6% plus about 5% in training programs (1997 est.)

Budget:

revenues: \$109.4 billion

expenditures: \$146.1 billion, including capital expenditures of \$NA (FY95/96)

Industries: iron and steel, precision equipment (bearings, radio and telephone parts, armaments), wood pulp and paper products, processed foods, motor vehicles

Industrial production growth rate: 2.6% (1996)

Electricity-capacity: 35.462 million kW (1995)

Electricity-production: 142.913 billion kWh (1995)

Electricity-consumption per capita: 15,996 kWh (1995)

Agriculture-products: grains, sugar beets, potatoes; meat, milk

Exports:
total value: \$84.5 billion (f.o.b., 1996)
commodities: machinery, motor vehicles, paper products, pulp and wood, iron and steel products, chemicals, petroleum and petroleum products
partners: EU 59.1% (Germany 13.2%, UK 10.2%, Denmark 6.9%, France 5.1%), Norway 8.1%, Finland 4.8%, US 8.0% (1994)

Imports:
total value: \$66.6 billion (c.i.f., 1996)
commodities: machinery, petroleum and petroleum products, chemicals, motor vehicles, foodstuffs, iron and steel, clothing
partners: EU 62.6% (Germany 18.4%, UK 9.5%, Denmark 6.6%, France 5.5%), Finland 6.3%, Norway 6.1%, US 8.5% (1994)

Debt-external: \$66.5 billion (1994)

Economic aid:
donor: ODA, \$1.769 billion (1993)

Currency: 1 Swedish krona (SKr) = 100 oere

Exchange rates: Swedish kronor (SKr) per US\$1-8.0085 (January 1998), 7.6349 (1997), 6.7060 (1996), 7.1333 (1995), 7.7160 (1994), 7.7834 (1993)

Fiscal year: 1 January-31 December (Sweden changed its fiscal year from 1 July - 30 June in 1995)

COMMUNICATIONS

Telephones: 13 million (1996 est.)

Telephone system: excellent domestic and international facilities; automatic system
domestic: coaxial and multiconductor cable carry most voice traffic; parallel microwave radio relay network carries some additional telephone channels
international: 5 submarine coaxial cables; satellite earth stations-1 Intelsat (Atlantic Ocean), 1 Eutelsat, and 1 Inmarsat (Atlantic and Indian Ocean regions); note
- Sweden shares the Inmarsat earth station with the other Nordic countries (Denmark, Finland, Iceland, and Norway)

Radio broadcast stations: AM 5, FM 360 (mostly repeaters), shortwave 0

Radios: 7.272 million (1993 est.)

Television broadcast stations: 880 (mostly repeaters)

Televisions: 3.5 million

TRANSPORTATION

Railways:

total: 11,837 km (includes 1,955 km of privately-owned railways)

standard gauge: 11,837 km 1.435-m gauge (7,317 km electrified and 1,152 km double track) (1996)

Highways:

total: 138,000 km

paved: 105,018 km (including 1,330 km of expressways)

unpaved: 32,982 km (1996 est.)

Waterways: 2,052 km navigable for small steamers and barges

Pipelines: natural gas 84 km

Ports and harbors: Gavle, Goteborg, Halmstad, Helsingborg, Hudiksvall, Kalmar, Karlshamn, Malmo, Solvesborg, Stockholm, Sundsvall

Merchant marine:

total: 164 ships (1,000 GRT or over) totaling 2,036,831 GRT/1,919,367 DWT

ships by type: bulk 7, cargo 33, chemical tanker 27, combination ore/oil 1, liquefied gas tanker 1, oil tanker 29, railcar carrier 1, refrigerated cargo 1, roll-on/roll-off

cargo 41, short-sea passenger 7, specialized tanker 4, vehicle carrier 12 (1997 est.)

Airports: 255 (1997 est.)

Airports-with paved runways:

total: 145

over 3,047 m: 2

2,438 to 3,047 m: 9

1,524 to 2,437 m: 83

914 to 1,523 m: 27

under 914 m: 24 (1997 est.)

Airports-with unpaved runways:

total: 110
914 to 1,523 m: 5
under 914 m: 105 (1997 est.)

Heliports: 1 (1997 est.)

MILITARY

Military branches: Swedish Army, Royal Swedish Navy, Swedish Air Force

Military manpower-military age: 19 years of age

Military manpower-availability:
males age 15-49: 2,088,061 (1998 est.)

Military manpower-fit for military service:
males: 1,827,336 (1998 est.)

Military manpower-reaching military age annually:
males: 52,208 (1998 est.)

Military expenditures-dollar figure: \$5.8 billion (FY94/95)

Military expenditures-percent of GDP: 2.5% (FY94/95)

TRANSNATIONAL ISSUES

Disputes-international: none

Illicit drugs: minor transshipment point for and consumer of narcotics shipped via the CIS and Baltic states; increasing consumer of European amphetamines

Unabomber's Manifesto

The following is full text of the Unabomber's Manifesto.

INTRODUCTION

1. The Industrial Revolution and its consequences have been a disaster for the human race. They have greatly increased the life-expectancy of those of us who live in "advanced" countries, but they have destabilized society, have made life unfulfilling, have subjected human beings to indignities, have led to widespread psychological suffering (in the Third World to physical suffering as well) and have inflicted severe damage on the natural world. The continued development of technology will worsen the situation. It will certainly subject human beings to greater indignities and inflict greater damage on the natural world, it will probably lead to greater social disruption and psychological suffering, and it may lead to increased physical suffering even in "advanced" countries.
2. The industrial-technological system may survive or it may break down. If it survives, it MAY eventually achieve a low level of physical and psychological suffering, but only after passing through a long and very painful period of adjustment and only at the cost of permanently reducing human beings and many other living organisms to engineered products and mere cogs in the social machine. Furthermore, if the system survives, the consequences will be inevitable: There is no way of reforming or modifying the system so as to prevent it from depriving people of dignity and autonomy.
3. If the system breaks down the consequences will still be very painful. But the bigger the system grows the more disastrous the results of its breakdown will be, so if it is to break down it had best break down sooner rather than later.
4. We therefore advocate a revolution against the industrial system. This revolution may or may not make use of violence: it may be sudden or it may be a relatively gradual process spanning a few decades. We can't predict any of that. But we do outline in a very general way the measures that those who hate the industrial system should take in order to prepare the way for a revolution against that form of society. This is not to be a POLITICAL revolution. Its object will be to overthrow not governments but the economic and technological basis of the present society.
5. In this article we give attention to only some of the negative developments that have grown out of the industrial-technological system. Other such developments we mention only briefly or ignore altogether. This does not mean that we regard these other developments as unimportant. For practical reasons we have to confine our discussion to areas that have received insufficient public attention or in which we

have something new to say. For example, since there are well-developed environmental and wilderness movements, we have written very little about environmental degradation or the destruction of wild nature, even though we consider these to be highly important.

THE PSYCHOLOGY OF MODERN LEFTISM

6. Almost everyone will agree that we live in a deeply troubled society. One of the most widespread manifestations of the craziness of our world is leftism, so a discussion of the psychology of leftism can serve as an introduction to the discussion of the problems of modern society in general.

7. But what is leftism? During the first half of the 20th century leftism could have been practically identified with socialism. Today the movement is fragmented and it is not clear who can properly be called a leftist. When we speak of leftists in this article we have in mind mainly socialists, collectivists, "politically correct" types, feminists, gay and disability activists, animal rights activists and the like. But not everyone who is associated with one of these movements is a leftist. What we are trying to get at in discussing leftism is not so much a movement or an ideology as a psychological type, or rather a collection of related types. Thus, what we mean by "leftism" will emerge more clearly in the course of our discussion of leftist psychology (Also, see paragraphs 227-230.)

8. Even so, our conception of leftism will remain a good deal less clear than we would wish, but there doesn't seem to be any remedy for this. All we are trying to do is indicate in a rough and approximate way the two psychological tendencies that we believe are the main driving force of modern leftism. We by no means claim to be telling the **WHOLE** truth about leftist psychology. Also, our discussion is meant to apply to modern leftism only. We leave open the question of the extent to which our discussion could be applied to the leftists of the 19th and early 20th century.

9. The two psychological tendencies that underlie modern leftism we call "feelings of inferiority" and "oversocialization." Feelings of inferiority are characteristic of modern leftism as a whole, while oversocialization is characteristic only of a certain segment of modern leftism; but this segment is highly influential.

FEELINGS OF INFERIORITY

10. By "feelings of inferiority" we mean not only inferiority feelings in the strictest sense but a whole spectrum of related traits: low self-esteem, feelings of powerlessness, depressive tendencies, defeatism, guilt, self-hatred, etc. We argue that modern leftists tend to have such feelings (possibly more or less repressed) and that these feelings are decisive in determining the direction of modern leftism.

11. When someone interprets as derogatory almost anything that is said about him (or about groups with whom he identifies) we conclude that he has inferiority feelings or low self-esteem. This tendency is pronounced among minority rights advocates, whether or not they belong to the minority groups whose rights they defend. They are hypersensitive about the words used to designate minorities. The terms "negro," "oriental," "handicapped" or "chick" for an African, an Asian, a disabled person or a woman originally had no derogatory connotation. "Broad" and "chick" were merely the feminine equivalents of "guy," "dude" or "fellow." The negative connotations have been attached to these terms by the activists themselves. Some animal rights advocates have gone so far as to reject the word "pet" and insist on its replacement by "animal companion." Leftist anthropologists go to great lengths to avoid saying anything about primitive peoples that could conceivably be interpreted as negative. They want to replace the word "primitive" by "nonliterate." They seem almost paranoid about anything that might suggest that any primitive culture is inferior to our own. (We do not mean to imply that primitive cultures ARE inferior to ours. We merely point out the hypersensitivity of leftist anthropologists.)

12. Those who are most sensitive about "politically incorrect" terminology are not the average black ghetto-dweller, Asian immigrant, abused woman or disabled person, but a minority of activists, many of whom do not even belong to any "oppressed" group but come from privileged strata of society. Political correctness has its stronghold among university professors, who have secure employment with comfortable salaries, and the majority of whom are heterosexual, white males from middle-class families.

13. Many leftists have an intense identification with the problems of groups that have an image of being weak (women), defeated (American Indians), repellent (homosexuals), or otherwise inferior. The leftists themselves feel that these groups are inferior. They would never admit it to themselves that they have such feelings, but it is precisely because they do see these groups as inferior that they identify with their problems. (We do not suggest that women, Indians, etc., ARE inferior; we are only making a point about leftist psychology).

14. Feminists are desperately anxious to prove that women are as strong as capable as men. Clearly they are nagged by a fear that women may NOT be as strong and as capable as men.

15. Leftists tend to hate anything that has an image of being strong, good and successful. They hate America, they hate Western civilization, they hate white males, they hate rationality. The reasons that leftists give for hating the West, etc. clearly do not correspond with their real motives. They SAY they hate the West because it is warlike, imperialistic, sexist, ethnocentric and so forth, but where these same faults appear in socialist countries or in primitive cultures, the leftist finds excuses for them, or at best he GRUDGINGLY admits that they exist; whereas he ENTHUSIASTICALLY points out (and often greatly exaggerates) these faults where they appear in Western civilization. Thus it is clear that these faults are not the leftist's real motive for hating America and the West. He hates America and the West because they are strong and successful.

16. Words like "self-confidence," "self-reliance," "initiative", "enterprise," "optimism," etc. play little

role in the liberal and leftist vocabulary. The leftist is anti-individualistic, pro-collectivist. He wants society to solve everyone's needs for them, take care of them. He is not the sort of person who has an inner sense of confidence in his own ability to solve his own problems and satisfy his own needs. The leftist is antagonistic to the concept of competition because, deep inside, he feels like a loser.

17. Art forms that appeal to modern leftist intellectuals tend to focus on sordidness, defeat and despair, or else they take an orgiastic tone, throwing off rational control as if there were no hope of accomplishing anything through rational calculation and all that was left was to immerse oneself in the sensations of the moment.

18. Modern leftist philosophers tend to dismiss reason, science, objective reality and to insist that everything is culturally relative. It is true that one can ask serious questions about the foundations of scientific knowledge and about how, if at all, the concept of objective reality can be defined. But it is obvious that modern leftist philosophers are not simply cool-headed logicians systematically analyzing the foundations of knowledge. They are deeply involved emotionally in their attack on truth and reality. They attack these concepts because of their own psychological needs. For one thing, their attack is an outlet for hostility, and, to the extent that it is successful, it satisfies the drive for power. More importantly, the leftist hates science and rationality because they classify certain beliefs as true (i.e., successful, superior) and other beliefs as false (i.e. failed, inferior). The leftist's feelings of inferiority run so deep that he cannot tolerate any classification of some things as successful or superior and other things as failed or inferior. This also underlies the rejection by many leftists of the concept of mental illness and of the utility of IQ tests. Leftists are antagonistic to genetic explanations of human abilities or behavior because such explanations tend to make some persons appear superior or inferior to others. Leftists prefer to give society the credit or blame for an individual's ability or lack of it. Thus if a person is "inferior" it is not his fault, but society's, because he has not been brought up properly.

19. The leftist is not typically the kind of person whose feelings of inferiority make him a braggart, an egotist, a bully, a self-promoter, a ruthless competitor. This kind of person has not wholly lost faith in himself. He has a deficit in his sense of power and self-worth, but he can still conceive of himself as having the capacity to be strong, and his efforts to make himself strong produce his unpleasant behavior. [1] But the leftist is too far gone for that. His feelings of inferiority are so ingrained that he cannot conceive of himself as individually strong and valuable. Hence the collectivism of the leftist. He can feel strong only as a member of a large organization or a mass movement with which he identifies himself.

20. Notice the masochistic tendency of leftist tactics. Leftists protest by lying down in front of vehicles, they intentionally provoke police or racists to abuse them, etc. These tactics may often be effective, but many leftists use them not as a means to an end but because they PREFER masochistic tactics. Self-hatred is a leftist trait.

21. Leftists may claim that their activism is motivated by compassion or by moral principle, and moral principle does play a role for the leftist of the oversocialized type. But compassion and moral principle cannot be the main motives for leftist activism. Hostility is too prominent a component of leftist

behavior; so is the drive for power. Moreover, much leftist behavior is not rationally calculated to be of benefit to the people whom the leftists claim to be trying to help. For example, if one believes that affirmative action is good for black people, does it make sense to demand affirmative action in hostile or dogmatic terms? Obviously it would be more productive to take a diplomatic and conciliatory approach that would make at least verbal and symbolic concessions to white people who think that affirmative action discriminates against them. But leftist activists do not take such an approach because it would not satisfy their emotional needs. Helping black people is not their real goal. Instead, race problems serve as an excuse for them to express their own hostility and frustrated need for power. In doing so they actually harm black people, because the activists' hostile attitude toward the white majority tends to intensify race hatred.

22. If our society had no social problems at all, the leftists would have to INVENT problems in order to provide themselves with an excuse for making a fuss.

23. We emphasize that the foregoing does not pretend to be an accurate description of everyone who might be considered a leftist. It is only a rough indication of a general tendency of leftism.

OVERSOCIALIZATION

24. Psychologists use the term "socialization" to designate the process by which children are trained to think and act as society demands. A person is said to be well socialized if he believes in and obeys the moral code of his society and fits in well as a functioning part of that society. It may seem senseless to say that many leftists are over-socialized, since the leftist is perceived as a rebel. Nevertheless, the position can be defended. Many leftists are not such rebels as they seem.

25. The moral code of our society is so demanding that no one can think, feel and act in a completely moral way. For example, we are not supposed to hate anyone, yet almost everyone hates somebody at some time or other, whether he admits it to himself or not. Some people are so highly socialized that the attempt to think, feel and act morally imposes a severe burden on them. In order to avoid feelings of guilt, they continually have to deceive themselves about their own motives and find moral explanations for feelings and actions that in reality have a non-moral origin. We use the term "oversocialized" to describe such people. [2]

26. Oversocialization can lead to low self-esteem, a sense of powerlessness, defeatism, guilt, etc. One of the most important means by which our society socializes children is by making them feel ashamed of behavior or speech that is contrary to society's expectations. If this is overdone, or if a particular child is especially susceptible to such feelings, he ends by feeling ashamed of HIMSELF. Moreover the thought and the behavior of the oversocialized person are more restricted by society's expectations than are those of the lightly socialized person. The majority of people engage in a significant amount of naughty behavior. They lie, they commit petty thefts, they break traffic laws, they goof off at work, they hate

someone, they say spiteful things or they use some underhanded trick to get ahead of the other guy. The oversocialized person cannot do these things, or if he does do them he generates in himself a sense of shame and self-hatred. The oversocialized person cannot even experience, without guilt, thoughts or feelings that are contrary to the accepted morality; he cannot think "unclean" thoughts. And socialization is not just a matter of morality; we are socialized to conform to many norms of behavior that do not fall under the heading of morality. Thus the oversocialized person is kept on a psychological leash and spends his life running on rails that society has laid down for him. In many oversocialized people this results in a sense of constraint and powerlessness that can be a severe hardship. We suggest that oversocialization is among the more serious cruelties that human beings inflict on one another.

27. We argue that a very important and influential segment of the modern left is oversocialized and that their oversocialization is of great importance in determining the direction of modern leftism. Leftists of the oversocialized type tend to be intellectuals or members of the upper-middle class. Notice that university intellectuals (3) constitute the most highly socialized segment of our society and also the most left-wing segment.

28. The leftist of the oversocialized type tries to get off his psychological leash and assert his autonomy by rebelling. But usually he is not strong enough to rebel against the most basic values of society. Generally speaking, the goals of today's leftists are NOT in conflict with the accepted morality. On the contrary, the left takes an accepted moral principle, adopts it as its own, and then accuses mainstream society of violating that principle. Examples: racial equality, equality of the sexes, helping poor people, peace as opposed to war, nonviolence generally, freedom of expression, kindness to animals. More fundamentally, the duty of the individual to serve society and the duty of society to take care of the individual. All these have been deeply rooted values of our society (or at least of its middle and upper classes (4) for a long time. These values are explicitly or implicitly expressed or presupposed in most of the material presented to us by the mainstream communications media and the educational system. Leftists, especially those of the oversocialized type, usually do not rebel against these principles but justify their hostility to society by claiming (with some degree of truth) that society is not living up to these principles.

29. Here is an illustration of the way in which the oversocialized leftist shows his real attachment to the conventional attitudes of our society while pretending to be in rebellion against it. Many leftists push for affirmative action, for moving black people into high-prestige jobs, for improved education in black schools and more money for such schools; the way of life of the black "underclass" they regard as a social disgrace. They want to integrate the black man into the system, make him a business executive, a lawyer, a scientist just like upper-middle-class white people. The leftists will reply that the last thing they want is to make the black man into a copy of the white man; instead, they want to preserve African American culture. But in what does this preservation of African American culture consist? It can hardly consist in anything more than eating black-style food, listening to black-style music, wearing black-style clothing and going to a black-style church or mosque. In other words, it can express itself only in superficial matters. In all ESSENTIAL respects more leftists of the oversocialized type want to make the black man conform to white, middle-class ideals. They want to make him study technical subjects, become an executive or a scientist, spend his life climbing the status ladder to prove that black people

are as good as white. They want to make black fathers "responsible." they want black gangs to become nonviolent, etc. But these are exactly the values of the industrial-technological system. The system couldn't care less what kind of music a man listens to, what kind of clothes he wears or what religion he believes in as long as he studies in school, holds a respectable job, climbs the status ladder, is a "responsible" parent, is nonviolent and so forth. In effect, however much he may deny it, the oversocialized leftist wants to integrate the black man into the system and make him adopt its values.

30. We certainly do not claim that leftists, even of the oversocialized type, NEVER rebel against the fundamental values of our society. Clearly they sometimes do. Some oversocialized leftists have gone so far as to rebel against one of modern society's most important principles by engaging in physical violence. By their own account, violence is for them a form of "liberation." In other words, by committing violence they break through the psychological restraints that have been trained into them. Because they are oversocialized these restraints have been more confining for them than for others; hence their need to break free of them. But they usually justify their rebellion in terms of mainstream values. If they engage in violence they claim to be fighting against racism or the like.

31. We realize that many objections could be raised to the foregoing thumb-nail sketch of leftist psychology. The real situation is complex, and anything like a complete description of it would take several volumes even if the necessary data were available. We claim only to have indicated very roughly the two most important tendencies in the psychology of modern leftism.

32. The problems of the leftist are indicative of the problems of our society as a whole. Low self-esteem, depressive tendencies and defeatism are not restricted to the left. Though they are especially noticeable in the left, they are widespread in our society. And today's society tries to socialize us to a greater extent than any previous society. We are even told by experts how to eat, how to exercise, how to make love, how to raise our kids and so forth.

THE POWER PROCESS

33. Human beings have a need (probably based in biology) for something that we will call the "power process." This is closely related to the need for power (which is widely recognized) but is not quite the same thing. The power process has four elements. The three most clear-cut of these we call goal, effort and attainment of goal. (Everyone needs to have goals whose attainment requires effort, and needs to succeed in attaining at least some of his goals.) The fourth element is more difficult to define and may not be necessary for everyone. We call it autonomy and will discuss it later (paragraphs 42-44).

34. Consider the hypothetical case of a man who can have anything he wants just by wishing for it. Such a man has power, but he will develop serious psychological problems. At first he will have a lot of fun, but by and by he will become acutely bored and demoralized. Eventually he may become clinically depressed. History shows that leisured aristocracies tend to become decadent. This is not true of fighting

aristocracies that have to struggle to maintain their power. But leisured, secure aristocracies that have no need to exert themselves usually become bored, hedonistic and demoralized, even though they have power. This shows that power is not enough. One must have goals toward which to exercise one's power.

35. Everyone has goals; if nothing else, to obtain the physical necessities of life: food, water and whatever clothing and shelter are made necessary by the climate. But the leisured aristocrat obtains these things without effort. Hence his boredom and demoralization.

36. Nonattainment of important goals results in death if the goals are physical necessities, and in frustration if nonattainment of the goals is compatible with survival. Consistent failure to attain goals throughout life results in defeatism, low self-esteem or depression.

37. Thus, in order to avoid serious psychological problems, a human being needs goals whose attainment requires effort, and he must have a reasonable rate of success in attaining his goals.

SURROGATE ACTIVITIES

38. But not every leisured aristocrat becomes bored and demoralized. For example, the emperor Hirohito, instead of sinking into decadent hedonism, devoted himself to marine biology, a field in which he became distinguished. When people do not have to exert themselves to satisfy their physical needs they often set up artificial goals for themselves. In many cases they then pursue these goals with the same energy and emotional involvement that they otherwise would have put into the search for physical necessities. Thus the aristocrats of the Roman Empire had their literary pretensions; many European aristocrats a few centuries ago invested tremendous time and energy in hunting, though they certainly didn't need the meat; other aristocracies have competed for status through elaborate displays of wealth; and a few aristocrats, like Hirohito, have turned to science.

39. We use the term "surrogate activity" to designate an activity that is directed toward an artificial goal that people set up for themselves merely in order to have some goal to work toward, or let us say, merely for the sake of the "fulfillment" that they get from pursuing the goal. Here is a rule of thumb for the identification of surrogate activities. Given a person who devotes much time and energy to the pursuit of goal X, ask yourself this: If he had to devote most of his time and energy to satisfying his biological needs, and if that effort required him to use his physical and mental facilities in a varied and interesting way, would he feel seriously deprived because he did not attain goal X? If the answer is no, then the person's pursuit of a goal X is a surrogate activity. Hirohito's studies in marine biology clearly constituted a surrogate activity, since it is pretty certain that if Hirohito had had to spend his time working at interesting non-scientific tasks in order to obtain the necessities of life, he would not have felt deprived because he didn't know all about the anatomy and life-cycles of marine animals. On the other hand the pursuit of sex and love (for example) is not a surrogate activity, because most people,

even if their existence were otherwise satisfactory, would feel deprived if they passed their lives without ever having a relationship with a member of the opposite sex. (But pursuit of an excessive amount of sex, more than one really needs, can be a surrogate activity.)

40. In modern industrial society only minimal effort is necessary to satisfy one's physical needs. It is enough to go through a training program to acquire some petty technical skill, then come to work on time and exert very modest effort needed to hold a job. The only requirements are a moderate amount of intelligence, and most of all, simple OBEDIENCE. If one has those, society takes care of one from cradle to grave. (Yes, there is an underclass that cannot take physical necessities for granted, but we are speaking here of mainstream society.) Thus it is not surprising that modern society is full of surrogate activities. These include scientific work, athletic achievement, humanitarian work, artistic and literary creation, climbing the corporate ladder, acquisition of money and material goods far beyond the point at which they cease to give any additional physical satisfaction, and social activism when it addresses issues that are not important for the activist personally, as in the case of white activists who work for the rights of nonwhite minorities. These are not always pure surrogate activities, since for many people they may be motivated in part by needs other than the need to have some goal to pursue. Scientific work may be motivated in part by a drive for prestige, artistic creation by a need to express feelings, militant social activism by hostility. But for most people who pursue them, these activities are in large part surrogate activities. For example, the majority of scientists will probably agree that the "fulfillment" they get from their work is more important than the money and prestige they earn.

41. For many if not most people, surrogate activities are less satisfying than the pursuit of real goals (that is, goals that people would want to attain even if their need for the power process were already fulfilled). One indication of this is the fact that, in many or most cases, people who are deeply involved in surrogate activities are never satisfied, never at rest. Thus the money-maker constantly strives for more and more wealth. The scientist no sooner solves one problem than he moves on to the next. The long-distance runner drives himself to run always farther and faster. Many people who pursue surrogate activities will say that they get far more fulfillment from these activities than they do from the "mundane" business of satisfying their biological needs, but that it is because in our society the effort needed to satisfy the biological needs has been reduced to triviality. More importantly, in our society people do not satisfy their biological needs AUTONOMOUSLY but by functioning as parts of an immense social machine. In contrast, people generally have a great deal of autonomy in pursuing their surrogate activities. have a great deal of autonomy in pursuing their surrogate activities.

AUTONOMY

42. Autonomy as a part of the power process may not be necessary for every individual. But most people need a greater or lesser degree of autonomy in working toward their goals. Their efforts must be undertaken on their own initiative and must be under their own direction and control. Yet most people do not have to exert this initiative, direction and control as single individuals. It is usually enough to act as a member of a SMALL group. Thus if half a dozen people discuss a goal among themselves and

make a successful joint effort to attain that goal, their need for the power process will be served. But if they work under rigid orders handed down from above that leave them no room for autonomous decision and initiative, then their need for the power process will not be served. The same is true when decisions are made on a collective bases if the group making the collective decision is so large that the role of each individual is insignificant [5]

43. It is true that some individuals seem to have little need for autonomy. Either their drive for power is weak or they satisfy it by identifying themselves with some powerful organization to which they belong. And then there are unthinking, animal types who seem to be satisfied with a purely physical sense of power (the good combat soldier, who gets his sense of power by developing fighting skills that he is quite content to use in blind obedience to his superiors).

44. But for most people it is through the power process—having a goal, making an AUTONOMOUS effort and attaining t the goal—that self-esteem, self-confidence and a sense of power are acquired. When one does not have adequate opportunity to go throughout the power process the consequences are (depending on the individual and on the way the power process is disrupted) boredom, demoralization, low self-esteem, inferiority feelings, defeatism, depression, anxiety, guilt, frustration, hostility, spouse or child abuse, insatiable hedonism, abnormal sexual behavior, sleep disorders, eating disorders, etc. [6]

SOURCES OF SOCIAL PROBLEMS

45. Any of the foregoing symptoms can occur in any society, but in modern industrial society they are present on a massive scale. We aren't the first to mention that the world today seems to be going crazy. This sort of thing is not normal for human societies. There is good reason to believe that primitive man suffered from less stress and frustration and was better satisfied with his way of life than modern man is. It is true that not all was sweetness and light in primitive societies. Abuse of women and common among the Australian aborigines, transexuality was fairly common among some of the American Indian tribes. But it does appear that GENERALLY SPEAKING the kinds of problems that we have listed in the preceding paragraph were far less common among primitive peoples than they are in modern society.

46. We attribute the social and psychological problems of modern society to the fact that that society requires people to live under conditions radically different from those under which the human race evolved and to behave in ways that conflict with the patterns of behavior that the human race developed while living under the earlier conditions. It is clear from what we have already written that we consider lack of opportunity to properly experience the power process as the most important of the abnormal conditions to which modern society subjects people. But it is not the only one. Before dealing with disruption of the power process as a source of social problems we will discuss some of the other sources.

47. Among the abnormal conditions present in modern industrial society are excessive density of population, isolation of man from nature, excessive rapidity of social change and the break-down of

natural small-scale communities such as the extended family, the village or the tribe.

48. It is well known that crowding increases stress and aggression. The degree of crowding that exists today and the isolation of man from nature are consequences of technological progress. All pre-industrial societies were predominantly rural. The industrial Revolution vastly increased the size of cities and the proportion of the population that lives in them, and modern agricultural technology has made it possible for the Earth to support a far denser population than it ever did before. (Also, technology exacerbates the effects of crowding because it puts increased disruptive powers in people's hands. For example, a variety of noise-making devices: power mowers, radios, motorcycles, etc. If the use of these devices is unrestricted, people who want peace and quiet are frustrated by the noise. If their use is restricted, people who use the devices are frustrated by the regulations... But if these machines had never been invented there would have been no conflict and no frustration generated by them.)

49. For primitive societies the natural world (which usually changes only slowly) provided a stable framework and therefore a sense of security. In the modern world it is human society that dominates nature rather than the other way around, and modern society changes very rapidly owing to technological change. Thus there is no stable framework.

50. The conservatives are fools: They whine about the decay of traditional values, yet they enthusiastically support technological progress and economic growth. Apparently it never occurs to them that you can't make rapid, drastic changes in the technology and the economy of a society without causing rapid changes in all other aspects of the society as well, and that such rapid changes inevitably break down traditional values.

51. The breakdown of traditional values to some extent implies the breakdown of the bonds that hold together traditional small-scale social groups. The disintegration of small-scale social groups is also promoted by the fact that modern conditions often require or tempt individuals to move to new locations, separating themselves from their communities. Beyond that, a technological society HAS TO weaken family ties and local communities if it is to function efficiently. In modern society an individual's loyalty must be first to the system and only secondarily to a small-scale community, because if the internal loyalties of small-scale communities were stronger than loyalty to the system, such communities would pursue their own advantage at the expense of the system.

52. Suppose that a public official or a corporation executive appoints his cousin, his friend or his co-religionist to a position rather than appointing the person best qualified for the job. He has permitted personal loyalty to supersede his loyalty to the system, and that is "nepotism" or "discrimination," both of which are terrible sins in modern society. Would-be industrial societies that have done a poor job of subordinating personal or local loyalties to loyalty to the system are usually very inefficient. (Look at Latin America.) Thus an advanced industrial society can tolerate only those small-scale communities that are emasculated, tamed and made into tools of the system. [7]

53. Crowding, rapid change and the breakdown of communities have been widely recognized as sources

of social problems. but we do not believe they are enough to account for the extent of the problems that are seen today.

54. A few pre-industrial cities were very large and crowded, yet their inhabitants do not seem to have suffered from psychological problems to the same extent as modern man. In America today there still are uncrowded rural areas, and we find there the same problems as in urban areas, though the problems tend to be less acute in the rural areas. Thus crowding does not seem to be the decisive factor.

55. On the growing edge of the American frontier during the 19th century, the mobility of the population probably broke down extended families and small-scale social groups to at least the same extent as these are broken down today. In fact, many nuclear families lived by choice in such isolation, having no neighbors within several miles, that they belonged to no community at all, yet they do not seem to have developed problems as a result.

56. Furthermore, change in American frontier society was very rapid and deep. A man might be born and raised in a log cabin, outside the reach of law and order and fed largely on wild meat; and by the time he arrived at old age he might be working at a regular job and living in an ordered community with effective law enforcement. This was a deeper change than that which typically occurs in the life of a modern individual, yet it does not seem to have led to psychological problems. In fact, 19th century American society had an optimistic and self-confident tone, quite unlike that of today's society. [8]

57. The difference, we argue, is that modern man has the sense (largely justified) that change is IMPOSED on him, whereas the 19th century frontiersman had the sense (also largely justified) that he created change himself, by his own choice. Thus a pioneer settled on a piece of land of his own choosing and made it into a farm through his own effort. In those days an entire county might have only a couple of hundred inhabitants and was a far more isolated and autonomous entity than a modern county is. Hence the pioneer farmer participated as a member of a relatively small group in the creation of a new, ordered community. One may well question whether the creation of this community was an improvement, but at any rate it satisfied the pioneer's need for the power process.

58. It would be possible to give other examples of societies in which there has been rapid change and/or lack of close community ties without the kind of massive behavioral aberration that is seen in today's industrial society. We contend that the most important cause of social and psychological problems in modern society is the fact that people have insufficient opportunity to go through the power process in a normal way. We don't mean to say that modern society is the only one in which the power process has been disrupted. Probably most if not all civilized societies have interfered with the power process to a greater or lesser extent. But in modern industrial society the problem has become particularly acute. Leftism, at least in its recent (mid-to-late -20th century) form, is in part a symptom of deprivation with respect to the power process.

DISRUPTION OF THE POWER PROCESS IN MODERN SOCIETY

59. We divide human drives into three groups: (1) those drives that can be satisfied with minimal effort; (2) those that can be satisfied but only at the cost of serious effort; (3) those that cannot be adequately satisfied no matter how much effort one makes. The power process is the process of satisfying the drives of the second group. The more drives there are in the third group, the more there is frustration, anger, eventually defeatism, depression, etc.

60. In modern industrial society natural human drives tend to be pushed into the first and third groups, and the second group tends to consist increasingly of artificially created drives.

61. In primitive societies, physical necessities generally fall into group 2: They can be obtained, but only at the cost of serious effort. But modern society tends to guaranty the physical necessities to everyone [9] in exchange for only minimal effort, hence physical needs are pushed into group 1. (There may be disagreement about whether the effort needed to hold a job is "minimal"; but usually, in lower- to middle-level jobs, whatever effort is required is merely that of obedience. You sit or stand where you are told to sit or stand and do what you are told to do in the way you are told to do it. Seldom do you have to exert yourself seriously, and in any case you have hardly any autonomy in work, so that the need for the power process is not well served.)

62. Social needs, such as sex, love and status, often remain in group 2 in modern society, depending on the situation of the individual. [10] But, except for people who have a particularly strong drive for status, the effort required to fulfill the social drives is insufficient to satisfy adequately the need for the power process.

63. So certain artificial needs have been created that fall into group 2, hence serve the need for the power process. Advertising and marketing techniques have been developed that make many people feel they need things that their grandparents never desired or even dreamed of. It requires serious effort to earn enough money to satisfy these artificial needs, hence they fall into group 2. (But see paragraphs 80-82.) Modern man must satisfy his need for the power process largely through pursuit of the artificial needs created by the advertising and marketing industry [11], and through surrogate activities.

64. It seems that for many people, maybe the majority, these artificial forms of the power process are insufficient. A theme that appears repeatedly in the writings of the social critics of the second half of the 20th century is the sense of purposelessness that afflicts many people in modern society. (This purposelessness is often called by other names such as "anomic" or "middle-class vacuity.") We suggest that the so-called "identity crisis" is actually a search for a sense of purpose, often for commitment to a suitable surrogate activity. It may be that existentialism is in large part a response to the purposelessness of modern life. [12] Very widespread in modern society is the search for "fulfillment." But we think that for the majority of people an activity whose main goal is fulfillment (that is, a surrogate activity) does not bring completely satisfactory fulfillment. In other words, it does not fully satisfy the need for the power process. (See paragraph 41.) That need can be fully satisfied only through activities that have

some external goal, such as physical necessities, sex, love, status, revenge, etc.

65. Moreover, where goals are pursued through earning money, climbing the status ladder or functioning as part of the system in some other way, most people are not in a position to pursue their goals AUTONOMOUSLY. Most workers are someone else's employee as, as we pointed out in paragraph 61, must spend their days doing what they are told to do in the way they are told to do it. Even most people who are in business for themselves have only limited autonomy. It is a chronic complaint of small-business persons and entrepreneurs that their hands are tied by excessive government regulation. Some of these regulations are doubtless unnecessary, but for the most part government regulations are essential and inevitable parts of our extremely complex society. A large portion of small business today operates on the franchise system. It was reported in the Wall Street Journal a few years ago that many of the franchise-granting companies require applicants for franchises to take a personality test that is designed to EXCLUDE those who have creativity and initiative, because such persons are not sufficiently docile to go along obediently with the franchise system. This excludes from small business many of the people who most need autonomy.

66. Today people live more by virtue of what the system does FOR them or TO them than by virtue of what they do for themselves. And what they do for themselves is done more and more along channels laid down by the system. Opportunities tend to be those that the system provides, the opportunities must be exploited in accord with the rules and regulations [13], and techniques prescribed by experts must be followed if there is to be a chance of success.

67. Thus the power process is disrupted in our society through a deficiency of real goals and a deficiency of autonomy in pursuit of goals. But it is also disrupted because of those human drives that fall into group 3: the drives that one cannot adequately satisfy no matter how much effort one makes. One of these drives is the need for security. Our lives depend on decisions made by other people; we have no control over these decisions and usually we do not even know the people who make them. ("We live in a world in which relatively few people - maybe 500 or 1,00 - make the important decisions" - Philip B. Heymann of Harvard Law School, quoted by Anthony Lewis, New York Times, April 21, 1995.) Our lives depend on whether safety standards at a nuclear power plant are properly maintained; on how much pesticide is allowed to get into our food or how much pollution into our air; on how skillful (or incompetent) our doctor is; whether we lose or get a job may depend on decisions made by government economists or corporation executives; and so forth. Most individuals are not in a position to secure themselves against these threats to more [than] a very limited extent. The individual's search for security is therefore frustrated, which leads to a sense of powerlessness.

68. It may be objected that primitive man is physically less secure than modern man, as is shown by his shorter life expectancy; hence modern man suffers from less, not more than the amount of insecurity that is normal for human beings. but psychological security does not closely correspond with physical security. What makes us FEEL secure is not so much objective security as a sense of confidence in our ability to take care of ourselves. Primitive man, threatened by a fierce animal or by hunger, can fight in self-defense or travel in search of food. He has no certainty of success in these efforts, but he is by no means helpless against the things that threaten him. The modern individual on the other hand is

threatened by many things against which he is helpless; nuclear accidents, carcinogens in food, environmental pollution, war, increasing taxes, invasion of his privacy by large organizations, nationwide social or economic phenomena that may disrupt his way of life.

69. It is true that primitive man is powerless against some of the things that threaten him; disease for example. But he can accept the risk of disease stoically. It is part of the nature of things, it is no one's fault, unless is the fault of some imaginary, impersonal demon. But threats to the modern individual tend to be MAN-MADE. They are not the results of chance but are IMPOSED on him by other persons whose decisions he, as an individual, is unable to influence. Consequently he feels frustrated, humiliated and angry.

70. Thus primitive man for the most part has his security in his own hands (either as an individual or as a member of a SMALL group) whereas the security of modern man is in the hands of persons or organizations that are too remote or too large for him to be able personally to influence them. So modern man's drive for security tends to fall into groups 1 and 3; in some areas (food, shelter, etc.) his security is assured at the cost of only trivial effort, whereas in other areas he CANNOT attain security. (The foregoing greatly simplifies the real situation, but it does indicate in a rough, general way how the condition of modern man differs from that of primitive man.)

71. People have many transitory drives or impulses that are necessary frustrated in modern life, hence fall into group 3. One may become angry, but modern society cannot permit fighting. In many situations it does not even permit verbal aggression. When going somewhere one may be in a hurry, or one may be in a mood to travel slowly, but one generally has no choice but to move with the flow of traffic and obey the traffic signals. One may want to do one's work in a different way, but usually one can work only according to the rules laid down by one's employer. In many other ways as well, modern man is strapped down by a network of rules and regulations (explicit or implicit) that frustrate many of his impulses and thus interfere with the power process. Most of these regulations cannot be disposed with, because they are necessary for the functioning of industrial society.

72. Modern society is in certain respects extremely permissive. In matters that are irrelevant to the functioning of the system we can generally do what we please. We can believe in any religion we like (as long as it does not encourage behavior that is dangerous to the system). We can go to bed with anyone we like (as long as we practice "safe sex"). We can do anything we like as long as it is UNIMPORTANT. But in all IMPORTANT matters the system tends increasingly to regulate our behavior.

73. Behavior is regulated not only through explicit rules and not only by the government. Control is often exercised through indirect coercion or through psychological pressure or manipulation, and by organizations other than the government, or by the system as a whole. Most large organizations use some form of propaganda [14] to manipulate public attitudes or behavior. Propaganda is not limited to "commercials" and advertisements, and sometimes it is not even consciously intended as propaganda by the people who make it. For instance, the content of entertainment programming is a powerful form of

propaganda. An example of indirect coercion: There is no law that says we have to go to work every day and follow our employer's orders. Legally there is nothing to prevent us from going to live in the wild like primitive people or from going into business for ourselves. But in practice there is very little wild country left, and there is room in the economy for only a limited number of small business owners. Hence most of us can survive only as someone else's employee.

74. We suggest that modern man's obsession with longevity, and with maintaining physical vigor and sexual attractiveness to an advanced age, is a symptom of unfulfillment resulting from deprivation with respect to the power process. The "mid-life crisis" also is such a symptom. So is the lack of interest in having children that is fairly common in modern society but almost unheard-of in primitive societies.

75. In primitive societies life is a succession of stages. The needs and purposes of one stage having been fulfilled, there is no particular reluctance about passing on to the next stage. A young man goes through the power process by becoming a hunter, hunting not for sport or for fulfillment but to get meat that is necessary for food. (In young women the process is more complex, with greater emphasis on social power; we won't discuss that here.) This phase having been successfully passed through, the young man has no reluctance about settling down to the responsibilities of raising a family. (In contrast, some modern people indefinitely postpone having children because they are too busy seeking some kind of "fulfillment." We suggest that the fulfillment they need is adequate experience of the power process -- with real goals instead of the artificial goals of surrogate activities.) Again, having successfully raised his children, going through the power process by providing them with the physical necessities, the primitive man feels that his work is done and he is prepared to accept old age (if he survives that long) and death. Many modern people, on the other hand, are disturbed by the prospect of death, as is shown by the amount of effort they expend trying to maintain their physical condition, appearance and health. We argue that this is due to unfulfillment resulting from the fact that they have never put their physical powers to any use, have never gone through the power process using their bodies in a serious way. It is not the primitive man, who has used his body daily for practical purposes, who fears the deterioration of age, but the modern man, who has never had a practical use for his body beyond walking from his car to his house. It is the man whose need for the power process has been satisfied during his life who is best prepared to accept the end of that life.

76. In response to the arguments of this section someone will say, "Society must find a way to give people the opportunity to go through the power process." For such people the value of the opportunity is destroyed by the very fact that society gives it to them. What they need is to find or make their own opportunities. As long as the system GIVES them their opportunities it still has them on a leash. To attain autonomy they must get off that leash.

HOW SOME PEOPLE ADJUST

77. Not everyone in industrial-technological society suffers from psychological problems. Some people even profess to be quite satisfied with society as it is. We now discuss some of the reasons why people differ so greatly in their response to modern society.
78. First, there doubtless are differences in the strength of the drive for power. Individuals with a weak drive for power may have relatively little need to go through the power process, or at least relatively little need for autonomy in the power process. These are docile types who would have been happy as plantation darkies in the Old South. (We don't mean to sneer at "plantation darkies" of the Old South. To their credit, most of the slaves were NOT content with their servitude. We do sneer at people who ARE content with servitude.)
79. Some people may have some exceptional drive, in pursuing which they satisfy their need for the power process. For example, those who have an unusually strong drive for social status may spend their whole lives climbing the status ladder without ever getting bored with that game.
80. People vary in their susceptibility to advertising and marketing techniques. Some people are so susceptible that, even if they make a great deal of money, they cannot satisfy their constant craving for the shiny new toys that the marketing industry dangles before their eyes. So they always feel hard-pressed financially even if their income is large, and their cravings are frustrated.
81. Some people have low susceptibility to advertising and marketing techniques. These are the people who aren't interested in money. Material acquisition does not serve their need for the power process.
82. People who have medium susceptibility to advertising and marketing techniques are able to earn enough money to satisfy their craving for goods and services, but only at the cost of serious effort (putting in overtime, taking a second job, earning promotions, etc.) Thus material acquisition serves their need for the power process. But it does not necessarily follow that their need is fully satisfied. They may have insufficient autonomy in the power process (their work may consist of following orders) and some of their drives may be frustrated (e.g., security, aggression). (We are guilty of oversimplification in paragraphs 80-82 because we have assumed that the desire for material acquisition is entirely a creation of the advertising and marketing industry. Of course it's not that simple.)
83. Some people partly satisfy their need for power by identifying themselves with a powerful organization or mass movement. An individual lacking goals or power joins a movement or an organization, adopts its goals as his own, then works toward these goals. When some of the goals are attained, the individual, even though his personal efforts have played only an insignificant part in the attainment of the goals, feels (through his identification with the movement or organization) as if he had gone through the power process. This phenomenon was exploited by the fascists, nazis and communists. Our society uses it, too, though less crudely. Example: Manuel Noriega was an irritant to the U.S. (goal: punish Noriega). The U.S. invaded Panama (effort) and punished Noriega (attainment of goal). The U.S. went through the power process and many Americans, because of their identification with the U.S., experienced the power process vicariously. Hence the widespread public approval of the Panama

invasion; it gave people a sense of power. [15] We see the same phenomenon in armies, corporations, political parties, humanitarian organizations, religious or ideological movements. In particular, leftist movements tend to attract people who are seeking to satisfy their need for power. But for most people identification with a large organization or a mass movement does not fully satisfy the need for power.

84. Another way in which people satisfy their need for the power process is through surrogate activities. As we explained in paragraphs 38-40, a surrogate activity that is directed toward an artificial goal that the individual pursues for the sake of the "fulfillment" that he gets from pursuing the goal, not because he needs to attain the goal itself. For instance, there is no practical motive for building enormous muscles, hitting a little ball into a hole or acquiring a complete series of postage stamps. Yet many people in our society devote themselves with passion to bodybuilding, golf or stamp collecting. Some people are more "other-directed" than others, and therefore will more readily attach importance to a surrogate activity simply because the people around them treat it as important or because society tells them it is important. That is why some people get very serious about essentially trivial activities such as sports, or bridge, or chess, or arcane scholarly pursuits, whereas others who are more clear-sighted never see these things as anything but the surrogate activities that they are, and consequently never attach enough importance to them to satisfy their need for the power process in that way. It only remains to point out that in many cases a person's way of earning a living is also a surrogate activity. Not a PURE surrogate activity, since part of the motive for the activity is to gain the physical necessities and (for some people) social status and the luxuries that advertising makes them want. But many people put into their work far more effort than is necessary to earn whatever money and status they require, and this extra effort constitutes a surrogate activity. This extra effort, together with the emotional investment that accompanies it, is one of the most potent forces acting toward the continual development and perfecting of the system, with negative consequences for individual freedom (see paragraph 131). Especially, for the most creative scientists and engineers, work tends to be largely a surrogate activity. This point is so important that it deserves a separate discussion, which we shall give in a moment (paragraphs 87-92).

85. In this section we have explained how many people in modern society do satisfy their need for the power process to a greater or lesser extent. But we think that for the majority of people the need for the power process is not fully satisfied. In the first place, those who have an insatiable drive for status, or who get firmly "hooked" on a surrogate activity, or who identify strongly enough with a movement or organization to satisfy their need for power in that way, are exceptional personalities. Others are not fully satisfied with surrogate activities or by identification with an organization (see paragraphs 41, 64). In the second place, too much control is imposed by the system through explicit regulation or through socialization, which results in a deficiency of autonomy, and in frustration due to the impossibility of attaining certain goals and the necessity of restraining too many impulses.

86. But even if most people in industrial-technological society were well satisfied, we (FC) would still be opposed to that form of society, because (among other reasons) we consider it demeaning to fulfill one's need for the power process through surrogate activities or through identification with an organization, rather than through pursuit of real goals.

THE MOTIVES OF SCIENTISTS

87. Science and technology provide the most important examples of surrogate activities. Some scientists claim that they are motivated by "curiosity," that notion is simply absurd. Most scientists work on highly specialized problem that are not the object of any normal curiosity. For example, is an astronomer, a mathematician or an entomologist curious about the properties of isopropyltrimethylmethane? Of course not. Only a chemist is curious about such a thing, and he is curious about it only because chemistry is his surrogate activity. Is the chemist curious about the appropriate classification of a new species of beetle? No. That question is of interest only to the entomologist, and he is interested in it only because entomology is his surrogate activity. If the chemist and the entomologist had to exert themselves seriously to obtain the physical necessities, and if that effort exercised their abilities in an interesting way but in some nonscientific pursuit, then they couldn't give a damn about isopropyltrimethylmethane or the classification of beetles. Suppose that lack of funds for postgraduate education had led the chemist to become an insurance broker instead of a chemist. In that case he would have been very interested in insurance matters but would have cared nothing about isopropyltrimethylmethane. In any case it is not normal to put into the satisfaction of mere curiosity the amount of time and effort that scientists put into their work. The "curiosity" explanation for the scientists' motive just doesn't stand up.

88. The "benefit of humanity" explanation doesn't work any better. Some scientific work has no conceivable relation to the welfare of the human race - most of archaeology or comparative linguistics for example. Some other areas of science present obviously dangerous possibilities. Yet scientists in these areas are just as enthusiastic about their work as those who develop vaccines or study air pollution. Consider the case of Dr. Edward Teller, who had an obvious emotional involvement in promoting nuclear power plants. Did this involvement stem from a desire to benefit humanity? If so, then why didn't Dr. Teller get emotional about other "humanitarian" causes? If he was such a humanitarian then why did he help to develop the H-bomb? As with many other scientific achievements, it is very much open to question whether nuclear power plants actually do benefit humanity. Does the cheap electricity outweigh the accumulating waste and risk of accidents? Dr. Teller saw only one side of the question. Clearly his emotional involvement with nuclear power arose not from a desire to "benefit humanity" but from a personal fulfillment he got from his work and from seeing it put to practical use.

89. The same is true of scientists generally. With possible rare exceptions, their motive is neither curiosity nor a desire to benefit humanity but the need to go through the power process: to have a goal (a scientific problem to solve), to make an effort (research) and to attain the goal (solution of the problem.) Science is a surrogate activity because scientists work mainly for the fulfillment they get out of the work itself.

90. Of course, it's not that simple. Other motives do play a role for many scientists. Money and status for example. Some scientists may be persons of the type who have an insatiable drive for status (see paragraph 79) and this may provide much of the motivation for their work. No doubt the majority of scientists, like the majority of the general population, are more or less susceptible to advertising and marketing techniques and need money to satisfy their craving for goods and services. Thus science is not

a PURE surrogate activity. But it is in large part a surrogate activity.

91. Also, science and technology constitute a mass power movement, and many scientists gratify their need for power through identification with this mass movement (see paragraph 83).

92. Thus science marches on blindly, without regard to the real welfare of the human race or to any other standard, obedient only to the psychological needs of the scientists and of the government officials and corporation executives who provide the funds for research.

THE NATURE OF FREEDOM

93. We are going to argue that industrial-technological society cannot be reformed in such a way as to prevent it from progressively narrowing the sphere of human freedom. But because "freedom" is a word that can be interpreted in many ways, we must first make clear what kind of freedom we are concerned with.

94. By "freedom" we mean the opportunity to go through the power process, with real goals not the artificial goals of surrogate activities, and without interference, manipulation or supervision from anyone, especially from any large organization. Freedom means being in control (either as an individual or as a member of a SMALL group) of the life-and-death issues of one's existence; food, clothing, shelter and defense against whatever threats there may be in one's environment. Freedom means having power; not the power to control other people but the power to control the circumstances of one's own life. One does not have freedom if anyone else (especially a large organization) has power over one, no matter how benevolently, tolerantly and permissively that power may be exercised. It is important not to confuse freedom with mere permissiveness (see paragraph 72).

95. It is said that we live in a free society because we have a certain number of constitutionally guaranteed rights. But these are not as important as they seem. The degree of personal freedom that exists in a society is determined more by the economic and technological structure of the society than by its laws or its form of government. [16] Most of the Indian nations of New England were monarchies, and many of the cities of the Italian Renaissance were controlled by dictators. But in reading about these societies one gets the impression that they allowed far more personal freedom than our society does. In part this was because they lacked efficient mechanisms for enforcing the ruler's will: There were no modern, well-organized police forces, no rapid long-distance communications, no surveillance cameras, no dossiers of information about the lives of average citizens. Hence it was relatively easy to evade control.

96. As for our constitutional rights, consider for example that of freedom of the press. We certainly don't mean to knock that right: it is very important tool for limiting concentration of political power and for keeping those who do have political power in line by publicly exposing any misbehavior on their part.

But freedom of the press is of very little use to the average citizen as an individual. The mass media are mostly under the control of large organizations that are integrated into the system. Anyone who has a little money can have something printed, or can distribute it on the Internet or in some such way, but what he has to say will be swamped by the vast volume of material put out by the media, hence it will have no practical effect. To make an impression on society with words is therefore almost impossible for most individuals and small groups. Take us (FC) for example. If we had never done anything violent and had submitted the present writings to a publisher, they probably would not have been accepted. If they had been accepted and published, they probably would not have attracted many readers, because it's more fun to watch the entertainment put out by the media than to read a sober essay. Even if these writings had had many readers, most of these readers would soon have forgotten what they had read as their minds were flooded by the mass of material to which the media expose them. In order to get our message before the public with some chance of making a lasting impression, we've had to kill people.

97. Constitutional rights are useful up to a point, but they do not serve to guarantee much more than what could be called the bourgeois conception of freedom. According to the bourgeois conception, a "free" man is essentially an element of a social machine and has only a certain set of prescribed and delimited freedoms; freedoms that are designed to serve the needs of the social machine more than those of the individual. Thus the bourgeois's "free" man has economic freedom because that promotes growth and progress; he has freedom of the press because public criticism restrains misbehavior by political leaders; he has a rights to a fair trial because imprisonment at the whim of the powerful would be bad for the system. This was clearly the attitude of Simon Bolivar. To him, people deserved liberty only if they used it to promote progress (progress as conceived by the bourgeois). Other bourgeois thinkers have taken a similar view of freedom as a mere means to collective ends. Chester C. Tan, "Chinese Political Thought in the Twentieth Century," page 202, explains the philosophy of the Kuomintang leader Hu Han-min: "An individual is granted rights because he is a member of society and his community life requires such rights. By community Hu meant the whole society of the nation." And on page 259 Tan states that according to Carsum Chang (Chang Chun-mai, head of the State Socialist Party in China) freedom had to be used in the interest of the state and of the people as a whole. But what kind of freedom does one have if one can use it only as someone else prescribes? FC's conception of freedom is not that of Bolivar, Hu, Chang or other bourgeois theorists. The trouble with such theorists is that they have made the development and application of social theories their surrogate activity. Consequently the theories are designed to serve the needs of the theorists more than the needs of any people who may be unlucky enough to live in a society on which the theories are imposed.

98. One more point to be made in this section: It should not be assumed that a person has enough freedom just because he SAYS he has enough. Freedom is restricted in part by psychological control of which people are unconscious, and moreover many people's ideas of what constitutes freedom are governed more by social convention than by their real needs. For example, it's likely that many leftists of the oversocialized type would say that most people, including themselves are socialized too little rather than too much, yet the oversocialized leftist pays a heavy psychological price for his high level of socialization.

SOME PRINCIPLES OF HISTORY

99. Think of history as being the sum of two components: an erratic component that consists of unpredictable events that follow no discernible pattern, and a regular component that consists of long-term historical trends. Here we are concerned with the long-term trends.

100. **FIRST PRINCIPLE.** If a **SMALL** change is made that affects a long-term historical trend, then the effect of that change will almost always be transitory - the trend will soon revert to its original state. (Example: A reform movement designed to clean up political corruption in a society rarely has more than a short-term effect; sooner or later the reformers relax and corruption creeps back in. The level of political corruption in a given society tends to remain constant, or to change only slowly with the evolution of the society. Normally, a political cleanup will be permanent only if accompanied by widespread social changes; a **SMALL** change in the society won't be enough.) If a small change in a long-term historical trend appears to be permanent, it is only because the change acts in the direction in which the trend is already moving, so that the trend is not altered but only pushed a step ahead.

101. The first principle is almost a tautology. If a trend were not stable with respect to small changes, it would wander at random rather than following a definite direction; in other words it would not be a long-term trend at all.

102. **SECOND PRINCIPLE.** If a change is made that is sufficiently large to alter permanently a long-term historical trend, then it will alter the society as a whole. In other words, a society is a system in which all parts are interrelated, and you can't permanently change any important part without change all the other parts as well.

103. **THIRD PRINCIPLE.** If a change is made that is large enough to alter permanently a long-term trend, then the consequences for the society as a whole cannot be predicted in advance. (Unless various other societies have passed through the same change and have all experienced the same consequences, in which case one can predict on empirical grounds that another society that passes through the same change will be like to experience similar consequences.)

104. **FOURTH PRINCIPLE.** A new kind of society cannot be designed on paper. That is, you cannot plan out a new form of society in advance, then set it up and expect it to function as it was designed to.

105. The third and fourth principles result from the complexity of human societies. A change in human behavior will affect the economy of a society and its physical environment; the economy will affect the environment and vice versa, and the changes in the economy and the environment will affect human behavior in complex, unpredictable ways; and so forth. The network of causes and effects is far too complex to be untangled and understood.

106. **FIFTH PRINCIPLE.** People do not consciously and rationally choose the form of their society.

Societies develop through processes of social evolution that are not under rational human control.

107. The fifth principle is a consequence of the other four.

108. To illustrate: By the first principle, generally speaking an attempt at social reform either acts in the direction in which the society is developing anyway (so that it merely accelerates a change that would have occurred in any case) or else it only has a transitory effect, so that the society soon slips back into its old groove. To make a lasting change in the direction of development of any important aspect of a society, reform is insufficient and revolution is required. (A revolution does not necessarily involve an armed uprising or the overthrow of a government.) By the second principle, a revolution never changes only one aspect of a society; and by the third principle changes occur that were never expected or desired by the revolutionaries. By the fourth principle, when revolutionaries or utopians set up a new kind of society, it never works out as planned.

109. The American Revolution does not provide a counterexample. The American "Revolution" was not a revolution in our sense of the word, but a war of independence followed by a rather far-reaching political reform. The Founding Fathers did not change the direction of development of American society, nor did they aspire to do so. They only freed the development of American society from the retarding effect of British rule. Their political reform did not change any basic trend, but only pushed American political culture along its natural direction of development. British society, of which American society was an off-shoot, had been moving for a long time in the direction of representative democracy. And prior to the War of Independence the Americans were already practicing a significant degree of representative democracy in the colonial assemblies. The political system established by the Constitution was modeled on the British system and on the colonial assemblies. With major alteration, to be sure - there is no doubt that the Founding Fathers took a very important step. But it was a step along the road the English-speaking world was already traveling. The proof is that Britain and all of its colonies that were populated predominantly by people of British descent ended up with systems of representative democracy essentially similar to that of the United States. If the Founding Fathers had lost their nerve and declined to sign the Declaration of Independence, our way of life today would not have been significantly different. Maybe we would have had somewhat closer ties to Britain, and would have had a Parliament and Prime Minister instead of a Congress and President. No big deal. Thus the American Revolution provides not a counterexample to our principles but a good illustration of them.

110. Still, one has to use common sense in applying the principles. They are expressed in imprecise language that allows latitude for interpretation, and exceptions to them can be found. So we present these principles not as inviolable laws but as rules of thumb, or guides to thinking, that may provide a partial antidote to naive ideas about the future of society. The principles should be borne constantly in mind, and whenever one reaches a conclusion that conflicts with them one should carefully reexamine one's thinking and retain the conclusion only if one has good, solid reasons for doing so.

INDUSTRIAL-TECHNOLOGICAL SOCIETY CANNOT BE REFORMED

111. The foregoing principles help to show how hopelessly difficult it would be to reform the industrial system in such a way as to prevent it from progressively narrowing our sphere of freedom. There has been a consistent tendency, going back at least to the Industrial Revolution for technology to strengthen the system at a high cost in individual freedom and local autonomy. Hence any change designed to protect freedom from technology would be contrary to a fundamental trend in the development of our society.

Consequently, such a change either would be a transitory one -- soon swamped by the tide of history -- or, if large enough to be permanent would alter the nature of our whole society. This by the first and second principles. Moreover, since society would be altered in a way that could not be predicted in advance (third principle) there would be great risk. Changes large enough to make a lasting difference in favor of freedom would not be initiated because it would be realized that they would gravely disrupt the system. So any attempts at reform would be too timid to be effective. Even if changes large enough to make a lasting difference were initiated, they would be retracted when their disruptive effects became apparent. Thus, permanent changes in favor of freedom could be brought about only by persons prepared to accept radical, dangerous and unpredictable alteration of the entire system. In other words, by revolutionaries, not reformers.

112. People anxious to rescue freedom without sacrificing the supposed benefits of technology will suggest naive schemes for some new form of society that would reconcile freedom with technology. Apart from the fact that people who make suggestions seldom propose any practical means by which the new form of society could be set up in the first place, it follows from the fourth principle that even if the new form of society could be once established, it either would collapse or would give results very different from those expected.

113. So even on very general grounds it seems highly improbably that any way of changing society could be found that would reconcile freedom with modern technology. In the next few sections we will give more specific reasons for concluding that freedom and technological progress are incompatible.

RESTRICTION OF FREEDOM IS UNAVOIDABLE IN INDUSTRIAL SOCIETY

114. As explained in paragraph 65-67, 70-73, modern man is strapped down by a network of rules and regulations, and his fate depends on the actions of persons remote from him whose decisions he cannot influence. This is not accidental or a result of the arbitrariness of arrogant bureaucrats. It is necessary and inevitable in any technologically advanced society. The system HAS TO regulate human behavior closely in order to function. At work, people have to do what they are told to do, otherwise production

would be thrown into chaos. Bureaucracies HAVE TO be run according to rigid rules. To allow any substantial personal discretion to lower-level bureaucrats would disrupt the system and lead to charges of unfairness due to differences in the way individual bureaucrats exercised their discretion. It is true that some restrictions on our freedom could be eliminated, but GENERALLY SPEAKING the regulation of our lives by large organizations is necessary for the functioning of industrial-technological society. The result is a sense of powerlessness on the part of the average person. It may be, however, that formal regulations will tend increasingly to be replaced by psychological tools that make us want to do what the system requires of us. (Propaganda [14], educational techniques, "mental health" programs, etc.)

115. The system HAS TO force people to behave in ways that are increasingly remote from the natural pattern of human behavior. For example, the system needs scientists, mathematicians and engineers. It can't function without them. So heavy pressure is put on children to excel in these fields. It isn't natural for an adolescent human being to spend the bulk of his time sitting at a desk absorbed in study. A normal adolescent wants to spend his time in active contact with the real world. Among primitive peoples the things that children are trained to do are in natural harmony with natural human impulses. Among the American Indians, for example, boys were trained in active outdoor pursuits -- just the sort of things that boys like. But in our society children are pushed into studying technical subjects, which most do grudgingly.

116. Because of the constant pressure that the system exerts to modify human behavior, there is a gradual increase in the number of people who cannot or will not adjust to society's requirements: welfare leeches, youth-gang members, cultists, anti-government rebels, radical environmentalist saboteurs, dropouts and resisters of various kinds.

117. In any technologically advanced society the individual's fate MUST depend on decisions that he personally cannot influence to any great extent. A technological society cannot be broken down into small, autonomous communities, because production depends on the cooperation of very large numbers of people and machines. Such a society MUST be highly organized and decisions HAVE TO be made that affect very large numbers of people. When a decision affects, say, a million people, then each of the affected individuals has, on the average, only a one-millionth share in making the decision. What usually happens in practice is that decisions are made by public officials or corporation executives, or by technical specialists, but even when the public votes on a decision the number of voters ordinarily is too large for the vote of any one individual to be significant. [17] Thus most individuals are unable to influence measurably the major decisions that affect their lives. There is no conceivable way to remedy this in a technologically advanced society. The system tries to "solve" this problem by using propaganda to make people WANT the decisions that have been made for them, but even if this "solution" were completely successful in making people feel better, it would be demeaning.

118 Conservatives and some others advocate more "local autonomy." Local communities once did have autonomy, but such autonomy becomes less and less possible as local communities become more enmeshed with and dependent on large-scale systems like public utilities, computer networks, highway systems, the mass communications media, the modern health care system. Also operating against

autonomy is the fact that technology applied in one location often affects people at other locations far away. Thus pesticide or chemical use near a creek may contaminate the water supply hundreds of miles downstream, and the greenhouse effect affects the whole world.

119. The system does not and cannot exist to satisfy human needs. Instead, it is human behavior that has to be modified to fit the needs of the system. This has nothing to do with the political or social ideology that may pretend to guide the technological system. It is the fault of technology, because the system is guided not by ideology but by technical necessity. [18] Of course the system does satisfy many human needs, but generally speaking it does this only to the extent that it is to the advantage of the system to do it. It is the needs of the system that are paramount, not those of the human being. For example, the system provides people with food because the system couldn't function if everyone starved; it attends to people's psychological needs whenever it can CONVENIENTLY do so, because it couldn't function if too many people became depressed or rebellious. But the system, for good, solid, practical reasons, must exert constant pressure on people to mold their behavior to the needs of the system. Too much waste accumulating? The government, the media, the educational system, environmentalists, everyone inundates us with a mass of propaganda about recycling. Need more technical personnel? A chorus of voices exhorts kids to study science. No one stops to ask whether it is inhumane to force adolescents to spend the bulk of their time studying subjects most of them hate. When skilled workers are put out of a job by technical advances and have to undergo "retraining," no one asks whether it is humiliating for them to be pushed around in this way. It is simply taken for granted that everyone must bow to technical necessity and for good reason: If human needs were put before technical necessity there would be economic problems, unemployment, shortages or worse. The concept of "mental health" in our society is defined largely by the extent to which an individual behaves in accord with the needs of the system and does so without showing signs of stress.

120. Efforts to make room for a sense of purpose and for autonomy within the system are no better than a joke. For example, one company, instead of having each of its employees assemble only one section of a catalogue, had each assemble a whole catalogue, and this was supposed to give them a sense of purpose and achievement. Some companies have tried to give their employees more autonomy in their work, but for practical reasons this usually can be done only to a very limited extent, and in any case employees are never given autonomy as to ultimate goals -- their "autonomous" efforts can never be directed toward goals that they select personally, but only toward their employer's goals, such as the survival and growth of the company. Any company would soon go out of business if it permitted its employees to act otherwise. Similarly, in any enterprise within a socialist system, workers must direct their efforts toward the goals of the enterprise, otherwise the enterprise will not serve its purpose as part of the system. Once again, for purely technical reasons it is not possible for most individuals or small groups to have much autonomy in industrial society. Even the small-business owner commonly has only limited autonomy. Apart from the necessity of government regulation, he is restricted by the fact that he must fit into the economic system and conform to its requirements. For instance, when someone develops anew technology, the small-business person often has to use that technology whether he wants to or not, in order to remain competitive.

THE 'BAD' PARTS OF TECHNOLOGY CANNOT BE SEPARATED FROM THE 'GOOD' PARTS

121. A further reason why industrial society cannot be reformed in favor of freedom is that modern technology is a unified system in which all parts are dependent on one another. You can't get rid of the "bad" parts of technology and retain only the "good" parts. Take modern medicine, for example. Progress in medical science depends on progress in chemistry, physics, biology, computer science and other fields. Advanced medical treatments require expensive, high-tech equipment that can be made available only by a technologically progressive, economically rich society. Clearly you can't have much progress in medicine without the whole technological system and everything that goes with it.

122. Even if medical progress could be maintained without the rest of the technological system, it would by itself bring certain evils. Suppose for example that a cure for diabetes is discovered. People with a genetic tendency to diabetes will then be able to survive and reproduce as well as anyone else. Natural selection against genes for diabetes will cease and such genes will spread throughout the population. (This may be occurring to some extent already, since diabetes, while not curable, can be controlled through the use of insulin.) The same thing will happen with many other diseases susceptibility to which is affected by genetic degradation of the population. The only solution will be some sort of eugenics program or extensive genetic engineering of human beings, so that man in the future will no longer be a creation of nature, or of chance, or of God (depending on your religious or philosophical opinions), but a manufactured product.

123. If you think that big government interferes in your life too much NOW, just wait till the government starts regulating the genetic constitution of your children. Such regulation will inevitably follow the introduction of genetic engineering of human beings, because the consequences of unregulated genetic engineering would be disastrous. [19]

124. The usual response to such concerns is to talk about "medical ethics." But a code of ethics would not serve to protect freedom in the face of medical progress; it would only make matters worse. A code of ethics applicable to genetic engineering would be in effect a means of regulating the genetic constitution of human beings. Somebody (probably the upper-middle class, mostly) would decide that such and such applications of genetic engineering were "ethical" and others were not, so that in effect they would be imposing their own values on the genetic constitution of the population at large. Even if a code of ethics were chosen on a completely democratic basis, the majority would be imposing their own values on any minorities who might have a different idea of what constituted an "ethical" use of genetic engineering. The only code of ethics that would truly protect freedom would be one that prohibited ANY genetic engineering of human beings, and you can be sure that no such code will ever be applied in a technological society. No code that reduced genetic engineering to a minor role could stand up for long, because the temptation presented by the immense power of biotechnology would be irresistible, especially since to the majority of people many of its applications will seem obviously and

unequivocally good (eliminating physical and mental diseases, giving people the abilities they need to get along in today's world). Inevitably, genetic engineering will be used extensively, but only in ways consistent with the needs of the industrial-technological system. [20]

TECHNOLOGY IS A MORE POWERFUL SOCIAL FORCE THAN THE ASPIRATION FOR FREEDOM

125. It is not possible to make a **LASTING** compromise between technology and freedom, because technology is by far the more powerful social force and continually encroaches on freedom through **REPEATED** compromises. Imagine the case of two neighbors, each of whom at the outset owns the same amount of land, but one of whom is more powerful than the other. The powerful one demands a piece of the other's land. The weak one refuses. The powerful one says, "OK, let's compromise. Give me half of what I asked." The weak one has little choice but to give in. Some time later the powerful neighbor demands another piece of land, again there is a compromise, and so forth. By forcing a long series of compromises on the weaker man, the powerful one eventually gets all of his land. So it goes in the conflict between technology and freedom.

126. Let us explain why technology is a more powerful social force than the aspiration for freedom.

127. A technological advance that appears not to threaten freedom often turns out to threaten freedom often turns out to threaten it very seriously later on. For example, consider motorized transport. A walking man formerly could go where he pleased, go at his own pace without observing any traffic regulations, and was independent of technological support-systems. When motor vehicles were introduced they appeared to increase man's freedom. They took no freedom away from the walking man, no one had to have an automobile if he didn't want one, and anyone who did choose to buy an automobile could travel much faster than the walking man. But the introduction of motorized transport soon changed society in such a way as to restrict greatly man's freedom of locomotion. When automobiles became numerous, it became necessary to regulate their use extensively. In a car, especially in densely populated areas, one cannot just go where one likes at one's own pace one's movement is governed by the flow of traffic and by various traffic laws. One is tied down by various obligations: license requirements, driver test, renewing registration, insurance, maintenance required for safety, monthly payments on purchase price. Moreover, the use of motorized transport is no longer optional. Since the introduction of motorized transport the arrangement of our cities has changed in such a way that the majority of people no longer live within walking distance of their place of employment, shopping areas and recreational opportunities, so that they **HAVE TO** depend on the automobile for transportation. Or else they must use public transportation, in which case they have even less control over their own movement than when driving a car. Even the walker's freedom is now greatly restricted. In the city he continually has to stop and wait for traffic lights that are designed mainly to serve auto traffic. In the country, motor traffic makes it dangerous and unpleasant to walk along the highway. (Note the important point we have illustrated with the case of motorized transport: When a new item of technology is introduced as an option that an individual can accept or not as he chooses, it does not necessarily **REMAIN** optional. In many cases the new technology changes society in such a way that people eventually find themselves **FORCED** to use it.)

128. While technological progress AS A WHOLE continually narrows our sphere of freedom, each new technical advance CONSIDERED BY ITSELF appears to be desirable. Electricity, indoor plumbing, rapid long-distance communications . . . how could one argue against any of these things, or against any other of the innumerable technical advances that have made modern society? It would have been absurd to resist the introduction of the telephone, for example. It offered many advantages and no disadvantages. Yet as we explained in paragraphs 59-76, all these technical advances taken together have created world in which the average man's fate is no longer in his own hands or in the hands of his neighbors and friends, but in those of politicians, corporation executives and remote, anonymous technicians and bureaucrats whom he as an individual has no power to influence. [21] The same process will continue in the future. Take genetic engineering, for example. Few people will resist the introduction of a genetic technique that eliminates a hereditary disease It does no apparent harm and prevents much suffering. Yet a large number of genetic improvements taken together will make the human being into an engineered product rather than a free creation of chance (or of God, or whatever, depending on your religious beliefs).

129 Another reason why technology is such a powerful social force is that, within the context of a given society, technological progress marches in only one direction; it can never be reversed. Once a technical innovation has been introduced, people usually become dependent on it, unless it is replaced by some still more advanced innovation. Not only do people become dependent as individuals on a new item of technology, but, even more, the system as a whole becomes dependent on it. (Imagine what would happen to the system today if computers, for example, were eliminated.) Thus the system can move in only one direction, toward greater technologization. Technology repeatedly forces freedom to take a step back -- short of the overthrow of the whole technological system.

130. Technology advances with great rapidity and threatens freedom at many different points at the same time (crowding, rules and regulations, increasing dependence of individuals on large organizations, propaganda and other psychological techniques, genetic engineering, invasion of privacy through surveillance devices and computers, etc.) To hold back any ONE of the threats to freedom would require a long different social struggle. Those who want to protect freedom are overwhelmed by the sheer number of new attacks and the rapidity with which they develop, hence they become pathetic and no longer resist. To fight each of the threats separately would be futile. Success can be hoped for only by fighting the technological system as a whole; but that is revolution not reform.

131. Technicians (we use this term in its broad sense to describe all those who perform a specialized task that requires training) tend to be so involved in their work (their surrogate activity) that when a conflict arises between their technical work and freedom, they almost always decide in favor of their technical work. This is obvious in the case of scientists, but it also appears elsewhere: Educators, humanitarian groups, conservation organizations do not hesitate to use propaganda or other psychological techniques to help them achieve their laudable ends. Corporations and government agencies, when they find it useful, do not hesitate to collect information about individuals without regard to their privacy. Law enforcement agencies are frequently inconvenienced by the constitutional rights of suspects and often of

completely innocent persons, and they do whatever they can do legally (or sometimes illegally) to restrict or circumvent those rights. Most of these educators, government officials and law officers believe in freedom, privacy and constitutional rights, but when these conflict with their work, they usually feel that their work is more important.

132. It is well known that people generally work better and more persistently when striving for a reward than when attempting to avoid a punishment or negative outcome. Scientists and other technicians are motivated mainly by the rewards they get through their work. But those who oppose technological invasions of freedom are working to avoid a negative outcome, consequently there are a few who work persistently and well at this discouraging task. If reformers ever achieved a signal victory that seemed to set up a solid barrier against further erosion of freedom through technological progress, most would tend to relax and turn their attention to more agreeable pursuits. But the scientists would remain busy in their laboratories, and technology as it progresses would find ways, in spite of any barriers, to exert more and more control over individuals and make them always more dependent on the system.

133. No social arrangements, whether laws, institutions, customs or ethical codes, can provide permanent protection against technology. History shows that all social arrangements are transitory; they all change or break down eventually. But technological advances are permanent within the context of a given civilization. Suppose for example that it were possible to arrive at some social arrangements that would prevent genetic engineering from being applied to human beings, or prevent it from being applied in such a way as to threaten freedom and dignity. Still, the technology would remain waiting. Sooner or later the social arrangement would break down. Probably sooner, given that pace of change in our society. Then genetic engineering would begin to invade our sphere of freedom, and this invasion would be irreversible (short of a breakdown of technological civilization itself). Any illusions about achieving anything permanent through social arrangements should be dispelled by what is currently happening with environmental legislation. A few years ago it seemed that there were secure legal barriers preventing at least SOME of the worst forms of environmental degradation. A change in the political wind, and those barriers begin to crumble.

134. For all of the foregoing reasons, technology is a more powerful social force than the aspiration for freedom. But this statement requires an important qualification. It appears that during the next several decades the industrial-technological system will be undergoing severe stresses due to economic and environmental problems, and especially due to problems of human behavior (alienation, rebellion, hostility, a variety of social and psychological difficulties). We hope that the stresses through which the system is likely to pass will cause it to break down, or at least weaken it sufficiently so that a revolution occurs and is successful, then at that particular moment the aspiration for freedom will have proved more powerful than technology.

135. In paragraph 125 we used an analogy of a weak neighbor who is left destitute by a strong neighbor who takes all his land by forcing on him a series of compromises. But suppose now that the strong neighbor gets sick, so that he is unable to defend himself. The weak neighbor can force the strong one to give him his land back, or he can kill him. If he lets the strong man survive and only forces him to give his land back, he is a fool, because when the strong man gets well he will again take all the land for

himself. The only sensible alternative for the weaker man is to kill the strong one while he has the chance. In the same way, while the industrial system is sick we must destroy it. If we compromise with it and let it recover from its sickness, it will eventually wipe out all of our freedom.

SIMPLER SOCIAL PROBLEMS HAVE PROVED INTRACTABLE

136. If anyone still imagines that it would be possible to reform the system in such a way as to protect freedom from technology, let him consider how clumsily and for the most part unsuccessfully our society has dealt with other social problems that are far more simple and straightforward. Among other things, the system has failed to stop environmental degradation, political corruption, drug trafficking or domestic abuse.

137. Take our environmental problems, for example. Here the conflict of values is straightforward: economic expedience now versus saving some of our natural resources for our grandchildren [22] But on this subject we get only a lot of blather and obfuscation from the people who have power, and nothing like a clear, consistent line of action, and we keep on piling up environmental problems that our grandchildren will have to live with. Attempts to resolve the environmental issue consist of struggles and compromises between different factions, some of which are ascendant at one moment, others at another moment. The line of struggle changes with the shifting currents of public opinion. This is not a rational process, or is it one that is likely to lead to a timely and successful solution to the problem. Major social problems, if they get "solved" at all, are rarely or never solved through any rational, comprehensive plan. They just work themselves out through a process in which various competing groups pursuing their own usually short-term) self-interest [23] arrive (mainly by luck) at some more or less stable modus vivendi. In fact, the principles we formulated in paragraphs 100-106 make it seem doubtful that rational, long-term social planning can EVER be successful. 138. Thus it is clear that the human race has at best a very limited capacity for solving even relatively straightforward social problems. How then is it going to solve the far more difficult and subtle problem of reconciling freedom with technology? Technology presents clear-cut material advantages, whereas freedom is an abstraction that means different things to different people, and its loss is easily obscured by propaganda and fancy talk.

139. And note this important difference: It is conceivable that our environmental problems (for example) may some day be settled through a rational, comprehensive plan, but if this happens it will be only because it is in the long-term interest of the system to solve these problems. But it is NOT in the interest of the system to preserve freedom or small-group autonomy. On the contrary, it is in the interest of the system to bring human behavior under control to the greatest possible extent. Thus, while practical considerations may eventually force the system to take a rational, prudent approach to environmental problems, equally practical considerations will force the system to regulate human behavior ever more closely (preferably by indirect means that will disguise the encroachment on freedom.) This isn't just our opinion. Eminent social scientists (e.g. James Q. Wilson) have stressed the importance of "socializing" people more effectively.

REVOLUTION IS EASIER THAN REFORM

140. We hope we have convinced the reader that the system cannot be reformed in a such a way as to reconcile freedom with technology. The only way out is to dispense with the industrial-technological system altogether. This implies revolution, not necessarily an armed uprising, but certainly a radical and fundamental change in the nature of society.

141. People tend to assume that because a revolution involves a much greater change than reform does, it is more difficult to bring about than reform is. Actually, under certain circumstances revolution is much easier than reform. The reason is that a revolutionary movement can inspire an intensity of commitment that a reform movement cannot inspire. A reform movement merely offers to solve a particular social problem. A revolutionary movement offers to solve all problems at one stroke and create a whole new world; it provides the kind of ideal for which people will take great risks and make great sacrifices. For this reasons it would be much easier to overthrow the whole technological system than to put effective, permanent restraints on the development of application of any one segment of technology, such as genetic engineering, but under suitable conditions large numbers of people may devote themselves passionately to a revolution against the industrial-technological system. As we noted in paragraph 132, reformers seeking to limite certain aspects of technology would be working to avoid a negative outcome. But revolutionaries work to gain a powerful reward -- fulfillment of their revolutionary vision -- and therefore work harder and more persistently than reformers do.

142. Reform is always restrainde by the fear of painful consequences if changes go too far. But once a revolutionary fever has taken hold of a society, people are willing to undergo unlimited hardships for the sake of their revolution. This was clearly shown in the French and Russian Revolutions. It may be that in such cases only a minority of the population is really committed to the revolution, but this minority is sufficiently large and active so that it becomes the dominant force in society. We will have more to say about revolution in paragraphs 180-205.

CONTROL OF HUMAN BEHAVIOR

143. Since the beginning of civilization, organized societies have had to put pressures on human beings of the sake of the functioning of the social organism. The kinds of pressures vary greatly from one society to another. Some of the pressures are physical (poor diet, excessive labor, environmental pollution), some are psychological (noise, crowding, forcing humans behavior into the mold that society requires). In the past, human nature has been approximately constant, or at any rate has varied only within certain bounds. Consequently, societies have been able to push people only up to certain limits. When the limit of human endurance has been passed, things start going rong: rebellion, or crime, or corruption, or evasion of work, or depression and other mental problems, or an elevated death rate, or a

declining birth rate or something else, so that either the society breaks down, or its functioning becomes too inefficient and it is (quickly or gradually, through conquest, attrition or evolution) replaced by some more efficient form of society.

[25]

144. Thus human nature has in the past put certain limits on the development of societies. People could be pushed only so far and no farther. But today this may be changing, because modern technology is developing way of modifying human beings.

145. Imagine a society that subjects people to conditions that make them terribly unhappy, then gives them the drugs to take away their unhappiness. Science fiction? It is already happening to some extent in our own society. It is well known that the rate of clinical depression had been greatly increasing in recent decades. We believe that this is due to disruption of the power process, as explained in paragraphs 59-76. But even if we are wrong, the increasing rate of depression is certainly the result of SOME conditions that exist in today's society. Instead of removing the conditions that make people depressed, modern society gives them antidepressant drugs. In effect, antidepressants are a means of modifying an individual's internal state in such a way as to enable him to tolerate social conditions that he would otherwise find intolerable. (Yes, we know that depression is often of purely genetic origin. We are referring here to those cases in which environment plays the predominant role.)

146. Drugs that affect the mind are only one example of the methods of controlling human behavior that modern society is developing. Let us look at some of the other methods.

147. To start with, there are the techniques of surveillance. Hidden video cameras are now used in most stores and in many other places, computers are used to collect and process vast amounts of information about individuals. Information so obtained greatly increases the effectiveness of physical coercion (i.e., law enforcement).[26] Then there are the methods of propaganda, for which the mass communication media provide effective vehicles. Efficient techniques have been developed for winning elections, selling products, influencing public opinion. The entertainment industry serves as an important psychological tool of the system, possibly even when it is dishing out large amounts of sex and violence. Entertainment provides modern man with an essential means of escape. While absorbed in television, videos, etc., he can forget stress, anxiety, frustration, dissatisfaction. Many primitive peoples, when they don't have work to do, are quite content to sit for hours at a time doing nothing at all, because they are at peace with themselves and their world. But most modern people must be constantly occupied or entertained, otherwise they get "bored," i.e., they get fidgety, uneasy, irritable.

148. Other techniques strike deeper than the foregoing. Education is no longer a simple affair of paddling a kid's behind when he doesn't know his lessons and patting him on the head when he does know them. It is becoming a scientific technique for controlling the child's development. Sylvan Learning Centers, for example, have had great success in motivating children to study, and psychological techniques are also used with more or less success in many conventional schools. "Parenting" techniques that are taught

to parents are designed to make children accept fundamental values of the system and behave in ways that the system finds desirable. "Mental health" programs, "intervention" techniques, psychotherapy and so forth are ostensibly designed to benefit individuals, but in practice they usually serve as methods for inducing individuals to think and behave as the system requires. (There is no contradiction here; an individual whose attitudes or behavior bring him into conflict with the system is up against a force that is too powerful for him to conquer or escape from, hence he is likely to suffer from stress, frustration, defeat. His path will be much easier if he thinks and behaves as the system requires. In that sense the system is acting for the benefit of the individual when it brainwashes him into conformity.) Child abuse in its gross and obvious forms is disapproved in most if not all cultures. Tormenting a child for a trivial reason or no reason at all is something that appalls almost everyone. But many psychologists interpret the concept of abuse much more broadly. Is spanking, when used as part of a rational and consistent system of discipline, a form of abuse? The question will ultimately be decided by whether or not spanking tends to produce behavior that makes a person fit in well with the existing system of society. In practice, the word "abuse" tends to be interpreted to include any method of child-rearing that produces behavior inconvenient for the system. Thus, when they go beyond the prevention of obvious, senseless cruelty, programs for preventing "child abuse" are directed toward the control of human behavior of the system.

149. Presumably, research will continue to increase the effectiveness of psychological techniques for controlling human behavior. But we think it is unlikely that psychological techniques alone will be sufficient to adjust human beings to the kind of society that technology is creating. Biological methods probably will have to be used. We have already mentioned the use of drugs in this connection. Neurology may provide other avenues of modifying the human mind. Genetic engineering of human beings is already beginning to occur in the form of "gene therapy," and there is no reason to assume the such methods will not eventually be used to modify those aspects of the body that affect mental functioning.

150. As we mentioned in paragraph 134, industrial society seems likely to be entering a period of severe stress, due in part to problems of human behavior and in part to economic and environmental problems. And a considerable proportion of the system's economic and environmental problems result from the way human beings behave. Alienation, low self-esteem, depression, hostility, rebellion; children who won't study, youth gangs, illegal drug use, rape, child abuse, other crimes, unsafe sex, teen pregnancy, population growth, political corruption, race hatred, ethnic rivalry, bitter ideological conflict (i.e., pro-choice vs. pro-life), political extremism, terrorism, sabotage, anti-government groups, hate groups. All these threaten the very survival of the system. The system will be FORCED to use every practical means of controlling human behavior.

151. The social disruption that we see today is certainly not the result of mere chance. It can only be a result of the conditions of life that the system imposes on people. (We have argued that the most important of these conditions is disruption of the power process.) If the system succeeds in imposing sufficient control over human behavior to assure its own survival, a new watershed in human history will have passed. Whereas formerly the limits of human endurance have imposed limits on the development of societies (as we explained in paragraphs 143, 144), industrial-technological society will be able to pass those limits by modifying human beings, whether by psychological methods or biological

methods or both. In the future, social systems will not be adjusted to suit the needs of human beings. Instead, human being will be adjusted to suit the needs of the system.

[27] 152. Generally speaking, technological control over human behavior will probably not be introduced with a totalitarian intention or even through a conscious desire to restrict human freedom. [28] Each new step in the assertion of control over the human mind will be taken as a rational response to a problem that faces society, such as curing alcoholism, reducing the crime rate or inducing young people to study science and engineering. In many cases, there will be humanitarian justification. For example, when a psychiatrist prescribes an anti-depressant for a depressed patient, he is clearly doing that individual a favor. It would be inhumane to withhold the drug from someone who needs it. When parents send their children to Sylvan Learning Centers to have them manipulated into becoming enthusiastic about their studies, they do so from concern for their children's welfare. It may be that some of these parents wish that one didn't have to have specialized training to get a job and that their kid didn't have to be brainwashed into becoming a computer nerd. But what can they do? They can't change society, and their child may be unemployable if he doesn't have certain skills. So they send him to Sylvan.

153. Thus control over human behavior will be introduced not by a calculated decision of the authorities but through a process of social evolution (RAPID evolution, however). The process will be impossible to resist, because each advance, considered by itself, will appear to be beneficial, or at least the evil involved in making the advance will appear to be beneficial, or at least the evil involved in making the advance will seem to be less than that which would result from not making it (see paragraph 127). Propaganda for example is used for many good purposes, such as discouraging child abuse or race hatred. [14] Sex education is obviously useful, yet the effect of sex education (to the extent that it is successful) is to take the shaping of sexual attitudes away from the family and put it into the hands of the state as represented by the public school system.

154. Suppose a biological trait is discovered that increases the likelihood that a child will grow up to be a criminal and suppose some sort of gene therapy can remove this trait. [29] Of course most parents whose children possess the trait will have them undergo the therapy. It would be inhumane to do otherwise, since the child would probably have a miserable life if he grew up to be a criminal. But many or most primitive societies have a low crime rate in comparison with that of our society, even though they have neither high-tech methods of child-rearing nor harsh systems of punishment. Since there is no reason to suppose that more modern men than primitive men have innate predatory tendencies, the high crime rate of our society must be due to the pressures that modern conditions put on people, to which many cannot or will not adjust. Thus a treatment designed to remove potential criminal tendencies is at least in part a way of re-engineering people so that they suit the requirements of the system.

155. Our society tends to regard as a "sickness" any mode of thought or behavior that is inconvenient for the system, and this is plausible because when an individual doesn't fit into the system it causes pain to the individual as well as problems for the system. Thus the manipulation of an individual to adjust him to the system is seen as a "cure" for a "sickness" and therefore as good.

156. In paragraph 127 we pointed out that if the use of a new item of technology is INITIALLY optional, it does not necessarily REMAIN optional, because the new technology tends to change society in such a way that it becomes difficult or impossible for an individual to function without using that technology. This applies also to the technology of human behavior. In a world in which most children are put through a program to make them enthusiastic about studying, a parent will almost be forced to put his kid through such a program, because if he does not, then the kid will grow up to be, comparatively speaking, an ignoramus and therefore unemployable. Or suppose a biological treatment is discovered that, without undesirable side-effects, will greatly reduce the psychological stress from which so many people suffer in our society. If large numbers of people choose to undergo the treatment, then the general level of stress in society will be reduced, so that it will be possible for the system to increase the stress-producing pressures. In fact, something like this seems to have happened already with one of our society's most important psychological tools for enabling people to reduce (or at least temporarily escape from) stress, namely, mass entertainment (see paragraph 147). Our use of mass entertainment is "optional": No law requires us to watch television, listen to the radio, read magazines. Yet mass entertainment is a means of escape and stress-reduction on which most of us have become dependent. Everyone complains about the trashiness of television, but almost everyone watches it. A few have kicked the TV habit, but it would be a rare person who could get along today without using ANY form of mass entertainment. (Yet until quite recently in human history most people got along very nicely with no other entertainment than that which each local community created for itself.) Without the entertainment industry the system probably would not have been able to get away with putting as much stress-producing pressure on us as it does.

157. Assuming that industrial society survives, it is likely that technology will eventually acquire something approaching complete control over human behavior. It has been established beyond any rational doubt that human thought and behavior have a largely biological basis. As experimenters have demonstrated, feelings such as hunger, pleasure, anger and fear can be turned on and off by electrical stimulation of appropriate parts of the brain. Memories can be destroyed by damaging parts of the brain or they can be brought to the surface by electrical stimulation. Hallucinations can be induced or moods changed by drugs. There may or may not be an immaterial human soul, but if there is one it clearly is less powerful than the biological mechanisms of human behavior. For if that were not the case then researchers would not be able so easily to manipulate human feelings and behavior with drugs and electrical currents.

158. It presumably would be impractical for all people to have electrodes inserted in their heads so that they could be controlled by the authorities. But the fact that human thoughts and feelings are so open to biological intervention shows that the problem of controlling human behavior is mainly a technical problem; a problem of neurons, hormones and complex molecules; the kind of problem that is accessible to scientific attack. Given the outstanding record of our society in solving technical problems, it is overwhelmingly probable that great advances will be made in the control of human behavior.

159. Will public resistance prevent the introduction of technological control of human behavior? It certainly would if an attempt were made to introduce such control all at once. But since technological control will be introduced through a long sequence of small advances, there will be no rational and

effective public resistance. (See paragraphs 127,132, 153.)

160. To those who think that all this sounds like science fiction, we point out that yesterday's science fiction is today's fact. The Industrial Revolution has radically altered man's environment and way of life, and it is only to be expected that as technology is increasingly applied to the human body and mind, man himself will be altered as radically as his environment and way of life have been.

HUMAN RACE AT A CROSSROADS

161. But we have gotten ahead of our story. It is one thing to develop in the laboratory a series of psychological or biological techniques for manipulating human behavior and quite another to integrate these techniques into a functioning social system. The latter problem is the more difficult of the two. For example, while the techniques of educational psychology doubtless work quite well in the "lab schools" where they are developed, it is not necessarily easy to apply them effectively throughout our educational system. We all know what many of our schools are like. The teachers are too busy taking knives and guns away from the kids to subject them to the latest techniques for making them into computer nerds. Thus, in spite of all its technical advances relating to human behavior the system to date has not been impressively successful in controlling human beings. The people whose behavior is fairly well under the control of the system are those of the type that might be called "bourgeois." But there are growing numbers of people who in one way or another are rebels against the system: welfare leaches, youth gangs cultists, satanists, nazis, radical environmentalists, militiamen, etc..

162. The system is currently engaged in a desperate struggle to overcome certain problems that threaten its survival, among which the problems of human behavior are the most important. If the system succeeds in acquiring sufficient control over human behavior quickly enough, it will probably survive. Otherwise it will break down. We think the issue will most likely be resolved within the next several decades, say 40 to 100 years.

163. Suppose the system survives the crisis of the next several decades. By that time it will have to have solved, or at least brought under control, the principal problems that confront it, in particular that of "socializing" human beings; that is, making people sufficiently docile so that their behavior no longer threatens the system. That being accomplished, it does not appear that there would be any further obstacle to the development of technology, and it would presumably advance toward its logical conclusion, which is complete control over everything on Earth, including human beings and all other important organisms. The system may become a unitary, monolithic organization, or it may be more or less fragmented and consist of a number of organizations coexisting in a relationship that includes elements of both cooperation and competition, just as today the government, the corporations and other large organizations both cooperate and compete with one another. Human freedom mostly will have vanished, because individuals and small groups will be impotent vis-a-vis large organizations armed with supertechnology and an arsenal of advanced psychological and biological tools for manipulating

human beings, besides instruments of surveillance and physical coercion. Only a small number of people will have any real power, and even these probably will have only very limited freedom, because their behavior too will be regulated; just as today our politicians and corporation executives can retain their positions of power only as long as their behavior remains within certain fairly narrow limits.

164. Don't imagine that the systems will stop developing further techniques for controlling human beings and nature once the crisis of the next few decades is over and increasing control is no longer necessary for the system's survival. On the contrary, once the hard times are over the system will increase its control over people and nature more rapidly, because it will no longer be hampered by difficulties of the kind that it is currently experiencing. Survival is not the principal motive for extending control. As we explained in paragraphs 87-90, technicians and scientists carry on their work largely as a surrogate activity; that is, they satisfy their need for power by solving technical problems. They will continue to do this with unabated enthusiasm, and among the most interesting and challenging problems for them to solve will be those of understanding the human body and mind and intervening in their development. For the "good of humanity," of course.

165. But suppose on the other hand that the stresses of the coming decades prove to be too much for the system. If the system breaks down there may be a period of chaos, a "time of troubles" such as those that history has recorded: at various epochs in the past. It is impossible to predict what would emerge from such a time of troubles, but at any rate the human race would be given a new chance. The greatest danger is that industrial society may begin to reconstitute itself within the first few years after the breakdown. Certainly there will be many people (power-hungry types especially) who will be anxious to get the factories running again.

166. Therefore two tasks confront those who hate the servitude to which the industrial system is reducing the human race. First, we must work to heighten the social stresses within the system so as to increase the likelihood that it will break down or be weakened sufficiently so that a revolution against it becomes possible. Second, it is necessary to develop and propagate an ideology that opposes technology and the industrial society if and when the system becomes sufficiently weakened. And such an ideology will help to assure that, if and when industrial society breaks down, its remnants will be smashed beyond repair, so that the system cannot be reconstituted. The factories should be destroyed, technical books burned, etc.

HUMAN SUFFERING

167. The industrial system will not break down purely as a result of revolutionary action. It will not be vulnerable to revolutionary attack unless its own internal problems of development lead it into very serious difficulties. So if the system breaks down it will do so either spontaneously, or through a process that is in part spontaneous but helped along by revolutionaries. If the breakdown is sudden, many people will die, since the world's population has become so overblown that it cannot even feed itself any longer

without advanced technology. Even if the breakdown is gradual enough so that reduction of the population can occur more through lowering of the birth rate than through elevation of the death rate, the process of de-industrialization probably will be very chaotic and involve much suffering. It is naive to think it likely that technology can be phased out in a smoothly managed orderly way, especially since the technophiles will fight stubbornly at every step. Is it therefore cruel to work for the breakdown of the system? Maybe, but maybe not. In the first place, revolutionaries will not be able to break the system down unless it is already in deep trouble so that there would be a good chance of its eventually breaking down by itself anyway; and the bigger the system grows, the more disastrous the consequences of its breakdown will be; so it may be that revolutionaries, by hastening the onset of the breakdown will be reducing the extent of the disaster.

168. In the second place, one has to balance the struggle and death against the loss of freedom and dignity. To many of us, freedom and dignity are more important than a long life or avoidance of physical pain. Besides, we all have to die some time, and it may be better to die fighting for survival, or for a cause, than to live a long but empty and purposeless life.

169. In the third place, it is not all certain that the survival of the system will lead to less suffering than the breakdown of the system would. The system has already caused, and is continuing to cause, immense suffering all over the world. Ancient cultures, that for hundreds of years gave people a satisfactory relationship with each other and their environment, have been shattered by contact with industrial society, and the result has been a whole catalogue of economic, environmental, social and psychological problems. One of the effects of the intrusion of industrial society has been that over much of the world traditional controls on population have been thrown out of balance. Hence the population explosion, with all that it implies. Then there is the psychological suffering that is widespread throughout the supposedly fortunate countries of the West (see paragraphs 44, 45). No one knows what will happen as a result of ozone depletion, the greenhouse effect and other environmental problems that cannot yet be foreseen. And, as nuclear proliferation has shown, new technology cannot be kept out of the hands of dictators and irresponsible Third World nations. Would you like to speculate about what Iraq or North Korea will do with genetic engineering?

170. "Oh!" say the technophiles, "Science is going to fix all that! We will conquer famine, eliminate psychological suffering, make everybody healthy and happy!" Yeah, sure. That's what they said 200 years ago. The Industrial Revolution was supposed to eliminate poverty, make everybody happy, etc. The actual result has been quite different. The technophiles are hopelessly naive (or self-deceiving) in their understanding of social problems. They are unaware of (or choose to ignore) the fact that when large changes, even seemingly beneficial ones, are introduced into a society, they lead to a long sequence of other changes, most of which are impossible to predict (paragraph 103). The result is disruption of the society. So it is very probable that in their attempt to end poverty and disease, engineer docile, happy personalities and so forth, the technophiles will create social systems that are terribly troubled, even more so than the present one. For example, the scientists boast that they will end famine by creating new, genetically engineered food plants. But this will allow the human population to keep expanding indefinitely, and it is well known that crowding leads to increased stress and aggression. This is merely one example of the PREDICTABLE problems that will arise. We emphasize that, as past

experience has shown, technical progress will lead to other new problems for society far more rapidly than it has been solving old ones. Thus it will take a long difficult period of trial and error for the technophiles to work the bugs out of their Brave New World (if they ever do). In the meantime there will be great suffering. So it is not all clear that the survival of industrial society would involve less suffering than the breakdown of that society would. Technology has gotten the human race into a fix from which there is not likely to be any easy escape.

THE FUTURE

171. But suppose now that industrial society does survive the next several decade and that the bugs do eventually get worked out of the system, so that it functions smoothly. What kind of system will it be? We will consider several possibilities.

172. First let us postulate that the computer scientists succeed in developing intelligent machines that can do all things better than human beings can do them. In that case presumably all work will be done by vast, highly organized systems of machines and no human effort will be necessary. Either of two cases might occur. The machines might be permitted to make all of their own decisions without human oversight, or else human control over the machines might be retained.

173. If the machines are permitted to make all their own decisions, we can't make any conjectures as to the results, because it is impossible to guess how such machines might behave. We only point out that the fate of the human race would be at the mercy of the machines. It might be argued that the human race would never be foolish enough to hand over all the power to the machines. But we are suggesting neither that the human race would voluntarily turn power over to the machines nor that the machines would willfully seize power. What we do suggest is that the human race might easily permit itself to drift into a position of such dependence on the machines that it would have no practical choice but to accept all of the machines decisions. As society and the problems that face it become more and more complex and machines become more and more intelligent, people will let machines make more of their decision for them, simply because machine-made decisions will bring better result than man-made ones. Eventually a stage may be reached at which the decisions necessary to keep the system running will be so complex that human beings will be incapable of making them intelligently. At that stage the machines will be in effective control. People won't be able to just turn the machines off, because they will be so dependent on them that turning them off would amount to suicide.

174. On the other hand it is possible that human control over the machines may be retained. In that case the average man may have control over certain private machines of his own, such as his car or his personal computer, but control over large systems of machines will be in the hands of a tiny elite -- just as it is today, but with two difference. Due to improved techniques the elite will have greater control over the masses; and because human work will no longer be necessary the masses will be superfluous, a useless burden on the system. If the elite is ruthless they may simply decide to exterminate the mass of

humanity. If they are humane they may use propaganda or other psychological or biological techniques to reduce the birth rate until the mass of humanity becomes extinct, leaving the world to the elite. Or, if the elite consist of soft-hearted liberals, they may decide to play the role of good shepherds to the rest of the human race. They will see to it that everyone's physical needs are satisfied, that all children are raised under psychologically hygienic conditions, that everyone has a wholesome hobby to keep him busy, and that anyone who may become dissatisfied undergoes "treatment" to cure his "problem." Of course, life will be so purposeless that people will have to be biologically or psychologically engineered either to remove their need for the power process or to make them "sublimate" their drive for power into some harmless hobby. These engineered human beings may be happy in such a society, but they most certainly will not be free. They will have been reduced to the status of domestic animals.

175. But suppose now that the computer scientists do not succeed in developing artificial intelligence, so that human work remains necessary. Even so, machines will take care of more and more of the simpler tasks so that there will be an increasing surplus of human workers at the lower levels of ability. (We see this happening already. There are many people who find it difficult or impossible to get work, because for intellectual or psychological reasons they cannot acquire the level of training necessary to make themselves useful in the present system.) On those who are employed, ever-increasing demands will be placed; They will need more and more training, more and more ability, and will have to be ever more reliable, conforming and docile, because they will be more and more like cells of a giant organism. Their tasks will be increasingly specialized so that their work will be, in a sense, out of touch with the real world, being concentrated on one tiny slice of reality. The system will have to use any means that I can, whether psychological or biological, to engineer people to be docile, to have the abilities that the system requires and to "sublimate" their drive for power into some specialized task. But the statement that the people of such a society will have to be docile may require qualification. The society may find competitiveness useful, provided that ways are found of directing competitiveness into channels that serve that needs of the system. We can imagine into channels that serve the needs of the system. We can imagine a future society in which there is endless competition for positions of prestige and power. But no more than a very few people will ever reach the top, where the only real power is (see end of paragraph 163). Very repellent is a society in which a person can satisfy his needs for power only by pushing large numbers of other people out of the way and depriving them of THEIR opportunity for power.

176. Once can envision scenarios that incorporate aspects of more than one of the possibilities that we have just discussed. For instance, it may be that machines will take over most of the work that is of real, practical importance, but that human beings will be kept busy by being given relatively unimportant work. It has been suggested, for example, that a great development of the service of industries might provide work for human beings. Thus people will would spend their time shinning each others shoes, driving each other around inn taxicab, making handicrafts for one another, waiting on each other's tables, etc. This seems to us a thoroughly contemptible way for the human race to end up, and we doubt that many people would find fulfilling lives in such pointless busy-work. They would seek other, dangerous outlets (drugs, , crime, "cults," hate groups) unless they were biological or psychologically engineered to adapt them to such a way of life.

177. Needless to day, the scenarios outlined above do not exhaust all the possibilities. They only indicate

the kinds of outcomes that seem to us most likely. But we can envision no plausible scenarios that are any more palatable than the ones we've just described. It is overwhelmingly probable that if the industrial-technological system survives the next 40 to 100 years, it will by that time have developed certain general characteristics: Individuals (at least those of the "bourgeois" type, who are integrated into the system and make it run, and who therefore have all the power) will be more dependent than ever on large organizations; they will be more "socialized" than ever and their physical and mental qualities to a significant extent (possibly to a very great extent) will be those that are engineered into them rather than being the results of chance (or of God's will, or whatever); and whatever may be left of wild nature will be reduced to remnants preserved for scientific study and kept under the supervision and management of scientists (hence it will no longer be truly wild). In the long run (say a few centuries from now) it is likely that neither the human race nor any other important organisms will exist as we know them today, because once you start modifying organisms through genetic engineering there is no reason to stop at any particular point, so that the modifications will probably continue until man and other organisms have been utterly transformed.

178. Whatever else may be the case, it is certain that technology is creating for human beings a new physical and social environment radically different from the spectrum of environments to which natural selection has adapted the human race physically and psychologically. If man is not adjusted to this new environment by being artificially re-engineered, then he will be adapted to it through a long and painful process of natural selection. The former is far more likely than the latter.

179. It would be better to dump the whole stinking system and take the consequences.

STRATEGY

180. The technophiles are taking us all on an utterly reckless ride into the unknown. Many people understand something of what technological progress is doing to us yet take a passive attitude toward it because they think it is inevitable. But we (FC) don't think it is inevitable. We think it can be stopped, and we will give here some indications of how to go about stopping it.

181. As we stated in paragraph 166, the two main tasks for the present are to promote social stress and instability in industrial society and to develop and propagate an ideology that opposes technology and the industrial system. When the system becomes sufficiently stressed and unstable, a revolution against technology may be possible. The pattern would be similar to that of the French and Russian Revolutions. French society and Russian society, for several decades prior to their respective revolutions, showed increasing signs of stress and weakness. Meanwhile, ideologies were being developed that offered a new world view that was quite different from the old one. In the Russian case, revolutionaries were actively working to undermine the old order. Then, when the old system was put under sufficient additional stress (by financial crisis in France, by military defeat in Russia) it was swept away by revolution. What we propose is something along the same lines.

182. It will be objected that the French and Russian Revolutions were failures. But most revolutions have two goals. One is to destroy an old form of society and the other is to set up the new form of society envisioned by the revolutionaries. The French and Russian revolutionaries failed (fortunately!) to create the new kind of society of which they dreamed, but they were quite successful in destroying the existing form of society.

183. But an ideology, in order to gain enthusiastic support, must have a positive ideal as well as a negative one; it must be FOR something as well as AGAINST something. The positive ideal that we propose is Nature. That is, WILD nature; those aspects of the functioning of the Earth and its living things that are independent of human management and free of human interference and control. And with wild nature we include human nature, by which we mean those aspects of the functioning of the human individual that are not subject to regulation by organized society but are products of chance, or free will, or God (depending on your religious or philosophical opinions).

184. Nature makes a perfect counter-ideal to technology for several reasons. Nature (that which is outside the power of the system) is the opposite of technology (which seeks to expand indefinitely the power of the system). Most people will agree that nature is beautiful; certainly it has tremendous popular appeal. The radical environmentalists ALREADY hold an ideology that exalts nature and opposes technology. [30] It is not necessary for the sake of nature to set up some chimerical utopia or any new kind of social order. Nature takes care of itself: It was a spontaneous creation that existed long before any human society, and for countless centuries many different kinds of human societies coexisted with nature without doing it an excessive amount of damage. Only with the Industrial Revolution did the effect of human society on nature become really devastating. To relieve the pressure on nature it is not necessary to create a special kind of social system, it is only necessary to get rid of industrial society. Granted, this will not solve all problems. Industrial society has already done tremendous damage to nature and it will take a very long time for the scars to heal. Besides, even pre-industrial societies can do significant damage to nature. Nevertheless, getting rid of industrial society will accomplish a great deal. It will relieve the worst of the pressure on nature so that the scars can begin to heal. It will remove the capacity of organized society to keep increasing its control over nature (including human nature). Whatever kind of society may exist after the demise of the industrial system, it is certain that most people will live close to nature, because in the absence of advanced technology there is no other way that people CAN live. To feed themselves they must be peasants or herdsman or fishermen or hunter, etc., And, generally speaking, local autonomy should tend to increase, because lack of advanced technology and rapid communications will limit the capacity of governments or other large organizations to control local communities.

185. As for the negative consequences of eliminating industrial society -- well, you can't eat your cake and have it too. To gain one thing you have to sacrifice another.

186. Most people hate psychological conflict. For this reason they avoid doing any serious thinking about difficult social issues, and they like to have such issues presented to them in simple, black-and-white terms: THIS is all good and THAT is all bad. The revolutionary ideology should therefore be

developed on two levels.

187. On the more sophisticated level the ideology should address itself to people who are intelligent, thoughtful and rational. The object should be to create a core of people who will be opposed to the industrial system on a rational, thought-out basis, with full appreciation of the problems and ambiguities involved, and of the price that has to be paid for getting rid of the system. It is particularly important to attract people of this type, as they are capable people and will be instrumental in influencing others. These people should be addressed on as rational a level as possible. Facts should never intentionally be distorted and intemperate language should be avoided. This does not mean that no appeal can be made to the emotions, but in making such appeal care should be taken to avoid misrepresenting the truth or doing anything else that would destroy the intellectual respectability of the ideology.

188. On a second level, the ideology should be propagated in a simplified form that will enable the unthinking majority to see the conflict of technology vs. nature in unambiguous terms. But even on this second level the ideology should not be expressed in language that is so cheap, intemperate or irrational that it alienates people of the thoughtful and rational type. Cheap, intemperate propaganda sometimes achieves impressive short-term gains, but it will be more advantageous in the long run to keep the loyalty of a small number of intelligently committed people than to arouse the passions of an unthinking, fickle mob who will change their attitude as soon as someone comes along with a better propaganda gimmick. However, propaganda of the rabble-rousing type may be necessary when the system is nearing the point of collapse and there is a final struggle between rival ideologies to determine which will become dominant when the old world-view goes under.

189. Prior to that final struggle, the revolutionaries should not expect to have a majority of people on their side. History is made by active, determined minorities, not by the majority, which seldom has a clear and consistent idea of what it really wants. Until the time comes for the final push toward revolution [31], the task of revolutionaries will be less to win the shallow support of the majority than to build a small core of deeply committed people. As for the majority, it will be enough to make them aware of the existence of the new ideology and remind them of it frequently; though of course it will be desirable to get majority support to the extent that this can be done without weakening the core of seriously committed people.

190. Any kind of social conflict helps to destabilize the system, but one should be careful about what kind of conflict one encourages. The line of conflict should be drawn between the mass of the people and the power-holding elite of industrial society (politicians, scientists, upper-level business executives, government officials, etc.). It should NOT be drawn between the revolutionaries and the mass of the people. For example, it would be bad strategy for the revolutionaries to condemn Americans for their habits of consumption. Instead, the average American should be portrayed as a victim of the advertising and marketing industry, which has suckered him into buying a lot of junk that he doesn't need and that is very poor compensation for his lost freedom. Either approach is consistent with the facts. It is merely a matter of attitude whether you blame the advertising industry for manipulating the public or blame the public for allowing itself to be manipulated. As a matter of strategy one should generally avoid blaming the public.

191. One should think twice before encouraging any other social conflict than that between the power-holding elite (which wields technology) and the general public (over which technology exerts its power). For one thing, other conflicts tend to distract attention from the important conflicts (between power-elite and ordinary people, between technology and nature); for another thing, other conflicts may actually tend to encourage technologization, because each side in such a conflict wants to use technological power to gain advantages over its adversary. This is clearly seen in rivalries between nations. It also appears in ethnic conflicts within nations. For example, in America many black leaders are anxious to gain power for African Americans by placing back individuals in the technological power-elite. They want there to be many black government officials, scientists, corporation executives and so forth. In this way they are helping to absorb the African American subculture into the technological system. Generally speaking, one should encourage only those social conflicts that can be fitted into the framework of the conflicts of power--elite vs. ordinary people, technology vs nature.

192. But the way to discourage ethnic conflict is NOT through militant advocacy of minority rights (see paragraphs 21, 29). Instead, the revolutionaries should emphasize that although minorities do suffer more or less disadvantage, this disadvantage is of peripheral significance. Our real enemy is the industrial-technological system, and in the struggle against the system, ethnic distinctions are of no importance.

193. The kind of revolution we have in mind will not necessarily involve an armed uprising against any government. It may or may not involve physical violence, but it will not be a POLITICAL revolution. Its focus will be on technology and economics, not politics. [32]

194. Probably the revolutionaries should even AVOID assuming political power, whether by legal or illegal means, until the industrial system is stressed to the danger point and has proved itself to be a failure in the eyes of most people. Suppose for example that some "green" party should win control of the United States Congress in an election. In order to avoid betraying or watering down their own ideology they would have to take vigorous measures to turn economic growth into economic shrinkage. To the average man the results would appear disastrous: There would be massive unemployment, shortages of commodities, etc. Even if the grosser ill effects could be avoided through superhumanly skillful management, still people would have to begin giving up the luxuries to which they have become addicted. Dissatisfaction would grow, the "green" party would be voted out of office and the revolutionaries would have suffered a severe setback. For this reason the revolutionaries should not try to acquire political power until the system has gotten itself into such a mess that any hardships will be seen as resulting from the failures of the industrial system itself and not from the policies of the revolutionaries. The revolution against technology will probably have to be a revolution by outsiders, a revolution from below and not from above.

195. The revolution must be international and worldwide. It cannot be carried out on a nation-by-nation basis. Whenever it is suggested that the United States, for example, should cut back on technological progress or economic growth, people get hysterical and start screaming that if we fall behind in

technology the Japanese will get ahead of us. Holy robots The world will fly off its orbit if the Japanese ever sell more cars than we do! (Nationalism is a great promoter of technology.) More reasonably, it is argued that if the relatively democratic nations of the world fall behind in technology while nasty, dictatorial nations like China, Vietnam and North Korea continue to progress, eventually the dictators may come to dominate the world. That is why the industrial system should be attacked in all nations simultaneously, to the extent that this may be possible. True, there is no assurance that the industrial system can be destroyed at approximately the same time all over the world, and it is even conceivable that the attempt to overthrow the system could lead instead to the domination of the system by dictators. That is a risk that has to be taken. And it is worth taking, since the difference between a "democratic" industrial system and one controlled by dictators is small compared with the difference between an industrial system and a non-industrial one. [33] It might even be argued that an industrial system controlled by dictators would be preferable, because dictator-controlled systems usually have proved inefficient, hence they are presumably more likely to break down. Look at Cuba.

196. Revolutionaries might consider favoring measures that tend to bind the world economy into a unified whole. Free trade agreements like NAFTA and GATT are probably harmful to the environment in the short run, but in the long run they may perhaps be advantageous because they foster economic interdependence between nations. I will be eaier to destroy the industrial system on a worldwide basis if he world economy is so unified that its breakdown in any on major nation will lead to its breakdwon in al industrialized nations.

the long run they may perhaps be advantageous because they foster economic interdependence between nations. It will be easier to destroy the industrial system on a worldwide basis if the world economy is so unified that its breakdown in any one major nation will lead to its breakdown in all industrialized nations.

197. Some people take the line that modern man has too much power, too much control over nature; they argue for a more passive attitude on the part of the human race. At best these people are expressing themselves unclearly, because they fail to distinguish between power for LARGE ORGANIZATIONS and power for INDIVIDUALS and SMALL GROUPS. It is a mistake to argue for powerlessness and passivity, because people NEED power. Modern man as a collective entity--that is, the industrial system--has immense power over nature, and we (FC) regard this as evil. But modern INDIVIDUALS and SMALL GROUPS OF INDIVIDUALS have far less power than primitive man ever did. Generally speaking, the vast power of "modern man" over nature is exercised not by individuals or small groups but by large organizations. To the extent that theaverage modern INDIVIDUAL can wield the power of technology, he is permitted to do so only within narrow limits and only under the supervision and control of the system. (You need a license for everything and with the license come rules and regulations). The individual has only those technological powers with which the system chooses to provide him. His PERSONAL power over nature is slight.

198. Primitive INDIVIDUALS and SMALL GROUPS actually had considerable power over nature; or maybe it would be better to say power WITHIN nature. When primitive man needed food he knew how to find and prepare edible roots, how to track game and take it with homemade weapons. He knew how

to protect himself from heat, cold, rain, dangerous animals, etc. But primitive man did relatively little damage to nature because the COLLECTIVE power of primitive society was negligible compared to the COLLECTIVE power of industrial society.

199. Instead of arguing for powerlessness and passivity, one should argue that the power of the INDUSTRIAL SYSTEM should be broken, and that this will greatly INCREASE the power and freedom of INDIVIDUALS and SMALL GROUPS.

200. Until the industrial system has been thoroughly wrecked, the destruction of that system must be the revolutionaries' ONLY goal. Other goals would distract attention and energy from the main goal. More importantly, if the revolutionaries permit themselves to have any other goal than the destruction of technology, they will be tempted to use technology as a tool for reaching that other goal. If they give in to that temptation, they will fall right back into the technological trap, because modern technology is a unified, tightly organized system, so that, in order to retain SOME technology, one finds oneself obliged to retain MOST technology, hence one ends up sacrificing only token amounts of technology.

201. Suppose for example that the revolutionaries took "social justice" as a goal. Human nature being what it is, social justice would not come about spontaneously; it would have to be enforced. In order to enforce it the revolutionaries would have to retain central organization and control. For that they would need rapid long-distance transportation and communication, and therefore all the technology needed to support the transportation and communication systems. To feed and clothe poor people they would have to use agricultural and manufacturing technology. And so forth. So that the attempt to insure social justice would force them to retain most parts of the technological system. Not that we have anything against social justice, but it must not be allowed to interfere with the effort to get rid of the technological system.

202. It would be hopeless for revolutionaries to try to attack the system without using SOME modern technology. If nothing else they must use the communications media to spread their message. But they should use modern technology for only ONE purpose: to attack the technological system.

203. Imagine an alcoholic sitting with a barrel of wine in front of him. Suppose he starts saying to himself, "Wine isn't bad for you if used in moderation. Why, they say small amounts of wine are even good for you! It won't do me any harm if I take just one little drink..." Well you know what is going to happen. Never forget that the human race with technology is just like an alcoholic with a barrel of wine.

204. Revolutionaries should have as many children as they can. There is strong scientific evidence that social attitudes are to a significant extent inherited. No one suggests that a social attitude is a direct outcome of a person's genetic constitution, but it appears that personality traits tend, within the context of our society, to make a person more likely to hold this or that social attitude. Objections to these findings have been raised, but objections are feeble and seem to be ideologically motivated. In any event, no one denies that children tend on the average to hold social attitudes similar to those of their parents. From our point of view it doesn't matter all that much whether the attitudes are passed on

genetically or through childhood training. In either case the ARE passed on.

205. The trouble is that many of the people who are inclined to rebel against the industrial system are also concerned about the population problems, hence they are apt to have few or no children. In this way they may be handing the world over to the sort of people who support or at least accept the industrial system. To insure the strength of the next generation of revolutionaries the present generation must reproduce itself abundantly. In doing so they will be worsening the population problem only slightly. And the most important problem is to get rid of the industrial system, because once the industrial system is gone the world's population necessarily will decrease (see paragraph 167); whereas, if the industrial system survives, it will continue developing new techniques of food production that may enable the world's population to keep increasing almost indefinitely.

206. With regard to revolutionary strategy, the only points on which we absolutely insist are that the single overriding goal must be the elimination of modern technology, and that no other goal can be allowed to compete with this one. For the rest, revolutionaries should take an empirical approach. If experience indicates that some of the recommendations made in the foregoing paragraphs are not going to give good results, then those recommendations should be discarded.

TWO KINDS OF TECHNOLOGY

207. An argument likely to be raised against our proposed revolution is that it is bound to fail, because (it is claimed) throughout history technology has always progressed, never regressed, hence technological regression is impossible. But this claim is false.

208. We distinguish between two kinds of technology, which we will call small-scale technology and organization-dependent technology. Small-scale technology is technology that can be used by small-scale communities without outside assistance. Organization-dependent technology is technology that depends on large-scale social organization. We are aware of no significant cases of regression in small-scale technology. But organization-dependent technology DOES regress when the social organization on which it depends breaks down. Example: When the Roman Empire fell apart the Romans' small-scale technology survived because any clever village craftsman could build, for instance, a water wheel, any skilled smith could make steel by Roman methods, and so forth. But the Romans' organization-dependent technology DID regress. Their aqueducts fell into disrepair and were never rebuilt. Their techniques of road construction were lost. The Roman system of urban sanitation was forgotten, so that until rather recent times did the sanitation of European cities that of Ancient Rome.

209. The reason why technology has seemed always to progress is that, until perhaps a century or two before the Industrial Revolution, most technology was small-scale technology. But most of the technology developed since the Industrial Revolution is organization-dependent technology. Take the refrigerator for example. Without factory-made parts or the facilities of a post-industrial machine shop it

would be virtually impossible for a handful of local craftsmen to build a refrigerator. If by some miracle they did succeed in building one it would be useless to them without a reliable source of electric power. So they would have to dam a stream and build a generator. Generators require large amounts of copper wire. Imagine trying to make that wire without modern machinery. And where would they get a gas suitable for refrigeration? It would be much easier to build an icehouse or preserve food by drying or picking, as was done before the invention of the refrigerator.

210. So it is clear that if the industrial system were once thoroughly broken down, refrigeration technology would quickly be lost. The same is true of other organization-dependent technology. And once this technology had been lost for a generation or so it would take centuries to rebuild it, just as it took centuries to build it the first time around. Surviving technical books would be few and scattered. An industrial society, if built from scratch without outside help, can only be built in a series of stages: You need tools to make tools to make tools to make tools A long process of economic development and progress in social organization is required. And, even in the absence of an ideology opposed to technology, there is no reason to believe that anyone would be interested in rebuilding industrial society. The enthusiasm for "progress" is a phenomenon particular to the modern form of society, and it seems not to have existed prior to the 17th century or thereabouts.

211. In the late Middle Ages there were four main civilizations that were about equally "advanced": Europe, the Islamic world, India, and the Far East (China, Japan, Korea). Three of those civilizations remained more or less stable, and only Europe became dynamic. No one knows why Europe became dynamic at that time; historians have their theories but these are only speculation. At any rate, it is clear that rapid development toward a technological form of society occurs only under special conditions. So there is no reason to assume that long-lasting technological regression cannot be brought about.

212. Would society EVENTUALLY develop again toward an industrial-technological form? Maybe, but there is no use in worrying about it, since we can't predict or control events 500 or 1,000 years in the future. Those problems must be dealt with by the people who will live at that time.

THE DANGER OF LEFTISM

213. Because of their need for rebellion and for membership in a movement, leftists or persons of similar psychological type are often unattracted to a rebellious or activist movement whose goals and membership are not initially leftist. The resulting influx of leftish types can easily turn a non-leftist movement into a leftist one, so that leftist goals replace or distort the original goals of the movement.

214. To avoid this, a movement that exalts nature and opposes technology must take a resolutely anti-leftist stance and must avoid all collaboration with leftists. Leftism is in the long run inconsistent with wild nature, with human freedom and with the elimination of modern technology. Leftism is collectivist; it seeks to bind together the entire world (both nature and the human race) into a unified whole. But this

implies management of nature and of human life by organized society, and it requires advanced technology. You can't have a united world without rapid transportation and communication, you can't make all people love one another without sophisticated psychological techniques, you can't have a "planned society" without the necessary technological base. Above all, leftism is driven by the need for power, and the leftist seeks power on a collective basis, through identification with a mass movement or an organization. Leftism is unlikely ever to give up technology, because technology is too valuable a source of collective power.

215. The anarchist [34] too seeks power, but he seeks it on an individual or small-group basis; he wants individuals and small groups to be able to control the circumstances of their own lives. He opposes technology because it makes small groups dependent on large organizations.

216. Some leftists may seem to oppose technology, but they will oppose it only so long as they are outsiders and the technological system is controlled by non-leftists. If leftism ever becomes dominant in society, so that the technological system becomes a tool in the hands of leftists, they will enthusiastically use it and promote its growth. In doing this they will be repeating a pattern that leftism has shown again and again in the past. When the Bolsheviks in Russia were outsiders, they vigorously opposed censorship and the secret police, they advocated self-determination for ethnic minorities, and so forth; but as soon as they came into power themselves, they imposed a tighter censorship and created a more ruthless secret police than any that had existed under the tsars, and they oppressed ethnic minorities at least as much as the tsars had done. In the United States, a couple of decades ago when leftists were a minority in our universities, leftist professors were vigorous proponents of academic freedom, but today, in those universities where leftists have become dominant, they have shown themselves ready to take away from everyone else's academic freedom. (This is "political correctness.") The same will happen with leftists and technology: They will use it to oppress everyone else if they ever get it under their own control.

217. In earlier revolutions, leftists of the most power-hungry type, repeatedly, have first cooperated with non-leftist revolutionaries, as well as with leftists of a more libertarian inclination, and later have double-crossed them to seize power for themselves. Robespierre did this in the French Revolution, the Bolsheviks did it in the Russian Revolution, the communists did it in Spain in 1938 and Castro and his followers did it in Cuba. Given the past history of leftism, it would be utterly foolish for non-leftist revolutionaries today to collaborate with leftists.

218. Various thinkers have pointed out that leftism is a kind of religion. Leftism is not a religion in the strict sense because leftist doctrine does not postulate the existence of any supernatural being. But for the leftist, leftism plays a psychological role much like that which religion plays for some people. The leftist **NEEDS** to believe in leftism; it plays a vital role in his psychological economy. His beliefs are not easily modified by logic or facts. He has a deep conviction that leftism is morally Right with a capital R, and that he has not only a right but a duty to impose leftist morality on everyone. (However, many of the people we are referring to as "leftists" do not think of themselves as leftists and would not describe their system of beliefs as leftism. We use the term "leftism" because we don't know of any better words to designate the spectrum of related creeds that includes the feminist, gay rights, political correctness, etc.,

movements, and because these movements have a strong affinity with the old left. See paragraphs 227-230.)

219. Leftism is totalitarian force. Wherever leftism is in a position of power it tends to invade every private corner and force every thought into a leftist mold. In part this is because of the quasi-religious character of leftism; everything contrary to leftists beliefs represents Sin. More importantly, leftism is a totalitarian force because of the leftists' drive for power. The leftist seeks to satisfy his need for power through identification with a social movement and he tries to go through the power process by helping to pursue and attain the goals of the movement (see paragraph 83). But no matter how far the movement has gone in attaining its goals the leftist is never satisfied, because his activism is a surrogate activity (see paragraph 41). That is, the leftist's real motive is not to attain the ostensible goals of leftism; in reality he is motivated by the sense of power he gets from struggling for and then reaching a social goal. [35]

Consequently the leftist is never satisfied with the goals he has already attained; his need for the power process leads him always to pursue some new goal. The leftist wants equal opportunities for minorities. When that is attained he insists on statistical equality of achievement by minorities. And as long as anyone harbors in some corner of his mind a negative attitude toward some minority, the leftist has to re-educate him. And ethnic minorities are not enough; no one can be allowed to have a negative attitude toward homosexuals, disabled people, fat people, old people, ugly people, and on and on and on. It's not enough that the public should be informed about the hazards of smoking; a warning has to be stamped on every package of cigarettes. Then cigarette advertising has to be restricted if not banned. The activists will never be satisfied until tobacco is outlawed, and after that it will be also hot then junk food, etc. Activists have fought gross child abuse, which is reasonable. But now they want to stop all spanking. When they have done that they will want to ban something else they consider unwholesome, then another thing and then another. They will never be satisfied until they have complete control over all child rearing practices. And then they will move on to another cause.

220. Suppose you asked leftists to make a list of ALL the things that were wrong with society, and then suppose you instituted EVERY social change that they demanded. It is safe to say that within a couple of years the majority of leftists would find something new to complain about, some new social "evil" to correct because, once again, the leftist is motivated less by distress at society's ills than by the need to satisfy his drive for power by imposing his solutions on society.

221. Because of the restrictions placed on their thoughts and behavior by their high level of socialization, many leftists of the over-socialized type cannot pursue power in the ways that other people do. For them the drive for power has only one morally acceptable outlet, and that is in the struggle to impose their morality on everyone.

222. Leftists, especially those of the oversocialized type, are True Believers in the sense of Eric Hoffer's book, "The True Believer." But not all True Believers are of the same psychological type as leftists. Presumably a truebelieving nazi, for instance is very different psychologically from a truebelieving

leftist. Because of their capacity for single-minded devotion to a cause, True Believers are a useful, perhaps a necessary, ingredient of any revolutionary movement. This presents a problem with which we must admit we don't know how to deal. We aren't sure how to harness the energies of the True Believer to a revolution against technology. At present all we can say is that no True Believer will make a safe recruit to the revolution unless his commitment is exclusively to the destruction of technology. If he is committed also to another ideal, he may want to use technology as a tool for pursuing that other ideal (see paragraphs 220, 221).

223. Some readers may say, "This stuff about leftism is a lot of crap. I know John and Jane who are leftish types and they don't have all these totalitarian tendencies." It's quite true that many leftists, possibly even a numerical majority, are decent people who sincerely believe in tolerating others' values (up to a point) and wouldn't want to use high-handed methods to reach their social goals. Our remarks about leftism are not meant to apply to every individual leftist but to describe the general character of leftism as a movement. And the general character of a movement is not necessarily determined by the numerical proportions of the various kinds of people involved in the movement.

224. The people who rise to positions of power in leftist movements tend to be leftists of the most power-hungry type because power-hungry people are those who strive hardest to get into positions of power. Once the power-hungry types have captured control of the movement, there are many leftists of a gentler breed who inwardly disapprove of many of the actions of the leaders, but cannot bring themselves to oppose them. They NEED their faith in the movement, and because they cannot give up this faith they go along with the leaders. True, SOME leftists do have the guts to oppose the totalitarian tendencies that emerge, but they generally lose, because the power-hungry types are better organized, are more ruthless and Machiavellian and have taken care to build themselves a strong power base.

225. These phenomena appeared clearly in Russia and other countries that were taken over by leftists. Similarly, before the breakdown of communism in the USSR, leftish types in the West would seldom criticize that country. If prodded they would admit that the USSR did many wrong things, but then they would try to find excuses for the communists and begin talking about the faults of the West. They always opposed Western military resistance to communist aggression. Leftish types all over the world vigorously protested the U.S. military action in Vietnam, but when the USSR invaded Afghanistan they did nothing. Not that they approved of the Soviet actions; but because of their leftist faith, they just couldn't bear to put themselves in opposition to communism. Today, in those of our universities where "political correctness" has become dominant, there are probably many leftish types who privately disapprove of the suppression of academic freedom, but they go along with it anyway.

226. Thus the fact that many individual leftists are personally mild and fairly tolerant people by no means prevents leftism as a whole from having a totalitarian tendency.

227. Our discussion of leftism has a serious weakness. It is still far from clear what we mean by the word "leftist." There doesn't seem to be much we can do about this. Today leftism is fragmented into a whole spectrum of activist movements. Yet not all activist movements are leftist, and some activist

movements (e.g., radical environmentalism) seem to include both personalities of the leftist type and personalities of thoroughly un-leftist types who ought to know better than to collaborate with leftists. Varieties of leftists fade out gradually into varieties of non-leftists and we ourselves would often be hard-pressed to decide whether a given individual is or is not a leftist. To the extent that it is defined at all, our conception of leftism is defined by the discussion of it that we have given in this article, and we can only advise the reader to use his own judgment in deciding who is a leftist.

228. But it will be helpful to list some criteria for diagnosing leftism. These criteria cannot be applied in a cut and dried manner. Some individuals may meet some of the criteria without being leftists, some leftists may not meet any of the criteria. Again, you just have to use your judgment.

229. The leftist is oriented toward largescale collectivism. He emphasizes the duty of the individual to serve society and the duty of society to take care of the individual. He has a negative attitude toward individualism. He often takes a moralistic tone. He tends to be for gun control, for sex education and other psychologically "enlightened" educational methods, for planning, for affirmative action, for multiculturalism. He tends to identify with victims. He tends to be against competition and against violence, but he often finds excuses for those leftists who do commit violence. He is fond of using the common catch-phrases of the left like "racism," "sexism," "homophobia," "capitalism," "imperialism," "neocolonialism," "genocide," "social change," "social justice," "social responsibility." Maybe the best diagnostic trait of the leftist is his tendency to sympathize with the following movements: feminism, gay rights, ethnic rights, disability rights, animal rights political correctness. Anyone who strongly sympathizes with ALL of these movements is almost certainly a leftist. [36]

230. The more dangerous leftists, that is, those who are most power-hungry, are often characterized by arrogance or by a dogmatic approach to ideology. However, the most dangerous leftists of all may be certain oversocialized types who avoid irritating displays of aggressiveness and refrain from advertising their leftism, but work quietly and unobtrusively to promote collectivist values, "enlightened" psychological techniques for socializing children, dependence of the individual on the system, and so forth. These crypto-leftists (as we may call them) approximate certain bourgeois types as far as practical action is concerned, but differ from them in psychology, ideology and motivation. The ordinary bourgeois tries to bring people under control of the system in order to protect his way of life, or he does so simply because his attitudes are conventional. The crypto-leftist tries to bring people under control of the system because he is a True Believer in a collectivistic ideology. The crypto-leftist is differentiated from the average leftist of the oversocialized type by the fact that his rebellious impulse is weaker and he is more securely socialized. He is differentiated from the ordinary well-socialized bourgeois by the fact that there is some deep lack within him that makes it necessary for him to devote himself to a cause and immerse himself in a collectivity. And maybe his (well-sublimated) drive for power is stronger than that of the average bourgeois.

FINAL NOTE

231. Throughout this article we've made imprecise statements and statements that ought to have had all

sorts of qualifications and reservations attached to them; and some of our statements may be flatly false. Lack of sufficient information and the need for brevity made it impossible for us to formulate our assertions more precisely or add all the necessary qualifications. And of course in a discussion of this kind one must rely heavily on intuitive judgment, and that can sometimes be wrong. So we don't claim that this article expresses more than a crude approximation to the truth.

232. All the same we are reasonably confident that the general outlines of the picture we have painted here are roughly correct. We have portrayed leftism in its modern form as a phenomenon peculiar to our time and as a symptom of the disruption of the power process. But we might possibly be wrong about this. Oversocialized types who try to satisfy their drive for power by imposing their morality on everyone have certainly been around for a long time. But we THINK that the decisive role played by feelings of inferiority, low self-esteem, powerlessness, identification with victims by people who are not themselves victims, is a peculiarity of modern leftism. Identification with victims by people not themselves victims can be seen to some extent in 19th century leftism and early Christianity but as far as we can make out, symptoms of low self-esteem, etc., were not nearly so evident in these movements, or in any other movements, as they are in modern leftism. But we are not in a position to assert confidently that no such movements have existed prior to modern leftism. This is a significant question to which historians ought to give their attention.

NOTES

1. (Paragraph 19) We are asserting that ALL, or even most, bullies and ruthless competitors suffer from feelings of inferiority.
2. (Paragraph 25) During the Victorian period many oversocialized people suffered from serious psychological problems as a result of repressing or trying to repress their sexual feelings. Freud apparently based his theories on people of this type. Today the focus of socialization has shifted from sex to aggression.
3. (Paragraph 27) Not necessarily including specialists in engineering "hard" sciences.
4. (Paragraph 28) There are many individuals of the middle and upper classes who resist some of these values, but usually their resistance is more or less covert. Such resistance appears in the mass media only to a very limited extent. The main thrust of propaganda in our society is in favor of the stated values.

The main reasons why these values have become, so to speak, the official values of our society is that they are useful to the industrial system. Violence is discouraged because it disrupts the functioning of the system. Racism is discouraged because ethnic conflicts also disrupt the system, and discrimination wastes the talent of minority-group members who could be useful to the system. Poverty must be "cured" because the underclass causes problems for the system and contact with the underclass lowers the moral of the other classes. Women are encouraged to have careers because their talents are useful to the system and, more importantly because by having regular jobs women become better integrated into

the system and tied directly to it rather than to their families. This helps to weaken family solidarity. (The leaders of the system say they want to strengthen the family, but they really mean is that they want the family to serve as an effective tool for socializing children in accord with the needs of the system. We argue in paragraphs 51,52 that the system cannot afford to let the family or other small-scale social groups be strong or autonomous.)

5. (Paragraph 42) It may be argued that the majority of people don't want to make their own decisions but want leaders to do their thinking for them. There is an element of truth in this. People like to make their own decisions in small matters, but making decisions on difficult, fundamental questions require facing up to psychological conflict, and most people hate psychological conflict. Hence they tend to lean on others in making difficult decisions. The majority of people are natural followers, not leaders, but they like to have direct personal access to their leaders and participate to some extent in making difficult decisions. At least to that degree they need autonomy.

6. (Paragraph 44) Some of the symptoms listed are similar to those shown by caged animals.

To explain how these symptoms arise from deprivation with respect to the power process:

Common-sense understanding of human nature tells one that lack of goals whose attainment requires effort leads to boredom and that boredom, long continued, often leads eventually to depression. Failure to obtain goals leads to frustration and lowering of self-esteem. Frustration leads to anger, anger to aggression, often in the form of spouse or child abuse. It has been shown that long-continued frustration commonly leads to depression and that depression tends to cause guilt, sleep disorders, eating disorders and bad feelings about oneself. Those who are tending toward depression seek pleasure as an antidote; hence insatiable hedonism and excessive sex, with perversions as a means of getting new kicks. Boredom too tends to cause excessive pleasure-seeking since, lacking other goals, people often use pleasure as a goal. See accompanying diagram. The foregoing is a simplification. Reality is more complex, and of course deprivation with respect to the power process is not the ONLY cause of the symptoms described. By the way, when we mention depression we do not necessarily mean depression that is severe enough to be treated by a psychiatrist. Often only mild forms of depression are involved. And when we speak of goals we do not necessarily mean long-term, thought out goals. For many or most people through much of human history, the goals of a hand-to-mouth existence (merely providing oneself and one's family with food from day to day) have been quite sufficient.

7. (Paragraph 52) A partial exception may be made for a few passive, inward looking groups, such as the Amish, which have little effect on the wider society. Apart from these, some genuine small-scale communities do exist in America today. For instance, youth gangs and "cults". Everyone regards them as dangerous, and so they are, because the members of these groups are loyal primarily to one another rather than to the system, hence the system cannot control them. Or take the gypsies. The gypsies commonly get away with theft and fraud because their loyalties are such that they can always get other gypsies to give testimony that "proves" their innocence. Obviously the system would be in serious trouble if too many people belonged to such groups. Some of the early-20th century Chinese thinkers

who were concerned with modernizing China recognized the necessity of breaking down small-scale social groups such as the family: "(According to Sun Yat-sen) The Chinese people needed a new surge of patriotism, which would lead to a transfer of loyalty from the family to the state. . .(According to Li Huang) traditional attachments, particularly to the family had to be abandoned if nationalism were to develop to China." (Chester C. Tan, *Chinese Political Thought in the Twentieth Century*," page 125, page 297.)

8. (Paragraph 56) Yes, we know that 19th century America had its problems, and serious ones, but for the sake of brevity we have to express ourselves in simplified terms.

9. (Paragraph 61) We leave aside the underclass. We are speaking of the mainstream.

10. (Paragraph 62) Some social scientists, educators, "mental health" professionals and the like are doing their best to push the social drives into group 1 by trying to see to it that everyone has a satisfactory social life.

11. (Paragraphs 63, 82) Is the drive for endless material acquisition really an artificial creation of the advertising and marketing industry? Certainly there is no innate human drive for material acquisition. There have been many cultures in which people have desired little material wealth beyond what was necessary to satisfy their basic physical needs (Australian aborigines, traditional Mexican peasant culture, some African cultures). On the other hand there have also been many pre-industrial cultures in which material acquisition has played an important role. So we can't claim that today's acquisition-oriented culture is exclusively a creation of the advertising and marketing industry. But it is clear that the advertising and marketing industry has had an important part in creating that culture. The big corporations that spend millions on advertising wouldn't be spending that kind of money without solid proof that they were getting it back in increased sales. One member of FC met a sales manager a couple of years ago who was frank enough to tell him, "Our job is to make people buy things they don't want and don't need." He then described how an untrained novice could present people with the facts about a product, and make no sales at all, while a trained and experienced professional salesman would make lots of sales to the same people. This shows that people are manipulated into buying things they don't really want.

12. (Paragraph 64) The problem of purposelessness seems to have become less serious during the last 15 years or so, because people now feel less secure physically and economically than they did earlier, and the need for security provides them with a goal. But purposelessness has been replaced by frustration over the difficulty of attaining security. We emphasize the problem of purposelessness because the liberals and leftists would wish to solve our social problems by having society guarantee everyone's security; but if that could be done it would only bring back the problem of purposelessness. The real issue is not whether society provides well or poorly for people's security; the trouble is that people are dependent on the system for their security rather than having it in their own hands. This, by the way, is part of the reason why some people get worked up about the right to bear arms; possession of a gun puts that aspect of their security in their own hands.

13. (Paragraph 66) Conservatives' efforts to decrease the amount of government regulation are of little benefit to the average man. For one thing, only a fraction of the regulations can be eliminated because most regulations are necessary. For another thing, most of the deregulation affects business rather than the average individual, so that its main effect is to take power from the government and give it to private corporations. What this means for the average man is that government interference in his life is replaced by interference from big corporations, which may be permitted, for example, to dump more chemicals that get into his water supply and give him cancer. The conservatives are just taking the average man for a sucker, exploiting his resentment of Big Government to promote the power of Big Business.

14. (Paragraph 73) When someone approves of the purpose for which propaganda is being used in a given case, he generally calls it "education" or applies to it some similar euphemism. But propaganda is propaganda regardless of the purpose for which it is used.

15. (Paragraph 83) We are not expressing approval or disapproval of the Panama invasion. We only use it to illustrate a point.

16. (Paragraph 95) When the American colonies were under British rule there were fewer and less effective legal guarantees of freedom than there were after the American Constitution went into effect, yet there was more personal freedom in pre-industrial America, both before and after the War of Independence, than there was after the Industrial Revolution took hold in this country. We quote from "Violence in America: Historical and Comparative perspectives," edited by Hugh Davis Graham and Ted Robert Gurr, Chapter 12 by Roger Lane, pages 476-478: "The progressive heightening of standards of property, and with it the increasing reliance on official law enforcement (in 19th century America). . . were common to the whole society. . . [T]he change in social behavior is so long term and so widespread as to suggest a connection with the most fundamental of contemporary social processes; that of industrial urbanization itself. . ." "Massachusetts in 1835 had a population of some 660,940, 81 percent rural, overwhelmingly preindustrial and native born. Its citizens were used to considerable personal freedom. Whether teamsters, farmers or artisans, they were all accustomed to setting their own schedules, and the nature of their work made them physically dependent on each other. . . Individual problems, sins or even crimes, were not generally cause for wider social concern. . ." "But the impact of the twin movements to the city and to the factory, both just gathering force in 1835, had a progressive effect on personal behavior throughout the 19th century and into the 20th. The factory demanded regularity of behavior, a life governed by obedience to the rhythms of clock and calendar, the demands of foreman and supervisor. In the city or town, the needs of living in closely packed neighborhoods inhibited many actions previously unobjectionable.

Both blue- and white-collar employees in larger establishments were mutually dependent on their fellows. as one man's work fit into another's, so one man's business was no longer his own. "The results of the new organization of life and work were apparent by 1900, when some 76 percent of the 2,805,346 inhabitants of Massachusetts were classified as urbanites. Much violent or irregular behavior which had been tolerable in a casual, independent society was no longer acceptable in the more formalized, cooperative atmosphere of the later period. . . The move to the cities had, in short, produced a more

tractable, more socialized, more 'civilized' generation than its predecessors."

17. (Paragraph 117) Apologists for the system are fond of citing cases in which elections have been decided by one or two votes, but such cases are rare.

18. (Paragraph 119) "Today, in technologically advanced lands, men live very similar lives in spite of geographical, religious and political differences. The daily lives of a Christian bank clerk in Chicago, a Buddhist bank clerk in Tokyo, a Communist bank clerk in Moscow are far more alike than the life any one of them is like that of any single man who lived a thousand years ago. These similarities are the result of a common technology. . ." L. Sprague de Camp, "The Ancient Engineers," Ballentine edition, page 17.

The lives of the three bank clerks are not IDENTICAL. Ideology does have SOME effect. But all technological societies, in order to survive, must evolve along APPROXIMATELY the same trajectory.

19. (Paragraph 123) Just think an irresponsible genetic engineer might create a lot of terrorists.

20. (Paragraph 124) For a further example of undesirable consequences of medical progress, suppose a reliable cure for cancer is discovered. Even if the treatment is too expensive to be available to any but the elite, it will greatly reduce their incentive to stop the escape of carcinogens into the environment.

21. (Paragraph 128) Since many people may find paradoxical the notion that a large number of good things can add up to a bad thing, we will illustrate with an analogy. Suppose Mr. A is playing chess with Mr. B. Mr. C, a Grand Master, is looking over Mr. A's shoulder. Mr. A of course wants to win his game, so if Mr. C points out a good move for him to make, he is doing Mr. A a favor. But suppose now that Mr. C tells Mr. A how to make ALL of his moves. In each particular instance he does Mr. A a favor by showing him his best move, but by making ALL of his moves for him he spoils the game, since there is not point in Mr. A's playing the game at all if someone else makes all his moves.

The situation of modern man is analogous to that of Mr. A. The system makes an individual's life easier for him in innumerable ways, but in doing so it deprives him of control over his own fate.

22. (Paragraph 137) Here we are considering only the conflict of values within the mainstream. For the sake of simplicity we leave out of the picture "outsider" values like the idea that wild nature is more important than human economic welfare.

23. (Paragraph 137) Self-interest is not necessarily MATERIAL self-interest. It can consist in fulfillment of some psychological need, for example, by promoting one's own ideology or religion.

24. (Paragraph 139) A qualification: It is in the interest of the system to permit a certain prescribed degree of freedom in some areas. For example, economic freedom (with suitable limitations and restraints) has proved effective in promoting economic growth. But only planned, circumscribed, limited

freedom is in the interest of the system. The individual must always be kept on a leash, even if the leash is sometimes long(see paragraphs 94, 97).

25. (Paragraph 143) We don't mean to suggest that the efficiency or the potential for survival of a society has always been inversely proportional to the amount of pressure or discomfort to which the society subjects people. That is certainly not the case. There is good reason to believe that many primitive societies subjected people to less pressure than the European society did, but European society proved far more efficient than any primitive society and always won out in conflicts with such societies because of the advantages conferred by technology.

26. (Paragraph 147) If you think that more effective law enforcement is unequivocally good because it suppresses crime, then remember that crime as defined by the system is not necessarily what YOU would call crime. Today, smoking marijuana is a "crime," and, in some places in the U.S., so is possession of ANY firearm, registered or not, may be made a crime, and the same thing may happen with disapproved methods of child-rearing, such as spanking. In some countries, expression of dissident political opinions is a crime, and there is no certainty that this will never happen in the U.S., since no constitution or political system lasts forever.

If a society needs a large, powerful law enforcement establishment, then there is something gravely wrong with that society; it must be subjecting people to severe pressures if so many refuse to follow the rules, or follow them only because forced. Many societies in the past have gotten by with little or no formal law-enforcement.

27. (Paragraph 151) To be sure, past societies have had means of influencing behavior, but these have been primitive and of low effectiveness compared with the technological means that are now being developed.

28. (Paragraph 152) However, some psychologists have publicly expressed opinions indicating their contempt for human freedom. And the mathematician Claude Shannon was quoted in Omni (August 1987) as saying, "I visualize a time when we will be to robots what dogs are to humans, and I'm rooting for the machines."

29. (Paragraph 154) This is no science fiction! After writing paragraph 154 we came across an article in Scientific American according to which scientists are actively developing techniques for identifying possible future criminals and for treating them by a combination of biological and psychological means. Some scientists advocate compulsory application of the treatment, which may be available in the near future. (See "Seeking the Criminal Element", by W. Wayt Gibbs, Scientific American, March 1995.) Maybe you think this is OK because the treatment would be applied to those who might become drunk drivers (they endanger human life too), then perhaps to peel who spank their children, then to environmentalists who sabotage logging equipment, eventually to anyone whose behavior is inconvenient for the system.

30. (Paragraph 184) A further advantage of nature as a counter-ideal to technology is that, in many people, nature inspires the kind of reverence that is associated with religion, so that nature could perhaps be idealized on a religious basis. It is true that in many societies religion has served as a support and justification for the established order, but it is also true that religion has often provided a basis for rebellion. Thus it may be useful to introduce a religious element into the rebellion against technology, the more so because Western society today has no strong religious foundation.

Religion, nowadays either is used as cheap and transparent support for narrow, short-sighted selfishness (some conservatives use it this way), or even is cynically exploited to make easy money (by many evangelists), or has degenerated into crude irrationalism (fundamentalist Protestant sects, "cults"), or is simply stagnant (Catholicism, main-line Protestantism). The nearest thing to a strong, widespread, dynamic religion that the West has seen in recent times has been the quasi-religion of leftism, but leftism today is fragmented and has no clear, unified inspiring goal.

Thus there is a religious vacuum in our society that could perhaps be filled by a religion focused on nature in opposition to technology. But it would be a mistake to try to concoct artificially a religion to fill this role. Such an invented religion would probably be a failure. Take the "Gaia" religion for example. Do its adherents REALLY believe in it or are they just play-acting? If they are just play-acting their religion will be a flop in the end.

It is probably best not to try to introduce religion into the conflict of nature vs. technology unless you REALLY believe in that religion yourself and find that it arouses a deep, strong, genuine response in many other people.

31. (Paragraph 189) Assuming that such a final push occurs. Conceivably the industrial system might be eliminated in a somewhat gradual or piecemeal fashion. (see paragraphs 4, 167 and Note 4).

32. (Paragraph 193) It is even conceivable (remotely) that the revolution might consist only of a massive change of attitudes toward technology resulting in a relatively gradual and painless disintegration of the industrial system. But if this happens we'll be very lucky. It's far more probably that the transition to a nontechnological society will be very difficult and full of conflicts and disasters.

33. (Paragraph 195) The economic and technological structure of a society are far more important than its political structure in determining the way the average man lives (see paragraphs 95, 119 and Notes 16, 18).

34. (Paragraph 215) This statement refers to our particular brand of anarchism. A wide variety of social attitudes have been called "anarchist," and it may be that many who consider themselves anarchists would not accept our statement of paragraph 215. It should be noted, by the way, that there is a nonviolent anarchist movement whose members probably would not accept FC as anarchist and certainly would not approve of FC's violent methods.

35. (Paragraph 219) Many leftists are motivated also by hostility, but the hostility probably results in part from a frustrated need for power.

36. (Paragraph 229) It is important to understand that we mean someone who sympathizes with these MOVEMENTS as they exist today in our society. One who believes that women, homosexuals, etc., should have equal rights is not necessarily a leftist. The feminist, gay rights, etc., movements that exist in our society have the particular ideological tone that characterizes leftism, and if one believes, for example, that women should have equal rights it does not necessarily follow that one must sympathize with the feminist movement as it exists today.

If copyright problems make it impossible for this long quotation to be printed, then please change Note 16 to read as follows:

16. (Paragraph 95) When the American colonies were under British rule there were fewer and less effective legal guarantees of freedom than there were after the American Constitution went into effect, yet there was more personal freedom in pre-industrial America, both before and after the War of Independence, than there was after the Industrial Revolution took hold in this country. In "Violence in America: Historical and Comparative Perspectives," edited by Hugh Davis Graham and Ted Robert Gurr, Chapter 12 by Roger Lane, it is explained how in pre-industrial America the average person had greater independence and autonomy than he does today, and how the process of industrialization necessarily led to the restriction of personal freedom.

THE BALTIMORE NEWS-POST, MONDAY DECEMBER 8, 1941

Sees U. S.-Britain Union For Peace

CHICAGO, Dec. 7 - (U. P.)

A noted student of international law foresees a post-war world confederation in which Anglo-American sea power will insure peace and freedom of commerce.

Dr. Quincy Wright of the University of Chicago predicts that if Hitler is defeated, the Nazi Chief's projected "new order" will be replaced by a [world organization](#) patterned in many respects after the League of Nations - but immeasurably strengthened by American participation and the use of the British and United States navies to enforce its edicts. He said:

"The main tasks of the world system will be to maintain freedom of the seas, moderate freedom of commerce and to prevent aggression."

Wright is the author of numerous works on international law, including an essay, "The Future of Neutrality," in which he

chiefly through limitation of national [tariffs](#) and it will act promptly against aggressors. Its chief weapon will be naval power provided largely by Britain and the United States.

Wright said American participation in the new world order is highly probable. He said:

"The American people have seen that their aloofness contributed to the death of the League of Nations. The strength of the isolationists has declined sharply since the first world war."

CONTINENTAL SYSTEM

Wright also expects the rise of several continental systems, subject to the world league, but with more extensive powers over their numbers and more closely-knit organization. Among these, he believes will be a "[United States of Europe](#)," an [Asiatic system](#) and a [Pan-American union](#). Russia probably will remain outside of all the continental systems, he said.

Each of the continental systems probably will have a [common air force](#), with national air forces

predicted in 1928 that the traditional policy of neutrality for non-belligerent nations in event of war would be abandoned in favor of common action against aggression.

FOUR FREEDOMS

Wright believes the new world league will formulate a "basic declaration of the rights of man," including President Roosevelt's "four freedoms." To protect those rights, he predicted, the system will have the power to deal with and punish individuals in some cases. At present [international law](#) technically is concerned only with states leaving regulation of individuals to national authorities.

Like the old League of Nations, Wright thinks, the new confederation will have three branches: a council or legislative body, an administrative authority and a world court which will arbitrate disputes between nations and questions of international law. It will promote world prosperity,

outlawed or greatly reduced, according to Wright. Members of these air forces will owe sole allegiance to their respective system and to no nation. By means of its exclusive command of air power, each continental organization will be able to preserve the independence of small nations adjoining large and powerful neighbors.

Sovereignty and independence of individual nations will be retained, subject to limitations necessary to operation of the continental and world systems, Wright predicted.

The universal confederation will enforce [peace](#) among the continental systems.

Bilderbergs (BB)

John J. McCloy used his position as coordinator of information for the US government to build the framework of what was to become the Office of Strategic Services (OSS) headed by Bill Donovan. During 1947, the OSS was rolled into a new group called the Central Intelligence Agency (CIA) by the 1947 National Security Act, which made the activities of the CIA immune to all civil and criminal laws. In 1950 General Walter Bedel Smith became Director of the CIA. The CIA helped organize and sponsored the formation and operation of the Bilderberg Conferences.

Kai Bird's excellent account in *The Chairman, John J. McCoy, The Making of the American Establishment*, states:

"In late 1952, Retinger went to America to try the idea out on his American contacts. Among others, he saw such old friends as Averell Harriman, David Rockefeller, Bedell Smith, then director of the CIA. After Retinger explained his proposal, Smith said, 'Why the hell didn't you come to me in the first place?' He quickly referred Retinger to C. D. Jackson, who was about to become Eisenhower's special assistant for psychological warfare. It took a while for Jackson to organize the American wing of the group, but finally, in May 1954, the first conference was held in the Hotel de Bilderberg, a secluded hotel in Holland, near the German border. Prince Bernhard and Retinger drew up the list of invitees from the European countries, while Jackson controlled the American list."

Prince Bernhard, of The Netherlands, became the first Chairman, and served in this post until scandal forced him to resign in 1974. Dr. Retinger became the first Secretary.

Liberty Lobby, Inc., 300 Independence Ave., SE, Washington, D.C. 20003, publishes a weekly newspaper, titled "The Spotlight". At my request, they sent me a reprint of a summary of Bilderberg information, titled "Spotlight On The Bilderbergers, Irresponsible Power", published mid- June, 1975. Page 6 of this document reveals:

"The Congressional Record - U.S. Senate, April 11, 1964, states:

(Speaking) - Mr. (Jacob) Javits - 'Mr. President, the 13 th in a series of Bilderberg meetings on international affairs, in which I participated, was held in Williamsburg, VA, on March 20, 21, and 22. I ask unanimous consent to have printed in the Record a background paper entitled - The Bilderberg Meetings.'

The Bilderberg Meetings

The idea of the Bilderberg meetings originated in the early fifties. Changes had taken place on the international political and economic scene after World War II. The countries of the Western World felt the need for closer collaboration to protect their moral and ethical values, their democratic institutions, and their independence against the growing Communist threat. The Marshall plan and NATO were

examples of collective efforts of Western countries to join hands in economic and military matters after World War II.

In the early 1950 's, a number of people on both sides of the Atlantic sought a means of bringing together leading citizens, not necessarily connected with government, for informal discussions of problems facing the Atlantic community. Such meetings, they felt, would create a better understanding of the forces and trends affecting Western nations, in particular. They believed that direct exchanges could help to clear up differences and misunderstandings that might weaken the West.

One of the men who saw the need for such discussions was the late Dr. Joseph Hieronim Retinger. (as a matter of interest, the name Hieronim is literally translated as meaning "MEMBER OF THE OCCULT"). In 1952, he approached His Royal Highness, Prince Bernhard of The Netherlands, with the suggestion of informal and unofficial meetings to discuss the problems facing the Atlantic community. Others in Europe wholeheartedly supported the idea, and proposals were submitted to American friends to join in the undertaking. A number of Americans, including C. D. Jackson, the late General Walter Bedell Smith, and the late John Coleman, agreed to cooperate.

The first meeting that brought Americans and Europeans together took place under the chairmanship of Prince Bernhard (of The Netherlands) at the Bilderberg Hotel in Oosterbeek, Holland, from May 29 to May 31, 1954. Ever since, the meetings have been called Bilderberg meetings. *---

No Strict Rules of Procedure

From the outset, it was the intentions of the Bilderberg founders and participants that no strict rules of procedure govern the meetings. Every effort was made to create a relaxed, informal atmosphere conducive to free and frank discussions. Bilderberg is in no sense a policy-making body. No conclusions are reached. There is no voting, and no resolutions are passed. The meetings are off- the- record. Only the participants themselves may attend the meetings.

Participants

It was obvious from the first that the success of the meetings would depend primarily on the level of the participants. Leading figures from many fields - industry, labor, education, government, etc. - are invited, who, through their special knowledge or experience, can help to further Bilderberg objectives. Representatives of governments attend in a personal, and not an official capacity. An attempt is made to include participants representing many political parties and points of view. American participation has included Members of Congress of both parties.

Over the years, Bilderberg participants have come from the NATO countries, Switzerland, Sweden, Austria, and Finland, and have included prominent individuals such as Dean Rusk, Christian A. Herter, Maurice Faure, Franz-Josef Strauss, Amatore Fanfani, Panayotis Pipinelis, Reginald Maudling, the late Hugh Gaitskell, Omer Becu, Guy Mollet, the late Michael Ross, Herman Abs, C. L. Sulzberger, Joseph

Harsch, and T. M. Terkelsen. Individuals with international responsibilities have also participated, among them being Gen. Alfred Gruenther, Lord Ismay, Eugene Black, Gen. Lyman Lemnitzer, Paul-Henry Spaak, and the late Per Jacobsson.

The Meetings

Bilderberg meetings are held at irregular intervals, but have taken place once or twice a year since 1954. All the early conferences were held in Europe, but a meeting is now held on this side of the Atlantic every few years to provide a convenient opportunity for American and Canadian participants to attend."

The above is what they want you to believe. Below is much closer to the real truth.

"The Spotlight" reports that the Bilderberg meetings are highly secret, and are held at random times each year, and rarely at the same location, for security reasons. The responsibility for security for these meetings is in the hands of the government of the country in which the meetings are held. They must supply military security, secret service, national and local police and private security personnel to protect the privacy and safety of these very powerful international Elite members who are not required to conform to regulations that private citizens are subjected- to, such as customs searches, visas requirements, or public notice of their meetings. When they meet, no outsiders are allowed in or near the building. They bring their own food, cooks, waiters, telephone operators, housekeepers and bodyguards.

The Bilderberg membership is made up of Kings, Queens, Princes, Chancellors, Prime Ministers, Presidents, Ambassadors, Secretaries of State, Wall Street investors, international bankers, news media executives, and wealthy industrialist. Their meetings are by invitation only, and no outsiders in the news media are allowed, except by special invitation.

However, the news media are always present at these meetings such as: Peter Jennings (BB and Anchor & Senior Editor of ABC News, World News Tonight), Joseph C. Harsch (BB, CFR and former Commentator for NBC, Inc.), Bill D. Moyers (BB and Executive Director of Public Affairs TV, Inc. and former Director of the CFR), William F. Buckley, Jr. (BB, CFR and Editor-in-Chief of "National Review" and host of PBS's Firing Line), Gerald Piel (BB, CFR and former Chairman of Scientific America, Inc.), Henry Anatole Grunwald (BB, CFR and former Editor-in-Chief of "Time, Inc."), Mortimer B. Zuckerman (BB, CFR and Chairman & Editor - in - Chief of the "US News and World Report", "New York Daily News "and "Atlantic Monthly"), Robert L. Bartley (BB, CFR, TC and Vice President of the "Wall Street Journal"), Peter Robert Kann (BB, CFR and Chairman & CEO of Dow Jones & Company, and husband of Karen E. House, CFR), William Kristol (BB and Editor & Publisher of the new "The Weekly Standard" magazine), Donald (Don) C. Cook (BB, CFR and former European Diplomatic Correspondent for the "Los Angeles Times"), Robert Leroy Bartley (BB, CFR, TC and Vice President of the "Wall Street Journal"), Albert J. Wohlstetter (BB, CFR and writer for the "Wall Street Journal"), Thomas L. Friedman (BB, CFR, TC and columnist for the "New York Times"), and the "Queen" of the Elite - Katharine Graham (BB, CFR, TC and Owner and Chairwoman of the Executive Committee of the "Washington Post"). Even though these media moguls attend the secret meetings, they

do not file reports about the Elite Bilderberg activities during their meetings, nor do they allow their reporters to write about these meetings.

A couple of weeks before the 1996 BB meeting, "The Spotlight" sent over 600 notices to key members of all forms of news media, including Rush Limbaugh, Tom Brokaw, Dan Rather, Peter Jennings, and other prominent members of news magazines, newspapers, television and radio, advising them of the pending meeting, telling the date, time and place that the meeting would take place and a list of probable attendees. Only four newspapers showed up, the "Toronto Sun", "Toronto Star", "Globe & Mail", and "The Spotlight". The word is that Katherine Graham put the word out that this meeting was "NOT" to be covered by any news media for "ANY" reason. I personally called the editor of "USA Today" to warn him of this meeting at least a week prior to this meeting. A couple of weeks later, when asked why they did not attend, the answer was "We had more important news to cover during this period."

The Bilderberg Group and the project of European unification

- From *Lobster* 32

This article copyright Lobster and Mike Peters

Lobster is a six-monthly magazine/journal devoted to parapolitics, uncovering hidden forces that govern the way we live. Typical articles include: 'The CIA, drugs and the media', Jane Affleck's web survey, 'the Rockefeller UFO initiative'. It is an independently published by the editor and needs all the support it can get. The following article has been used with permission, if you like what you read do please consider taking out Lobster's modest subscription.

The annual cost is between six and nine pounds sterling depending on where you live. Postal address and email at the bottom of the article.

You can subscribe to Lobster here: <http://www.knowledge.co.uk/xxx/lobster/index.htm>

The Bilderberg Group and the project of European unification

Mike Peters

Introduction

Despite their reputation for 'empiricism', British academics have tended to treat political power by means of abstract concepts rather than empirical information about the actions of determinate individuals and groups (e.g. Giddens, 1984, 1985; Scott, 1986). After a brief efflorescence of empirical studies of the so-called 'Establishment' in the early 1960s, sociologists in Britain became diverted from empirical investigation of power, as the study of national and international power-structures became conducted under the aegis of increasingly abstract theoretical categories derived from Marxism, and in particular by a wave of concepts based on Poulantzas's 'structuralist' critique of Miliband, and was followed by ever more esoteric discussions of the 'theory' of the state (e.g. Jessop, 1990), culminating in the hegemony of a post-Marxist version of Gramsci's conception of 'hegemony' - in which 'struggle' is posited without any identifiable human beings as its active protagonists, and with the stakes reduced to ideas rather than concrete interests.

This was in sharp contrast with the USA, where the impetus of C. Wright Mills's pioneering study of the network of interests involved in the Cold War (Mills, 1956) was continued by a flourishing group of scholars. There has been nothing in Britain of comparable scope or detail to the work conducted in the USA by G. W. Domhoff, Thomas Dye, Mark Mizruchi or Noam Chomsky, etc.

The present article is concerned with one specific facet of American power-structure research which, I

believe, has important implications for the study of power in the UK. This is the subject of power-elite networks and forums, conceptualised as arenas for the conduct of intra-capitalist and inter-corporate strategic debates and long-range social planning, from which wider 'democratic' interference is carefully excluded.

The particular institution about which I will present information is the so-called 'Bilderberg Group', which is an interesting example of this kind of power-elite forum. It is one among a number of little-publicised institutions which have played an important role providing a means for debates and discussions to take place amongst different capitalist groups and different national governments over long-term planning issues and, especially, in Co-ordinating strategic policy at an international level. Other such bodies on this trans-national scale include the Council on Foreign Relations (CFR) in the USA, with its UK sister organisation, the Royal Institute of International Affairs (otherwise known simply as Chatham House) and the Trilateral Commission (which itself grew out of Bilderberg meetings and has been essentially a more globalist version of the latter, since it incorporates Japanese representatives). Each of these bodies will be mentioned in what follows.

One of the 'functions' such institutions appear to serve is that of 'mediating' between the economic interests of private capital and the requirement of a general interest on the part of the capitalist class as a whole. I shall suggest that much of the theorising about the 'state' in the tradition of structural Marxism since the 1970s has confused this relation between capital and national governments, owing to the tendency to reify the abstraction called 'the state' and posit it as enjoying a virtual autonomy vis-à-vis capital; whereas the empirical evidence lends more support to the rather hastily dismissed (and often grotesquely caricatured) model called 'instrumentalism'.

To anticipate what will be said later, I believe that one of the key assumptions often made by structural Marxists, namely that the capitalist class is always divided into competing fractions which have no mechanisms for co-ordination other than the state, is not empirically sustainable. Part of this misconception, it could be said, derives from an over-literal understanding of the concept of the 'market' as constituting the only social relation amongst different fractions of capital. At least as far as the very large, and above all, the international (or as we would say in today's jargon, the 'global') corporations are concerned, this is definitely not the case: very sophisticated organs do exist whereby these capitalist interests can and do hammer out common lines of strategy. Bilderberg is one of these mechanisms.

The Context

As the second world war drew to a close, the capitalist class in Western Europe was under severe threat from an upsurge of working class radicalism, the management of which required a strategy more sophisticated than conventional repression, and the first steps were taken, by political panes of both left and right, to develop 'corporatist' programmes based on a kind of national protectionism. By contrast, in the USA, the war had brought to dominance an internationally-oriented capitalist class who saw very clearly that their interests lay in a thorough 'liberalisation' (1) of the world market, abolition of tariffs etc.. Only the false wisdom of hindsight could make the eventual Atlantic Alliance system that emerged

by 1950 seem preordained by 'objective' historical forces. Indeed, so used have we become to hearing phrases like 'American imperialism' and witnessing US interventions throughout the world that we can forget just how difficult it was for this internationally oriented fraction of the American capitalist class to impose its agenda upon the US state: the deep-rooted tendency of American political culture has always been what Europeans call 'Isolationist' and it took extensive political work to drag the Americans into these foreign entanglements. In this paper I will not be looking in any detail at how these interests influenced the US government during and after the Second World War, but rather at how they succeeded in effecting the integration of the Western European capitalist class into a new Atlantic alliance system

The period 1945-50 is highly complex and debate still rages over the origin and nature of the 'Cold War': for example over the degree to which the US was acting offensively or defensively against a (real or imagined) Soviet threat, as well as over the relation between the external or geopolitical aspect of the Cold War on the one hand and its domestic, ideological or 'class' aspect. And the recent work of Alan Milward, for example, has thrown into question many of the received assumptions about the causes and consequences of the 'supranational' institutions created in Europe in the aftermath of the war (Milward, 1984 and 1994; Anderson, 1996).

The beginnings of a clarification of these events were made with the pioneering analysis of Kees Van der Pijl, in conjunction with other Dutch Marxist scholars (Fennema, Overbeek etc.) ten years ago, together with the detailed empirical work of US power-researchers (e.g. the journal *Critical Sociology*). With the collapse of the USSR and the subsequent 'coming out' of veteran anti-Communists now prepared to open up some of their dubious accomplishments to outside scrutiny (Peter Coleman, Brian Crozier e.g.), more direct documentary evidence of the scope and intensity of covert US involvement in European politics in the post-war period is now available.

The Marshall Plan and NATO

The official version of the history of the creation of the Atlantic system reads like the 'lives and teachings of saints' (Milward, 1992). In these school textbook accounts, each of the pillars of the post-war world order has its great founding father, whose photographs invariably appear in magazine articles:

- * the IMF and the World Bank are the work of Keynes
- * European economic recovery is the work of General Marshall
- * NATO is the work of Ernest Bevin, and
- * the European Community is the work of Jean Monnet (with his faithful disciple Schuman)

These are not just myths; they are, in intelligence parlance, more like 'cover stories'.

The Marshall Plan is named after the speech on June 5 1947 by US Secretary of State Marshall, which

invited European countries to join in a co-operative plan for economic reconstruction, with explicit requirements for trade liberalisation and increases in productivity. Over the next ten months there emerged the Foreign Assistance Act of 1948, which set up the Economic Co-operation Agency (ECA) to administer the European Recovery Programme (ERP) - the so-called 'Marshall Aid' - which gave \$13 billion in aid to 16 western European states. In four years, the ECA was superseded by the Mutual Security Agency (MSA) in 1951 which in turn was transformed into the Foreign Operations Agency (FOA) in 1954, later the International Co-operation Agency (ICA) in 1955 and finally the Agency for International Development (AID) in 1961 (Carew 1987 p. 6ff). It is generally recognised that this aid had a decidedly militaristic purpose, being essentially a prerequisite for the development of NATO. (2)

It is less generally acknowledged, however, that this unprecedented exercise of international generosity (dubbed by Churchill the 'most unsordid act in history') served direct economic purposes for the internationally oriented US corporations which promoted it. William Clayton, for example, the Under-secretary for Economic Affairs, whose tour of Europe and letters sent back to Washington played a key role in preparing the plan, and who pushed it through Congress, personally profited to the tune of \$700,000 a year; and his own company, Anderson, Clayton & Co. secured \$10 million of Marshall Plan orders up to the summer of 1949. (Schuman 1954 p. 240). General Motors similarly got \$5.5 million worth of orders between July 1950 and 1951 (14.7% of the total) and the Ford Motor Company got \$1 million (4.2% of the total).

Roots in the Council on Foreign Relations

The origins of the Marshall Plan are in fact to be found in the 'War and Peace Study Groups' instituted by the Council on Foreign Relations (CFR) in 1939. (For the details see Shoup & Minter p. 117 ff). On December 6 1939 the Rockefeller Foundation granted the Council nearly \$50,000 to finance the first year of the project. Well over 120 influential individuals (academics and business leaders), at least 5 cabinet level departments and 12 separate government agencies, bureaux or offices were involved in this. There were altogether 362 meetings and no less than 682 separate documents produced. I find it frankly astonishing that virtually none of the British academic scholarship on this period even acknowledges the existence of the CFR, let alone the War and Peace Study Groups. Evidence is surely required to show that they had no influence, if that is what scholars believe.

The plan which Marshall presented in his speech had already been outlined in the proposals of a CFR study group of 1946 headed by the lawyer Charles M. Spofford and David Rockefeller, entitled 'Reconstruction in Western Europe'; and the specific proposal for unifying the Western European coal and steel basin as a bulwark against the USSR was made by John Foster Dulles in January 1947.

To trace the origin of the movement for European unification, however, requires that we go back to May 8 1946 and an address given at Chatham House by a Pole named Joseph Retinger. In this talk he outlined a plan for a federal Europe in which the states would relinquish part of their sovereignty. At the time, Retinger was secretary general of the Independent League for European Co-operation (ILEC), run by the Belgian Prime Minister Paul van Zeeland. During the war Retinger worked closely with van

Zeeland and other exile leaders who would become prominent in the Bilderberg network, (including Paul Rijkens, whom we will meet again shortly). (3) Out of these connections was born in 1942-3 the Benelux customs union, a kind of prototype of the Common Market.

The ideas adumbrated by Retinger were not new: there is a whole history of such projects for European unification and for even larger global schemes. One might just note here the assumption of the need for a 'great power' status as well as the almost taken-for-granted racism which informed Retinger's thinking:

'The end of the period during which the white man spread his activities over the whole globe saw the Continent itself undergoing a process of internal disruption..... there are no big powers left in continental Europe..... [whose] inhabitants after all, represent the most valuable human element in the world.' (Retinger 1946, p. 7)

Shortly after this speech, Retinger was invited by the US ambassador, Averell Harriman, to the USA to secure American support for ILEC.

'I found in America a unanimous approval for our ideas among financiers, businessmen and politicians. Mr Leffingwell, senior partner in J. P. Morgan's [bank], Nelson and David Rockefeller, Alfred Sloan [chair of General Motors], Charles Hook, President of the American Rolling Mills Company, Sir William Wiseman, [British SIS and] partner in Kuhn Loeb [New York investment bank], George Franklin and especially my old friend Adolf Berle Jr [CFR], were all in favour, and Berle agreed to lead the American section [of ILEC]. John Foster Dulles also agreed to help. (Pomian 1972, p. 212)

Thus was formed the European Movement (whose first congress at the Hague in 1948 is- the origin of the Council of Europe), which received substantial contributions from US government secret funds as well as private sources via the American Committee for a United Europe (ACUE). The names mentioned above are significant in the present context: Leffingwell preceded John McCloy and David Rockefeller as CFR chair, 1946-53, and had been a CFR director since 1927, while Franklin was executive director of the CFR 1953-7 and was later a Trilateral Commission Co-ordinator: also, incidentally an in-law of the Rockefellers.

US funding for the European Movement extended beyond 1952, most of it going to the European Youth Campaign, initiated by John McCloy, whose own career virtually personifies the Atlantic ruling class as a whole: a corporate lawyer of relatively humble origins, he became, through his contacts at Harvard, assistant Secretary of War 1941-45 and first President of the World Bank (IBRD), which he revamped to suit the interests of Wall Street; and then US High Commissioner for Germany 1949-52 (where, among other things, he enabled Krupp to regain control of his steel companies, advising on the establishment of the Krupp-Stiftung, modelled on the Ford Foundation - he was connected to Adenauer through his German wife, whose sister married Lewis Douglas, J. P. Morgan financier and later US ambassador to Britain), after which he became a director of both the Chase Manhattan Bank and the Ford Foundation in 1953. He was also an active member of the Bilderberg Group, becoming chair of the Council on Foreign Relations itself.

As for ACUE, its chair was William Donovan (who ran OSS - forerunner of the CIA during the war) and its vice-chair was Allen Dulles (who was a leading figure in the CFR War and Peace Study Group during the early part of the war, and later the director of the CIA); and it was run in Europe by another CIA executive, Thomas W. Braden.

The Bilderberg Group

'The Treaty of Rome [1957], which brought the Common Market into being, was nurtured at Bilderberg meetings.' (George McGhee, former US ambassador to West Germany)

'Bilderberg' takes its name from the hotel, belonging to Prince Bernhard of the Netherlands, near Arnhem, where, in May 1954 the first meeting took place of what has ever since been called the Bilderberg Group. While the name persisted, its meetings are held at different locations. Prince Bernhard himself (who, incidentally, was actually German not Dutch) was chair until 1976 when he was forced to resign because of the Lockheed bribery scandal. The possible significance of this group may be gleaned from the status of its participants: the membership comprises those individuals who would, on most definitions, be regarded as members of the 'ruling class' in Western Europe and North America-In particular, the conferences brought together important figures in most of the largest international corporations with leading politicians and prominent intellectuals (in both academia and journalism).

Moreover, virtually all the European institutions we take for granted today, or treat as if they 'emerged' as a matter of course, from the ECSC, EEC and Euratom down to the present European Union, were conceived, designed and brought into existence through the agency of the people involved in Bilderberg.

Secrecy

What Gill has referred to, with disarming brevity, as its 'almost completely secretive' character (Gill 1990, p. 129) is neither incidental nor superficial but integral to its functioning. It is essential that these discussions be kept out of the public sphere. The lengths to which the organisers go are quite astonishing. An entire hotel is taken over in advance (existing guests being moved out) and a whole caravanserai, including special catering staff and armed security guards, descend on the site several days in advance. I recommend the amusing account by Robert Eringer - to my knowledge the only journalistic investigation yet conducted (Eringer 1980). The maintenance of this secrecy has been remarkably effective. In 1967, Cecil King, then chair of the International Publishing Corporation (at the time the press group with the largest circulation in the UK) and chair of the Newspaper Proprietors Association, formally requested his fellow proprietors to see to it that 'on no account should any report or even speculation about the content of the conferences be printed' (quoted in Sklar 1980, p. 178).

On one of the few occasions when Bilderberg meetings were mentioned in a major British newspaper, the outcome was quite interesting. In the 'Lombard' column of the Financial Times, C. Gordon Tether wrote on May 6 1975: 'If the Bilderberg Group is not a conspiracy of some sort, it is conducted in such a way as to give a remarkably good imitation of one.' In a column written almost a year later, for the

March 3 1976 edition, Tether wrote: 'The Bilderbergers have always insisted upon clothing their comings and goings in the closest secrecy. Until a few years back, this was carried to such lengths that their annual conclave went entirely unmarked in the world's press. In the more recent past, the veil has been raised to the extent of letting it be known that the meetings were taking place. But the total ban on the reporting of what went on has remained in force....Any conspiratologist who has the Bilderbergers in his sights will proceed to ask why it is that, if there is so little to hide, so much effort is devoted to hiding it.'

This column never appeared: it was censored by the Financial Times editor Mark Fisher (himself a member of the Trilateral Commission), and Tether was finally dismissed from the 'Lombard' column in August 1976.

What goes on at Bilderberg?

It is important at the outset to distinguish the active, on-going membership from the various people who are occasionally invited to attend. Many of those invited to come along, perhaps to report on matters pertaining to their expertise, have little idea there is a formally constituted group at all, let alone one with its own grand agenda. Hence the rather dismissive remarks by people like sixties media guru Marshall McLuhan, who attended a Bilderberg meeting in 1969 in Denmark, that he was 'nearly suffocated at the banality and irrelevance,' describing them as 'uniformly nineteenth century minds pretending to relate to the twentieth century'. Another of those who have attended, Christopher Price, then Labour MP for Lewisham West, found it 'all very fatuous.... icing on the cake with nothing to do with the cake.' (Eringer 1980, p. 26). Denis Healey, on the other hand, who was in from the beginning and later acted as British convenor, says that 'the most valuable [meetings] to me while I was in opposition were the Bilderberg Conferences'. (Healey 1990, p. 195)

Bilderberg from the beginning has been administered by a small core group, constituted since 1956 as a steering committee, consisting of a permanent chair, a US chair, European and North American secretaries and a treasurer. Invitations are 'only sent to important and generally respected people who through their special knowledge or experience, their personal contacts and their influence in national and international circles can further the aims set by Bilderberg.' (Retinger, cited in Sklar p. 168)

John Pomian, Retinger's secretary observed that:

'...during the first 3 or 4 years the all-important selection of participants was a delicate and difficult task. This was particularly so as regards politicians. It was not easy to persuade the top office holders to come Retinger displayed great skill and an uncanny ability to pick out people who in a few years time were to accede to the highest offices in their respective countries today there are very few figures among governments on both sides of the Atlantic who have not attended at least one of these meetings.' (Pomian, pp. 254-5)

The Bilderberg discussions are organised on the principle of reaching consensus rather than through formal resolutions and voting. Such is the influence and standing of the active members that, if

consensus for action is arrived at, one might expect this to be carried out and the resulting decision to be implemented in the West as a whole. But the exact position of the group, and that of other such groups, is only discernible by a close scrutiny of the specific careers and connections of the individual participants. Here, one has to say that social theorists seem convinced of the irrelevance of this kind of information, which would be called 'prosopographic' (i.e. data pertaining to concrete individuals, which companies they represent, their family connections etc.). This is somewhat contradictory, of course, because in their every-day roles, social theorists are just as interested in this kind of information as anyone else, and display a keen sense of its political relevance when it comes to conducting their own careers: but it has nonetheless become almost a matter of principle to denounce use of this kind of data in social science itself. This tendency seems to come from a reification of the concept of 'roles' (as if these were real rather than constructs) and possibly from a functionalist assumption that social systems are subject to laws; with concrete human actors having no significance in shaping outcomes.

Origins of Bilderberg

The initiative for the first convocation came from Joseph Retinger, in conjunction with Paul Rijkens, President of Unilever. Retinger has already been introduced; and the significance of Unilever needs to be examined briefly. Unilever is one of the largest and most powerful multinational corporations in the world and one of the top European capitalist companies. In the 1950's the advisory directors of Unilever were as follows (and I'm drawing attention to the links with the Rotterdam Bank and Philips, the electrical firm):

- H.M. Hirschfield: also on the board of Philips and Rotterdam Bank and with the Dutch Ministry of Economic Affairs during the war, and after it Commissioner for the Marshall Plan in the Netherlands;
- K.P. Van der Mandel, also on the board of Rotterdam Bank;
- Paul Rijkens: also on the board of Rotterdam Bank;
- H.L. Wolterson: also chair of Philips and on the board of Heldring and Pearson (linked with the Rotterdam Bank);
- P S.F Otten: also President of Philips (and married to a member of the Philips family)

One of the unusual features of Unilever is its bi-national structure (Stokman et al, 1985): it is a jointly-owned AngloDutch company, with a 50/50 structure and a unitary board. This was a very useful device during the war, when operations could be shifted easily from the Netherlands to the UK. Philips had a similar arrangement under a Dutch law called the Corvo Law, whereby in an emergency it could divide itself into two parts, which it did when the Germans invaded: one with its HQ in Germany and the other American. Both these parts got large military contracts during the war, playing a role on both sides (Aaronovitch 1961, pp. 110-11). Unilever's financial advisers are the US investment bank Lazard Freres, which handles the private financial affairs of many of the world's wealthy families, including the

Agnellis of Fiat. (See Koenig, 1990, Reich, 1983, Business Week June 18 1984).

Unilever's chief adviser on international affairs was David Mitrany, whose book, *A Working Peace System*, published in 1943, secured him this post. (He also worked for Chatham House). It was Mitrany who coined the term 'functionalism' to refer to the strategy of supra-national integration through a series of sectoral processes of internationalisation, designed to set in motion an autonomous logic, making inevitable further integration and ultimately making national states obsolete (Groom and Taylor p. 125 ff.). In the post-war period there were three basic models for European union: alongside the 'functionalists' (in this sense), were the 'inter-governmentalists' (e.g. Spaak) and the 'federalists' (e.g. Monnet himself). In the 1960s the functionalists used the slogan 'Atlantic Partnership' as the framework for the integration or synchronisation of US and European interests.

The immediate chain of events leading to the setting up of the first conference was as follows. Prince Bernhard set off for the USA in 1952 to visit his old friend Walter Bedell Smith, director of the newly-formed CIA. Smith put the organisation of the American end into the hands of Charles D. Jackson (special assistant for psychological warfare to the US President), who appointed John S. Coleman (president of the Burroughs Corporation, and a member of the Committee for a National Trade Policy), who in turn briefly became US chair of Bilderberg.

Charles Jackson was president of the Committee for a Free Europe (forerunner of the Congress for Cultural Freedom (CCF) whose extensive operations financing and organising anti-Communist social democratic political intellectuals has only recently been fully documented (see Coleman 1989); and ran the CIA-financed Radio Free Europe in Germany. Earlier he had been publisher of *Fortune* magazine and managing director of *Time/Life*, and during the war was deputy head of psychological warfare for Eisenhower. At the time of Bernhard's visit he was working with a committee of businessmen on both sides of the Atlantic which approved the European Payments Union.

It was thus a European initiative, and its aim was, in official bland language, to 'strengthen links' between Western Europe and the USA. A selected list of people to be invited to the first conference was drawn up by Retinger, with Prince Bernhard and Rijkens, from the European countries of NATO plus Sweden. The resulting group consisted of the Belgian and Italian prime ministers, Paul van Zeeland and Alcide de Gasperi (CDU), from France both the right wing prime minister Antoine Pinay and the Socialist leader Guy Mollet; diplomats like Pietro Quaroni of Italy and Panavotis Pipinelis of Greece; top German corporate lawyer Rudolf Miller and the industrialist Otto Wolff von Amerongen and the Danish foreign minister Ole Bjorn Kraft (publisher of Denmark's top daily newspaper); and from England came Denis Healey and Hugh Gaitskell from the Labour Party, Robert Boothby from the Conservative Party, Sir Oliver Franks from the British state, and Sir Colin Gubbins, who had headed the Special Operations Executive (SOL) during the war.

On the American side, the members of the first Bilderberg assembly included:

- George Ball, who was head of Lehman Brothers, a former high State Department official, where he

was architect of the policy of Atlantic Partnership, and later member of the Trilateral Commission. Ball was closely associated with Jean Monnet, owing to his work as legal counsel for the ECSC and the French delegation to the Schuman Plan negotiations.

- David Rockefeller was the key American member of Bilderberg. Space only permits the briefest sketch of his direct economic and political involvements: head of the Chase Manhattan Bank, member of the Council on Foreign Relations, member of the Business Council, the US council of the International Chamber of Commerce, and, of course, the founder of the Trilateral Commission.

- Dean Rusk: US Secretary of State 1961-69, earlier President of the Rockefeller Foundation 1952-60, having succeeded John Foster Dulles, himself an earlier Secretary of State and - this is not at all a coincidence - a close personal friend of Jean Monnet whom he had first met at Versailles in 1918 as well as of Dean Acheson, Truman's Secretary of State and the true author of the Marshall Plan.

The final list was 67. Since then, the group enlarged somewhat, but the steering group remained the same size. (4)

After Retinger's death in 1960, the role of secretary was taken over by E. H. van der Beugel, who had headed the Dutch bureau for the Marshall Plan and later became president of KLM airlines and the International Institute for Strategic Studies in London. After the resignation of Prince Bernhard, the role of chair was taken by British ex-prime minister Lord Home.

The status of the group and its meetings is ostensibly 'private'. Gill names it simply 'a private international relations council', but nothing could be more misleading than this name private, unless in its sense of 'secret'. When political leaders gather together with a view to arriving at consensus, in conjunction with leaders of industry and finance and press magnates and leading journalists, then this is not the same kind of thing as an assembly of ordinary private citizens. The vocabulary of pluralist political science ('lobbies', 'non-governmental organisations' etc.) systematically distorts the actual power relations at work in these different kinds of associations. It is even questionable whether Bilderberg meetings are really 'private' in the legal sense of non-governmental. Robert Eringer, for example, having received an official reply that 'government officials attend in a personal and not an official capacity', found that in fact officials had attended Bilderberg conferences at government expense and in their official capacity. The British Foreign Office responded to his queries by saying 'we can find no trace of the Bilderberg Group in any of our reference works on international organisations', while he later learnt that the Foreign Office had paid for British members to attend Bilderberg conferences.

Van der Pijl's assessment of the role of Bilderberg seems about as accurate as the available information would allow:

'Rather than constituting an all-powerful secret Atlantic directorate, Bilderberg served, at best, as the environment for developing ideas in that direction, and secrecy was necessary for allowing the articulation of differences rather than for keeping clear-cut projects from public knowledge. In this sense

Bilderberg functioned as the testing ground for new initiatives for Atlantic unity.' (Van der Pijl p. 183)

But on occasions the group is known to have exerted real power. An (unnamed) German participant at the 1974 conference held six months after the Arab Israeli War at Edmond de Rothschild's hotel at Megeve in France, commented:

'Half a dozen knowledgeable people had managed, in effect, to set the world's monetary system wolfing again [after OPEC's quadrupling of oil prices], and it was important to try to knit together our networks of personal contacts. We had to resist institutionalism, bureaucratic red-tape, and the creation of new procedures and committees. Official bodies should be put in the position of ratifying what had been jointly prepared in advance.' (Sklar, p. 171)

The European 'Community'

The Treaty of Rome signed on March 25 1957 created the 'common market' (the European Economic Community) and its roots were laid down in the ECSC (the European Coal and Steel Community) established on April 18 1951, based on the Schuman Plan of May 9 1950 (Vaughan 1976, Milward 1984). It is not implausible to suggest that the route from the one to the other in fact passed through the first five Bilderberg conferences, May 1954 at Oosterbeek (Netherlands), March 1955 at Barbizon (France), September the same year at Garmisch (Germany), May 1956 at Fredensborg (Denmark) and finally in February 1957 at St. Simon's Island (Georgia, USA); and that these secret meetings played a decisive role in overcoming the opposing, centrifugal tendencies symbolised by the collapse of the European Defence Community in 1954, the Hungarian revolution and its suppression and the fiasco of the Anglo-French adventure at Suez in 1956 - the last gasp of independent European imperialism.

Even more important the 'protectionism' implicit in the European unification project was successfully subordinated to the 'liberalising' hegemony of the Americans, through the close involvement of the key US players at every stage. The evidence for this is entirely circumstantial, and this hypothesis must remain speculative, but I believe there is a prima facie case to launch an investigation. It should be clear from the details recounted earlier that not all the possible roads led to the Rome Treaty, and that there is far more to the politics of European 'integration' than the legislative enactments already known about.

Monnet's network

Monnet himself, who mentions neither Retinger nor Bilderberg in his memoirs (Monnet 1978), cannot have been unaware of the activities of these crucial constituents of his programme. However much he may be portrayed in the hagiographies as a far-sighted idealist, Monnet was, first and foremost, an international financier, with an extensive network of connections on both sides of the Atlantic, occupying a particular place in the configuration of capitalist interests forming what Van der Pijl calls the Atlantic circuit of money capital (Van der Pijl 1984). He was, for example, a close friend of all the key figures in the US power structure; but, more importantly, his network centred around the New York investment banks Lazard Freres (run by Andre Meyer who was also on the board of Rockefeller's Chase

International Bank), and Goldman Sachs, which, after the war gravitated into the Rockefeller orbit. Monnet's right-hand man, Pierre Uri, was European director of Lehman Brothers; and Robert Marjolin, one of Monnet's assistants in the first modernisation plan, subsequently joined the board of the Chase Manhattan Bank. Uri and Marjolin were also active in Bilderberg.

When Monnet resigned from his position of 'High Authority' in the ECSC in 1955 to run his Action Committee for a United States of Europe (ACUSE), his secretary at ECSC, Max Kohnstamm who had earlier been private secretary to Queen Wilhelmina, (i.e. Prince Bernhard's mother-in-law), and then Dutch representative in the Schuman Plan negotiations, became the vice-president of ACUSE, which had extensive overlaps with Bilderberg. Kohnstamm, for example, later became a member of the Executive Committee of the Trilateral Commission, and Georges Berthoin, who was Monnet's private secretary at the ECSC 1951-55, took over Kohnstamm's place on the Trilateral Commission in 1975. Francois Duchene and Paul Delouvner, who both worked for ECSC in the fifties (and joined the Trilateral Commission in the 1970s), Guy Mollet and Antoine Pinay were in the Bilderberg network (5)

Europe since the fifties

It would be simply too large and complex a matter to trace the twists and turns in the politics of European unification since the period from the fifties to the present. Too much water has flowed under the bridge, and it is doubtful that it is any longer even the same bridge, so many times has Europe' or the European idea' had to be periodically 'relaunched'. Instead of even attempting this in broad outline, I will draw attention very briefly to the role played by secretive and unaccountable organisations of members of the European economic and political elites.

One little-reported group, for example, which seems to wield immense influence is the European Round Table of Industrialists (ERT). To my knowledge there have only been two or three reports of this group in the British press, and yet in articulating the demands and interests of the largest and most powerful European multinational corporations, it surely calls for close study. I suspect this is the same group as that mentioned in passing in Charles Grant's biography of Jacques Delors. Delors' arrival as European Commissioner in 1985, he says, could not have occurred at a more propitious moment: he had spent the autumn of 1984 searching for a 'Big Idea' to relaunch the EEC.

'That autumn, in Brussels, Delors had met a group of officials and industrialists brought together by Max Kohnstamm, who had been Monnet's chief assistant. After Monnet's death in 1979, Kohnstamm had become one of the guardians of the sacred name of federalism. The Kohnstamm group advised Delors to make the internal market his priority and to lay down a timetable of eight years (the life of two Commissions) for its achievement..... At the same time Wisse Dekker, the chairman of Philips, made several speeches calling for the EEC to remove its internal barriers by 1990.' (Grant 1994, p. 66)

If this is in fact referring to the same group as that known as the European Round Table of Industrialists (ERT), then we have an example of a continuity between the fifties and today. This ERT comprises the chairs/CEOs of the leading European multinational corporations and it is by no means a mere assembly

of dignitaries. This is an extremely powerful body. According to research conducted by the ASEED collective, its reports feed directly into the European Commission decision making process. One of its first reports, for example, entitled 'Missing Links', urged the immediate construction of a series of large-scale transport projects, including the Channel Tunnel. As well as Dekker of Philips, other leading figures in the ERT are Agnelli of Fiat, Gyllenhammer of Volvo, and Denys Henderson of ICI.

Theoretical Excursus

A persistent problem with theories of power over the last 20 years has been their lack of engagement with empirical evidence, compounded by the demonstrable empirical ignorance of theorists. It is as if every academic feels able to develop theories about power, and engage in debates it, without any requirement for relevant information, or at any rate with a tacit assumption that everyone at has such information.

One possible place to start an attempt to 'theorise' the role of Bilderberg and other international power-elite forums, might be to re-enter an old debate at the beginning of the present century: this is the debate between Lenin and Kautsky over imperialism.

Lenin's theory of imperialism sought to explain the first world war by reference to what he called inter-imperialist rivalries. While this theory has had an enormous influence during this century (it under-pins, for example, much contemporary discussion of the relations between 'the West' and the 'Developing World, in which it is assumed that power operates between geographically-defined regions, and that nation-states act at the behest of nationally-based capitalist classes), it is nevertheless demonstrably false in a number of crucial particulars. For example, one of the difficulties in Lenin's theory is reconciling it with the increasing interpenetration of national economies by trans-national capitalist blocs. To put this issue simply: wars take place between states, but inter-capitalist rivalries do not necessarily coincide with the territories between states, especially where international or trans-national corporations have developed. The material presented here, I would suggest, is of just this kind: it shows an inter-penetration of capitalist interests between the USA and Western Europe, and indicates a field of 'political struggle' within and between states, entirely outside that of the public sphere.

What is far less well-known today, however, is Kautsky's alternative conception which explicitly addressed this issue, and can be summed up by his notion of ultra-imperialism (Fennema, 1982). The simple hypothesis is that rival capitalist interests may, at least for a time, be able to coalesce into a relatively unified hegemonic bloc. Now this idea of a tendency towards stabilisation on a global scale may sound unrealistic today, but arguably this was what was achieved for fifty years, at least in the American-dominated half of the world, after 1945. It could even be said that the demise of the other half permits its universalization. Where are the 'inter-imperialist rivalries in the world today'?

Silence of the Academics

When first asked for a title for this paper, I briefly entertained the idea of using the above sub-heading,

(paraphrasing a recent film-title), and I do believe it is important to ask why certain topics rather than others are deemed worthy of investigation. The material presented here is certainly 'dated' and therefore unfashionable, but similar information about the present could be investigated. It is surprising and somewhat depressing that such investigations no longer seem to be being carried out in universities today. (6) Academics often represent themselves somewhat flatteringly as 'critical' intellectuals, independent from or even determinedly opposed to the established systems of power in society, willing to face personal or professional risks in the pursuit of truth. Maybe they are more like lambs.

Footnotes

(1) The term 'liberal' signifies policies opposed to restrictions on international trade. The distinction between 'free trade' and 'protectionism' in international trade does not correspond exactly with the theoretical opposition of 'competition' and 'monopoly'. None of these concepts have straightforward empirical reference. The 1992 NAFTA (North American Free Trade Agreement) for example, is in fact profoundly 'protectionist' in relation to such matters as intellectual property rights (software, patents for seeds, drugs etc.) with elaborate 'rules of origin' designed to keep out foreign competitors etc. see Dawkins 1993.

(2) If the Marshall Plan had military objectives (containment of Soviet influence) as much as economic ones (creation of markets for US industry), then NATO has a civilian, political and ideological role as much as a military one. NATO has been relatively neglected by students of 'supranational' organisations, and it is often presumed to be just a treaty rather than a quasigovernmental organisation in its own right. Its highest political body, the North Atlantic Council, covers foreign policy issues as well as strictly military questions, and the North Atlantic Assembly works to influence the parliamentary members of individual countries. It falls within the brief of NATO to conduct propaganda and defend states the 'infiltration of ideas'. Few citizens of NATO countries are aware of the whole apparatus to which membership commits them - e.g. Plans 10 G and 100-1 under which in 'emergency situations' special US units would be activated to suppress any movement 'threatening to US strategic interests'.

(3) It is extremely difficult to define the exact status of Retinger. One Polish war-time exile leader has been quoted as saying that Retinger was 'suspected of being in close touch not so much with British politics as with certain of its discrete institutions'. Presumably SIS. See Korbonski p. 20.

(4) Later American participants included Robert MacNamara, US Secretary of Defence under Kennedy and Johnson (earlier chair of the Ford Motor Company, and later President of the World Bank); and McGeorge Bundy, who worked on the Marshall Plan, was US National Security Adviser and later special foreign policy adviser to Kennedy and Johnson 1960-65, and became President of the Ford Foundation 1966-79. His brother, William Bundy, was with the CIA 1951-61 and later managed the CFR journal Foreign Affairs from 1979, after working at the Pentagon 1964-69. He married Dean Acheson's daughter. Finally, all three Directors of the CIA in this period were also members of Bilderberg: Allen Dulles (John Foster Dulles's brother), John McCone and Richard Helms. Needless to say, all these figures were also members of the CFR. For more details of participants see the essay by

Thompson in Sklar ed. 1980, and Eringer 1980.

(5) Pinay, who was French Prime Minister in 1951, figures rather allusively in Brian Crozier's memoirs (Crozier, 1993 ch. XV) as the eminence grise of the controversial 'Pinay Cercle', an anti-communist intelligence outfit in the 1970s and 80s (Ramsay & Dorril 1986, p. 39 and Teacher 1989).

(6) It is ironic that while the initial research which discovered the existence of the Bilderberg network and explored its ramifications within the power structure of Atlantic capitalism came entirely from Marxist and left-inclined scholars in the USA, the whole subject has now been virtually taken over by the US far right as the centre piece of its own bizarre world-view. These writers of the far right (Anthony Sutton, Lyndon La Rouche, Spool and the Liberty Lobby etc.) have added virtually nothing to our understanding or knowledge of the phenomenon, and accordingly, are not referenced in the bibliography below. They have, however, contaminated the topic with their confusion. Since around the mid-1980s, the American Left has dropped the whole issue like a hot potato. For a singular exception see Brandt 1993, which is essentially a response to Berlet, 1992.

The Bilderberg Group: Planning the World's Future Behind Closed Doors

by Charles Overbeck

Matrix Editor

easterisle@parascope.com

The date is May 14, 1998. The attendees -- 120 representatives of the Western political, financial and corporate elite -- cruise through the untamed Scottish countryside in black limousines on their way to the swank Turnberry Hotel in Ayrshire. The discussions they will engage in, and the consensus they reach, will influence the course of Western civilization and the future of the entire planet. This meeting will take place behind closed doors in total secrecy, protected by a phalanx of armed guards.

The Bilderberg is about to get busy once again. According to a Bilderberg Society press release, the 46th Bilderberg meeting was an informal discussion "to discuss the Atlantic relationship in a time of change. Among others the Conference will discuss NATO, Asian Crisis, EMU, Growing Military Disparity, Japan, Multilateral Organizations, Europe's social model, Turkey, EU/US Market Place Those who attend Bilderberg meetings do so in a private rather than official capacity. From former CIA director John Deutch to New Jersey Governor Christine Todd Whitman, each guest attendee is hand-picked by the Bilderberg's organizing committee to join in secret deliberations about the propagation of Western hegemony in the New World Order.

All Bilderberg discussions are conducted in absolute secrecy. To guarantee solitude, the Group customarily books an entire hotel in a secluded location. The hotel is protected by a tight security grid of heavily armed guards from the U.S. Secret Service, various European secret service agencies and the local police.

Although some reporters and many media owners are present at these meetings, you will hear nothing about the Bilderberg in the news. According to the Bilderberg's [press release](#), "Participants have agreed not to give interviews to the press during the meeting. In contacts with the news media after the conference it is an established rule that no attribution should be made to individual participants of what was discussed during the meeting."

A source close to the Turnberry conference told *The Scotsman*: "I cannot comment officially on whether this is a conference of the Bilderberg group... This is a strictly private non-governmental conference, one of a series of such meetings. Their purpose is the discuss most informally and confidentially topics of current concern to the democracies of Europe and America." Bilderberg proponents argue that this cloak of secrecy is vital to ensuring an honest and vigorous debate.

"Some of the delegates are politicians, but everyone is here privately," the Turnberry conference source told *The Scotsman*. "It inspires frothing at the mouth of conspiracy theories, but the purpose of the privacy is to allow delegates to have a frank and constructive debate and get to the heart of things knowing that they are not going to be reported."

Of course, this secrecy also guarantees that the vast majority of the world's citizenry is kept completely in the dark regarding Bilderberg deliberations, even though the consensus of the Group may affect national and international government and commerce.

The extremes to which the Bilderberg goes to achieve this level of secrecy raises serious suspicions about the Group's motives in the minds of many. Critics of the Bilderberg say:

- * The Group perceives itself as being supra-governmental. Indeed, Bilderberg founder Prince Bernhard himself once said, "It is difficult to re-educate people who have been brought up on nationalism to the idea of relinquishing part of their sovereignty to a supra-national body." (Alden Hatch, *H. R. H. Prince Bernhard of the Netherlands: An Authorized Biography*, G. G. Harrap & Co., 1962.)

- * The Group coercively manipulates global finances and establishes rigid and binding monetary rates around the world.

- * The Group selects political figures whom the Bilderberg determines should become rulers, and targets those whom it wants removed from power.

- * Rather than pursuing an agenda which would work to solve global health, energy, environmental and agricultural problems, the Group pursues an agenda which guarantees the propagation of its own power and the enrichment of its members, at the expense of human rights and environmental degradation worldwide.

As Bilderberg critic Tony Gosling wrote, "One cannot help but be a little suspicious when priorities for the future of mankind are being considered, by those who have real influence over that future, in total secret."

[Top](#)

Origins of the Bilderberg

After World War II, the east/west schism between the forces of communism and capitalism solidified into the Cold War. According to a [report](#) entered into the Congressional Record by Bilderberg attendee Senator Jacob Javits in 1964, "The countries of the Western World felt the need for closer collaboration to protect their moral and ethical values, their democratic institutions, and their independence against the

growing Communist threat."

This "collaboration" would soon focus on one key objective: to ensure that the United States, Canada and Western Europe maintained oligarchic control of a global system of export-based capitalism.

According to Bilderberg founder Prince Bernhard:

"If we could all agree beforehand in principle it would result, without doubt, not in Utopia, but in an extremely strong and healthy Europe. This in turn would bring the United States into the economic community. It would encourage a great deal of free trade throughout the world.

"Now, the more free trade you have the more difficult you will make it for the new countries of Africa and Asia to set up an autarchy and live in economic isolation, to adopt trade barriers and quotas which after a hundred years or more we are finding out don't pay. From sheer necessity these people will have to join in free trade. And once you get that you can help an underdeveloped country much more easily than if there are a hundred and fifty thousand restrictions. Also it would be easier for them -- their national pride -- to accept help. That to my mind is the best possible guaranty against Communist influence."

(Alden Hatch, *H. R. H. Prince Bernhard of the Netherlands: An Authorized Biography*, G. G. Harrap & Co. [London], 1962.)

The Bilderberg Group was actually the brainchild of Joseph Retinger, an American whose high-profile career brought him into contact with many high-ranking military and political leaders worldwide. Retinger had a dream: to unite the world in peace -- a peace brokered by powerful supra-national organizations which he believed would be less susceptible to the short-term ideological whims of national governments.

Economics were a secondary matter, as far as Retinger was concerned. Retinger believed that multinational organizations could create and enforce unity between nations by dictating and enforcing consistent and effective economic and military policies.

In his [Congressional Record](#) report, Senator Javits wrote: "In 1952 [Retinger] approached H.R.H. Prince Bernhard of the Netherlands with the suggestion of informal and unofficial meetings to discuss the problems facing the Atlantic community. Others in Europe wholeheartedly supported the idea, and proposals were submitted to American friends to join in the undertaking. A number of Americans, including C.D. Jackson, the late General Walter Bedell Smith, and the late John Coleman, agreed to cooperate."

(C.D. Jackson was a prominent member of the [Council on Foreign Relations](#), another secretive think-tank whose members are drawn from the American political and economic elite. Like the Bilderberg Group, the CFR meets behind closed doors, and although many working journalists fill the group's

ranks, deliberations and records are kept secret from the public. At the time of the Bilderberg's founding, General Smith was director of the CIA.)

Once Retinger had successfully drummed up a strong showing of interest, the first meeting was organized under Prince Bernhard's aegis. According to Senator Javits' Congressional Record report, "The first meeting that brought Americans and Europeans together took place under the chairmanship of Prince Bernhard at the Bilderberg Hotel in Oosterbeek, Holland, from May 29 to May 31, 1954. Ever since, the meetings have been called Bilderberg meetings."

According to Senator Javits, who attended the Bilderberg's 1964 meeting in Williamsburg, Virginia, "Bilderberg meetings are held at irregular intervals but have taken place once or twice a year since 1954. All the early conferences were held in Europe, but a meeting is now held on this side of the Atlantic every few years to provide a convenient opportunity for American and Canadian participants to attend."

Bilderberg attendees represent the elite establishment of every Western nation: bankers, industrialists, politicians, CEOs of transnational corporations, European monarchs, chancellors, presidents, prime ministers, key ambassadors, ministers of finance, secretaries of state, representatives of the World Bank, the World Trade Organization and the International Monetary Fund, media executives, and military leaders. Each meeting typically consists of 120 delegates. Approximately two thirds of the attendees are from Europe, and the rest come from North America.

Bilderberg debates go unreported, and any consensus reached is unknown to those outside the Group. Records of the meetings are reportedly kept, but are held in secret as "strictly confidential." Furthermore, according to Alden Hatch's book *H. R. H. Prince Bernhard of the Netherlands: An Authorized Biography*, there is an "unwritten rule that anybody who has ever been to a Bilderberg Conference should be able to feel that he can, in a private capacity, call on any former member he has met. To this end a list of names and addresses is maintained to which all participants have access. This makes possible an expanding continuation of association for people who might not otherwise have met."

Security is always extremely tight at Bilderberg meetings. According to *H. R. H. Prince Bernhard of the Netherlands*, at the first meeting in 1954:

There was absolutely no publicity. The hotel was ringed by security guards, so that not a single journalist got within a mile of the place. The participants were pledged not to repeat publicly what was said in the discussions. Every person present -- Prime Ministers, Foreign Ministers, leaders of political parties, heads of great banks and industrial companies, and representatives of such international organizations as the European Coal and Steel Community, as well as academicians -- was magically stripped of his office as he entered the door, and became a simple citizen of his country for the duration of the conference. Thus everybody could and did say what he really thought without fear of international, political, or financial repercussions.

Thus the Bilderberg Group was born in secrecy. And secrecy breeds suspicion. If the Bilderberg's purposes are truly benevolent, the Group could stand to be a little more open about its activities. It is

little surprise that people often react with "frothing conspiracy theories" to the Bilderberg's general attitude of aloof secrecy, protected by armed guards.

[Top](#)

The Bilderberg Elite

According to founder Prince Bernhard, each Bilderberg attendee is "magically stripped of his office" upon entering the meeting, becoming "a simple citizen of his country for the duration of the conference.

"When these representatives of the Western establishment leave a Bilderberg meeting, however, they carry the Group's consensus with them. The high-powered Bilderberg debates are intended to build unity by resolving differences, and therefore certainly have a significant influence on attendees.

One also must note a significant overlap between the Bilderberg Group and other elitist think-tanks. Many members of the Group are also members of the Council on Foreign Relations, the Trilateral Commission, and other secretive supra-national planning forums. Topics on the Bilderberg's agenda have been smoothly integrated into discussions at G-8 meetings, at the World Economic Forum's [annual conference in Davos](#), Switzerland, and at other global policy venues. The seeds of consensus from these various meetings are then carried home to national governments and corporate boardrooms.

The Bilderberg's advisory committee includes luminaries such as Chase-Manhattan chairman David Rockefeller; Henry Kissinger and Vernon E. Jordan, Jr., are listed among the Group's steering committee. Past attendees include President Clinton (who attended in 1991 just before entering the scene as a possible White House contender), World Bank president James Wolfensohn, U.S. Secretary of Defense William Perry, International Monetary Fund managing director Stanley Fischer, and Ford Motor Company president Alexander Trotman, to name just a few participants.

Shhhhhhhh.... It's a Secret!

Because Bilderberg debates are held in total secrecy, there is no way to definitively gauge how much impact these deliberations have on the participants' actions. While the Bilderberg portrays itself as a think-tank for perpetuating free democratic institutions, the Group's complete removal from any democratic process contradicts its purported motivations.

Although occasional leaks occur, Bilderberg members generally do their part to preserve the shroud of secrecy surrounding the Group's activities. When questioned, Bilderbergers offer vague responses with only the most basic and mundane details of their meetings.

A search of the British House of Parliament's "[Commons Written Answers](#)" revealed an interesting recent example of how Bilderberg attendees protect the Group's secrecy. On July 10, 1998, Conservative Party member Christopher Gill inquired: "To ask the Secretary of State for Defense what mode of transport he used to attend the recent Bilderberg meeting at Turnberry; and what was the cost to public

funds." [46988]

Defense Secretary George Robertson responded: "I flew to Scotland on Friday 14 May in an aircraft of the RAF Communications Fleet, accompanied by the Secretary General of NATO, Snr. Solana. I left the following day in an Army helicopter for a further official engagement. The estimated value of the use of Departmental assets for these flights is £3,840."

On July 20, Liberal Democrat Party member Paul Keetch dug deeper into the matter, inquiring, "To ask the Secretary of State for Defense if he will make a statement on his attendance at the Bilderberg Conference in Ayrshire on 14 and 15 May." [49581]

Robertson offered little in his response: "I attended part of the Bilderberg Conference in Ayrshire last May to contribute to one of the discussions relevant to my Ministerial responsibilities."

Gill pressed the matter further on July 23, querying: "To ask the Secretary of State for Defense... if he will list the main topics discussed at the meeting and place copies of (a) the agenda and (b) the minutes of the meeting in the Library." [51550]

Robertson replied flatly: "I have no Ministerial responsibility for the agenda or production of a record of the Bilderberg meeting which I attended in May this year."

And there you have it. With no compelling level of public accountability, Robertson had no duty to elaborate. After all, Bilderberg attendees are "magically stripped of their office," as Prince Bernhard said, upon entering the meetings. This loophole allows attendees to deflect public scrutiny. It is also the quintessential example of how elite groups such as the Bilderberg deliberately and arrogantly elevate themselves beyond the reach of public scrutiny.

It is quite natural that such a secretive modus operandi would raise ominous clouds of suspicion among the Group's critics. As long as the actions of individual Bilderberg attendees have an impact on key issues of public policy, the public has a right to know how much influence this secretive organization actually exerts.

Who Gives a Dam?

Take, for example, Kenneth W. Dam, an expert in American and foreign law at the University of Chicago Law School who has written extensively on international trade treaties such as GATT. Dam was the chairman of a private National Research Council committee appointed in 1994 to study national cryptographic policy. In 1996, Dam's committee issued a key report in the debate over cryptography, titled "[Cryptography's Role in Securing the Information Society](#)" (also known by its acronym, CRISIS). The report spurred significant shifts in Clinton administration policy. (Not long after the report was released, President Clinton signed Executive Order 13010, the notorious "Critical Infrastructure Protection" directive.) The report also drew a great deal of attention in the media.

The NRC report states in its introduction: "For most of history, cryptography -- the art and science of secret writing -- has belonged to governments concerned about protecting their own secrets and about asserting their prerogatives for access to information relevant to national security and public safety."

The report goes on to state: "In pursuing this study, the committee has adopted the position that some secrets are still legitimate in today's global environment, but that its role is to illuminate as much as possible without compromising those legitimate interests. Thus, the committee has tried to act as a surrogate for well-intentioned and well-meaning people who fear that the worst is hiding behind the wall of secrecy..."

What does all this have to do with the Bilderberg? Well, it just so happens that Kenneth Dam is a [national representative](#) of the Bilderberg Group, who attended the 1995, 1996 and 1997 meetings.

Now, before your heart stops beating, it should be noted that the report was well-received by many because of its fairly critical evaluation of key escrow encryption as proposed by the Clinton Administration. The report also advocated the widespread adoption of 56-bit DES encryption.

Dam's NRC committee "believed and stated that key escrow is a promising technology," but agreed with critics that key escrow was presently too vulnerable to safely implement. Therefore, Dam wrote in a University of Chicago Law School Paper, "we should proceed with all due caution and prudence in the development of key escrow mechanisms."

The conclusions reached by Dam's private NRC committee were downright enlightened compared to the Clinton administration's proposed policy at the time, which included the dreaded Clipper Chip. However, the NRC committee's recommendations were not exactly a ringing endorsement of the citizen's rights in the information era. The committee concluded that although the concerns of civil libertarians were legitimate, the concerns of law enforcement and intelligence agencies were *equally* legitimate.

Perhaps it is a flawed or naive assumption to think that the rights of living citizens in a democratic government supersede the concerns of global trade and the National Security establishment. Yet one might argue that when the rights of the citizenry are compromised, national security is also compromised, if power is truly derived from the governed.

Regardless, Dam has, as a matter of record, influenced national debate over encryption in the United States, and he is also a key member of the Bilderberg. Those outside the Group's closed circle have no way to determine the exact significance of this connection. We can merely stab in the dark for clues. For instance, Dam comments rather cynically on the ineffectiveness of public committees, asserting that private committees such as his NRC group are more effective at producing realistic policy recommendations:

Surely there was not a single member who came out of that process with exactly the same views he came in with. In my view, committees cannot make convincing driving recommendations that will command respect if they merely meet to paper over their entering differences. Unfortunately, that is what happens in most public committees and study groups, and the result is, as Churchill put it, "a pudding."

("The Role of Private Groups in Public Policy: Cryptography and the National Research Council," by Kenneth W. Dam.)

Do we hear an echo of Dam's experiences with the Bilderberg in this statement? With no public access to Bilderberg deliberations, we have no way to be certain. Yet citizens' access to robust, secure encryption is a crucial issue in the information economy. It cuts deep to the core of individual autonomy in a technological society. Our level of control over our own personal data could easily become a litmus test for freedom in the 21st century. The Bilderberg has no right to covertly influence U.S. cryptography policy in any way, and if it is capable of doing so, we definitely have a right to know about it. If the Bilderberg network can exert such influence in total secrecy, then it is, quite literally, acting in the capacity of a "shadow world government."

Ironically, Dam touches on the issue of secret debates and restricted information in "The Role of Private Groups in Public Policy":

"In my view, the intelligence community delivered on its promise to tell us everything that was in any way relevant to our inquiry.... We concluded that we were able to say, based on this experience with the intelligence community, that *it was not necessary to have access to classified information in order to make a judgment about the proper disposition of the public policy issues*.... This conclusion lifted the fog that had obscured public discussion because, so often, the impression was left with outsiders that they were being told by government officials that "*if you knew what we know you would agree with us.*" [Emphasis added]

[Top](#)

Planetary Puppetmasters?

In its curt public statements, the Bilderberg attempts to present itself as an informal forum intended to foster "better understanding of the forces and trends affecting Western nations." Charles Muller, an administrator of American Friends of the Bilderberg, Incorporated, wrote to author Robert Eringer, "Bilderberg is a high-ranking and flexible international forum in which opposing viewpoints can be brought closer together and mutual understanding furthered."

Sounds harmless enough. Bilderberg proponents assert that the Group has no actual governing power of its own, and therefore is incapable of directly influencing global events. In the real world, however, such

assertions are laughable. Even its members concede that Bilderberg debates do have a global impact on political, economic and military policies.

"No policy is made here; it is all talk, some of it banal and platitudinous," said London *Observer* editor Will Hutton, who attended the [1997 Bilderberg meeting](#). "But the consensus established is the backdrop against which policy is made worldwide."

These policies are often profound developments on the global political and economic scene. Bilderberg attendee Jack Sheinkman, chairman of the Amalgamated Bank in the United States, told *The Scotsman*, "in some cases [Bilderberg] discussions do have an impact.... The idea of a common European currency was discussed before it became policy, as did the establishment of U.S.-China diplomatic relations before Richard Nixon became involved."

According to *H. R. H. Prince Bernhard of the Netherlands: An Authorized Biography*:

When asked for an example of a Bilderberg accomplishment [former U.S. ambassador to West Germany] George McGhee said, "I believe you could say the Treaty of Rome, which brought the Common Market into being, was nurtured at these meetings and aided by the main stream of our discussions there. Prince Bernhard is a great catalyst."

Critics have also charged that the Bilderberg laid the foundations for a [European "Round Table" group](#) of 45 business magnates which was established in 1981 to influence events in the European Union.

Retired academic and Bilderberg researcher Andrew Lockhart Walker told *The Scotsman*, "Bilderberg did all the groundwork for the group which is running Europe behind the scenes. They've had a backroom boy role for a very long time."

But if the Bilderberg is able to harness dramatic shifts in global politics and economics, one would expect to hear some mention of the Group in the media. The [World Economic Forum](#) at Davos, for instance, receives extensive media coverage every year. So why the Bilderberg blackout?

[Top](#)

Bilderberg Media Blackout

With the exception of special guest reporters, journalists are barred from Bilderberg meetings. The secret services of the United States and several European nations coordinate with local police to enforce a strict "no-go" area around Bilderberg venues such as the Turnberry Hotel in Scotland. Since the Group's first meeting in 1954, its security network has been specifically used to prevent reporters from sneaking into the forum.

Critics have suggested that the media have been slow to investigate and report on the Bilderberg because many corporate news executives and journalists are members of the Group. Like all other Bilderberg attendees, these individuals have agreed to remain silent about the meetings, in

spite of their responsibilities as high-ranking members of the national and international media. "Guests of the Bilderberg Society are bound by the same rules as members of the Bilderberg Society -- not to write about the proceedings," conservative columnist William F. Buckley wrote six months after attending the Bilderberg's 1975 meeting.

Some of the Bilderberg's past "guests" from the corporate media include:

- * News Corporation director Andrew Knight;
- * Reuters CEO Peter Job;
- * Henry Anatole Grunwald, former editor-in-chief of Time and Council on Foreign Relations member;
- * Mortimer B. Zuckerman, chairman and editor-in-chief of U.S. News and World Report, New York Daily News, and Atlantic Monthly, also a Council on Foreign Relations member;
- * Robert L. Bartley, vice president of the Wall Street Journal and member of both the Council on Foreign Relations and the Trilateral Commission;
- * Peter Robert Kann, Chairman and CEO of Dow Jones and Company, and member of the Council on Foreign Relations;
- * Katharine Graham, owner and chairwoman of the executive committee of the Washington Post, also a member of both the Council on Foreign Relations and the Trilateral Commission;
- * Jim Hoagland, associate editor, of the Washington Post;
- * New York Times editor and Council on Foreign Relations member Arthur Sulzberger;
- * Former Newsweek editor Osborn Eliot;
- * London Observer editor Will Hutton;
- * Canadian press baron Conrad Black;
- * Peter Jennings, anchor and senior editor of ABC's World News Tonight;
- * Lesley R. Stahl, CBS national affairs correspondent;
- * WETA-TV president and CEO Sharon Percy Rockefeller;
- * William F. Buckley, Jr., editor-in-chief of the National Review, host of PBS's Firing Line and Council on Foreign Relations member;
- * Prominent political columnists Joseph Kraft, James Reston, Joseph Harsch, George Will, and Flora Lewis;
- * Donald C. Cook, former European diplomatic correspondent for the Los Angeles Times and Council on Foreign Relations member;
- * Albert J. Wohlstetter, Wall Street Journal correspondent and Council on Foreign Relations member;
- * Thomas L. Friedman, New York Times columnist and member of both the Council on Foreign Relations and the Trilateral Commission;

- * New York Times book critic Richard Bernstein;
- * Hedley Donovan, Henry Grunwald, and Ralph Davidson of Time;
- * Joseph C. Harsch, former NBC commentator and Council on Foreign Relations member;
- * Bill Moyers, executive director of Public Affairs TV and former Director of the Council on Foreign Relations;
- * Gerald Piel, former chairman of Scientific American and Council on Foreign Relations member;
- * William Kristol, editor and publisher of the British Weekly Standard magazine;
- * Toger Seidenfaden, editor in chief of Denmark's Politiken A/S.

Censorship and Harassmen

Journalists and newspeople outside the Bilderberg's elite inner circle rarely pay much attention to the Group's activities, usually because they are unaware of them. In recent years, citizen media activists have had a small measure of success in getting the local media to cover Bilderberg meetings when they occur. These reports have little impact in the national and international media, but thanks to the Internet, detailed information from coverage by local and regional newspapers is now available to the public worldwide. Without this information, the report you are now reading could not have been written.

Although underground information activists have managed to pierce the local media bubbles and gather useful information about the Bilderberg's meetings, scrutiny of the Group in the establishment press is still forbidden.

For example, there is the case of C. Gordon Tether, who for years wrote the prestigious and influential column "Lombard" for the London *Financial Times*. In his May 6, 1975 column, Tether wrote: "If the Bilderberg Group is not a conspiracy of some sort, it is conducted in such a way as to give a remarkably good imitation of one."

This would be Tether's last reference to the Bilderberg. He continued to write articles mentioning the Group, but editorial management barred every single one of them from publication. After battling this censorship for two years, Tether was finally dismissed by the *Financial Times*. It may be more than a mere coincidence that Max Henry Fisher, the *Financial Times* editor who quashed Tether's Bilderberg reports, was a member of the [Trilateral Commission](#).

Freelance journalist Campbell Thomas also saw the ugly side of Bilderberg secrecy when he attempted to cover the 1998 conference for the Daily Mail. Thomas is a reporter with eight years' experience, and he happens to be a special constable as well. Like other journalists at the conference, Thomas remained outside the police security ring surrounding the Turnberry Hotel.

[graphic] Hoping to get neighbors' reactions to the conference, Thomas entered a block of flats through an open door about 500 yards away. At the first door he knocked on, the young woman who answered

informed Thomas that he was in the hotel's staff quarters, and that he should not be there. He left immediately.

A short while later, two Strathclyde Police officers approached Thomas and told him that he was being detained. Even though Thomas showed the policemen his special constable warrant card, he was handcuffed and kept in custody for eight hours. "I was treated in an appallingly heavy-handed way, like a common criminal," Thomas told the *UK Press Gazette*. "The holding cell I was put in was in a disgusting state, with excrement on every wall, and I was in that cell for the best part of five hours."

Thomas was then questioned and charged with a breach of the peace for putting the young woman he spoke to in a "state of fear and alarm," according to the *UK Press Gazette*. "I wasn't allowed to speak to my wife," Thomas said. "They took my shoes, my belt, my glasses, even the wedding ring off my finger. The whole thing was ridiculous."

Although Scottish prosecutors declined to proceed with the charge against Thomas, the event left him shaken and angry, and he has sought the advice of his union, the Chartered Institute of Journalists. CIoJ secretary Chris Underwood agreed that Thomas received "scandalous treatment," and said that the institute would back any action that Thomas decided to take.

Jim Bogusz reported similar harassment from the Strathclyde Police while gathering information on the Bilderberg's 1998 conference for his web site. Bogusz, who stood as a Referendum Party Candidate during the 1997 General Election, wrote:

"Security at Turnberry was very tight. Even though I had actually driven into the Police Compound informing them that I was there to register my protest and identifying myself, I was still later apprehended by two armed guards who requested my identification and personal details again. I expressed my concern at the extent of the security in view of the fact that police forces are allegedly under-funded. They refused to give details of how the security was being funded. I was pursued by four police motorcyclists when I went to the local Post Office to buy a newspaper and refreshment."

Bogusz attempted to obtain information from police headquarters on the source and amount of funding for the massive security effort. "They have replied saying that they cannot reveal any details about the funding of the security at Turnberry," Bogusz reported. "I challenged them that as a force which is accountable to the Public they are duty bound to reveal what resources are deployed on their activities.... It is very clear that we are having information unjustly withheld from us and that we must continue to insist on the disclosure of information which reveals in full the dealings of our Police Forces and our Elected Representatives.

The Strathclyde Police telephone number is 0141-532-2658.

The rock-hard wall of secrecy which encloses Bilderberg gatherings is more than an impediment to public knowledge; it is symbolic of the Group's aloof elitism towards the "great unwashed." We are

simply not meant to be privy to their discussions. Those who cross the threshold get their knuckles sharply rapped. Like the Group's secrecy policies, the harassment and arrest of reporters who attempt to cover Bilderberg meetings raises justified suspicions about the organization's hidden discussions.

[Top](#)

NWO for the People?

The Bilderberg's 1998 meeting was held alongside the G8 summit from May 15-17 in Birmingham, England. Immediately afterwards, the World Trade Organization hosted its 50th anniversary celebrations in Geneva from May 18-20.

While the elite celebrated their domination of the world economy, an estimated 5,000 demonstrators took to the streets in Geneva to peacefully protest a free trade system which they blamed for increasing global poverty and financial instability. The demonstrators equated the cause of these problems with the WTO's efforts to lower trade barriers and usher in the exploitative free markets of the New World Order.

Following the march, enraged youths burned cars and broke store windows. According to police and eyewitnesses, these youths were "casseurs," or "smashers" -- *agents provocateur* who used the peaceful march as an excuse to go on a violent rampage. Masked youths reportedly hurled stones at cars and restaurants, at one point overturning a limousine belonging to a WTO envoy. After the demonstrators dispersed, these "casseurs" continued their rampage throughout the city, smashing more storefronts, looting a supermarket and hurling Molotov cocktails.

Police responded with a tear gas assault and tightened a barricade-and-barbed-wire blockade around Geneva's international sites, which would be visited by various world leaders the following week. Police in full riot gear stood ready to quell any further insurrections.

Meanwhile, in Prague, Czech Republic, a demonstration turned ugly which started out as a protest against the impact of multinational corporations on the environment. An estimated 2,000 radical youths took part in "Global Street Party 98." Many turned to violence to express their dissent, overturning a police car, throwing stones into two fast-food restaurants, and injuring 22 of the riot police called in to disperse the crowd.

Obviously, just because the global elite is shoving the New World Order down our throats doesn't mean we have to like it. The policies of the World Bank and the World Trade Organization are causing real harm to real people. It is not the elite who bear the burdens of globalization; those at the bottom of the pyramid carry its weight. "Informal" forums such as the Bilderberg Group may not literally decide and implement policy, but the ideas test-marketed at the Bilderberg are often sold wholesale to international organs which do create and implement policy.

"With such an array of the wealthy and powerful in the same place, these issues could be dealt with and

decisions made that would bring hope and life to millions of poverty-stricken and dying people the world over," writes Bilderberg critic Tony Gosling, a volunteer land rights worker and former BBC Radio reporter. "But instead this time they were believed to be discussing ways to increase the groups secrecy, possibly by changing its name; fast tracking austerity measures and EMU; and extending the influence of the transnational corporations and banks over Western politicians."

"The unhappy result," Gosling writes, "is a picture of Western democracy subverted, with decision makers getting together not for reasons important to ordinary people -- social justice, common interest, and quality of life -- but to strengthen economic austerity and bring even more private gain for the world's political and corporate elite. Bilderbergers talk openly of centralizing power in their own interests, which leaves the man in the street ever further away from controlling his own destiny.

"So what vision, if any, is being pursued? We all have a right, indeed in an age of mass-starvation and with the continued threat of global destruction, a need to know."

But what is the best way to assert the rights of the world's citizenry in the New World Order? Among critics of global neo-colonialism, there is an ongoing debate over the actual significance of groups like the Bilderberg in the grand scheme of things.

Peoples Global Action Secretariat Sergio Hernandez recently wrote, "If international capitalism would exist only because of the Trilateral Commission, all what you would need would be applying the "final solution" to the Rockefellers, Rothschilds and similar capitalists (funny enough, many of them Jew or Mason) and that would be all. Unfortunately things are not so easy, as we know, but anti-corporate-rule activism often seems to convey this message.... It is neither the Bilderberg nor the Trilaterals that can impose patents on life almost all over the world." (Hernandez stated that his personal opinions do not speak for the opinions of Peoples Global Action.)

Tony Gosling, who views secretive elite groups as a powerful forces in global politics, noted, "Nationalism is certainly not an alternative, but it is only one of the voices that criticize the world elites. Nationalism is equally narrow minded as globalization. International solidarity around a charter of human and environmental rights -- such as access to culture through radio and TV, and the right to land -- seems like a common sense way forward."

Norio Hayakawa, webmaster of the online magazine Groomwatch and outspoken critic of the Bilderberg and other elitist groups, made a lot of sense in a recent Internet post: "We can turn things around by learning to fight smart using the system our forefathers gave us that has held us for so long. Violence is not the answer: unity, dedication and commitment are our weapons."

Well said, Norio. Our own government has not completely slipped out of our grasp, and people are starting to figure it out. In 1997, bipartisan protectionist forces in Congress scored a major victory by denying President Clinton's request for "fast-track authority" to negotiate global trade agreements. Resistance is still possible. But progress is a neglected issue.

The New World Order is happening; nothing will stop it at this point. But we can still influence it. There is nothing to stop us from creating a "Bilderberg for the People" to address the issues that the global elite ignore. We can still assert our rights, and expand them in ways we may never have conceived of before. And while the future may at times seem uncertain, just think of how boring it would be if you already knew how it would all turn out. We've got to at least give the global puppetmasters a run for their money, right?

Council on Foreign Relations (CFR)

Let's start with the smoke and mirrors furnished by the CFR in several of their Annual Reports. Then we will provide the other-side-of-the-coin, as observed by quite a number of independent researchers and writers.

The CFR's Annual Report for July 1, 1993 - June 30, 1994, page 4, states: *"The Council on Foreign Relations is a nonprofit and nonpartisan membership organization dedicated to improving the understanding of U.S. foreign policy and international affairs through the exchange of ideas.*

The Council was founded in 1921 shortly after the end of World War I. Several of the American participants in the Paris Peace Conference decided that it was time for more private American citizens to become familiar with the increasing international responsibilities and obligations of the United States. This decision led to the creation of an organization dedicated to the continuous study of U.S. foreign policy for the benefit of both its members and a wider audience of interested Americans."

"The New World Order", by Pat Robertson, Copyright 1991, by Word, Inc., Dallas, Texas. All rights reserved, page 66-67, states:

"This august body of 'wise men' has effectively dominated the making of foreign policy by the United States government since before World War II. The CFR has included virtually every key national security and foreign policy adviser of this nation for the past seventy years." (in 1990)

Page 96: *"In government policy, the most visible expression of the Establishment is the Council on Foreign Relations and its publication, Foreign Affairs. Out of some twenty- nine hundred members, at least five hundred are very powerful, another five hundred are from centers of influence, and the rest are influential in academia, the media, business and finance, the military, or government. A few are token conservatives."*

Page 97: *"According to a man who had been a member for fifteen years, Rear Admiral Chester Ward, former judge advocate general of the Navy from 1956 to 1960:*

'The purpose of promoting disarmament and submergence of U.S. sovereignty and national independence into an all- powerful one-world government is the only objective revealed to about 95 percent of 1,551 members [in 1975]. There are two other ulterior purposes the CFR influence is being used to promote; but it is improbable that they are known to more than 75 members, or that these purposes ever have even been identified in writing.'

The goals of the Establishment are somewhat strange, and we will discuss them in detail. At the central core is a belief in the superiority of their own skill (they often refer to themselves as **THE BEST** and **THE BRIGHTEST**) to form a world system in which enlightened monopolistic capitalism can bring all of the diverse currencies, banking systems, credit, manufacturing, and raw materials into one government-supervised whole, policed of course by their own world army." (Could this be the army of the United Nations?)

CFR membership is made up of present and past Presidents, Ambassadors, Secretaries of State, Wall Street investors, international bankers, foundation executives, think tank executives, lobbyist lawyers, NATO and Pentagon military leaders, wealthy industrialist, media owners and executives, university presidents and key professors, select Senators and Congressmen, Supreme Court Justices, Federal Judges, and wealthy entrepreneurs.

They hold regular secret meetings including members and very select guests. Occasionally they will hold a public meeting and invite the open press, in order to give the impression that they are a harmless group engaged only in social activities. Newt Gingrich (CFR) was asked by a TV reporter if he was a member of the CFR. His response was that "Yes, I am a member. About 40 years ago the CFR was probably a **very dangerous organization**, but today it is simply a place for college professors to meet, smoke their cigars and swap stories." **RIGHT!!!!**

A number of people, when hearing about the CFR subject, ask "If you say that the CFR is such a secret organization, why is it that we can get a copy of their annual report, which contains a list of their members? Why should I believe you when you say that they are a secret organization?"

The American Heritage Dictionary defines **attribute** as: "To relate to a particular cause or source; ascribe; To regard as the work of a specified agent or creator; A quality or characteristic inherent in or ascribed to someone or something; An object associated with and serving to identify a character, a personage, or an office."

The literal translation is: "**You better not tell the outsiders what we do, or say.**"

The answer then comes from their own document, the Council on Foreign Relation's 1992 Annual Report, where they emphatically state, in 20 different places, and in varying terms, that members "**better not tell**".

Page 21: "At all meetings, the Council's rule of **non-attribution** applies. This assures participants that they may speak openly without others later **attributing their statements** to them in public media or forums, or **knowingly transmitting** them to persons who will."

Page 122: "Like the Council, the Committees encourage candid discourse by holding their meetings on a **not-for-attribution** basis."

Page 169: Article II of the By-Laws states: *"It is an express condition of membership in the Council, to which condition every member accedes by virtue of his or her membership, that members will observe such rules and regulations as may be prescribed from time to time by the Board of Directors concerning the conduct of Council meetings or the attribution of statements made therein, and that any disclosure, public, or other action by a member in contravention thereof may be regarded by the Board of Directors in its sole discretion as grounds for termination or suspension of membership pursuant to Article I of the By-Laws."*

Page 174: "Full freedom of expression is encouraged at Council meetings. Participants are assured that they may speak openly, as it is the tradition of the Council that others **will not attribute or characterize their statements in public media or forums or knowingly transmit them to persons who will. All participants are expected to honor that commitment.**"

Page 175: *"It would not be in compliance with the reformulated Rule, however, for any meeting participant (i) to **publish a speaker's statement in attributed form in a newspaper**; (ii) to **repeat it on television or radio, or on a speaker's platform, or in a classroom**; or (iii) to **go beyond a memo of limited circulation, by distributing the attributed statement in a company or government agency newspaper**. The language of the Rule also goes out of its way to make it clear that a meeting participant is **forbidden knowingly to transmit the attributed statement to a newspaper reporter or other such person who is likely to publish it in a public medium**. The essence of the Rule as reformulated is simple enough: **participants in Council meetings should not pass along an attributed statement in circumstances where there is substantial risk that it will promptly be widely circulated or published.**"*

... *"In order to encourage to the fullest a free, frank, and open exchange of ideas in Council meetings, the Board of Directors has prescribed, in addition to the **Non-Attribution Rule**, the following guidelines. All participants in Council meetings are expected to be familiar with and adhere to these Guidelines. ..."*

Page 176: *"Members bringing guests should complete a "guest notice card" and acquaint their guests with the **Council's Non-Attribution Rule** governing what is said at meetings."*

Later on page 176: *"As a condition of use, the officers of the Council shall require each user of Council records to execute a prior written commitment that he **will not directly or indirectly attribute to any living person any assertion of fact or opinion based upon any Council record** without first obtaining from such person his written consent thereto."*

In "A letter from the Chairman" in the 1994 Annual Report for the CFR, Peter G. Peterson states on page 7, that:

*"... Members had occasion to meet in intensive **off-the-record** sessions with Secretary of State [Warren] Christopher, National Security Advisor [Anthony] Lake, [former] Secretary [of State] George Pratt"*

Shultz, [Trade] Ambassador [Mickey] Kantor, Under Secretary of the Treasury [Lawrence H.] Summers, the Joint Chiefs of Staff, and other ranking officials. Next on our agenda are plans for reaching out to congressional leaders as well, an opportunity we will fashion as one component of an enhanced Washington Program."

These are "THEIR" words, not mine. I am simply reporting these facts to you. If this is not a secret organization, why would they be so emphatic, and state in 20 different ways that non-attribution (or You better not tell) was so important, in their very own annual report? In addition, if you are proud of what you say and do, then you don't care whether it becomes public knowledge or not. The other side of this coin is: if you are doing something illegal, immoral, unethical, unpopular, and/or unconstitutional, you will do whatever is necessary to see that it is kept secret.

In his book "The ANGLO-AMERICAN ESTABLISHMENT" Quigley writes, *"One Wintry Afternoon in February 1891, three men were engaged in earnest conversation in London. From that conversation were to flow consequences of the greatest importance to the British Empire and to the world as a whole. For these men were organizing a secret society that was, for more than fifty years, to be one of the most important forces in the formulation and execution of British imperial and foreign policy.*

The three men who were thus engaged were already well known in England. The leader was Cecil Rhodes, fabulously wealthy empire builder and the most important person in South Africa. The second was William T. Stead, the famous, and probably also the most sensational, journalist of the day. The third was Reginald Baliol Brett, later known as Lord Esher, friend and confidant of Queen Victoria, and later to be the most influential advisor of King Edward VII and King George V.

... the three drew up a plan of organization for their secret society and a list of original members. The plan for organization provided for an inner circle, to be known as "The Society of the Elect," and an outer circle, to be known as "The Association of Helpers." Within The Society of the Elect, the real power was to be exercised by the leader, and a "Junta of Three." The leader was to be Rhodes, and the Junta was to be Stead, Brett, and Alfred Milner. In accordance with this decision, Milner was added to the society by Stead shortly after the meeting we have described." - Quigley, Carroll (1910-1977), The Anglo-American Establishment, From Rhodes to Cliveden, 1981, Books In Focus, NY, NY pg. 3

Of the Secret Societies goals and methods of operation Quigley writes, "The goals which Rhodes and Milner sought and the methods by which they hoped to achieve them were so similar by 1902 that the two are almost indistinguishable. Both sought to unite the world, and above all the English-speaking world, in a federal structure around Britain. Both felt that this goal could best be achieved by a secret band of men united to one another by devotion to the common cause and by personal loyalty to one another. Both felt that this band should pursue its goal by secret political and economic influence behind the scenes and by the control of journalistic, educational, and propaganda agencies..." - Quigley, Carroll (1910-1977), The Anglo-American Establishment, From Rhodes to Cliveden, 1981, Books In Focus, NY, NY pg.49

Between 1910-1915 the Secret Society evolved into an international group of co-conspirators called Round Table Groups set up in seven nations: Britain, South Africa, Canada, New Zealand, Australia, India, and the United States.

In 1920 the Secret Society evolved into the Institutes for International Affairs, and in 1921, the Council on Foreign Relations. Many of the founding fathers belonged to America's first intelligence agency the INQUIRY.

Note - The above quotes were furnished by "Roundtable" who has a web site at: <http://www.geocities.com/Capitol Hill/2807>

The CFR could not accomplish their goals without complicity of the mainstream news media, which they absolutely control. They do this using psychological operations (PSYOPS), and RAND Corp. is one of the chief users of this technique. This is clearly explained by the following Internet message:

"Not many people have heard of the Council on Foreign Relations (CFR) or know how they operate. This is no an accident, the group has purposely maintained a low profile. The CFR is a branch of an international group of co-conspirators called the Roundtable Group. This group has been controlling public opinion throughout the world for over 100 years.

The Joint Chiefs of Staff have defined psychological operations (PSYOPS) as those that: "include psychological warfare and, in addition, encompass those political, military, economic and ideological actions planned and conducted to create in neutral or friendly foreign groups the emotions, attitudes, or behavior to support achievement of national objectives." Another proposal "develops the concept of 'strategic psychological operations' as aimed at influencing and shaping decision-makers' power to govern or control their followers." The American people, are among the groups being targeted and controlled.

"Tactics of Deception" are formalized psychological warfare techniques. "Tactics of Deception" build a psychological environment that differs from the material environment. "Tactics of deception" are used to create false reality worlds. In terms of perceptual psychology, "Tactics of Deception" provoke illusory precepts. To influence behavior the deception must follow three basic rules. First, the deception must be "reasonable"; second there must be no simple way of checking the facts in the case; and third the use of deception should not discredit a source which may have valuable future potential.

One way to stop this group is to expose them and their techniques to the people they are manipulating. One "Tactic of Deception" used to achieve Council on Foreign Relations aims, is to place Council members on both sides of an issue. Another "Tactic of Deception" is to use CFR control of the legal, legislative and court systems to create the perception that laws are being followed when in fact, Lawyers, Legislators, and Justices are committing blatant illegalities to further CFR aims. A third "Tactic of Deception" is simply to lie."

The headquarters for the CFR is The Harold Pratt House located at 58 East 68th Street, New York, NY 10021., Tel. No.: 212-734-0400, Fax No.: 212-861-1789. Oddly enough, this building is located just across the street from the Russian (former Soviet) Embassy.

Issues of Common Concern, Cooperation, Mutual Understanding, Shared Leadership Responsibilities, Closer Cooperation, Policy Oriented, Discussion, Industrialised Democracies

About the Trilateral Commission

The Trilateral Commission was formed in 1973 by private citizens of [Japan](#), [Europe](#) (European Union countries) and [North America](#) (United States and Canada) to foster closer cooperation among these principal democratic industrialized areas with shared leadership responsibilities in the wider international system. Originally established for three years, our work has been renewed for successive triennia (three-year periods), most recently for a new triennium to be completed in 2000.

When the first triennium of the Trilateral Commission was launched in 1973, the most immediate purpose was to draw together-at a time of considerable friction among governments-the highest level unofficial group possible to look together at the common problems facing our three areas. At a deeper level, there was a sense that the United States was no longer in such a singular leadership position as it had been in earlier post-World War II years, and that a more shared form of leadership-including Europe and Japan in particular-would be needed for the international system to navigate successfully the major challenges of the coming years. These purposes continue to inform the Commission's work. The rise of Japan and progress of the European Union over the intervening years-particularly in the world economy-have validated the vision of the Commission's founders. At the same time, the end of the Cold War and other broad changes call for a fresh vision of what this outward-looking partnership can accomplish. The opportunities are remarkable, but part of the "glue" holding our regions together has dissolved with the welcome end of the old Soviet threat. Helping think through the leadership challenges our countries face is at the heart of the Trilateral Commission's work.-

The members of this non-governmental organization are about 335 distinguished individuals from the three regions, with a variety of leadership responsibilities. Three Chairmen (one from each region), Deputy Chairmen and Directors constitute the leadership of the Trilateral Commission, along with an Executive Committee including 36 other members.

The annual meeting of Trilateral Commission members rotates among the three regions. It was held in Washington, D.C. in 1999, in Berlin in 1998 and in Tokyo in 1997 and will be held in Tokyo in 2000. The agendas for these meetings have addressed a wide range of issues, an indication of how broadly we see the partnership among our countries. A publication on the annual meeting (Triologue) draws together each year's presentations.

The project work of the Trilateral Commission generally involves teams of authors from our three regions working together for a year or so on draft reports which are discussed in draft form in the annual meeting and then published. The authors typically consult with many others in the course of their work.

The task force reports (Triangle Papers) to the Trilateral Commission have covered a wide range of topics.

The regional groups within the Trilateral Commission carry on some activities of their own. The European group, with its office in Paris, has an annual weekend meeting each fall. The North American group, with its office in New York, occasionally gathers with a special speaker for a dinner or luncheon event-as does the Japanese group, with its office in Tokyo. Each region carries on its own fund-raising to provide the financial support needed for the Trilateral Commission's work. Most expenditures are also made regionally, except for project and other program expenses which are shared.

The Japanese Group

Japanese Chairman: Yotaro Kobayashi
Japanese Deputy Chairman: Shijuro Ogata
Japanese Director: Tadashi Yamamoto

secretariat address: Japan Center for International Exchange
4-9-17 Minami-Azabu, Minato-ku, Tokyo 106, Japan
telephone: 81-3: 3446-7781
telefax: 81-3: 3443-7580
e-mail: admin@jcie.or.jp
JCIE Website: <http://www.jcie.or.jp>

There are 85 Japanese places in the membership of the Trilateral Commission. A list of current members is available from the Japanese office at the above address.

Yotaro Kobayashi, Chairman and Chief Executive Officer of Fuji-Xerox, is the fifth person to serve as Japanese Chairman since the Trilateral Commission was created in 1973. The first Japanese Chairman was Takeshi Watanabe, who took up his Trilateral duties shortly after stepping down as President of the Asian Development Bank. The second was Isamu Yamashita, Chairman of Mitsui Shipbuilding and Engineering. He was succeeded by Akio Morita, founder and Chairman of the SONY Corporation. After Mr. Morita was immobilized by illness at the end of 1993, Kiichi Miyazawa, former Prime Minister of Japan and a leading figure in the Trilateral Commission from its beginning, became Acting Japanese Chairman. He passed the baton to Yotaro Kobayashi in January 1997.

The Japanese Deputy Chairman for many years was Nobuhiko Ushiba, former Ambassador to the United States and later Minister for External Economic Affairs. He was succeeded by Yoshio Okawara, who had also served as Ambassador to the United States. Shijuro Ogata, former Deputy Governor of the Bank of Japan for international affairs, succeeded Amb. Okawara in 1997.

Tadashi Yamamoto, founder and President of the Japan Center for International Exchange (JCIE), has been the director on the Japanese side of the Trilateral Commission from the beginning. The JCIE staff serves as the Trilateral Japanese staff, among many other tasks. The multiple involvements of the Japan Center for International Exchange can be explored on the [JCIE Website](#).

The Trilateral Commission draws together the three main industrialized democratic areas of the world. Economic growth and democratic governance have made large advances in East Asia in the years since the Trilateral Commission was formed, and the sense of an Asia Pacific region has also grown. While Trilateral Commission membership remains limited to Japan, individuals from elsewhere in the region have been drawn in increasing measure into annual meetings and project work. A large portion of the March 1997 annual meeting in Tokyo will be focused on Asia-Pacific community-building, and a draft report is in preparation for that meeting on the Pacific-Asia and the Trilateral Countries-with authors from Japan, Europe and North America who are drawing in many consultants from the region.

The European Group

European Chairman: Otto Graf Lambsdorff

European Deputy Chairman: Antonio Garrigues Walker

European Director: Paul Revay

Secretariat:

3, rue Treilhard,

75008 Paris, France

Tel. 33-1: 40 42 45 11

Fax. 33-1: 40 42 24 74

The framework of the Trilateral European group is the European Union (formerly the European Community). Thus the country coverage of the Trilateral European group has grown as the European Community has grown. The Trilateral Commission was launched in mid-1973, shortly after the enlargement which brought Denmark, the United Kingdom, and Ireland into the European Community. Spanish and Portuguese groups were formed in the late 1970s, looking toward the entry of Spain and Portugal into the European Community. In more recent years, Austrian, Swedish and Finnish groups have been formed in advance of the entry of these countries into European Union. A Greek group has recently been added. Several additional national groups will be formed in the coming years as the European Union enlarges in Central and Eastern Europe. (The one non-EU country represented in the Trilateral European group is Norway. The consultations that went into the formation of the Trilateral Commission took place before the 1972 referendum which unexpectedly went against Norway joining the European Community.)

The 150-member ceiling for the European group is divided into national quotas. The four largest

countries-Germany, France, Italy and the United Kingdom- each have a quota of 20; and Spain has a quota of 14. The remaining national quotas range from 9 to 4. As new national groups are formed in Central and Eastern Europe, the existing quotas will be somewhat reduced to keep the overall European group within its 150-member limit. A list of current members is available from the European office at the above address.

The idea of a unifying Europe playing a larger role on the global stage has been a driving idea in the Trilateral Commission from the beginning. Several of the leaders of the Trilateral European group worked closely with Jean Monnet and have had prominent roles in the building of Europe, including Max Kohnstamm (European Chairman, 1973-76), Georges Berthoin (European Chairman, 1976-92), and Francois Duchene (European Deputy Chairman, 1974-76). Other former European Deputy Chairmen include Egidio Ortona and Garret FitzGerald.

The emphasis given to a unifying Europe playing a larger role on the global stage makes it important for the European group to meet on its own as well as with North American and Japanese colleagues. The European group meets over a weekend each fall. The 1998 European meeting was held in Stockholm on November 6-8. See [European Regional Meeting Programs](#) for the program of this meeting as well as those for previous European regional meetings (since 1996).

Several national groups within the European group have some activities of their own, for example the German group. For more information on the Portuguese group, you can visit the site of the associated Forum Portugal Global (FPG)-which includes several leading Portuguese firms who have internationalized their business in the Trilateral regions and in Portuguese-speaking nations like Brazil. (FPG also has as members all the previous Portuguese members of the Trilateral Commission).

[Top](#)

North American Group

North American Chairman: Paul A. Volcker

North American Deputy Chairman: Allan E. Gotlieb

North American Director: Charles B. Heck

secretariat address: 345 East 46th Street, New York, New York 10017

telephone: 1-212: 661-1180

telefax: 1-212: 949-7268

e-mail: trilat@panix.com

Of the 100 North American places in the membership of the Trilateral Commission, 15 are for the Canadian group and 85 for the U.S. group. A list of current members can be obtained from the North American office at the above address.

The first North American Chairman was Gerard C. Smith (1973-77), former head of the U.S. Arms Control and Disarmament Agency and chief U.S. negotiator of SALT I, who served as Trilateral Chairman until he entered the Carter Administration as Ambassador-at-large in charge of Non-Proliferation Issues. The next North American Chairman was David Rockefeller (1977-91), who had played a central role in the formation of the Trilateral Commission and continues to be recognized as Founder and Honorary Chairman. Paul Volcker, former Chairman of the U.S. Federal Reserve Board, succeeded Mr. Rockefeller in 1991. The North American Deputy Chairman is also head of the Canadian group. Jean-Luc Pepin first held this position. He was succeeded in 1977 by Mitchell Sharp, former Foreign Minister of Canada, when Mr. Sharp left government service and Mr. Pepin returned to government service. J.H. (Jake) Warren, former Ambassador to the United States and Coordinator for Multilateral Trade Negotiations, served from 1986 to 1990. He was succeeded by Allan Gotlieb, former Ambassador to the United States.

In the case of the U.S. group, a rotation system generally brings 5-10 openings in the membership each year under the ceiling of 85. A major portion of the summer annual meeting of North American Executive Committee members is devoted to consideration of U.S. membership invitees, based on a list of candidates many times larger than the number of openings. If a member is elected or appointed to a position in the Executive Branch of the U.S. government, he or she steps down as member, given the Commission's unofficial character.

The Canadian group is separately organized for membership choices and for raising and expending the funds which cover participation of Canadian members, a contribution to program, and hosting costs for events in Canada (such as the 1996 annual meeting in Vancouver of the overall Commission).

A grant from the Ford Foundation paid most of the expenses for the Trilateral Commission in the first triennium (1973-76). Fundraising has been decentralized since that time. In the United States, an increasing portion of the needed financial support has come from a wide range of corporations. Foundation support remains important (particularly for some project work), as does the support of some individuals.

The North American group holds occasional dinner or luncheon events organized around a particular speaker. The presentations of these speakers are often transcribed for broader circulation.

Abstract

The phrase "new world order" has been widely used on the political scene since first publicly coined by former president, George Bush. Although quickly adopted as the catch phrase of the 1990s, few people actually agree on what "new world order" really means. Since "new world order," while elusive in definition, is most frequently used to describe aspects of the post Cold War international scenario, understanding the true meaning of that phrase is critical to projecting our future strategic environment and prospects for the new millennium. The attempt of this paper is to reveal that true meaning. Historical analysis will be the primary methodology used to reveal the meaning of George Bush's specific terminology describing his concept of "new world order." In a January 16, 1991 speech, he identified the opportunity to build a new world order "where the rule of law-governs the conduct of nations," and "in which a credible United Nations can use its peacekeeping role to fulfill the promise and vision of the UN's founders." These words will be dissected and historically analyzed to develop a clear picture of "new world order." Additionally, the primary mechanisms for implementing new world order will be addressed; and finally, specific strategic environment and national security implications will be drawn from those conclusions.

---1

Chapter 1

What "New World Order?"

Out of these troubled times, our-objective-a new world order-can emerge-Today, that new world is struggling to be born, a world quite different from the one we have known-
-Former President George Bush
September 11, 1990

The phrase, "new world order" has been widely used since first coined by George Bush in his 1990 speech before a joint session of Congress. Although quickly adopted as the catch phrase of the 1990s, few people actually agree on what "new world order" really means. It has been used to describe such diverse contemporary issues as the post Cold War balance of power, economic interdependence, fragmentation and the rise of nationalism, and technology advancement and integration-basically any issue that appears new and different. The general feeling is that while elusive, this "new world order" is likely significant. Since "new world order" is most frequently used to describe aspects of the post Cold War international scenario, understanding the true meaning of that phrase is critical to projecting our future strategic environment and prospects for the new millennium. The attempt of this paper is to reveal that true meaning.

---2

New World Order Interpretations

In relation to world politics, there are a few basic paradigm-driven interpretations of the new world order. Joseph Nye, in his 1992 Foreign Affairs article, "What New World Order?" identifies two of those: "Realists, in the tradition of Richard Nixon and Henry Kissinger, see international politics occurring among sovereign states balancing each others? power. World order is the product of a stable distribution of power among the major states. Liberals, in the tradition of Woodrow Wilson and Jimmy Carter, look at relations among peoples as well as states. They see order arising from broad values like democracy and human rights, as well as from international law and institutions such as the United Nations." (1)

Another dichotomy of new world order interpretations is presented by Lawrence Freedman in his Foreign Affairs article, "Order and Disorder in the New World." The "The first [interpretation] is that the slogan reflects a presumption that international institutions and, in particular, the United Nations, will be taking a more active and important role in global management-[T]he second interpretation-[is] that the phrase 'new world order' is merely descriptive, requiring no more than acceptance that the current situation is unique and clearly different in critical respects" from the past." (2) The struggle to ascertain George Bush's true meaning of new world order is not unique to this author. Richard Falk, in his 1993 work, *The Constitutional Foundations of World Peace*, struggled with the realist and liberalist- or more aptly termed-globalist interpretations. "We could never be quite sure, especially in the months of crisis leading up to the war itself, whether George Bush was promising a new structure of international relations based on respect for international law and on centrality for the United Nations, or

---3

whether his use of the phrase 'a new world order' was little more than a bid for public support and an invitation that governments join the North in one further war in and against the South." (3) So far there are three new world order paradigms presented: realist based, focused on balance of power; globalist based, focused on global management and the United Nations (UN); and finally, idealist based, focused on nothing more than the identification of change. To make an accurate assessment of Bush's precise meaning, more information is obviously needed. On January 16, 1991, he further clarified his position in a speech announcing the hostilities with Iraq by identifying the opportunity to build a new world order "where the rule of law-governs the conduct of nations," and "in which a credible United Nations can use its peacekeeping role to fulfill the promise and vision of the UN's founders." (emphasis added) (4) These specifics in describing Bush's concept of new world order clearly lean toward the globalist interpretation.

Methodology

Joseph Nye pointed out, that the "1991 Persian Gulf War was, according to President Bush, about 'more than one small country; it is a big idea; a new world order-" (5) Bush's words, highlighted in

the quote above, will be analyzed in detail to reveal the nature of his globalist "big idea" called new world order. Specifically, Chapter 2 will focus on the identification of the "UN's founders." Chapter 3 will attempt to frame their "vision." Chapter 4 will address a "credible United Nations" and its "peacekeeping role." Chapter 5 will analyze "the rule of law" in terms of governing "the conduct of nations." Following the detailed analysis of Bush's words, the mechanisms for implementing the new world

---4

order will be addressed in Chapter 6 as well as the implications of new world order in Chapter 7. Chapter 8 will reflect this authors final thoughts on the subject.

---5

Chapter 2

The United Nations' Founders

Forty-five years ago, while the fires of an epic war still raged across two oceans and two continents, a small group of men and women began a search for hope amid the ruins. They gathered in San Francisco, stepping back from the haze and horror, to try to shape a new structure that might support an ancient dream.

-George Bush
October 1, 1990

Interpreting Bush's concept of new world order begins with identifying the "UN's founders." Who were these men and women "gathered in San Francisco?" Before pursuing that question, though, it is interesting to note that Bush was not basing his "big idea" on the founding fathers of this great nation, but on a less infamous group of UN founders. In fact, our nation's founding fathers may not have been enamored with the whole concept of a United Nations. For instance, George Washington commented in his farewell address that, "the great rule of conduct for us in regard to foreign nations is in extending our commercial relations, but to have with them as little political connection as possible." (1)

---6

San Francisco Conference

The United Nations charter was established at the San Francisco Conference in June, 1945. By analyzing the events leading up to the conference and identifying some of the key players, it may be possible to pinpoint Bush's "UN founders."

The War and Peace Studies of World War II provided the backdrop for the development of the United Nations. After 1942, all study groups of the War and Peace Studies shifted focus from the war effort to developing the structure and responsibilities of the future United Nations organization. (2) In fact, "quite a few members of the War and Peace Studies groups, after leaving the program, participated in the preparatory conference at Dumbarton Oaks or served in advisory positions at the organizing conference of the United Nations in San Francisco in June 1945. Some of them actually attained positions of considerable influence." (3)

So exactly who were these people that transitioned from the War and Peace Studies to the development and establishment of the United Nations? On 12 September, 1939, more than two years prior to United States involvement in World War II, Hamilton Fish Armstrong (then editor of the Council on Foreign Relations publication, Foreign Affairs) and Walter Mallory (then Executive Director of the Council) contacted the State Department to offer the services of the Council on Foreign Relations. "The men of the Council proposed a-program of independent analysis and study that would guide American foreign policy in the coming years of war and the challenging new world that would emerge after. The project became known as the War and Peace Studies." (4) Aware of the fact that the State Department would not be able to create a brain trust within a short period of time, both Secretary of State Cordell Hull and Hull's undersecretary,

---7

Sumner Welles, agreed to the Council's plan. (5) The State Department/Council relationship was not public knowledge, though. Isaiah Bowman, then a Council on Foreign Relations Director, wrote in November of 1939 that, "the matter is strictly confidential, because the whole plan would be 'ditched' if it became generally known that the State department is working in collaboration with any outside group." (6)

Over the next five years, almost 100 men, financed by nearly \$350,000 from the Rockefeller Foundation, formulated 682 memoranda and drafts for the State Department.

The studies were divided into four primary functional groups: economic and financial, security and armaments, territorial, and political-all headed and staffed by Council members. (7) Determining the precise impact of those memoranda on the decisions of the State Department is impossible, but Armstrong and Mallory were convinced that their efforts both defined the boundaries of debate within the government and secured the Council's role as the center of attention for setting foreign policy priorities. (8) The cooperation between the Council and the State Department was further enhanced when, in 1942, the State Department invited Council members to participate in the newly created Advisory Committee on Postwar Foreign Policy. "This group-concentrated on the United Nations organization, the successor to the League of Nations, a subject that always received keen attention at Council meetings." (9) In the spring of 1943, Armstrong and Norman H. Davis (a Council Director) proposed a plan to Secretary of State Hull for a "supranational organization" based on the Wilsonian ideals of liberal internationalism. Hull subsequently asked Davis to present the proposal to President Roosevelt.

Roosevelt liked the idea and within a short time blueprints for a charter of the successor to the League of Nations were drafted and discussed . . . In his discussions with Davis, President Roosevelt proposed changes, and

---8

Davis introduced these into the discussions and revisions of drafts. Roosevelt, in August 1943, took the final draft with him to the Quebec Conference, where it was accepted by Britain's Prime Minister Winston Churchill and Foreign Minister Eden. With only minor changes, the text was taken to Moscow and signed by delegates of the United States, Great Britain, China, and the Soviet Union as the Moscow Declaration on 1 November 1943. In this document, the nations not only pledged to coordinate and cooperate in their war aims but also declared 'that they recognized the necessity of establishing at the earliest predictable date a general international organization, based on the sovereign equality of all peace-loving states, and open to membership by all such states, large and small, for the maintenance of international peace and security.' (10)

The framework for the United Nations was clearly in place. The culmination would come at the San Francisco Conference. Authors of the subject disagree as to the specific amount of influence levied by the Council. Dan Smoot, in *The Invisible Government*, concludes that: "The crowning moment of achievement for the Council came at San Francisco in 1945, when over 40 members of the United States Delegation to the organizational meeting of the United Nations-were members of the Council." (11) Cleon Skousen in *The Naked Capitalist* deduced a different number when he said: "There were 74 CFR members in the American delegation to the UN Conference at San Francisco in 1945.-These-CFR members occupied nearly every significant decision-making spot in the American delegation-" (12) Whatever the number, it is clear that the Council was a major player in both the conference and the founding of the UN. Even Michael Wala, who is much less convinced of the power of the Council than Smoot and Skousen, said in *The Council on Foreign Relations and American Foreign Policy in the Early Cold War* that, "only in the founding of the United Nations did their [Council] discussions about organization and responsibilities have a direct and immediate impact." (13)

---9

Based the discussion so far, it seems reasonable to conclude that Bush's "UN's founders," are represented, maybe not entirely, but at least in large part by the Council on Foreign Relations. A more detailed look at the Council is required, though, to determine their importance as related to a new world order.

Council on Foreign Relations

For the Council on Foreign Relations, as a "UN founder," to play a significant role in the creation of Bush's new world order, one would think that they must have some impact on the formulation and/or implementation of American foreign policy. The relationship between the Council and American foreign policy will now be further analyzed.

Inquiry

The internationalist ideal of the United Nations was not new. The Council members viewed this as a "second chance" at internationalism

through a supranational organization. (14) The first, the League of Nations, was a concept formulated with the help of the "The Inquiry," the predecessor to the War and Peace Studies and catalyst for the creation of the Council on Foreign Relations. The Inquiry was a working "fellowship of distinguished scholars tasked to brief Woodrow Wilson about options for the postwar world once the kaiser and imperial Germany fell to defeat." (15) In the few years immediately following the Paris Peace Conference, the leaders of the Inquiry established the Council on Foreign Relations. "The vision that stirred the Inquiry became the work of the Council on Foreign Relations over the better part of a century," according to the Council's own 75 year history, *Continuing The Inquiry*. (16)

---10

The Council was formally incorporated on July 29, 1921 with the specific purpose, "to afford a continuous conference on international questions affecting the United States." (17) As supporters of Wilson and the League of Nations, Council members were greatly disillusioned by the Senate's rejection of the League and the swell of isolationist sentiment in America. They "resolved to awaken America to its worldwide responsibilities." (18) Hence, began the Council's long-standing drive to advocate globalist foreign policies. Their internationalist bent was clearly demonstrated by one of the Council's first internal controversies. Within the first year or so of the Council's existence, an avowed isolationist was invited to speak at private Council dinner meeting. Many members were outraged. "Russell C. Leffingwell, a partner of J.P. Morgan's bank, refused to stand at the lectern alongside an isolationist; Paul Warburg of Kuhn Loeb vented outrage that an "uneducable demagogue" should be offered Council hospitality." (19) In response, Isaiah Bowman, of the original Inquiry, presented a different perspective: "What has Wall Street to gain by refusing to hear even a demagogue? Certainly if he is a dangerous demagogue we ought all the more to hear him to discover why he is dangerous and just how dangerous he is." (20) This episode established the precedent for Hamilton Fish Armstrong's strategy of presenting the Council as impartial by inviting varied speakers, but limiting the membership to those "influential figures who shared an internationalist perspective." (21)

Foreign Policy Process Impact

The Council on Foreign Relations has been singled out as one of the most influential organizations impacting American foreign policy.

(22) The degree to which the Council has influenced foreign policy over the last 75 years is heavily debated; the fact that it has is

---11

not. The Council on Foreign Relations is populated with powerful figures from all walks of life. Their own 25 year history stated that, "the Council's membership has been unusual in that it has included leaders of industry and finance, authorities on international law, economics, and international relations, officers of the Foreign Service and of the armed services of the United States in Washington and abroad, and prominent authors, editors and newspapermen. Members have thus had direct access to the facts which affect foreign policy." (23) Numerous United States presidents, secretaries of state, CIA directors, and many other influential foreign policy positions have been filled with names from the rolls of the Council on Foreign Relations. Just by scanning the very short list of Council on Foreign Relations past and present Directors and Officers, one can quickly identify several key players in our recent administrations: George Bush, Cyrus Vance, Zbigniew Brzezinski, Henry Kissinger, George Shultz, Warren Christopher, Brent Scowcroft, Richard Cheney, William Cohen, William Crowe, Jr., Les Aspin, Paul Volcker, and Alan Greenspan. (24) A review of the entire Council roll (which this author did not have the resources to pursue) would produce many more.

The Council on Foreign Relations, because of wealthy, influential members such as the Rockefellers, has been traditionally associated with the "elites" in America and has been referred to by some as representative of the "Eastern Establishment." There are many conspiracy theories associated with the Council's influence on American foreign affairs. This paper is not intended to adopt any of those theories, but to show that regardless of support for these theories, most students of the Council have concluded that there is substantial linkage between the Council and American foreign policy.

---12

Michael Wala, who clearly denies support for the conspiracy view, still concludes at the very end of his book, that, "the Council on

Foreign Relations provided a well-organized, yet informal, link between elites concerned with U.S. foreign relations and the administration. At the same time it served as a connection between elite and public opinion. The Council thus fulfilled an important function in a corporatist strategy to devise the foreign policy of the United States." (25)

Professor G. William Domhoff has concluded in his studies that through the Council, "the power elite formulates general guidelines for American foreign policy and provides the personnel to carry out this policy." (26) As an example, he highlights that twelve of fifteen presidential committees dealing with aspects of foreign and military policy established between 1945 and 1972 were headed by members of the Council on Foreign Relations. (27) Anthony Lukas debunked the conspiracy theory in his article, but pointed out that, "everyone knows how fraternity brothers can help other brothers climb the ladder of life. If you want to make foreign policy, there's no better fraternity to belong to than the Council." (28)

Carroll Quigley, a former Georgetown professor, who once taught President Clinton, provided the most intriguing commentary on the subject. In his 1966 mammoth 1300 plus page work, *Tragedy and Hope-A History of the World in Our Time*, Quigley commented on the conspiracy theory: "This radical Right fairy tale, which is now an accepted folk myth in many groups in America, pictured the recent history of the United States-as a well-organized plot by extreme Left-wing elements-to destroy the American way of life." (29) He goes on to further clarify that, "this myth, like all fables, does in fact have a modicum of truth. There does exist, and has existed for a generation, an international

---13

Anglophile network-I know of the operations of this network because I have studied it for twenty years and was permitted for two years, in the early 1960s, to examine its papers and secret records. I have no aversion to it or to most of its aims and have, for much of my life, been close to it and to many of its instruments." (30) Quigley continues: "The two ends of this English-speaking axis have sometimes been called, perhaps facetiously, the English and American Establishments. There is, however, a considerable degree of truth behind the joke, a truth which reflects a very real power structure." (31) The linchpin is that Quigley identifies the "American Establishment" half of the "Anglophile network" as the

Council on Foreign Relations. (32) These words probably provide the greatest testimony of the power and influence of the Council on Foreign Relations because they come from a man on the inside intimately familiar with the organization and its linkage to the foreign policy process.

Regardless of their perspective, several students and one insider of the Council have all concluded that the Council is a significant player in the American foreign policy process. This author would have to agree despite the Council's defense that it is nothing more than, "a privately sponsored, privately financed, privately managed post-graduate academy of political science, functioning in the true spirit of public service." (33) This picture just doesn't wash with the comments of members such as Richard Barnet who stated that, "membership in the Council on Foreign Relations-is a rite of passage for an aspiring national security manager-The Council takes itself very seriously." (34) Given the Council's role as a "UN founder" and their influence on foreign policy, two more linkages need to be discussed prior to proceeding. The first is the role of the

---14

Council publication, Foreign Affairs, and the second is the relationship between the Council and tax exempt foundations.

Foreign Affairs

Part of the Council on Foreign Relation's purpose is to provide a foreign affairs educational forum. One of their primary tools to achieve that purpose is their publication, Foreign Affairs. Officially, Foreign Affairs does not represent the views of the Council, but those of individuals, and is open to all perspectives. However, Wala and Schulzinger have slightly different interpretations. Wala points out that through discussion groups and Foreign Affairs, Council members sought to "build a consensus, not of the broad public, but of the elites of finance and business, of academicians at prestigious universities, and of 'responsible' officials in the State Department. This was to serve as the basis and legitimization of foreign policy decisions. When results of the discussion at the at the Council were considered important and relevant, they could be published in Foreign Affairs." (35) Schulzinger, in The Wise Men of Foreign Affairs adds that, "while the editors saw themselves as the models of impartiality, no reader could

be fooled into thinking that the journal was anything other than a plea for forward United States foreign policy." (36) Since articles published in Foreign Affairs primarily represent the ideologies and policies important to the Council, they will be frequently utilized as primary sources later in this paper.

Foundations

It is important to note that the Council on Foreign Relations is not a stand-alone entity with a monopoly on foreign policy influence. No one organization can be all-

---15

powerful in today's complex society. There are many influential organizations, but the Council is one of the few that has been consistently identified throughout the last 75 years. One additional linkage important to highlight for the rest of this analysis, though, is that of tax exempt foundations.

Republican Congressman Carroll Reese, heading a Special Committee on Tax-Exempt Foundations, concluded the following in his final report published December 16, 1954 by the Government Printing Office: Miss Casey's report (Hearings pp.8777, et seq.) shows clearly the interlock between The Carnegie Endowment for International Peace, and some of its associated organizations, such as the Council on Foreign Relations and other foundations, with the State Department-They have undertaken vital research projects for the Department; virtually created minor departments or groups within the Department for it; supplied advisors and executives from their ranks; fed a constant stream of personnel into the State Department trained by themselves or under programs which they have financed; and have had much to do with the formulation of foreign policy both in principle and detail.

-They have, to a marked degree, acted as direct agents of the State Department.

-What we see here is a number of large foundations, primarily The Rockefeller Foundation, The Carnegie Corporation of New York, and the Carnegie Endowment for International Peace, using their enormous public funds to finance a one-sided approach to foreign policy and to

promote it actively, among the public by propaganda, and in the Government through infiltration. The power to do this comes out of the power of the vast funds employed. (37)

Nearly twenty years later, Professor Domhoff further evidenced the linkage by pointing out that "in 1971, 14 of 19 Rockefeller Foundation trustees were members of the Council on Foreign Relations, with 4 of those members also serving as directors of the council. Ten of 17 trustees of the Carnegie Corporation, as the most important of four Carnegie foundations is named, were members of the council at that time, as were 7 of 16 trustees at the Ford Foundation." (38) The foundations have provided a funding source for many activities of the Council and related organizations. Recall the earlier mentioned

---16

financier of the War and Peace Studies-the Rockefeller Foundation. The foundation linkage will reappear in later discussions on the "vision" of the "UN founders."

George Bush and New World Order Linkage

Two final questions need to be addressed prior to proceeding. The first is, could George Bush have actually inferred involvement of an organization like the Council on Foreign Relations in his "UN founders" phrase? Given Bush's long-standing involvement with the organization, it seems reasonable to conclude that the answer is, yes! Bush was on the Council Board of Directors in the years 1977-1979 and a member long before that. (39) He stepped down from the boards of the Council, Yale, and the Trilateral Commission to shed his "establishment" image prior to his run for the Republican presidential nomination. (40) But, despite early momentum, he lost the 1980 Republican primary to Ronald Reagan due largely to what Holly Sklar calls, "right wing opposition to his-association with the Eastern Establishment." (41) Obviously, Bush knows a thing or two about the workings of the Council and as such, clearly understands their linkage to the formation of the United Nations.

The second question is, why has such a significant amount of effort gone into describing the relationships of the Council on Foreign Relations prior to proceeding with the analysis of Bush's new world order words? Understanding the Council relationship is critical to establishing the framework for the upcoming description of new world

order vision and implementation mechanisms. Council related writings will therefore provide the predominant sources for the rest of this paper.

---19

Chapter 3

New World Order Vision

In a quite literal sense, world order visions can, like religion, act as opiates-It is necessary to practice, as well as preach, global reform, and to embody world order values in present public policy choices.

-Richard A. Falk

World Order Models Project

The current task at hand is to build a clear picture of the new world order "promise and vision" of Bush's UN founders. To accomplish this, the ideas that evolved from the War and Peace studies will first be examined. Then two, more contemporary world order studies related to the Council on Foreign Relations will be evaluated. The aspects of new world order vision that impact national security strategy are those that will be highlighted.

War and Peace Studies

In his 1992 Foreign Affairs article, Joseph Nye, comparing the present with the past, concluded that "when the decline of Soviet power led to Moscow's new policy of cooperation with Washington in applying the UN doctrine of collective security against Baghdad, it was less the arrival of a new world order than the reappearance of an aspect of the liberal institutional order that was supposed to have come into effect in 1945." (1)

---20

And the vision of that liberal institutional order was driven by the Council's War and Peace Studies.

The first critical challenge to world order vision was to resolve the competing nature of universal order on one hand and national sovereignty on the other. Walter R. Sharp, a general working on the War and Peace Studies Politics group, denounced the "popular fetishism of sovereignty" and advocated the creation of "an international society which will be physically secure, economically stable, and culturally free." (2) Sharp foresaw the advancement of economic interdependence as means of eroding national barriers. On the security side, the studies concluded that the new United Nations must have responsibility for policing international disorders. Several recommendations were presented for the creation of an international police-like force. Rather than creating a true multinational army, Colonel George Fielding Eliot advocated assigning whole units of national forces on a two-year rotating basis to UN command. Eliot's fear of a permanent UN multinational police force was that a centralized Chief of Staff, "devoid of nationality and the restraints of loyalty and his own country's laws, might well seek to carve out a Napoleonic future of his own." (3)

Another Armaments group staffer, Theodore P. Wright, presented a truly visionary strategy for international policing which may be viewed as a prophesy of the outcome of the Gulf War. Wright foresaw air power as the wise solution to overcoming the difficulties of forging a true international army. Air power provided the opportunity for awesome destructiveness while employing relatively few personnel. Wright explains: "The war has-taught us the lesson that now, with the advent of air power, the small state is indefensible, a position analogous to that of the feudal castle with the advent of gun-

---21

powder." Minor powers lacked air forces of any significance and were helpless against superpower fighters and bombers acting under UN

direction. He expected an international air force to apply "quick and certain" retribution against peace violators. Such action, according to Wright would promote the "development of feelings of world citizenship." (4) The Gulf War could be viewed as fulfillment of that vision. Asymmetrical coalition air forces under UN authority (via resolution) provided the "quick and certain" retribution against the violator, Iraq. In fact, George Bush alluded to the "development of feelings of world citizenship" when he hoped that out of the "horror of combat," Iraq would recognize that "no nation can stand against a united world" and bring itself to "rejoin the family of peace-loving nations." (5)

Grayson Kirk, also of the Armament group, envisioned the necessity of an "intermediate arrangement" between the jump from world war to world sovereignty. He advocated an intermediate step of regional security arrangements built around the United States, Great Britain, Soviet Union, and China. Additionally, he felt that regionalism could only be a catalyst for international integration if it remained informal and flexible. (6) The Council strongly backed the loosening of the definition of American interests to include applying military force "wherever a serious threat to peace may arise." Aggressor nations must be thwarted by collective force. As such, a criteria for determining aggression must be established. The Armaments group identified an aggressor as a "nation which has 1) committed specified, overt military acts; 2) steadfastly refused to submit their dispute to an international agency; and 3) refused to comply with the decisions of these agencies." (7)

---22

The War and Peace Studies therefore formulated a foundational vision of a new world order of transitional sovereignty, aided by economic interdependence; collective security maintaining international order through a multinational police force under centralized authority; and, a shift from unilateral actions based solely on national interests to support of collective actions based on common interests, especially against "aggressor nations." The authors of the War and Peace Studies provided both the framework of the new world order vision and the realization that the international transformation would be a long term venture. Unlike their Paris Peace Conference predecessors, the studies staffers recognized that shift to greater world sovereignty would take time and that the "United States would have to participate in years of conferences to create the new world

order." (8) In addition, regional arrangements would provide the stepping stone to world order. Since this evolution-as predicted-has been a long term venture, it pays to look at some more recent Council related studies to provide more fidelity to the contemporary new world order vision.

In the 1970s, two independent studies related to new world order were undertaken. One, the World Order Models Project, was directed by Council member and former Rutgers Professor of Law, Saul H. Mendlovitz, with heavy academic contributions by another Council member, Princeton Professor Richard A. Falk, and financed by the Carnegie Endowment for International Peace and the Rockefeller Foundation. (9) The second, The 1980s Project, was an extensive study produced by the Trilateral Commission, a Council offshoot created by David Rockefeller to focus on developing trilateral regional cooperation between the United States, Western Europe, and Japan.

---23

World Order Models Project

Richard Falk and other World Order Models Project (WOMP) contributors give credit to Mendlovitz as having "done much to shape the course of this world order journey" over the past 25 years. (10) The WOMP provides probably the most idealistic vision for the new world order, concentrating on evolving a "transnational framework of world order values, thinking, and action." (11) The four central world order values are: "[1] The minimization of large-scale collective violence; [2] the maximization of social and economic well-being; [3] the realization of fundamental human rights and conditions of political justice; [4] the rehabilitation and maintenance of environmental quality, including the conservation of resources." (12) It is interesting to note that Robert S. McNamara was a member of the WOMP Sponsoring and Policy Review Committee. (13)

The WOMP, while idealistic, was surely not utopian. Mendlovitz describes the action-oriented WOMP methodology: "In fact, each author was asked to attempt a diagnosis of the contemporary world order system, make prognostic statements based on that diagnosis, state his preferred future world order and advance coherent and viable strategies of transition that could bring that future into being. A stringent time frame [for implementation], the 1990s, served to discipline and focus thought and proposals.-There was also general

agreement that we should go beyond the nation-state system-to use a much broader range of potential actors, including world institutions, transnational actors, international organization, functional activities, regional arrangements, the nation-state, subnational movements, local communities, and individuals." (14) While the WOMP values seem mundane enough, their conclusions were not. With the main concern of the WOMP being war and its destructive nature, one of their central

---24

new world order visions in Falk's A Study of Future Worlds was the "dismantling [of] the national security apparatus in the major states of the world." (15)

Hidemi Suganami, in his review of world order proposals, summarizes Falk's new world order guiding principles as world disarmament, establishment of an international police force to settle disputes, implementation of a global checks and balances system, and constitution of a coordinating body to provide unity to the global structure. (16)

WOMP-related work has continued throughout the years. Mendlovitz more recently developed specific time phased objectives to support what he called a "Movement For A Just World Peace." His short run objectives for 1991-1993 included "initiating an annual process of five percent reductions in defense budgets over a ten-year period with savings being allocated for basic needs, domestically and globally." His intermediate targets for 2001-2003 included: the "establishment of a small but permanent peacekeeping force for the UN with the authority of humanitarian intervention in civil wars," the "submission to the compulsory jurisdiction of the International Court of Justice for all treaties concluded during and after the decade of 1990," and the "establishment of a court to deal with individuals who commit crimes against humanity." And finally, Mendlovitz's long range goals for 2011-2013 were much more ambitious. They included, a "global tax scheme to establish and maintain a basic needs regime for global society," a "complete and general disarmament with alternative security system in place," and a "regional and global human rights regime with compulsory jurisdiction." (17)

Mendlovitz presents a vision of evolutionary disarmament accompanied by corresponding strengthening of a UN security apparatus. Additionally, he advocates a mechanism-global tax-to fund international organizations and foresees an enhancement

---25

of international judiciary powers. This vision at first blush may seem somewhat radical, but a closer look shows it not to be far off the mark. The process of disarmament, spurred by the end of the Cold War, did in fact begin about the time Mendlovitz predicted. The UN security apparatus has strengthened through the course of recent activities in Bosnia, Somalia, Haiti, and Rwanda. The United States seems to have fully adopted the concept of UN sponsored and supported actions based on the extent of UN/multinational related doctrine being published by the Department of Defense. Several recommendations for a tax on international flights to financially support the UN have recently been presented, the most notable by former Secretary-General Boutros Boutros-Ghali. (18) And finally, the enhancement of international judiciary powers is demonstrated by such recent events as the 1996 swearing-in of 21 judges constituting the International Tribunal for the Law of the Sea. (19)

The reason for success in implementing world order visions is not chance. These visionaries do not perceive their actions as academic exercises. They do not advocate passive acceptance of evolutionary world order shifts, but active engineering of the transition process. Falk clearly states that "transition tactics and strategy involve accelerating the process and devising ways to assure its completion in accordance with our specified value preferences. In this sense, it adopts an activist or engineering posture-" (20) Later, in *A Study of Future Worlds*, Falk provides a specific strategy: "Symbolic world leaders such as the Secretary General of the United Nations or the Pope might espouse [the WOMP agenda]-as a program for the future, and national leaders in prosperous, homogenous, and stable countries of intermediate size such as Sweden or Canada may also be led to lend open support. These kinds of external developments,

---26

together with much more vital citizen efforts within the United States, would initiate a world order dialectic within American politics that would begin to break down decades of adherence to [the Westphalian system] and its infrastructure of values, perceptions, and institutions." 21

The articulated philosophies of former Secretary-General Boutros

Boutros-Ghali and the active advocacy of UN peacekeeping by Canada, may be evidence of reasonable success of Falk's twenty year old strategy.

1980s Project

There is one additional new world order project which needs to be addressed prior to proceeding. In the 1970s, the Council on Foreign Relations, primarily through its offshoot--the Trilateral Commission, undertook a five year, \$1.6 million research effort titled the "1980s Project." According to its Director, Richard H. Ullman, the 1980s Project was "the largest single research and studies effort the Council on Foreign Relations has undertaken in its-history, comparable" only to the War and Peace Studies of World War II. (22) The 1980s Project's task was to define the issues and policies required to respond to a post Cold War international scenario. Unlike its predecessors, the Inquiry and the War and Peace Studies, the 1980s Project was a study effort open to members and non-members, and openly published to stimulate a broad professional audience--not just government decision-makers. (23)

The primary focus of the 1980s Project was social and economic issues, but a few security related studies were pursued. In fact, Cyrus Vance, former Council director, chaired a group charged with studying weapons of mass destruction immediately prior to becoming Secretary of State. (24)

---27

One clear influence on our current military came from the study titled International Disaster Relief (1977). It recommended that Washington should do more to coordinate its relief efforts to assist flood, earthquake, famine, and other disaster victims. Relief agencies should be given more direct responsibility for operations. And, all nations should accept the "common responsibility of all people and governments to provide protection and relief to the victims of natural disasters." (25) This concept has manifest itself this decade in the likes of Somalia and Rwanda. The United States has adopted humanitarian assistance as a military mission and corresponding military doctrine is currently on the street and being written to more effectively involve the relief agencies in humanitarian assistance operations. The 1980s Project, under the auspices of the Trilateral Commission,

primarily involved authors from the United States, Europe, and Japan. The broadly based recommendations ignored the centrality of the Cold War and as a whole indicted the "narrow, ethnocentric, and ideological course of American foreign policy since 1945. (26) The diverse set of policy recommendations, clearly globalist in nature, advocated an incremental approach to functional interdependence. The project ideas, while seemingly ahead of their time, set the agenda for the next couple of decades. The Carter administration attempted to implement some of the 1980s Project "world order politics" in 1977 and 1978, but fell victim to the reality of the Cold War. (27) The Council, in its own historical account, again highlights its ability to influence the implementation of its own world order ideas: "As it turned out, the title of the project was a little premature; not until the 1990s did the issues explored truly dominate the international agenda. But many 1980s Project authors were by then installed in

---28

government policy-making positions, and when the Cold War came to its unexpectedly sudden end the Council had provided for the public record an impressive database for the global issues confronting coming generations." (28)

Visionary Conclusion

By analyzing the above studies, the "vision of the UN founders" comes into a little better focus. The vision is clearly globalist. It advocates a shift in sovereignty from the state to the international level; increased authority, security, and judicial powers of an international body; a focus on "common" interests of humanity; collective vs. unilateral security actions; enhanced social and economic interdependence through functionalism; and some significant level of military disarmament of the nation states. This new world order vision provides the framework for interpreting a "credible United Nations" and its "peacekeeping role" in the upcoming chapter.

---30

Chapter 4

A Credible United Nations and its Peacekeeping Role

The founding of the United Nations embodied our deepest hopes for a peaceful world.

-George Bush

October 1, 1990

To be "credible," the United Nations is dependent upon the full development of its "peacekeeping role" as envisioned by its founders. As a second attempt to implement Wilsonian-like internationalism, the United Nations must achieve international credibility to shed the stigma of its aborted predecessor, the League of Nations. The interdependence between credibility and peacekeeping is most clearly articulated by former Secretary-General Boutros Boutros-Ghali: "Under Article 42 of the Charter, the Security Council has the authority to take military action to maintain or restore international peace and security. While such action should only be taken when all peaceful means have failed, the option of taking it is essential to the credibility of the United Nations as guarantor of international security." (emphasis added) (1) So, credibility of the UN as a guarantor of international security is contingent upon having both the authority and means to take military action. In understanding the UN's peacekeeping role, it is important to note the semantic difference between war and peacekeeping from the UN founders' perspective.

---31

Peacekeeping is a more contemporary word for what the UN founders envisioned as international police action. Payson Wild of the War and Peace Studies Armaments group distinguished between war and international policing (or peacekeeping in today's vernacular) by defining police action as force used "in behalf of the community" for "the maintenance of order and the establishment of the supremacy of law" versus war which is "conducted for a national authority" to achieve "the defeat of the enemy." Policing or peacekeeping implied that armed forces are "under community control and used only against those who break community laws." (2) The supremacy of law in this context relates to Bush's "rule of law" which will be covered in the next chapter.

Roosevelt himself used the police analogy in describing credible UN

peacekeeping:

"The Council of the United Nations must have the power to act quickly and decisively to keep the peace by force, if necessary." (3) In discounting the extreme leverage applied by Security Council members such as the United States, Roosevelt continued his analogy: "A policeman would not be a very effective policeman if, when he saw a felon break into a house, he had to go to the Town Hall and call a town meeting to issue a warrant before the felon could be arrested." (4) Again, it is clear that the UN must possess both the authority and means to be an effective and credible international "policeman."

The authority comes through reduction in the role of the Security Council veto. The "means" most generally advocated is that of a permanent UN peacekeeping force. Robert C. Johansen in the WOMP related work, *The Constitutional Foundations of World Peace* explains: "To give a substantial boost to its capacities for war prevention, the United Nations needs a permanent peacekeeping force of its own. A permanent force could be immediately available; it would be less subject to charges of bias than ad hoc personnel

---32

now drawn from the national armed forces of UN members; it could be more effectively trained, organized, and better commanded, equipped with specialized units, and judiciously employed to carry out the unusually delicate tasks of peacekeeping, which seldom resemble conventional military action.-The proposed UN force could help stimulate the transition to a warless world because it would remind nations of the difference between police enforcement and military action." (5) He then paints a very quaint picture of international police enforcement: "Armies try to achieve victory; police seek tranquility. Police try to enforce law on individuals, whereas armies impose their will on entire societies. Although UN peacekeepers sometimes carry arms, these soldiers have no enemies." (6) Boutros Boutros-Ghali, also a permanent force advocate, recommended that negotiations commence to create the "special agreements foreseen in Article 43 of the Charter, whereby Member States undertake to make armed forces, assistance and facilities available to the Security Council for the purposes stated in Article 42, not only on an ad hoc basis but on a permanent basis." (emphasis added) (7) He felt that the end of the Cold War removed the major political obstacles preventing earlier fulfillment of this Charter vision.

Burns H. Weston, another Constitutional Foundations of World Peace author, provides the most comprehensive strategy for achieving "credible" UN peacekeeping. He suggests: [1] guaranteeing military units trained for peacekeeping to the UN on a permanent standby basis; [2] stockpiling military equipment and supplies to support short notice peacekeeping operations; [3] avoiding the obstructions posed by the Security Council veto by instituting automatic peacekeeping actions based on predetermined levels

---33

of crisis or thresholds of conflict and automatic financing arrangements; [4] ensuring access to areas of conflict without requiring initial or continuing permission of the conflicting parties; and (5) tying UN peacekeeping to peacemaking to ensure focus on the desired end-state of long-term stability in the troubled area.

(8)

In summary, further clarification of George Bush's words identifies a new world order where a "credible United Nations" achieves authority by minimizing the role of Security Council veto and uses permanently assigned/allocated armed forces in a "peacekeeping role" to fulfill the international policeman "vision of the UN's founders."

---34

Chapter 5

Rule of Law

America and the world must support the rule of law. And we will.

-Former President George Bush

September 11, 1990 Address before Congress

Our ideal is a world community of States which are based on the rule of law and which subordinate their foreign policy activities to law.

-Mikhail Gorbachev

December 7, 1987 Address to the UN General Assembly

Critical to the interpretation of Bush's call for a new world order "where the rule of law . . . governs the conduct of nations," is the understanding of the context of "rule of law." It is interesting that while using the same "rule of law" phrase in their addresses, Bush failed to provide any clarification of meaning, yet Gorbachev explicitly highlighted that states "subordinate their foreign policy activities to law." (1)

Former Secretary of State James Baker provided some "rule of law" clarification on September 26, 1990 when he advised the House Foreign Affairs Committee that, "we must act so that international laws, not international outlaws, govern the post-Cold War period. We must act so that right, not might, dictates success in the post-Cold War world.-We must stand with the world so that the United Nations does not go the way of the League of Nations." (2)

---35

Henry Kissinger additionally pointed out that "conventional American thinking" supports the notion of "a new world order," emerging from a "set of legal arrangements." (3) It is important to note the linkage created between new world order, rule of law--international law, and the United Nations. Just how would these new world order "legal arrangements" of international law be implemented and what is the relationship to the United Nations?

James Baker once again provided some insight. Responding to House Foreign Affairs Committee questioning, Baker said that we, the United States, "are party to the United Nations? charter by virtue of a treaty, a treaty that basically says we will respect the decisions of that body." (4) Author Laura L. Kirmse, after researching the details of Baker's premise, has concluded that Bush's new world order refers to a move toward world authority under the auspices of a revitalized United Nations, and that UN treaties, once ratified by the Senate, may override and supersede the laws of the US, and even the Constitution itself. (5)

The Constitution of the United States directs the following in regard to treaties:

(Article II, Section 2) He (the President) shall have the power by and with the advice and consent of the Senate to make treaties, provided two thirds of the Senators present

concur-

(Article VI) This Constitution, and the laws of the United States which shall be made in pursuance thereof; and all treaties made, or which shall be made, under the authority of the United States, shall be the supreme law of the land; and the judges in every State shall be bound thereby, anything in the Constitution or laws of any State to the contrary notwithstanding. (6) (emphasis added)

In the Jeffersonian tradition, treaties were intended to affect state-to-state actions, not to have direct authority within a country over the laws, regulations, or the relationship between the government and its citizens. Several legal decisions and constitutional

---36

interpretations have demonstrated otherwise, though. Kirmse identifies several legal rulings which support the supremacy of the UN Charter. *Fuji v. the State of California* provides the most eye-opening position:

The Charter of the United Nations, as a treaty, is paramount to every law of every state in conflict with it. The Charter of the United Nations, upon ratification of the Senate, became supreme law of the land, within Constitutional provision relating to treaties, and every state is required to accept and act upon the Charter according to its plain language, and its unmistakable purpose and intent. United Nations Charter. 59 Stat.1035 et seq.; U.S. Const. art. 6. (*Fuji v. State of California*, 217P.2d. rehearing denied). (7)

John Foster Dulles understood this concept well as attested by these comments made in a 1952 speech [documented in the Congressional Record] of his prior to being appointed Secretary of State: "The treaty-making power is an extraordinary power liable to abuse. Treaties make international law and also they make domestic law. Under our Constitution, treaties become the supreme law of the land. They are indeed more supreme than ordinary laws, for congressional laws are invalid if they do not conform to the Constitution, whereas treaty laws can override the Constitution. Treaties, for example, can take powers away from the Congress and give them to the Federal

Government or to some international body and they can cut across the rights given the people by the Constitutional Bill of Rights." (8) Several wise Americans in the 1950s began to fear both the legal power of United Nations-related treaties to supersede the Constitution and the vague authority of the President through the "conduct of foreign affairs" to bind the United States legally by executive agreements requiring no Senate ratification. The deals at Yalta between President Roosevelt and Stalin, the Potsdam agreement between President Truman and

---37

Stalin, and according to then Secretary of State, John Foster Dulles, over 10,000 NATO agreements all fall within the context of "executive agreements." Many were never published. As a result, Senator John W. Bricker, supported by 63 other Senators, sponsored an amendment to close the perceived Constitutional loopholes. The Bricker Amendment would have added the following language to clarify the Constitution:

A provision of a treaty which conflicts with this Constitution shall not be of any force or effect.

A treaty shall become effective as internal law in the United States only through legislation which would be valid in the absence of treaty.

Congress shall have power to regulate all executive and other agreements with any foreign power or international organization. All such agreements shall be subject to the limitations imposed on treaties by this article. (9)

Although seemingly patriotic and simple, the amendment was killed by President Eisenhower. (10) Not to infer cause and effect, but only to note the curious-Dwight D. Eisenhower was a member of the Council on Foreign Relations. (11) The fears that United States citizens may be legally subject to trials of international courts were not suppressed. The House Foreign Affairs Committee discussion with Secretary of State Baker in September of 1990 reveals that this concern is not antiquated:

Sen. Moynihan : Does the President have a constitutional right to violate international treaties?

Secretary Baker: No.

Sen. Moynihan : A treaty is the supreme law of the land?

Secretary Baker: That's right. (12)

The evidence of constitutional logic, legal precedence, and executive and legislative intent seems to support Kirmse's conclusion that: "By the signing of the treaty to join the United Nations in 1942 and by the signing of the revised Charter in 1945-which are both

---38

multilateral treaties and constituent agreements-both the Constitution and the sovereignty of the United States were in effect relinquished under an established precedent in favor of rule by the United Nations, its Charter, and all subsequent treaties formulated and signed under UN auspices. Our laws in all jurisdictions must conform Constitutionally by treaty to those of the United Nations, much as our state laws had to conform to those of the Constitution." (13)

The international "rule of law" then has the potential to govern much more than the "conduct of nations." It also may govern the conduct of the individual. In the Council on Foreign Relations and American Assembly (founded in 1950 by Dwight D. Eisenhower) 1992 work, Rethinking American Security-Beyond Cold War to New World Order, John H. Barton and Barry E. Carter identify the most notable aspects of international law evolution over the last 50 years. They recognized that "the individual person has emerged as an independent actor" demonstrating that "the international system is no longer confined to relations among nations." And, "national and international tribunals are offering new-and more effective-means for enforcing international law." (14)

Former UN Secretary-General Boutros Boutros-Ghali provided insight into recent events related to international law and tribunals. In his 1992 Agenda for Peace, Boutros Boutros-Ghali, in an attempt to reinforce the role of the International Court of Justice, recommended that "all Member States should accept the general jurisdiction of the International Court under Article 36 of its Statute, without any reservation, before the end of the United Nations Decade of International Law in the year 2000." (15) Note the similarity to

Mendlovitz's WOMP decade of the 1990s goal of "submission to the compulsory jurisdiction of the International Court of Justice" identified in Chapter 3.

---39

The most revealing fulfillment of Barton and Carter's revelation was the October 1996 swearing-in ceremony of twenty-one Law of the Seas Tribunal's Judges by Boutros Boutros-Ghali. During his swearing-in statement, Boutros Boutros-Ghali said: "This is a situation without precedent in international law . . . With the establishment of this Tribunal we enter a new era. The Tribunal will be a modern institution upholding the rule of law not only between States, but also among States, the International Seabed Authority, companies and individuals engaged in the exploitation of the international seabed area."

(emphasis added) (16) Boutros Boutros-Ghali continues with words that seem to be extracted directly from Bush's new world order speech: "The Tribunal has an important role to play in the building of an international society governed by the rule of law. The Law of the Sea Tribunal will be part of the system for peaceful settlement of disputes as laid down by the founders of the United Nations." (emphasis added) (17) It seems like everyone in the business of new world order is singing from the same sheet of music. Nearly twenty years ago, Peter Jay, in his 1979 Foreign Affairs article, "Regionalism as Geopolitics," noted that: "The Carter Administration has done much in its UN role-to reestablish the American willingness to play by the rules of a system of international law-But the threads of a particular action have not been woven together into a generally understood-doctrine or strategy to capture the imagination and respect of a suspicious, cynical and unstable world. That will be a worthy task for a new year, a new decade and, perhaps, a new presidential term." (18) The breakdown of the Soviet Union and the end of the Cold War reduced the suspicion and cynicism by creating the perception of stability. The 1990s then provided George Bush the opportunity to fulfill Jay's new world order prophesy. The "rule of law" wheels of international justice are turning; the new world

---40

order train has left the station; and, the Americans on board have no knowledge of the destination.

Chapter 6

The Road to New World Order

Something of a world-wide order has been set up, by the general consent of mankind, and is in active work, of which it is impossible to say that any parallel existed before.

-F. S. Marvin

The New World-Order, 1932

World order as a set of concepts, objectives, and strategies is anything but "new." George Bush was not the father of new world order thinking, just an advocate that happened to be in the right position at the right time to flame the fires of the next significant thrust in the evolutionary development of world order. The Bush instigated post-Cold War new world order thrust can be interpreted as the third major attempt in this century to create a world ordered by a "credible" universal authority enforcing the international "rule of law" through collective security measures, police action or "peacekeeping." The "vision" of world order has remained fairly constant throughout this century; specific strategies for attainment, though, have varied widely. The climax of the three most significant world emotional events in this century, World War I, World War II, and the Cold War, have provided the catalyst for successive attempts at new world order. The first two attempts were manifested in the form of the League of Nations and the United Nations. The third attempt at achieving new world order is much more complex,

---42

amorphous, and difficult to distinguish. Discernment of the third attempt is the subject of this chapter.

Third Try at New World Order

The epigraph quote on the previous page by F. S. Marvin referred to the world order precedent set by the formation of the League of Nations. Marvin was careful to point out, though, that the League was an important symbol, but not the genesis or end-all of world order: "World co-operation, of which the League of Nations is the symbol and the chief organ, is the characteristic of the new age-" (1) He provides further clarification by describing the new world order goal and limited role of the League: "The League then, though the chief political fact since the War, should be regarded as a part only of a great movement and set of organizations all having as their purpose to implement this new consciousness of world-unity.-Nationality must rank below the claims of mankind as a whole, but in its immediate effects on individuals it is of greater moment." (2) So, we can see that 65 years ago, there was perceived to be a new world order movement towards world unity and decreased nationality/sovereignty. The League was an unparalleled symbol of the movement, but a symbol nonetheless. The League, as a mechanism of the world order movement, failed to fulfill expectations largely due to lack of support from isolationist Americans.

Recall from Chapter 2 the framework for the League of Nations was formulated by the "Inquiry"-the predecessor to the Council on Foreign Relations World War II War and Peace Studies. World War II conveniently provided an opportunity for the "founders of the UN" to propose a second attempt at world order which would presumably account

---43

for the flaws inherent in the League structure. In Michael Wala's words: "The Council members, like so many other internationalists, were convinced that the United States should not let this 'second chance' to participate in a supranational organization evaporate." (3) The establishment of the United Nations became the second attempt. Although more successful than its predecessor, the UN again failed to meet new world order expectations largely because of the Cold War friction between the United States and the Soviet Union.

International dynamics had to change for the world to accept a "credible" UN fulfilling the "vision" of its "founders." The trigger event was the fall of the Berlin Wall and corresponding end to the Cold War. The fact, though, is the third attempt, very dissimilar to

the first two, was well under way prior to that event. Evidence of this was provided by Harlan Cleveland, former Assistant Secretary of State, former Ambassador to NATO, and member of the Council on Foreign Relations, in his comments regarding a 1976 report he helped author, United Nations, released by the Senate Committee on Foreign Relations: "I hope that in the hearing and whatever report is released by the Committee, you will make a distinction between the future of the United Nations and the future of world order. There is a long agenda of creative effort just ahead, a complex agenda of international action-Taking it all together, this amounts to a third try at world order-the League of Nations having died and the United Nations being unable in its present condition to cope." (emphasis added) (4)

---44

New World Order Paths

The third attempt, more complicated than the others, involves traversing three interlinked paths that pave the road to world order. One path involves strengthening the powers of the United Nations and its associated institutions to enhance their world authority. The second path on the road to new world order is through evolutionary regionalism. The idea is to develop regional entities that bind states through super-state political, economic, and legal arrangements. The third path is built on the foundation of piecemeal functionalism whereby functional issues such as economics and trade, environmental conservation, and weapons of mass destruction proliferation drive international interdependence and further international law constraints. Much of "piecemeal functionalism" is directly related to UN subsidiaries. The following sections briefly describe the historical and recent support for the three paths on the road to world order.

United Nations Strengthening

The call for strengthening the United Nations from the world order advocates has been strong and consistent. Robert Ducci in his 1964 Foreign Affairs article, "The World Order in the Sixties," said that: "It is indeed difficult to see how the world order is to be kept . . . unless the United Nations undergoes a thorough overhaul.

Not inconceivably the two present superpowers may one day agree that the strengthening of the United Nations might be in the interest of both.-If that happens, the future organization of the world might not be very dissimilar in principle from the one which was drafted in Dumbarton Oaks 20 years ago by the victors of World War II." (5)

---45

A detailed plan for strengthening the UN was articulated by John Logue, Vice-President of World Federalist Association. On December 4, 1985, he gave the following testimony to the Human Rights and International Organization subcommittee of the House Foreign Affairs Committee joint hearing on the United Nations:

It is time to tell the world's people not what they want to hear, but what they ought to hear.-[W]e must reform, restructure and strengthen the United Nations and give it the power and authority and funds to keep the peace and promote justice. The Security Council veto must go. One-nation, one-vote must go. The United Nations must have taxing power or some other dependable source of revenue. It must have a large peacekeeping force. It must be able to supervise the dismantling and destruction of nuclear and other major weapons systems. In appropriate area, particularly in the area of peace and security, it must be able to make and enforce law on the individual. (6)

Over the last few years, almost all of those recommendations have been pursued by the United Nations and its supporters. As one example, Boutros Boutros-Ghali was aided by the Ford Foundation (tax-exempt foundation link to financing new world order strategies) in creating an advisory group of financial specialists and bankers to identify "dependable sources of revenue." Their recommendations included imposing a UN tax on international plane tickets. (7) Another example was the previously discussed establishment of the International Law of the Sea Tribunal providing the mechanism "to make and enforce law on the individual."

The continuous strengthening and legitimization of the UN sets the stage for Bush's observation that: "Not since 1945 have we seen the real possibility of using the United Nations as it was designed-" (8)

---46

Trilateral Regionalism

The strategy of building world order on the framework of regionalism has also been around for quite some time. In 1929, N. S. B. Gras in his Foreign Affairs article, "Regionalism and Nationalism," stated: "The direct effect of regionalism may be to make the state weaker politically but stronger economically and socially. Or the region, looking to regional convenience, may make new alignments leading to the creation of new states, or to international states (European, American, and so on), or ultimately to a world state." (9) Gras emphasized the importance of the region to a "super-state of some kind."

The "region, which because it is nearer to the individual, is likely to exercise a more potent influence over him." (10) A reasonably accurate fulfillment of this vision is found in the European Community which is well on its way to becoming a super-state containing its own political, economic, and judicial systems. A more radical concept in the evolutionary development of world order regionalism was presented in 1949 by Maurice Parmelee in *Geo-Economic Regionalism and World Federation*: "There can be no permanent peace so long as each nation retains its sovereignty. There can be no effective world organization to solve the economic and social problems of mankind so long as the nation is the unit of organization. The region, limiting national sovereignty and furnishing a suitable unit of organization for a world federation, is a practicable solution." (11) Parmelee further specifies that, "regionalism postulates interdependence-rather than self-sufficiency," and that, "geo-economic regionalism is by far the most constructive proposal for the future of the world." (12) In fact, geo-economic, interdependent regionalism is exactly the policy advocated and pursued over the last twenty-five years by the Trilateral Commission. The Trilateral

---47

Commission was founded in July 1973 by David Rockefeller, then Council on Foreign Relations Chairman of the Board. Its purpose was previewed by Zbigniew Brzezinski, former National Security Advisor, Council Director, and Trilateral Commission President, in his 1973 Foreign Affairs article when he stated that, "the active promotion of such trilateral [American-European-Japanese] cooperation must now become the central priority of U.S. policy." (13) Brzezinski and the

Trilateral Commission took their mission very seriously: "Creation of the Trilateral Commission reflects an awareness that the present moment is of very great importance for the future of mankind." (14) With the Cold War still at the forefront of international relations, the Trilateral Commission seemed somewhat omniscient when in the 1970s they observed that the, "bipolar leadership system of the cold war is diffusing into what may be the first truly global political system, with many actors playing significant parts at different levels." (15) The Trilateral Commission recognized that this third attempt at world order, building a "global political system" primarily through economic interdependence, would not come quickly:

The renovation of the international system will be a very prolonged process. The system created after World War II was created through an act of will and human initiative in a relatively restricted period of time.

One power had overwhelming might and influence, and others were closely associated with it. In contrast, a renovated international system will now require a process of creation--much longer and more complex--a process in which prolonged negotiations will have to be engaged and developed. In nurturing habits and practices of working together among the trilateral regions, the Commission should help set the context for these necessary efforts. (16)

The Commission's primary undertaking was to create a new international economic order through trilateral cooperation. Some of their early successes were highlighted by

---48

former Washington Post reporter, Jeremiah Novak: "According to sources in the State Department, the trilateral papers have directly influenced the summoning of the Rambouillet and Puerto Rican conferences, the sale of IMF gold, the Law of the Sea conferences, the formation of the International Energy Agency, and steps to establish a new international currency, which replaces the U.S. dollar and gold. The commission's record and its powerful influence after the 1976 elections deserve a great deal of respect." (17) Recall that trilateral regionalism represents only one world order path. In the words of William Hoar, "Trilateralism-is only a way station on the road to the New World Order." (18) Boutros Boutros-Ghali provided the contemporary linkage between regionalism and the

first path to world order, UN strengthening. In his "Agenda for Peace" speech, Boutros-Ghali said, "-regional arrangements or agencies can render great service if their activities are undertaken in a manner consistent with the Purposes and Principles of the Charter-" (19) His focus at that point was security arrangements, but the concept of regional linkage to UN authority applies universally. Not to lose sight of the objective of this analysis-interpreting George Bush's meaning of "new world order"-it is important to come full cycle to Bush's vision as articulated to the United Nations General Assembly: "I see a world building on the emerging new model of European unity-not just Europe but the whole world whole and free." (20)

Piecemeal Functionalism

The final, and most intriguing path supporting the third attempt at world order is referred to as piecemeal functionalism. Several Council on Foreign Relations related

---49

authors and studies have advocated world order strategies based on piecemeal functionalism. The Trilateral Commission recommends piecemeal functionalism as a means of achieving the interdependence between nations and regions as discussed in the previous section. The 1977 Trilateral Commission Task Force Report, *Towards a Renovated International System*, laid out a specific definition and strategy for piecemeal functionalism: "In general, the prospects for achieving effective international cooperation can often be improved if the issues can be kept separate-what we call piecemeal functionalism.- Coalitions of specialists can be built across national boundaries in specific functional areas, blunting the nationalism that might otherwise hinder international agreement.-The same countries which will often indulge in fanciful rhetoric in a broad, multipurpose organization (such as various UN agencies) will often be negotiating seriously and cooperatively in another organization (such as GATT) on the same issue at the very same time." (emphasis added) (21)

Richard N. Gardner, former Carter advisor, Ambassador to Italy, Council member, and Columbia University law professor, presented the most revealing look at an integrated new world order strategy in his 1974 *Foreign Affairs* article, "The Hard Road to World Order" He answered the call for an innovative third attempt at world order by

advocating a decentralized functional-"piecemeal functionalism"-approach anchored by the "rule of law" and integrated with the United Nations:

In this unhappy state of affairs, few people retain much confidence in the more ambitious strategies for world order that had wide backing a generation ago . . . If instant world government, Charter review, and a greatly strengthened International Court do not provide the answers, what hope for progress is there? The answer will not satisfy those who seek simple solutions to complex problems, but it comes down essentially to this: The hope for the foreseeable future lies, not in building up a few

---50

ambitious central institutions of universal membership and general jurisdiction as was envisaged at the end of the last war, but rather in the much more decentralized, disorderly and pragmatic process of inventing or adapting institutions of limited jurisdiction and selected membership to deal with specific problems on a case-by-case basis, as the necessity for cooperation is perceived by relevant nations. Such institutions of limited jurisdiction will have a better chance of doing what must be done to make a "rule of law" possible among nations . . . In short, the "house of world order" will have to be built from the bottom up rather than from the top down. It will look like a great "booming, buzzing confusion,"-but an end run around national sovereignty, eroding it piece by piece, will accomplish much more than an old-fashioned frontal assault. Of course, for political, as well as administrative reasons, some of these specialized arrangements should be brought into an appropriate relationship with the central institutions of the UN system-. (22)

Gardner's specific functional institution-building issues were: the international monetary system, international trade, environment, population explosion, food shortages, the world's oceans, weapons proliferation, and peacekeeping. (23) All of those issues have indeed been catalysts for international action over the last twenty-three years. It's apparent that the international growth of interdependence at the functional level that we have experienced over the last quarter of a century may not have been the result of random "booming, buzzing confusion," but in fact a more calculated strategy of world order. Twenty-three years seems to be beyond the planning range of

most, but not Gardner and certainly not the Council. Gardner realistically explained that: "Some may object that a generation of arduous and possibly futile negotiations on specific functional problems is not a very inspiring prospect.-The road to world order will still be a long and hard one, but since the short cuts do not lead anywhere we have no choice but to take it." (24)

---53

Chapter 7

New World Order Implications

The intent of this paper was to derive some conclusions about the strategic environment and prospects for the new millennium based on the interpretation of George Bush's new world order-where the "rule of law governs the conduct of nations," and a "credible United Nations can use its peacekeeping role to fulfill the promise and vision of the UN's founders." (1) This author's perspective of Bush's new world order will be briefly recapped . First, the Council on Foreign Relations and other closely linked organizations have significantly shaped the new world order vision and strategy for achievement of that vision. Second, those organizations have demonstrated a significant influence on the foreign policy process of the United States. Third, the new world order vision consists of a transition of sovereignty from the state to the international level; increased authority, security, and judicial powers of the United Nations; a shift in focus from national to "common" interests; collective vs. unilateral security actions; enhanced social and economic interdependence through functionalism; and some level of military disarmament of the nation states. Fourth, United Nations credibility is essential to the fulfillment of the new world order vision and contingent upon achievement of its envisioned peacekeeping/ international police role of applying collective force against violators of the "rule of law." And, fifth, the third attempt at new world order consists of a complex

---54

strategy involving the strengthening of the UN, enhancing regionalism, and increasing interdependence through piecemeal

functionalism.

The implications of new world orderism, taken independently, do not appear to be surprising revelations. Taken as a whole and taken within the context of the new world order vision laid out over the past chapters, these implications may raise some concern.

Multilevel Interdependence

The first conclusion drawn from this analysis involves the structure of the international system. One of the current hot topics of political discussion is projecting the nature of the post-Cold War international system. The simple bipolar structure no longer exists. Many scholars present variations of what Daniel S. Papp calls the three primary possibilities-"a unipolar world based on American military might, a regionalized world organized around three economic trading blocs, and a multipolar world based on several measures of national and international capabilities." (2)

The truth, though, is that the complexity of the strategy for world order drives an international structure that does not lend itself to simple models. Joseph Nye, a Trilateral Commission author, provides the most descriptive world analogy in his model termed "multilevel interdependence." In a 1992 Foreign Affairs article, he said: "The distribution of power in world politics has become like a layer cake. The top military layer is largely unipolar, for there is no other military power comparable to the United States. The economic middle layer is tripolar and has been for two decades. The bottom layer of transnational interdependence shows a diffusion of power." (3) Note the reflection of trilateral regionalism and piecemeal functionalism in this model. He adds that: "Power is becoming more multidimensional,

---55

structures more complex and states themselves more permeable." (4) State permeability implies the leakage or transfer of national authority and sovereignty to some other medium. One willing and active recipient is the United Nations.

United Nations

Sovereignty

Boutros Boutros-Ghali in his 1992 Agenda for Peace first emphasized that respect for the state's "fundamental sovereignty and integrity are crucial to any common international progress." Then he refined his statement by declaring that, "The time of absolute and exclusive sovereignty, however, has passed; its theory was never matched by reality. It is the task of States today to understand this-" (5) The attack on national sovereignty is real, but subtle. The League of Nations failed in part because of its overt grab at national sovereignty. The UN proponents are careful not to repeat that mistake. Joseph Nye predicts that "multinational infringement of sovereignty will gradually increase without suddenly disrupting the distribution of power." (6)

Foreign Affairs published an article in 1996 by conservative Senator Jesse Helms which, not surprisingly, was critical of the United Nations' attempt to dissolve national sovereignty. Senator Helms, who was severely blasted in the letters to the editor of the following Foreign Affairs issue, said that, "the United Nations is being transformed from an institution of sovereign nations into a quasi-sovereign entity in itself. That transformation represents an obvious threat to U.S. national interests." He continues by noting that, "the United Nations has moved from facilitating diplomacy among nation-states to supplanting them altogether. The international elites running the United Nations

---56

look at the idea of the nation-state with disdain; they consider it a discredited notion of the past that has been superseded by the idea of the United Nations. In their view, the interests of nation-states are parochial and should give way to global interests. Nation-states, they believe, should recognize the primacy of these global interests and accede to the United Nations' sovereignty to pursue them." (7) The subtle complexity by which the United Nations is likely to enhance their sovereignty at the expense of the sovereignty of the states is best described by a model presented by Farida Aziz in his work, *New World Order, the 21st Century*. He astutely concludes that, "the world is now witnessing, in fact, an attempt-to establish a ?condominium model? of a world order, in lieu of a world government, in which the state sovereignty would be modified from the ?freehold?

title to the "leasehold" title, and in which the terms of the lease will conform to the "rules" of the condominium. Those "rules" will be established and enforced by a Board of Directors.-The Board meetings will take place in the UN Security Council." (8) This analogy nicely integrates the "rule of law" concept and resolves the dichotomy of Boutros Boutros-Ghali's statement apparently supportive of fundamental state sovereignty yet against exclusive state sovereignty. State sovereignty will be relegated to "leasehold" activities under the "rule of law governing the conduct of nations." The landlord becomes the United Nations and the lease enforcement mechanism is international "peacekeeping."

Peacekeeping

With the decline of state sovereignty will come the increase in types and frequency of United Nations peacekeeping actions. Recall that to be "credible," the UN must develop the capability to enforce international order. Under the vision of its founders, this

---57

collective security mechanism was to be a UN military force under Security Council control. When those key elements did not materialize, the UN pursued a role not originally foreseen-- "peacekeeping." Now that the United Nations is within sight of fulfilling the vision of its founders, the "peacekeeping" concept must be expanded to encompass world order enforcement. "Peacekeeping" is a convenient phrase to spin-off of because of its non-threatening nature. Therefore, "peacekeeping" operations will comprise a broader spectrum of military and non-military actions. Senator Helms has already concluded that, "peacekeeping has evolved into a term without meaning. It is used to justify all sorts of UN activities-" (9) Bruce Russett, former Director of the Executive Office of the UN Secretary General, and James S. Sutterlin present a comprehensive discussion of the UN collective security and peacekeeping roles in their 1991 Foreign Affairs article, "The UN in a New World Order." They also note the flexible application of the term peacekeeping: "Since the Suez crisis of 1956, the United Nations has developed a notable elasticity in using peacekeeping forces, to the point that it is now difficult to formulate a precise definition--or the limits- of-peacekeeping.-This flexibility greatly enhances the value of

peacekeeping forces as an instrument available to the Security Council in dealing with potential or existing conflicts." (10) Their most revealing observation is that, "nothing in the charter prohibits the Security Council from deploying peacekeeping forces without consent of all parties, or from including troop contingents from the permanent members of the council in such forces where the need for deterrence arises." (11) So the concept of Security Council decision making autonomy is introduced. That autonomy is an integral aspect of UN "credibility."

---58

Many internationalists now advocate full execution of Article 43 of the UN Charter whereby member nations make units of their armed forces available for UN enforcement actions in accordance with special agreements between themselves and the Security Council. Boutros Boutros-Ghali reinforced the concept when he declared: "Stand-by arrangements should be confirmed-between the Secretariat and Member States concerning the kind and number of skilled personnel they will be prepared to offer the United Nations as the needs of new operations arise." (12) Richard Gardner more specifically addresses the possibility of Security Council autonomy in his explanation of the benefits of full implementation of Article 43: "It would constitute a true UN military force, with a UN commander responsible to direction by the Security Council with the advice of the Military Staff Committee.-In addition, under the UN Participation Act, once an Article 43 agreement between the United States and the Security Council is concluded and approved by the Senate, U.S. forces designated under the agreement can be sent into hostilities without further action by Congress." (13)

The Senate is probably not ready to sign up to that level of United States commitment to the UN in the near future, but a move in that direction is possible. The shift will likely come in the form of apportioned rapid deployment forces fully trained in and available for UN operations. This concept is widely advocated by likes of Boutros Boutros-Ghali, Richard Gardner, Joseph Nye, and many others. Boutros Boutros-Ghali envisions the capability for a 24-hour call-up contingency force sourced from any of a number of nations. (14) Gardner and Nye intuitively highlight the necessity of common training and multinational exercises to develop an effective UN command and control structure and operational procedures. (15) The

United States is likely to move in this direction-enhancing

---59

UN peacekeeping related doctrine, training, and exercises, while for the meantime, maintaining control over commitment of forces.

Common vs. National Interests

The commitment of forces to UN peacekeeping missions will most likely continue to increase, though. The principle driver will be the shift of emphasis of the American leadership from the protection of vital national interests as commitment criteria to the protection of "common" world interests. This is a reflection of the interdependence created by years of piecemeal functionalism. The Washington Times presented an interesting perspective on the relationship between the UN, new world order, and U.S. interests in an April 18, 1986 article: "A report by the General Accounting Office analyzed 90 UN media programs between 1983 and 1985 on apartheid, disarmament, ?new world order? and Palestine. Only one supported U.S. interests." (emphasis added) (16) Will the United States send American soldiers across the globe to support UN actions that may not directly support United States interests? We have and we will. George Bush clearly articulated his position on this issue in his "Toward a New World Order" speech to Congress. He emphatically stated: "America and the world must defend common vital interests. And we will." (emphasis added) (17) We have already seen a dilution of the meaning and application of "national vital interests." The concept of "common vital interests" is even more fluid, and can be used to justify United States involvement in almost any contingency. Consequently, as the UN grows in strength, we will likely experience increased United States military operations tempo supporting more ambiguous missions. At the same time, military force structure will continue to decline due to budget and new world order pressures.

---60

Again, nothing is particularly new about the "new world order." The issues of armed force, sovereignty, and national interests have been the focus of world order discussions and recommendations for decades. The "founders of the UN," though, just seem to have a particularly peculiar vision that has survived through years of evolution of the

international system. Former Council on Foreign Relations member and influential Kennedy administration State Department Official, Walt Whitman Rostow in his 1960 work, *The United States in the World Arena*, said: "It is a legitimate American national objective to see removed from all nations-including the United States-the right to use substantial military force to pursue their own interests. Since this residual right is the root of national sovereignty, and the basis for existence of an international arena of power, it is, therefore, an American interest to see an end to nationhood as it has been historically defined." (18) An odd interpretation of national interests, indeed!

Summary

The road to new world order at the international level is somewhat comparable to the path this country has taken over the past two hundred years at the national level. Our founding fathers perceived the states to be the sovereign foundation of the United States of America, with the central government only exercising control over those areas allowed by the states. But, as time passed and the central government grew in power and size, the states lost more and more of their sovereignty. Each successive gain of authority at the central level was justified on the basis of altruistic motives. But, one day the country wakes up to discover that the altruistic piecemeal expansion has resulted in a bloated

---61

bureaucracy that consumed countless valuable resources, limited state freedoms, and created a debt structure that no generation is likely to recover from.

What is to say that the same will not happen at the international level? The nation states are espoused by the likes of Boutros Boutros-Ghali as the sovereign foundation of the new world order just as our country's states were the sovereign foundation of America. But as with our federal government, achievement of the new world order is contingent upon shifting that sovereignty from the state to central level. Again, the justification is righteous-peace and prosperity for all mankind. What will be the end result, though? Bloated bureaucracy, limited freedoms, and international debt? Many internationalists argue that the only way to end wars is through the creation of a new world order based on world authority and collective

security. The trouble that comes with that new world order will be overshadowed by the benefit of peace and prosperity. The problem is that all governmental entities are run by people. And not all people have the purest of motives. International "peacekeeping" may not always be used in an altruistic manner. Hundreds of years ago, the Old Testament prophet, Daniel, prophesied that in the end times "a king of fierce countenance-shall stand up-and by peace shall destroy many." (19) Current momentum favors implementation of the internationalist world order model as advocated by George Bush. Success, though, will be dependent upon the dynamics of world politics. There are too many factors and unknowns in the world to declare new world order victory, but continued progress in that direction seems inevitable.

---63

Chapter 8

Final Thoughts

In this author's assessment, the Gulf War was a cornerstone event in the fulfillment of the internationalist vision of world order. The UN sanctioned collective multinational military retribution against an aggressor nation that violated the territorial integrity of a nation state validated the concept of world order and provided the catalyst for the culminating third attempt at "new world order." The key is not to view the Gulf War as a specific model for future UN actions, but as a trigger event that jumped the evolution of the international system from its derailed Cold War state back on the tracks or road to new world order. Bush recognized the significance of this event as evidenced by his statement to the UN General Assembly: "And when the Soviet Union agreed with so many of us here in the United Nations to condemn the aggression of Iraq, there could be no doubt-that we had, indeed, put decades of history behind us." (1)

There has been a lot of conjecture over the reason for terminating the Gulf War ground offensive at 100 hours. One candidate explanation has to be that at the 100-hour point all UN objectives had been met. The United States had not achieved its own objective of destroying the Republican Guard, but as a collective security force, the coalition had fulfilled all the requirements of the UN resolution. That established the precedent for a "credible United Nations" to use its "peacekeeping role" against

---64

international aggressors under the "rule of law." The cornerstone had been laid for the final fulfillment of the "promise and vision of the UN's founders."

Charter of the United Nations

WE THE PEOPLES OF THE UNITED NATIONS DETERMINED

to save succeeding generations from the scourge of war, which twice in our lifetime has brought untold sorrow to mankind, and

to reaffirm faith in fundamental human rights, in the dignity and worth of the human person, in the equal rights of men and women and of nations large and small, and

to establish conditions under which justice and respect for the obligations arising from treaties and other sources of international law can be maintained, and

to promote social progress and better standards of life in larger freedom,

AND FOR THESE ENDS

to practice tolerance and live together in peace with one another as good neighbours, and

to unite our strength to maintain international peace and security, and

to ensure, by the acceptance of principles and the institution of methods, that armed force shall not be used, save in the common interest, and

to employ international machinery for the promotion of the economic and social advancement of all peoples,

HAVE RESOLED TO COMBINE OUR EFFORTS TO ACCOMPLISH THESE AIMS

Accordingly, our respective Governments, through representatives assembled in the city of San Francisco, who have exhibited their full powers found to be in good and due form, have agreed to the present Charter of the United Nations and do hereby establish an international organization to be known as the United Nations.

[Table of Contents](#)

CHAPTER I

PURPOSES AND PRINCIPLES

Article 1

The Purposes of the United Nations are: 1. To maintain international peace and security, and to that end: to take effective collective measures for the prevention and removal of threats to the peace, and for the suppression of acts of aggression or other breaches of the peace, and to bring about by peaceful means, and in conformity with the principles of justice and international law, adjustment or settlement of international disputes or situations which might lead to a breach of the peace;

2. To develop friendly relations among nations based on respect for the principle of equal rights and self-determination of peoples, and to take other appropriate measures to strengthen universal peace;

3. To achieve international co-operation in solving international problems of an economic, social, cultural, or humanitarian character, and in promoting and encouraging respect for human rights and for fundamental freedoms for all without distinction as to race, sex, language, or religion; and

4. To be a centre for harmonizing the actions of nations in the attainment of these common ends.

Article 2

The Organization and its Members, in pursuit of the Purposes stated in Article 1, shall act in accordance with the following Principles.

1. The Organization is based on the principle of the sovereign equality of all its Members.
2. All Members, in order to ensure to a of them the rights and benefits resulting from membership, shall fulfil in good faith the obligations assumed by them in accordance with the present Charter.
3. All Members shall settle their international disputes by peaceful means in such a manner that international peace and security, and. justice, are not endangered.
4. All Members shall refrain in their international relations from the threat or use of force against the territorial integrity or political independence of any state, or in any other manner inconsistent with the Purposes of the United Nations.
5. All Members shall give the United Nations every assistance in any action it takes in accordance with the present Charter, and shall refrain from giving assistance to any state against which the United Nations is taking preventive or enforcement action.
6. The Organization shall ensure that states which are not Members of the United Nations act in accordance with these Principles so far as may be necessary for the maintenance of international peace and security.
7. Nothing contained in the present Charter shall authorize the United Nations to intervene in matters which are essentially within the domestic jurisdiction of any state or shall require the Members to submit such matters to settlement under the present Charter; but this principle shall not prejudice the application of enforcement measures under Chapter VII.

[Table of Contents](#)

CHAPTER II

MEMBERSHIP

Article 3

The original Members of the United Nations shall be the states which, having participated in the United Nations Conference on International Organization at San Francisco, or having previously signed the Declaration by United Nations of 1 January 1942, sign the present Charter and ratify it in accordance

with Article 110.

Article 4

1. Membership in the United Nations is open to a other peace-loving states which accept the obligations contained in the present Charter and, in the judgment of the Organization, are able and willing to carry out these obligations.

2. The admission of any such state to membership in the Nations will be effected by a decision of the General Assembly upon the recommendation of the Security Council.

Article 5

A Member of the United Nations against which preventive or enforcement action has been taken by the Security Council may be suspended from the exercise of the rights and privileges of membership by the General Assembly upon the recommendation of the Security Council. The exercise of these rights and privileges may be restored by the Security Council.

Article 6

A Member of the United Nations which has persistently violated the Principles contained in the present Charter may be' expelled from the Organization by the General Assembly upon the recommendation of the Security Council.

[Table of Contents](#)

CHAPTER III

ORGANS

Article 7

1. There are established as the principal organs of the United Nations: a General Assembly, a Security Council, an Economic and Social Council, a Trusteeship Council, an International Court of Justice, and a Secretariat.

2. Such subsidiary organs as may be found necessary may be established in accordance with the present Charter.

Article 8

The United Nations shall place no restrictions on the eligibility of men and women to participate in any capacity and under conditions of equality in its principal and subsidiary organs.

[Table of Contents](#)

CHAPTER IV

THE GENERAL ASSEMBLY

Composition

Article 9

1. The General Assembly shall consist of all the Members of the United Nations. 2. Each Member shall have not more than five representatives in the General Assembly.

Functions and Powers

Article 10

The General Assembly may discuss any questions or any matters within the scope of the present Charter or relating to the powers and functions of any organs provided for in the present Charter, and, except as provided in Article 12, may make recommendations to the Members of the United Nations or to the Security Council or to both on any such questions or matters.

Article 11

1. The General Assembly may consider the general principles of co-operation in the maintenance of international peace and security, including the principles governing disarmament and the regulation of armaments, and may make recommendations with regard to such principles to the Members or to the Security Council or to both.

2. The General Assembly may discuss any questions relating to the maintenance of international peace and security brought before it by any Member of the United Nations, or by the Security Council, or by a state which is not a Member of the United Nations in accordance with Article 35, paragraph 2, and, except as provided in Article 12, may make recommendations with regard to any such questions to the state or states concerned or to the Security Council or to both. Any such question on which action is necessary shall be referred to the Security Council by the General Assembly either before or after discussion.

3. The General Assembly may call the attention of the Security Council to situations which are likely to endanger international peace and security.

4. The powers of the General Assembly set forth in this Article shall not limit the general scope of Article 10.

Article 12

1. While the Security Council is exercising in respect of any dispute or situation the functions assigned to it in the present Charter, the General Assembly shall not make any recommendation with regard to that dispute or situation unless the Security Council so requests.

2. The Secretary-General, with the consent of the Security Council, shall notify the General Assembly at each session of any matters relative to the maintenance of international peace and security which are being dealt with by the Security Council and similarly notify the General Assembly, or the Members of the United Nations if the General Assembly is not in session, immediately the Security Council ceases to deal with such matters.

Article 13

1. The General Assembly shall initiate studies and make recommendations for the purpose of:

a. promoting international co-operation in the political field and encouraging the progressive development of international law and its codification;

b. promoting international co-operation in the economic, social, cultural, educational, and health fields, and assisting in the realization of human rights and fundamental freedoms for all without distinction as to race, sex, language, or religion.

2. The further responsibilities, functions and powers of the General Assembly with respect to matters mentioned in paragraph 1) above are set forth in Chapters IX and X.

Article 14

Subject to the provisions of Article 12, the General Assembly may recommend measures for the peaceful adjustment of any situation, regardless of origin, which it deems likely to impair the general welfare or friendly relations among nations, including situations resulting from a violation of the provisions of the present Charter setting forth the Purposes and Principles of the United Nations.

Article 15

1. The General Assembly shall receive and consider annual and special reports from the Security Council; these reports shall include an account of the measures that the Security Council has decided upon or taken to maintain international peace and security.
2. The General Assembly shall receive and consider reports from the other organs of the United Nations.

Article 16

The General Assembly shall perform such functions with respect to the international trusteeship system as are assigned to it under Chapters XII and XIII, including the approval of the trusteeship agreements for areas not designated as strategic.

Article 17

1. The General Assembly shall consider and approve the budget of the Organization.
2. The expenses of the Organization shall be borne by the Members as apportioned by the General Assembly.
3. The Assembly shall consider and approve any financial and budgetary arrangements with specialized agencies referred to in Article 57 and shall examine the administrative budgets of such specialized agencies with a view to making recommendations to the agencies concerned.

Voting

Article 18

1. Each member of the General Assembly shall have one vote.
2. Decisions of the General Assembly on important questions shall be made by a two-thirds majority of the members present and voting. These questions shall include: recommendations with respect to the maintenance of international peace and security, the election of the non-permanent members of the Security Council, the election of the members of the Economic and Social Council, the election of members of the Trusteeship Council in accordance with paragraph 1 of Article 86, the admission of new Members to the United Nations, the suspension of the rights and privileges of membership, the expulsion of Members, questions relating to the operation of the trusteeship system, and budgetary questions.
3. Decisions on other questions, including the determination of additional categories of questions to be decided by a two-thirds majority, shall be made by a majority of the members present and voting.

Article 19

A Member of the United Nations which is in arrears in the payment of its financial contributions to the Organization shall have no vote in the General Assembly if the amount of its arrears equals or exceeds the amount of the contributions due from it for the preceding two full years. The General Assembly may, nevertheless, permit such a Member to vote if it is satisfied that the failure to pay is due to conditions beyond the of the Member.

Procedure

Article 20

The General Assembly shall meet in regular annual sessions and in such special sessions as occasion may require. Special sessions shall be convoked by the Secretary-General at the request of the Security Council or of a majority of the Members of the United Nations.

Article 21

The General Assembly shall adopt its own rules of procedure. It shall elect its President for each session.

Article 22

The General Assembly may establish such subsidiary organs as it deems necessary for the performance of its functions.

[Table of Contents](#)

CHAPTER V

THE SECURITY COUNCIL

Composition

Article 23

1. The Security Council shall consist of fifteen Members of the United Nations. The Republic of China, France, the Union of Soviet Socialist , the United Kingdom of Great Britain and Northern Ireland, and the United States of America shall be permanent members of the Security Council. The General Assembly shall elect ten other Members of the United Nations to be non-permanent members of the Security Council, due regard being specially paid, in the first in- stance to the contribution of Members

of the United Nations to the maintenance of international peace and security and to the other purposes of the Organization, and also to equitable geographical distribution.

2. The non-permanent members of the Security Council shall be elected for a term of two years. In the first election of the non-permanent members after the increase of the membership of the Security Council from eleven to fifteen, two of the four additional members shall be chosen for a term of one year. A retiring member shall not be eligible for immediate re-election.

3. Each member of the Security Council shall have one representative.

Functions and Powers

Article 24

1. In order to ensure prompt and effective action by the United Nations, its Members confer on the Security Council primary responsibility for the maintenance of international peace and security, and agree that in carrying out its duties under this responsibility the Security Council acts on their behalf.

2. In discharging these duties the Security Council shall act in accordance with the Purposes and Principles of the United Nations. The specific powers granted to the Security Council for the discharge of these duties are laid down in Chapters VI, VII, VIII, and XII.

3. The Security Council shall submit annual and, when necessary, special reports to the General Assembly for its consideration.

Article 25

The Members of the United Nations agree to accept and carry out the decisions of the Security Council in accordance with the present Charter.

Article 26

In order to promote the establishment and maintenance of international peace and security with the least diversion for armaments of the world's human and economic resources, the Security Council shall be responsible for formulating, with the assistance of the Military Staff Committee referred to in Article 47, plans to be submitted to the Members of the United Nations for the establishment of a system for the regulation of armaments.

Voting

Article 27

1. Each member of the Security Council shall have one vote.
2. Decisions of the Security Council on procedural matters shall be made by an affirmative vote of nine members.
3. Decisions of the Security Council on all other matters shall be made by an affirmative vote of nine members including the concurring votes of the permanent members; provided that, in decisions under Chapter VI, and under paragraph 3 of Article 52, a party to a dispute shall abstain from voting.

Procedure

Article 28

1. The Security Council shall be so organized as to be able to function continuously. Each member of the Security Council shall for this purpose be represented at times at the seat of the Organization.
2. The Security Council shall hold meetings at which each of its members may, if it so desires, be represented by a member of the government or by some other specially designated representative.
3. The Security Council may hold meetings at such places other than the seat of the Organization as in its judgment will best facilitate its work.

Article 29

The Security Council may establish such subsidiary organs as it deems necessary for the performance of its functions.

Article 30

The Security Council shall adopt its own rules of procedure, including the method of selecting its President.

Article 31

Any Member of the United Nations which is not a member of the Security Council may participate, without vote, in the discussion of any question brought before the Security Council whenever the latter considers that the interests of that Member are specially affected.

Article 32

Any Member of the United Nations which is not a member of the Security Council or any state which is

not a Member of the United Nations, if it is a party to a dispute under consideration by the Security Council, shall be invited to participate, without vote, in the discussion relating to the dispute. The Security Council shall lay down such conditions as it deems just for the participation of a state which is not a Member of the United Nations.

[Table of Contents](#)

CHAPTER VI

PACIFIC SETTLEMENT OF DISPUTES

Article 33

1. The parties to any dispute, the continuance of which is likely to endanger the maintenance of international peace and security, shall, first of all, seek a solution by negotiation, enquiry, mediation, conciliation, arbitration, judicial settlement, resort to regional agencies or arrangements, or other peaceful means of their own choice.
2. The Security Council shall, when it deems necessary, call upon the parties to settle their dispute by such means.

Article 34

The Security Council may investigate any dispute, or any situation which might lead to international friction or give rise to a dispute, in order to determine whether the continuance of the dispute or situation is likely to endanger the maintenance of international peace and security.

Article 35

1. Any Member of the United Nations may bring any dispute, or any situation of the nature referred to in Article 34, to the attention of the Security Council or of the General Assembly.
2. A state which is not a Member of the United Nations may bring to the attention of the Security Council or of the General Assembly any dispute to which it is a party if it accepts in advance, for the purposes of the dispute, the obligations of pacific settlement provided in the present Charter.
3. The proceedings of the General Assembly in respect of matters brought to its attention under this Article will be subject to the provisions of Articles 11 and 12.

Article 36

1. The Security Council may, at any stage of a dispute of the nature referred to in Article 33 or of a situation of like nature, recommend appropriate procedures or methods of adjustment.
2. The Security Council should take into consideration any procedures for the settlement of the dispute which have already been adopted by the parties.
3. In making recommendations under this Article the Security Council should also take into consideration that legal disputes should as a general rule be referred by the parties to the International Court of Justice in accordance with the provisions of the Statute of the Court.

Article 37

1. Should the parties to a dispute of the nature referred to in Article 33 fail to settle it by the means indicated in that Article, they shall refer it to the Security Council.
2. If the Security Council deems that the continuance of the dispute is in fact likely to endanger the maintenance of international peace and security, it shall decide whether to take action under Article 36 or to recommend such terms of settlement as it may consider appropriate.

Article 38

Without prejudice to the provisions of Articles 33 to 37, the Security Council may, if all the parties to any dispute so request, make recommendations to the parties with a view to a pacific settlement of the dispute.

[Table of Contents](#)

CHAPTER VII

ACTION WITH RESPECT TO THREATS TO THE PEACE, BREACHES OF THE PEACE, AND ACTS OF AGGRESSION

Article 39

The Security Council shall determine the existence of any threat to the peace, breach of the peace, or act of aggression and shall make recommendations, or decide what measures shall be taken in accordance with Articles 4 and 42, to maintain or restore international peace and security.

Article 40

In order to prevent an aggravation of the situation, the Security Council may, before making the recommendations or deciding upon the measures provided for in Article 39, call upon the parties concerned to comply with such provisional measures as it deems necessary or desirable. Such provisional measures shall be without prejudice to the rights, claims, or position of the parties concerned. The Security Council shall duly take account of failure to comply with such provisional measures.

Article 41

The Security Council may decide what measures not involving the use of armed force are to be employed to give effect to its decisions, and it may call upon the Members of the United Nations to apply such measures. These may include complete or partial interruption of economic relations and of rail, sea, air, postal, telegraphic, radio, and other means of communication, and the severance of diplomatic relations.

Article 42

Should the Security Council consider that measures provided for in Article 41 would be inadequate or have proved to be inadequate, it may take such action by air, sea, or land forces as may be necessary to maintain or restore international peace and security. Such action may include demonstrations, blockade, and other operations by air, sea, or land forces of Members of the United Nations.

Article 43

1. All Members of the United Nations, in order to contribute to the maintenance of international peace and security, undertake to make available to the Security Council, on its and in accordance with a special agreement or agreements, armed forces, assistance, and facilities, including rights of passage, necessary for the purpose of maintaining international peace and security.
2. Such agreement or agreements shall govern the numbers and types of forces, their degree of readiness and general location, and the nature of the facilities and assistance to be provided.
3. The agreement or agreements shall be negotiated as soon as possible on the initiative of the Security Council. They shall be concluded between the Security Council and Members or between the Security Council and groups of Members and shall be subject to ratification by the signatory states in accordance with their respective constitutional processes.

Article 44

When Security Council has decided to use force it shall, before calling upon a Member not represented on it to provide armed forces in fulfilment of the obligations assumed under Article 43, invite that Member, if the Member so desires, to participate in the decisions of the Security Council concerning the

employment of contingents of that Member's armed forces.

Article 45

In order to enable the Nations to take urgent military measures, Members shall hold immediately available national air-force contingents for combined international enforcement action. The strength and degree of readiness of these contingents and plans for their combined action shall be determined, within the limits laid down in the special agreement or agreements referred to in Article 43, by the Security Council with the assistance of the Military Committee.

Article 46

Plans for the application of armed force shall be made by the Security Council with the assistance of the Military Staff Committee.

Article 47

1. There shall be established a Military Staff Committee to advise and assist the Security Council on questions relating to the Security Council's military requirements for the maintenance of international peace and security, the employment and command of forces placed at its disposal, the regulation of armaments, and possible disarmament.
2. The Military Staff Committee consist of the Chiefs of Staff of the permanent members of the Security Council or their representatives. Any Member of the United Nations not permanently represented on the Committee shall be invited by the Committee to be associated with it when the efficient discharge of the Committee's responsibilities requires the participation of that Member its work.
3. The Military Staff Committee be responsible under the Security Council for the strategic direction of any armed forces paced at the disposal of the Security Council. Questions relating to the command of such forces shall be worked out subsequently.
4. The Military Staff Committee, with the authorization of the security Council and after consultation with appropriate regional agencies, may establish sub-committees.

Article 48

1. The action required to carry out the decisions of the Security Council for the maintenance of international peace and security shall be taken by all the Members of the United Nations or by some of them, as the Security Council may determine.
2. Such decisions shall be carried out by the Members of the United Nations directly and through their action in the appropriate international agencies of which they are members.

Article 49

The Members of the United Nations shall join in affording mutual assistance in carrying out the measures decided upon by the Security Council.

Article 50

If preventive or enforcement measures against any state are taken by the Security Council, any other state, whether a Member of the United Nations or not, which finds itself confronted with special economic problems arising from the carrying out of those measures shall have the right to consult the Security Council with regard to a solution of those problems.

Article 51 Nothing in the present Charter shall impair the inherent right of individual or collective self-defence if an armed attack occurs against a Member of the United Nations, until the Security Council has taken measures necessary to maintain international peace and security. Measures taken by Members in the exercise of this right of self-defence shall be immediately reported to the Security Council and shall not in any way affect the authority and responsibility of the Security Council under the present Charter to take at any time such action as it deems necessary in order to maintain or restore international peace and security.

[Table of Contents](#)

CHAPTER VIII

REGIONAL ARRANGEMENTS

Article 52

1. Nothing in the present Charter the existence of regional arrangements or agencies for dealing with such matters relating to the maintenance of international peace and security as are appropriate for regional action, provided that such arrangements or agencies and their activities are consistent with the Purposes and Principles of the United Nations.
2. The Members of the United Nations entering into such arrangements or constituting such agencies shall make every effort to achieve pacific settlement of local disputes through such regional arrangements or by such regional agencies before referring them to the Security Council.
3. The Security Council shall encourage the development of pacific settlement of local disputes through such regional arrangements or by such regional agencies either on the initiative of the states concerned or by reference from the Security Council.

4. This Article in no way the application of Articles 34 and 35.

Article 53

1. The Security Council shall, where appropriate, utilize such regional arrangements or agencies for enforcement action under its authority. But no enforcement action shall be taken under regional arrangements or by regional agencies without the authorization of the Security Council, with the exception of measures against any enemy state, as defined in paragraph 2 of this Article, provided for pursuant to Article 107 or in regional arrangements directed against renewal of aggressive policy on the part of any such state, until such time as the Organization may, on request of the Governments concerned, be charged with the responsibility for preventing further aggression by such a state.

2. The term enemy state as used in paragraph 1 of this Article applies to any state which during the Second World War has been an enemy of any signatory of the present Charter.

Article 54

The Security Council shall at all times be kept fully informed of activities undertaken or in contemplation under regional arrangements or by regional agencies for the maintenance of international peace and security.

[Table of Contents](#)

CHAPTER IX

INTERNATIONAL ECONOMIC AND SOCIAL CO-OPERATION

Article 55

With a view to the creation of conditions of stability and well-being which are necessary for peaceful and friendly relations among nations based on respect for the principle of equal rights and self-determination of peoples, the United Nations shall promote:

- a. higher standards of living, full employment, and conditions of economic and social progress and development;
- b. solutions of international economic, social, health, and related problems; and international cultural and educational co-operation; and

c. universal respect for, and observance of, human rights and fundamental freedoms for all without distinction as to race, sex, language, or religion.

Article 56

All Members pledge themselves to take joint and separate action in co-operation with the Organization for the achievement of the purposes set forth in Article 55.

Article 57

1. The various specialized agencies, established by intergovernmental agreement and having wide international responsibilities, as defined in their basic instruments, in economic, social, cultural, educational, health, and related fields, shall be brought into relationship with the United Nations in accordance with the provisions of Article 63.

2. Such agencies thus brought into relationship with the United Nations are hereinafter referred to as specialized agencies.

Article 58

The Organization shall make recommendations for the co-ordination of the policies and activities of the specialized agencies.

Article 59

The Organization shall, where appropriate, initiate negotiations among the states concerned for the creation of any new specialized agencies required for the accomplishment of the purposes set forth in Article 55.

Article 60

Responsibility for the discharge of the functions of the Organization set forth in this Chapter shall be vested in the General Assembly and, under the authority of the General Assembly, in the Economic and Social Council, which shall have for this purpose the powers set forth in Chapter X.

[Table of Contents](#)

CHAPTER X

THE ECONOMIC AND SOCIAL COUNCIL

Composition

Article 61

1. The Economic and Social Council shall consist of fifty-four Members of the United Nations elected by the General Assembly.
2. Subject to the provisions of paragraph 3, eighteen members of the Economic and Social Council shall be elected each year for a term of three years. A retiring member shall be eligible for immediate re-election.
3. At the first election after the increase in the membership of the Economic and Social Council from twenty-seven to fifty-four members, in addition to the members elected in place of the nine members whose term of office expires at the end of that year, twenty-seven additional members shall be elected. Of these twenty-seven additional members, the term of office of nine members so elected shall expire at the end of one year, and of nine other members at the end of two years, in accordance with arrangements made by the General Assembly.
4. Each member of the Economic and Social Council shall have one representative.

Functions and Powers

Article 62

1. The Economic and Social Council may make or initiate studies and reports with respect to international economic, social, cultural, educational, health, and related matters and may make recommendations with respect to any such matters to the General Assembly, to the Members of the United Nations, and to the specialized agencies concerned.
2. It may make recommendations for the purpose of promoting respect for, and observance of, human rights and fundamental freedoms for all.
3. It may prepare draft conventions for submission to the General Assembly, with respect to matters falling within its competence.
4. It may call, in accordance with the rules prescribed by the United Nations, international conferences on matters falling within its competence.

Article 63

1. The Economic and Social Council may enter into agreements with any of the agencies referred to in

Article 57, defining the terms on which the agency concerned shall be brought into relationship with the United Nations. Such agreements shall be subject to approval by the General Assembly.

2. It may co-ordinate the activities of the specialized agencies through consultation with and recommendations to such agencies and through recommendations to the General Assembly and to the Members of the United Nations.

Article 64

1. The Economic and Social Council may take appropriate steps to obtain regular reports from the specialized agencies. It may make arrangements with the Members of the United Nations and with the specialized agencies to obtain reports on the steps taken to give effect to its own recommendations and to recommendations on matters falling within its competence made by the General Assembly.

2. It may communicate its observations on these reports to the General Assembly.

Article 65

The Economic and Social Council may furnish information to the Security Council and shall assist the Security Council upon its request.

Article 66

1. The Economic and Social Council shall perform such functions as fall within its competence in connexion with the carrying out of the recommendations of the General Assembly.

2. It may, with the approval of the General Assembly, perform services at the request of Members of the United Nations and at the request of specialized agencies.

3. It shall perform such other functions as are specified elsewhere in the present Charter or as may be assigned to it by the General Assembly.

Voting

Article 67

1. Each member of the Economic and Social Council shall have one vote.

2. Decisions of the Economic and Social Council shall be made by a majority of the members present and voting.

Procedure

Article 68

The Economic and Social Council shall set up commissions in economic and social fields and for the promotion of human rights, and such other commissions as may for the performance of its functions.

Article 69

The Economic and Social Council shall invite any Member of the United Nations to participate, without vote, in its deliberations on any matter of particular concern to that Member.

Article 70

The Economic and Social Council may make arrangements for representatives of the specialized agencies to participate, without vote, in its deliberations and in those of the commissions established by it, and for its representatives to participate in the deliberations of the specialized agencies.

Article 71

The Economic and Social Council may make suitable arrangements for consultation with non-governmental organizations which are concerned with matters within its competence. Such arrangements may be made with international organizations and, where appropriate, with national organizations after consultation with the Member of the United Nations concerned.

Article 72

1. The Economic and Social Council shall adopt its own rules of procedure, including the method of selecting its President.
2. The Economic and Social Council shall meet as required in accordance with its rules, which shall include provision for the convening of meetings on the request of a majority of its members.

CHAPTER XI

DECLARATION REGARDING NON-SELF-GOVERNING TERRITORIES

Article 73

Members of the United Nations which have or assume responsibilities for the administration of territories whose peoples have not yet attained a full measure of self-government recognize the principle that the interests of the inhabitants of these territories are paramount, and accept as a sacred trust the obligation to promote to the utmost, within the system of international peace and security established by the present Charter, the well-being of the inhabitants of these territories, and, to this end:

- a. to ensure, with due respect for the culture of the peoples concerned, their political, economic, social, and educational advancement, their just treatment, and their protection against abuses;
- b. to develop self-government, to take due account of the political aspirations of the peoples, and to assist them in the progressive development of their free political institutions, according to the particular circumstances of each territory and its peoples and their varying stages of advancement;
- c. to further international peace and security;
- d. to promote constructive measures of development, to encourage research, and to co-operate with one another and, when and where appropriate, with specialized international bodies with a view to the practical achievement of the social, economic, and scientific purposes set forth in this Article; and
- e. to transmit regularly to the Secretary-General for information purposes, subject to such limitation as security and constitutional considerations may require, statistical and other information of a technical nature relating to economic, social, and educational conditions in the territories for which they are respectively responsible other than those territories to which Chapters XII and XIII apply.

Article 74

Members of the United Nations also agree that their policy in respect of the territories to which this Chapter applies, no less than in respect of their metropolitan areas, must be based on the general principle of good-neighbourliness, due account being taken of the interests and well-being of the rest of the world, in social, economic, and commercial matters.

[Table of Contents](#)

CHAPTER XII

INTERNATIONAL TRUSTEESHIP SYSTEM

Article 75

The United Nations shall establish under its authority an international trusteeship system for the administration and supervision of such territories as may be placed thereunder by subsequent individual agreements. These territories are hereinafter referred to as trust territories.

Article 76

The basic objectives of the trusteeship system, in accordance with the Purposes of the United Nations laid down in Article 1 of the present Charter, shall be:

- a. to further international peace and security;
- b. to promote the political, economic, social, and educational advancement of the inhabitants of the trust territories, and their progressive development towards self-government or independence as may be appropriate to the particular circumstances of each territory and its peoples and the freely expressed wishes of the peoples concerned, and as may be provided by the terms of each trusteeship agreement;
- c. to encourage respect for human rights and for fundamental freedoms for all without : as to race, sex, language, or religion, and to encourage recognition of the interdependence of the peoples of the world; and
- d. to ensure equal treatment in social, economic, and commercial matters for all Members of the United Nations and their , and also equal treatment for the latter in the administration of justice, without prejudice to the attainment of the foregoing objectives and subject to the provisions of Article 80.

Article 77

1. The trusteeship system shall apply to such territories in the following categories as may be placed thereunder by means of trusteeship agreements:

- a. territories now held under mandate;
- b. territories which may be detached from enemy states as a result of the Second World War; and
- c. territories voluntarily placed under the system by states responsible for their administration.

2. It will be a matter for subsequent agreement as to which territories in the foregoing categories will be brought under the trustee- ship system and upon what terms.

Article 78

The trusteeship system shall not apply to territories which have become Members of the United Nations,

relationship among which shall be based on respect for the principle of sovereign equality.

Article 79

The terms of trusteeship for each territory to be placed under the trusteeship system, including any alteration or amendment, shall be agreed upon by the states directly concerned, including the mandatory power in the case of territories held under mandate by a Member of the United Nations, and shall be approved as provided for in Articles 83 and 85.

Article 80

1. Except as may be agreed upon in individual trusteeship agreements, made under Articles 77, 79, and 81, placing each territory under the trusteeship system, and until such agreements have been concluded, nothing in this Chapter shall be construed in or of itself to alter in any manner the rights whatsoever of any states or any peoples or the terms of existing international instruments to which Members of the United Nations may respectively be parties.

2. Paragraph 1 of this Article shall not be interpreted as giving grounds for delay or postponement of the negotiation and conclusion of agreements for placing mandated and other territories under the trusteeship system as provided for in Article 77.

Article 81

The trusteeship agreement shall in each case include the terms under which the trust territory will be administered and designate the authority which will exercise the administration of the trust territory. Such authority, hereinafter called the administering authority, may be one or more states or the Organization itself.

Article 82

There may be designated, in any trusteeship agreement, a strategic area or areas which may include part or all of the trust territory to which the agreement applies, without prejudice to any special agreement or agreements made under Article 43.

Article 83

1. All functions of the United Nations relating to strategic areas, including the approval of the terms of the trusteeship agreements and of their alteration or amendment, shall be exercised by the Security Council.

2. The basic objectives set forth in Article 76 shall be applicable to the people of each strategic area. 43 3. The Security Council shall, subject to the provisions of the trusteeship agreements and without prejudice

to security considerations, avail itself of the assistance of the Trusteeship Council to perform those functions of the United Nations under the trusteeship system relating to political, economic, social, and educational matters in the strategic areas.

Article 84

It shall be the duty of the administering authority to ensure that the trust territory shall play its part in the maintenance of international peace and security. To this end the administering authority may make use of volunteer forces, facilities, and assistance from the trust territory in carrying out the obligations towards the Security Council undertaken in this regard by the administering authority, as well as for local defence and the maintenance of law and order within the trust territory.

Article 85

1. The functions of the United Nations with regard to trusteeship agreements for all areas not designated as strategic, including the approval of the terms of the trusteeship agreements and of their alteration or amendment, shall be exercised by the General Assembly.

2. The Trusteeship Council, operating under the authority of the General Assembly, shall assist the General Assembly in carrying out these functions.

[Table of Contents](#)

CHAPTER XIII

THE TRUSTEESHIP COUNCIL

Composition

Article 86 1. The Trusteeship Council shall consist of the following Members of the United Nations:

- a. those Members administering trust territories;
- b. such of those Members mentioned by name in Article 23 as are not administering trust territories; and
- c. as many other Members elected for three-year terms by the General Assembly as may be necessary to ensure that the total number of members of the Trusteeship Council is equally divided between those Members of the United Nations which administer trust territories and those which do not.

2. Each member of the Trusteeship Council shall designate one specially qualified person to represent it

therein.

Functions and Powers

Article 87

The General Assembly and, under its authority, the Trusteeship Council, in carrying out their functions, may:

- a. consider reports submitted by the administering authority;
- b. accept petitions and examine them in consultation with the administering authority;
- c. provide for periodic visits to the respective trust territories at times agreed upon with the administering authority; and
- d. take these and other actions in conformity with the terms of the trusteeship agreements.

Article 88

The Trusteeship Council shall formulate a questionnaire on the political, economic, social, and educational advancement of the inhabitants of each trust territory, and the administering authority for each trust territory within the competence of the General Assembly shall make an annual report to the General Assembly upon the basis of such questionnaire.

Voting

Article 89

1. Each member of the Trusteeship Council shall have one vote.
2. Decisions of the Trusteeship Council shall be made by a majority of the members present and voting.

Procedure

Article 90

1. The Trusteeship Council shall adopt its own rules of procedure, including the method of selecting its President.
2. The Trusteeship Council shall meet as required in accordance with its rules, which shall include

provision for the convening of meetings on the request of a majority of its members.

Article 91

The Trusteeship Council shall, when appropriate, avail itself of the assistance of the Economic and Social Council and of the specialized agencies in regard to matters with which they are respectively concerned.

[Table of Contents](#)

CHAPTER XIV

THE INTERNATIONAL COURT OF JUSTICE

Article 92

The International Court of Justice shall be the principal judicial organ of the United Nations. It shall function in accordance with the annexed Statute, which is based upon the Statute of the Permanent Court of International Justice and forms an integral part of the present Charter.

Article 93

1. All Members of the United Nations are factio parties to the Statute of the International Court of Justice.
2. A state which is not ~ of the United Nations may become a party to the Statute of the International Court of Justice on to be determined in each case by the General Assembly upon the recommendation of the Security Council.

Article 94

1. Each Member of the United Nations undertakes to comply with the decision of the International Court of Justice in any case to which it is a party.
2. If any party to a case fails to perform the obligations incumbent upon it under a judgment rendered by the Court, the other party may have recourse to the Security Council, which may, if it deems necessary, make recommendations or decide upon measures to be taken to give to the judgment.

Article 95

Nothing in the present Charter shall prevent Members of the United Nations from entrusting the solution of their differences to other tribunals by virtue of agreements already in existence or which may be concluded in the future.

Article 96

1. The General Assembly or the Security Council may request the International Court of Justice to give an advisory opinion on any legal question.
2. Other organs of the United Nations and specialized agencies, which may at any time be so authorized by the General Assembly, may also request advisory opinions of the Court on legal questions arising within the scope of their activities.

[Table of Contents](#)

CHAPTER XV

THE SECRETARIAT

Article 97

The Secretariat shall comprise a Secretary-General and such staff as the Organization may require. The Secretary-General shall be appointed by the General Assembly upon the recommendation of the Security Council. He shall be the chief administrative officer of the Organization.

Article 98

The Secretary-General shall act in that capacity in all meetings of the General Assembly, of the Security Council, of the Economic and Social Council, and of the Trusteeship Council, and shall perform such other functions as are entrusted to him by these organs. The Secretary-General shall make an annual report to the General Assembly on the work of the Organization.

Article 99

The Secretary-General may bring to the attention of the Security Council any matter which in his opinion may threaten the maintenance of international peace and security.

Article 100

1. In the performance of their duties the Secretary-General and the staff shall not seek or receive

instructions from any government or from any other authority external to the Organization. They shall refrain from any action which might impair their position as international officials responsible only to the Organization.

2. Each Member of the United Nations undertakes to respect the exclusively international character of the responsibilities of the Secretary-General and the staff and not to seek to influence them in the discharge of their responsibilities.

Article 101

1. The staff shall be appointed by the Secretary-General under regulations established by the General Assembly.

2. Appropriate staffs shall be permanently assigned to the Economic and Social Council, the Trusteeship Council, and, as required, to other organs of the United Nations. These staffs shall form a part of the Secretariat.

3. The paramount consideration in the employment of the staff and in the determination of the conditions of service shall be the necessity of securing the highest standards of efficiency, competence, and integrity. Due regard shall be paid to the importance of recruiting the staff on as wide a geographical basis as possible.

[Table of Contents](#)

CHAPTER XVI

MISCELLANEOUS PROVISIONS

Article 102

1. Every treaty and every international agreement entered into by any Member of the United Nations after the present Charter comes into force shall as soon as possible be registered with the Secretariat and published by it.

2. No party to any such treaty or international agreement which has not been registered in accordance with the provisions of paragraph 1 of this Article may invoke that treaty or agreement before any organ of the United Nations.

Article 103

In the event of a conflict between the obligations of the Members of the United Nations under the

present Charter and their obligations under any other international agreement, their obligations under the present Charter shall prevail.

Article 104

The Organization shall enjoy in the territory of each of its Members such legal capacity as may be necessary for the exercise of its functions and the fulfilment of its purposes.

Article 105

1. The Organization shall enjoy in the territory of each of its Members such privileges and immunities as are necessary for the fulfilment of its purposes.
2. Representatives of the Members of the United Nations and officials of the Organization shall similarly enjoy such privileges and immunities as are necessary for the independent exercise of their functions in connexion with the Organization.
3. The General Assembly may make recommendations with a view to determining the details of the application of paragraphs 1 and 2 of this Article or may propose conventions to the Members of the United Nations for this purpose.

[Table of Contents](#)

CHAPTER XVII

TRANSITIONAL SECURITY ARRANGEMENTS

Article 106

Pending the coming into force of such special agreements referred to in Article 43 as in the opinion of the Security Council enable it to begin the exercise of its responsibilities under Article 42, the parties to the Four-Nation Declaration, signed at Moscow, 30 October 1943, and France, shall, in accordance with the provisions of paragraph 5 of that Declaration, consult with one another and as occasion requires with other Members of the United Nations with a view to such joint action on behalf of the Organization as may be necessary for the purpose of maintaining international peace and security.

Article 107 Nothing in the present Charter shall in- validate or preclude action, in relation to any state which during the Second World War has been an enemy of any signatory to the present Charter, taken or authorized as a result of that war by the Governments having responsibility for such action.

[Table of Contents](#)

CHAPTER XVIII

AMENDMENTS

Article 108

Amendments to the present Charter shall come into force for all Members of the United Nations when they have been adopted by a vote of two thirds of the members of the General Assembly and ratified in accordance with their respective constitutional processes by two thirds of the Members of the United Nations, including all the permanent members of the Security Council.

Article 109

1. A General Conference of the Members of the United Nations for the purpose of reviewing the present Charter may be held at a date and place to be fixed by a two-thirds vote of the members of the General Assembly and by a vote of any nine members of the Security Council. Each Member of the United Nations shall have one vote in the conference.
2. Any alteration of the present Charter recommended by a two-thirds vote of the conference shall take effect when ratified in accordance with their respective constitutional processes by two thirds of the Members of the United Nations including the permanent members of the Security Council.
3. If such a conference has not been held before the tenth annual session of the General Assembly following the coming into force of the present Charter, the proposal to call such a conference shall be placed on the agenda of that session of the General Assembly, and the conference shall be held if so decided by a majority vote of the members of the General Assembly and by a vote of any seven members of the Security Council.

[Table of Contents](#)

CHAPTER XIX

RATIFICATION AND SIGNATURE

Article 110

1. The present Charter shall be ratified by the signatory states in accordance with their respective constitutional processes.

2. The shall be deposited with the Government of the United States of America, which shall notify a the signatory states of each deposit as well as the Secretary-General of the Organization when he has been appointed.

3. The present Charter shall come into force upon the deposit of by the Republic of China, France, the Union of Soviet Socialist, the United Kingdom of Great Britain and Northern Ireland, and the United States of America, and by a majority of the other signatory states. A protocol of the deposited shall thereupon be drawn up by the Government of the United States of America which shall communicate copies thereof to all the signatory states.

4. The states signatory to the present Charter which ratify it after it has come into force will become original Members of the United Nations on the date of the deposit of their respective ratifications.

Article 111

The present Charter, of which the Chinese, French, Russian, English, and Spanish texts are equally authentic, shall remain deposited in the archives of the Government of the United States of America. Duly certified copies thereof shall be transmitted by that Government to the Governments of the other signatory states.

IN FAITH WHEREOF the representatives of the Governments of the United Nations have signed the present Charter.

DONE at the city of San Francisco the twenty-sixth day of June, one thousand nine hundred and forty-five.

[*Return to Home*](#)

The Council on Foreign Relations and the New World Order

By Charles Overbeck (PSCPirhana)

The Background

The Council on Foreign Relations, housed in the Harold Pratt House on East 68th Street in New York City, was founded in 1921. In 1922, it began publishing a journal called Foreign Affairs. According to Foreign Affairs' web page (<http://www.foreignaffairs.org>), the CFR was founded when "...several of the American participants in the Paris Peace Conference decided that it was time for more private American Citizens to become familiar with the increasing international responsibilities and obligations of the United States."

The first question that comes to mind is, who gave these people the authority to decide the responsibilities and obligations of the United States, if that power was not granted to them by the Constitution. Furthermore, the CFR's web page doesn't publicize the fact that it was originally conceived as part of a much larger network of power.

According to the CFR's Handbook of 1936, several leading members of the delegations to the Paris Peace Conference met at the Hotel Majestic in Paris on May 30, 1919, "to discuss setting up an international group which would advise their respective governments on international affairs."

The Handbook goes on to say, "At a meeting on June 5, 1919, the planners decided it would be best to have separate organizations cooperating with each other. Consequently, they organized the Council on Foreign Relations, with headquarters in New York, and a sister organization, the Royal Institute of International Affairs, in London, also known as the Chatham House Study Group, to advise the British Government. A subsidiary organization, the Institute of Pacific Relations, was set up to deal exclusively with Far Eastern Affairs. Other organizations were set up in Paris and Hamburg..."

The 3,000 seats of the CFR quickly filled with members of America's elite. Today, CFR members occupy key positions in government, the mass media, financial institutions, multinational corporations, the military, and the national security apparatus.

Since its inception, the CFR has served as an intermediary between high finance, big oil, corporate elitists and the U.S. government. The executive branch changes hands between Republican and Democratic administrations, but cabinet seats are always held by CFR members. It has been said by political commentators on the left and on the right that if you want to know what U.S. foreign policy will be next year, you should read Foreign Affairs this year.

The CFR's claim that "The Council has no affiliation with the U.S. government" is laughable. The justification for that statement is that funding comes from member dues, subscriptions to its Corporate

Program, foundation grants, and so forth. All this really means is that the U.S. government does not exert any control over the CFR via the purse strings.

In reality, CFR members are very tightly affiliated with the U.S. government. Since 1940, every U.S. secretary of state (except for Gov. James Byrnes of South Carolina, the sole exception) has been a member of the Council on Foreign Relations and/or its younger brother, the Trilateral Commission. Also since 1940, every secretary of war and every secretary of defense has been a CFR member. During most of its existence, the Central Intelligence Agency has been headed by CFR members, beginning with CFR founding member Allen Dulles. Virtually every key U.S. national security and foreign policy adviser has been a CFR member for the past seventy years.

Almost all White House cabinet positions are occupied by CFR members. President Clinton, himself a member of the CFR, the Trilateral Commission and the Bilderberg Group, employs almost one hundred CFR members in his administration. Presidents come and go, but the CFR's power--and agenda--always remains.

[Top](#)

The CFR's Shroud of Secrety

On its web page, the CFR boasts that its magazine, Foreign Affairs, "is acclaimed for its analysis of recent international developments and for its forecasts of emerging trends." It's not much of a challenge to do so, though, when you play a part in determining what those emerging trends will be.

This point is underscored a paragraph later on their web page: "Perhaps best known for the history-making "X" article by George Kennan, that defined Cold War containment policy, a recent Foreign Affairs article by Harvard's Samuel Huntington, "The Clash of Civilizations?" has already helped define the post-Cold War debate."

So are they predicting trends or creating them? The answer is fairly obvious to anyone who has earnestly reflected on the matter.

The CFR fancies itself to represent a diverse range cultural and political interests, but its members are predominantly wealthy males, and their policies reflect their elitist biases.

The CFR attempts to maintain the charade of diversity via its Non-Attribution Rule, which allows members to engage in "a free, frank, and open exchange of ideas" without fear of having any of their statements attributed in public. The flip side of this, obviously, is a dark cloud of secrecy which envelopes the CFR's activities.

CFR meetings are usually held in secret and are restricted to members and very select guests. All

members are free to express themselves at meetings unrestrained, because the Non-Attribution Rule guarantees that "others will not attribute or characterize their statements in public media forums or knowingly transmit them to persons who will," according to the Council on Foreign Relations' 1992 Annual Report.

The report goes on to forbid any meeting participant "to publish a speaker's statement in attributed form in any newspaper; to repeat it on television or radio, or on a speaker's platform, or in a classroom; or to go beyond a memo of limited circulation."

The end result is that the only information the public has on the CFR is the information they release for public consumption, which should send up red flags for anyone who understands the immense effect that CFR directives have on America's foreign policy. The public knows what the CFR wants the public to know about the CFR, and nothing more.

There is one hole in the fog of secrecy, however: a book entitled *Tragedy and Hope*, written by an "insider" named Dr. Carroll Quigley, mentor of Bill Clinton.

[Top](#)

Tragedy and Hope: The Global Elite

Dr. Quigley knew a lot about the behind-the-scenes work of global power because he was a part of that power network for most of his life. In his book, *Tragedy and Hope*, Quigley states:

"I know of the operations of this network because I have studied it for twenty years and was permitted for two years, in the early 1960's, to examine its papers and secret records. I have no aversions to it or to most of its aims and have, for much of my life, been close to it and to many of its instruments. I have objected, both in the past and recently, to a few of its policies ... but in general my chief difference of opinion is that it wishes to remain unknown, and I believe its role in history is significant enough to be known."

The "Hope" in the title of Quigley's book represents the thousand-year reign of a collectivist one-world society which will be created when the "network" achieves its goal of world government. Quigley believed that the "network" is so powerful at this point that resistance by the common people is futile. Hence, those who resist the schemes of the globalist planners represent the "Tragedy." By Dr. Quigley's logic, there is no point in struggling against the noose around our necks, because resistance will merely guarantee strangulation.

Dr. Quigley identified the "network" as the "international bankers," men who were "different from ordinary bankers in distinctive ways: they were cosmopolitan and international; they were close to governments and were particularly concerned with questions of government debts...; they were almost

exclusively devoted to secrecy and the secret use of financial influence in political life. These bankers came to be called international bankers, and, more particularly, were known as merchant bankers in England, private bankers in France, and investment bankers in the United States."

The core of control, according to Dr. Quigley, resides in the financial dynasties of Europe and America who exercise political control through international financial combines. The primary tactic of control is lending money at high interest to governments and monarchs during times of crisis. An example of this is the current national debt in the U.S., which is at five trillion dollars right now. Every penny of it is owed to the Federal Reserve, a corporation comprised of thirteen private banks.

According to Dr. Quigley, the Council on Foreign Relations is one of several front organizations set up by the network's inner circle to advance its schemes. The ultimate goal: a New World Order.

[Top](#)

CFR and the New World Order

According to State Department Publication 2349, submitted by secretary of State and CFR member Edward Stettinius, a committee on "post-war problems" was set up before the end of 1939 at the suggestion of the CFR. In other words, two years before the Japanese bombed Pearl Harbor, the CFR was planning how to order the world after the war ended.

In 1946, the Rockefeller Foundation spent almost \$140,000 to produce a history of how the United States entered World War II. This history was intended to counter "revisionist" historians who argued that the U.S. was "tricked" into the war by the Roosevelt Administration. The Rockefeller family has always taken a lead role in the CFR.

In the 1960s, while American men and women were dying in the jungles of Vietnam and while the military/industrial complex was sucking trillions of dollars out of American taxpayers' wallets, the Rockefeller dynasty was financing Vietnamese oil refineries and aluminum plants. If there had ever been a formal declaration of war, the Rockefellers could be tried for treason. Instead, they reaped dividends.

These are just a few of the abuses of power which demonstrate the results of the power elite's manipulations of our destiny as a society. If you've ever wondered why you don't hear about this network of power, just take a look at the CFR's membership roster (posted online in ParaScope). Many of the chief executives and newspeople at CBS, NBC/RCA, ABC, the Public Broadcast Service, the Associated Press, the New York Times, Time magazine, Newsweek, the Washington Post, and many other key media outlets are CFR members.

Even if these members of the media's elite had the inclination to report on what they saw and heard at CFR meetings, they are prevented from doing so by the Non-Attribution Rule. To put this in

perspective: many of the people who are trusted to provide information about national and world politics are deliberately withholding crucial information from the public because of membership in a secretive globalist organization.

This organization has taken it upon itself to participate in the manufacturing of a new vision for humanity, and dissidence will not be tolerated. If you believe the words of Carroll Quigley, all resistance is futile and doomed to failure. If you believe the rhetoric of internationalists in our own government, the current "trend towards isolationism" will result in a loss of American hegemony in the New World Order, leaving the United States a wrecked Third World wasteland.

World government can come in time, piece by piece, arrived at through the full participation and consensus of the human beings who will be affected by the negotiations. But the idea of the world's elite determining what path that the common herd should follow is repulsive to the human spirit. The story of the CFR goes far deeper than this brief report, and is interlocked with several other international power groups.

International power orgs depend on the masses remaining ignorant for their plans to come to fruition. It's up to you to do your own research and draw your own conclusion. But remember: there's a hell of a lot more to the story than Dan Rather will ever tell you. Educate yourself, or remain a passive consumer. The choice is entirely yours.

CFR/Trilateral Commission Members

Roster of Prominent CFR/Trilateral Commission Members

Members of the Council on Foreign Relations and the Trilateral Commission dominate key positions in America's government, military, industries, media outlets and educational foundations and institutions. The following is a partial list of current CFR members and the positions of influence they hold in society. The CFR's membership is limited to 3,000, and there are only 325 Trilateral Commission members.

This list was supplied by F.R.E.E. (Fund to Restore an Educated Electorate) and is non-copyrighted educational material. It may be reprinted and reproduced in newspapers, newsletters, books and magazines.

Key:

CFR = Member of the Council on Foreign Relations

TC = Member of the Trilateral Commission

BB = Member of the Elite Bilderbergs

The Council on Foreign Relations and the New World Order

By William Blase

For those who may be unaware or confused by the controversies surrounding the "New World Order" and One-World-Government, I offer the following.

Originally presented for an Honors Class, "Dilemmas of War and Peace," at New Mexico State University, the paper was ridiculed and characterized by Dr. Yosef Lapid, (an acknowledged and locally quoted "expert" on Terrorism and Middle Eastern affairs) as "paranoid...possibly a symptom of mental illness." You may judge for yourself.

Citing source data is the "scientific method," but does not seem to apply to "Conspiracy Theories." A thousand sources may be quoted, yet will not convince the "skeptics," the "realists." It seems to me the "symptoms of mental illness" are on their side, if they refuse to look at evidence ("There are none so blind as those who WILL not see"); or perhaps something more sinister is at work, such as a knowledge of the truth, that does not want YOU to know.

To be paranoid means to believe in delusions of danger and persecution. If the danger is real, and the evidence credible, then it cannot be delusional. To ignore the evidence, and hope that it CANNOT be true, is more an evidence of mental illness.

The issue involves much more than a difference of philosophy, or political viewpoint. Growing up in the midst of the "Cold War," our generation were taught that those who attempted to abolish our national sovereignty and overthrow our Constitutional government were committing acts of treason. Please judge for yourself if the group discussed is guilty of such.

Part I

If one group is effectively in control of national governments and multinational corporations; promotes world government through control of media, foundation grants, and education; and controls and guides the issues of the day; then they control most options available. The Council on Foreign Relations (CFR), and the financial powers behind it, have done all these things, and promote the "New World Order", as they have for over seventy years.

The CFR is the promotional arm of the Ruling Elite in the United States of America. Most influential politicians, academics and media personalities are members, and it uses its influence to infiltrate the New World Order into American life. Its' "experts" write scholarly pieces to be used in decision making, the academics expound on the wisdom of a united world, and the media members disseminate the

message.

To understand how the most influential people in America came to be members of an organization working purposefully for the overthrow of *the Constitution* and American sovereignty, we have to go back at least to the early 1900's, though the story begins much earlier (depending on your viewpoint and beliefs). Baron M.A. Rothschild wrote, "Give me control over a nation's currency and I care not who makes its laws." All that is needed to effectively control a government is to have control over the nation's money: a central bank with a monopoly over the supply of money and credit. This had been done in Western Europe, with the creation of privately owned central banks such as the Bank of England. Georgetown professor Dr. Carroll Quigley (Bill Clinton's mentor while at Georgetown) wrote about the goals of the investment bankers who control central banks: "... nothing less than to create a world system of financial control in private hands able to dominate the political system of each country and the economy of the world as a whole... controlled in a feudalist fashion by the central banks of the world acting in concert, by secret agreements arrived at in frequent private meetings and conferences."

That a ruling power elite does indeed control the U.S. government behind the scenes has been attested to by many Americans in a position to know. Felix Frankfurter, Justice of the Supreme Court (1939-1962), said: "The real rulers in Washington are invisible and exercise power from behind the scenes." In a letter to an associate dated November 21, 1933, President Franklin Roosevelt wrote, "The real truth of the matter is, as you and I know, that a financial element in the large centers has owned the government ever since the days of Andrew Jackson." February 23, 1954, Senator William Jenner warned in a speech: "Outwardly we have a Constitutional government. We have operating within our government and political system, another body representing another form of government, a bureaucratic elite which believes our Constitution is outmoded."

Baron M.A. Rothschild wrote, "Give me control over a nation's currency and I care not who makes its laws." All that is needed to effectively control a government is to have control over the nation's money: a central bank with a monopoly over the supply of money and credit. This had been done in Western Europe, with the creation of privately owned central banks such as the Bank of England. Georgetown professor Dr. Carroll Quigley (Bill Clinton's mentor while at Georgetown) wrote about the goals of the investment bankers who control central banks: "... nothing less than to create a world system of financial control in private hands able to dominate the political system of each country and the economy of the world as a whole... controlled in a feudalist fashion by the central banks of the world acting in concert, by secret agreements arrived at in frequent private meetings and conferences."

The Bank of the United States (1816-36), an early attempt at an American central bank, was abolished by President Andrew Jackson, who believed that it threatened the nation. He wrote: "The bold effort the present bank had made to control the government, the distress it had wantonly produced...are but premonitions of the fate that awaits the American people should they be deluded into a perpetuation of this institution or the establishment of another like it."

Thomas Jefferson wrote: "The Central Bank is an institution of the most deadly hostility existing against

the principles and form of our Constitution...if the American people allow private banks to control the issuance of their currency, first by inflation and then by deflation, the banks and corporations that will grow up around them will deprive the people of all their property until their children will wake up homeless on the continent their fathers conquered."

Does that not describe the situation in America today?

The U.S. managed to do without a central bank until early in this century, when, according to Congressman Charles Lindbergh, Sr., "The Money Trust caused the 1907 panic, and thereby forced Congress to create a National Monetary Commission." Headed by Senator Nelson Aldrich, father-in-law of John D. Rockefeller, Jr., the Commission recommended creation of a central bank.

Though unconstitutional, as only "The Congress shall have Power...To coin Money, regulate the Value thereof..." (Article I, Section 8, *U.S. Constitution*) the Federal Reserve Act was passed in December 1913; ostensibly to stabilize the economy and prevent further panics, but as Lindbergh warned Congress: "This act establishes the most gigantic trust on earth...the invisible government by the money power, proven to exist by the Money Trust investigation, will be legalized." The Great Depression and numerous recessions later, it is obvious the Federal Reserve produces inflation and federal debt whenever it desires, but not stability.

Congressman Louis McFadden, House Committee on Banking and Currency Chairman (1920-31), stated: "When the Federal Reserve Act was passed, the people of these United States did not perceive that a world banking system was being set up here. A super-state controlled by international bankers and industrialists...acting together to enslave the world...Every effort has been made by the Fed to conceal its powers but the truth is--the Fed has usurped the government."

Although called "Federal," the Federal Reserve system is privately owned by member banks, makes its own policies, and is not subject to oversight by Congress or the President. As the overseer and supplier of reserves, the Fed gave banks access to public funds, which enhanced their lending capacity.

Peter Kershaw, in *Economic Solutions* lists the ten major shareholders of the Federal Reserve Bank System as: Rothschild: London and Berlin; Lazard Bros: Paris; Israel Seiff: Italy; Kuhn-Loeb Company: Germany; Warburg: Hamburg and Amsterdam; Lehman Bros: New York; Goldman and Sachs: New York; Rockefeller: New York. The balance of stock is owned by major commercial member banks.

(That most, if not all of these stockholding companies/families just happen to be Jewish, you may judge the significance, if any, for yourself.)

Author's Note: A reader recently - Aug. 98 - claimed that my article was marred by "anti-semitism" because of "a needless and groundless remark regarding the Jewish members of the Federal Reserve System. I wonder if you would have commented if the names were Italian." I replied that if all stockholders of the Fed were Italian, I certainly would find it remarkable, and would comment on it.

Since the subject currently under discussion is the Federal Reserve, it seems appropriate to discuss who the stockholders are, since they have made huge profits off the backs of the American people. Is the subject taboo, and cannot be discussed, simply because they are all Jewish? If they WERE all Italian, that would be remarkable, and connotations of "The Mafia" or a "Catholic Conspiracy" would come to mind... but because they are Jewish, we should simply move on without comment, lest we are labeled "anti-semitic." ???

The reader's Pavlovian conditioning is working well... The subject is taboo and not to be investigated... but she is correct in one sense... Their religion or race makes no difference - The question is: Why is ONE group of international bankers controlling OUR nation's banking system?

According to Davvy Kidd, Why A Bankrupt America? The Federal Reserve pays the Bureau of Engraving & Printing approximately \$23 for each 1,000 notes printed. 10,000 \$100 notes (one million dollars) would thus cost the Federal Reserve \$230. They then secure a pledge of collateral equal to the face value from the U.S government. The collateral is our land, labor, and assets...collected by their agents, the IRS.

By authorizing the Fed to regulate and create money (and thus inflation), Congress gave private banks power to create profits at will. As Lindberg put it: "The new law will create inflation whenever the trusts want inflation...they can unload the stocks on the people at high prices during the excitement and then bring on a panic and buy them back at low prices...the day of reckoning is only a few years removed." That day came in 1929, with the Stock Market crash and Great Depression.

One of the most important powers given to the Fed was the right to buy and sell government securities, and provide loans to member banks so they might also purchase them. This provided another built-in mechanism for profit to the banks, if government debt was increased. All that was needed was a method to pay off the debt. This was accomplished through the passage of the income tax in 1913.

A national income tax was declared unconstitutional in 1895 by the Supreme Court, so a constitutional amendment was proposed in Congress by none other than ...Senator Nelson Aldrich. As presented to the American people it seemed reasonable enough: income tax on only one percent of income under \$20,000, with the assurance that it would never increase. Since it was graduated, the tax would "soak the rich", ...but the rich had other plans, already devising a method of protecting wealth.

As described by Gary Allen in his 1976 book The Rockefeller File, "By the time the (16th) Amendment had been approved by the states, the Rockefeller Foundation was in full operation...about the same time that Judge Kenesaw Landis was ordering the breakup of the Standard Oil monopoly...John D...not only avoided taxes by creating four great tax-exempt foundations; he used them as repositories for his 'divested' interests...made his assets non-taxable so that they might be passed down through generations without...estate and gift taxes...Each year the Rockefellers can dump up to half their incomes into their pet foundations and deduct the "donations" from their income tax."

Exchanging ownership for control of wealth, foundations are also a handy means for promoting interests that benefit the wealthy. Millions of foundation dollars have been "donated" to causes such as promoting the use of drugs, while degrading preventive medicine. Since many drugs are made from coal tar derivatives, both oil companies and drug manufacturing concerns (many Rockefeller owned or controlled) are the main beneficiaries.

With the means to loan enormous sums to the government (the Federal Reserve), a method to repay the debt (income tax), and an escape from taxation for the wealthy, (foundations), all that remained was an excuse to borrow money. By some happy "coincidence," in 1914 World War I began, and after American participation national debt rose from \$1 billion to \$25 billion.

Woodrow Wilson was elected President in 1913, beating incumbent William Howard Taft, who had vowed to veto legislation establishing a central bank. To divide the Republican vote and elect the relatively unknown Wilson, J.P. Morgan and Co. poured money into the candidacy of Teddy Roosevelt and his Progressive Party.

According to an eyewitness, Wilson was brought to Democratic Party headquarters in 1912 by Bernard Baruch, a wealthy banker. He received an "indoctrination course" from those he met, and in return agreed, if elected: to support the projected Federal Reserve and the income tax, and "listen" to advice in case of war in Europe and on the composition of his cabinet.

Wilson's top advisor during his two terms was a man named Colonel Edward M. House. House's biographer, Charles Seymour, called him the "unseen guardian angel" of the Federal Reserve Act, helping to guide it through Congress. Another biographer wrote that House believed: "...the Constitution, product of eighteenth-century minds...was thoroughly outdated; that the country would be better off if the Constitution could be scrapped and rewritten..." House wrote a book entitled *Philip Dru: Administrator*, published anonymously in 1912. The hero, Philip Dru, rules America and introduces radical changes, such as a graduated income tax, a central bank, and a "league of nations."

World War I produced both a large national debt, and huge profits for those who had backed Wilson. Baruch was appointed head of the War Industries Board, where he exercised dictatorial power over the national economy. He and the Rockefellers were reported to have earned over \$200 million during the war. Wilson backer Cleveland Dodge sold munitions to the allies, while J.P. Morgan loaned them hundreds of millions, with the protection of U.S. entry into the war.

While profit was certainly a motive, the war was also useful to justify the notion of world government. William Hoar reveals in *Architects of Conspiracy* that during the 1950s, government investigators examining the records of the Carnegie Endowment for International Peace, a long-time promoter of globalism, found that several years before the outbreak of World War I, the Carnegie trustees were planning to involve the U.S. in a general war, to set the stage for world government.

The main obstacle was that Americans did not want any involvement in European wars. Some kind of

incident, such as the explosion of the battleship *Main*, which provoked the Spanish - American war, would have to be provided as provocation. This occurred when the *Lusitania*, carrying 128 Americans on board, was sunk by a German submarine, and anti-German sentiment was aroused. When war was declared, U.S. propaganda portrayed all Germans as Huns and fanged serpents, and all Americans opposing the war as traitors.

What was not revealed at the time, however, was that the *Lusitania* was transporting war munitions to England, making it a legitimate target for the Germans. Even so, they had taken out large ads in the New York papers, asking that Americans not take passage on the ship.

The evidence seems to point to a deliberate plan to have the ship sunk by the Germans. Colin Simpson, author of *The Lusitania*, wrote that Winston Churchill, head of the British Admiralty during the war, had ordered a report to predict the political impact if a passenger ship carrying Americans was sunk. German naval codes had been broken by the British, who knew approximately where all U-boats near the British Isles were located.

According to Simpson, Commander Joseph Kenworthy, of British Naval Intelligence, stated: "The *Lusitania* was deliberately sent at considerably reduced speed into an area where a U-boat was known to be waiting...escorts withdrawn." Thus, even though Wilson had been reelected in 1916 with the slogan "He kept us out of war," America soon found itself fighting a European war. Actually, Colonel House had already negotiated a secret agreement with England, committing the U.S. to the conflict. It seems the American public had little say in the matter.

With the end of the war and the Versailles Treaty, which required severe war reparations from Germany, the way was paved for a leader in Germany such as Hitler. Wilson brought to the Paris Peace Conference his famous "fourteen points," with point fourteen being a proposal for a "general association of nations," which was to be the first step towards the goal of One World Government-the League of Nations.

Wilson's official biographer, Ray Stannard Baker, revealed that the League was not Wilson's idea. "...not a single idea--in the Covenant of the League was original with the President." Colonel House was the author of the Covenant, and Wilson had merely rewritten it to conform to his own phraseology.

The League of Nations was established, but it, and the plan for world government eventually failed because the U.S. Senate would not ratify the Versailles Treaty.

Pat Robertson, in *The New World Order*, states that Colonel House, along with other internationalists, realized that America would not join any scheme for world government without a change in public opinion. After a series of meetings, it was decided that an "Institute of International Affairs", with two branches, in the United States and England, would be formed.

The British branch became known as the Royal Institute of International Affairs, with leadership

provided by members of the Round Table. Begun in the late 1800's by Cecil Rhodes, the Round Table aimed to federate the English speaking peoples of the world, and bring it under their rule.

The Council on Foreign Relations was incorporated as the American branch in New York on July 29, 1921. Founding members included Colonel House, and "...such potentates of international banking as J. P. Morgan, John D. Rockefeller, Paul Warberg, Otto Kahn, and Jacob Schiff...the same clique which had engineered the establishment of the Federal Reserve System," according to Gary Allen in the October 1972 issue of *AMERICAN OPINION*.

The founding president of the CFR was John W. Davis, J.P. Morgan's personal attorney, while the vice-president was Paul Cravath, also representing the Morgan interests. Professor Carroll Quigley characterized the CFR as "...a front group for J.P. Morgan and Company in association with the very small American Round Table Group." Over time Morgan influence was lost to the Rockefellers, who found that one world government fit their philosophy of business well. As John D. Rockefeller, Sr. had said: "Competition is a sin," and global monopoly fit their needs as they grew internationally.

Antony Sutton, a research fellow for the Hoover Institution for War, Revolution, and Peace at Stanford University, wrote of this philosophy: "While monopoly control of industries was once the objective of J. P. Morgan and J.D. Rockefeller, by the late nineteenth century the inner sanctums of Wall Street understood the most efficient way to gain an unchallenged monopoly was to 'go political' and make society go to work for the monopolists-- under the name of the public good and the public interest."

Frederick C. Howe revealed the strategy of using government in a 1906 book, *Confessions of a Monopolist*: "These are the rules of big business...Get a monopoly; let society work for you; and remember that the best of all business is politics..."

As corporations went international, national monopolies could no longer protect their interests. What was needed was a one world system of government controlled from behind the scenes. This had been the plan since the time of Colonel House, and to implement it, it was necessary to weaken the U.S. politically and economically.

During the 1920's, America enjoyed a decade of prosperity, fueled by the easy availability of credit. Between 1923 and 1929 the Federal Reserve expanded the money supply by sixty-two percent. When the stock market crashed, many small investors were ruined, but not "insiders." In March of 1929 Paul Warburg issued a tip the Crash was coming, and the largest investors got out of the market, according to Allen and Abraham in *None Dare Call it Conspiracy*.

With their fortunes intact, they were able to buy companies for a fraction of their worth. Shares that had sold for a dollar might now cost a nickel, and the buying power, and wealth, of the rich increased enormously.

Louis McFadden, Chairman of the House Banking Committee declared: "It was not accidental. It was a

carefully contrived occurrence...The international bankers sought to bring about a condition of despair here so that they might emerge as rulers of us all."

Curtis Dall, son-in-law of FDR and a syndicate manager for Lehman Brothers, an investment firm, was on the N.Y. Stock Exchange floor the day of the crash. In his book, *FDR: My Exploited Father-In-Law*, he states: "...it was the calculated 'shearing' of the public by the World-Money powers triggered by the planned sudden shortage of call money in the New York Market."

The Crash paved the way for the man Wall Street had groomed for the presidency, FDR. Portrayed as a "man of the little people", the reality was that Roosevelt's family had been involved in New York banking since the eighteenth century.

Frederic Delano, FDR's uncle, served on the original Federal Reserve Board. FDR attended Groton and Harvard, and in the 1920's worked on Wall Street, sitting on the board of directors of eleven different corporations.

Dall wrote of his father-in-law: "...Most of his thoughts, his political 'ammunition,'...were carefully manufactured for him in advance by the CFR-One World Money group. Brilliantly... he exploded that prepared 'ammunition' in the middle of an unsuspecting target, the American people--and thus paid off and retained his internationalist political support."

Taking America off the gold standard in 1934, FDR opened the way to unrestrained money supply expansion, decades of inflation--and credit revenues for banks. Raising gold prices from \$20 an ounce to \$35, FDR and Treasury Secretary Henry Morgenthau, Jr. (son of a founding CFR member), gave international bankers huge profits.

FDR's most remembered program, the New Deal, could only be financed through heavy borrowing. In effect, those who had caused the Depression loaned America the money to recover from it. Then, through the National Recovery Administration, proposed by Bernard Baruch in 1930, they were put in charge of regulating the economy. FDR appointed Baruch disciple Hugh Johnson to run the NRA, assisted by CFR member Gerard Swope. With broad powers to regulate wages, prices, and working conditions, it was, as Herbert Hoover wrote in his memoirs: "...pure fascism;...merely a remaking of Mussolini's 'corporate state'..." The Supreme Court eventually ruled the NRA unconstitutional.

During the FDR years, the Council on Foreign Relations captured the political life of the U.S. Besides Treasury Secretary Morgenthau, other CFR members included Secretary of State Edward Stettinus, War Secretary Henry Stimson, and Assistant Secretary of State Sumner Welles.

Since 1934 nearly every United States Secretary of State has been a CFR member; and ALL Secretaries of War or Defense, from Henry L. Stimson through Richard Cheney.

The CIA has been under CFR control almost continuously since its creation, starting with Allen Dulles,

founding member of the CFR and brother of Secretary of State under President Eisenhower, John Foster Dulles. Allen Dulles had been at the Paris Peace Conference, joined the CFR in 1926, and later became its president.

John Foster Dulles had been one of Woodrow Wilson's young proteges at the Paris Peace Conference. A founding member of the CFR...he was an in-law of the Rockefellers, Chairman of the Board of the Rockefeller Foundation, and Board Chairman of the Carnegie Endowment for International Peace.

In 1940 FDR defeated internationalist Wendell Willkie, who wrote a book entitled *One World*, and later became a CFR member. Congressman Usher Burdick protested at the time on the floor of the House that Willkie was being financed by J.P. Morgan and the New York utility bankers. Polls showed few Republicans favored him, yet the media portrayed him as THE Republican candidate.

The Council on Foreign Relations and the New World Order

By William Blase

Part II

Since that time nearly ALL presidential candidates have been CFR members. President Truman, who was not a member, was advised by a group of "wise men," all six of whom were CFR members, according to Gary Allen. In 1952 and 1956, CFR Adlai Stevenson challenged CFR Eisenhower. In 1960, CFR Kennedy (perhaps killed for attempting to introduce debt-free money, by executive order - cancelled immediately by LBJ) defeated CFR Nixon. In 1964 the GOP stunned the Establishment by nominating its candidate over Nelson Rockefeller. Rockefeller and the CFR wing proceeded to picture Barry Goldwater as a dangerous radical. In 1968 CFR Nixon ran against CFR Humphrey. The 1972 "contest" featured CFR Nixon vs. CFR McGovern.

CFR candidates for president include George McGovern, Walter Mondale, Edmund Muskie, John Anderson, and Lloyd Bentsen. In 1976 we had Jimmy Carter, who is a member of the Trilateral Commission, created by David Rockefeller and CFR member Zbigniew Brezinski with the goal of economic linkage between Japan, Europe, and the United States, and: "...managing the world economy... a smooth and peaceful evolution of the global system." We have also had (though his name strangely disappears from the membership list in 1979) CFR Director (1977-79) George Bush, and last but not least, CFR member Bill Clinton.

They have all promoted the "New World Order," controlled by the United Nations. The problem is that "...the present United Nations organization is actually the creation of the CFR and is housed on land in Manhattan donated to it by the family of current CFR chairman David Rockefeller," as Pat Robertson describes it.

The original concept for the UN was the outcome of the Informal Agenda Group, formed in 1943 by Secretary of State Cordell Hull. All except Hull were CFR members, and Isaiah Bowman, a founding member of the CFR, originated the idea.

The American delegation to the San Francisco meeting that drafted the charter of the United Nations in 1949 included CFR members Nelson Rockefeller, John Foster Dulles, John McCloy, and CFR members who were communist agents--Harry Dexter White, Owen Lattimore, and the Secretary-General of the conference, Alger Hiss. In all, the Council sent forty-seven of its members in the United States delegation, effectively controlling the outcome.

Since that time the CFR and its friends in the mass media (largely controlled by CFR members such as

Katherine Graham of the *Washington Post* and Henry Luce of *Time, Life*), foundations, and political groups have lobbied consistently to grant the United Nations more authority and power. Bush and the Gulf War were but one of the latest calls for a "New World Order." Through executive order, Clinton has attempted to give the U.N. authority to command U.S. troops. Many American historical sites are now U.N. "World Heritage Sites," such as Independence Hall, Carlsbad Caverns, and the Grand Canyon. The administration is moving forward with the Biodiversity Treaty (though not ratified by Congress) and the Wildlands Project, developed by convicted eco-terrorist Dave Foreman, founder of Earth First! and present director of the Sierra Club. It would convert much of the area of the U.S. to wilderness areas, connected by corridors for the free movement of species (except for humans, who would be confined and "concentrated" into enclaves...).

Admiral Chester Ward, a member of the CFR for over a decade, became one of its harshest critics, revealing its inner workings in a 1975 book, *Kissinger ON THE COUCH*. In it he states "The most powerful cliques in these elitist groups have one objective in common: they want to bring about the surrender of the sovereignty and national independence of the United States."

Most members are one-world-government ideologists whose long-term goals were officially summed up in the September 1961 *State Department Document 7277*, adopted by the Nixon Administration: "...elimination of all armed forces and armaments except those needed to maintain internal order within states and to furnish the United Nations with peace forces...by the time it (UN global government) would be so strong no nation could challenge it."

Within the CFR there exists a "much smaller group but more powerful...made up of Wall Street international bankers and their key agents. Primarily, they want the world banking monopoly from whatever power ends up in control of the global government ...This CFR faction is headed by the Rockefeller brothers," according to Ward.

What must be remembered is that this is not some lunatic-fringe group...these are members of one of the most powerful private organizations in the world: the people who determine and control American economic, social, political, and military policy. Members' influence and control extends to "leaders in academia, public service, business, and the media," according to the CFR 1993 *Annual Report*.

Their founding they describe as: "American Participants in the Paris Peace Conference decided that it was time for more private Americans to become familiar with the increasing responsibilities and obligations of the United States...there was a need for an organization able to provide for the continuous study of U.S. foreign policy for the BENEFIT OF ITS MEMBERS (emphasis mine) and a wider audience of interested Americans."

They sponsor hundreds of programs, where members "exchange views with American and foreign officials and policy experts... discuss foreign policy issues...consider international issues of concern to the business community" (Corporate business), and "...affiliated groups of community leaders throughout the United states...meet with decision makers."

The CFR states that it is "host to many views, advocate of none," and it "has no affiliation with the U.S. government." No, no affiliation at all, if you don't count: "A Council member was elected president of the United States...Dozens of other Council colleagues were called to serve in cabinet and sub-cabinet positions," as they describe it in *Foreign Affairs*, the official publication of the CFR, along with many members of Congress, the Supreme Court, the Joint Chiefs, the Federal Reserve, and many other Federal bureaucrats. They are not AFFILIATED with government, they ARE the government.

One re-occurring view was stated in the 50th anniversary issue of *Foreign Affairs*. In an article by Kingman Brewster, Jr. entitled "Reflections on Our National Purpose." Our purpose should be, according to him, to do away with our nationality, to "take some risks in order to invite others to pool their sovereignty with ours..."

These "risks" include disarming to the point where we would be helpless against the "peace-keeping" forces of a global UN government. We should happily surrender our sovereignty to the world government in the interests of the "world community."

Today we have the spectacle of Spc. 4 Michael New, a U.S. soldier in Germany who refuses to wear the uniform of the UN, facing an "administrative discharge." He states rightly that he swore an oath to defend the *U.S. Constitution*, not the United Nations. Many other Americans have taken that same oath, such as myself, and believe it is our sworn duty still to defend *The Constitution*, since an oath sworn before God must be fulfilled. (Why else do we swear to tell the truth in our courts, or when taking public office?) Those who actually BELIEVE in God and the oath that was taken to defend our Constitution are characterized as extremists. Is it a crime to be honest these days?

Meanwhile, those who attempt to destroy *The Constitution* and our sovereignty are given honors and position...

"In short, the 'house of world order' will have to be built from the bottom up rather than from the top down...An end run around national sovereignty, eroding it piece by piece, will accomplish much more than the old fashioned assault..." in the opinion of Richard N. Gardner, former deputy assistant Secretary of State in *Foreign Affairs*, April 1974.

James Warburg, son of CFR founder Paul Warburg, and a member of FDR's "brain trust," testified before the Senate Foreign Relations Committee on February 17, 1950, "We shall have world government whether or not you like it--by conquest or consent."

Is this an AMERICAN speaking, or a dangerous lunatic? Who is this "We" who threatens to CONQUER us?

They are a group that actually has the power to do it, and is doing it every day, bit by bit.

CFR Members in the mass media, education, and entertainment push their propaganda of "humanism" and world brotherhood. We should all live in peace under a world government, and forget about such selfish things as nationalities and patriotism. We can solve our own problems. We don't need God, or morals, or values: it's all relative, anyway, right?...Because if we actually had some moral character and values, we might be able to discern that these people are actually EVIL.

The Bible says that the LOVE of money is the root of all evil (1 Tim. 6:10). These people are evil because they love money and power, and greed drives them to do anything to achieve their goals. They have lost all morality and conscience, and believe such concepts, as well as our *Constitution*, "outdated".

THAT is insanity--to have more wealth than can be spent, and still it is never enough. They have to control governments, start wars, conspire to rule the world; least the "common people" wake up to how they have gained their wealth, take it away from them, and demand that they pay the price for their crimes.

That is why they constantly pit us one against the other, with "Diversity," Affirmative Action, and other programs,...black against white, men against women, rural against urban, ranchers against environmentalists, and on and on...least we look in their direction, and see that they are the hate-mongers, the polluters, the criminals.

We The People are held to a much higher standard. If we threaten the President or a public official, we are charged with a crime...yet the One-World-Gang can threaten *The Constitution* and the liberties of **We The People**, the sovereign rulers of this nation, and nothing is said or done. We are taught that we have a government OF the People, BY the People, and FOR the People; yet if The People attempt to take their sovereign power unto themselves and form common law courts, grand juries, or self-defense militias, they are branded as right-wing extremists. Perhaps the Constitution and Common Law have been suspended by the State of Emergency in 1933 (continued to this day through Executive Order), emergency powers granted to the President, and admiralty law instituted, and they just neglected to tell us.

Perhaps they do not fear what Man can do to them... they believe they have arranged everything, and their power and wealth will prevail in this world. However, those among them who have sworn an oath before **God** to uphold and defend *The Constitution*: the President, members of Congress, and the military; will find one day that they do indeed have something to fear, when they stand before the Judge of All.

**Partial List of CFR members, from the 1993 "Annual Report."
Approximately 3,000 members total.**

Elliott Abrams, ROGER ALTMAN, John Anderson, Roone Arledge, LES ASPIN, BRUCE BABBITT, Howard Baker, William Bennett, LLOYD BENTSEN, Shirley Black, Tom Bradley, TOM BROKAW, Harold Brown, RONALD BROWN, Z. Brezindski, WILLIAM BUCKLEY, Frank Carlucci, JIMMY CARTER, John Chancellor, Richard Cheney, Henry Cisneros, BILL CLINTON, William Colby, WARREN CHRISTOPHER, Mario Cuomo, James Dalton, Richard Darman, JOHN DEUTCH, Charles Dodd, Michael Dukakis, L. Eagleburger, Daniel Ellsberg, Geraldine Ferraro, Thomas Foley, GERALD FORD, Robert Gates, DAVID GERGEN, NEWT GINGRICH, RUTH GINSBERG, Katherine Graham, ALAN GREENSPAN, Alexander Haig, Richard Helms, Benjamin Hooks, C. Hunter-Gault, JESSE JACKSON, Bernard Kalb, N. Katzenbach, George Kennan, John Kerry, Jean Kirkpatrick, Henry Kissinger, ANTHONY LAKE, JIM LEHRER, I. R. Levine, John Lindsay, Richard McFarlane, George McGovern, Robert McNamera, Robert McNeill, George Mitchell, Walter Mondale, Daniel Moynihan, Edmund Muskie, Jack Nelson, Paul Nitze, SANDRA O'CONNOR, Claiborne Pell, Richard Perle, COLIN POWELL, DAN RATHER, ALICE RIVLIN, Charles Robb, David Rockefeller, John Rockefeller, William Rogers, Walt Rostow, W. Ruckelshaus, Warren Rudman, Dean Rusk, Carl Sagan, Harrison Salisbury, Jonas Salk, DIANE SAWYER, John Scali, James Schlesinger, Daniel Schorr, PAT SCHROEDER, Brent Scowcroft, William Scranton, DONNA SHALALA, William Shirer, S. Shriver, George Shultz, GARY SICK, L. Silberman, William Simon, Steven Solarz, G. Stephanopoulos, David Stockman, Robert Strauss, Peter Tarnoff, D. THORNBURGH, Stansfield Turner, LAURA D'ANDREA TYSON, Cyrus Vance, John Vessey, Paul Volcker, BARBARA WALTERS, Paul Warnke, Ben Wattenberg, William Webster, Caspar Weinberger, Timothy Wirth, Frank Wisner, JAMES WOOSLEY, Elmo Zumwalt

Past and present Directors of the CFR include George Bush, Thomas Foley, Averell Harriman, David Rockefeller, Donna Shalala, Zbigniew Brzezinski, John McCloy, Douglas Dillon, Adlai Stevenson, Bill Moyers, Cyrus Vance, Henry Kissinger, George Shultz, Alan Greenspan, William Rogers, Lane Kirkland, and many other well-known names.

Corporate Members include:

American Airlines, American Express, Archer Daniels Midland, ASARCO, AT&T, Atlantic Richfield, Avon Products, BMW of North America, Bank of America, Bankers Trust, Barclays Bank, Bristol-Myers Squibb, Capital Cities/ABC, Chase Manhattan Bank, Chevron, Citibank/Citicorp, Coca-Cola, Deere & Company, Dow Chemical, Dow Jones & Company, Dun & Bradstreet, E. I. du Pont, Estee Lauder, Exxon, Forbes Magazine, Ford Motor Company, General Electric, General Motors, Georgia-Pacific, H. J. Heinz, Hilton Hotels, IBM Corporation, ITT Corporation, John Wiley & Sons, Johnson & Johnson, J. P. Morgan & Co., Peat Marwick, Merrill Lynch, Mitsubishi, Mobil Corporation, New York Times, Nippon Steel USA, Occidental Petroleum, Olin Corporation, Paramount Publishing, PepsiCo, Pfizer, Phillips Petroleum, Price Waterhouse, Proctor & Gamble, Prudential Insurance, RJR Nabisco,

Rockefeller Group, Schlumberger Limited, S. G. Warburg & Co., Siemens Corporation, Smith Barney Shearson, Sony Corporation, Texaco, Times Mirror, Toyota Motor Corp., TRW, Xerox Corp.

Colonel House, the fallen angel, still has relatives controlling the CFR. Karen Elliot House is Chairman of the Membership Committee, and a member of the Nominating Committee, along with Jeane Kirkpatrick. David Rockefeller is now "Honorary Chairman of the Board", after serving as Chairman 1970-1985; and "Director Emeritus," after serving as a Director 1949-1985. Peter G. Peterson is Chairman, Admiral B. R. Inman is Vice Chairman, while Thomas Foley and Jeane Kirkpatrick are Directors serving on the Executive Committee.

These "private citizens" have access to government officials and policy makers as often as they wish, yet the results of their meetings can only be given to other government officials, corporate officers, or law partners. Participants are forbidden to transmit an attributed statement to any public medium, such as newspapers or TV, where there is "risk that it will promptly be widely circulated or published," as the Annual Report puts it.

Should not OUR public officials be forbidden to meet in secret with private groups? Public officials should only be allowed to discuss public business and policy in a public forum. The Public...remember US?

There is much more to say about this group and their plans for America. Gary Allen, in The Rockefeller File, states that they are behind the many regional government plans, which would abolish city, county, and state lines, leaving us at the mercy of federal bureaucrats; and behind the push for "land use" controls. They want "federal control of everything. Since they intend to control the federal government..."

There are also the many allegations of involvement in gun running, drug smuggling, prostitution and sex slaves; and the many mysterious assassinations and "suicides" of witnesses and others who get too close to the truth...but that is [another story](#).

ABOUT THE SPEAKER

"WHO'S WHO IN THE THEATER" has always been the Bible of the People in the Legitimate Theater. It never played Favorites, it told no lies, it Glorified nobody. It always was an unbiased HISTORY of the men and women in the Theater. It recorded only those who proved their worth in the one - AND ONLY ONE - testing place of the Theater. BROADWAY: That **"WHO'S WHO"** records the plays **Myron C. Fagan** wrote, directed and produced ... Dramas, Comedies, Melodramas, Mysteries, Allegories, Farces - many of them the most resounding "HITS" of their years. He arrived on Broadway in 1907, 19 years old, the youngest playwright in the history of the American Theater. In the following years he wrote and directed plays for many of the GREATS of those days ... **Mrs. Leslie Carter, Wilton Lackaye, Fritz Leiber, Alla Nazimova, Jack Barrymore, Douglas Fairbanks, Sr., E.H. Southern, Julia Marlowe, Helen Morgan,** etc, etc. He directed **Charles M. Frohman, Belasco, Henry W. Savage, Lee Shubert, Abe Erlanger, George M. Cohan,** etc, etc.. In the 5 years between 1925 and 1930 he wrote, personally directed, and produced twelve plays: **"THE WHITE ROSE," "THUMBS DOWN," "TWO STRANGERS FROM NOWHERE," "MISMATES," "THE FASCINATING DEVIL," "THE LITTLE SPITFIRE," "JIMMY'S WOMEN," "THE GREAT POWER," "INDISCRETION," "NANCY'S PRIVATE AFFAIR," "SMART WOMAN,"** and **"PETER FLIES HIGH."**

During his early years; **Mr. Fagan** was also **"Dramatic Editor"** for **"The Associated Newspapers,"** including the **"New York Globe"** and various Hearst newspapers. But in 1916 he took a **"SABBATICAL"** from the Theater and served as **"Director of Public Relations"** for **Charles Evens Hughes;** the Republican Candidate for the Presidency - he refused a similar post offered him for the Hoover campaign in 1928; thus, **Mr. Fagan's** career encompassed the Theater, Journalism and National Politics, and he is a proven expert in all those fields.

In 1930; **Mr. Fagan** came to Hollywood where he served as **"Writer Director"** with **"Pathe Pictures, Inc.,"** then owned by **Joseph P. Kennedy,** father of the late **President Jack Kennedy,** and also at **20th Century Fox,** and other Hollywood Film Studios. But he also continued in the Broadway Legitimate field.

In 1945, at the urgent request of **John T. Flynn,** the famous author of **"THE ROOSEVELT MYTH," "WHILE WE SLEPT," "THE TRUE STORY OF PEARL HARBOR,"** etc.; **Mr. Fagan** attended a meeting in Washington D.C. where he was shown a set of Micro Films and Recordings of the SECRET meetings at Yalta attended only by **Franklin Roosevelt, Alger Hess, Harry Hopkins, Stalin, Molotov,** and **Vishinsky** when they hatched the plot to deliver the Balkans, Eastern Europe and Berlin to **Stalin.** As a result of that meeting; **Mr. Fagan** wrote two plays: **"RED RAINBOW"** (in which he revealed that entire plot) and **"THIEVES PARADISE"** (in which he revealed how those men plotted to create the **"UNITED NATIONS"** to be the "housing" for a so-called Communist One World Government).

At the same time; **Mr. Fagan** launched a **"ONE-MAN"** crusade to unmask the Red Conspiracy in Hollywood to produce Films that would aid that **"ONE WORLD GOVERNMENT"** plot. Out of that came into being the **"CINEMA EDUCATIONAL GUILD."** As a result of the work of this **"C. E. G."** organization (headed by **Mr. Fagan**, in 1947); came the Congressional Hearings at which more than 300 of Hollywood's, (also Radio and T.V.) most famous Stars, Writers, and Directors were unmasked as the chief activist of the Red Conspiracy. That was when the infamous **"HOLLYWOOD TEN"** were sent to prison.

IT WAS THE MOST SENSATIONAL EVENT OF THAT DECADE!

From that time on **Mr. Fagan** has devoted all of his time and efforts to writing monthly **"NEWS BULLETINS"** for **"C. E. G."** in which he has kept up the fight to alert the American people to the plot to destroy the sovereignty of the United States of America and the ensuing enslavement of the American people in a **UNITED NATIONS'** "One World Government."

In his sensational recording (this transcript); he reveals the beginning of the One World enslavement plot that was launched two centuries ago by one **Adam Weishaupt**, an apostate Catholic Priest who; **FINANCED BY THE HOUSE OF ROTHSCHILD**, created what he called: **"THE ILLUMINATI."** **Mr. Fagan** describes (WITH DOCUMENTARY EVIDENCE) how this **ILLUMINATI** became the instrument of the **House of Rothschild** to achieve a **"One World Government"** and how every War during the past two centuries was fomented by this **ILLUMINATI**. He describes how one **Jacob H. Schiff** was sent to the United States by the **Rothschilds** to further the **ILLUMINATI** plot and how **Schiff** plotted to get control of both the Democratic and the Republican Parties. How **Schiff** seduced our Congress and our Presidents to achieve control of our entire Money System and create the Income Tax **CANCER** and how **Schiff** and his co-conspirators created the **"COUNCIL ON FOREIGN RELATIONS"** to control our elected officials to gradually drive the U.S. into becoming an enslaved unit of a **"UNITED NATIONS"** One World Government.

In short this Recording (*Transcript*) is the most interesting and the most horrifying - **AND FACTUAL** - story of the most sensational plot in the history of the World. Everybody who loves our Country - who loves God - who would save Christianity, **WHICH THE ILLUMINATI IS DEDICATED TO DESTROY** - who would save our sons from dying on Korean, on Viet Nam, on South African, and now on the battlefields of the Middle East, should hear this Recording. There is absolutely no doubt that anyone who **DOES** hear (read) this amazing story will join in the fight to save our Country and our Nations Youth.

Myron Fagan's recording took place sometime in the 1960's. Please take the time to **"VERIFY"** the statements made herein. We don't expect you to take **Mr. Fagan's** word at face value. We suggest that you visit the "Law" and "Depository" libraries that are located throughout your state. The Telephone numbers and addresses listed herein are most likely out of date as **Mr. Fagan** is no longer with us.

THE ILLUMINATI AND THE COUNCIL ON FOREIGN RELATIONS

(By Myron Fagon)

"The question of how and why the **United Nations** is the crux of the great conspiracy to destroy the sovereignty of the **United States** and the enslavement of the American people within a U.N. one-world dictatorship is a complete and unknown mystery to the vast majority of the American people. The reason for this unawareness of the frightening danger to our country and to the entire free world is simple. The masterminds behind this great conspiracy have absolute control of all of our mass communications media, especially television, the radio, the press, and Hollywood. We all know that our **State Department**, the **Pentagon**, and the **White House** have brazenly proclaimed that they have the right and the power to manage the news, to tell us not the truth but what they want us to believe. They have seized that power on orders from their masters of the great conspiracy and the objective is to brainwash the people into accepting the phony peace bait to transform the **United States** into an enslaved unit of the **United Nations'** one-world government.

"First of all, bear in mind that the so-called **U.N.** police action in **Korea**, fought by the **United States** in which 150,000 of our sons were murdered and maimed, was part of the plot; just as the undeclared by Congress war in **Vietnam** in which our sons are dying is part of the plot; just as the plot against **Rhodesia** and **South Africa** in which our sons will be dying is part of the **U.N.** plot. However, the vitally important thing for all Americans, all you mothers of the boys who died in **Korea** and are now dying in **Vietnam**, to know is that our so-called leaders in **Washington**, who we elected to safeguard our nation and our constitution, are the betrayers and that behind them are a comparatively small group of men whose sole objective is to enslave the whole world of humanity in their satanic plot of one-world government.

"Now in order to give you a very clear picture of this satanic plot, I will go back to its beginning, clear back in the middle of the 18th century and name the men who put that plot into action and then bring you down to the present - today's status of that plot. Now as a matter of further intelligence, a term used by the **FBI**, let me clarify the meaning of the expression "**he is a liberal.**" The enemy, meaning the one-world conspirators, have seized upon that word "**liberal**" as a cover-up for their activities. It sounds so innocent and so humanitarian to be liberal. Well, make sure that the person who calls himself a liberal or is described as a liberal is not in truth a "**red.**"

"Now then, this satanic plot was launched back in the 1760's when it first came into existence under the name "**Illuminati**." This **Illuminati** was organized by one **Adam Weishaupt**, born a Jew, who was converted to Catholicism and became a Catholic priest, and then, at the behest of the then newly organized **House of Rothschild**, defected and organized the **Illuminati**. Naturally, the **Rothschilds** financed that operation and every war since then, beginning with the **French Revolution**, has been promoted by the **Illuminati** operating under various names and guises. I say under various names and guises because after the **Illuminati** was exposed and became notorious, **Weishaupt** and his co-conspirators began to operate under various other names. In the United States, immediately after World War I, they set up what they called the "**Council on foreign Relations**," commonly referred to as the **CFR**, and this **CFR** is actually the **Illuminati** in the United States and its hierarchy. The masterminds in control of the original **Illuminati** conspirators, but to conceal that fact, most of them changed their original family names to American sounding names. For example, the true name of the **Dillons**, **Clarence** and **Douglas Dillon** (one Secretary of the U.S. Treasury Department), is **Laposky**. I'll come back to all this later.

"There is a similar establishment of the **Illuminati** in England operating under the name of the "**British Institute of International Affairs**." There are similar secret **Illuminati** organizations in France, Germany, and other nations operating under different names and all these organizations, including the **CFR**, continuously set up numerous subsidiary or front organizations that are infiltrated into every phase of the various nations' affairs. But at all times, the operations of these organizations were and are masterminded and controlled by the **Internationalist Bankers**, they in turn were and are controlled by the **Rothschilds**.

"One branch of the **Rothschild** family had financed Napoleon; another branch of the **Rothschilds** financed Britain, Germany, and the other nations in the Napoleonic wars.

"Immediately after the Napoleonic wars, the **Illuminati** assumed that all the nations were so destitute and so weary of wars that they'd be glad for any solution, so the **Rothschild** stooges set up what they called the **Congress in Vienna** and at that meeting they tried to create the first **League of Nations**, their first attempted one-world government, on the theory that all the crowned heads of European governments were so deeply in debt to them that they would willingly or unwillingly serve as their stooges. But the **Czar of Russia** caught the stench of the plot and completely torpedoed it. The enraged **Nathan Rothschild**, then the head of the dynasty, vowed that some day he or his descendants would destroy the Czar and his entire family, and his descendants did accomplish that very threat in 1917. At this point, bear in mind that the **Illuminati** was not set up to operate on a short-range basis. Normally a conspirator of any type enters into a conspiracy with the expectation of achieving his objective during his own lifetime. But that was not the case with the **Illuminati**. True, they hoped to accomplish their objective during their lifetime, but paraphrasing "The show must go on," the **Illuminati** operates on the very long-range basis. Whether it will take scores of years or even centuries, they have dedicated their descendants to keep the pot boiling until they hope the conspiracy is achieved.

"Now, let's go back to the birth of the **Illuminati**. **Adam Weishaupt** was a Jesuit-trained professor of canon law, teaching in **Engelstock University**, when he defected from Christianity to embrace the

luciferian conspiracy. It was in 1770 that the professional money lenders, the then recently organized **House of Rothschild**, retained him to revise and modernize the age-old protocols of **Zionism**, which from the outset, was designed to give the **Synagogue of Satan**, so named by **Jesus Christ**, ultimate world domination so they could impose the luciferian ideology upon what would remain of the human race after the final social cataclysm by use of satanic despotism. **Weishaupt** completed his task **May 1, 1776**. Now you know why **May 1** is the great day with all communist nations to this very day (**May 1** is also "**Law Day**" as declared by the **American Bar Association**). That was the day, **May 1, 1776**, that **Weishaupt** completed his plan and officially organized the **Illuminati** to put the plan into execution. That plan required the destruction of all existing governments and religions. That objective was to be reached by dividing the masses of people, whom he **Weishaupt**, termed: "**goyism**" or human cattle into opposing camps in ever increasing numbers on political, social, economic, and other issues - the very conditions we have in our country today. The opposing sides were then to be armed and incidents provided which would cause them to fight and weaken themselves and gradually destroy national governments and religious institutions. Again I say, the very conditions in the world today.

"And at this point let me stress a prime feature of the **Illuminati** plans. When and if their blueprint for world control, the [Protocols Of The Elders Of Zion](#), is discovered and exposed, they would wipe all the Jews off the face of the earth in order to divert suspicions from themselves. If you think this is far fetched, bear in mind that they permitted **Hitler**, a liberal socialist himself, who was financed by corrupt **Kennedy**, the **Warburgs**, and the **Rothschilds**, to incinerate 600,000 Jews.

"Now just why did the conspirators choose the word: "**Illuminati**" for their satanic organization? **Weishaupt** himself said that the word is derived from **Lucifer** and means: "**holder of the light.**" Using the lie that his objective was to bring about a one-world government to enable those with mental ability to govern the world and prevent all wars in the future. In short, using the words: "**peace on earth**" as his bait, exactly as that same bait as: "**peace**" was used by the 1945 conspirators to force the **United Nations** on us, **Weishaupt** financed, I repeat, by the **Rothschilds**, recruited some 2,000 paid followers. These included the most intelligent men in the field of arts and letters, education, the sciences, finance, and industry. He then established **Lodges of the Grand Orient**; Masonic Lodges to be their secret headquarters and I again repeat, that in all of this he was acting under orders from the **House of Rothschild**. The main features of the **Weishaupt** plan of operation required his **Illuminati** to do the following things to help them to accomplish their purpose:

Use monetary and sex bribery to obtain control of men already in high places in the various of levels of all governments and other fields of endeavor. Once influential persons had fallen for the lies, deceits, and temptations of the **Illuminati** they were to be held in bondage by application of political and other forms of blackmail, threats of financial ruin, public exposure, and fiscal harm, even death to themselves and loved members of their families.

Do you realize how many present top officials in our present government in **Washington** are controlled in just that way by the **CFR**? Do you realize how many homosexuals in our **State Department**, the **Pentagon**, all federal agencies, even in the **White House** are controlled that way?

Illuminati and the faculties of colleges and universities were to cultivate students possessing exceptional mental ability belonging to well-bred families with international leanings and recommend them for special training in internationalism. Such training was to be provided by granting scholarships to those selected by the **Illuminartists**.

"That gives you an idea what a "**Rhodes scholarship**" means. It means indoctrination into accepting the idea that only a one-world government can put an end to recurring wars and strife. That's how the **United Nations** was sold to the American people.

"One of the most notable Rhodes scholars we have in our country is **Senator William J. Fulbright**, sometimes referred to as half-bright. His entire voting record spells **Illuminati**. All such scholars were to be first persuaded and then convinced that men of special talent and brains have the right to rule those less gifted on the ground that the masses don't know what is best for them fiscally, mentally, and spiritually. In addition to the **Rhodes** and similar scholarships, today there are three special **Illuminati schools** located in **Gordonstown in Scotland, Salem in Germany, and Annavrigha in Greece**. These three are known ones, but there are others that are kept undercover. **Prince Philip**, the husband of Britain's **Queen Elizabeth**, was educated at **Gordonstown** at the instigation of **Lord Louis Mountbatten**, his uncle, a Rothschild relative, who became Britain's Admiral of the Fleet after World War II ended.

All influential people trapped into coming under the control of the **Illuminati**, plus the students who had been specially educated and trained, were to be used as agents and placed behind the scenes of all governments as experts and specialists so they would advise the top executives to adopt policies which would in the long run serve the secret plans of the **Illumination**-world conspiracy and bring about the destruction of the governments and religions they were elected or appointed to serve.

"Do you know how many such men operate in our government at this very time? **Rusk, McNamara, Hubert Humphrey, Fulbright, Keekle**, and goes on and on and on.

Perhaps the most vital directive in **Weishaupt's** plan was to obtain absolute control of the press, at that time the only mass communications media, to distribute information to the public so that all news and information could be slanted so that the masses could be convinced that a one-world government is the only solution to our many and varied problems.

"Do you know who owns and controls our mass communications media? I'll tell you. Practically all the movie lots in Hollywood is owned by the **Lehmans; Kuhn, Loeb, and Company; Goldman-Sachs;** and other internationalist bankers. All the national radio and TV channels in the nation are owned and controlled by those same internationalist bankers. The same is true of every chain of metropolitan newspapers and magazines, also of the press wire services, such as **Associated Press, United Press, International**, etc.. The supposed heads of all those media are merely the fronts for the internationalist bankers, who in turn compose the hierarchy of the **CFR**, today's **Illuminati** in America.

"Now can you understand why the Pentagon Press agent, **Sylvester**, so brazenly proclaimed that the government has the right to lie to the people. What he really meant was that our **CFR** controlled government had the power to lie to and be believed by the brain-washed American people.

"Let us again go back to the first days of the **Illuminati**. Because **Britain** and **France** were the two greatest world powers in the late years of the 18th Century; **Weishaupt** ordered the **Illuminati** to foment the colonial wars, including our **Revolutionary War**, to weaken the **British Empire** and organize the **French Revolution** to start in 1789. However; in 1784, a true act of God placed the **Bavarian government** in possession of evidence which proved the existence of the **Illuminati** and that evidence could have saved **France** if they, the French government, hadn't refused to believe it. Here is how that act of God happened. It was in 1784 that **Weishaupt** issued his orders for the **French Revolution**. A German writer, named **Zweig**, put it into book form. It contained the entire **Illuminati** story and **Weishaupt's** plans. A copy of this book was sent to the **Illuminists** in **France** headed by **Robespierre** whom **Weishaupt** had delegated to foment the **French Revolution**. The courier was struck and killed by lightning as he rode through **Rawleston** on his way from **Frankfurt** to **Paris**. The police found the subversive documents on his body and turned them over to the proper authorities. After a careful study of the plot; the **Bavarian government** ordered the police to raid **Weishaupt's** newly organized **Lodges of the "Grand Orient"** and the homes of his most influential associates. All additional evidence thus discovered convinced the authorities that the documents were genuine copies of the conspiracy by which the **Illuminati** planned to use wars and revolutions to bring about the establishment of a one-world government; the powers of which they, headed by the **Rothschilds**, intended to usurp as soon as it was established, exactly in line with the **United Nations'** plot of today.

"In 1785, the **Bavarian government** outlawed the **Illuminati** and closed the **Lodges of the "Grand Orient."** In 1786; they published all the details of the conspiracy. The English title of that publication is: **"The Original Writings of the Order and the Sect of the Illuminati."** Copies of the entire conspiracy were sent to all the heads of church and state in Europe. But the power of the **Illuminati**, which was actually the power of the **Rothschilds**, was so great that this warning was ignored. Nevertheless; the **Illuminati** became a dirty word and it went underground.

"At the same time, **Weishaupt** ordered **Illuminists** to infiltrate into the **Lodges of "Blue Masonry"** and formed their own secret societies within all secret societies. Only **Masons** who proved themselves internationalists and those whose conduct proved they had defected from God were initiated into the **Illuminati**. Thenceforth; the conspirators donned the cloak of philanthropy and humanitarianism to conceal their revolutionary and subversive activities. In order to infiltrate into **Masonic Lodges** in **Britain**; **Weishaupt** invited **John Robison** over to **Europe**. **Robison** was a high degree **Mason** in the **"Scottish Rite."** He was a professor of natural philosophy at **Edinburgh University** and **Secretary of the Royal Society of Edinburgh**. **Robison** did not fall for the lie that the objective of the **Illuminati** was to create a benevolent dictatorship; but he kept his reactions to himself so well that he was entrusted with a copy of **Weishaupt's** revised conspiracy for study and safekeeping. Anyway; because the heads of state and church in **France** were deluded into ignoring the warnings given them; the **revolution** broke out in 1789 as scheduled by **Weishaupt**. In order to alert other governments to their danger, in 1798,

Robison published a book entitled: "**Proof of a conspiracy to Destroy all Governments and Religions**" but his warnings were ignored exactly as our American people have been ignoring all warnings about the **United Nations** and the **Council on Foreign Relations (CFR)**.

"Now here is something that will stun and very likely outrage many who hear this; but there is documentary proof that our own **Thomas Jefferson** and **Alexander Hamilton** became students of **Weishaupt**. **Jefferson** was one of **Weishaupt's** strongest defenders when he was outlawed by his government and it was **Jefferson** who infiltrated the **Illuminati** into the then newly organized lodges of the "**Scottish Rite**" in **New England**. Here is the proof.

"In 1789; **John Robison** warned all **Masonic leaders** in **America** that the **Illuminati** had infiltrated into their lodges and on July 19, 1789; **David Papen**, President of **Harvard University**, issued the same warning to the graduating class and lectured them on how the influence of **Illuminism** was acquitting on American politics and religion, and to top it off; **John Quincy Adams**, who had organized the **New England Masonic Lodges**, issued his warnings. He wrote three letters to **Colonel William L. Stone**, a top **Mason**, in which he exposed how **Jefferson** was using **Masonic lodges** for subversive Illuministic purposes. Those three letters are at this very time in **Whittenburg Square Library** in **Philadelphia**. In short; **Jefferson**, founder of the **Democratic Party**, was a member of the **Illuminati** which at least partly accounts for the condition of the party at this time and through infiltration of the **Republican Party**; we have exactly nothing of loyal Americanism today. That disastrous rebuff at the **Congress of Vienna** created by the **Czar of Russia** did not by any means destroy the **Illuminati** conspiracy. It merely forced them to adopt a new strategy realizing that the one-world idea was, for the moment, killed. The **Rothschild's** decided that to keep the plot alive they would have to do it by heightening their control of the money system of the **European** nations.

"Earlier; by a ruse the outcome of the **Battle of Waterloo** had been falsified, **Rothschild** had spread a story that **Napoleon** had one bad battle which precipitated a terrific panic on the stock market in **England**. All stocks had plummeted down to practically zero and **Nathan Rothschild** bought all the stocks for virtually a penny on its dollar values. That gave him complete control of the economy of **Britain** and virtually of all **Europe**. So immediately after that **Congress in Vienna** had boomeranged; **Rothschild** had forced **Britain** to set up a new "**Bank of England**" which he had absolute control exactly, as later through **Jacob Schiff**; he engineered our own "**Federal Reserve Act**" which gave the **House of Rothschild** a secret control of the economy in the **United States**. But now for a moment; let's dwell on the activities of the **Illuminati** in the **United States**.

"In 1826; one **Captain William Morgan** decided it was his duty to inform all **Masons** and the general public what the full proof was regarding the **Illuminati**, their secret plans, intended objectives, and to reveal the identities of the masterminds of the conspiracy. The **Illuminati** promptly tried **Morgan** in absentia and convicted him of treason. They ordered one **Richard Howard**, an **English Illuminist**, to carry out their sentence of execution as a traitor. **Morgan** was warned and he tried to escape to **Canada**, but **Howard** caught up with him near the border; near the **Niagara Gorge** to be exact, where he murdered him. This was verified in a sworn statement made in **New York** by one **Avery Allen** to the effect that he heard **Howard** render his report of the execution to a meeting of "**Knights Templers**" in

St. John's Hall in New York. He also told how arrangements had been made to ship **Howard** back to **England.** That **Allen** affidavit is on record in **New York City Archives.** Very few **Masons** and very few of the general public know that general disapproval over that incident of murder caused approximately half of all the **Masons** in the northern jurisdiction of the **United States** to secede. Copies of the minutes of the meeting held to discuss that matter are still in existence in safe hands and that all that secrecy emphasizes the power of the masterminds of the **Illuminati** to prevent such terrible events of history from being taught in our schools.

"In the early 1850's; the **Illuminati** held a secret meeting in **New York** which was addressed by a **British Illuminist** named **Wright.** Those in attendance were told that the **Illuminati** was organizing to unite the **Nihilist** and **Atheist** groups with all other subversive groups into an international group to be known as **Communists.** That was when the word: "**communist**" first came into being and it was intended to be the supreme weapon and scare word to terrify the whole world and drive the terrorized peoples into the **Illuminati** one-world scheme. This scheme: "**communism,**" was to be used to enable the **Illuminati** to foment future wars and revolutions. **Clinton Roosevelt,** a direct ancestor of **Franklin Roosevelt;** **Horace Greeley;** and **Charles Dana;** foremost newspaper publishers of that time were appointed to head a committee to raise funds for the new venture. Of course, most of the funds were provided by the **Rothschilds** and this fund was used to finance **Karl Marx** and **Engels** when they wrote "**Das Kaptial**" and the "**Communist Manifesto**" in **Soho, England.** And this clearly reveals that **communism** is not a so-called ideology, but a secret weapon; a bogy man word to serve the purpose of the **Illuminati.**

"**Weishaupt** died in 1830; but prior to his death, he prepared a revised version of the age-old conspiracy, the **Illuminati,** which under various aliases was to organize, finance, direct, and control all international organizations and groups by working their agents into executive positions at the top. In the **United States** we have **Woodrow Wilson, Franklin Roosevelt, Jack Kennedy, Johnson, Rusk, McNamara, Fulbright, George Bush** etc., as prime examples. In addition, while **Karl Marx** was writing the "**Communist Manifesto**" under the director of one group of **Illuminists, Professor Karl Ritter** of **Frankfurt University** was writing the **antithesis** under the direction of another group. The idea was that those who direct the overall conspiracy could use the differences in those two so-called ideologies to enable them to divide larger and larger members of the human race into opposing camps so that they could be armed and then brainwashed into fighting and destroying each other. And particularly, to destroy all political and religious institutions. The work **Ritter** started was continued after his death and completed by the **German** so-called philosopher **Freidrich Wilhelm Nietzache** who founded **Nietzscheanism.** This **Nietzecheanism** was later developed into **Fascism** and then into **Nazism** and was used to foment **World War I and II.**

"In 1834; the Italian revolutionary leader, **Guiseppe Mazzini,** was selected by the **Illuminati** to direct their revolutionary program throughout the world. He served in that capacity until he died in 1872, but some years before he died; **Mazzini** had enticed an American General named **Albert Pike** into the **Illuminati.** **Pike** was fascinated by the idea of a one-world government and ultimately he became the head of this luciferian conspiracy. Between 1859 and 1871 he, **Pike,** worked out a military blueprint for three world wars and various revolutions throughout the world which he considered would forward the

conspiracy to its final stage in the 20th century. Again I remind you that these conspirators were never concerned with immediate success. They also operated on a long-range view. **Pike** did most of his work in his home in **Little Rock, Arkansas**. But a few years later; when the **Illuminati's Lodges of the Grand Orient** became suspect and repudiated because of **Mazzini's** revolutionary activities in **Europe**, **Pike** organized what he called the **New and Reformed Palladian Right**. He set up three Supreme Councils; one in **Charleston, South Carolina**, one in **Rome, Italy**, and a third in **Berlin, Germany**. He had **Mazzini** establish 23 subordinate councils in strategic locations throughout the world. These have been the secret headquarters of the world revolutionary movement ever since.

"Long before **Marconi** invented the **radio**; the scientists in the **Illuminati** had found the means for **Pike** and the heads of his councils to communicate secretly. It was the discovery of that secret that enabled intelligence officers to understand how apparently unrelated incidents, such as the assassination of an **Austrian Prince** at **Serbia**, took place simultaneously throughout the world which developed into a war or a revolution. **Pike's plan** was as simple as it has proved effective. It called for **communism, nazism, political zionism**, and other international movements to be organized and used to foment three global world wars and at least two major revolutions.

"The first world war was to be fought so as to enable the **Illuminati** to destroy **Czarism** in **Russia**, as vowed by **Rothschild** after the **Czar** had torpedoed his scheme at the **Congress in Vienna**, and to transform **Russia** into a stronghold of **atheistic communism**. The differences stirred up by agents of the **Illuminati** between the **British** and **German Empires** were to be used to foment this war. After the war would be ended; **communism** was to be built up and used to destroy other governments and weaken religions.

"**World War II**, when and if necessary, was to be fomented by using the controversies between **Fascists** and **political zionists**, and here let it be noted that **Hitler** was financed by **Krupp**, the **Warburgs**, the **Rothschilds**, and other **internationalist bankers** and that the slaughter of the supposed 600,000 Jews by **Hitler** didn't bother the Jewish internationalist bankers at all. That slaughter was necessary in order to create worldwide hatred of the **German** people and thus bring about war against them. In short; this second world war was to be fought to destroy **nazism** and increase the power of **political zionism** so that the **state of Israel** could be established in **Palestine**.

"During this **World War II**; **international communism** was to be built up until it equalled in strength to that of the **united Christendom**. When it reached that point; it was to be contained and kept in check until required for the final social cataclysm. As we know now; **Roosevelt, Churchill, and Stalin** put that exact policy into effect and **Truman, Eisenhower, Kennedy, Johnson, and George Bush** continued that same exact policy.

"**World War III** is to be fomented by using the so-called controversies, the agents of the **Illuminati** operating under whatever new name, as are now being stored up between the **political Zionists** and the leaders of the **Moslem world**. That war is to be directed in such a manner that all of **Islam** and **political Zionism (Israel)** will destroy each other while at the same time; the remaining nations once more

divided on this issue will be forced to fight themselves into a state of complete exhaustion; physically, mentally, spiritually, and economically.

"Now can any thinking person doubt that the intrigue now going on in the near **Middle** and **far East** is designed to accomplish that satanic objective? **Pike** himself foretold all this in a statement he made to **Mazzini** on August 15, 1871. **Pike** stated that after **World War III** is ended; those who will aspire to undisputed world domination will provoke the greatest social cataclysm the world has ever known. Quoting his own words taken from the letter he wrote to **Mazzini** and which letter is now catalogued in the **British Museum** in **London, England**; he said:

"We shall unleash the **nihilists** and the **atheists** and we shall provoke a great social cataclysm which in all its horror will show clearly to all nations the effect of absolute **atheism**; the origins of savagery and of most bloody turmoil. Then everywhere, the people will be forced to defend themselves against the world minority of the world revolutionaries and will exterminate those destroyers of civilization and the multitudes disillusioned with **Christianity** whose spirits will be from that moment without direction and leadership and anxious for an ideal, but without knowledge where to send its adoration, will receive the true light through the universal manifestation of the pure doctrine of **Lucifer** brought finally out into public view. A manifestation which will result from a general reactionary movement which will follow the destruction of **Christianity** and **Atheism**; both conquered and exterminated at the same time."

"When **Mazzini** died in 1872; **Pike** made another revolutionary leader named **Adrian Lemmy**; his successor. **Lemmy**, in turn, was succeeded by **Lenin** and **Trotsky**, then by **Stalin**. The revolutionary activities of all those men were financed by **British, French, German, and American international bankers**; all of them dominated by the **House of Rothschilds**. We are supposed to believe that the **international bankers** of today, like the money changers of **Christ's** day, are only the tools or agents of the great conspiracy, but actually they are the masterminds behind all the mass communications media leading us into believing that **communism** is a movement of the so-called **workers**; the actual fact is that both **British** and **American** intelligence officers have authentic documentary evidence that **international liberals**, operating through their international banking houses; particularly the **House of Rothschilds**, have financed both sides of every war and revolution since 1776.

"Those who today comprise the conspiracy (the **CFR** in the **United States**); direct our governments whom they hold in usury through such methods as the **Federal Reserve System** in **America** to fight wars, such as **Vietnam** (created by the **United Nations**), so as to further **Pike's Illuminati plans** to bring the world to that stage of the conspiracy when **atheistic communism** and the whole of **Christianity** can be forced into an all out third world war within each remaining nation as well as on an international basis scale.

"The headquarters of the great conspiracy in the late 1700's was in **Frankfurt, Germany** where the **House of Rothschild** had been established by **Mayar** (or **Mayer**) **Amschel** who adopted the **Rothschild**

name and linked together other international financiers who had literally sold their souls to the devil. After the **Bavarian government's** exposure in 1786; the conspirators moved their headquarters to **Switzerland** then to **London**. Since World War II (after **Jacob Schiff**, the **Rothschild's boy in America** died); the headquarters of the **American branch** has been in the **Harold Pratt Building in New York City** and the **Rockefellers**, originally proteges of **Schiff**, have taken over the manipulation of finances in **America** for the **Illuminati**.

"In the final phases of the conspiracy; the one-world government will consist of the king-dictator; the head of the **United Nations**, the **CFR**, and a few billionaires, economists, and scientists who have proved their devotion to the great conspiracy. All others are to be integrated into a vast conglomeration of mongrolized humanity; actually slaves. Now let me show you how our federal government and the American people have been sucked into the one-world take over plot of the **Illuminati** great conspiracy and always bear in mind, that the **United Nations** was created to become the housing for that one-world, so-called, **liberal conspiracy**. The real foundations of the plot of the takeover of the **United States** were laid during the period of our **Civil War**. Not that **Weishaupt** and the earlier masterminds had ever overlooked the new world, as I have previously indicated; **Weishaupt** had his agents planted over here as far back as the **Revolutionary War**, but **George Washington** was more than a match for them.

"It was during the Civil War that the conspirators launched their first concrete efforts. We know that **Judah Benjamin**, chief advisor of **Jefferson Davis**, was a **Rothschild agent**. We also know that there were **Rothschild agents** planted in **Abraham Lincoln's cabinet** who tried to sell him into a financial dealing with the **House of Rothschild**. But old **Abe** saw through the scheme and bluntly rejected it thereby incurring the undying enmity of the **Rothschilds**; exactly as the **Russian Czar** did when he torpedoed their first **League of Nations** at the **Congress in Vienna**. Investigation of the assassination of **Lincoln** revealed that the assassin **Booth** was a member of a secret conspiratorial group. Because there were a number of highly important government officials involved; the name of the group was never revealed and it became a mystery; exactly as the assassination of **Jack Kennedy** is still a mystery. But I am sure it will not remain a mystery for long. Anyway; the ending of the **Civil War** destroyed temporarily all chances of the **House of Rothschilds** to get a clutch on our money system; such as they had acquired in **Britain** and other nations in **Europe**. I say temporarily because the **Rothschilds** and the masterminds of the conspiracy never quit so they had to start from scratch; but they lost no time in getting started.

"Shortly after the **Civil War**; a young immigrant, who called himself **Jacob H. Schiff**, arrived in **New York**. **Jacob** was a young man with a mission for the **House of Rothschild**. **Jacob** was the son of a **Rabbi** who was born in one of the **Rothschild's houses** in **Frankfurt, Germany**. I will go deeply into his background. The important point was that **Rothschild** recognized in him not only a potential money wizard; but more important, he also saw the latent Machiavellian qualities in **Jacob** that could, as it did, make him an invaluable functionary in the great one-world conspiracy. After a comparatively brief training period in the **Rothschild's London Bank**; **Jacob** left for **America** with instructions to buy into a banking house which was to be the springboard to acquire control of the money system of the **United States**. Actually; **Jacob** came here to carry out four specific assignments.

And most important, was to acquire control of America's money system.

Find desirable men, who for a price, would be willing to serve as stooges for the great conspiracy and promote them into high places in our federal government, our Congress, and the U.S. Supreme Court, and all federal agencies.

Create minority group strife throughout the nations; particularly between the whites and blacks.

Create a movement to destroy religion in the United States; but Christianity to be the chief target.

"Earlier I stated that **Jacob Schiff** came to **America** with orders by **Rothschild** to carry out four specific directives. The first and most important one was to get control of the **United States' money system**. Let's trace **Schiff's** step to accomplish that directive. As a first step he had to buy into a banking house; but it had to be the kind of a house that he could absolutely control and mold for that primary objective of entrapping our **U.S. money system**. After carefully scouting around; **Jacob** bought a partnership in a firm that called itself: "**Kuhn and Loeb**." Like **Schiff**; **Kuhn and Loeb** were immigrants from **German Jewish ghettos**. They came to the **U.S.** in the mid 1840's and both of them started their business careers as itinerant pack peddlers. In the early 1850's; they pooled their interests and set up a merchandise store in **Lafayette, Indiana** under the firm name of "**Kuhn and Loeb**" servicing the covered wagon settlers on their way west. In the years that followed; they set up similar stores in **Cincinnati** and **St. Louis**. Then they added "**pawn broking**" to their merchandising pursuits. From that to money lending was a short and quick step.

"By the time **Schiff** arrived on the scene; "**Kuhn and Loeb**" was a well-known private banking firm and this is the firm **Jacob** bought into. Shortly after he became a partner in "**Kuhn and Loeb**;" **Schiff** married **Loeb's daughter, Teresa**, then he bought out **Kuhn's** interests and moved the firm to **New York** and "**Kuhn and Loeb**" became "**Kuhn, Loeb, and Company**;" international bankers with **Jacob Schiff**, agent of the **Rothschilds**, ostensibly the sole owner. And throughout his career; this blend of Judas and Machiavelli, the first heirarch of the **Illuminati's great conspiracy in America**, posed as a generous philanthropist and a man of great holiness; the cover-up policy set forth by the **Illuminati**.

"As I have stated; the first great step of the conspiracy was to be the entrapment of our money system. To achieve that objective; **Schiff** had to get full cooperation of the then big banker elements in **America**; and that was easier said than done. Even in those years; **Wall Street** was the heart of the American money mart and **J.P. Morgan** was its dictator. Next in line were the **Drexels** and the **Biddles** of **Philadelphia**. All the other financiers, big and little, danced to the music of those three houses; but particularly to that of **Morgan**. All of those three were proud, haughty, arrogant potentates.

"For the first few years; they viewed the little bewhiskered man from the **German ghettos** with utter contempt; but **Jacob** knew how to overcome that. He threw a few **Rothschild** bones to them. Said bones being distribution in **America** of desirable **European stock** and **bond issues**. Then he discovered that he had a still more potent weapon in his hands in the following.

"It was in the decades following our **Civil War** that our industries began to burgeon. We had great railroads to build. The oil, mining, steel, textile industries were bursting out of their swaddling clothes. All of that called for vast financing; much of that financing had to come from abroad. That meant the **House of Rothschild** and that was when **Schiff** came into his own. He played a very crafty game. He became the patron saint of **John D. Rockefeller**, **Edward R. Harriman**, and **Andrew Carnegie**. He financed the **Standard Oil Company** for **Rocky**, the **Railroad Empire** for **Harriman**, and the **Steel Empire** for **Carnegie**. But instead of hogging all the other industries for **Kuhn, Loeb, and Company**, he opened the doors of the **House of Rothschild** to **Morgan, Biddle, and Drexel**. In turn; **Rothschild** arranged the setting up of **London, Paris, European** and other branches for those three; but always in partnerships with **Rothschild** subordinates and **Rothschild** made it very clear to all those men that **Schiff** was to be the boss in **New York**.

"Thus at the turn of the century **Schiff** had a tight control of the entire banking fraternity on **Wall Street** which by then, with **Schiff's** help, included **Lehman brothers**, **Goldman-Sachs**, and other **internationalist banks** that were headed by men chosen by the **Rothschilds**. In short; that meant control of the nation's money powers and he was then ready for the giant step - the entrapment of our national money system.

"Now under our **Constitution**; all control of our money system is vested solely in our **Congress**. **Schiff's** next important step was to seduce our **Congress** to betray that Constitutional edict by surrendering that control to the hierarchy of the **Illuminati's** great conspiracy. In order to legalize that surrender and thus make the people powerless to resist it, it would be necessary to have **Congress** enact special legislation. To accomplish that; **Schiff** would have to infiltrate stooges into both houses of **Congress**. Stooges powerful enough to railroad Congress into passing such legislation. Equally or even more important; he would have to plant a stooge in the **White House** a president that is without integrity and without scruples who would sign that legislation into law. To accomplish that he had to get control of either the **Republican** or the **Democratic Party**. The **Democratic Party** was the more vulnerable; it was the hungrier of the two parties. Except for **Grover Cleveland**; the **Democrats** had been unable to land one of their men in the **White House** since before the **Civil War**. There were two reasons for that:

Poverty of the Party.

There were considerably more Republican-minded voters than Democrats.

"The poverty matter was not a great problem but the voter problem was different story. But as I previously said; **Schiff** was a smart cookie. Here is the atrocious and murderous method he employed to solve that voter problem. His solution emphasizes how very little the **Jewish** internationalist bankers care about their own racial brethren as you shall see. Suddenly; around 1890, there broke out a nationwide series of **pogroms** in **Russia**. Many, many, thousands of innocent **Jews**; men, women, and children were slaughtered by the **Cossacks** and other peasants. Similar **pogroms** with similar slaughter of innocent Jews broke out in **Poland, Rumania, and Bulgaria**. All those **pogroms** were fomented by **Rothschild agents**. As a result; the **Jewish** terrified refugees from all of those nations swarmed into the

United States and that continued throughout the next two or three decades because the pogroms were continuous through all those years. All those refugees were aided by self-styled humanitarian committees set up by **Schiff**, the **Rothschilds**, and all the **Rothschild affiliates**.

"In the main; the refugees streamed into **New York**, but the **Schiff-Rothschild humanitarian committees** found ways to shuffle many of them into other large cities such as **Chicago, Boston, Philadelphia, Detroit, Los Angeles**, etc.. All of them were quickly transformed into "**naturalized citizens**" and educated to register as **Democrats**. Thus all of that so-called minority group became solid **Democratic** voter blocks in their communities all controlled and maneuvered by their so-called benefactors. And shortly after the turn of the century; they became vital factors in the political life of our nation. That was one of the methods **Schiff** employed to plant men like **Nelson Aldrich** in our **Senate** and **Woodrow Wilson** in the **White House**.

"At this point let me remind you of another one of the important jobs that was assigned to **Schiff** when he was dispatched to **America**. I refer to the job of destroying the unity of the American people by creating minority group and racial strife. By the pogrom-driven **Jewish refugees** into **America**; **Schiff** was creating a ready-made **minority group** for that purpose. But the **Jewish people**, as a whole, made fearful by the **pogroms**, could not be depended upon to create the violence necessary to destroy the unity of **American people**. But right within **America**; there was an already made-to-order, although as yet, a sleeping minority group, the **Negroes**, who could be sparked into so-called demonstrations, rioting, looting, murder, and every other type of lawlessness - all that was necessary, was to incite and arouse them. Together; those two minority groups, properly maneuvered, could be used to create exactly the **King of Strife** in **America** the **Illuminati** would need to accomplish their objective.

"Thus at the same time that **Schiff** and co-conspirators were laying their plans for the entrapment of our money system; they were also perfecting plans to hit the unsuspecting American people with an explosive and terrifying racial upheaval that would tear the people into hate fractions and create chaos throughout the nation; especially on all college and university campuses; all protected by **Earl Warren decisions** and our so-called leaders in **Washington D.C.** (Remember the **Warren commission** on the assassination of **President Jack (John) F. Kennedy***). Of course; perfecting those plans require time and infinitely patient organizing.

* **NOTE:**

Jack Kennedy, during his term of office as the **President** of the **United States**, became a **Christian**. In his attempt to "repent," he tried to inform the people of this Nation (at least twice) that the **Office of the President of the United States** was being manipulated by the **Illuminati/CFR**. At the same time, he put a stop to the "**borrowing**" of **Federal Reserve Notes** from the **Federal Reserve Bank** and began issuing **United States Notes** (which was interest free) on the credit of the **United States**. It was the issuing of the **United States Notes** that caused **Jack Kennedy** to be "assassinated."

Upon the taking the **Oath of Office**; **Lynden B. Johnson** stopped the issuing of the **United States Notes** and went back to borrowing **Federal Reserve Bank Notes** (which was loaned to the people of the United States at the going rate of interest of 17%). The **US Notes**, that was issued under **John F. Kennedy**, was of the 1963 series which bore a **"Red" seal** on the face of the **"Note."**

"Now to remove all doubts; I'll take a few moments to give you the documentary proof of this racial strife plot. First of all they had to create the leadership and organizations to draw in millions of dupes, both **Jewish** and **Negroes**, who would do the demonstrating and commit the rioting, looting, and lawlessness. So in 1909; **Schiff**, the **Lehmans**, and other conspirators, organized and set up the **"National Association for the Advancement of the Colored People"** known as the **"NAACP."** The presidents, directors, and legal councils of the **NAACP** were always **"white men Jews"** appointed by **Schiff** and this is the case to this very day.

"Then in 1913; the **Schiff group** organized the **"Anti-defamation League of the B'nai B'rith"** commonly known as the **"ADL"** to serve as the **gestapo** and **hatchet man** outfit for the entire great conspiracy. Today the sinister **"ADL"** maintains over 2,000 agencies in all parts of our country and they advise and completely control every action of the **"NAACP"** or of the **"Urban League"** of all the other so-called **Negro civil rights organizations** throughout the nation including such leaders as **Martin Lucifer King**, **Stockely Carmichael**, **Barnard Rustin**, and others of the ilk. In addition; the **"ADL"** acquired absolute control of the advertising budgets of many department stores, hotel chains, and TV and Radio industrialist sponsors, also advertising agencies in order to control practically all the mass communications media and force every loyal newspaper to slant and falsify the news and to further incite and at the same time create sympathy for the lawlessness and violence of the **Negro mobs**. Here is documentary proof of the beginning of their deliberate plot to foment the **Negroes** into all their lawlessness.

"Around 1910; one **Israel Zengwill** wrote a play entitled **"The Melting Pot."** It was sheer propaganda to incite the **Negroes** and **Jews** because the play purportedly visualized how the **American people** were discriminating against and persecuting **Jews** and **Negroes**. At that time nobody seemed to realize that it was a propaganda play. It was that cleverly written. The propaganda was well wrapped up in the truly great entertainment in the play and it was a big Broadway Hit.

"Now in those years, the legendary **Diamond Jim Brady** used to throw a banquet at the famous **Delmonico Restaurant** in **New York** after the opening performance of a popular play. He threw such a party for the cast of **"The Melting Pot,"** its author, producer, and chosen Broadway celebrities. By then I'd already made a personal mark on the Broadway Theater and was invited to that party. There I met **George Bernard Shaw** and a **Jewish writer** named **Israel Cohen**. **Zangwill**, **Shaw**, and **Cohen** were the ones who created the **Fabian Society** in **England** and had worked closely with a **Frankfurt Jew** named **Mordicai** who had changed his name to **Karl Marx**; but remember, at that time both **Marxism** and **Communism** were just emerging and nobody paid much attention to either and nobody suspected the propaganda in the writings of those three really brilliant writers.

[Return to the first page...](#)

"At that banquet; **Israel Cohen** told me that he was then engaged in writing a book which was to be a follow-up on **Zangwill's "The Melting Pot."** The title of his book was to be "**A Racial Program for the 20th Century.**" At that time I was completely absorbed by my work as a playwright, and significant as that title was, its real objective never dawned on me nor was I interested in reading the book. But it suddenly hit me with the force of a hydrogen bomb when I received a newspaper clipping of an item published by the **Washington D.C. Evening Star** in May 1957. That item was a verbatim reprint of the following excerpt in **Israel Cohen's book "A Racial Program for the 20th Century"** and it read as I quote:

"We must realize that our party's most powerful weapon is racial tension. By propounding into the consciousness of the dark races that for centuries that they have been oppressed by the whites, we can move them to the program of the communist party. In America; we will aim for subtle victory. While inflaming the Negro minority against the whites; we will instill in the whites a guilt complex for their exploitation of the Negroes. We will aid the Negroes to rise to prominence in every walk of life, in the professions, and in the world of sports and entertainment. With this prestige; the Negro will be able to intermarry with the whites and begin a process which will deliver America to our cause."

Record of June 7, 1957; by **Representative Thomas G. Abernethy.**

"Thus the authenticity of that passage in **Cohen's book** was fully established. But the one question that remained in my mind was whether it represented the official policy or plot of the **Communist Party** or just a personal expression of **Cohen** himself. Hence I sought more proof and I found it in an official pamphlet published in 1935 by the **New York Communist Party's official Workers Library Publishers.** That pamphlet was entitled: "**The Negroes in a Soviet America.**" It urged the **Negroes** to rise up; form a soviet state in the south, and apply for admission to the **Soviet Union.** It contained a firm pledge that the revolt would be supported by all **American "reds"** and all so-called "**liberals.**" On page 38; it promised that a Soviet government would confer greater benefits to **Negroes** than to whites and again this official communist pamphlet pledged that; I quote: "**any act of discrimination of prejudice against a Negro will become a crime under the revolutionary law.**" That statement proved that the excerpt in **Israel Cohen's book** published in 1913 was an official edict of the **Communist Party** and directly in line with the **Illuminati** blueprint for world revolution issued by **Weishaupt** and later by **Albert Pike.**

"Now there's only one question and that is to prove that the communist regime is directly controlled by the **American Jacob Schiff** and **London Rothschild** masterminds of the great conspiracy. A little later I will provide that proof that will remove even a remote doubt that the **Communist Party**, as we know it, was created by those masterminds (capitalists if you will note); that **Schiff**, the **Warburgs**, and the **Rothschilds** planned and financed the entire **Russian Revolution**, the murder of the **Czar** and his family, and that **Lenin**, **Trotsky**, and **Stalin** took their orders directly from **Schiff** and the other

capitalists whom they supposedly are fighting.

"Now can you see why the vile **Earl Warren** and his equally vile co-Supreme Court justices issued that infamous and treasonous **desegregation decision** in 1954? It was to aid and abet the plot of the **Illuminati** conspirators to create tension and strife between the **Negroes** and **Whites**. Can you see why the same **Earl Warren** issued his decision prohibiting **Christian prayers** and **Christmas carols** in our schools? Why **Kennedy** did likewise? And can you see why **Johnson** and **66 Senators**, despite the protests of 90% of the American people, voted for the "**Consular Treaty**" which opens our entire country to **Russian spies** and **saboteurs**? All those **66 Senators** are 20th century **Benedict Arnolds**.

"It is up to you and you, all of the American people, to force **Congress**, our elected servants, to haul in those American traitors for impeachments and that when proven guilty; they all be given the punishment prescribed for traitors who aid and abet our enemies. And that includes the enforcing of rigid investigations by **Congress** of the "**CFR**" and all their fronts, such as the "**ADL**," the "**NAACP**," "**SNIC**," and such **Illuminati** tools as **Martin Lucifer King**. Such investigations will completely unmask all the leaders in **Washington, D.C.** and the **Illuminati** and all their affiliations and affiliates as traitors carrying out the **Illuminati** plot. It will completely unmask the **United Nations** as the intended crux of the entire plot and force **Congress** to take the **U.S.** out of the **U.N.** and hurl the **U.N.** out of the **U.S.** In fact; it will destroy the **U.N.** and the entire plot.

"Before I close this phase; I wish to reiterate and stress one vital point which I urge you to never forget if you wish to save our country for your children and their children. Here is the point. Every unconstitutional and unlawful act committed by **Woodrow Wilson**, by **Franklin Roosevelt**, by **Truman**, **Eisenhower**, and **Kennedy** and are now being committed by **Johnson** (and today; **George Bush** and **Bill Clinton**) is exactly in line with the **Illuminati** conspirators centuries old plot outlined by **Weishaupt** and **Albert Pike**. Every vicious decision issued by the traitorous **Earl Warren** and his equally traitorous **Supreme Court justices** was directly in line with what the **Illuminati** blueprint required. That all the treason committed by our **State Department** under **Rusk** and earlier by **John Foster Dulles**, and **Marshall**, also all the treason committed by **McNamara** and his predecessors is directly in line with that same **Illuminati** blueprint for the takeover of the world. Also the amazing treason by various members of our **Congress**, especially by the **66 Senators** who signed for the **Consular Treaty**, has been committed on orders from the **Illuminati**.

"Now I will go back to **Jacob Schiff's** entrapment of our money system and the treasonous actions that followed. It will also reveal the **Schiff-Rothschild** control of not only **Karl Marx**; but of **Lenin**, **Trotsky**, and **Stalin**, who created the revolution in **Russia** and set up the **Communist Party**.

"It was in 1908 that **Schiff** decided that the time had come for his seizure of our money system. His chief lieutenants in that seizure were **Colonel Edward Mandell House** whose entire career was that of chief executive and courier for **Schiff** as I shall show and **Bernard Berouk** and **Herbert Lehman**. In the fall of that year; they assembled in secret conclave at the **Jeckle Island Hunt Club**, owned by **J.P. Morgan** at **Jeckle Island, Georgia**. Among those present were **J.P. Morgan**, **John B. Rockefeller**,

Colonel House, Senator Nelson Aldrich, Schiff, Stillman and Vandlelip of the New York National City Bank, W. and J. Seligman, Eugene Myer, Bernard Berouk, Herbert Lehman, Paul Warburg, in short; all of the **international bankers in America.** All of them members of the hierarchy of the **Illuminati's** great conspiracy.

"A week later they emerged with what they called the **Federal Reserve System.** **Senator Aldrich** was the stooge who was to railroad it through **Congress,** but they held that railroading in abeyance for one chief reason; they would first have to plant their man and obedient stooge in the **White House** to sign the **Federal Reserve Act** into law. They knew that even if the Senate would pass that act unanimously; the then newly elected **President Taft** would promptly veto it. So they waited.

"In 1912; their man, **Woodrow Wilson,** was elected to the presidency. Immediately after **Wilson** was inaugurated; **Senator Aldrich** railroaded the **Federal Reserve Act** through both houses of **Congress** and **Wilson** promptly signed it and the **Federal Reserve Act** became law. That heinous act of treason was committed in **December 23, 1913;** two days before **Christmas** when all the members of **Congress,** except for several carefully picked **Representatives** and three equally carefully picked **Senators,** were away from Washington. How heinous treasonous was that act? I'll tell you. Our founding fathers knew full well the power of money. They knew that whoever had that power held the destiny of our nation in his hands. Therefore; they carefully guarded this power when they set forth in the **Constitution** that **Congress,** the elected representatives of the people, alone would have the power. The **Constitutional** language on this point is brief, concise, and specific, stated in **Article I, Section 8, Paragraph 5,** defining the duties and powers of Congress, and I quote: "**to coin money, regulate the value thereof, and of foreign coin, and the standard of weights and measures.**" But on that tragic, unforgettable day of infamy; **December 23, 1913,** the men we sent to **Washington** to safeguard our interests; the **Representatives, Senators, and Woodrow Wilson,** delivered the destiny of our nation into the hands of two aliens from **Eastern Europe; Jacob Schiff and Paul Warburg.** **Warburg** was a very recent immigrant who came here on orders from **Rothschild** for the express purpose of blueprinting that foul **Federal Reserve Act.**

"Now the vast majority of the American people think that the **Federal Reserve System** is an **United States Government** owned **agency.** That is positively false. All of the stock of the federal reserve banks is owned by the member banks and the heads of the member banks are all members of the hierarchy of the great Illuminati conspiracy known today as the "**CFR.**"

"The details of that act of treason, in which many traitorous so-called Americans participated, are far too long for this reporting; but all those details are available in a book entitled, "**The Federal Reserve Conspiracy,**" written by **Eustace Mullins.** In that book; **Mullins** tells the entire horrifying story and backs it up with unquestionable documentations. Aside from it being a truly fascinating and shocking story of that great betrayal; every **American** should read it as a matter of vital intelligence for the time when the whole American people will finally come awake and smash the entire conspiracy and with God's help; that awakening will surely come.

"Now if you think that those aliens and their by accident-of-birth American co-conspirators would be content with just the control of our money system; you are in for another very sad shock. The **Federal Reserve System** gave the conspirators complete control of our money system; but it in no way touched the earnings of the people because the Constitution positively forbids what is now known as the 20%+ withholding tax. But the **Illuminati** blueprint for one world enslavement called for the confiscation of all private property and control of individual earning powers. This, and **Karl Marx** stressed that feature in his blueprint, had to be accomplished by a **progressive graduated income tax**. As I have stated; such a **tax** could not lawfully be imposed upon the American people. It is succinctly and expressly forbidden by our **Constitution**. Thus; only an **Amendment** to the **Constitution** could give the federal government such confiscatory powers.

"Well; that to was not an insurmountable problem for our Machiavellian plotters. The same elected leaders in both houses of **Congress** and the same **Mr. Woodrow Wilson**, who signed the infamous **Federal Reserve Act** into law, amended the **Constitution** to make the **federal income tax**, known as the **16th Amendment**, a law of the land. Both are illegal under our **Constitution**. In short; the same traitors signed both betrayals, the **Federal Reserve Act** and the **16th Amendment**, into law. However; it seems that nobody ever realized that the **16th amendment** was set up to rob, and I do mean rob, the people of their earnings via the **income tax** provision.

"The plotters didn't fully use the provision until **World War II** when that great humanitarian **Franklin Roosevelt** applied a **20% withholding tax** on all small wage earners and up to **90% on higher incomes**. Oh, of course; he faithfully promised that it would be only for the duration of the war; but what was a promise to such a charlatan who in 1940, when he was running for his third term, kept proclaiming: "**I say again and again and again that I will never send American boys to fight on foreign soil.**" Remember; he was proclaiming that statement even as he was already preparing to plunge us into **World War II** by enticing the **Japanese** into that sneak attack on **Pearl Harbor** to furnish him with his excuse.

"And before I forget; let me remind you that another charlatan named **Woodrow Wilson** used exactly that same **campaign slogan** in 1916. His slogan was: "**Reelect the man who will keep your sons out of the war;**" exactly the same formula, exactly the same promises. But wait; as **Al Jolson** used to say: "**you ain't heard nothin' yet.**" That **16th Amendment** income tax trap was intended to confiscate and rob the earnings of the common herd; you and me. It was not intended to even touch the huge incomes of the **Illuminati gang**, the **Rockefellers**, the **Carnegies**, the **Lehmans**, and all the other conspirators.

"So together, with that **16th Amendment**; they created what they called the "**tax-free foundations**" that would enable the conspirators to transform their huge wealth into such so-called "**foundations**" and avoid payment of virtually all income taxes. The excuse for it was that the earnings of those "**tax-free foundations**" would be devoted to humanitarian philanthropy. So we now have the several **Rockefeller foundations**, the **Carnegie and Dowman Fund**, the **Ford foundation**, the **Mellon foundation**, and hundreds of similar "**tax-free foundations.**"

"And what kind of philanthropy do these foundations support? Well; they finance all the civil rights groups (and conservation movements) that are creating all the chaos and rioting all over the country. They finance the **Martin Lucifer Kings**. The **Ford foundation** finances the "**Center for the Study of Democratic Institutions**" in **Santa Barbara**, commonly referred to as **Moscow West**, and which is headed by **Wonder Boy Hutchens, Walter Ruther, Erwin Cahnam** and others of that ilk.

"In short; the "**tax-free foundations**" financed those who are doing the job for the **Illuminati's** great conspiracy. And what are the hundreds of billions of dollars they confiscate every year from the earnings of the common herd, you and me, used for? Well; for one thing, there is the "**foreign aid**" gimmick which gave billions to **communist Tito** plus gifts of hundreds of jet planes; many of which were turned over to **Castro**, plus the costs of training **communist pilots** so that they can better shoot down our planes. Billions to **red Poland**. Billions to **India**. Billions to **Secarno**. Billions to other **enemies** of the **United States**. That's what that treasonous railroaded **16th Amendment** has done to our nation and to the American people, to you and to me, to your children and their children.

"Our **CFR Illuminati-controlled** federal government can grant "**tax-free status**" to all **foundations** and **pro-red one world outfits**, such as the "**Fund for the Republic**." But if you or a patriotic pro-organization is too outspokenly pro American; they can terrify and intimidate you by finding a misplaced comma in your income tax report and by threatening you with penalties, fines, and even prison. Future historians will wonder how the American people could have been so naive and stupid as to have permitted such audacious brazen acts of treason as the "**Federal Reserve Act**" and the "**16th Amendment**." Well; they were not naive and they were not stupid. The answer is they trusted the men they elected to safeguard our country and our people and they just didn't have even an inkling about either betrayal until after each one had been accomplished.

"It was the **Illuminati-controlled mass communications media** that has kept and is keeping our people naive and stupid and unaware of the treason being committed. Now the great question is: "when will the people wake up and do to our traitors of today what **George Washington** and our founding fathers would have done to **Benedict Arnold**?" Actually; **Benedict Arnold** was a petty traitor compared to our present traitors in **Washington D.C.**. Now let's go back to the events that followed the rape of our **Constitution** by the passage of the **Federal Reserve Act** and the **16th Amendment**. Was **Wilson** completely under their control?

"The masterminds of the great conspiracy put in motion their next and what hoped would be their final steps to achieve their **one-world government**. The first of those steps was to be **World War I**. Why War? Simple; the only excuse for a one-world government was that it will supposedly ensure peace. The only thing that can make people cry for peace is war. War brings chaos, destruction, exhaustion, to the winner as well as to the loser. It brings economic ruin to both. Most important; it destroys the flower of the young manhood of both. To the saddened and heartbroken oldsters (the mothers and fathers) who are left with nothing but memories of their beloved sons; peace becomes worth any price and that is the emotion upon which the conspirators depend for the success of their satanic plot.

"Throughout the 19th century, from 1814 to 1914; the world, as a whole, was at peace. Such wars as the **"Franco-Prussian,"** our own **"Civil War,"** the **"Russo-Japanese War,"** were what might be termed **"local disturbances"** that did not affect the rest of the world. All the great nations were prosperous and the people were staunchly nationalistic and fiercely proud of their sovereignties. It was utterly unthinkable that the French and the German peoples would be willing to live under a **"one-world government"** or the **"Toks"** and the **"Russians,"** the **"Chinese,"** or the **"Japanese."** Even more unthinkable is that a **Kaiser Wilhelm** or a **Franz Joseph** or a **Czar Nicholas** or any Monarch would willingly and meekly surrender his throne to a one-world government. But bear in mind that the peoples in all nations are the real power and the only thing: **"war"** could make the peoples yearn and clamor for **"peace"** ensuring a **one-world government.** But it would have to be a frightful and horribly devastating war. It could not be just a local disturbing war between just two nations; it would have to be a **"world war."** No major nation must be left untouched by the horrors and devastation of such a war. The cry for **"peace"** must be made universal.

"Actually that was the format set by the **Illuminati** and **Nathan Rothschild** at the turn of the 19th century. They first maneuvered all of **Europe** into the **"Napoleonic Wars,"** then the **"Congress in Vienna"** which they, and particularly **Rothschild,** planned to transform into a **"League of Nations"** which was to have been the housing for their **one-world government;** exactly as the present **"United Nations"** was set up to be the housing for the forthcoming, God forbid, **one-world government.** Anyway; that was the format the **House of Rothschild** and **Jacob Schiff** decided to employ to achieve their objective in 1914. Of course they knew that the same format had failed in 1814; but they theorized that this was only because the **Czar of Russia** had torpedoed that scheme. Well; the present 1914 conspirators would eliminate that 1814 fly in the ointment. They'd make sure that after the new world war that they were conspiring; there'd be no **Czar of Russia** around to throw monkey wrenches into the machinery.

"I will go into how they accomplished this first step to launch a world war. History records that **World War I** was precipitated by a trivial incident; the kind of incident both **Weishaupt** and **Albert Pike** had incorporated in their blueprints. That incident was the assassination of an **Austrian Archduke** arranged by the **Illuminati** masterminds. The war followed. It involved **Germany, Austria, Hungary,** and their **allies,** so-called the **"Axis powers,"** against **France, Britain, and Russia,** called the **"Allies."** Only the **United States** was not involved during the first two years.

"By 1917 the conspirators had achieved their primary objective; all of **Europe** was in a state of destitution. All the peoples were war weary and crying for peace and the outcome too was all set. It was to come as soon as the **United States** would be hurled on the side of the **Allies** and that was all set to happen immediately after **Wilson's** re-election. After that, there could be only one outcome; complete victory for the **Allies.** To fully confirm my statement that long before 1917; the conspiracy, headed in **America** by **Jacob Schiff,** had it all set to hurl the **United States** into that war. I will cite the proof.

"When **Wilson** was campaigning for re-election in 1916; his chief appeal was: **"re-elect the man who will keep your sons out of the war."** But during that same campaign; the **Republican Party** publicly charged that **Wilson** had long committed himself to throw us into the war. They charged that if he would

be defeated he would accomplish that act during his few remaining months in office; but if re-elected, he would hold off until after the election. But at that time the **American people** looked upon **Wilson** as a "**God-man.**" Well; **Wilson** was re-elected and as per the schedule of the conspirators; he hurled us into the war in 1917. He used the **sinking of the Lusitania** as an excuse; a sinking which also was prearranged. **Roosevelt**, also a God-man in the eyes of the American people, followed the same technique in 1941 when he used the prearranged **Pearl Harbor** attack as his excuse for hurling us into **World War II.**

"Now exactly as the conspirators planned; victory for the **Allies** would eliminate all the **Monarchs** of the defeated Nations and leave all their people leaderless, confused, bewildered and perfectly conditioned for the **one-world government.** The great conspiracy intended would follow; but there still would be an obstacle; the same obstacle that had balked the **Illuminati** and **Rothschild** at that **Congress in Vienna** (peace gathering) after the **Napoleonic Wars.** **Russia** would be on the winning side this time as it was in 1814 and therefore the **Czar** would be securely seated on his throne. Here it is pertinent to note that **Russia**, under the **Czarist regime**, had been the one country in which the **Illuminati** had never made any headway nor had the **Rothschilds** ever been able to infiltrate in their banking interests thus a winning **Czar** would be more difficult than ever to cope with. Even if he could be enticed into a so-called "**League of Nations;**" it was a foregone conclusion that he would never, but never, go for a **one-world government.**

"So even before the outbreak of **World War I;** the conspirators had a plan in the making to carry out **Nathan Rothschild's** vow of 1814 to destroy the **Czar** and also murder all possible royal heirs to the throne and it would have to be done before the close of the war. The **Russian Bolsheviks** were to be their instruments in this particular plot. From the turn of the century; the chiefs of the **Bolsheviks** were **Nicolai Lenin, Leon Trotsky,** and later **Joseph Stalin.** Of course, those were not their true family names. Prior to the outbreak; **Switzerland** became their haven. **Trotsky's headquarters** was on the lower **East Side** in **New York;** largely the habitat of **Russian-Jewish refugees.** Both **Lenin** and **Trotsky** were similarly bewhiskered and unkempt. In those days that was the badge of **Bolshevism.** Both lived well yet neither had a regular occupation. Neither had any visible means of support, yet both always had plenty of money. All those mysteries were solved in 1917. Right from the outset of the war; strange and mysterious goings on were taking place in **New York.** Night after night; **Trotsky** darted furtively in and out of **Jacob Schiff's palace mansion** and in the dead of those same nights there were a gathering of **hoodlums** of **New York's lower East Side.** All of them **Russian refugees** at **Trotsky's headquarters** and all were going through some mysterious sort of training process that was all shrouded in mystery. Nobody talked; although it did leak out that **Schiff** was financing all of **Trotsky's activities.**

"Then suddenly **Trotsky** vanished and so did approximately 300 of his trained hoodlums. Actually they were on the high seas in a **Schiff-chartered ship** bound for a rendezvous with **Lenin** and his **gang** in **Switzerland.** And also on that ship was **\$20,000,000 in gold;** the **\$20,000,000** was provided to finance the **Bolsheviks** takeover of **Russia.** In anticipation of **Trotsky's** arrival; **Lenin** prepared to throw a party in his **Switzerland** hideaway. Men of the very highest places in the world were to be guests at that party. Among them were the mysterious **Colonel Edward Mandell House, Woodrow Wilson's mentor** and palsy-walsy, and more important; **Schiff's special and confidential messenger.** Another of the expected

guests was **Warburg of the Warburg Banking Clan in Germany** who was financing the **Kaiser** and whom the **Kaiser** had been rewarded by making him chief of the **Secret Police of Germany**. In addition; there were the **Rothschilds of London and Paris** also **Lithenoth, Kakonavich, and Stalin** (who was then the head of a train and bank robbing gang of bandits). He was known as the "**Jesse James of the Urals.**"

"And here I must remind you that **England and France** were then long in the war with **Germany** and that on February 3, 1917; **Wilson** had broken off all diplomatic relations with **Germany**. Therefore; **Warburg, Colonel House, the Rothschilds, and all those others** were enemies but of course; **Switzerland** was neutral ground where enemies could meet and be friends and especially if they had some scheme in common. That **Lenin party** was very nearly wrecked by an unforeseen incident. The **Schiff-chartered ship** on its way to **Switzerland** was intercepted and taken into custody by a **British warship**. But **Schiff** quickly rushed orders to **Wilson** to order the **British** to release the ship intact with **Trotsky's hoodlums and the gold**. **Wilson** obeyed. He warned the **British** that if they refuse to release the ship; the **United States** would not enter the war in April as he had faithfully promised a year earlier. The **British** headed the warning. **Trotsky** arrived in **Switzerland** and the **Lenin party** went off as scheduled; but they still faced what ordinarily would have been the insurmountable obstacle of getting the **Lenin-Trotsky** band of terrorists across the border into **Russia**. Well; that's where **Brother Warburg**, chief of the **German Secret Police**, came in. He loaded all those thugs into sealed freight cars and made all the necessary arrangements for their secret entry into **Russia**. The rest is history. The revolution in **Russia** took place and all members of the royal **Romanoff family** were murdered.

"Now my chief objective is to establish beyond even a remote doubt that communism, so-called, is an integral part of the **Illuminati** great conspiracy for the enslavement of the entire world. That communism, so-called, is merely their weapon and bogey man word to terrify the peoples of the whole world and that the conquest of **Russia** and the creation of communism was, in great part, organized by **Schiff** and the other **international bankers** right in our own city of **New York**. A fantastic story? Yes. Some might even refuse to believe it. Well; for the benefit of any doubting Thomas I will prove it by reminding that just a few years ago **Charlie Knickerbocker**, a Hearst newspaper columnist, published an interview with **John Schiff**, grandson of Jacob, in which young **Schiff** confirmed the entire story and named the figure old **Jacob** contributed, **\$20,000,000**.

"If anybody still has even a remote doubt that the entire menace of **communism** was created by the masterminds of the great conspiracy right in our own city of **New York**; I will cite the following historical fact. All records show that when **Lenin and Trotsky** engineered the capture of **Russia**; they operated as heads of the **Bolsheviks party**. Now "**Bolshevism**" is a purely **Russian word**. The masterminds realized that **Bolshevism** could never be sold as an ideology to any but the **Russian people**. So in April 1918; **Jacob Schiff** dispatched **Colonel House** to **Moscow** with orders to **Lenin, Trotsky, and Stalin** to change the name of their regime to the **Communist Party** and to adopt the **Karl Marx "Manifesto"** as the constitution of the **Communist Party**. **Lenin, Trotsky, and Stalin** obeyed; and in that year of 1918 was when the **Communist party** and the menace of **communism** came into being. All this is confirmed in **Webster's Collegiate Dictionary, Fifth Edition**.

"In short; **communism** was created by the **capitalists**. Thus; until November 11, 1918, the entire fiendish plan of the conspirators worked perfectly. All the great nations, including the **United States**, were war-weary, devastated, and mourning their dead. Peace was the great universal desire. Thus when it was proposed by **Wilson** to set up a "**League of Nations**" to ensure peace; all the great nations, with no **Russian Czar** to stand in their way, jumped on that bandwagon without even stopping to read the fine print in that insurance policy. That is; all but one; the **United States**, the very one that **Schiff** and his co-conspirators least expected would balk and that was their one fatal mistake in that early plot. You see; when **Schiff** planted **Woodrow Wilson** in the **White House**; the conspirators assumed that they had the **United States** in the proverbial bag. **Wilson** had been perfectly built up as a great humanitarian. He supposedly became established as a God-man with the American people. There was every reason for the conspirators to have believed that he would easily hornswaggled **Congress** into buying the "**League of Nations**," sight unseen, exactly as the **Congress** of 1945 bought the "**United Nations**," sight unseen. But there was one man in the **Senate** in 1918 who saw through that scheme just as the **Russian Czar** did in 1814. He was a man of great political stature; almost as great as that of **Teddy Roosevelt** and fully as astute. He was highly respected and trusted by all members of both houses of **Congress** and by the American people. The name of that great and patriotic American was **Henry Cabot Lodge**; not the phony of today who called himself **Henry Cabot Lodge, Jr.**, until he was exposed. **Lodge** completely unmasked **Wilson** and kept the **United States** out of the "**League of Nations**."

NOTE:

Shortly thereafter; the **Illuminati** had created the **17th Amendment** to do away with appointed **Senators** by the legislatures of the several states of the Union. Whereas the **Illuminati** controls the press; they now control the election of the **US Senators**. The **Illuminati/CFR** had little or no power over the individual legislatures of the several states or their appointed **U.S. Senators** prior to the [purported] ratification of the **17th Amendment**. Although the **17th Amendment** supposedly amends the method of placing **Senators** into the **US Senate**; the **17th Amendment** was never ratified in accordance to the last sentence of **Article V** of the **US Constitution**. Two states, **New Jersey** and **Utah**, voted down the proposition and nine other states never voted at all. Whereas the states of **New Jersey** and **Utah** expressly refused to relinquish their "**suffrage**" in the **Senate** while the other non-voting nine states never gave their "*express*" consent; the proposition for the **17th Amendment** did not obtain the "**unanimous**" vote required for its adoption. Furthermore; the resolution that created the "**Proposition**" did not pass the Senate with a "**unanimous**" vote and as those **Senators** of that day were "**appointed**" by the legislatures of their states; those "**negative**" votes or "**non-votes**" were made in the name of their respective state.

"Here it becomes of great interest to know the real reason for the **Wilson League of Nations** flop. As I previously stated, **Schiff** was sent to the **United States** to carry out four specific assignments:

And most important, was to acquire complete control of the **U.S. money system**.

As outlined in the original **Weishaupt Illuminati blueprint**, he was to find the right kind of men to serve as stooges for the great conspiracy and **promote them** into the highest offices in our federal government; our **Congress**, our **U.S. Supreme Court**, and **all federal agencies**, such as the **State Department**, the **Pentagon**, the **Treasury Department**, etc..

Destroy the unity of the American people by **creating minority groups strife** throughout the nation; especially between the **whites** and **blacks** as outlined in **Israel Cohen's book**.

Create a movement to **destroy religion** of the United States with **Christianity** to be the chief target or victim.

"In addition; he was strongly reminded of the imperative directive of the **Illuminati blueprint** to achieve full control of all **mass communications media** to be used to brainwash the people into believing and accepting all of the maneuverings of the great conspiracy. **Schiff** was warned that only control of the **press**, at that time our only **mass communications media**, would enable him to destroy the unity of the American people.

"Now then; **Schiff** and his co-conspirators did set up the "**NAACP**" (the "**National Association for the Advancement of the Colored People**") in 1909 and in 1913 he set up the "**Anti defamation League of the B'nai B'rith**;" both were to create the necessary strife; but in the early years; the "**ADL**" operated very timidly. Perhaps for fear of a "**pogrom-like**" action by an aroused and enraged American people and the "**NAACP**" was practically dormant because its white leadership didn't realize that they would have to develop fire-brand Negro leaders, such as **Martin Lucifer King** for one, to spark the then completely satisfied contented mass of Negroes.

"In addition; he, **Schiff**, was busy developing and infiltrating the stooges to serve in all high places in our **Washington government** and in the job of acquiring **control of our money system** and the creation of the "**16th Amendment**." He also was very busy with the organizing of the plot for the takeover of **Russia**. In short; he was kept so busy with all those jobs that he completely overlooked the supreme job of acquiring complete control of our **mass communications media**. That oversight was a direct cause for **Wilson's failure** to lure the **United States** into the "**League of Nations**" because when **Wilson** decided to go to the people to overcome the opposition of the **Lodge-controlled Senate**; despite his established but phony reputation as a great humanitarian, he found himself faced by a solidly united people and by a loyal press whose only ideology was "**Americanism**" and the American way of life. At that time; due to the ineptness and ineffectiveness of the "**ADL**" and the "**NAACP**," there were no organized minority groups; no Negro problems; no so-called antisemitic problems to sway the people's thinking. There were no lefts and there were no rights nor any prejudices for crafty exploitations. Thus **Wilson's "League of Nations"** appeal fell on deaf ears. That was the end of **Woodrow Wilson**; the conspirators great humanitarian. He quickly abandoned his crusade and returned to **Washington** where he shortly died an imbecile brought on by syphilis and that was the end of the "**League of Nations**" as a corridor into **one-world government**.

"Of course that debacle was a terrible disappointment to the masterminds of the **Illuminati conspiracy**; but they were not discouraged. As I have previously stressed, this enemy never quits; they simply decided to reorganize and try from scratch again. By this time **Schiff** was very old and slow. He knew it. He knew that the conspiracy needed a new younger and more active leadership. So on his orders; **Colonel House** and **Bernard Barouk** organized and set up what they called the "**Council on Foreign Relations**;" the new name under which the **Illuminati** would continue to function in the **United States**. The hierarchy, officers, and directors of the "**CFR**" is composed principally of descendants of the original **Illuminati**; many of whom who had abandoned their old family name and acquired new Americanized names. For one example; we have **Dillon**, who was **Secretary of Treasury** of the **United States**, whose original name was **Laposky**. Another example is **Pauley**, head of the **CBS TV channel**, whose true name is **Palinsky**. The membership of the **CFR** is approximately **1,000 in number** and contains the **heads** of virtually every **industrial empire** in **America** such as **Blough**, president of the **U. S. Steel Corporation**; **Rockefeller**, king of the **oil industry**; **Henry ford, II**, and so on. And of course; all the **international bankers**. Also; the **heads** of the "**tax-free**" **foundations** are **officers** and/or active **CFR members**. In short; all the men who provided the money and the influence to elect the **CFR** chosen **Presidents of the United States**, the **Congressmen**, the **Senators**, and who decide the appointments of our various **Secretaries of State**, of the **Treasury**, of every important **federal agency** are members of the **CFR** and they are very obedient members indeed.

"Now just to cement that fact; I will mention the names of the few of the **United States Presidents** who were members of the **CFR**. **Franklin Roosevelt**, **Herbert Hoover**, **Dwight D. Eisenhower**, **Jack Kennedy**, **Nixon**, and **George Bush**. Others who were considered for the presidency are **Thomas E. Dewey**, **Adlai Stevenson**, and vice-president of a **CFR** subsidiary; **Barry Goldwater**. Among the important cabinet members of the various administrations we have **John Foster Dulles**, **Allen Dulles**, **Cordell Hull**, **John J. MacLeod**, **Morganthau**, **Clarence Dillon**, **Rusk**, **McNamara**, and just to emphasize the "**red color**" of the "**CFR**;" we have as members such men as **Alger Hess**, **Ralph Bunche**, **Pusvolsky**, **Haley Dexter White** (real name **Weiss**), **Owen Lattimore**, **Phillip Jaffey**, etc., etc.. Simultaneously; they were flooding thousands of homosexuals and other black malleable characters into all the federal agencies from the **White House** on down. Do you remember **Johnson's great friends**; **Jenkins** and **Bobby Baker**?

"Now there were many jobs the new **CFR** had to accomplish. They required much help. So their first job was to set up various "**subsidiaries**" to whom they assigned special objectives. I can't name all the subsidiaries in this recording; but the following are a few: the "**Foreign Policy Association**" ("**FPA**"), the "**World Affairs Council**" ("**WAC**"), the "**Business Advisory Council**" ("**BAC**"), the notorious "**ADA**" ("**Americans for Democratic Action**" virtually headed by **Walter Ruther**), the notorious "**13-13**" in **Chicago**; **Barry Goldwater** was, and no doubt still is a **vice-president** of one of the **CFR** **subsidiaries**. In addition; the **CFR** set up special **committees** in every **state** in the **Union** to whom they assigned the various state operations.

"Simultaneously; the **Rothschilds** set up similar **CFR-like control groups** in **England**, **France**, **Germany**, and other **Nations** to control world conditions and cooperate with the **CFR** to bring about another world war. But the **CFR's** first and foremost job was to get complete control of our **mass**

communications media. The control of the press was assigned to **Rockefeller**. Thus; **Henry Luce**, who recently died, was financed to set up a number of national magazines, among them "**Life**," "**Time**," "**Fortune**," and others, which publish "**U.S.S.R.**" in **America**. The **Rockefellers** also directly or indirectly financed the **Coles Brothers' "Look magazine"** and a chain of **newspapers**. They also financed a man named **Sam Newhouse** to buy up and build a chain of **newspapers** all over the country. And the late **Eugene Myer**, one of the founders of **CFR**, bought the "**Washington Post**," "**Newsweek**," the "**Weekly magazine**," and other publications. At the same time; the **CFR** began to develop and nurture a new breed of scurrilous columnists and editorials writers such as **Walter Lippman**, **Drew Pearson**, the **Alsops**, **Herbert Matthews**, **Erwin Canham**, and others of that ilk who called themselves "**Liberals**" who proclaimed that "**Amercanism**" is "**isolationism**;" that "**isolationism**" is "**war mongerism**;" that "**anti-communism**;" is "**anti-semiticism**" and "**racism**." All that took time of course; but today our "**weeklies**," published by patriotic organizations, is completely controlled by **CFR stooges** and thus they finally succeeded in breaking us up into a Nation of quarreling, wrangling, squabbling, hating factions. Now if you still wonder about this slanted news and outright lies you read in your newspaper; you now have the answer. To the **Lehmans**, **Goldman-Sachs**, **Kuhn-Loebs**, and the **Warburgs**; the **CFR** assigned the job of getting control of the **motion picture industry**, **Hollywood**, **radio**, and **television**; and believe me they succeeded. If you still wonder about the strange **propaganda broadcast** by the **Ed Morrows** and others of that ilk; you now have the answer. If you wonder about all the smut, sex, pornography, and mixed marriage films you see in your movie theater and on your television set (all of which is demoralizing our youth); you now have the answer.

"Now to refresh your memory, let's go back for a moment. **Wilson's flop** had torpedoed all chances of transforming that "**League of Nations**" into the conspirators hope for a **one-world government housing** so the **Jacob Schiff** plot had to be done all over again and they organized the **CFR** to do it. We also know how successfully the **CFR** did that job of brainwashing and destroying the unity of the American people. But as was the case with the **Schiff plot**; the climax and the creation of a new housing for their **one world government** required another **world war**. A **war** that would be even more horrible and more devastating than the **first world war** in order to get the people of the world to again clamor for peace and a means to end all wars. But the **CFR** realized that the aftermath of **World War II** would have to be more carefully planned so that there would be no escape from the new one-world trap - another "**League of Nations**" that would emerge from the new war. The trap we now know as the "**United Nations**" and they hit upon a perfect strategy to ensure that no one escaped. Here is how they did it.

"In 1943, in the midst of the war, they prepared the framework for the **United Nations** and it was handed over to **Roosevelt** and our **State Department** to be given birth by **Alger Hess**, **Palvosky**, **Dalton**, **Trumbull**, and other **American traitors**, thus making the whole scheme a **United States' baby**. Then to fix our parenthood; **New York City** was to become the nursery for the monstrosity. After that we could hardly walk out on our own baby now could we? Anyway; that's how the conspirators figured it would work and so far it has. The liberal **Rockefeller** donated the land for the **United Nations' building**.

"The **United Nations' charter** was written by **Alger Hess, Palvosky, Dalton, Trumbull**, and other **CFR stooges**. A phony, so-called, **U.N. conference** was set up in **San Francisco** in 1945. All the, so-called, representatives of 50-odd Nations gathered there and promptly signed the Charter and the despicable traitor, **Alger Hess**, flew to **Washington** with it; elatedly submitted it to our **Senate**, and the **Senate** (elected by our people to safeguard our security) signed the **Charter** without so much as reading it. The question is: "**How many of our Senators were even then traitorous stooges of the CFR?**" Anyway; it was thus that the people accepted the "**United Nations**" as a "**holy of holies**."

Again and again and again we have been startled, shocked, bewildered, and horrified by their mistakes in **Berlin**, in **Korea**, in **Laos**, in **Katanga**, in **Cuba**, in **Vietnam**; mistakes that always favored the enemy; never the **United States**. Under the law of averages; they should have made at least one or two mistakes in our favor; but they never did. What's the answer? The answer is the "**CFR**" and the parts played by their subsidiaries and stooges in **Washington D.C.**, thus we know that complete control of our **foreign relation policy** is the key to the success of the entire **Illuminati one-world order plot**. Here is further proof.

"Earlier I fully established that **Schiff** and his gang had financed the **Lenin, Trotsky, Stalin**, takeover of **Russia** and fashioned its **communist regime** into becoming their chief instrument to keep the world in turmoil and to finally terrorize all of us into seeking peace in a **U.N. one-world government**. But the conspirators knew that the "**Moscow gang**" could not become such an instrument until and unless the whole world would accept the **communist regime** as the legitimate "**de jure government**" of **Russia**. Only one thing could accomplish that and that is the recognition by the **United States**. The conspirators figured that the whole world would follow our lead and that's their bag to induce **Harding, Coolidge, and Hoover**, to grant that recognition. But all three refused. As a result of the late 1920's; the **Stalin regime** was in dire straits. Despite all purges and secret police controls; the **Russian people** were growing more and more resistive. It is a matter of record, admitted by **Lipdenoff**, that during 1931 and 1932; **Stalin** and his whole gang were always packed and ready for instant flight.

"Then in November 1932; the conspirators achieved their greatest coup; they landed **Franklin Roosevelt** in the **White House**, crafty, unscrupulous, and utterly without conscience. That charlatan traitor turned the trick for them. Without even asking consent of **Congress**; he unlawfully proclaimed recognition for the **Stalin regime**. That did it. And exactly as the conspirators figured; the whole world did follow our lead. Automatically that squelched the previously growing resistance movement of the **Russian people**. That automatically launched the greatest menace the civilized world has ever known. The rest is too well known to need repeating.

"We know how **Roosevelt** and his traitorous **State Department** kept building up the **communist menace** right here in our country and thus throughout the world. We know how he perpetuated that whole **Harbot atrocity** for his excuse to hurl us into **World War II**. We know all about his secret meetings with **Stalin** at **Yalta** and how he, with **Eisenhower's help**, delivered the **Balkans** and **Berlin** to **Moscow** and last but by no means least; we know that the 20th century Benedict Arnold not only dragged us into that new corridor; the **United Nations** into the **one-world government**, but actually schemed all the arrangements to plant it within our country. In short; the day that **Roosevelt** entered the

White House; the **CFR conspirators** regained full control of our foreign relations machinery and firmly established the **United Nations** as the housing for the **Illuminati one-world government**.

"I wish to stress one other very vital point. That **Wilson "League of Nations"** flop brought **Schiff** and his gang to the realization that control of just the **Democratic Party** was not enough. True! They could create a crisis during the **Republican administration** as they did in 1929 with their **federal reserve manufactured crash and depression** which would bring another **Democrat stooge** back into the **White House**; but they realized that a four-year disruption in their control of our foreign control of our foreign relation policies could play havoc with the progress of their conspiracy. It could even break up their entire strategy as it almost did before **Roosevelt** saved it with his recognition of the **Stalin regime**.

"Thereupon, after that **Wilson debacle**, they began to formulate plans to achieve control of both of our national parties. But that posed a problem for them. They needed manpower with stooges in the **Republican Party** with additional manpower for the **Democratic Party** and because control of just the man in the **White House** would not be enough; they would have to provide that man with trained stooges for his entire cabinet. Men to head the **State Department**, the **Treasury Department**, the **Pentagon**, the **CFR**, the **USIA**, etc.. In short; every member of the various cabinets would have to be a chosen tool of the **CFR**, such as **Rusk** and **McNamara**, as well as all the **under Secretaries** and **assistant Secretaries**. That would give the conspirators absolute control of all our policies, both domestic and most important; foreign. That course of action would require a reserve pool of trained stooges; instantaneously ready for administrative changes and for all other exigencies. All such stooges would of necessity have to be men of national reputation, high in the esteem of the people; but they would have to be men without honor, without scruple, and without conscience. These men would have to be vulnerable to blackmail. It is needless for me to stress how well the **CFR** succeeded. The immortal **Joe McCarthy** fully revealed that there are thousands of such security risks in all federal agencies. **Scott MacLeod** unmasked thousands more and you know the price that **Oetega** had to pay, and is still paying, for his expositions before a **Senate Committee** of the traitors in the **State Department** and you know that the men in the **State Department**, who delivered **Cuba** to **Castro**, have not only been shielded; but promoted.

"Now let's go back to the crux of the whole one-world government plot and the maneuvering necessary to create another **"League of Nations"** to house such a government. As I have already stated; the conspirators knew that only another world war was vital for the success of their plot. It would have to be such a horrifying world war that the peoples of the world would cry out for the creation of some kind of a world organization that could secure an everlasting peace. But how could such a war be brought about? All the **European nations** were at peace. None had any quarrels with their neighboring nations and certainly their stools in **Moscow** wouldn't dare to start a war. Even **Stalin** realized that it would mean the overthrow of his regime unless, so-called, **"patriotism"** would weld the **Russian people** behind him.

"But the conspirators had to have a war. They had to find or create some kind of an incident to launch it. They found it in a little inconspicuous and repulsive little man who called himself **"Adolf Hitler."** **Hitler**, an impecunious **Austrian house painter**, had been a **corporal** in the **German army**. He made

the defeat of **Germany** into a personal grievance. He began to "**rabble rouse**" about it in the **Munich, Germany** area. He began to spout about restoring the greatness of the **German Empire** and the might of the **German solidarity**. He advocated the restoration of the old **German military** to be used to conquer the whole world. Strangely enough; **Hitler**, the little clown that he was, could deliver a rabble rousing speech and he did have a certain kind of magnetism. But the new authorities in **Germany** didn't want anymore wars and they promptly threw the obnoxious **Austrian house painter** into a prison cell.

"Aha! Here was the man, decided the conspirators, who, if properly directed and financed, could be the key to another world war. So while he was in prison; they had **Rudolph Hess** and **Goering** write a book which they titled: "**Mein Kampf**" and attributed the authorship to **Hitler**; exactly as **Lipdenoff** wrote: "**Mission to Moscow**" and attributed the authorship to **Joseph Davies**; then our **ambassador to Russia** and a stooge of the **CFR**. In "**Mein Kampf**;" the **Hitler pseudo-author** outlined his grievances and how he would restore the **German people** to their former greatness. The conspirators then arranged for a **wide circulation** of the **book** among the **German people** in order to arouse a fanatical following for him. On his release from prison (also arranged by the conspirators); they began to groom and finance him to travel to other parts of **Germany** to deliver his rabble rousing speeches. Soon he gathered a growing following among other veterans of the war that soon spread to the masses who began to see in him a **saviour** for their beloved **Germany**. Then came his leadership of what he called "**his brown shirt army**" and the march on **Berlin**. That required a great deal of financing; but the **Rothschilds**, the **Warburgs**, and others of the conspirators provided all the money he needed. Gradually **Hitler** became the idol of the **German people** and they then overthrew the **Von Hindenburg government** and **Hitler** became the new **fuhrer**. But that still was no reason for a war. The rest of the world watched **Hitler's rise** but saw no reason to interfere in what was distinctly a domestic condition within **Germany**. Certainly none of the other Nations felt it was a reason for another war against **Germany** and the **German people** were not yet incited into enough of a frenzy to commit any acts against any neighboring nation; not even against **France** that would lead to a war. The conspirators realized they would have to create such a frenzy; a frenzy that would cause the **German people** to throw caution to the winds and at the same time; horrify the whole world. And incidentally; "**Mein Kampf**" was actually a follow-up of **Karl Marx's book: "A World Without Jews."**

"The conspirators suddenly remembered how the **Schiff- Rothschild gang** had engineered the **pogroms** in **Russia** which slaughtered many, many thousands of **Jews** and created a world-wide hatred for **Russia** and they decided to use that same unconscionable trick to inflame the new **Hitler led German people** into a murderous hatred of the **Jews**. Now it is true that the **German people** never had any particular affection for the **Jews**; but neither did they have an ingrained hatred for them. Such a hatred would have to be manufactured so **Hitler** was to create it. This idea more than appealed to **Hitler**. He saw in it the grisly gimmick to make him the "**God-man**" of the **German people**.

"Thus craftily inspired and coached by his financial advisers, the **Warburgs**, the **Rothschilds**, and all the **Illuminati masterminds**; he blamed the **Jews** for the hated "**Versailles Treaty**" and for the **financial ruination** that followed the **war**. The rest is history. We know all about the **Hitler concentration camps** and the incineration of hundred of thousands of **Jews**. Not the 6,000,000 nor even the 600,000 claimed by the conspirators; but it was enough. And here let me reiterate how little the

internationalist bankers, the Rothschilds, Schiffs, Lehmans, Warburgs, Barouchs, cared about their racial brethren who were the victims of their nefarious schemes. In their eyes; the slaughter of the several hundred thousand innocent **Jews** by **Hitler** didn't bother them at all. They considered it a necessary sacrifice to further their **Illuminati one-world plot** just as the slaughter of the many millions in the wars that followed was a similar necessary sacrifice. And here is another grisly detail about those concentration camps. Many of the **Hitler soldier executioners** in those camps had previously been sent to **Russia** to acquire their arts of torture and brutalization so as to emphasize the horrors of the atrocities.

"All this created a new world-wide hatred for the **German people** but it still did not provide a cause for a war. There upon **Hitler** was incited to demand the "**Sudetenland;**" and you remember how **Chamberlain** and the then diplomats of **Czechoslovakia** and **France** surrendered to that demand. That demand led to further **Hitlerian demands** for territories in **Poland** and in the **French Czar territories** and those demands were rejected. Then came his pact with **Stalin**. **Hitler** had been screaming hatred against **communism** (Oh how he ranted against **communism**); but actually **nazism** was nothing but **socialism** and **communism** is, in fact, **socialism**. But **Hitler** disregarded all that. He entered into a pact with **Stalin** to attack and divide **Poland** between them. While **Stalin** marched into one part of **Poland** (for which he was never blamed [the **Illuminati masterminds** saw to that]); **Hitler** launched a "**blitzkrieg**" on **Poland** from his side. The **conspirators** finally had their new **world war** and what a horrible **war** it was.

"And in 1945; the **conspirators** finally achieved the "**United Nations;**" their new housing for their one-world government. And truly amazing; all of the American people hailed this foul outfit as a "**Holy of Holies.**" Even after all the true facts about how the **U.N.** was created were revealed; the American people continued to worship that evil outfit. Even after **Alger Hess** was unmasked as a **Soviet spy and traitor;** the **American people** continued to believe in the **U.N.**. Even after I had publicly revealed the secret agreement between **Hess** and **Mulatoff** that a **Russian** would always be the head of the **military secretariat** and by that token; the real master of the **U.N.**. But most of the **American people** continued to believe that the **U.N.** could do no wrong. Even after **Trig D. Lee**, the first **Secretary general** of the "**U.N.**" confirmed that **Hess-Mulatoff secret agreement** in his book: "**For The Cause of Peace;**" **Vasialia** was given a **leave of absence** by the **U.N.** so that he could take **command** of the **North Koreans** and **Red Chinese** who were **fighting** the so-called **U.N. police action** under our own **General McArthur**, who; by **orders** of the **U.N.**; was **fired** by the pusillanimous **president Truman** in order to prevent him from winning that war. Our people still believed in the **U.N.** despite our 150,000 sons who were murdered and maimed in that war; the people continued to regard the **U.N.** as a sure means for peace even after it was revealed in 1951 that the **U.N.** (using our own **American soldiers** under **U.N. command**, under the **U.N. flag**, in collusion with our traitorous **State Department** and the **Pentagon**) had been **invading** many small **cities** in **California** and **Texas** in order to perfect their plan for the complete takeover of our country. Most of our people brushed it off and continued their belief that the **U. N.** is a "**Holy of Holies.**"

"Do you know that the **U.N. Charter** was written by traitor **Alger Hess, Mulatoff,** and **Vyshinsky?** That **Hess** and **Mulatoff** had made within that **secret agreement** that the **military chief** of the **U.N.** was always to be a **Russian** appointed by **Moscow?** Do you know that at their **secret meetings** at **Yalta;**

Roosevelt and Stalin, at the behest of the **Illuminati** operating as the **CFR**, decided that the **U.N.** must be placed on **American soil**? Do you know that most of the **U.N. Charter** was **copied** intact, word for word, from the **Marx "Manifesto"** and the **Russia**, so-called, **constitution**? Do you know that the only **two Senators** who voted against the **U.N. Charter** had **read it**? Do you know that since the **U.N.** was founded; communist enslavement has grown from 250,000 to 1,000,000,000? Do you know that since the **U.N.** was founded to insure peace there have been at least **20 major wars** incited by the **U.N.**; just as they incited war against little **Rhodesia** and **Kuwait**? Do you know that under the **U.N.** set up; the **American taxpayers** have been forced to make up the **U.N. Treasury deficit** of many millions of dollars because of **Russia's refusal to pay** her share? Do you know that the **U.N.** had never passed a **resolution** condemning **Russia** or her so-called **satellites**; but always condemns our **Allies**? Do you know that **J. Edgar Hoover** said: "**the overwhelming majority of the communist delegations to the U.N. are espionage agents**" and that **66 Senators** voted for a "**Consular Treaty**" to open our entire country to **Russian spies and saboteurs**? Do you know that the **U.N.** helps **Russia's conquest** of the world by preventing the free world from taking any action whatsoever except to debate each new aggression in the **U.N. General Assembly**? Do you know that at the time of the **Korean War** there were **60 Nations** in the **U.N.**; yet **95%** of the **U.N. forces** were our **American sons** and practically **100%** of the **cost** was **paid** by the **United States taxpayers**?

"And surely you know that the **U.N. policy** during the **Korean** and **Vietnam Wars** was to **prevent** us from **winning** those wars? Do you know that all the battle plans of **General McArthur** had to go first to the **U.N.** to be relayed to **Vasialia, Commander** of the **North Koreans** and **Red Chinese**, and that any future wars fought by our sons under the **U.N. flag** would have to be fought by our sons under the control of the **U.N. Security Council**? Do you know that the **U.N.** has never done anything about the **80,000 Russian Mongolian troops** that occupy **Hungary**?

"Where was the **U.N.** when the **Hungarian freedom fighters** were slaughtered by the **Russians**? Do you know that the **U.N.** and its **peace army** turned the **Congo** over to the **communists**? Do you know that the **U.N.**'s own, so-called, **peace force** was used to crash, rape, and kill the **white anti-communists** in **Katanga**? Do you know that the **U.N.** stood by and did nothing while **Red China** invaded **Laos** and **Vietnam**? That it did nothing while **Nero** invaded **Goa** and other **Portuguese territories**? Do you know that the **U.N.** was directly responsible for aiding **Castro**? That it does absolutely nothing about the many thousands of **Cuban youngsters** who are **shipped** to **Russia** for **communist indoctrination**.

"Do you know that **Adlai Stevenson** said: "**the free world must expect to loose more and more decisions in the U.N.**" Do you know that the **U.N.** openly proclaims that its chief objective is a "**one-world government**" which means "**one-world laws,**" "**one-world court,**" "**one-world schools,**" and a "**one world church**" in which **Christianity** would be **prohibited**?

"Do you know that a **U.N. law** has been passed to **disarm** all **American citizens** and to **transfer** all our **armed forces** to the **U.N.**? Such a law was secretly signed by saint' **Jack Kennedy** in 1961. Do you realize how that fits in with **Article 47, paragraph 3, of the U.N. Charter**, which states and I quote: "**the military staff committee of the U.N. shall be responsible through the Security Council for the strategic direction of all armed forces placed at the disposal of the Security Council**" and when and

if all our **armed forces** are **transferred** to the **U.N.**; your **sons** would be **forced** to **serve and die** under the **U.N. command** all over the world. This will happen unless you fight to get the **U.S.** out of the **U.N.**.

"Do you know that **Congressmen James B. Utt** has submitted a **bill** to get the **U.S.** out of the **U.N.** and a **resolution** to prevent our **President** from forcing us to support the **U.N. embargoes** on **Rhodesia**? Well, he has and many people all over the country are writing to their representatives to support the **Utt bill** and **resolution**. **Fifty Congressmen**, spear headed by **Schweiker** and **Moorhead** of **Pennsylvania**, have introduced a **bill** to immediately **transfer** all our **armed forces** to the **U.N.**? Can you imagine such brazen treason? Is your **Congressman** one of those **50 traitors**? Find out and take immediate action against him and help **Congressman Utt**.

"Now do you know that the "**National Council of Churches**" passed a **resolution** in **San Francisco** which states that **the United States will soon have to subordinate its will to that of the U.N. and that all American citizens must be prepared to accept it**? Is your church a member of the "**National Council of Churches**?" In connection with that; bear in mind that **God** is never mentioned in the **U.N. Charter** and their meetings are never opened with prayer.

"The creators of the **U.N.** stipulated in advance that there should be no mention of **God** or **Jesus Christ** in the **U.N. Charter** or in its **U.N. headquarters**. Does your pastor subscribe to that? Find out! Furthermore; do you know that the great majority of the, so-called, **Nations** in the **U.N.** are **anti-christianity** and that the **U.N.** is a completely **godless organization** by orders of its creators; the **CFR Illuminati**. Have you heard enough of the truth the **Illuminati's United Nations**? Do you want to leave your sons and our precious country to the unholy mercy of the **Illuminati's United Nations**? If you don't; **write, telegraph, or phone** your **Representatives** and **Senators** that they must support **Congressman Utt's bill** to get the **U.S.** out of the **U.N.** and the **U.N.** out of the **U.S.**. Do it today; now, before you forget! It is the only salvation for your sons and for our country.

"Now I have one more vital message to deliver. As I told you; one of the four specific assignments **Rothschild** gave **Jacob Schiff** was to create a movement to **destroy religion** in the **United States** with **Christianity** to be the **chief target**. For a very obvious reason; the "**Anti defamation League**" wouldn't dare to attempt to do it because such an attempt could create the most terrible blood bath in the history of the world; not only for the "**ADL**" and the **conspirators**, but for the millions of innocent **Jews**. **Schiff** turned that job over to **Rockefeller** for another specific reason. The **destruction** of **Christianity** could be **accomplished** only by those who are **entrusted to preserve it**. By the **pastors**; the men of the cloth.

"As a starter; **John D. Rockefeller** picked up a young, so-called, **Christian minister** by the name of **Dr. Harry F. Ward**. **Reverend Ward** if you please. At that time he was teaching religion at the "**Union Theological Seminary**." **Rockefeller** found a very willing "**Judas**" in this **Reverend** and thereupon in 1907; he financed him to set up the "**Methodist Foundation of Social Service**" and **Ward's job** was to teach bright young men to become, so-called, **ministers of Christ** and to place them as pastors of churches. While teaching them to become ministers; the **Reverend Ward** also taught them how to

subtly and craftily preach to their congregations that the entire **story of Christ was a myth** to cast doubts on the **divinity of Christ**, to cast doubts about the **virgin Mary**, in short; to cast doubts on **Christianity** as a whole. It was not to be a direct attack, but much of it to be done by crafty insinuation that was to be applied, in particular, to the youth in the Sunday schools. Remember **Lenin's** statement: "**give me just one generation of youth and I'll transform the whole world.**" Then in 1908; the "**Methodist foundation of Social Service**," which incidentally was America's first communist front organization, changed its name to the "**Federal Council of Churches.**" By 1950; the "**Federal Council of Churches**" was becoming very suspect; so in 1950 they changed the name to the "**National Council of Churches.**" Do I have to tell you more about how this "**National Council of Churches**" is deliberately **destroying faith in Christianity**? I don't think so; but this I will tell you. If you are a member of any congregation whose pastor and church are members of this **Judas organization**; you and your contributions are helping the **Illuminati's plot** to destroy **Christianity** and your faith in **God** and **Jesus Christ** thus you are deliberately delivering your children to be indoctrinated with disbelief in God and Church and which can easily transform them into "**atheists.**" Find out immediately if your Church is a member of the "**National Council of Churches**" and for the love of God and your children; if it is, withdraw from it at once. However; let me warn you that the same destroying religion process has been infiltrated into other denominations. If you have seen the "**Negro on Selma**" and other such demonstrations; you have seen how the Negro mobs are led and encouraged by ministers (and even Catholic priests and nuns) who march along with them. There are many individual churches and pastors who are honest and sincere. Find one such for yourself and for your children.

"Incidentally; this same **Reverend Harry F. Ward** was also one of the founders of the "**American Civil Liberties Union**;" a notorious pro-communist organization. He was the actual head of it from 1920 to 1940. He also was a co-founder of the "**American League against War and Fascism**" which, under **Browder**, became the "**Communist Party of the United States.**" In short; **Ward's** entire **background** reeked of **communism** and he was identified as a **member** of the **communist party**. He died a vicious traitor to both his church and country and this was the man old **John D. Rockefeller** picked and financed to destroy **America's Christian religion** in accordance with the orders given to **Schiff** by the **Rothschilds**.

"In conclusion I have this to say. You probably are familiar with the story of how one **Dr. Frankenstein** created a monster to do his will of destroying his chosen victims but how instead in the end; that monster turned on his own creator, **Frankenstein**, and destroyed him. Well; the **Illuminati/CFR** has created a monster called the "**United Nations**" (who is supported by their minority groups, rioting negroes, the traitorous mass communications media, and the traitors in **Washington D.C.**) which was created to **destroy the American people**. We know all about that many headed hydromonster and we know the names of those who created that monster. We know all their names and I predict that one fine day the **American people** will come fully awake and cause that very monster to destroy its creator. True! The majority of our people are still being brainwashed, deceived, and deluded by our traitorous press, TV, and radio, and by our traitors in **Washington D.C.**; but surely by now enough is known about the **U.N.** to stamp out that outfit as a deadly poisonous rattlesnake in our midst.

"My only wonder is: "**what will it take to awaken and arouse our people to the full proof?**" Perhaps

this record (transcript) will do it. A hundred thousand or a million copies of this record (this transcript) can do it. I pray to God it will. And I pray that this record (transcript) will inspire you, all of you, to spread this story to all loyal **Americans** in your community. You can do it by playing it (reading it) to study groups assembled in your homes, at meetings of the **American Legion**, the **VFW**, the **DAR**, all other civic groups and women's clubs; especially the women's clubs who have their sons lives at stake. With this record (transcript) I have provided you with the weapon that will destroy the monster. For the love of God, of our Country, and of your children, use it! Get a copy of it into every American home.

The New World Order and the Geopolitics of Information

"The New World Order and the Geopolitics of Information" by Christopher Brown-Syed originally appeared in: LIBRES: Library and Information Science Research (ISSN:1058-6768) January 19, 1993.

Preface to the 1999 Web edition:

This paper recounts, rather inadequately, but at least compactly, the controversy surrounding the Unesco led initiative for a New World Information and Communications Order (NWICO), and tangentially, for a New International Economic Order (NIEO), the involvement of the Non-Aligned Movement (NAM), and the Western reaction which the proposals stimulated. Much more exhaustive, book-length accounts exist, the most notable of which is Hope and Folly by Preston, Schiller and Herman.

I have used the word "liberal" herein not as it is sometimes used in the United States (to refer to left of centre politics), but as it is used in Canada and Europe - to refer to a centrist, free enterprise stance, rather than a "structuralist" that is, a socialist, social-democratic, or perhaps, a neo-Marxist one. The latter is to be distinguished from the Soviet-style "communist" approach, which is usually identified as "Soviet" herein.

Readers should note that this article describes attitudes and issues prevalent during the Cold War. Though superpower politics would seem to be a thing of the past, the underlying problem which the NWICO sought to ameliorate - uneven world development - remains to be solved. While they disagreed a great deal about possible solutions, the liberals, the socialists, and the political conservatives who were involved all appear to have recognized this problem. I find Richard Nixon's comments particularly interesting.

While this document has been reformatted for the Web, I have left it intact otherwise, mistakes and all. Chris Brown-Syed, Detroit, 1999.

Introduction

During the past three decades, it has been suggested that an imbalance in information production and distribution might underlie uneven world economic development. Fraught with ideology, the debate about a New World Information and Communications Order (NWICO), tended to focus upon media ownership and upon the contending concepts of information as commodity and information as social good, upon the freedom of information as an individual versus a collective right.

This discussion paper summarizes the debate, and suggests that the collapse of the Soviet Union might provide an opportunity to overcome past political differences and to get down to the real business of assisting developing nations. In this activity, information technology specialists such as journalists, librarians, and computer scientists might play key roles.

The NWICO debate flourished, or perhaps one might more aptly say, raged, throughout much of the 1970s and 1980s in the halls of the United Nations, and particularly within Unesco. NWICO proponents and opponents alike accepted the premise of a link between economic progress and the availability of information. However, liberal theorists maintained that national cultures and sovereignty were not threatened by information concentration, while structuralist and socialist analysts argued that they were. In particular, the NWICO proponents, mostly drawn from the ranks of non-aligned nations, claimed that Western ownership and control of both the news media and their distribution channels constituted a form of cultural dominance whose covert goal was capitalist economic expansion.

This argument, played out in fora such as the Non-Aligned Movement and Unesco conferences drew support from the Soviet Union, and hostility from Western administrations. It was partly due to fears of the growing "politicization" of Unesco that the United States and Great Britain withdrew from that organisation in the mid 1980s.

The NWICO movement began as a protest over the concentration of print and broadcast media ownership among de facto cartels, and developed into an argument about the cultural dominance of poor nations by wealthy ones. However, even before the Soviet collapse, some NWICO proponents were beginning to suggest that the issue of news imbalance was a red herring, and that supplying developing nations with current banking and business information was more crucial.

Today, with the Cold War fast fading from public memory, many of the positions discussed in this article will perhaps seem archaic and quaint. However, the problem of uneven world development, far from disappearing with the dissolution of the Soviet Union, remains with us. Indeed, we in the West are provided daily with ample evidence that a whole segment of the globe - Eastern Europe - is almost as badly off as the so-called "developing" nations. Moreover, the Third World of the 1990s finds itself with only one ideological pole toward which to turn, and with the West as the major viable source of economic assistance.

Politics aside, it would seem that the basic NWICO assumption that information plenty is concomitant to and predeterminate of economic prosperity, remains at least arguable.

In hindsight, it appears that the East-West politicization of the NWICO debate merely served to distract attention from deep seated problems which persist and are likely to grow more pernicious in the short term.

Now that we are freer of the bonds of conflicting East-West ideologies, perhaps the time has come for technocrats - librarians, computer programmers, journalists, and communications specialists to address

the problem objectively, and from a holistic, information science perspective. This effort might consist of developing better ways of exporting development information from the rich nations of the North and West, to the poor ones of the South and East, and of importing knowledge of developing countries through development education activities.

For working definitions, let us say that development education is the activity of acquainting Western populations with the problems of Third World and with its various cultures. Development information is that required for economic growth and the improvement of social conditions. In order to effect change in the developed world, this paper contends, it will be necessary to arrive at a new synthesis, acceptable to both laissez-faire liberals and to structuralist theoreticians who believe to various degrees in government involvement with the economy. Most importantly, since information technology is increasingly becoming the key to economic prosperity, it behooves us to help redefine the debate as an information science issue, rather than a media studies problem.

Before proceeding, it might prove beneficial to set out some working definitions. Most importantly, the term "culture" requires clarification.

"Culture may be defined as the organisation of shared experience which includes values and standards of perceiving, judging and acting within a specific social milieu at a definite historical state. In other words, culture is the complex of material and spiritual goods and values created by human activity in the process of social development." (Jefkins and Ugboajah, 1986: 151).

This accepted, information must be seen as a part of culture. Since the terms "culture" and "cultural products", are most often used in the narrower sense of fine arts, performing arts, and especially the operation of the mass media and news, the NWICO debate tended to focus on the news and the media, and not on other types of information - scientific, technical, and so forth.

The year 1980 saw the publication of Anthony Smith's *Geopolitics of Information*, and the report of Unesco's MacBride Commission on world communications problems, *Many Voices, One World*. Both works described an emerging model of world communications problems, and proposed a political framework for their solution generally referred to as the New World Information and Communications Order (NWICO). However, neither work could offered specific agendas or timetables for resolution. Smiths' scholarly work never set out to do this, while Unesco, as an organisation operating by consensus, could not impose its political will upon member nations.

The NWICO received much attention in the press, due mostly to the opposition of Western nations to its implications for journalism. Over the past decade, the defence or refutation of NWICO claims became a major preoccupation of the literature of the geopolitics of information.

Canada's Tom McPhail presented a comprehensive analysis of the NWICO's major issues and constructs, emphasising the role of Unesco and the Non-Aligned Movement in NWICO policy

formation (McPhail, 1981). Daniel Meyer sought to test the key hypotheses behind the NWICO analysis of communications structures (Meyer, 1987). William Preston, Herbert I. Schiller, and Edward S. Herman provided definitive analyses of the political aspects of the NWICO, including its treatment by the media. (Preston et al. 1989).

Johan Galtung, in various writings, proposed a "structuralist" model of centre-periphery relations to explain the patterns of information exchange, elaborating upon the work of writers such as Rein Turn (1979). Others such as Jenkins and Ugboajah (1986), Tunisia's Mustapha Masmoudi, and writers from India, Africa and South America, described the effects of the current system of communications infrastructure and information production upon Third World development.

In the structuralist model of communications, unprocessed information flows from underdeveloped nations to the developed countries of the West or North, much as do the raw materials of industry. Information users in the developed countries interpret, process, and act upon this information, redistributing it in turn to the client states, along with more information about their own activities, cultures, and politics. Thus, the Third World nations come to be viewed through the eyes of the information interpreters of the developed nations, whose organisations control both the finances and infrastructures of the distribution system, while the developing nations never quite receive the latest information, nor the latitude of interpreting it to their own advantage. As well, in terms of pure volume of information produced and consumed, the developing nations lag far behind.

Because many of these writers argued in particular against de facto media cartels, because of political problems within Unesco itself, and because of the East-West rivalries of the times, the NWICO debate came to be treated as a confrontation between capitalism and Soviet communism. Opponents charged, with some justification, that the NWICO proposals were part of a larger communist agenda.

Smith's Geopolitics, focused almost exclusively upon the imbalance evidenced in the news media. The choice of focus is far from arbitrary, since Smith viewed this area as the most contentious.

"The conflict between North and South over the dissemination of news is more intractable than any other contemporary debate over the unfair distribution of earth resources, for it intrudes into the very culture of Western societies." (Smith, 1980: 15).

Because of the way in which news is gathered and distributed, Smith suggests, Western audiences have become conditioned to a view of the Third World which is founded upon "wrong or ill-judged information", and which can be characterised as "exploitive, patronizing, and distorted." Moreover, because of the vast market for news which the Western audience represents, this view has become "self-feeding" or "self-sustaining".

It remained difficult, Smith contended, to provide a balanced view of the Third World, since the news gathering and disseminating organisations, as well as their technological infrastructures were controlled by a few Western nations:

"The Third World has accused the West of cultural domination through its control of the major news- collecting resources of the world, through the unstinted flow of its cultural products across the world, and through the financial power of its advertising agencies, its international newspaper chains, its newsprint companies, and its hold over the electro-magnetic spectrum on which broadcasting, navigation, meteorology and much else depend." (Smith, 1980: 13).

Smith argued that "news imperialism" obtained from bias in content as well as economic factors. Due to marketing practices, the methods of news collection, and the structure of news itself, audiences in both the producing and consuming states received a biased picture of world.

"Our mental media picture of the world is compounded of our Western interests within it and is supportive therefore of those interests. The struggle to escape from our bad image of the Third World is an essential stage in its struggle for independence." (Smith, 1980: 10)

While the North comes to know the South primarily by means of news reports, Smith contended, the exporting nations reinforce their own cultural images in the client nations through many other "physical and cultural" exports. Films, tourism, and consumer products such as automobiles are possible examples. As well, journalists from those nations and abroad report frequently on activities in the developed nations. However, because of the way in which news is constructed and marketed, emphasising the most violent or dramatic images, the media present a selective or distorted image of the less developed nations.

In interpreting Third World events for domestic audiences, Western journalists apply their own standards of propriety. Here lies the crux of media bias:

"It is what the agencies and western journalism do inadvertently which is the trouble. We think of the price of motor cars as necessarily rising through no one's fault; we think of the price of petrol rising as a direct result of the 'greed' of a few Arabs." (Smith, 1980: 110).

Smith names four main Western agencies, United Press International (UPI), Reuter, Associated Press (AP), and Agence France-Presse (AFP), as the primary producers and controllers of news. Subsequent writers usually included TASS, the former Soviet agency, in a "big five" of news organisations.

One solution to the problem of news imbalance was thought to be the institution of a more bi-directional flow of information, which recognised freedom of expression or communication as a collective right of nations as well as an individual right.

In other words, NWICO advocates suggested, a small under-reported or mis-reported country should

have the right to rectify its public image abroad.

The NWICO debate focused on the desirability of a balanced and controlled flow of information, as opposed to a free and unrestricted one. This can easily be interpreted as an argument for freedom of the press versus censorship. Smith warned that the call for a balanced flow of information presented "a double crisis, intractable both in doctrine and in management." (Smith, 1980: 16). As Ithiel de Sola Pool remarked, "The slogan of protection of national culture most often really means the protection of an existing government, or of some special interest within it." (Pool, 1990 :125)

The concept of a link between communications and control is fundamental to cybernetic theory (Wiener, 1948). Wiener stressed that in all organisms, from amoeba to nation state, communications are fundamental to interaction with internal and external environments. As Canada's Francis Fox, chair of a major federal cultural policy review committee noted:

"The important thing about information technology is not so much that it uses and processes information - which it does in abundance - but that it is fundamentally a control technology. If we are to understand the nature of the new information technologies, it is necessary to focus less on their content and more on their function (i.e. regulation - in the cybernetic sense of the term - of systems, or in other words, control.)" (Babe, 1990 : 250).

Canadian historian Harold Innis noted another effect of communications media, namely, their ability to alter our perceptions of time and space, and consequently, our expectations of other people's behaviour. In studying diplomatic messages sent during the early years of the telegraph, Innis noted that a 'prompt response', indicative of the correspondent's sense of urgency and seriousness, soon came to mean a telegram rather than a letter. This raised expectations about the time required for responses, and in effect made the world a smaller place (Innis, 1954).

This condensing of space and time became more pronounced with the advent of the telephone. Pool calls the effect, the "spatial reorganisation of activity", and takes special note of its ability to undermine existing organisational hierarchies, and to enable corporate decentralisation on a global scale.

"Another effect of the telephone was also to loosen hierarchical layering. As Marshall McLuhan put it, 'The pyramidal structure... cannot withstand the speed of the telephone to bypass all hierarchical arrangements...'" (Pool, 1990: 69).

This predicted "decentralising" effect characterised the "global village" conjectures of MacLuhan, and was evident in works of writers such as Hiltz and Turoff (1978), who described the new America as a "network nation". However, recent writers such as Heather Menzies (1989), and Vincent Mosco (1989), point to de- skilling of workers, centralisation of decision making, and other "centralising" effects of the electronic technologies. Far from producing a new, democratised, post-industrial, "information age", such writers argue, the new trade in an information commodity has merely resulted in a refinement of the methods of industrial society and the market economy.

As well, liberal Western schemes to speed the Third World toward development may have helped to perpetuate indigenous elites. Citing the case of the Philippine press, Smith contended that bilateral grants, training, or skill-transfer programmes resulted in "transplanted journalism", and the formation of elites who were in effect "internal emigres", divorced from their own cultures. (Smith, 1980: 155). As an Indian national observed, "News travels faster but the rural elite are the first to have it." (Smith, 1980: 161). In concluding that the existing information order is "a product of and has itself extended the historical relationships between the 'active' and the 'passive' nations," (Smith, 1980: 175), he emphasised the systematic and endemic aspects of the structuralist argument.

"We have learned that the de-colonisation and growth of supra-nationalism were not the termination of imperial relationships, but merely the extending of a geo-political web which has been spinning since the Renaissance." (Smith, 1980: 176).

As Smith accurately predicted, the clash between socialist and capitalist views of press freedom made the NWICO debate an easy target for conservatives like Leonard Sussman of Freedom House and Owen Harries of the Heritage Foundation. (Preston et al., 1989: 209-216). Let us now examine some of the concepts of the New World Information and Communications Order, its historical origins, its key documents, and some of the major schools of thought in favour of and opposed to the NWICO. In particular, the Western reaction to the NWICO will be examined with reference to the terminology of some of its major documents.

Principles and Premises

The basic premise of the movement for a New World Information and Communications Order (NWICO), was that an imbalance existed in the direction, volume, and types of information exchanged between adequately developed countries and the Third World, which was detrimental to development and systemic in nature. Of equal importance with, and logically prior to this conception, is the ethical notion that information should be viewed a shared resource or as a social good rather than as a commodity.

The major documents of the NWICO include the Unesco Media Declaration of 1978, Unesco's Statement on Journalistic Ethics, and the report of the International Commission for the Study of Communications Problems (MacBride Commission), published in 1980. NWICO premises included the assertion that information is necessary to economic development, and that any attempt to establish a New International Economic Order (NIEO) must incorporate, or even depend upon, reform in the world communications system.

In the chief NWICO paradigm, (the structuralist model), the current world situation is characterised by the dominance of information producing nations over those which consume cultural and information 'products'. The set of relations between these "know" and "know-not" nations, has been described variously as a centre- periphery situation, as a North-South conflict, or as a relationship of neo-colonialism or neo-imperialism. The structuralist school included "neo-Marxian journalists, many Third

World diplomats, and theorists like Johan Galtung." (Meyer, 1985:10). Galtung's major contribution to the platform is his "centre-periphery" typology, which provided a perspective on cultural dominance.

"According to this schema, nations at the Centre... dominate a 'feudal network of communication'. The Centre owns the major news agencies and 'Centre news takes up a much larger proportion of Periphery news media than vice versa'... users in the Periphery 'come to see with Centre eyes.'" (Meyer, 1985: 10) quoting (Galtung, 1979, 165-166).

Galtung's schema was outlined in a paper entitled "A Structural Theory of Imperialism". As well as modelling centre- periphery relations, it attempted to account for the "community of interest" mechanisms which perpetuate the relationship, and to explain the system's resistance to change. (Galtung, 1971). Representatives of the structuralist school include theorists Herbert I. Schiller, Tom McPhail, Keohane and Nye, O'Connor, Hymer, and MacBride commissioners Garcia-Marquez and Juan Somavia, Hubert Beuve-Mery, and Mustapha Masmoudi.

The range of problems addressed by the NWICO included cultural dominance, concentration of media ownership among de facto cartels, transborder data flows controlled by multi-national corporations, the effects of tourism and advertising, and the uneven world allocation of radio, satellite, and telecommunications technologies and infrastructures. The NWICO proposals held that all of these relationships ran counter to the interests of the developing world, threatening self- determination, sovereignty and economic development. Although the notion of a revised world information structure would entail the establishment of a "free and balanced flow" of all sorts of cultural, scientific, technical, and financial information, the debate over the NWICO tended to focus on perceived problems with the news media.

Although the relationships described by the structuralist model were generally accepted, the negative effects of current world information flow were disputed by the NWICO's liberal and conservative opponents. Some of these, endowed with the optimism of Daniel Lerner, or Ithiel de Sola Pool, believed that the current system was either inherently liberating, or would develop of its own accord, or could be adapted to address the problems of developing nations through sufficient attention to education, or technology transfer, or the development of Third World infrastructures. The more conservative among free market thinkers favoured the continuance of the current information regime.

Problems With the Agenda and the Forum

Those who sought to implement the NWICO proposals had to contend with vigorous opposition from within the so-called 'dominant' countries - principally from the United States and to a lesser extent from Britain (Preston et al., 1989). In retrospect, we can categorize the problems with NWICO implementation as: problems inherent in the NWICO formula itself, difficulties in proving the veracity of its claims, complications arising from the use of Unesco as a forum of discussion, bad will occasioned by "stridency" in the language of proponents and opponents, and ideological differences over basic concepts. As well, the fact that the scheme was to a large degree a construct of Third World diplomats

such as Tunisia's Mustapha Masmoudi and other Non-Aligned Movement ministers, coupled with the choice of Unesco as a forum for debate, occasioned resistance from the developed nations.

While the United States pointed to the adoption of NWICO as one of its reasons for pulling out of that agency, the US was already at loggerheads with Unesco before the NWICO issues were tabled (Partan, 1975). US participation in Unesco depended upon the resolution of several different political concerns, of which the NWICO was merely one. However, at the height of its "vitriolic name calling" phase (during the mid 1980s), the NWICO debate became the occasion for ad hominem attacks on Unesco's leaders from the West, and "strident" calls for the overthrow of imperialism from the Third World.

Both supporters and opponents have emphasised NWICO claims about inequalities in news flows, and freedom of information as a collective right of nations. These notions ran contrary to Western ideas of press freedom and free markets. Moreover, they served to distract debate both from deeper phenomenological analyses of world culture in its broader sense, and from establishing practical agendas for the amelioration of conditions in the Third World. Terminology of the NWICO Proposals On 28 November, 1978, at the twentieth General Conference in Paris, Unesco issued a proclamation calling for the establishment of a New World Information Order.

At the same conference, the International Commission for the Study of Communications Problems, (the MacBride Commission), which had been established by Unesco in 1976, presented its interim report. The final draft of the MacBride report was published in 1980. Unesco's policies toward the media are to be found in both sources, and in attendant documents such as the 1980 "Statement on Journalistic Ethics", which was reaffirmed at the 1983 Mexico select committee meeting. These documents tend to be conflated in the literature of Unesco critics. It seems essential to begin by examining the language of the 1978 Media Declaration itself.

The document, which came to be known as the "Unesco Media Declaration" or "Media Charter", bore the full title: "Declaration on the Fundamental Principles Concerning the Contribution of the Mass Media to Strengthening Peace and International Understanding, to the Promotion of Human Rights, and to Countering Racialism, Apartheid and Incitement to War." Its full text appears in Meyer (1987). The phrase "countering racialism, apartheid and incitement to war", occurs no less than four times within the body of the proclamation, as well as in its preamble and title.

The link between the goal of defeating these ills, and Unesco's scientific, educational, and cultural role is established in Article III(2), which asserts that "aggressive war, racialism, apartheid and other violations of human rights [are] inter alia spawned by prejudice and ignorance." Thus, combatting war could be seen as part of Unesco's mandate of disseminating information and promoting literacy and education. The language of this clause recalls the maxim, "Wars begin in the minds of men", and is included by way of allusion to the Unesco constitution.

In good legalistic tradition, the Declaration contained in its preamble fourteen "recalling" clauses citing traditional UN concern with information, communication, and the press. These clauses included

references to the Unesco constitution, the 1945 Charter of the United Nations, and to various UN resolutions on the subject, establishing the declaration's historical precedent. The body of the proclamation consisted of eleven articles, providing in the main for recognition by member states of the rights of freedom of opinion, expression, and of information, and calling upon them to exert their efforts to strengthen peace and to promote education.

The provisions which were new and innovative with in declaration consisted of calls for the establishment of "equilibrium and reciprocity" in communications, and a freer and more balanced flow of information between the advanced and developing nations. The provision for restructuring global communications and information distribution sparked adverse Western reaction, since mass communications were and are tied to the commercial and national interests of the developed countries. As well, attempts to regulate the media through import quotas, indigenous content regulations, or accreditation schemes, entail the risk of misuse by totalitarian governments, and appear to limit the freedom of the press, which is enshrined in Article I of the Constitution of the United States, though not, perhaps, in the constitutions of other nations.

The document called for the establishment of conditions "guaranteeing [journalists] the best conditions for the exercise of their profession" in Article II(4), and in Article X, for the procurement by member states of "adequate conditions and resources" to enable the Third World press to expand, and a respect for "different economic and social systems" - a fairly transparent reference to the now-defunct Soviet economy. States should ensure, the declaration said, that journalists enjoy the proper conditions in which to carry out their duties. Article XI called again for a guarantee of "the existence of favourable conditions" for the exercise of journalistic activities.

The declaration did not specify what these conditions should be. The declaration's connections to economic policies emerged in Article VII, wherein the link between the UN's proposed New International Information Order and its New International Economic Order was explicitly stated; "...the mass media contribute effectively to the strengthening of peace and international understanding, to the promotion of human rights, and to the establishment of a more just and equitable international economic order." Calls for greater balance in information flow to and from developing countries appeared in Articles VI and X. The latter called on member States to "facilitate the procurement by the mass media in developing states of adequate conditions and resources enabling them to gain strength and expand", and to co-operate with the media internally, with other Third World states, and with the more developed nations.

Viewed out of context and with hindsight, the Declaration appears to be a basically liberal [i.e. centrist as opposed to socialist] document. It repeatedly elicited support for human rights, the freedom of the press, and the free flow of information. While emphasising the responsibility of the media for education and the maintenance of world peace, and making broad calls for more equitable distribution of wealth, it does not seem to contain any of the catch phrases so repugnant to Western sensibilities - denunciations of imperialism, for example.

There is certainly no mention of the "licensing" of journalists - a phrase which would become the rallying cry of NWICO opponents. However, if the Declaration did not recommend press restrictions, it did contain several phrases and terms which could be interpreted as accusatory of Western foreign policy and attributable to Marxist-Leninist inspiration. Additionally, as Daniel Partan remarked, (Partan, 1975), Unesco had for some time left itself open to charges of "politicization" when its documents touched upon matters only tangentially related to its educational, scientific and cultural mandate, which was always interpreted quite narrowly by its critics.

Unesco calls for cultural protectionism aroused suspicion of censorship or monopoly. As Ithiel de Sola Pool observed, "The slogan of protection of national culture most often really means the protection of an existing government, or of some special interest within it." (Pool, 1990 :125) In the view of Western critics, the Declaration, with its relatively mild phrases, and subsequent Unesco statements, constituted calls for the licensing of journalists and state control of the media.

In establishing a link between the NWICO and NIEO programmes, the Media Declaration could be interpreted as demanding a world Socialist distribution of wealth. Since to implement international protection of journalists, one must have a way of recognising them, the document seems to recommend an international press accreditation scheme. As well, it could be argued that there is a fine line between procuring resources for the media, and state procurement of the media themselves, or of their privately owned technological infrastructures.

If the language of the Declaration itself did not contain provocative Marxist or anti-capitalist language, plenty of examples could be found both in the statements of individual Unesco delegates, and in other official publications. Links between notions of "imperialism", "colonialism", "apartheid", and "Zionism" appeared in the subsequent Unesco Statement on Journalistic Ethics, as did references to "peaceful coexistence" and "disarmament", and the rights of nations to "self determination". While the 1978 Media Declaration presented a set of broad principles, it did not contain any concrete plan of action or set of regulations.

The MacBride Commission, formed by Unesco in 1976, presented its Interim Report at the 1978 General Conference. The final draft was ready for publication two years later. While the MacBride Report represented a remarkable scholarly and diplomatic effort, it too lacked an agenda, as Mustapha Masmoudi noted. (Masmoudi, 1985). In 1980, Unesco held a consultative meeting in Mexico City, which lent its support to the 1978 media declaration.

By the time of its 1983 Paris consultative meeting, the central principles of the NWICO had taken form. This meeting ratified a declaration on the "International Principles of Professional Ethics in Journalism", which stressed the rights of individuals and nations to "true and authentic" distortion-free information, and stressed the obligation of the media to provide one, suggesting that the journalists' primary duties were to "humanist values" rather than to their employers.

The ethics statement marked the first attempt at a set of NWICO regulations. As well, it explicitly

recognized information as a social good rather than a commodity. Principle III, the so-called "conscience clause", states: "Information in journalism is understood as a social good and not as a commodity, which means that the journalist shares responsibility for the information transmitted and is thus accountable not only to those controlling the media but ultimately to the public at large, including various social interests. The journalist's social responsibility requires that he or she will act under all circumstances in conformity with a personal ethical consciousness."

Two additional inclusions are significant: the identification of journalistic ethics with the "universal values of humanism... social progress and national liberation", (Principle VIII), and the expansion of the "peace" rhetoric of the 1978 Media Declaration to include overt references to disarmament and neo-colonialism. "The ethical commitment to the universal values of humanism calls for the journalist to abstain from any justification for, or incitement to, wars of aggression and the arms race, especially in nuclear weapons, and all other forms of violence, hatred or discrimination, especially racialism and apartheid, oppression by tyrannic regimes, colonialism and neocolonialism, as well as other great evils which afflict humanity such as poverty, malnutrition and diseases."

The term "disarmament" could well have been interpreted by the West as a Soviet code-word for the unilateral dismemberment of NATO's nuclear capabilities, upon which the 'balance of power' rested at the time. The Soviets, with their superior conventional forces in Europe, would have derived more latitude from nuclear disarmament. Thus, in the critics' view, "disarmament" really meant granting the Soviet Union de facto strategic superiority. Given the international mistrust of the period, it is not difficult to see how incorporation of such phrases into charters and declarations would raise concerns about Unesco's "politicization".

Many Voices Calling Vitriolic Names

The International Commission for the Study of Communications Problems had been formed during the nineteenth general conference of Unesco, held at Nairobi in 1976. This commission, operating under the presidency of Ireland's former Foreign Minister, Sean MacBride, presented its Interim Report at the 1978 conference. Its final report was published in 1980, under the title, *Many Voices, One World*. This report tended to be mentioned, especially by hostile writers, in the same breath as the Draft Declaration on Media Policy, which had been formulated after presentation of the Commission's Interim Report at the '78 conference. Moreover, certain resolutions suggested by members from the Soviet and Non-Aligned blocks, which were never actually included in either document and would have placed limits on press accreditation, were represented as having been central tenets of the New World Information and Communications Order outlined in the MacBride Report. (USNC, 1984).

The MacBride Report represents a masterly attempt at synthesis; to present the cases for structuralist models of information while recommending liberal solutions. In fact, dissenting opinions appended to the Report, Sergei Losev (a TASS official), Gabriel Garcia Marquez and Juan Somavia, and Mustapha Masmoudi, objected to various degrees to the document's liberal slant. (Unesco, 1980: 279-281). Masmoudi's noteworthy characterisation of the report as a "deontological code" explicates the report's

ultimate grounding: it rests upon voluntary rather than regulatory or prescriptive adhesion, and proposes few normative measures.

Article I(3) of the Unesco constitution prohibits Unesco from intervening in matters which are essentially within the domestic jurisdiction of Member States. (Partan, 1975: *passim*). Thus, any Unesco resolution has only the legal status of a recommendation. While calling repeatedly for "global perspectives", the Report accentuated personal actions and the duties of individual reporters or organisations as remedies for media inequities. In so doing, it endorsed no credible macro analysis of the problems, preferring to deal with them from a safer, ideologically neutral, micro point of view. Thus, despite Western concern, stress was not put on any systematic domination by "imperialist" forces in the MacBride Report's recommendations.

In suggesting individual rather than concerted social action, the Report remained an essentially liberal document, thereby leaving itself open to critics of the Left as well. An example of the compromise nature of the MacBride Report may be seen in its analysis on "Dominance in Communication Contents." The Committee identified various problems associated with the cultural message of media contents: the media may distort the contents of news or information by presenting inaccuracies or untruths instead of facts; media consumption may result in cultural alienation, so that the values presented in the media overshadow local or historical ones; external influences, such as transnational corporate interests, may affect media contents. However, the Report suggested that the responsibility for cultural dominance must be shared by both the producing and consuming nations, since consuming nations buy media products willingly, and could presumably refrain from purchasing them.

While structuralist analysis is evident in the first three points, this last exemplifies the Report's inherently liberal character. It is not surprising that socialist Commissioners such as Losev, Masmoudi, and Garcia-Marquez, should feel less than satisfied with the Report and should feel compelled to append dissenting opinions. Nor is it surprising that conservative member Elie Abel of the United States, should lodge his own complaints about the document's socialist leanings. Although the MacBride Report was lauded by both camps as a masterful and diplomatic effort, it could not lay the politicization controversy.

Moreover, it can be seen as a product of forces developing within Unesco and the United Nations as a whole. It is clear that by the 1976 General Conference, whereat Unesco's Director General, Amadou Mahtar M'Bow, was instructed to investigate the information issue, and to establish the MacBride Commission, a general ideological climate existed within Unesco, and perhaps within the United Nations at large, which contained elements inherently at odds with American foreign policy. The United States announced in 1983 that unless Unesco implemented changes in its budgetary system, and abandoned its "statist" approach, it would withdraw from the agency at the end of 1984.

In an eleventh-hour attempt to head off American withdrawal, the Executive Committee of the United States National Committee for Unesco (USNC), issued a privately printed "advisory", containing 23 points, supportive of Unesco and refuting the administration's allegations. (USNC, 1984). It is noteworthy that the signatories to the Advisory included Leonard R. Sussman of Freedom House, in his

capacity as Vice Chairman of the USNC.

Despite his opposition to various Unesco policies, even Sussman wished to effect change from within.

The Advisory argued that Unesco had been no more or less politicized than any other UN body, that the "rights of peoples" statements were not meant to detract from individual rights, that Unesco did not adopt a "statist" approach to issues, and that the USSR did not hold undue sway over Unesco. The USNC maintained, with arguable accuracy, that "The New International Economic Order (NIEO) had not been central to Unesco programs", but granted that it had been "reflected in many of the debates, publications and programs". The Unesco budget, argued the USNC showed only a small increase during the fiscal year, despite US claims of "profligate leaps", and that charges of Paris officials' leading exorbitant lifestyles were false.

As well, the USNC defended contentious programmes like assistance to the PLO and various African liberation movements, and to disarmament studies, by stating that they took small percentages of the budget and were educational in nature. (USNC, 1983: *passim*). The American withdrawal from Unesco, which took effect at the end of 1984, together with M'Bow's treatment at the hands of the American press, is well documented in *Hope and Folly*, the definitive 1989 study by Preston, Schiller and Herman.

An interesting feature of this particular sequence of political events lies in the fact that so much of the American campaign was waged in the pages of the press. This lent credence to what was perhaps the most audacious structuralist contention - that the press, even in democratic countries, is manipulated by "governments or elites". As well, the story illustrated, through the rather heavy media reliance upon anti-Unesco "experts" from the Heritage Foundation, that there are inherent weaknesses in the "official sources" policies of the media. (Preston, et al., 1989: 216, 222 and *passim*). It is far too easy, say critics, for administrations to promote "experts" whose views they find agreeable. Once established, such experts tend to become "convenience sources" for journalists.

How justified was Western concern over the "politicization" of Unesco? Did the Media Declaration and MacBride Report represent isolated phenomena, or an overall shift in Unesco politics? Or were these reports merely the latest examples in a leftward-leaning political climate within Unesco and the United Nations itself at the time? For instance, concern over the politicization of Unesco had already been aroused at least a decade earlier, with Daniel Partan's study.

Partan, who prepared his work for the American Association for the Advancement of Science, noted three frequently used meanings of the term "politicization". The term is used: "to refer to UNESCO decisions on matters that are considered by some to lie essentially outside the domain of 'education, science and culture'", "to refer to decisions reached through a process that some see as not reflecting the high standards of scholarship that should be expected of the agency," and "to reflect a view that specific actions taken by the UNESCO Executive Board or General Conference were taken to express a partizan political position, rather than as an objective, non-partizan determination on a matter falling within UNESCO's competence." (Partan, 1975:9).

While his paper came to be cited by NWICO supporters and critics alike, Partan stated clearly that it offered no conclusions about Unesco's politicization. (Partan, 1975: vii.) Under the directorship of Rene Maheu, Unesco had criticised Israel for archaeological digs conducted in the occupied territories after the 1967 war, charging that they violated the Hague Convention. (Partan, 1975: 95-99).

Unesco's calls for the elimination of colonialism and racialism had led to the withdrawal of South Africa in 1955. The organisation had applied sanctions against South Africa, Southern Rhodesia, and Portugal in 1966, and the General Council had issued a statement "deploring racial discrimination and apartheid", and "all forms and manifestations of colonialism and neo colonialism," as "a threat to international peace and security [and] a crime against humanity." (Partan, 1975: 122). In resolutions of 1960, 1962, 1964 the General Council had stressed Unesco's role in "contributing to the attainment of independence by colonial countries and peoples."

The distinction between countries and peoples is of note, since some of the groups seeking assistance were (arguably) "peoples" without "nations" such as the Palestinians, or the Southern Africans. These resolutions emphasised Unesco's desire for education planning, elimination of illiteracy, training of qualified national personnel, organization and development of science & technology, the preservation of national cultures and the development of information media. (Partan, 1975: 116). The document urged: "Unesco should take a more active part in the struggle against all forms and manifestations of fascism, neo-colonialism and other forms of oppression and tyranny, racialism and apartheid caused by imperialism..." (Partan, 1975: 126-127).

This language implies (again arguably), that the ills of racism and apartheid are products of Western politics. As well, critics charged Unesco with supporting guerilla and terrorist groups. Instances included the admission of observers from the Palestine Liberation Organisation, and the Organisation for African Unity, as representatives of "peoples struggling for liberation, self-determination and independence against colonial and alien domination." (Partan, 1975: 169). Nor were such sentiments confined to Unesco. The UN General Assembly resolution 3237 had invited the PLO to "participate in the deliberations of the General Assembly on the question of Palestine", in October of 1974. (Partan, 1975: 173). When the World Administrative Radio Conference (WARC79) argued for more equitable distribution of radio frequencies among the developing nations, the United States considered withdrawing from the International Telecommunications Union. (Surprenant, 1983: 225).

Outside Unesco, but under its aegis, various groups such as the International Organization of Journalists and similar bodies representing Asian, African, and Latin American media workers subscribed to NWICO principles as well. The International Progress Organisation entitled its 1985 Cyprus meeting: "The New International Information and Communications Order - Basis for Cultural Dialogue and Peaceful Coexistence Among Nations." (Kochler, 1985).

The use of Nikita Khrushchev's phrase "peaceful coexistence", in the title of a Unesco-sponsored seminar would have been enough to provide hostile observers with 'conclusive' evidence of Unesco's "politicization." According to William Safire, the term "peaceful coexistence" can be traced to V.I.

Lenin, and was used extensively by Khrushchev, who employed it in a very technical sense, declaring in a 1961 speech: "Peaceful coexistence... is a form of intense economic, political, and ideological struggle of the proletariat against the aggressive forces of imperialism in the international arena." (Safire, 1978: 522).

If the inclusion of such terms in the seminar's title, (even though dated by this time), was not enough raise administration alarm, then Hans Kochler's opening address could well have sent up the balloon: "As a result of the colonial past, the industrialized world is not only trying to impose its particular value-system and way of life upon other civilizations, it is also dominating and channelizing the flow of information from the developing countries to the outside world which reduces their chances to present their own views in an authentic way. The sophisticated infrastructure of information in the industrialized world prevents the development of alternative infrastructures in the 'Third World' which is contrary to the principle of freedom of information." (Kochler, 1985:1).

Kochler suggested that information imbalance was part of a systemic problem inherent in technology and in capitalism itself, which kept the have-not nations poor. As well, he suggested that the media were being used as Western propaganda channels. To be fair, Western agencies such as the Voice of America, Radio Free Europe, and Radio Canada International freely admit to having engaged in specific anti-communist activities. For instance, "As concern with Communist influence in Eastern Europe in the 1950s mounted, Russian, Ukrainian, Polish and Hungarian" were added to RCI's language set. (Canada, 1987: 103).

Appearing at the same conference, Mustapha Masmoudi, Paul Audley of Canada, Themba Sono, Andreas Sophocleous, and others provided less heated analyses. However, the anger and frustration of the less developed countries is evident in the presentations of speakers like K.P. Misra, and Saad Qasem Hammoudi. Hammoudi cited Harold Innis' analysis of media and society. (Kochler, 1985: 29). Sophocleous presented a pro and con argument for the unrestricted free flow of information, noting the potential dangers of "xenomania and the imitation of foreign models in all aspects of life" and the danger of "erosion of cultural tradition", and the "imposition of social and economic systems" on consumer countries. (Kochler, 1985: 78-9). Misra lauded Mahatma Ghandi and Indira Ghandi for attempting to find a middle way.

Mustapha Masmoudi's contribution to this seminar is important because it dealt in particulars. While pointing out the value of the Media Declaration and MacBride Report, (and claiming credit for the NAM's 1976 Tunis meeting), Masmoudi proposed a plan of action for NWICO implementation. Masmoudi argued for (a) a new definition of the right to communicate which would ensure free and balanced flow of information; (b) equity and equality based on democratization of informational means and structures on a horizontal as well as a vertical level; (c) the establishment of a right of access to information sources; (d) the discarding of principles such as the 'self control' of the media in favour of a standard code of ethics; (e) the protection of journalists in their relations with their employers as well as while on dangerous missions; (f) a right to rectification for the victims of selective or unbalanced information; and (g) the inclusion in the Berne Convention of favourable copyright concessions for the developing nations.

He emphasised the differences between notions of "press freedom" or "free flow" in Western and developing Nations, emphasising the NWICO ideals of the collective right to communicate, the rights of sovereign entities to protect their cultures, and the concept of a plurality of information sources. "The essential criterion of information freedom resides in the plurality of sources and in the free access to these sources and to all kinds of opinion." (Kochler, 1985: 9-22).

US Administration Perspectives

American receptiveness to Third World desires tended to vary with the government of the day. After a relatively tolerant treatment of Third World aspirations under Kennedy, (Preston, et al. 1989: 94-98), Johnson, Nixon, and Carter, America tended to revert to the "domino theory" of Soviet expansionism during the Reagan era. In retrospect, Richard Nixon observes:

"Poverty and bad government are nothing new. What is new is that millions who endure poverty and bad government can now know what they are missing. To see how the other half lives, all they have to do is switch on their television sets. Their realization that those who live in the West are far more wealthy, far more comfortable, and far better fed, has created enormous frustration and tension throughout the developing world." (Nixon, 1984:73).

In characterising the less developed nations as "frustrated" at the speed of development, Nixon's observation recalls Daniel Lerner's 1954 statement:

"These societies-in-a-hurry have little patience with the historical pace of Western development; what happened in the west over centuries, some Middle Easterners now seek to accomplish in years. Moreover, they want to do it their own way." (Lerner, 1954: 47).

Daniel Lerner proposed that Third World "modernization" would follow inevitably from urbanisation and exposure to the media - a notion which perhaps underlies Nixon's view. Both assume that the developing nations want to become more "modern" or "Western", and are understandably anxious to have it happen faster. By contrast, Ronald Reagan saw in the restlessness of the Third World, a confirmation of the "domino theory" policy of piecemeal but ongoing conquest for socialism. MacFarlane cites the following Reagan observation:

"Let us not delude ourselves. The Soviet Union is behind all the unrest that is going on. If they weren't engaged in this game of dominoes, there wouldn't be any hotspots in the world." [1]

The theory that the Soviet Union was promoting Third World causes as a means of isolating the United States figured strongly in administration thinking during the Reagan years. It is reflected in statements made by other members of staff, such as Jean Kirkpatrick and George Shultz, both of whom expressed

fears of Soviet "encirclement" from bases Nicaragua, the Caribbean and Central America. (MacFarlane, 1989b: 179).

MacFarlane, and others concluded however, that the Soviet Union was reluctant to become involved in the region. (Kramer, 1989: 66). Eugene B. Rumer of the Rand Corporation suggested that the Soviet military had "not shown much interest in the Third World", and predicted that under Gorbachev, the trend would continue. (MacFarlane, 1989: 126-128).

Soviet Perspectives

Although perhaps exaggerated, US administration concerns were not without foundation. Long after the American withdrawal from Unesco, during subsequent debate about the possibility of rejoining the organisation, Reuter moved a story entitled "Soviets accept blame for UNESCO pullout."

"PARIS (Reuter) - The Soviet Union accepts a share of the blame for the decision by the United States and Britain to quit the United Nations cultural agency UNESCO, the Soviet foreign minister said yesterday. The United States, Britain and Singapore left in 1984 and 1985, alleging financial mismanagement under former director-general Amadou Mahtar M'Bow. Eduard Shevardnadze said Moscow helped to pave the way because it felt ideas were being imposed on his country that were unacceptable." (Toronto Star, Thu 13 Oct 88: A9).

Soviet bloc commentators such as Alimov (1987), and Bulatovic (1978), affirmed the importance of the NWICO to the Non-Aligned movement, the congruence of aims between the NWICO and a New International Economic Order (NIEO), and the Soviet influence upon both. Citing the economic declaration of the 1976 Colombo conference of the Non-Aligned Movement (NAM), Alimov affirmed that in his country's view, the NIEO was essential to equitable distribution of wealth.

From a socialist point of view, the less developed countries are not "poor", since they possess ample resources and populations - which, in Marxism, are regarded merely units of capital. Rather, these nations are "backward", because they are unable to exploit their wealth. In a Marxist theory of value, capital is just "uncrystallized labour," and labour is capital turned productive. (P. Sloan, 1973: 38). Thus, Alimov could say that the underdeveloped nations were "wealthy", because they contained vast human resources.

Socialists could argue that it is in the interests of imperialist and neo-imperialist forces to maintain the condition of imbalance, as capitalist expansion demands the existence of sources of cheap resources and of consumer sales which the Third World nations represent. As Alimov acknowledged, the West had claimed that the Non-Aligned Movement did not represent "genuine non-alignment". The NAM countries did not maintain "equidistance" between the two contending ideologies - capitalism and communism, nor between the two competing superpowers.

The West alleged that the NAM represented a process increasingly 'politicised' and Eastward-leaning. However, to Soviet theorists like Alimov, the concept of "genuine non-alignment" was merely an ideologically inspired imperialist myth. Nor did he deny the Soviet Union's influence upon the NAM.

"It would be naive to deny the direct ideological influence of the Soviet Union on the development of the national liberation movement today. The ideas of the great October Socialist Revolution and the Soviet policy of peace meet the aspirations of the peoples of Asia, Africa, Latin America and Oceania... They have also influenced the evolution of the anti-imperialist concept and policy of non-alignment. This is a commonly recognized fact." (Alimov, 1987: 160).

This acknowledgement of the Soviet role highlights the gulf in understanding between East and West during the period. Alimov, Shevardnadze, and the others freely admitted the Soviet agenda - not because they wished to confirm Western conspiracy theories, but because from a Marxist-Leninist stance, that agenda was desirable. At the time, both superpowers supported client regimes and "liberation" movements in potential or existent states.

From Alimov's stance, the actions of imperialist military forces, or of neo-imperialist ones such as multinational corporations, could not be equated with those of the "progressive forces", namely, the socialist community. Whether by arms or by trade, they sought to maintain economic hegemony in the place of 19th Century style colonialism, while his side promoted the genuine liberation and self-determination of peoples. (Alimov, 1987: 167). Thus, from the Soviet point of view, Western economics could be held to blame for hegemonic activities in business as well as for "aggressive wars" and for supporting "tyrannical regimes" in order to protect bourgeois interests.

Soviet leaders such as Leonid Brezhnev maintained that it was not really necessary to promote of revolution in the less developed countries. Brezhnev's policy assumed the character of "resisting Western export of counterrevolution." (MacFarlane, 1989a: 10). However, Brezhnev asserted that, while maintaining peace generally, the Soviet Union had the right to intervene to protect communist regimes by any means including force, and to assist in otherwise sovereign states wherein tendencies toward capitalism indicated attempts to subvert communism. This statement came to be known as the "Brezhnev Doctrine". (Safire, 1978: 177). MacFarlane remarks that the Soviet Union tended to view American criticism of this policy as hypocritical. While America supported repressive regimes such as Pinochet's in Chile, the US raised "an absurd noise ... about 'expansion', when the forces of progress aid freedom-loving peoples subjected to imperialist and racist aggression." [2]

Information was explicitly recognised in the Unesco Media Declaration and MacBride Report as a prerequisite for economic development. By corollary, the structure of world information flow must necessarily be viewed as supportive of the global economy. In Non-alignment and Information, the Yugoslavian writer Bulatovic asserted that the imbalance in communication flow was merely an extension of economic inequity:

"The existing imbalance and inequality in the sphere of political and economic relations has also gained full expression within the domain of information, the non-aligned countries having noted with concern 'the vast and ever growing gap between communicatoin [sic] capacities in the non-aligned countries and in the advanced countries which is a legacy of their colonial past' at the summit conference in Colombo." (Bulatovic, 1978: 10).

In Bulatovic's analysis, the term "information" was used almost exclusively to refer to "news", and domination in the information sphere to refer to the de facto monopolies of the major wire services. For Bulatovic, AP, UPI, Agence France-Presse, Reuter, TASS and Deutsche Press Agentur (DPA): "... practically constitute the exclusive sources of information used by the mass communication media in the insufficiently developed countries including also the national agencies which have a monopoly position in their countries with regard to the dissemination of news, and are in actual fact mere affiliates of the aforementioned agencies." (Bulatovic, 1978: 11). As well, the allocation of radio frequencies by the WARC was considered detrimental to the less developed countries (Surprennant, 1983 and 1989). By keeping the best radio frequencies to themselves - those upon which signals propagate easily - the developed nations force their poorer neighbours to install more expensive and powerful equipment, widening the gap yet further. (Bulatovic, 1978: 17).

Cooperative ventures such as the establishment of the non-aligned countries' News Agencies Pool sought to marshall collective buying power to offset the effect of media monopolies. Given the frank admissions of Eastern commentators that the goals of the NAM were tied to those of the NWICO and NIEO, and that all were beneficial to the cause of world socialism, coupled with the inclusion of Marxist- sounding phrases such as "hegemony", "neo-imperialism", and "domination", in the literature, it is easy to see how Western, particularly American, alarms could have been raised about Unesco's politicization. It remains to be seen how seriously Western interests could in fact have been jeopardised by Third World activism.

Western suspicion of any Unesco agenda supported by the Soviets served to enmesh the NWICO further in the political web. While the ideological bickering and "vitriolic name calling" continued, the genuine needs of the developing nations persisted. It is important to note, however, that the critics of the existing information regime included not only Soviet bloc commentators, but also Western scholars.

The Controversy over M'Bow

The NWICO agenda was complicated further by controversies over the character of Unesco's Director-General, Amadou Mahtar M'Bow. An educator with and earned Licentiate from Paris, experience as an education minister, and a great many honorary degrees, M'Bow was repeatedly characterised by the Western press as being "personally extravagant", a poor manager, "wasteful", given to patronage, anti-Western in outlook and deficient in academic credentials.

In what was itself a remarkable example of selectivity in the media, M'Bow was repeatedly referred to as

Unesco's "controversial", leader, and the organisation as "beleaguered", during his thirteen-year tenure, and during his unsuccessful 1988 bid for re-election. These ad hominem attacks against the Unesco leader were applied with dubious logic to critiques of the organisation's programme.

After 1985, Unesco's efforts to persuade the United States to return to the organisation included changes to budget and fiscal policies, election of a compromise candidate for Director General, and rewording of the controversial media charter. Sections of the media charter most offensive to the West, such as "Item 12", had already been dropped by the time of the MacBride Report, as noted by the Executive of the US Commission to Unesco, and well before the 1984 American pullout.

Simultaneously, however, M'Bow attempted to sue the United States to obtain the 1985 funding it had withheld. In 1986, jurist Karel Vasek called M'Bow's stance "legal nonsense" and resigned from his Unesco advisory position. On October 2 of that year, Reuter carried a story which quoted Vasek as "accusing Director-General Amadou Mahtar M'Bow of conducting a private war against the United States and Britain, and of harming international relations." [3]

M'Bow attempted to retaliate. The Western powers were merely using Unesco and the United Nations as a convenient scapegoat, he charged in a Reuter item of 21 October, 1987: "Some people have sought to make the failings of the U.N. system responsible for the most flagrant flaws in international relations," M'Bow said at the start of a full meeting of UNESCO's 158 member states. "But it can only reflect the dilemmas of the international community." [4]

While M'Bow had stated in 1986 that he would not seek re-election as Unesco's head, he changed his mind two years later. A plethora of Reuter and UPI reports criticized him for seeking an "unprecedented" third term in office during the November 1988 campaign.

While Canada remained in Unesco, its media followed the American line in opposing M'Bow's re-election. "Controversial M'Bow seeks third term as UNESCO head", proclaimed a 1987 Toronto Star headline.[5]

The article, derived from the Associated Press wire, portrayed M'Bow's action as "challenging Western governments that have criticized his leadership for the past 13 years." M'Bow's nomination had been proffered by President Kenneth Kaunda of Zambia, the article reported. An un-named Canadian External Affairs spokesperson voiced Canada's belief that "it would not be in the interests of UNESCO" for M'Bow to be given a third term." According to this official, Unesco needed "methods of "modern financial control." [6]

Another article dubbed M'Bow "dangerous", and to suggested his re- election "could spell the end of the cultural agency."

The story quoted "Western diplomats and observers", who contended that electing M'Bow "could lead to financial and political disaster, causing new departures by Western nations and further aggravating

UNESCO's budget problems." It presented an itemized list of M'Bow's failings, charging that "his call for new world economic, information and communications systems also offended the West".

"He lives rent-free on a \$159,000 salary and travels extensively... He is wasteful of UNESCO's resources, his critics say, signing over 70 per cent of the budget to staff. M'Bow's opponents also feel his academic qualifications are insufficient for the post of director-general." [7]

It is interesting that these stories repeatedly criticized M'Bow for his fiscal control without dwelling upon the politicization of Unesco, and made the NWICO appear to be part of his own personal agenda instead of the result of consensus reports. Western readers were presented with credible reasons for the Western pullout, but not all the reasons - perhaps not even the foremost reasons.

Nor did the controversy end with M'Bow's defeat. A compromise candidate, Spanish biochemist Federico Mayor Zaragoza, became Unesco leader in 1988. [9]

"Diplomats hailed the result", according to press accounts, "as signalling a new spirit of reconciliation" at Unesco. However, Mayor began to draw the familiar Western criticisms almost immediately. Reproaches varied from accusations of his being "too slow" in conducting reforms, to claims of extravagance in employing "hundreds of consultants" and seeking to create "44 senior posts at a cost of \$6.5 Million, figures which Mayor repeatedly denied. [8]

Western displeasure with Unesco persisted throughout the 1980s. The Reagan and Bush administrations continued to criticise Unesco for fiscal ineptitude, while admitting that "vitriolic name calling against the West" had "largely been eliminated". [10]

However, US administrations had other reasons to defer. One further source of dissatisfaction was the application of the Palestine Liberation Organisation for full membership in various UN bodies, including Unesco, in May of 1989.

At this point, both the United States and the PLO were both sending "observers" to Unesco. The US observer, Terry Miller, remarked in a Reuter story: "I think it's clear that the admission of the PLO as a member would make it much more difficult for the U.S. to consider rejoining the organization." Omar Massalha, the PLO observer replied that "Arab states were studying ways of compensating for the U.S. threat." [11]

In the event, the PLO settled for "observer" status. Nevertheless, the issue lent fresh fuel to administration charges of Unesco's politicization.

Meanwhile, Mayor, instituted cuts in Unesco's staffing, meeting and travel budgets. Since Unesco's mandate includes facilitating consultation among specialists of various nations, this revelation might appear unnerving.

More disturbing yet was Mayor's 1988 assertion that "documentation of all sorts had been cut by 50%" since he came to office. If the provision of documentation has indeed been curtailed to such a degree, it is clear that the US withdrawal has had drastic consequences for Unesco effectiveness as a provider of scientific and technical information. [12]

Finally, some concessions to the liberal theory of free flow of information seem to have crept back into the text of a revised Media Declaration. In November of 1989, a Reuter story announced a compromise: "The freedom of the press has returned to the halls of UNESCO," said Canadian delegate Tom McPhail. [13] Stating that the debate had "dogged the life of the U.N. agency for years", the story continued: "Critics of the original charter, the New World Information Order, said it was anti-Western and muzzled the press." Despite repeated reassurances from commentators with as widely diverging views as Masmoudi and Sussman, the notion of the NWICO as a proposal for licensing journalists persisted.

The warm reactions of various unnamed "Western delegates" to the revised charter's language may be accounted for by its adoption of two key stances. First, the new wording enshrined the liberal concept of freedom of information, though in a somewhat backhanded manner:

"The new text maintains the old charter's call for balanced information but adds 'without any obstacle to the freedom of expression'." (ibid.)

As well, the revised charter addressed a key liberal concern - that Third World governments might seek to nationalise more of the news media, either overtly, or by limiting funding and concessions.

"Amendments put in by Western delegates are aimed at ensuring that UNESCO funds will flow both to private and public media." (ibid.)

In 1990, US State Secretary James Baker announced that the United States would continue to observe the organisation, but would not rejoin Unesco. [14] A report to the Senate drafted by John Bolton, recommended staying out of Unesco, in order to enjoy "The leverage we retain as a sought-after non-member." Bolton's report criticised Unesco for spending "70 per cent of its money on a "top-heavy bureaucracy" in Paris and only 7 per cent on fighting illiteracy." Unesco, in the administration view, still suffered from "the same poor management and political bias" which led to US withdrawal. In this analysis, Unesco remained "excessively politicised."

It seems clear, therefore, that the "politicization" of Unesco was merely part of a broader phenomenon.

In the years since the Second World War, a great many new countries had come into being as the British, French, and Dutch, for example, dismantled their empires. There were many new voices in the United Nations and in Unesco, and as Surprenant observed, the United States could simply no longer rely upon consensus or upon its own technical sophistication to carry motions in these fora.

If the NWICO debate of the 1980s is viewed in this historical context, then attacks on the character and ability of M'Bow as Unesco director seem strident and misleading. The United States had found fault with M'Bow's predecessor, and would do so with his successor.

The politicization of Unesco, while real, was not an isolated phenomenon. It was merely part of an historical trend. Preston suggests that America could not come to grips with its sudden numerical disadvantage in the General Assembly, and therefore reacted badly. (Preston et al., 1989: 193).

Theoretical Challenges

Whatever the political inspiration of NWICO claims, two facts remain.

First, concern over development information results from the ongoing "frustration" of Third World nations noted by Richard Nixon. Second, the truth of the claims remains a fruitful area for study. The imbalance in the production and flow of cultural products remains, whether good or bad for the receiving nations.

The validity of NWICO claims about of media ownership went largely unchallenged on both sides. After all, corporate ownership can be established easily from sources like Who Owns Whom. However, liberals and structuralist were sharply divided about the adverse effects of media concentration.

Numerous works such as Smith (1980), the MacBride Report (Unesco, 1980), Meyer (1985), and Herman and Chomsky (1989), established the concentration of news flows in the hands of the "big five" agencies (AP, UPI, Reuter, AFP, and TASS), sometimes with the addition of other smaller agencies.

Herman and Chomsky, for example, referred to some 34 media agencies. However, most studies have focused on the established concerns of news flow, bias in the news media, the effects of advertising, the actions of multi- nationals, and trans-border data flows.

The effects of elites - such as non- media oriented multi-nationals with branch offices in the Third World, or privileged groups within such nations, go largely unexplored, despite studies of the "elite press", which have received some attention. (Mazharul Haque, 1988).

This may be due to the fact that the sorts of information which pertain most to development (financial, technical, scientific), are proprietary or restricted, and hence more difficult to study.

Some confirmation of this notion comes from the management literature. For example, one paper on transborder management speaks of the "flow of intelligence, ideas and knowledge" as being essential to multi-national operations. (Bartlett & Ghoshal, 1987). The most difficult problem for one company, the study says, was "the quick transfer of proprietary knowledge within the company." The solution for another - to transfer people, rotating senior staff worldwide, "thereby strengthening the web of interdependence."

While it may be argued that high-tech companies such as Xerox and Geac, which maintain internal electronic mail services, move documents, software, and management reports across borders with ease and in virtual secrecy, the management skills required to implement new products, strategies, or techniques cannot be transmitted electronically.

The most rigorous examination of specific NWICO hypotheses is to be found in William Meyer's work (Meyer, 1988). Beginning with an outline of the neo-colonial nature of contemporary news-flow patterns, Meyer specifies and tests the structuralist thesis and the theory of cultural dominance following accepted social science methodology.

Meyer's typology of conservative, reformist [liberal], and structuralist NWICO schools is worthy of note, as it forms the basis for an understanding both of the NWICO and of the objections to it which have been raised. The conservatives, represented by Leonard Sussman of Freedom House, and dissenting MacBride Commissioner Elie Abel, see imbalance in news flow as a "natural characteristics of information gathering and dissemination." He quotes Abel's objection:

"At no time has the commission seen evidence adduced in support of the notion that market and commercial considerations necessarily exert a negative effect [upon societies]." (Meyer, 1985: 7).

The reformist doctrine readily recognises the imbalance in communications flow, and acknowledges its adverse effects. According to Meyer, Sean MacBride represents the reformist school in proposing concepts such as "development journalism", and "development information", which would emphasise the training of indigenous personnel and the establishment of regional press agencies as a remedy for "spot news" and inadequate Third World coverage. As well, the reformist agenda includes amplification of the range of sources currently considered credible by the Western press, de-emphasising government sources as the sole "experts" on political events, and allowing the inclusion of "unofficial as well as official sources". (Meyer, 1985:9).

However, while the terminology may be relatively new, the earliest Unesco documents emphasised training of indigenous personnel, free flow of information, and mutual appreciation of cultural values. (Unesco, 1947, 1960). While Meyer (and Masmoudi) might well argue that it was not until the 1970s that the current labels became attached to these activities, their origins in the optimism of the post-war period should not be overlooked.

Meyer also notes that Galtung's theory can be extended well beyond the issue of news flow imbalance, to include the study of tourism, corporate presences, and other social or commercial relations which currently exist between former colonising and colonised nations. As well, he is fully cognizant of the major difference between the structural theory and its competitors - the structuralist tenet that information should be considered a social good rather than a commodity.

It is of note that liberal notions of technology transfer and development information, ideas which follow in the tradition of Daniel Lerner, include the training of librarians and information specialists, and the establishment of regional document delivery centres, repatriation of archival and cultural collections, and other mechanisms of improving development information delivery to the Third World as well.

Working within the system, liberals would seek to improve Western knowledge of the less developed countries (development education), while improving the flow of information needed for development to the LDCs and of exchanging it "horizontally" among them. CIDA's development education schemes, and Unesco's library training activities can be understood in this sense.

Structuralist accept liberal proposals to some degree, Meyer asserts, but only as precursors to more fundamental changes. Meyer points to proposals for Third World training centres "condemned by [Herbert] Schiller as tools of economic neo-imperialism". (Meyer, 1985: 10) quoting (Schiller, 1976:11).

Meyer concludes that while the "framework" of Galtung's schema is essentially correct, in that it accurately reflects the pattern of information flow, he has been unable to relate the actions of Western media to "cultural hegemony", the persuasiveness of their advertising contents to consumer behaviour, nor the effect of their portrayal of violence upon Third World crime. (Meyer, 1985: 58, 90, 108).

It may be objected that Meyer is testing isolated components, rather than evaluating an entire system. For example, advertising expensive consumer products in nations with low per-capita income will not likely produce much of a cash result, although it may occasion expectations about the "good life" which Meyer, using financial data, is unable to measure.

Collins (1990), challenges the very notion of cultural sovereignty in a recent book about Canadian culture. While freely admitting the overwhelming imbalance in consumption of cultural products, he argues that national identity depends more upon legal and political institutions than upon culture or communications. Collins sees the structuralist model of centre-periphery relations as the "dominant paradigm" among Canadian dependency theorists.

Collins' major argument with regard to media dependency is to be found in his criticism of Dallas Smythe (Smythe, 1981), by recourse to the "active audience" theory of Eliu Katz (Katz and Liebes, 1985).

The refocussing of attention to audience interpretation rather than transmitter value loading, is reminiscent of conciliatory passages in the MacBride report, to the effect that the consumer nations are free to reject cheap foreign imports. According to Barbara Roach such efforts represent an ideologically motivated attempt by writers "such as Eliu Katz and John Fiske... to undermine both the notion of cultural imperialism and ideology." (Roach, 1990: 5).

Additional challenges to the NWICO and calls for a reformulation of the its basic goals have recently come from sources within the movement as well as from its traditional opponents among the liberal

economic school. Salinas (1986), argues that it is time to recognize the congruence of NWICO and NIEO goals and concepts, and to shift the movement's focus from attention to media flow and toward the more crucial development issues of unequal access to scientific, technical, and financial information. Roach (1990), advocates a position which pays increasing attention to the democratic socialist agenda of the NWICO. Edwards (1990), suggests that the termination of the NWICO is essential to US interests, and that rejoining Unesco would be "premature", while Surprennant (1987), argues that US interests would best be served in a new climate of "mutual trust and good faith."

Surprennant reasserts that the issues of the NWICO, WARC and TBDF are inseparably linked, and suggests that concrete steps to ensure fairer access to radio frequencies and satellite parking orbits, and some indications of a US trend toward flexibility, the "information war" between developed and less developed nations has escalated during the years since the MacBride Report. The issues of trans-border data flow and media imbalance remain largely unaddressed, Surprennant claims, citing Unesco sources. Maintaining that resolution of these problems would be in the interests of both camps, he too suggests that the NWICO debate should be abandoned and further negotiations conducted under a new rubric and in a "spirit of mutual trust".

Roach (1990), argues that the NWICO debate has now been largely abandoned by Unesco, as part of Federico Mayor's attempt to appease the West, but points out that the agenda has been taken up by such groups as the Union for Democratic Communication, and the International Federation of Journalists. As well, she outlines persistent efforts by liberal theorists such as Eliu Katz, and conservative spokespeople such as Leonard Sussman, to undermine the movement. Meanwhile, she suggests, the problem of information disparity has grown worse, while the liberal idealism of Toffler, Bell, and the "information society" school remains unrealized.

Moreover, she maintains that the NWICO principle is insufficient to address the issues of cultural domination, and suggests a new formula which would abandon the concept of national sovereignty entirely. Arguing that the statist bias of the NWICO programme of "inter-national" development merely perpetuates Third World elites and neo-colonial relations, she proposes adoption of a democratic socialist notion of popular sovereignty. Integral to Roach's reformulation would be recognition of the interests of women and other minority groups, and of the effectiveness of mass political action.

Cautioning that the breakup of East bloc means increasing privatisation of the media, and creating wider markets for American cultural industries, she warns that the North-South focus of the NWICO debate, "always too narrow", is no longer even adequate. The new programme must address the problems of "have nots" regardless of geography. Roach argues that even among structuralist such as Kaarle Nordenstreng, a hidden bias against women and minority groups exists, indicative of an elitist attitude in general. Nordenstreng erred, Roach charges, when in organising a conference on the NWICO in 1990, he failed to invite any women. (Roach, 1990:4).

Roach's reminder that the "North-South" terminology is simply one of convenience is well taken. As early as 1979, Rein Turn had published an "Atlantic triangle" diagram to demonstrate that the flow of

raw data arrives in the US from countries to the East as well as the South, while cultural products and processed information flow the other way. (Becker, 1985: 133). With the recent changes in Eastern Europe, the "bonanza for US media transnationals" forecast in that region, increased traffic over the eastward- leading branch of the triangle should occur.

While Masmoudi and other Arab spokespeople have paid tribute to the "liberation of women" in NWICO speeches for some time, there remain broad gulfs between Western and Islamic interpretations of that particular issue. The Islamic notion of freedom - freedom to practice what Westerners might see as restrictive religious practices - is typologically similar to the pre- Glasnost Soviet idea - freedom from reactionary influence. Losev's 1980 charge that NWICO literature is "too westernised" could be reiterated with some justification as terms like "greening of the NWICO" and "grass roots politics" creep into the documents of its proponents.

Viewed from the "development information" perspective, the inclusion of concerns for women and minorities expressed in the Roach article, and in the agenda of the Union for Democratic Communication in which it appears, seem to complicate the NWICO agenda by interjecting Western interests.

From the "development information" angle, however, Roach's agenda seems worth considering. If the NWICO platform can be revitalized as a Western "consciousness-raising" tool, it may achieve its unrealized goal of affecting the "deontological code" of media producers and controllers.

As early as 1986, former ardent NWICO supporter Raquel Salinas suggested in a brief Information Development article that the agenda had produced no results. Lamenting that the NWICO concern over domination of news media obscured crucial role of business, trade, and international relations information, she suggested that the time had come to scrap the NWICO and "start all over". Contending that the NWICO and NIEO were identical, she suggested that the Third World nations band together to promote increased horizontal sharing of business information which would enable them to renegotiate mounting and unrepayable debts.

The sorts of information required by the debtor nations - namely, business information designed to "reduce uncertainty" and to "aid in decision-making" - are precisely the sorts of "restricted" information shared by creditor nations to their great advantage.

The information required for development is not, Salinas argues, the type of information conveyed by the news media. Thus, no amount of flow redirection in that sphere can address the crucial issues of development.

If Surprennant's dialogue of trust and cooperation were to occur within Unesco or the ITU, a reassessment of American policy would be required.

During the Gorbachev era, conservative perceptions of Unesco and the NWICO remained largely unchanged. A Gorbachev-era article by Lee Edwards, vice-chair of the US National Commission on

Libraries and Information Science, repeated many of the traditional administration concerns over Unesco " it was financially mismanaged, riddled with KGB spies, and neglected practical concerns in favour of ideology. (Edwards, 1990).

In Edwards' view, a serious flaw lay in Unesco's continued emphasis on the collective right to communicate. As well, Unesco programmes such as support for "national liberation movements" ran contrary to American interests. While acknowledging that M'Bow and Mayor had "instituted a few reforms", Edwards cited the Heritage Foundation's Edwin J. Feulner's charge that Mayor still recognized "the legitimacy of calls for a new world information and communication order", itself a "cause for alarm." He pointed to Unesco statements advocating "the overhaul of the role and the messages of the mass media through the prism of the state rather than the individual journalist," as evidence of the agency's continued politicization, and challenged Unesco to institute "its own Glasnost and Perestroika". (Edwards, 1989: 117).

As readers will no doubt have noted, some of the NWICO and NIEO jargon has survived. In a 1991 New York Times Magazine article, language columnist William Safire commented on US President George Bush's repeated use of the phrase "New World Order". [15] Safire provided a brief recapitulation of the introduction of the terms "New International Economic Order" and "New World Information and Communications Order", mentioning their introduction in the United Nations, but omitting reference to the Non-Aligned Movement. He noted that Bush's notion of a new order bore similarity to the NIEO idea, and remarked that Soviet President Mikhail Gorbachev's concurrent use of the phrase marked the first time both superpowers had adopted identical terms for major agendas. So far, Safire quipped, no one had picked up on the idea that Bush's "new order" was to be led by the "new world", that is, by America.

Conclusions

Despite the controversy, concrete steps have been achieved toward implementing selected NWICO goals through Unesco itself, other UN agencies such as the ITU, regional groups of Third World nations, and professional organisations such as IFLA, FID, and various groups of journalists computing and communications workers. As well, technological advances during the 1980s, especially in microelectronics and satellite communications, have removed some of the constraints operative at the beginning of the decade; chiefly because the price of computing has dropped dramatically, and perhaps also because of increased competition among communication satellite launch vendors.

New rules regarding communications satellites and radio frequencies were introduced in the WARC conferences. The Non-Aligned Press Agencies Pool (NAMEIA) became operational. Unesco continued to publish practical guidebooks for librarians in the Third World, to make library and document processing software available to them for no charge, (Unesco, 1989), and to co- sponsor conferences and training programmes.

On the development education side, agencies such as the Canadian International Development Agency,

the National Film Board of Canada, the Canadian Broadcasting Corporation, the Public Broadcasting System in the United States, and the British Broadcasting Corporation, have produced many excellent programmes about the problems of the Third World intended for viewing in the West.

In development information provision, advances have occurred as well. Canada's Northern Network beams television into the Arctic, while radio networks in Cameroon's and the Caribbean, and India's satellite broadcast systems provide health, agricultural, and technical information in rural areas. Perhaps most importantly, with the collapse of the Soviet Union, the "East-West" political orientation has evaporated.

It would seem to be an appropriate time to renew activity along the North-South axis.

The decade of the 1980s has been the occasion of widespread improvements in communications and computing technologies. These included innovations in information processing methods and infrastructures such as high speed packet switching networks, cheaper satellites, faster processors, cheaper disks, and fibre optics, and integrated digital and voice communications.

Consequently, it is even more feasible today to conduct business on a 'centre - periphery' basis. It may be argued that decentralized decision making is largely illusory.

Allowing branch managers to make more decisions locally poses less of a corporate risk because of the possibility of continual monitoring of resources, processes, and results by home office. Thus, ultimate control has not really been decentralised at all. In fact, quite the opposite may be said to have occurred.

Multinational corporations (MNCs), willingly set up branch plants in the Third World, where labour and materials are cheaper and government regulations less stringent. It is arguable that because of today's improved communications technologies, home office can retain much better control over the activities of MNCs world wide. The MNC thus becomes one of the principal sources of transborder data flow.

Marie-France Plassard pointed out in her annotated bibliography (Plassard, 1990), that Third World material is still hard to access from Western databases, citing S. Bandara's 1987 article in *Information Development*. Bandara "states that only a few of the scholarly journals considered important enough to be indexed are produced in developing countries, and that many of the scientists prefer to communicate through journals published in developed countries." (Plassard, 1990: 357-358). However, since the latter 1980s, database publishers such as Dialog have introduced new products such as the Arab Information Bank, (Dialog file 465), which may eventually help rectify this situation.

Some theorists such as Johan Galtung suggest that the corporate organisation of the American conglomerate has become the pattern of intergovernmental relations as well. Relations between America and the less developed countries, they argue, can be viewed in the light of the centre-periphery

paradigm. America, viewed as a corporate centre, retains its proprietary knowledge and technology, while conducting low level resource procurement and manufacturing activities abroad, but channels the profits home.

It has been suggested that protectionist policies, which would seek to exert national sovereignty by imposing restrictions on the volume or price of transborder data flows, could become a means of retaining information sovereignty.

The counter argument is simply that restrictions either on cash flow or data flow from any particular one of the less developed nations will be ineffective.

Another point made by critics is that commercial transborder data flow, like cultural communication, is predominantly one way. Home office gathers raw information from the periphery, to support decision making at home. Rarely does useful knowledge flow back to the periphery nations, and when it does, it likely concerns the introduction of proprietary processes or products. The sorts of information which would help Third World nations reach the stage of 'adequate development', are not those likely to be passed their way by the MNCs. (Salinas, 1988).

In addition to being material "have-nots", inhabitants of the periphery nations have become "know-nots" when it comes to possession of important decision-making knowledge, since raw data is increasingly processed into knowledge in the centre.

In summary, major reasons for the difficulties which have been experienced in implementing the NWICO scheme included muddled Unesco politics, the rejection of the agenda by successive American administrations, and in the inability of its supporters to arrive at consensus positions.

The NWICO debate tended to focus on press freedom, to the detriment of more urgently needed development information plans. It can be argued that Unesco may have been an inappropriate forum for the NWICO, since the Western administrations were already predisposed against various UN agencies. It may well be that the time has come for the NWICO proposals to be acted out by the professional organisations. With the advent of the so-called New World Order of the 1990s, the time is certainly ripe for the abandonment of rhetoric and the reasoned examination of the sorts of requirements identified by Salinas, Surprenant and the others.

On the beneficial side, however, the NWICO debate at least served to focus government attention upon information in a way hitherto unwitnessed. It produced general agreement on the structure of the contemporary world information situation, and engendered some willingness to restructure that system for the benefit of developing nations.

Incorporating suggestions from Salinas, Roach, and Surprenant, we can begin to outline the basics of a post-NWICO model.

Since there is little argument with the structuralist model of information flow itself, this part of the paradigm will likely remain intact. The new model should pay less attention to the news media, which constitute a minor percentage of all information flows across borders.

Proprietary information is unlikely to be disclosed by the multi-nationals, so attention to trans border data flows may prove another blind alley.

However, developing nations could study the corporate information exchange structures which enable creditors to conduct their business so successfully, and should consider emulating them.

A post-NWICO agenda should pay more attention to other aspects of cultural exchange as well - to tourism, the activities of non-governmental organisations, and to ways to popularize development education schemes. Rather than shielding tourists from the harsher conditions of Third World life, governments should consider ways of acquainting visitors with them gently yet impressively.

Finally, a New World Order should emphasise development information in its broadest and most practical senses. Planners should concentrate upon identifying and implementing the information technology truly required at the present time.

If information is indeed a pre-requisite to economic growth, then for the underdeveloped nations, information technology is truly appropriate technology. In short, it is time to reclaim the NWICO for information science and to get on with the job of implementing it. Trans-national professional organisations can be of assistance in promoting appropriate information technology.

The political alliances formed after the Second World War resulted in a bi-polar world divided into east and west. Meanwhile, technological and economic developments superimposed a North and South polarisation which has resulted in uneven growth and may have perpetuated the gap between affluence and poverty.

The emerging political reality of the 1990s will force the adoption of a new synthesis. This synthesis must combine the "Lerner hypothesis" - that 'modernisation' is inevitable, with the structuralist paradigm - that inequality is a basic feature of the system. Only when both sides deal with the logic of each argument rather than the ideologies, will the dialectic of information inequality find its resolution.

The following is written by by Bobbie "Jilain" Felder

Soooooooooooooooooooo..... Is this a conspiracy? It's rather interesting though... Not ALL is nonsens... :-) Owell... just read

The Omega Agency

The Omega Agency is the one running the show. They run the Trilateral Commission, the Council on Foreign Relations, control the Bilderburgers, the whole ball of wax. They are who people are talking about when one says orders come from "above the President" (*The third layer*).

The Omega Agency consists of a network set up much like the CIA. There are thousands world-wide who take their orders directly from the ruling council of the Omega Agency. This council consists of 10 to 12 people. George Bush and Alexander C. Haig are the only two names that I know at this point who sit on the council of the Omega Agency. The OA is the driving force behind what is commonly called the "New World Order." The OA's office is located at Langley AFB.

The OA originally planned to establish their world-wide control in 1995. But it was deemed that the time was not right, so they set a new target date for sometime in the year 2000. (*"That's why we have to talk"*) They are, above all else, a patient lot. Their plans to bring the world under one governing body, namely themselves, have been long in the making and thoroughly thought out. They plan to establish their NWO, for lack of a better term, in a time span of no less than 5 days. And they intend to do it without open war. How exactly this will be accomplished, I don't know yet.

Recall when President Reagan was shot. Haig made the statements to the press that "I'm in charge now." If you'll remember, he caught a lot of flack for that, and shortly thereafter, he was accused of various things that ruined his name politically. This was done by members of Congress who were aware of his seat on the Omega Agency council, and they feared losing their claim to power. Haig jumped the gun in his statements, and ended up giving up his political position because of it. Had Reagan died, we would have had Bush as President, and Haig as Secretary of State. Two men in power who sit on the OA council. But because of the stink raised by a few members of Congress, Haig faded into the background rather than risk exposure of his connection to the OA, or of the OA itself.

Recall when the Gulf War started. Bush used the exact words "New World Order" in his speech to the country. He said it several times, that the Gulf War marked the beginning of a NWO. The Gulf War was not a war about oil or the freedom of the people of Kuwait. It was a test of how well multi-national troops under the guidance of the UN would react in a war situation. The same holds true for Somalia

and Bosnia. Multi-national troops under the direction of the UN. The Omega Agency controls the UN.

Bush didn't lose the election to Clinton. Bush needed to be out of the limelight of the presidency in order to concentrate on and escalate the plans of the Omega Agency. And in Clinton, they had a stooge who would not rock the boat and who would do what he was told. Notice how quick Clinton has been to commit US troops to UN peace-keeping forces here and there. Notice who Clinton appointed as Secretary of State - Madeline Albright, the UN lady. Notice who Clinton gave federal land to - the UN.

Why the need for a one-world government? The reasoning of the Omega Agency is this: Simply put, the bullshit has got to stop. Crime is out of control on a world-wide basis, especially in the US. People are out of control, not taking responsibility for themselves or their actions. Population growth is out of control on a world-wide level. The judicial system of the US is a joke. The political system of the US and most countries world-wide is a joke, corrupted and polluted by greed and power-hungry people who don't care about the population they were elected or appointed to serve. Under the governing body the Omega Agency plans to put in power, this would end. End of trial by jury. End of living off of society and not contributing your fair share. End of taking advantage of others for one's own personal gain. All who are able would contribute to the growth and well-being of the world's society, or they would pay the price for not pulling their fair share.

What is this price? Basically, it will be like this: Those who are able physically and mentally to work will do so. If you have a job/profession at the time that the OA takes over, you will continue in that job/profession. If you are drawing welfare, but are physically able to work, you will work. Personal freedoms to come and go as one pleases world-wide will not change. Basically, the OA doesn't care what people do to amuse themselves, entertain themselves, etc., as long as they are working and contributing to the society as a whole. But there will be zero tolerance of any act that hurts/harms another. Crimes against another or against society will be met with the death penalty, if such crime is of a severe nature such as murder/rape/robbery. What is now considered a felony crime will be punishable by death. What is now considered a misdemeanor crime will be punishable by imprisonment on a work farm for a number of years equal to what the OA considers suitable payback for said crime against society. These work farms will be in the business of growing food, manufacture of clothing, textiles, etc. People sent to these farms will work for the specified time, or will be eliminated.

There will be zero tolerance for any crime that hurts/harms/infringes on the life of others. Example - a person making threatening phone calls to another will be picked up and sent to one of the work farms. A person committing a drive-by shooting will be punished with immediate death. (*Wat vind jij van de doodstraf?*) The policing of the populous will be carried out by men/women who are already chosen and merely waiting for the time when they will go to work for the OA openly. Most are current and/or former military people who worked special ops while on active duty. These people will be responsible for seeking out those guilty of a crime. Once the person is located, they will inform that person that they are guilty of said crime and immediately put a bullet in their head. End of crime problem from that person. Should the person's crime not warrant the death penalty, these Public Security Officers will pick up the person and deliver them to the work farm. If the person resists, they will be shot on the spot. No

trial, no jury, no lawyer, no Miranda rights. The Public Security Officer will have the authority to act as sole judge, jury, and executioner of the punishment that the OA declares fits the crime.

Population control will be accomplished by mandatory birth control by all people, men as well as women. Abortion will be freely available. (*Ja, da's goed*) There will be zero tolerance for child-bearing out of wedlock. The institute of marriage is looked upon with favor by the OA. There will be a limit of 2 children per couple allowed. Should one become pregnant after the 2-child limit has been reached, and despite the use of birth control, then the options will be either to have an abortion or to increase one's work load to compensate society for the burden of the extra child. Birth control and abortion will be completely acceptable in the eyes of the various religions world-wide. It will, in fact, be encouraged and mandatory under some religious doctrines. Recall VP Gore's meeting behind closed doors with religious leaders and NASA officials at the beginning of 1997.

But bringing people under control is not the only reason driving the OA There is another. The other reason is the extraterrestrials. They are here on this planet, living and working with the OA. Exactly which race this is, I'm not sure at this time. I highly suspect it is not the greys that are so well known. These ET's are helping the US with its space program and are working toward devising a plan to restore the planet's environment after the OA takes over. Their main reason for being here is to help the OA put a stop to the violent, out-of-control nature of the human race in general. Why? Because they fear us. They realized when we accomplished the first manned space flight that it was only a matter of time before we moved out into the universe. And they don't want our ways to infest their society. They are helping the OA for reasons of self-preservation of their society. They realized that we are the most violent race in the universe that is on the verge of space travel. And they don't want us spreading our warlike, violent, greedy ways to other parts of the universe and disrupting the order of their societies on other planets. They agreed to help the OA in the advancement of our technology and in the repairing of the damage we've done to the Earth's environment in exchange for the OA's cooperation in changing the ways of this world, bringing us humans into line with the societies of the other planets in the ET's sphere of control in the universe.

The OA has not taken control yet because there are forces within the existing governments of the world that are aware of their plans and oppose them. In the US, these forces are largely centered in the CIA and NSA. The CIA wants world control, but on its terms. The CIA wants to see a more communistic-type government set up on a world-wide basis. While the OA professes to believe in the maintaining of personal freedoms so long as one is a contributing member of society and not infringing on the lives of others, the CIA would rather see a world where all people are controlled in all ways, from what type of job one does to how one worships. It is the CIA/NSA/Air Force that is maintaining secrecy where the ET presence is concerned, not the OA. The Omega Agency, once it comes into power, plans to reveal everything to the people of the world. From the running of drugs to finance the Viet Nam war to the presence of ET's on this world for the last 50 years or more. George Bush himself is said to have made the statement that he will personally tell of his involvement in the running of drugs to finance the Nam war while he was CIA director. To the OA way of thinking, the ends really do justify the means, and in the case of the Nam war, the running of drugs was necessary to finance the operation in that country. Therefore, it was a justified endeavor. Not one to be proud of, but justified nonetheless.

The CIA/NSA/OA all monitor the internet closely. Especially IRC. The Net is described as the most dangerous tool in the world at this point in time because it is uncontrolled. Those who talk about these types of things or carry information about these things on their web sites are closely monitored. In "government talk", orders to "watch" someone translates into instructions to keep track of them by whatever means necessary, and if they cross the line, if they stumble upon the truth of the matter and don't keep their mouth shut, "take them out". This can be done in any way that works without drawing too much suspicion. Such as brakes on the car failing, a random victim in a drive-by shooting, a random target in a store robbery where that person just happens to be shopping at the time, etc. The determination as to whether a person needs to be "taken out" is left up to the discretion of the one doing the watching. It is, in effect, an open license to kill to protect the Omega Agency from public exposure before it has deemed the time is right for it to take control of the planet. In some cases, it is determined that the person in question would pose more of a threat if they died. In such a case, the machinery of the OA goes into action to discredit that person. Character assassination, manipulation of others so as to turn people against the person, campaigns to brand them a disinformation agent, a liar, a mentally unstable person, etc., are put into motion. This has been found to be an effective method of dealing with someone who gets to the truth and doesn't keep silent. In fact, it has been found to not only discredit the target victim but to cast a shadow of doubt and suspicion on others who may have listened to the targeted person.

This plan for the establishment of a one-world governing body, namely what is now known as the Omega Agency, has been in the works for a long time. And it is said that it cannot be stopped. In fact, the person who related this information to me is looking forward to it. Those who oppose the establishment of the OA's NWO, and who cannot be brought into line through persuasion or manipulation will be eliminated as threats to society. This person passionately believes that this plan is the solution to the world's problems. This person is also awaiting the start of a new job - as a Public Security Officer. This is a position this person was trained for and accepted before leaving active military service.

Looking into this person's eyes for approximately six hours while we talked about these things leaves this impression:

**"We're the Good Guys"
the Omega Agency**

I continue to talk on an almost daily basis with the person who claims to work with the Omega Agency. Talks on the phone and face to face conversations. Looking into the person's eyes, I am still left with the same impression:

What follows is a summary of some of the things we've discussed over the past few weeks. I am now learning how to phrase my questions so as to get more detail in the answers.

Add Arlen Specter, Colin Powell, and (probably) Gerald Ford to the list of those who sit on the ruling council of Omega. Consider how Ford came to be president. Nixon learned of Omega's existence, and wanted in. But he wanted it all, total control. Nixon had to go. *(Nixon always destroyed the CIA with his 'behaviour'. The CIA says to be non-political. This was the only way to deliver neutral intelligence. Nixon made them political, make the intelligence to support his politics. Not the mention the cover-ups.. Anyway, he made them do stuff they didn't agree with)* Under Omega's way of thinking, no one man should have total control. Such would be too much of a temptation to abuse that power. The break-in at the Watergate Hotel was not planned by or encouraged by Omega. But they did take advantage of it. They made certain that the press didn't let go of the story, didn't bury it. They fed the info to Woodward and Burnstein. Omega was behind and was feeding "Deep Throat". Nixon fell in disgrace for coveting too much power, in the eyes of Omega.

Omega claims to be "the good guys". There are 15 people who have already been selected to function as "sector chiefs" under Omega's plan for a global governing body. A Sector Chief will be responsible for all the Public Safety Officers and people living in his area. One area will cover a wide territory - what is now several southwestern states, extending up to the border of Canada, west to the Pacific coast, and parts of Mexico, as an example. The lands have already been divided up into these sectors. Each Sector Chief will report to a superior, who will in turn report to the Omega Council. There is currently an Omega "Field Office", for lack of a better term, in every major city in the US and worldwide. These offices are run by Omega personnel as private businesses - stores, general offices, service-oriented businesses, etc. Most are businesses that deal with the public, giving the people employed there access to public thought and opinion. (Its not that hard to strike up a conversation with someone in a check-out line.) These stores/offices are where the "field personnel" hold meetings when such is deemed necessary.

Omega Agency uses America Online extensively for communication, but not exclusively. It is easily accessible from anywhere in the world, and it is a closed system. Recall that Alexander Haig, along with George Bush, was mentioned in the original posting about Omega as a member of the Council. Who are the members of the Board of Directors of America Online?

The main entrance to the underground base at Albuquerque, New Mexico, is located on the grounds of Kirtland Air Force Base in Albuquerque. The base beneath the city is massive, spanning nearly the area that the city occupies. The security system at the main entrance consists, in part, of retinal scans. These are reported as "foolproof", in that not only is the retina of the eye being scanned for identification, but also brain wave patterns are being recorded for the same purpose. There is no "machine" one has to place one's head in for the scan to be done. Merely stepping up to the door initiates the security scans.

Here, in the base under the city of Albuquerque, the aliens (mostly the greys and the greens) carry on

their lives here on Earth. They conduct scientific experiments, study human nature, human emotion, our civilization, etc. They are most baffled by our apparent need to worship a god-figure. They believe that there is an all-powerful creative force (*fate?*) that did indeed create the universe in which we all live. They don't, however, feel the need to worship it.

The aliens that are here are physical beings, just as we are in that sense. They do possess technology that allows them to time travel and dimensional travel, but neither the past nor the future, nor another dimensional plane of existence, is their place of origin. They know that the time is approaching when their presence will become known on a world-wide basis. Not just hints of their existence, not just stories of encounters with isolated groups of them. But rather undeniable, irrefutable evidence that they are, and have been, here. They are nervous about this, fearing for their safety. They base this fear on their observations of humans' general reactions to change, to the unknown, and to anything "out of the ordinary." But, at the same time, they realize that this must be done.

The grey aliens, as well as the greens, have both male and female of their species. Both races reproduce through sexual means. The race of aliens commonly called the "Nordics" are a myth, made up by those charged with the responsibility of keeping off track those who would expose these things ahead of Omega's schedule. The stories were created, and nurtured and expounded on, by Omega influence. This has been done in many, many situations and in regard to many topics considered as "fact" by those who profess to belong to the "ufo community". It is the ease with which unsubstantiated material quickly becomes accepted as fact that has aided Omega most in keeping a degree of control over which direction ufo and/or alien presence investigations have gone. And it is the same principle that has allowed them to remain in the shadows, going about their work basically undetected and unknown.

The grey aliens are mainly vegetarians, though they do have a taste for fish and chicken. And they have been known to enjoy a steak now and then. There is a fruit native to their homeworld that is very similar to the mango here on Earth. The mango is a favorite of theirs.

Recently a new, previously unknown alien race arrived on planet Earth. These new "visitors" are in the care of Omega personnel, and are at the present undergoing the "getting to know you" process. There is not, at this point, reason to suspect them to be of a hostile nature. Caution, however, is being used in dealings with them, as there is the possibility that these new aliens are not what they present themselves to be.

Under Omega's watchful eye, the world would become a place where all people of all races...earthly races as well as extraterrestrial races... would live side by side in peace. Each will contribute his or her fair share to the betterment and well-being of the community. The concept of war will become foreign to us, as it has become foreign to the aliens, who long ago purged it from their civilization. Feelings, impulses to act in certain ways, etc., will be dealt with first on a personal level, each taking responsibility for themselves. Only when self-discipline fails to curb the socially undesirable behavior will the law-sustaining elements of Omega step in. Violence in any form will not be tolerated. Recall Colin Powell's current project dealing with education of our children regarding violent behavior.

(Jeugdcriminaliteitspreventie) The Omega-approved education and preparation of the next generation has begun.

There are those forces at work who wish to counter the plans of Omega. The most active of these groups is the CIA. The reason for the CIA's non-support of the Omega agenda is this: Under Omega guidance, there will be no need for an organization such as the CIA. It is marked to be disbanded under Omega's system of world government. And this is not something that the powerful machinery that is the CIA wants to see happen.

Omega claims that they are the "good guys"....that they have the best interest of the people of Earth and the people of the universe at heart. They claim that under their leadership, the Earth will be able to take its place in the galactic community.

I've come to know this person rather well over the course of several months now. I have been able to substantiate through independent sources at least some of the things this person has told me in regard to a personal history and background. The things that I have been able to verify have been corroborated through more than one source on each point.

So, again, based on the facts at hand and the personal experience of talking face to face with this person, I must continue in my original impression:

OMEGA

The Shape of Things to Come?

Omega is a multi-level, multi-structured organization of secrets upon secrets. The organization was not thrown together overnight, and they did not, at the time of their creation as a group, expect to bring about the culmination of their plans in a matter of a couple of days. These plans for a unified governmental system that oversees the whole of planet Earth started years ago, near the turn of the century. The plans "jelled" and escalated in the early 1930's, when first contact with an other-worldly race was made. These extraterrestrials are not referred to as "aliens" by those in the inner circles of Omega. They refer to them simply as "visitors". And they look at them as people.. not "aliens" in the Hollywood sense of the word or in a derogatory manner in any way. The Visitors are merely people of a different nature than we humans.

There is within the inner ranks of Omega, a group known only as the "15". This group is "supervised" by a man known to me only by the name The Zodiac. Often, in conversation, Zodiac is referred to as "Mr. Z." At one time, Mr. Z used the alias Mr. Hallaran. This is but one of many aliases this man has used

over the years. Mr. Z is what is known as a "freelance assassin", having done work of that nature for the CIA, among other agencies and individuals. He is described as a "chameleon" of sorts, able to blend in to the local populus in just about any country in this world.

Mr. Z either formed or came into control of the 15 during the later years of the Viet Nam war. At the time, Mr. Z was in Nam to work with the CIA and their assassination jobs and drug running. The 15 originally did assassination work into Laos and Cambodia for the CIA. Their work was known as "Project Phoenix". The group was formed to escalate the Nam war through selective assassinations of key figures. At times they even wiped out entire units of our own men, making it appear as though the Viet Nameese were at fault. And their particular brand of work - assassination on demand - continued after the end of the Nam war.

The 15 are now in the service of the Omega Agency. They will, after the planned world government is in place, become "sector chiefs" of sorts. Omega seems to be set up on a heirarchical platform, with those in authority under the sector chiefs reporting directly to them. From that level, any information deemed worthy of calling it to the attention of the Ruling Council will be passed up the chain of command. The Public Safety Officers - those given the authority to act as judge, jury and executioner, if the crime warrants that punishment, fall under the authority of the sector chiefs...the 15.

From Omega's point of view, their plans are not for world domination. They believe they are working toward world betterment. Domination denotes control, and betterment merely sets the world to rights, so to speak. It intends to see the world living as one people, not as segregated countries with segregated peoples, each following their own agenda. Omega would see the world as one race - the human race - with all of its people working to contribute to the betterment and advancement of the human race as a whole. Omega would see the Earth take its place in a universal society, with the members of the Omega Ruling Council speaking for the Earth in that universal forum.

Omega's plans for the future of the world are based on the history of the Visitors. As the person who tells me these things said, "It worked for them, it will work for us." The Visitors (all races of them) each come from a world that is unified under one system of government. Each had a history similar to ours, with a multitude of countries on their worlds, each with its own system of government. The people of their worlds were united as a race, under one governing flag, prior to their moving out into the universe and openly interacting with other worlds. Omega intends to see the Earth do the same. The world will be organized as a unified planet under Omega's flag, and inter-galactic trade will begin, with Omega as the sole body empowered to negotiate trade agreements for the planet Earth.

Omega does not intend to "take over" by force. They plan to be welcomed with open arms by the people of the world. Look around you at the condition of the world now. Crime is out of control in most major cities. People live behind closed, locked doors with elaborate security systems. Third World countries depend on hand-outs from other countries (in particular the United States) for the very food they put in their mouths. Racial hatred continues to raise its ugly head all over the world. Religious tolerance is non-existent in some parts of the world. One of the first things we teach our children is to not talk to

strangers. We are doing this to ourselves, teaching our children from the earliest of ages that our own kind is not to be trusted. The world is out of control. We as a people are out of control. We have been manipulated into segregating ourselves in our own little spheres of reality. And from there, we cannot see the events going on around us, cannot see the many parts that make up the whole of the Omega plan for our lives. And we dare not open our doors to take a look at the world around us, for fear of getting a bullet in our heads from a random, senseless drive-by shooting.

Is the current condition of the world the result of human failings, the result of coincidence upon coincidence leading to the current state of human life? Or is it by design? Consider the following statement:

"Out of chaos shall come the New World Order."

- George Bush

Omega believes that the world will gladly accept them as the sole governing body of planet Earth. They believe their plan, when revealed in its entirety, will so greatly appeal to the people of Earth, that there will be no bloodshed, no revolt, no war for the right to speak for the people of this planet. They believe that with their help, and the persuasive help of the Visitors, that the people of Earth will "see the light" and accept Omega's system for world government. But make no mistake - Omega has the power to force the issue if they so desire. The military system is a system that follows orders. It is a heirarchical system that does not allow for independent thought at the lower levels. And the orders come from above. Orders are given and orders are followed without question. And Omega pulls the strings of the military, from the Commander in Chief on down the line.

This systematic breaking down and rebuilding of a world is a plan that was conceived in the minds of the men who formed Omega Agency. The plan "came together" after first contact was made in the early 1930's. The Visitors have told and have shown the men of Omega how a similar plan worked on their home worlds, and Omega believes it will work here. And they have been striving to bring that goal to fruition for a very long time.

Consider how often it is said "We are being prepared for something." Consider just our recent history, such as the increase in movies, TV shows, books dealing with the subject of ET life, ET visitation of earth, etc. Consider the governing body of the Star Trek world, the "United Federation of Planets." Consider NASA's press conferences relating the possibility of life on other planets. Consider the Catholic Church's reversal of their traditional stance on the subject of life outside the Earth. Step back and take an objective look at the history of the world in this century alone. It would seem that we are being moved toward some goal, that we are being manipulated toward a certain mind-frame, a certain way of thinking. And it would seem that, unless something drastically changes, the people of the world will not survive the current downward spiral of the world's societies. And then, consider this once more:

"Out of chaos shall come the New World Order."

- George Bush

Coincidence? Fate? or Design?

Omega's plans for the governing of the world do not include the right of the people to vote. The members of the Omega Council will look at possible candidates for offices of authority (as they do now), will investigate the character of these candidates (as they do now), and will judge whether or not these candidates are worthy to hold any given office of authority (as they do now). Under the Omega system, there will be no presidents, no senators, no congressmen. No lawyers, no judges, no courts. No jails as we have them today. Those who must be separated for the good of society as a whole will be placed on "farms" where they will work for the good of the Earth's peoples in general - growing food, manufacturing clothing, etc. The taking of a life will cost a life. An eye for an eye, literally. The Public Safety Officers, and their patrols, will be charged with the duty of keeping peace and law at the low levels. They will be the most visible and accessible of Omega's members to the public at large. These patrols will not be "wandering murderers", but will act, swiftly and permanently if needed, against any citizen witnessed committing a crime, such as armed robbery, rape, etc.

This does not mean groups of men and women physically walking a beat necessarily. Much of this patrolling of the people of the world will be accomplished by technology. Technology that is far beyond any that is currently known in the public sector. Technology that is a result of human and Visitor research and development.

And the current target date for this new system of governing going into effect is the year 2000. But Omega is, above all else, a patient lot. They will wait until the time is right to make their move. They have postponed the date once already, and will do it again if necessary. For Omega claims to truly have the best interests of the people of Earth at heart. Based on the knowledge they possess, knowledge gleaned from decades of interaction with Visitors, from years of studying the governing systems of other worlds through first-hand experience of those worlds, from years of observing the trends in the Earth's societies, from first-hand knowledge acquired through the manipulation of worldly events, Omega feels that they have what the world needs. In their minds, their plan for our future is the only logical, viable means for the Earth to advance and take its place in an inter-galactic society.

The people of Omega Agency watch the world closely. By all means at their disposal. This includes the Internet. America Online is their system. They use it for communication among their peers. The people of Omega have jobs, families, lives of their own. They are merely waiting for "the day", as they call it, finding the term "New World Order" and its connotations somewhat distasteful and misleading as to their real goals and purpose.

How much of this information given me is verifiable at this point? Very little. Thus, the argument that "people in positions to know these things don't talk about them" falls to the wayside. Because this information cannot be verified immediately, it poses no threat to Omega or their plans at this time. Telling me these things, and me in turn getting it to the Internet, presents no problem to Omega. It is, in fact, in their best interest at this time. What releasing this information does accomplish is a "testing of the waters", so to speak. By having this posted to the Internet, Omega can sit back and watch, which is

something they do very well. They can observe discussions of this material on newsgroups, email lists, web sites, IRC, AOL chat rooms, etc. And they can judge how well it is received, how much opposition there appears to be to it, but most importantly for their purpose....how much non-reaction there is. Apathy is the straw that will break the camel's back in the world today. It is the means by which Omega will move into power and remain there.

What portions of this information have been verified? Three independent sources have confirmed the existence of the man known as "The Zodiac." One even gave me a physical description matching that of my source person. The existence of Project Phoenix and its assassination teams has been confirmed by four ex-military people who were in Nam during that time. Descriptions of the security system in place at the entrance to the underground facility at Albuquerque, New Mexico, has been confirmed by two sources, one of which told me about the security system a full year before I got the same information from the Omega person currently talking to me.

And looking into this person's eyes, I still am left with the impression that this person is not lying. I may not be receiving the whole truth at this point...in fact, I'm fairly convinced that I'm not. There have been a few instances where my source has stumbled, revealing to me that there are still secrets being kept, and I have been purposefully misled on some points.

But overall, I believe, at this point, the information I am supplying here is basically valid. I strive daily to find a way to confirm these things, to verify the truth to these matters, or to expose it all as a fabrication of a sick mind. But I am alone in this, and I am not an investigator or researcher by trade. I am a nobody. I did not set out to find Omega. They found me. And they have a plan for me, one that frightens me. But I will see it through. I will do whatever it takes to get to the truth of this matter, for to turn away now and bury my head in the sand is not an option that I can live with. If the price of my involvement here is my life and soul, then so be it. Nothing comes without a price, and the truth is worth the price in this case, I believe.

We must know the truth. We cannot survive without it at this point. If these things are true - Omega, the Visitors, the universal society of which Earth must become a part - then we have no choice but to see this through. We must accept the facts that we have, as a race, been lied to and manipulated for countless centuries. We have been misled as to the real nature of the universe and all its many planes of existence, from the Creator own down to the physical world we live in. People of this world have known the truth for ages, and have kept it to themselves, passing it down to a select few and keeping the masses in ignorance and darkness. This is the way of our world, and it is the way that must stop, and stop now.

Reality is a hard thing to face, especially when that reality is not what we have been taught to believe it to be. If Omega, the Visitors, and a universal society of many races is the reality of our lives, then we must know this, and we must face it and learn to deal with it. For if a group like Omega is the future governing body of this planet, we have no one to blame for their rise to power but ourselves.

Omega is right on at least one point. The bullshit of this world must stop. We must open our eyes, see

the universe as it really is, and learn to live within its boundaries.

"There is nothing so powerful as truth,--and often nothing so strange."

-Daniel Webster

Mr. Webster recognized this fact years ago. Why can't we now?

OMEGA

The Thruth is Out There

This is the fourth installment in my essays on the Omega Agency. There has been much discussion of the material contained in these files. Those who know me personally have asked me questions about it, and I think it time that I address some of the most prevalent ones.

First of all, why am I being given this information? Isn't this in conflict to what is generally accepted as the nature of the ufo field? People who know of these things don't talk about them. That's the general assumption. Isn't the goal of the coverup conspiracy to keep such knowledge OUT of the public's hands and minds? I will address these questions with a question of my own. Is it not generally taken as a "given" that there is some sort of plan in action worldwide, some sort of agenda utilizing the media, radio, television, movies, books, etc., aimed at preparing the people of the world for some big event? There doesn't seem to be a lot of dissent on that point. So what is the prime goal of any plan? Is not the goal to see that plan through to its successful completion? Given that fact, why is it so hard to accept that as a part of the completion of this plan, disclosure of secrets long held will have to be made? It appears that there is a general assumption that when such disclosure is made, it will come through either a known, credentialed news media source, or a respected and credible researcher in the ufo field. But this is merely an assumption. Without the full details of the plans known, is it safe to assume that full disclosure will be made as it seems to be expected? Those who study the ufo field and its related topics should know that rarely is the expected the true nature of the way things are.

Second, I'm asked why I should expect anyone to believe these things to be fact. To that, I can only reply thusly: I don't expect anyone to believe it based solely on these writings. I would hope these writings would peak the curiosity of others, and they would, in turn, begin investigating these matters on their own. All I ask of anyone reading these files is that they consider the possibilities. I can say that I no longer have doubts as to the existance of Omega, the connection to the Visitors that Agency has, the agenda that they have planned, their connection to the military, etc. While I know that I'm not being given the whole truth at this point, I do know that the person telling me these things is not lying about his connection to Omega and the Visitors. I asked for proof of this, and received it. The experience

shattered my concept of the world and the universe we live in, destroying all I have been taught throughout my lifetime in a matter of 20 minutes. Though I still don't know a lot about what is going on with Omega, and where this is all leading, I do know this: we are not alone in the universe, and there are people of this world who have known this for a very long time. And they are now working to bring that knowledge to the public at large in a way that will be as least disruptive as possible.

Omega is not about mass control, it is not about mind control or forcing the world to bend to its will. Omega is about bringing the people of planet Earth into a universal forum, where we humans can begin to enjoy the wonders of space travel openly, can mingle with races from other worlds, and learn from their cultures, their art, their science, their philosophy. The men of Omega, especially the group known as the 15, have dedicated their lives to this purpose. And they will see it through. Omega has the power, the technology, the military might at its disposal right now to force the world to its rule. But they will not do that. Though I do not agree with some of the tactics they have used and are planning to use, I can see the reasoning behind it.

The Omega plan calls for the re-education of the world, of all the world's peoples, not just the citizens of the United States. Their plan is based on similar plans that have been implemented and have worked well on other planets, other cultures and civilizations that were in much the same shape as the people of Earth today. The plan was first hinted at by the Visitors during the time of first contact early in this century. According to Omega, it is a method of re-education that has worked on many, many worlds, and they are confident that it will work here. This re-education program is far-reaching and in-depth. It will reveal the truths so long kept in secret from the people of this world. And this is not merely the truth to the "ufo phenomenon". It reaches to the core of our society...from our erroneous views on the true nature of the Creator to our concept of the space/time continuum. And Omega does not expect to be able to re-educate the entire population of the planet. They are targetting the approximately 1% of the population that are open-minded, non-judgemental of other races and cultures, do not waste time arguing over trivial God images, have respect for the health of the world's environment, and are generally willing to explore all possibilities. The other 99%, according to Omega, are basically "sheep" and will follow where they are led.

The third most common question I am asked is why am I allowed to speak of these things, and to pass the information to the Internet. That answer is very simple. Its all part of the education process.

Omega professes no desire to control, in the sense that most think a world-wide governing body would control their daily lives. Under Omega's rule, people will retain their freedoms, such as freedom of speech. No one will be a slave to Omega or any other organization. In fact, slavery of any sort is illegal in all worlds. Under Omega, majority will rule. And the ruling council will be made up of people from around the globe, representing every country and culture in the world today.

The Visitors are not here to conquer planet Earth. They are not here to rape our planet of its resources or to enslave the Earth's people for use as their work force. They do not consume humans as a food source, and the total number of true alien abductions numbers slightly over 800 total in the past 40 or 50 years.

Those agencies and groups who are working to thwart Omega's plans are responsible for far more abductions than any of the Visitors combined.

Each Visitor race has representatives here on Earth at this time. Many have been here for 50 or more years. The Visitors are not angels, they are not demons or devils as portrayed in Biblical text. They are not interdimensional creatures. They are physical beings that are born, grow up to maturity, grow old and die, just as we do. They have not come here to save our souls, or to exploit our world. They have come here to help us move out into the universal neighborhood that they call home, and by doing so, they preserve their own way of life. Just as we expect anyone who comes to the United States, for example, to abide by the laws of the US, so the Visitors expect us humans to abide by the laws of their universal coalition when we journey to their lands. I personally don't think this is asking too much.

Those involved with Omega, humans as well as Visitors, bear a symbol of that agency on their dress uniforms and their ships. The symbol was described to me in this way: A triangle, its point turned upward. The outline of the triangle is black, the interior background yellow. Inside the interior, centered in the triangle, is a graphic representation of the Earth (in the case of humans and our craft), a representation of the homeworld of a Visitor race in their case. >From each side of the triangle, originating on the inside aspect of the outer line, is a lightning bolt. These two bolts cut across the yellow background and terminate at the planetary graphic in the center.

There is much to learn, and much to sort out, before all of the information available to these select few of Omega comes to light. And there must be a willingness on the part of the people to accept it before full disclosure will be made. As I have stated before, Omega is, if nothing else, a patient lot.

This I can now say with absolute certainty. While I know that I have not as yet been given the whole truth, I do know one thing.

The person telling me these things is not lying about who and what he is.

OMEGA Agency **The Secret That Is No More**

"When everything is secret, nothing is secret."

- Justice Potter Stewart in his opinion on the Pentagon Papers case

I continue my contact with "Robert", the man who is one of the 15, a member in high standing in the group known as the Omega Agency. At this point in time, Robert and the others of the 15 are basically

in control of the Omega agenda. Those who will make up the Ruling Council of the global governing body are basically "waiting in the wings". They are consulted as needed by the 15, but the day to day running of Omega's plan for planet Earth lies in the hands of these few men.

My understanding of the situation is that it was the Visitors who desired that these 15 men control the re-education process currently underway. Each of these men has a history of military type service, mostly in the fields of covert and black ops, including assassination on demand and manipulation of the war in Viet Nam. The logic behind the choice of these men is this: One must know how to make war in order to prevent it. One must know how incredibly cruel man can be to his fellow man in order to prevent it in others. And if the way of life that the Visitors enjoy on their homeworlds, which all of the 15 have experienced first-hand, can change the hearts of men such as these, it can change the heart of any man.

And that is the basis of the Visitor agenda, and thus the Omega Agency's agenda. In its bare form, the Visitor mission can be stated simply as they work to "clean up" the universe so that people of all races, from all worlds, can live in peace on a galactic scale. That includes the people Earth. We are in our infancy as a race compared to many of the Visitors, but we have advanced technologically to the point that we pose a danger to their society and their way of life. Our social, emotional, and psychological development has not kept pace with our technological strides. Humans have an innate fear of the unknown, and it is that fear that keeps us from questioning, from questing toward what should be our goals. We prefer to become "comfortably numb" rather than face the reality that our history has been warped to meet the goals of certain individuals, our religions have been used as a method of mass control and social manipulation, and certain factions of our society as a whole, on a world-wide basis, have been manipulated to the advantage of those opposing a global, unified governing body and a transformation of our way of life from one of separationism and isolationism to one of global and universal acceptance of those who are "different".

A world living in peace on a global scale is something that many profess to desire. They teach their children to pray for world peace. Yet there are those who profit from the misery of those around them. Consider for a moment. What type of reaction would you expect from pharmaceutical companies if it were known that there is a cure for every form of cancer known? Would these companies, that now receive thousands of dollars per treatment for chemotherapy, be happy to know that there is a way to cure cancer that requires but one injection? What if there was a cure for AIDS that required only a series of three injections? How would an oil company react to the knowledge that there was a power source, one that was abundant, non-polluting, totally efficient? And that conversion of an automobile to this power source could be done at a cost of approximately \$20.00? Would such a revelation be welcomed by those sitting on the Board of Directors of a major oil company? Somehow, I think not.

Yet, this is the way of the Visitors. It is their way to share their technology. They do not try to hide it from others in their intergalactic neighborhood. They do not understand our tradition of hiding our technological advancements in fear that someone else will develop it to its fullest potential first. Nor do they understand the need to withhold beneficial technology, such as could be used to reverse the pollution level of the planet or cure the diseases of humans, merely for monetary gain of a few.

Under Omega global rule, intergalactic commerce and trade will become the norm. There are products we manufacture that ET races wish to import to their homeworlds. They likewise have manufactured products that they feel could be marketable to the people of Earth. Individual companies will be allowed to negotiate trade agreements with Visitors, but all will fall under Omega guidelines. There will be fairness to all, with no one company monopolizing the market. Fossil fuel will be a thing of the past. In the educational system, the "mistakes in accuracy" that is taught now to our children in history class will be corrected. The World Health Organization, as well as the United Nations, will be disbanded. The cures for diseases, as cancer, AIDS, Multiple Sclerosis, Muscular Dystrophy, to name a few, will be released to the public for immediate treatment for those needing it. (An interesting note here is that there has been no transmission of ET-based disease to humans. Visitors have, however, gotten sick from humans. There have been cases of Visitors contracting chicken pox, AIDS, pneumonia, and the common cold.)

Kirtland Air Force Base in Albuquerque, New Mexico, will be the global headquarters for Omega after "the day" that they take the reigns in the arena of global government. The underground base beneath the city is currently the center of Omega field operations. A large number of people now employed at NASA are affiliated in one way or another with Omega. The late Gene Roddenberry was a member of Omega, that group approaching him because of his ideas of what a future intergalactic society could be like. John Glenn is also aware of the existence of Omega, as is Hillary Clinton.

The Omega agenda continues. It may be accelerated, or it may be delayed, as world conditions dictate. But it will not be stopped. There is little choice in the matter at this late date in the game. The fact is that we as a race are not alone in this universe, and we must learn to live according to the laws set down by the majority in this universe. We cannot remain isolated. We will not remain isolated. We would be welcomed into the galactic neighborhood if we could find it in ourselves to change our ways for the good of us all. If we do not, the future could be a very uncertain place. The Visitors came here in peace, and they offered a helping hand. But unlike the men of Omega, the Visitors are not infinitely patient. There are those among the Visitors currently residing on Earth that desire to go home. They are tired and they miss their families, their homes, and their world. Our stubbornness, immaturity, and refusal to open our eyes to the reality around us is what prevents them from going back to their homes, back to the lives they led before coming here. It is a rare thing to find a human who will sacrifice their life for another. Why should we expect the Visitors to be any different?

Omega is a "secret" organization that has been quietly doing its work for many, many years. One will find no documentation to support its existence, no financial records will "miraculously" surface to show how it has been funded. An organization that does not wish to be discovered prior to the time of its choosing does not leave a paper trail to be followed. But there is circumstantial evidence, documentary evidence, that points to its existence and its agenda. I ask no one to accept my writings here as gospel. I ask that you consider the possibility, and investigate it on your own.

There is a universe of truth in the following statement:

"Truth can only be discovered when the mind is open to all possibilities."

- The Tucson Kid

That is all it takes to discover the existence of Omega as a real, functioning entity. Take off the blinders, open your eyes, and start facing the reality of the world around you. We are quickly approaching the point where we have no choice but to do exactly that. And it would be far better to face reality on our own rather than have it forced upon us.

For there is a universe of truth in this statement, as well:

"If folks want to keep their head in the sand --then their butts will eventually get blown away."

-- Charmaine Ferreira

Would life under Omega's guidelines be better? I answer that with another question. How could it be any worse?

Think about it.

OMEGA Agency Final Words

This will be my final posting on the information I have on that group of people, that entity known as the Omega Agency. I will no longer be communicating with my source person, known in these postings as "Robert". A perplexing set of circumstances, almost a comedy of errors, if you will, has led to this breakdown in communication. And after careful thought and soul searching, I have reached the reluctant conclusion that I can no longer be the outlet to the Internet for information on Omega. Robert has been my sole face-to-face contact within the ranks of Omega. But the price of continued personal association with Robert is too high.

In the beginning, almost a year ago, my understanding was that Robert told me the things he did, showed me the things he did, for the purpose of setting to rest doubts and confusion within my own mind. He not only fed the obsession within me to know the truth to this whole ufo/alien phenomenon, but he took an emotionally battered, psychologically abused, frightened woman and befriended her. He gave to me what I needed at that time - someone who cared, and who showed that in his actions. I gave him what he needed - someone to alleviate his loneliness and get him back out into the world, showing him how to take joy in something as simple as digging in the dirt to find pretty rocks. A very close personal

relationship developed, with Robert and I spending virtually all of our free time together. We got to know each other extremely well. Because of this relationship, I overlooked certain things that didn't add up in the information he gave me on Omega. I allowed my emotional attachment to my friend to blind me to the "glitches" in the information he passed to me. In the past month, our relationship has deteriorated rapidly, and these same inconsistencies have cropped up again. They have not been overlooked this time, and therein lies the "rub", as best I can tell.

I do not think that Robert lied to me about the existence of Omega. I have found and witnessed too much that verifies its existence. I do, however, think he "sugar-coated" the nature of the organization. I will state, for the record here, that I do agree with the ideals on which Omega appears to be founded - the unification of the people of this Earth as a global society, with each culture supporting the other in an atmosphere of acceptance of us all as humans first. I do agree that a global governing system is what is needed to move us as a race, the human race, out into the universal neighborhood that awaits us. I do agree that the negativity that pulses through the minds of so many needs to change. What I don't agree with, and have always questioned, is the method that is being used to bring about these changes.

Much to Robert's consternation, I continually asked him this question: "What gives you the right?" He has never answered that question fully or satisfactorily.

I have had no direct, face-to-face contact with any of the other members of the 15, that group of which Robert is a part. I have had no face-to-face contact with anyone else who admits to being involved with Omega or has knowledge of its existence and workings. I have had telephone conversations and mail exchanges with others that I believe have at least a working knowledge of this organization. The majority of my experience with Omega has been through Robert, and thus, he is the only example I have as to what type of person is chosen or recruited to participate at such a high level within the Omega power structure. As it was explained to me, there will be no direct voting by the populous as to who sits on the Ruling Council for Omega's global governing body. These people will be selected by those already seated on the Council.

Robert has often told me that Omega, put simply, adheres to the principle of the "needs of the many outweigh the needs of the few, or the one." Omega seems to interpret that philosophy to mean that the majority of the population of this world is insignificant, categorizing them as "sheep" that will follow where they are led. This may be a true statement, but that does not make it right to perpetuate that mind set. He advised me on more than one occasion to focus my attention on reaching the 1% of the population that Omega considered important. I found this impossible for me to do, because I consider all people to be of value. I cannot write off such a large portion of the population, regardless of Omega's wishes in that area.

Omega has claimed to be the "good guys" in this silent war for the people of and the planet we call Earth. Many of the OA ideals are, indeed, very "good". Crime must stop. War must stop. Child abuse, rape, murderall of these must stop. We cannot continue to prey upon each other and hope to survive in the galactic neighborhood. Inflationary taxation, destruction of the environment, government preying

upon the weaknesses of its own people, must stop. Hatred of another based on nothing more than the color of one's skin, or the religious beliefs one holds, must stop. A scenario Robert was fond of using as an example was this: "Can you imagine a world where you can go to bed at night with your window open, and not have to worry about someone coming in and raping you?" Under Omega rulership, that is the type of world that is proposed. It will be a world in which one is free to pursue his or her life's work, raise a family, and feel secure within the walls of his or her own home. Another question that was never fully answered: "But at what price?"

Yet, the inconsistencies remain. Again, I can speak only from my personal experience with this man and the organization he represents. Omega is responsible for some of the abductions that occur. Robert tells me I have been abducted 7 times, and that my father was also abducted. I have no conscious memory of these experiences. Omega employs the services of those popularly known as "MIBs". This I have seen, waking to find one standing in my bedroom. Recent postings to the Internet that I have made have caused concern in the ranks of the 15. Their concern, again based on what Robert related to me, was that I was currently displaying a somewhat "negative" attitude toward Omega. The options being considered as to how Omega would deal with my attitude, as outlined to me by Robert in a phone conversation on Thursday, October 23, 1997, were as follows:

a) he stated that one of the members of the 15 asked Robert if he wanted me "taken out". b) action will be taken to totally discredit these writings and any past or future writings I do relating to the ufo field, thus eliminating me as a possible voice of disagreement with Omega's now publicly known ideals and goals. c) use of techniques known to Omega that would "blank" my memory of any and all recall of my involvement with Robert, Omega, or my search for the truth in the ufo/alien phenomenon. d) bringing me into the underground facility beneath Albuquerque, New Mexico, and keeping me there for an indefinite period of time, until my attitude could be "swayed" toward a more positive stance. I attempted to talk to Robert about these "options" that night, and again the following Monday night. He informed me that the decision lay in the hands of the other members of the 15, that he and the others had decided that Robert's position on my fate would remain neutral. Speaking strictly from a human standpoint, I find this most difficult to understand. Betrayal and abandonment are not "good" qualities by socially accepted standards in human society in general. Yet the one man who has spent time with me personally, face to face; who has laughed with me and held me when I cried, who I helped on more than one occasion when he needed help, speaks no words of defense on my behalf with his co-workers. Nor does he allow me to offer a defense on my own behalf. Is this a character flaw in Robert that I never knew existed in the year I've known him, or is it a reflection of the mentality of the high ranking members of Omega? I don't know the answer to that question, and don't know if I ever will. In fact, I don't know if I would want to know, for the implications of the latter are far too frightening.

There are those forces that oppose Omega and its plan for the betterment of the world. I have named these forces in previous essays on Omega. I know that I have attracted the attention of a few who pledge their loyalty to these opposing forces. Two people that I associate with, and who know my identity, have been threatened. And though Robert did not specifically state that a government agency-affiliated individual was here in town to assassinate me, he implied it heavily. This man was dealt with, according to Robert, by members of Omega within a few blocks of my home. I have no way to verify the validity

of this information. But valid or not, the result is the same. It is normal to be frightened when it is implied that others want one killed. If this information is true, then I owe Omega my life. If it is not true, then only Robert knows why he would desire to terrorize and torture me in such a way.

My phone conversations are monitored, my computer has been tampered with, my emails, public and private, are monitored. All activity I do on the Internet is monitored, including what websites I visit. I do not know the names of those who do this monitoring, nor what agency or group they are affiliated with. What I can attest to is that Robert has quoted me from private emails I sent to others, he has criticized my research techniques based on websites I have visited, he has stated to me the name of someone I spoke to on the phone, giving me the length of time I spoke to this person.

In our phone conversation of Monday night, October 27, 1997, Robert strongly urged that I stop my investigation into ufo related matters, and concentrate on the job Omega wants me to do. Although the original agreement between us was that I would do what they wanted me to do, but I would do it in my own way, Robert is now finding fault with my methods and what he perceives as my negative attitude toward Omega. Efforts on my part to discuss this with him, to plead my side of this situation, have thus far fallen on deaf ears. And I grow weary of the trying.

I regret the loss of a friendship. I regret the loss of access to information that many are asking about, that many are craving. I feel as though I am letting people down by my plan to disassociate myself from the only avenue of access to Omega's inner workings that I am consciously aware of. But I see no other choice for me at this point in time, given the current situation and the above stated options that are being considered. Those who know me personally know that I will not release Robert's real name. That decision is not based in fear of reprisal from him, or someone he may be associated with. That decision is based in personal honor. I gave my word that I would not reveal his name to anyone. And personal honor is something that, once lost, is very hard to regain.

In the last two years, I have undergone massive changes in my personal life. It has been a most difficult and traumatic time for me, and Robert was aware of this before he met me in person. I have learned that decisions I made were often times "suggested" by employees of the Omega organization. Minor manipulation of my life to "steer" me in the direction they believed my life should take. While I personally consider this sort of action to be wrong and a violation of basic human rights, Omega's professed position of the "ends justify the means" in most cases has won out in regard to me.

Omega has the potential to bring great changes to the world, changes that I do believe will be in the best interest of all of us. It has the ability to introduce us to the varied and wonderous worlds of the Visitors, and all the mysteries and excitement of their cultures. It has the power to move the world forward technologically by leaps and bounds. But it seems to lack heart, and compassion, and empathy for the people it would govern. And that concerns me. I have to wonder how long a house, united or not, will stand on an uncertain foundation.

I cannot give the answers to the many questions that remain, for the price of my continued active

association with this group is too high. I do not think that Omega alone is responsible for the invasions into my life of late. I have reason to believe that the opposing forces are equally as interested in where my loyalties lie. My loyalties lie where they always have: with the side of right, the side that offers the best hope for all of us, not just me alone. Omega was honest in stating what it is that they want from me. I apparently misunderstood or was misled as to how they wanted that accomplished, though. I was also not told what the price for involvement with them would be. In this, however, Omega is ahead of the opposing side. The motives of those on that side are unclear, and their methods of operation far more secretive. Robert, at least, told me what my fate may be. I can do nothing now but sit and wonder what tomorrow will bring for me. Robert offers me no indication of when a decision will be made concerning me, or what that decision is likely to be.

The tone of this writing is far more personal than any of the other essays on Omega I have written and posted to the Internet. The reason for this is I am human, and I have emotions, and cannot and will not deny them, though it has been suggested more than once that I drop my emotions. And right now, the strongest emotion I feel is fear. I know there are many who doubt the validity of these writings, who question the motives behind them, and who suspect it is nothing more than, at best, a hoax. At the worst, disinformation designed to further muddy the waters of the ufo field. As one person that I introduced to Robert said, "It sounds too good to be true, Robert. Show me."

He did show me. I do not doubt the reality of this organization or its connection to the Visitors, with all of their technology and their abilities. Neither do I doubt that the 15 will carry out whatever decree they determine is appropriate in my case. Perhaps I am considered the experiment that went wrong, or the project that failed. I don't really know what I am considered by Omega. Robert told me that it was never meant for him to be a direct source of information to me. It was never meant that we were to develop a close personal relationship. It was never meant for me to get so deeply involved in ufo/alien research. When I asked Robert why he did these things, why he fed the hunger for information that he knew I possessed, and why he allowed the relationship between us to develop on a personal level, if he was never meant as an active part of the plan for me, his only reply was "You were there, you were nice. It just happened." What I suspect is happening now, based on things that Robert has said to me over the past month, is that I am paying the price for his mistake. But I don't blame him alone. I knew from the beginning that Omega had the potential to be dangerous, as did Robert. And I persisted in my efforts to get to the truth anyway.

To remain in Omega's "good graces", if I must change what I am, if I must sacrifice my personal integrity, my right to privacy in my phone conversations, my emails, my computer, within my own home, and in my very dreams, if I must betray people that I've come to see as friends, then the price is too high for me to pay. Perhaps if I understood the reasoning behind the actions, I would feel differently. But, as I have said, the one question that constantly resurfaced and was never answered, keeps me from adopting the attitude that others seem to desire in me. Where Robert seems to view the question as nothing more than emotional reaction to impending change, I view it as a valid and necessary point that should be addressed if Omega is to be openly accepted as the best hope for the survival of the human race and planet Earth.

What gives you the right?

And...?

STATUTE OF THE INTERNATIONAL COURT OF JUSTICE

TABLE OF CONTENTS:

[Article 1](#)

[Chapter I: Organization of the Court \(Articles 2-33\)](#)

[Chapter II: Competence of the Court \(Articles 34 - 38\)](#)

[Chapter III: Procedure \(Articles 39 - 64\)](#)

[Chapter IV: Advisory Opinions \(Articles 65 - 68\)](#)

[Chapter V: Amendment \(Articles 69 & 70\)](#)

[Table of Contents](#)

Article 1

The International Court of Justice established by the Charter of the United Nations as the principal judicial organ of the United Nations shall be constituted and shall function in accordance with the provisions of the present Statute.

[Table of Contents](#)

CHAPTER I

ORGANIZATION OF THE COURT

Article 2

The Court shall be composed of a body of independent judges, elected regardless of their nationality from among persons of high moral character, who possess the qualifications required in their respective countries for appointment to the highest judicial offices, or are jurisconsults of recognized competence in international law.

Article 3

1. The Court shall consist of fifteen members, no two of whom may be nationals of the same state.
2. A person who for the purposes of membership in the Court could be regarded as a national of more than one state shall be deemed to be a national of the one in which he ordinarily exercises civil and political rights.

Article 4

1. The members of the Court shall be elected by the General Assembly and by the Security Council from a list of persons nominated by the national groups in the Permanent Court of Arbitration, in accordance with the following provisions.
2. In the case of Members of the United Nations not represented in the Permanent Court of Arbitration, candidates shall be nominated by national groups appointed for this purpose by their governments under the same conditions as those prescribed for members of the Permanent Court of Arbitration by Article 44 of the Convention of The Hague of 1907 for the pacific settlement of international disputes.
3. The conditions under which a state which is a party to the present Statute but is not a Member of the United Nations may participate in electing the members of the Court shall, in the absence of a special agreement, be laid down by the General Assembly upon recommendation of the Security Council.

Article 5

1. At least three months before the date of the election, the Secretary-General of the United Nations shall address a written request to the members of the Permanent Court of Arbitration belonging to the states which are parties to the present Statute, and to the members of the national groups appointed under Article 4, paragraph 2, inviting them to undertake, within a given time, by national groups, the nomination of persons in a position to accept the duties of a member of the Court.

2. No group may nominate more than four persons, not more than two of whom shall be of their own nationality. In no case may the number of candidates nominated by a group be more than double the number of seats to be filled.

Article 6

Before making these nominations, each national group is recommended to consult its highest court of justice, its legal faculties and schools of law, and its national academies and national sections of international academies devoted to the study of law.

Article 7

1. The Secretary-General shall prepare a list in alphabetical order of all the persons thus nominated. Save as provided in Article 12, paragraph 2, these shall be the only persons eligible.

2. The Secretary-General shall submit this list to the General Assembly and to the Security Council.

Article 8

The General Assembly and the Security Council shall proceed independently of one another to elect the members of the Court.

Article 9

At every election, the electors shall bear in mind not only that the persons to be elected should individually possess the qualifications required, but also that in the body as a whole the representation of the main forms of civilization and of the principal legal systems of the world should be assured.

Article 10

1. Those candidates who obtain an absolute majority of votes in the General Assembly and in the Security Council shall be considered as elected.

2. Any vote of the Security Council, whether for the election of judges or for the appointment of members of the conference envisaged in Article 12, shall be taken without any distinction between permanent and non-permanent members of the Security Council.

3. In the event of more than one national of the same state obtaining an absolute majority of the votes both of the General Assembly and of the Security Council, the eldest of these only shall be considered as

elected.

Article 11

If, after the first meeting held for the purpose of the election, one or more seats remain to be filled, a second and, if necessary, a third meeting shall take place.

Article 12

1. If, after the third meeting, one or more seats still remain unfilled, a joint conference consisting of six members, three appointed by the General Assembly and three by the Security Council, may be formed at any time at the request of either the General Assembly or the Security Council, for the purpose of choosing by the vote of an absolute majority one name for each seat still vacant, to submit to the General Assembly and the Security Council for their respective acceptance.

2. If the joint conference is unanimously agreed upon any person who fulfills the required conditions, he may be included in its list, even though he was not included in the list of nominations referred to in Article 7.

3. If the joint conference is satisfied that it will not be successful in procuring an election, those members of the Court who have already been elected shall, within a period to be fixed by the Security Council, proceed to fill the vacant seats by selection from among those candidates who have obtained votes either in the General Assembly or in the Security Council.

4. In the event of an equality of votes among the judges, the eldest judge shall have a casting vote.

Article 13

1. The members of the Court shall be elected for nine years and may be re-elected; provided, however, that of the judges elected at the first election, the terms of five judges shall expire at the end of three years and the terms of five more judges shall expire at the end of six years.

2. The judges whose terms are to expire at the end of the above-mentioned initial periods of three and six years shall be chosen by lot to be drawn by the Secretary-General immediately after the first election has been completed.

3. The members of the Court shall continue to discharge their duties until their places have been filled. Though replaced, they shall finish any cases which they may have begun.

4. In the case of the resignation of a member of the Court, the resignation shall be addressed to the President of the Court for transmission to the Secretary-General. This last notification makes the place vacant.

Article 14

Vacancies shall be filled by the same method as that laid down for the first election subject to the following provision: the Secretary-General shall, within one month of the occurrence of the vacancy, proceed to issue the invitations provided for in Article 5, and the date of the election shall be fixed by the Security Council.

Article 15

A member of the Court elected to replace a member whose term of office has not expired shall hold office for the remainder of his predecessor's term.

Article 16

1. No member of the Court may exercise any political or administrative function, or engage in any other occupation of a professional nature.
2. Any doubt on this point shall be settled by the decision of the Court.

Article 17

1. No member of the Court may act as agent, counsel, or advocate in any case.
2. No member may participate in the decision of any case in which he has previously taken part as agent, counsel, or advocate for one of the parties, or as a member of a national or international court, or of a commission of enquiry, or in any other capacity.
3. Any doubt on this point shall be settled by the decision of the Court.

Article 18

1. No member of the Court can be dismissed unless, in the unanimous opinion of the other members, he has ceased to fulfill the required conditions.
2. Formal notification thereof shall be made to the Secretary-General by the Registrar.
3. This notification makes the place vacant.

Article 19

The members of the Court, when engaged on the business of the Court, shall enjoy diplomatic privileges and immunities.

Article 20

Every member of the Court shall, before taking up his duties, make a solemn declaration in open court that he will exercise his powers impartially and conscientiously.

Article 21

1. The Court shall elect its President and Vice-President for three years; they may be re-elected.
2. The Court shall appoint its Registrar and may provide for the appointment of such other officers as may be necessary.

Article 22

1. The seat of the Court shall be established at The Hague. This, however, shall not prevent the Court from sitting and exercising its functions elsewhere whenever the Court considers it desirable.
2. The President and the Registrar shall reside at the seat of the Court.

Article 23

1. The Court shall remain permanently in session, except during the judicial vacations, the dates and duration of which shall be fixed by the Court.
2. Members of the Court are entitled to periodic leave, the dates and duration of which shall be fixed by the Court, having in mind the distance between The Hague and the home of each judge.
3. Members of the Court shall be bound, unless they are on leave or prevented from attending by illness or other serious reasons duly explained to the President, to hold themselves permanently at the disposal of the Court.

Article 24

1. If, for some special reason, a member of the Court considers that he should not take part in the decision of a particular case, he shall so inform the President.
2. If the President considers that for some special reason one of the members of the Court should not sit in a particular case, he shall give him notice accordingly.

3. If in any such case the member Court and the President disagree, the matter shall be settled by the decision of the Court.

Article 25

1. The full Court shall sit except when it is expressly provided otherwise in the present Statute.
2. Subject to the condition that the number of judges available to constitute the Court is not thereby reduced below eleven, the Rules of the Court may provide for allowing one or more judges, according to circumstances and in rotation, to be dispensed from sitting.
3. A quorum of nine judges shall suffice to constitute the Court.

Article 26

1. The Court may from time to time form one or more chambers, composed of three or more judges as the Court may determine, for dealing with particular categories of cases; for example, labour cases and cases relating to transit and communications.
2. The Court may at any time form a chamber for dealing with a particular case. The number of judges to constitute such a chamber shall be determined by the Court with the approval of the parties.
3. Cases shall be heard and determined by the chambers provided for in this article if the parties so request.

Article 27

A judgment given by any of the chambers provided for in Articles 26 and 29 shall be considered as rendered by the Court.

Article 28

The chambers provided for in Articles 26 and 29 may, with the consent of the parties, sit and exercise their functions elsewhere than at The Hague.

Article 29

With a view to the speedy dispatch of business, the Court shall form annually a chamber composed of five judges which, at the request of the parties, may hear and determine cases by summary procedure. In addition, two judges shall be selected for the purpose of replacing judges who find it impossible to sit.

Article 30

1. The Court shall frame rules for carrying out its functions. In particular, it shall lay down rules of procedure.
2. The Rules of the Court may provide for assessors to sit with the Court or with any of its chambers, without the right to vote.

Article 31

1. Judges of the nationality of each of the parties shall retain their right to sit in the case before the Court.
2. If the Court includes upon the Bench a judge of the nationality of one of the parties, any other party may choose a person to sit as judge. Such person shall be chosen preferably from among those persons who have been nominated as candidates as provided in Articles 4 and 5.
3. If the Court includes upon the Bench no judge of the nationality of the parties, each of these parties may proceed to choose a judge as provided in paragraph 2 of this Article.
4. The provisions of this Article shall apply to the case of Articles 26 and 29. In such cases, the President shall request one or, if necessary, two of the members of the Court forming the chamber to give place to the members of the Court of the nationality of the parties concerned, and, failing such, or if they are unable to be present, to the judges specially chosen by the parties.
5. Should there be several parties in the same interest, they shall, for the purpose of the preceding provisions, be reckoned as one party only. Any doubt upon this point shall be settled by the decision of the Court.
6. Judges chosen as laid down in paragraphs 2, 3, and 4 of this Article shall fulfil the conditions required by Articles 2, 17 (paragraph 2), 20, and 24 of the present Statute. They shall take part in the decision on terms of complete equality with their colleagues.

Article 32

1. Each member of the Court shall receive an annual salary.
2. The President shall receive a special annual allowance.
3. The Vice-President shall receive a special allowance for every day on which he acts as President.

4. The judges chosen under Article 31, other than members of the Court, shall receive compensation for each day on which they exercise their functions.
5. These salaries, allowances, and compensation shall be fixed by the General Assembly. They may not be decreased during the term of office.
6. The salary of the Registrar shall be fixed by the General Assembly on the proposal of the Court.
7. Regulations made by the General Assembly shall fix the conditions under which retirement pensions may be given to members of the Court and to the Registrar, and the conditions under which members of the Court and the Registrar shall have their travelling expenses refunded.
8. The above salaries, allowances, and compensation shall be free of all taxation.

Article 33

The expenses of the Court shall be borne by the United Nations in such a manner as shall be decided by the General Assembly.

[Table of Contents](#)

CHAPTER II

COMPETENCE OF THE COURT

Article 34

1. Only states may be parties in cases before the Court.
2. The Court, subject to and in conformity with its Rules, may request of public international organizations information relevant to cases before it, and shall receive such information presented by such organizations on their own initiative.
3. Whenever the construction of the constituent instrument of a public international organization or of an international convention adopted thereunder is in question in a case before the Court, the Registrar shall so notify the public international organization concerned and shall communicate to it copies of all the written proceedings.

Article 35

1. The Court shall be open to the states parties to the present Statute.
2. The conditions under which the Court shall be open to other states shall, subject to the special provisions contained in treaties in force, be laid down by the Security Council, but in no case shall such conditions place the parties in a position of inequality before the Court.
3. When a state which is not a Member of the United Nations is a party to a case, the Court shall fix the amount which that party is to contribute towards the expenses of the Court. This provision shall not apply if such state is bearing a share of the expenses of the Court

Article 36

1. The jurisdiction of the Court comprises all cases which the parties refer to it and all matters specially provided for in the Charter of the United Nations or in treaties and conventions in force.
2. The states parties to the present Statute may at any time declare that they recognize as compulsory *ipso facto* and without special agreement, in relation to any other state accepting the same obligation, the jurisdiction of the Court in all legal disputes concerning:
 - a. the interpretation of a treaty;
 - b. any question of international law;
 - c. the existence of any fact which, if established, would constitute a breach of an international obligation;
 - d. the nature or extent of the reparation to be made for the breach of an international obligation.
3. The declarations referred to above may be made unconditionally or on condition of reciprocity on the part of several or certain states, or for a certain time.
4. Such declarations shall be deposited with the Secretary-General of the United Nations, who shall transmit copies thereof to the parties to the Statute and to the Registrar of the Court.
5. Declarations made under Article 36 of the Statute of the Permanent Court of International Justice and which are still in force shall be deemed, as between the parties to the present Statute, to be acceptances of the compulsory jurisdiction of the International Court of Justice for the period which they still have to run and in accordance with their terms.
6. In the event of a dispute as to whether the Court has jurisdiction, the matter shall be settled by the

decision of the Court.

Article 37

Whenever a treaty or convention in force provides for reference of a matter to a tribunal to have been instituted by the League of Nations, or to the Permanent Court of International Justice, the matter shall, as between the parties to the present Statute, be referred to the International Court of Justice.

Article 38

1. The Court, whose function is to decide in accordance with international law such disputes as are submitted to it, shall apply:
 - a. international conventions, whether general or particular, establishing rules expressly recognized by the contesting states;
 - b. international custom, as evidence of a general practice accepted as law;
 - c. the general principles of law recognized by civilized nations;
 - d. subject to the provisions of Article 59, judicial decisions and the teachings of the most highly qualified publicists of the various nations, as subsidiary means for the determination of rules of law.
2. This provision shall not prejudice the power of the Court to decide a case *ex aequo et bono*, if the parties agree thereto.

[Table of Contents](#)

CHAPTER III

PROCEDURE

Article 39

1. The official languages of the Court shall be French and English. If the parties agree that the case shall be conducted in French, the judgment shall be delivered in French. If the parties agree that the case shall be conducted in English, the judgment shall be delivered in English.

2. In the absence of an agreement as to which language shall be employed, each party may, in the pleadings, use the language which it prefers; the decision of the Court shall be given in French and English. In this case the Court shall at the same time determine which of the two texts shall be considered as authoritative.

3. The Court shall, at the request of any party, authorize a language other than French or English to be used by that party.

Article 40

1. Cases are brought before the Court, as the case may be, either by the notification of the special agreement or by a written application addressed to the Registrar. In either case the subject of the dispute and the parties shall be indicated.

2. The Registrar shall forthwith communicate the application to all concerned.

3. He shall also notify the Members of the United Nations through the Secretary-General, and also any other states entitled to appear before the Court.

Article 41

1. The Court shall have the power to indicate, if it considers that circumstances so require, any provisional measures which ought to be taken to preserve the respective rights of either party.

2. Pending the final decision, notice of the measures suggested shall forthwith be given to the parties and to the Security Council

Article 42

1. The parties shall be represented by agents.

2. They may have the assistance of counsel or advocates before the Court.

3. The agents, counsel, and advocates of parties before the Court shall enjoy the privileges and immunities necessary to the independent exercise of their duties.

Article 43

1. The procedure shall consist of two parts: written and oral.

2. The written proceedings shall consist of the communication to the Court and to the parties of

memorials, counter-memorials and, if necessary, replies; also all papers and documents in support.

3. These communications shall be made through the Registrar, in the order and within the time fixed by the Court.

4. A certified copy of every document produced by one party shall be communicated to the other party.

5. The oral proceedings shall consist of the hearing by the Court of witnesses, experts, agents, counsel, and advocates.

Article 44

1. For the service of all notices upon persons other than the agents, counsel, and advocates, the Court shall apply direct to the government of the state upon whose territory the notice has to be served.

2. The same provision shall apply whenever steps are to be taken to procure evidence on the spot.

Article 45

The hearing shall be under the control of the President or, if he is unable to preside, of the Vice-President; if neither is able to preside, the senior judge present shall preside.

Article 46

The hearing in Court shall be public, unless the Court shall decide otherwise, or unless the parties demand that the public be not admitted .

Article 47

1. Minutes shall be made at each hearing and signed by the Registrar and the President.

2. These minutes alone shall be authentic.

Article 48

The Court shall make orders for the conduct of the case, shall decide the form and time in which each party must conclude its arguments, and make all arrangements connected with the taking of evidence.

Article 49

The Court may, even before the hearing begins, call upon the agents to produce any document or to

supply any explanations. Formal note shall be taken of any refusal.

Article 50

The Court may, at any time, entrust any individual, body, bureau, commission, or other organization that it may select, with the task of carrying out an enquiry or giving an expert opinion.

Article 51

During the hearing any relevant questions are to be put to the witnesses and experts under the conditions laid down by the Court in the rules of procedure referred to in Article 30.

Article 52

After the Court has received the proofs and evidence within the time specified for the purpose, it may refuse to accept any further oral or written evidence that one party may desire to present unless the other side consents.

Article 53

1. Whenever one of the parties does not appear before the Court, or fails to defend its case, the other party may call upon the Court to decide in favour of its claim.
2. The Court must, before doing so, satisfy itself, not only that it has jurisdiction in accordance with Articles 36 and 37, but also that the claim is well founded in fact and law.

Article 54

1. When, subject to the control of the Court, the agents, counsel, and advocates have completed their presentation of the case, the President shall declare the hearing closed.
2. The Court shall withdraw to consider the judgment.
3. The deliberations of the Court shall take place in private and remain secret.

Article 55

1. All questions shall be decided by a majority of the judges present.
2. In the event of an equality of votes, the President or the judge who acts in his place shall have a casting vote.

Article 56

1. The judgment shall state the reasons on which it is based.
2. It shall contain the names of the judges who have taken part in the decision.

Article 57

If the judgment does not represent in whole or in part the unanimous opinion of the judges, any judge shall be entitled to deliver a separate opinion.

Article 58

The judgment shall be signed by the President and by the Registrar. It shall be read in open court, due notice having been given to the agents.

Article 59

The decision of the Court has no binding force except between the parties and in respect of that particular case.

Article 60

The judgment is final and without appeal. In the event of dispute as to the meaning or scope of the judgment, the Court shall construe it upon the request of any party.

Article 61

1. An application for revision of a judgment may be made only when it is based upon the discovery of some fact of such a nature as to be a decisive factor, which fact was, when the judgment was given, unknown to the Court and also to the party claiming revision, always provided that such ignorance was not due to negligence.
2. The proceedings for revision shall be opened by a judgment of the Court expressly recording the existence of the new fact, recognizing that it has such a character as to lay the case open to revision, and declaring the application admissible on this ground.
3. The Court may require previous compliance with the terms of the judgment before it admits proceedings in revision.

4. The application for revision must be made at latest within six months of the discovery of the new fact.

5. No application for revision may be made after the lapse of ten years from the date of the judgment.

Article 62

1. Should a state consider that it has an interest of a legal nature which may be affected by the decision in the case, it may submit a request to the Court to be permitted to intervene.

2 It shall be for the Court to decide upon this request.

Article 63

1. Whenever the construction of a convention to which states other than those concerned in the case are parties is in question, the Registrar shall notify all such states forthwith.

2. Every state so notified has the right to intervene in the proceedings; but if it uses this right, the construction given by the judgment will be equally binding upon it.

Article 64

Unless otherwise decided by the Court, each party shall bear its own costs.

[Table of Contents](#)

CHAPTER IV

ADVISORY OPINIONS

Article 65

1. The Court may give an advisory opinion on any legal question at the request of whatever body may be authorized by or in accordance with the Charter of the United Nations to make such a request.

2. Questions upon which the advisory opinion of the Court is asked shall be laid before the Court by means of a written request containing an exact statement of the question upon which an opinion is

required, and accompanied by all documents likely to throw light upon the question.

Article 66

1. The Registrar shall forthwith give notice of the request for an advisory opinion to all states entitled to appear before the Court.
2. The Registrar shall also, by means of a special and direct communication, notify any state entitled to appear before the Court or international organization considered by the Court, or, should it not be sitting, by the President, as likely to be able to furnish information on the question, that the Court will be prepared to receive, within a time limit to be fixed by the President, written statements, or to hear, at a public sitting to be held for the purpose, oral statements relating to the question.
3. Should any such state entitled to appear before the Court have failed to receive the special communication referred to in paragraph 2 of this Article, such state may express a desire to submit a written statement or to be heard; and the Court will decide.
4. States and organizations having presented written or oral statements or both shall be permitted to comment on the statements made by other states or organizations in the form, to the extent, and within the time limits which the Court, or, should it not be sitting, the President, shall decide in each particular case. Accordingly, the Registrar shall in due time communicate any such written statements to states and organizations having submitted similar statements.

Article 67

The Court shall deliver its advisory opinions in open court, notice having been given to the Secretary-General and to the representatives of Members of the United Nations, of other states and of international organizations immediately concerned.

Article 68

In the exercise of its advisory functions the Court shall further be guided by the provisions of the present Statute which apply in contentious cases to the extent to which it recognizes them to be applicable.

[Table of Contents](#)

CHAPTER V

AMENDMENT

Article 69

Amendments to the present Statute shall be effected by the same procedure as is provided by the Charter of the United Nations for amendments to that Charter, subject however to any provisions which the General Assembly upon recommendation of the Security Council may adopt concerning the participation of states which are parties to the present Statute but are not Members of the United Nations.

Article 70

The Court shall have power to propose such amendments to the present Statute as it may deem necessary, through written communications to the Secretary-General, for consideration in conformity with the provisions of Article 69.

THE TRILATERAL COMMISSION AND THE NEW WORLD ORDER

by Gene Berkman

Keep in mind that this piece has been written by a libertarian US Congress candidate (E.)

[*Return to Home*](#)

In a speech to Congress and the American people on September 11, 1990, President George Bush outlined the goals his government was pursuing through military intervention in the Middle East. He had in previous statements put forth four goals, including an immediate, unconditional and complete withdrawal of Iraqi forces from Kuwait; the restoration of the Emir of Kuwait to his throne; a permanent commitment to the security and stability of the Persian gulf; and protection of American citizens living abroad.

On September 11, President Bush added a fifth objective. He said, and I quote:

"Out of these troubled times, our fifth objective - a new world order - can emerge... We are now in sight of a United Nations that performs as envisioned by its founders."

On October 1, 1990, President Bush told the General Assembly of the United Nations, again I quote:

"The United Nations can help bring about a new day... a new world order, and a long era of peace."

One is tempted to downplay the rhetorical flourishes of George Bush. This is, after all, the same man who in 1988 told us to read his lips, and promised "No New Taxes." In looking at George Bush's political career from the early 1960's to the present, it might charitably be said that he does not have a principle to his name. Anyway, George Bush is now out of office, repudiated by 63% of the voters in the last election.

Many of us would probably agree that no politician more richly deserved retirement than George Bush. Even millions who voted Republican to keep Bill Clinton out of the White House would be inclined to share such a sentiment. But a few facts about the winners might cause us to hold down our celebration.

Bi-Partisan Support for New World Order

Governor Clinton, among the various Democrats competing for the Presidential nomination, was strongest in his support for President Bush's Gulf War. Senator Gore voted in the Senate for the resolution authorizing U.S. troops to use force against the government of Iraq.

More recently President Bush has sent American troops to Somalia to "help guarantee that supplies reach the starving." The troops acted under authority of the United Nations and, according to the Times, the Somali intervention signalled a "dramatic enlargement and overhaul of the operation - perhaps putting the United Nations in the unusual role of enforcing the peace rather than just trying to keep it."

In other words, the UN forces acted as domestic police within Somalia.

President Clinton supported and continued the intervention in Somalia. President Clinton has since then called for sending U.S. and Nato military forces, under U.N. supervision - into war-torn Bosnia.

During the transition period after the election, the Bush administration pushed for U.N. authorization of military action against Serbia. In this he has had the full support of Clinton and Defense Secretary nominee Les Aspin.

Perhaps Americans are very fortunate that partisan bickering has not stopped the leaders of the two major parties from coming to an agreement on important policy matters. That is one view.

Another view is that the tens of millions of Americans who question the wisdom of sending Americans all over the world to straighten out other peoples quarrels are not represented by the bipartisan political establishment. Indeed, we might wonder whether the two party system is working at all when the two parties fail to offer policy alternatives to the American people.

Clinton's Trilateral Connection

There may be more than coincidence to the shared views of President Bush and President-elect Clinton. Both are associated with two influential organizations based in New York City - the Council On Foreign Relations and the Trilateral Commission.

George Bush was a member of the Council On Foreign Relations in the 1970's, when he served in a succession of appointed positions under President Nixon and President Ford. He was director of the Central Intelligence Agency; Chairman of the Republican National Committee; head of the Liaison Office in the Peoples Republic of China; and U.S. Ambassador to the United Nations. Bush remained in the Council even after leaving public office. He ended his membership during his campaign for the Republican nomination for President in 1980, when his CFR connection started to become an issue among conservatives.

George Bush was among the founding members of the Tri-lateral Commission, retaining his connections even while officially "on leave of absence in government service."

Bill Clinton is a late-comer to both organizations, being invited to join only in the past couple of years.

Nonetheless, he is the third member of the Trilateral Commission to be elected President since the Commission was founded in 1973.

George Bush and Bill Clinton are not alone among high public officials in their CFR/Trilateral connections. Outgoing Secretary of State James Baker is a long-time member of the Council On Foreign Relations, as is Acting Secretary of State Lawrence Eagleburger. Secretary Baker's predecessors at the State Department have included George Shultz and Cyrus Vance, members of the Council On Foreign Relations; and Alexander Haig as well as Henry Kissinger, both CFR members and founding members of the Trilateral Commission. Clinton's Secretary of State is Warren Christopher, Vice-Chairman of the Council On Foreign Relations, and a long-time member of the Trilateral Commission.

Harold Brown and Caspar Weinberger, Secretaries of Defense under President Carter and President Reagan, respectively, are both CFR members and again, founding members of the Trilateral Commission. Outgoing Defense Secretary Richard Cheney is a CFR member, as is the new Defense Secretary, Les Aspin.

Other founding members of the Trilateral Commission include Paul Volcker, former head of the Federal Reserve System, and Alan Greenspan, current Chairman of the Federal Reserve Board of Governors. Both are also CFR members.

We don't have the space to list the literally hundreds of additional CFR members and dozens of Trilateralists who have held policy positions in just the recent administrations. Such a record would be impressive for any organization, let alone a Council with only 2500 members, and a Commission with fewer than 100 members from the United States.

By contrast, the National Taxpayers Union has over 200,000 members nation-wide, including Republicans, Democrats and Independents. Yet since its founding in 1971, it has not had a single member appointed to the Cabinet. Perhaps this would change if the National Taxpayers Union were to give up its commitment to lower taxes and less government.

President-elect Clinton in late December announced his choices for the Cabinet and other top administration positions. Senator Lloyd Bentsen, his choice for Secretary of the Treasury, as well as Bruce Babbitt, Interior Secretary nominee, are members of both the Trilateral Commission and the Council On Foreign Relations. Other CFR members headed for positions in the new administration include Anthony Lake, named as National Security Advisor; Andrea Tyson, who will head the Council of Economic Advisors. Clinton has announced that he will appoint CFR member Madeleine Albright as U.S. Ambassador to the United Nations, and that he will make the U.N. Ambassador a full member of the Cabinet.

Origins of the CFR

To get an idea of what the power of these two organizations means for America, we might want to take a

look at the origins of each one.

When President Washington left office, he urged upon America a foreign policy based on "friendship and commerce with all nations, entangling alliances with none." Washington and succeeding Presidents recognized that the many conflicts which divided Europe were not over matters of principle, but disputes over territories and peoples that different countries sought to subjugate.

In the Twentieth Century, a succession of Presidents have worked to increase the involvement of the federal government in international affairs, while seeking to expand the power of the government in domestic matters as well. Woodrow Wilson, elected President in 1912, was a pioneer in this regard.

In 1913, the Congress established the Federal Reserve System. The 16th Amendment was passed, establishing the Federal Income Tax. In 1914, the Harrison Federal Narcotics Act was passed, granting the federal government vast new police powers in an area previously dealt with successfully as a medical problem. And in 1917, America entered World War I on the side of Britain and France, despite Wilson's 1916 campaign slogan "He Kept Us Out of War."

President Wilson spoke of a "War to make the World safe for Democracy." But the main allies, Britain and France, maintained colonial empires in Africa and Asia in which native aspirations for independence were often brutally suppressed. Britain, France and, after 1917, America were also allied with an autocratic regime in Russia.

President Wilson also called the conflict "The War to end all Wars." To carry out this goal, Wilson joined with the British and French governments in creating a League of Nations as one product of the Versailles Treaty. The League might be considered an embryonic version of world government; much more it was a collective security alliance of the victorious powers, who controlled the League through its Council. The victorious powers, Britain and France, retained their colonial empires, and under the League Trusteeship system, took control of German colonies in East Africa and South-West Africa.

The United States Senate rejected membership in the League of Nations, fearing it would subordinate America to the British Empire. It was in response to this rejection of an "entangling alliance" that the Council On Foreign Relations was formed.

The Council was incorporated in New York on July 21, 1921. Among the founders were John Foster Dulles, later Secretary of State; Allen Dulles, later head of the OSS and The CIA; Edward Mandell House, a top assistant to President Wilson; and John W Davis, who became the first President of the Council. Davis was personal attorney for J.P. Morgan, head of Morgan Guaranty Trust, and in 1924 received the Democrat nomination for President, despite never having been elected to any lower office.

From the beginning, the Council urged that the United States cooperate with the League of Nations. Beginning in 1927, the Rockefeller family began funding the Council, in 1929 buying the Harold Pratt House on East 68th Street in New York to serve as its headquarters.

World War II and the Founding of the United Nations

The League of Nations did not end war for all time. Indeed, the unwillingness of the League to peacefully revise the onerous war guilt provisions of the Versailles Treaty are widely acknowledged as the cause of Adolf Hitler's political victory in Germany.

As European leaders began to realize in the late 1930's that war was inevitable, Americans remained committed to staying out of war. As late as October 1941, opinion polls showed 88% of the American people opposed to entering the European war.

On the other hand, the Council On Foreign Relations began doing research for the State Department in 1939, with the work financed by grants from the Rockefeller Foundation. By 1942, after America entered the War, the State Department established an Advisory Committee on Postwar Foreign Policy, which included no less than 7 CFR members.

Dan Smoot, in his pioneering study, *The Invisible Government* notes that the "crowning moment of achievement for the Council came at San Francisco in 1945, when over forty members of the United States Delegation to the organizational meeting of the United Nations...were members of the Council." These included the Secretary of State, Edward R Stettinius, John Foster Dulles, John J McCloy, Nelson Rockefeller, Adlai Stevenson, and Alger Hiss.

Victors' Alliance

The United Nations Organization was formed after World War II by the victorious powers. Indeed, during the war, the alliance involving the US, Britain, the Soviet Union and China was called the United Nations. The San Francisco conference established this alliance of the victors as a permanent organization. Despite the fact that the legal government of France, located at Vichy, had cooperated with the Third Reich during the war, the post-war French government was brought in as a founding member, with a permanent seat on the Security Council.

The development of the United Nations into an international power was predicated on the continuance of the wartime alliance of the U.S., the British Empire and the Soviet Union. The purpose of the Yalta Agreement, which recognized Soviet dominance in Poland, Hungary, Bulgaria and Romania, as well as the annexation of the Baltic states, was to maintain this alliance.

The Communist coup in Czechoslovakia and the imposition in Poland of a Communist dictatorship in place of a neutralist Coalition government undermined the U.S./Soviet alliance. In 1949, the North Atlantic Treaty Organization was formed as an anti-Communist military and political alliance. As Americans came to learn of the brutalities inflicted by the Communist occupation forces in Eastern Europe, it was hard to oppose U.S. participation in NATO.

The formation of the United Nations in 1945 and NATO in 1949 has permanently entangled America in international politics.

Trilateral Commission Formed

The Trilateral Commission was formed in 1973, and it is widely perceived as an off-shoot of the Council On Foreign Relations. According to Christopher Lydon, writing in the July 1977 Atlantic, "The Trilateral Commission was David Rockefeller's brainchild." At the time, David Rockefeller was Chairman of the Council On Foreign Relations, having been elected to that post in 1970. David Rockefeller became the founding Chairman of the Trilateral Commission, which consists of leaders in business, banking, government and mass media from North America, Europe, and Japan invited to join by Rockefeller himself.

The word "Trilateral" means "three-sided" - the three sides in this case being North America, Europe, and Japan. North America, Europe and Japan have several things in common. Most important is their wealth, which is derived primarily from industrial production. Even agriculture is industrialized in the sense that farmers in the Trilateral countries use large amounts of machinery.

The industrially-generated wealth of the Trilateral countries is a product of their technological advance over the rest of the world. Kenichi Ohmae, in his book Triad Power notes that as of 1981, the Trilateral countries produce about 90% of the airplanes manufactured world-wide; about 80% of the computers; over 70% of the cars and similar proportions of other high-technology products.

Perhaps more telling, Ohmae notes that "...the vast majority of new patents registered and exchanged among Free World countries are concentrated within five nations: Japan, the United States, West Germany, France and the United Kingdom. During 1982, these five nations represented 85 percent of the 10,000 patents registered in the world." (page 126)

The industries of Europe and Japan are very dependent on imported raw materials and imported oil, as is, to a lesser degree, the United States.

As noted, the Trilateral Commission was founded in 1973, in the midst of the Middle East oil crisis. The ostensible cause of the oil crisis was a decision by the Organization of Petroleum Exporting Countries to dramatically raise the posted price for oil, with the price hike enforced by limited production quotas for each member country.

The fact of the matter is that OPEC had never before been able to enforce either its posted price for oil, or production limits on its member countries. In 1971, President Nixon, trying to deal with inflation, imposed price controls on oil and gasoline produced in American wells and sold in the United States.

The natural result was that the multinational oil companies increased their imports of oil for the U.S. market, since imported oil was not subject to price controls. At the time price controls were imposed, the

United States was importing 15% of the oil used in this country; within two years, imports accounted for 50% of U.S. oil needs.

The increase in demand for oil in the world's largest market enabled OPEC to allocate generous production quotas to member countries while enforcing a succession of price hikes.

The sales of increasing quantities of oil at increasingly higher prices generated tens of billions of dollars in income for the royal families of Saudi Arabia and Kuwait, and for state-owned oil companies in Iran, Iraq, Algeria and other countries. This money ended up largely in American and European banks.

The other side of the coin is that developing countries in Asia and Latin America which lacked domestic oil deposits had to borrow large amounts of money to finance oil imports. The same banks that were taking in billions of petro-dollars from OPEC countries were lending out the same billions to other countries to finance imports.

While the international bankers were quite happy to take in tens of billions in petro-dollars, the shaky financial situation in the oil-dependent countries was unnerving. Jeremiah Novak made this observation in the July 1977 Atlantic:

"The Trilaterists' emphasis on international economics is not entirely disinterested, for the oil crisis forced many developing nations, with doubtful repayment abilities, to borrow excessively. All told, private multinational banks, particularly Rockefeller's Chase Manhattan, have loaned nearly \$52 billion to developing countries. An overhauled IMF would provide another source of credit for these nations, and would take the big private banks off the hook. This proposal is the cornerstone of the Trilateral plan."

Confronting the Afro-Asian Bloc

A related purpose of the Trilateral Commission was to promote cooperation among the industrialized countries in the face of an emerging bloc of Arab, African and Asian states which had come to dominate the General Assembly of the United Nations.

The emergence of the Afro-Asian bloc was not foreseen by the founders of the United Nations. In 1945, when the UN was founded, most of Africa and much of Asia remained in subjugation to British and French imperialism. As colonies, these countries were not even considered for UN membership.

As the countries of Asia and Africa gained political independence, it was expected that continuing economic dependence would cause the former colonies to align politically with the former colonial masters. Instead, nationalist pride, along with a heavy dose of Marxism imbibed at British and French universities, caused the new leaders in Africa and Asia to line up against America and Europe.

In the case of the Arab countries, the U.S. alliance with Israel provided additional encouragement for

their anti-Americanism.

The voting majority held by the radical Arab, African and Asian states in the UN General Assembly did not in reality threaten America or Europe. America, Europe and Japan provide the bulk of funding for the UN and its agencies. A cut-off of funds from the Trilateral countries would render the UN an empty shell.

Organizing the World

But the Trilateralists did not want to give up on the United Nations. The economic and political elites of America and Europe seek international political power in order to provide a stable investment climate, including protection against nationalization of their assets.

At the same time, the international bankers and multi-national corporations have gained much of their wealth through partnership with government. The corporate elite look to governments for lucrative contracts; taxpayer subsidized financing; and protection from competition.

The international bankers and multinational corporations have exploited two UN financial agencies in particular - the World Bank and the International Monetary Fund. But they have relied on their own national governments to attempt to protect their foreign investments.

The politicians have looked to a strengthened United Nations for a different reason. Politicians seek power. Control over their own government is all too often only a beginning to their ambition. History is littered with corpses who mutely testify to the imperial ambitions and arrogance of politicians.

In 1973, the U.S. was winding down its involvement in Vietnam. The Vietnam War had proved to be a costly mistake, and had turned a majority of the American people against the idea of military intervention in other countries.

Despite this, the Democrats in 1976 nominated Jimmy Carter, who had supported the Vietnam War, and who, upon election included pro-war advisors in his inner circle. His National Security Advisor was Zbigniew Brzezinski, who had been a founder of the Trilateral Commission. Jimmy Carter himself had been recruited into the Trilateral Commission in the summer of 1973.

Richard Barnet, an analyst with the Institute for Policy Studies, observed that "The Trilateral Commission was barely mentioned in the 1976 campaign. When the Carter cabinet was announced, a few columnists noted the coincidence that so many of them belonged to Mr Rockefeller's new organization. By the time Jimmy Carter ran for a second term, however, the Trilateral Commission was a major campaign issue..."

And so it was. Supporters of Ronald Reagan attacked both President Carter and Republican hopeful George Bush for their Trilateral Connection.

The Subornation of Ronald Reagan

Millions of Americans put their trust in Ronald Reagan to cut taxes, cut back the power of the federal government, and end the domination of the federal government by the Eastern Establishment. Yet the American people, in voting for Ronald Reagan, got Trilateralist George Bush as Vice-President, and an administration filled with CFR and Trilateral Commission members.

Ronald Reagan was distinguished by his use of anti-Communist rhetoric to defend an interventionist foreign policy. Yet the first loan approved by the Export-Import Bank after Reagan took office was for \$120 million to pay for two nuclear reactors for Communist Romania.

In early 1981, Secretary of Defense Caspar Weinberger offered a \$20 billion line of credit to Red China for the purpose of selling them military equipment.

President Reagan carried out a policy in the Middle East of increasingly close friendship with Saudi Arabia, Kuwait and Egypt. During the Iran/Iraq war, the Reagan administration openly supported the government of Saddam Hussein.

According to a report by the Financial Times of London and ABC News Nightline, President Reagan authorized military aid to Iraq in a 1983 Presidential Finding. Between 1983 and 1989, the United States government supplied one planeload of weapons every week to Iraq, free of charge. That was your tax dollars at work.

At the same time, Iraq received large amounts of weapons from the Soviet Union, France and Red China; Britain, Germany, Austria, Chile and South Africa supplied military technology. And Iraq received tens of billions of dollars from Saudi Arabia and Kuwait to pay for these weapons.

Ronald Reagan left one additional legacy to us, and to our children and our grandchildren. He ran up the National Debt from \$980 billion when he took office to about \$2.6 trillion when he left office.

The Deficit and Dependence

Ronald Reagan did not invent deficit spending. Indeed, the National Debt was close to a trillion dollars when he took office. But the size of the deficits run up by the Reagan administration seriously compromised America's financial independence. American financial institutions are not capable of funding deficits which exceeded \$200 billion a year.

For some reason, banks and corporations in Japan, Germany and Saudi Arabia had enough confidence in President Reagan to help fund the deficit. According to the recently published book *Bankruptcy 1995*, banks, corporations and individual investors in Japan, Germany and Saudi Arabia currently hold approximately \$453 billion in U.S. Savings Bonds and Treasury Bills.

George Bush and the New World Order

When George Bush took over, he faced a massive national debt and continuing budget deficits, financed in growing part by foreign investors. At the same time, Saddam Hussein faced his own debt to Saudi Arabia and Kuwait. Hussein also suffered from one of the things Ronald Reagan did right.

Shortly after taking office, President Reagan ended price controls on U.S. oil. The newly free market in oil led to a massive increase in U.S. production, declining U.S. dependence on Middle East oil, and a steady decline in world market prices.

Declining world market prices for oil destroyed OPEC discipline, as members pumped more oil to try to maintain their income. Low oil prices put Iraq in a bind, as it faced the costs of reconstruction as well as demands by Saudi Arabia and Kuwait to repay its war debt.

When OPEC oil ministers met in late July, 1990, Hussein demanded that other OPEC members cut production to drive the price of oil back up. Hussein also demanded that Saudi Arabia and Kuwait cancel Iraq's debt. None of Hussein's demands were met, and he responded by invading Kuwait.

The response of President Bush is the defining moment of the New World Order.

President Bush and Secretary of State Baker pushed a series of resolutions through the United Nations Security Council condemning Iraq; demanding Iraq's withdrawal from Kuwait; and authorizing the use of force to eject Iraq from Kuwait.

On the basis of these UN resolutions, 661 through 665, President Bush sent 450,000 U.S. troops to Saudi Arabia - without authorization from Congress.

Article I, Section 8 of the Constitution of the United States gives Congress the power to declare war. Yet Congress did not even debate the issue until two days before the start of hostilities. During the debate, pro-war speakers stressed that the UN had already authorized the use of force; Congress was urged to back the United Nations, and told that American troops could be used to implement the UN resolutions even if Congress did not give its approval.

The United States has never had a defense treaty, ratified by the Senate, with either Saudi Arabia or Kuwait. An Executive Order by President Carter -the Carter Doctrine - had placed the entire Persian Gulf within the United States Defense Perimeter. Now, still without a treaty or any form of Congressional authorization, the U.S. has permanent military bases in Saudi Arabia and Egypt.

Oil and Money - The Trilateral Connection

Senate Republican Leader Bob Dole and others justified the U.S. intervention against Iraq by stating that

it would guarantee access to Persian Gulf oil supplies. At the time of the conflict, the United States received less than 7% of its annual oil supplies from Middle Eastern countries.

Europe and Japan are heavily dependent on oil from the Middle East. Trilateralism may require that young Americans are put in danger to secure the oil supplies for the other industrial countries. Such a view presumes that if Hussein were to get control of the oil reserves of Kuwait and Saudi Arabia, that he would refuse to sell to willing customers in Europe and Japan - he has never in the past refused to sell to them. Nor have the Europeans and the Japanese ever refused to buy oil from Hussein, even when he was shooting missiles at the civilian populations in Iranian cities, or bombing Kurdish villages with poison gas.

There was another factor which may have pushed President Bush into a show of American military strength.

Before 1913, the U.S. dollar was as good as gold. Gold coins circulated, along with silver dollars and paper money which could be redeemed at full value in gold coins. With the passage of the Federal Reserve Act in 1913, the Federal Reserve Banks were authorized to print four paper dollars for every dollar in gold that they held. Federal Reserve Notes were made legal tender, despite this fractional reserve basis.

In 1933, President Roosevelt withdrew gold coins from circulation, and ended the redemption of paper money in gold. But the 25% gold reserve requirement for Federal Reserve Notes was maintained until 1971, when President Nixon totally removed the dollar from any gold basis. Since 1971, the value of the dollar has been strictly based on supply and demand.

If Germans want to buy American products, or invest in American securities, they buy dollars with their Deutsche Marks. If Americans want to buy German products, or invest in German securities, they buy Deutsche Marks with their dollars. Similarly for Frenchmen, Swedes or other foreigners who trade with or invest in America. The value of the dollar in relation to the Mark, the Franc, the Pound Sterling or the Yen is based on the demand for dollars, or the dollar demand for Marks, Francs, Pounds or Yen.

Demand for dollars is enhanced by the fact that many people in many countries will accept dollars in payment, often in preference to their own national currencies.

The Organization of Petroleum Exporting Countries sets its posted price for oil in U.S. dollars. This means that if Germans, Swiss or Japanese companies want to buy oil from OPEC member countries, they must first buy dollars with which to pay for the oil. This has caused a tremendous continuing demand for dollars, and has helped to maintain the international value of the dollar even in the face of continuing government and trade deficits. In late July of 1990, the Wall Street Journal carried a report that OPEC members were losing confidence in the U.S. dollar; the Journal reported that at its meeting in Vienna - the meeting which immediately preceded Iraq's invasion of Kuwait - OPEC established a committee to look into the feasibility of setting the posted price for oil in multiple currencies, including

the Deutsche Mark, the Swiss Franc and the Japanese Yen along with the dollar.

If OPEC is able to adopt a posted price for oil in Marks and Yen, this will cause a massive drop in international demand for dollars, as Germany and Japan will be able to pay for their massive oil imports in their own currencies.

This story was overshadowed by the Gulf War. In gratitude for American intervention, it is likely that Saudi Arabia and Kuwait are committed to defending the preeminent role of the dollar in the oil trade.

Limiting National Sovereignty

The UN role in the Gulf War was so central that even left-wing opponents of the war have begun to speak of the UN "becoming in effect a world government." Supporters of world government, including World Federalist Association President John Anderson, are pointing to the Gulf War as a United Nations success. Anderson, who ran for President in 1980, is a founding member of the Trilateral Commission.

World Federalists have long advocated "limitations on national sovereignty" as necessary for world peace. The Random House Dictionary of the English Language defines "Sovereignty" as the "supreme and independent power or authority in government as possessed or claimed by a state or community."

By this definition, it is hard to see any current limitation on the sovereignty of the U.S. government, which seems to be adding to its power and authority every day. The fact is that the sovereign power of the federal government over individual Americans has grown steadily as our international commitments have grown.

The United States government was founded on the basis of limited sovereignty. The Bills of Rights limits the sovereign power of the federal government over all who reside within its boundaries. The Constitution itself is a limited grant of power to the federal government. As stated by the Ninth Amendment:

"The enumeration in the Constitution of certain rights shall not be construed to deny or disparage others retained by the people."

The founders envisioned a government of limited sovereignty, with that sovereignty in the possession of the American people. In fact, the affiliations of the federal government with the United Nations, NATO and other treaty arrangements have not limited the sovereign power of the government, but they have limited sovereign control of the government by the American people.

The Congressional debate over the use of force against Iraq was in reality a public relations exercise, rather than an assertion of control over foreign policy by the peoples' representatives. Pro-war leaders in Congress told their colleagues that the UN Security Council had already decided the issue. All that remained was to get on board behind the President and support the UN.

The First Requisite of Empire

The Security Council resolutions which led to the war against Iraq were not altogether spontaneous. Secretary of State James Baker introduced them on behalf of President Bush. President Bush and Secretary Baker lobbied other council members to support them. Representative Henry Gonzalez of Texas has charged that Bush and Baker bought the votes of several Security Council members with our tax dollars.

Representative Gonzalez charges that President Bush promised \$7 billion in aid and credits to the Soviet government to get the support of Soviet President Gorbachev. Also, according to Gonzalez, Bush promised \$300 million in credits to the Chinese government to ensure that China would abstain, rather than veto the Security Council resolution on force against Iraq. U.S. government aid was also offered to Romania and other governments represented on the Security Council at the time of the vote.

The President and his backers have used the United Nations to arrogate to the executive branch a control over foreign policy which is nowhere authorized in the Constitution.

In his 1952 essay, *The Rise of Empire*, Garet Garrett observed that "The first requisite of empire is: The executive power of government shall be dominant."

The trend toward Presidential dominance, already well advanced 40 years ago, has continued, increasingly under the guise of living up to our international commitments.

New Role for Germany and Japan

The United Nations has been sold to the idealistic as "mankind's last, best hope for peace." Yet, since 1950, literally hundreds of thousands of people have died in wars fought under UN auspices, in Korea, the Congo and Iraq. Nor have UN efforts been able to stop scores of military conflicts in Asia, Africa and the Middle East over the last 40 years.

A more successful approach to ending war would be for each nation to adopt a constitutional prohibition on sending military forces outside their own borders.

Reflecting on the tragic results of militarism for their countries, the post World War II leaders of Germany and Japan placed provisions in their constitutions embodying just such a prohibition on sending troops outside their borders.

During the run-up to the Gulf War, U.S. Congressional leaders criticized the German and Japanese governments for their unwillingness to supply military contingents for the allied forces. Providing such contingents would have violated the previously mentioned constitutional provisions.

Since then, both countries have acted on this issue.

The Japanese Diet on June 15 of this year enacted laws authorizing the dispatch of Self-Defense Forces to Cambodia, to assist the United Nations Transitional Authority in that country.

The governing Liberal Democratic Party has established a committee to explore Japan's international role, headed by Ichiro Ozawa.

According to the June 22, 1992 issue of Japan Access, "Ozawa has been an outspoken advocate of stretching the interpretation of Japan's war-renouncing Constitution in a way that would justify having SDF troops take part in obviously military missions, as outlined in Chapter 7 of the United Nations charter."

In this re-interpretation, Ozawa has the support of Prime Minister Kiichi Miyazawa, a member of the Trilateral Commission "on leave of absence in government service."

Germany appears to be on the verge of changing its constitution.

The Los Angeles Times on November 18 reported that:

"The main opposition Social Democrats concluded a two-day special party conference by voting to back a constitutional change to allow German military forces to participate in "Blue Helmet" U.N. peacekeeping forces."

The Times further notes that

"...the party's new position falls far short of Chancellor Helmut Kohl's call for provisions that would permit broader deployment of German forces, for example in operations such as last year's Gulf War..."

In recent months, the Los Angeles Times and the London Economist have reported that the governments of Germany and Japan are both seeking permanent seats on the UN Security Council. The United Nations, formed by the victorious powers after World War II, has become the center of attention even for the losers of that war.

Freedom Is the Alternative

The Bipartisan Political Establishment has turned our government into a monster, which is eating out our substance, but failing to deliver on the promises the politicians make. Through the Internal Revenue Service, everyone of us, and every working American, is in the government files. Our economy is being crushed by a burden of debt, taxes and regulation. The last vestiges of our privacy rights are being eliminated as part of the War On Drugs. And now, the Trilateralists seek to police the world in alliance with a revived Japanese and German militarism.

The Libertarian Movement offers an alternative vision of personal freedom, free enterprise, and a non-interventionist foreign policy. We seek a constitutional limited government which will protect life, liberty and property, and otherwise leave us alone.

We welcome the friendship and cooperation of all who share our goal of a Free America at peace with the world.

Trilateral Commission: World Shadow Government

The Trilateral Commission was established in 1973. Its founder and primary financial angel was international financier, David Rockefeller, longtime chairman of the Rockefeller family-controlled Chase Manhattan Bank and undisputed overlord of his family's global corporate empire.

Rockefeller's idea for establishing the commission emerged after he had read a book entitled *Between Two Ages* written by an Establishment scholar, Prof. Zbigniew Brzezinski of Columbia University.

In his book Brzezinski proposed a vast alliance between North America, Western Europe and Japan. According to Brzezinski, changes in the modern world required it.

"Resist as it might," Brzezinski wrote elsewhere, "the American system is compelled gradually to accommodate itself to this emerging international context, with the U.S. government called upon to negotiate, to guarantee, and, to some extent, to protect the various arrangements that have been contrived even by private business."

In other words, it was necessary for the international upper class to band together to protect its interests, and to ensure, in the developed nations, that political leaders were brought to power who would ensure that the global financial interests (of the Rockefellers and the other ruling elites) would be protected over those of the hoi polloi.

POCANTICO HILLS CONFABS

Although the initial arrangements for the commission were laid out in a series of meetings held at the Rockefeller's famous Pocantico Hills estate outside New York City, Rockefeller first introduced the idea of the commission at an annual meeting of the Bilderberg group, this one held in Knokke, Belgium in the spring of 1972.

(The Bilderberg group is similar to the Trilateral Commission in that it is funded and heavily influenced by the Rockefeller empire, and composed of international financiers, industrialists, media magnates, union bosses, academics and political figures.

(However, the much older Bilderberg group's membership is strictly limited to participants from the United States, Canada and Western Europe: i.e. the NATO alliance. For more on the Bilderberg group, keep an eye out for future stories in this paper.

The Trilateral Commission was unique, though, in that it brought the Japanese ruling elite into the inner councils of the global power brokers, a recognition of Japan's growing influence in the world economic and political arena.

A succinct summary of the commission's intent has been outlined by Holly Sklar who has conducted extensive research into the history and background of the Trilateral Commission in her book,

Trilateralism: the Trilateral Commission and Elite Planning for World Management

RULING CLASSES UNITE

"The Commission's purpose is to engineer an enduring partnership among the ruling classes of North America, Western Europe and Japan -- hence the term 'Trilateral' -- in order to safeguard the interests of Western capitalism in an explosive world. The private commission is attempting to mold public policy and construct a framework for international stability in the coming decades.

"To put it simply, Trilateralists are saying: The people, governments and economies of all nations must serve the needs of multinational banks and corporations.

"In short, Trilateralism is the current attempt by ruling elites to manage both dependence and democracy -- at home and abroad."

Another Trilateral critic, now-retired Sen. Barry Goldwater (R-Ariz.), views the commission as a Rockefeller family operation through and through. According to Goldwater:

"The Trilateral organization created by David Rockefeller was a surrogate -- the members selected by Rockefeller, its purposes defined by Rockefeller, its funding supplied by Rockefeller. David Rockefeller screened and selected every individual who was invited to participate."

PICKING POLICYMAKERS

David Rockefeller and Brzezinski then began the process of selecting from among the "Trilateral" nations the several hundred elite power brokers who would be permitted to join in Trilateral policymaking in the coming years.

One of the commission's primary goals was to place a Trilateral-influenced president in the White House in 1976, and to achieve that goal it was necessary to groom an appropriate candidate who would be willing to cooperate with Trilateral aims.

Rockefeller and Brzezinski selected a handful of well-known liberal Democrats and a scattering of Republicans (primarily of the liberal-internationalist bent) to serve on the commission.

And in an effort to give regional balance to the commission Rockefeller invited the then-obscure one-term Democratic governor of Georgia, Jimmy Carter, to join the commission.

ROCKEFELLER CENTER SOUTH

Rockefeller had longtime ties to the local Atlanta political and economic Establishment. In fact, much of Rockefeller's personal investment portfolio is in Atlanta real estate. (According to David Horowitz, co-author of *The Rockefellers*, "Atlanta is Rockefeller Center South.")

And Rockefeller himself had once even invited Carter to dine with him at the Chase Manhattan Bank

several years before, as early as 1971, the year Carter began serving as governor.

Carter very definitely impressed Rockefeller and Brzezinski, more so than another Southern Democrat, Florida Gov. Reuben Askew, also selected to serve on the commission and viewed, like Carter, as a possible Trilateral candidate.

In fact, according to Brzezinski, "It was a close thing between Carter and Askew, but we were impressed that Carter had opened up trade offices for the state of Georgia in Brussels and Tokyo. That seemed to fit perfectly into the concept of the Trilateral."

Carter, in fact, like Askew, did announce for the 1976 Democratic presidential nomination, but because of Rockefeller's interest, Carter had the inside shot.

So much so that in a speech at the commission's first annual meeting in Kyoto, Japan in May of 1975, Rockefeller's man Brzezinski promoted the then-still obscure Carter to his fellow Trilateralists as an ideal presidential candidate.

CUT AND DRIED

From that point on, it was all cut and dried. According to Goldwater: "Rockefeller and Brzezinski found Carter to be their ideal candidate. They helped him win the Democratic nomination and the presidency.

"To accomplish this purpose they mobilized the money-power of the Wall Street bankers, the intellectual influence of the academic community -- which is subservient to the wealth of the great tax-free foundations -- and the media controllers represented in the membership of the CFR and the Trilateralists."

(The aforementioned CFR -- Council on Foreign Relations -- is another Rockefeller-financed foreign policy pressure group similar to the Trilateralists and the Bilderberg group, although the CFR is composed solely of American citizens.)

(In his book *The Carter Presidency and Beyond*, published in 1980 by the Ramparts Press, Prof. Laurence H. Shoup devotes an entire chapter to demonstrating how the Trilateral-linked and Trilateral-controlled Establishment media promoted the presidential candidacy in 1976 of the then-obscure Georgia Gov. Jimmy Carter.)

Carter, of course, campaigned as a "populist" -- as a "man of the people" -- as an "outsider" with no ties to the Establishment. The fact is, however, Carter, who said he'd never lie, was an elitist, an insider, the Trilateral Commission's "man on the white horse."

And with the power of the commission and the Rockefeller empire and its media influence behind him, Carter made his way to the presidency, establishing the first full-fledged Trilateral administration, appointing numerous Trilateralists to key policymaking positions and carrying out the Trilateral agenda

to the hilt.

Gewetenloos monster Idi Amin

Oeganda is ooit de parel van Oost-Afrika genoemd. Als Britse kolonie leidt het land een redelijk welvarend bestaan. Tot generaal Idi Amin in 1971 aan de macht komt. Zonder pardon knikkert hij alle Aziaten met een Brits paspoort het land uit. De economie zakt in sneltreinvaart naar een dieptepunt.

Idi Amin wordt in 1925 geboren in Koboko, Oeganda. In 1944 treedt hij in Britse militaire dienst. Hij ruikt voor het eerst aan de macht tijdens een veldtocht tegen de Japanners in Birma. In 1961 schopt hij het tot officier en zes jaar later tot generaal. Als hij opheldering moet geven over frauduleuze handelingen en over een moordpartij, grijpt Amin naar de macht. Op 20 februari 1971 wordt hij tot president uitgeroepen.

In 1972 moeten behalve de Aziaten alle Israëliërs het land uit. De militairen waarop Amin steunt krijgen de vrij spel bij hun toezicht op de 'nationale veiligheid'. In de volgende jaren vinden ruim een half miljoen mensen de dood. Anderen worden het land uitgedreven of verdwijnen zonder een spoor na te laten (onder hen belangrijke politici).

Idi Amin regeert met ijzeren hand. Wie hem voor de voeten loopt kan de kogel verwachten. Hij is gewetenloos, tiranniek, corrupt en paranoïde. Hij pronkt met zijn borst vol medailles en schoffeert internationale politici. Henry Kissinger noemt hij een spion en een moordenaar. Hij sommeert Golda Meir haar ondergoed in te pakken en op te krassen. Hij stuurt Nixon een beterschapskaart na het Watergate-schandaal. Dit alles terwijl zijn geheime politiedienst duizenden burgers op brute wijze afslacht.

Het schrikbewind van Amin duurt tot 1979. Dan wordt hij verdreven door Tanzaniaanse troepen, versterkt met Oegandese ballingen. Terwijl de staat Oeganda op de rand van de afgrond balanceert vlucht Amin naar Libië. Een jaar later krijgt hij asiel in Saoedi-Arabië, waar hij nog steeds een teruggetrokken en welvarend bestaan zou leiden.

ARTICLES

The Stephen Roth Institute for the Study of Anti-Semitism and Racism Anti-Semitism Worldwide 1997/8 --- AUSTRIA

A survey carried out in 1997 revealed that Austria had one of the highest levels of racism in the European Union. The Austrian Freedom Party continued to register electoral successes and its leader, Jörg Haider, declared his intention to run for chancellor in 1999. Only a few violent anti-Semitic incidents were registered. However, it seems that not all anti-Semitic incidents are reported to the authorities or by the press. Many racist and anti-Semitic publications continued to appear regularly. An article in the new weekly Zur Zeit revived an old anti-Semitic blood libel.

Heil Haider! The Revitalization of the Austrian Freedom Party since 1986. Politics and Society in Germany, Austrian and Switzerland, vol. 4, nr. 3 (Summer, 1992), pp. 18-47.

On September 22, 1986 the Austrian newsmagazine profil carried a cartoon showing the newly elected chairman of the Austrian Freedom Party (FPÖ), Jörg Haider, in Carinthian folk dress, standing before a painting showing another, brown-shirted Haider wearing a red armband with a partially obscured, but seemingly recognizable black insignia on a circular white field. Brownshirt Haider is shown strangling his liberal predecessor, Norbert Steger, representing at least the cartoonist's interpretation of the significance of Haider's defeat of Steger for the leadership of the party the week before.

From Protest to radical Right-Populism The Freedom Party of Austria 1990-1996

The deliberately provocative main title for this session was actually an afterthought which occurred to me as I was thinking about the Freedom Party plan: From Party-State to Citizens' Democracy. The way to the Third Republic. Its proposals are a reaction to the changes in the political landscape which has been the subject of Hans-Georg Betz's paper and to the obsolescence of Austrian corporatism addressed by Markus Crepaz. That the Second Republic should be replaced was viewed by those who see the Freedom Party and its Chairman Jörg Haider's as right-extremist and his proposal for a "Third Republic" as a cover for a "Fourth Reich."

Der Haider, Jörg (HJ) and the FPÖ Election Victory of 1986 | I. The Haider "Putsch"

Haider's past pandering to the German nationalist emotions of his adoptive Carinthian homeland earned him the affectionate designation, der Haider, Jörg or simply HJ, suspiciously coincidental with the initials of the old Hitler Youth organization. While it is not unusual in Austrian colloquial expression for names to be reversed, the fact that the designation appeared to so amuse the new FPÖ chairman caused many to see the cartoon as an accurate reflection of the state of affairs in the party.

13 March 1999

Last Sunday voters went to the polls in three of Austria's nine states (Kärnten, Tirol and Salzburg). The Austrian Freedom Party (FPÖ) of Jörg Haider, which employs racist and neo-fascist slogans, increased its vote in all three states. In Kärnten, the southern-most state of Austria bordering Slovenia, the increase was exceptionally large. There the FPÖ vote rose by 8.8 percent, giving the party 42.1 percent of the total, the first time it has gained the largest single party vote in a state election.

[Haider's Reach for Power](#)

The title of this paper and the question posed by this magazine cover refer to FPÖ-Chairman Jörg Haider's claim that he should be elected head of government (*Landeshauptmann*) in Carinthia if his party were to capture a relative majority in the 7. March *Landtagswahl*. Simply the fact that Austria's leading newsmagazine would pose the question indicates the controversy surrounding his person. For most of Austria's literati, artists and intellectuals, the answer to the question on the cover of *profil* was clearly no!

Related Articles and links

[Rise of Right in Europe; May Presage Same Result in the U.S.](#)

On April 26, an obscure German political party called the German Peoples Union, or DVU as it's known by its German initials, walked out of the voting booths with a hefty 13 percent of the vote in parliamentary elections in the state of Saxony-Anhalt. The returns were twice what the tame pollsters had been predicting, and for the next week or so the tame world press screeched and screamed in a fit of paranoia.

[Liberalismus, Rechtsradikalismus und Rechtspopulismus in Deutschland und Österreich](#)

Bestandsaufnahme und Zukunftsszenarien

['Structures of Nationalism'](#)

The article reviews briefly the theory of nationalism, and introduces (yet another) definition of nations and nationalism. Starting from this definition of nationalism as a world order with specific characteristics, oppositions such as core and periphery, globalism/nationalism, and realism/idealism are formally rejected. Nationalism is considered as a purely global structure. Within this, it is suggested, the number of states tends to fall to an equilibrium number which is itself falling, this number of states being the current best approximation to a single world state. Within nationalism variants are associated with different equilibrium numbers: these variants compete. Together, as the nationalist structure, they formally exclude other world orders. Such a structure appears to have the function of blocking change, and it is tentatively suggested that it derives directly from an innate human conservatism. The article attempts to show how characteristics of classic nationalism, and more recent identity politics, are part of nationalist structures. They involve either the exclusion of other forms of state, or of other orders of states, or the intensification of identity as it exists.

Austria, FPÖ and Haider

| COUNTRY | ELECTION TYPE | DATE |
|---------------------|---------------|-----------------|
| Republic of Austria | Parliamentary | October 3, 1999 |

At stake in this election:

- Seats in the *Nationalrat* (National Council): 183

Description of government structure:

- Parliament: Malawi's lower house of parliament, the National Assembly, will consist of 193 members.

Description of electoral system:

- Austria's bicameral parliament, the *Bundesversammlung* or Federal Assembly, is composed of the *Bundesrat* or Federal Council and the *Nationalrat* or National Council.

Results of the electoral race:

- **Party: Austrian Social Democratic Party (SPO)**
 - Leader: Viktor KLIMA
 - Seats won in this election to *Nationalrat*: 65
 - Seats won in last election to *Nationalrat*: 71
- **Party: Austrian People's Party (OVP)**
 - Leader: Wolfgang SCHUESSEL
 - Seats won in this election to *Nationalrat*: 52
 - Seats won in last election to *Nationalrat*: 53
- **Party: Austrian Freedom Party (FPO)**
 - Leader: Joerg HAIDER
 - Seats won in this election to *Nationalrat*: 52

- Seats won in last election to *Nationalrat*: 40
- **Party: Liberal Forum (LF)**
- Leader: Heide SCHMIDT
- Seats won in this election to *Nationalrat*: 0
- Seats won in last election to *Nationalrat*: 10
- **Party: The Greens (GA)**
- Leader: Alexander van der BELLEN
- Seats won in this election to *Nationalrat*: 14
- Seats won in last election to *Nationalrat*: 9

When was the last election? Number of seats in last election?

- Parliamentary elections last held: December 17, 1995
- Number of seats decided in the last election: 183

Population and number of registered voters:

- Population: 8,133,611 (July 1998 est.)
- Number of registered voters: 5,768,099 (Dec. 17, 1995)

Of interest:

- Major issues in the election were immigration policies, economic policy and deregulation of state-owned business enterprises, and social policy.

Date: October 12, 1999

The Austrian Ministry for the Interior has announced the final results of the elections to the Austrian Federal Parliament which were held on October 3, 1999.

[Conclusion](#)

Introduction

Labeled by his critics as a "yuppie fascist" and the "Austrian David Duke," Joerg Haider is poised to become one of Austria's most powerful political leaders. Haider is the 49-year-old leader of the right-wing Freedom Party (FPO). After strong showings in Austria's general and provincial elections and the European Parliament elections over the past decade, the telegenic, millionaire Haider has declared again and again that his eventual goal is the chancellorship.

In the October 3, 1999 general elections, Haider and the FPO enjoyed an extremely strong showing. While final results await a count of the absentee ballots, the unofficial tally has the FPO emerging in a second-place tie with the ruling coalition People's Party, having obtained at least 27% of the popular vote. The Freedom Party will gain 12 parliamentary seats, for a total of 53. The ruling Social Democrats, while maintaining their first-place position, were left with the smallest lead since World War II.

To his supporters, Haider is a breath of fresh air, promising a stop to immigration, job security, social benefits, and a new breed of politician who follows through on his election promises. The charismatic populist promises to eliminate corruption, curtail abuses of the welfare state, and protect Austria's national interests from being overrun by illegal immigrants and unchecked global markets.

To his opponents, Haider is a dangerous right-wing extremist who is exploiting Austria's growing disenchantment with the current ruling parties to advance his xenophobic, racist, and intolerant policies. Throughout his public career, Haider has consistently parried accusations of anti-Semitism. His record, however, reveals numerous statements utilizing Holocaust terminology or legitimizing Nazi policy and activities.

Early Years and Family Life

A lawyer by profession, Haider lives with his wife and two daughters in Carinthia. He has an inherited 38,000 acre estate once owned by Jews who were forced to sell the land after the 1939 German annexation of Austria.

Joerg Haider was born in 1950 in Upper Austria to parents with direct links to the Nazis. His father joined Hitler Youth in 1929 and the Nazi SA storm troops a year later. The senior Haider reportedly traveled to Munich with Adolf Eichmann and Alois Brunner in 1933 as a member of the Austrian legion. Haider's mother belonged to the Nazi Party's League of German Girls. When asked to comment on his parents' wartime activities, Haider remarked: "In retrospect one is always wiser. As a descendant, one should not be so arrogant as to say,

"I would have known better."

Whatever lessons Haider learnt from his parents, he developed an affinity and allegiance to Germany at a young age. At age sixteen, he won a speech contest with a talk entitled, "Are We Austrians German?" His speech was later published by the neo-Nazi newspaper *Deutsche Nationalzeitung* (German National Newspaper) under the title "How German is Austria?" More recently Haider stated that he believes that Austrians are not a naturally distinct people, but rather ethnically Germans. Austria as a nation is an "ideological deformation," and efforts to create a distinct Austrian identity have failed.

The Freedom Party

The Austrian Freedom Party, founded in 1956, is the heir to the League of Independents. Formed in 1949, the League was the direct descendant of the faction that promoted pan-German nationalism for Austria both under the Habsburgs and in the years following World War I.

Initially reluctant to welcome the terms of Austrian independence, especially the neutrality clause of the State Treaty, the Freedom Party chose instead to take a pro-European position as a substitute for identification with Germany. As the only political group espousing free-market, pro-Europe views in Austria, the Freedom Party also included a liberal wing resembling the Free Democrats of the Federal Republic of Germany. The two tendencies were always uneasy with each other, and the party's origins were never wholly abandoned. The first two leaders of the Freedom Party were respectively a former member of Chancellor Arthur Seyss-Inquart's post-*Anschluss* (unity) Nazi cabinet of 1938 and an ex-SS officer.

Until recently, the Freedom Party was a marginal part of Austrian public life. In the elections of 1949 and 1953, the Freedom Party's predecessor scored around 5 percent; thereafter, the Freedom Party received between four to seven percent of the national vote. Under Haider's leadership, support for the Freedom Party has increased at an incredible rate.

Political Life

Since the age of twenty, Haider has held various positions in the right-wing Freedom Party, including as a member of parliament from 1979 through 1983. In 1986, Haider was elected party leader. Three years later, saying he would use provincial politics as a springboard for the chancellorship, Haider became the governor of Carinthia. In 1991, Haider was forced to resign from this post after publicly praising Nazi labor policy (see below), and became Deputy Governor. Haider re-entered the national parliament in March 1992.

Haider's success in the October 1994 national elections astounded political observers. In 1986, the Freedom Party received 5% of the vote. Only eight years later, in the 1994 elections, Haider and his party garnered 22.6% of the vote, achieving the dubious distinction of gaining more votes in a parliamentary election than any other European far-right party. In the 183-seat parliament, the Freedom Party jumped from thirteen to forty-two seats. Political analysts credited the Freedom Party's success to a receptiveness to Haider's anti-foreigner message, as well as with a widespread disgust for the stodginess and patronage of the Social Democrats and the Austrian People's Party.

Haider's rise caused the two mainstay parties of Austrian politics to suffer losses they had not experienced in their forty-nine year reign. The Social Democrats garnered only 35% of the vote, a drop of 8%, receiving only 66 seats. Their coalition partner, the conservative Austrian People's Party, dropped 4.4% to 28% of the vote, receiving only 52 seats. The coalition continued, until its breakdown in October 1995, with both party leaders refusing to welcome Haider as a coalition partner.

In October 1996, Austria's first direct election of MEPs to the European Parliament took place. In this election, the Social Democratic Party (SPO) suffered serious electoral setbacks, in contrast with both the Austrian People's Party (OVP) and Haider's Freedom Party (FPO), which increased their share of the vote. One of the principal factors that contributed to the FPO's success in this election was its anti-European stance. In gaining 27.6% of the vote, Haider's party broke through the projected 25% "natural ceiling" that had until then been assumed for the European far right.

In local provincial elections, Haider's party gained great popularity. The FPO emerged as the strongest party in the province of Carinthia, and a similar trend emerged in the elections to the municipal assembly of Vienna, which is Austria's most important local council. In these elections, the SPO lost the majority it had held without interruption since 1918 (except during 1934-1945). The FPO increased its share of the vote from 22.5% to 28%.

In 1997, Haider's party captured 28% of votes in elections to the European Parliament; the Freedom Party's total was 6 percentage points higher than it scored in December's general

elections. The results placed the Freedom Party in third place, behind the People's Party, the junior coalition party that scored 29.6 % of the vote, and the governing Social Democratic Party, which gained 29.1 % of the vote.

In March 1999, Haider was again elected governor of the province of Carinthia with 42 percent of the vote. In the June 1999 European Parliament elections, Haider's party lost four percent of the vote, down to 23.5%. The SPO, the Social Democratic Party of Austria, which gained 2.5%.vote. The FPÖ took 5 seats, a loss of one seat from 1996.

Political Agenda

Xenophobic and racist sentiment have permeated Haider's political career.

Anti-Immigrant statements

According to Haider, immigration offers no benefits to Austrian society. Rather, immigrants take jobs away from Austrians and bring in crime from Africa, Eastern Europe and elsewhere. His 1999 election campaign poster slogans include: "Stop the foreign infiltration" and "Stop the abuse of asylum." Posters showing Haider and his prime ministerial candidate Thomas Prinzhorn say "Two real Austrians."

Other infamous Haider statements on immigrants include: "The Africans who come here are drug dealers and they seduce our youth,"; "We've got the Poles who concentrate on car theft," he claims. "We've got the people from the former Yugoslavia who are burglary experts. We've got the Turks who are superbly organized in the heroin trade. And we've got the Russians who are experts in blackmail and mugging."

In February 1993, Haider and the Freedom Party launched a twelve-point petition campaign for ending foreign immigration and keeping the proportion of non-German speaking children in schools under 30%. Haider predicted he would get at least one million signatories. In what was viewed as a major defeat, the petition was signed by only 417,000, or 7.5% of the population.

During the 1994 election campaign, Haider's linkage of immigration and unemployment continued, causing the ruling coalition to accuse Haider of manipulating public fears over joblessness. Haider announced to Austrians "we have to stop immigration until unemployment is reduced to under 5 percent," claiming that the unemployment rate was 5.8%. The official unemployment figure at that time was 4.4%.

In 1996, Haider called "The government's so-called integration policy a disaster. They are ready to open the doors to another 153,000 foreigners who will take school places, training

places and flats (apartments)," Haider said. He continued, "When Turkish children demand protection money from our children at the playground, it's time to say, this is our state," Haider declared.

Haider has continued to wage a xenophobic campaign to expel foreign workers. In March 1997, Haider stated that he wants one third of all foreigners working in Austria to be sent home over the next two years.

According to Haider, "We take the right stand at the right time to save Austria against the dangers coming from outside."

Defending Nazi policy and Nazis:

According to his critics, despite public disclaimers and overtures, Haider has a public record of defending the policies of Nazi Germany and of justifying individual actions during those years. Haider has utilized terminology reminiscent of the Nazis, announcing, for example in October 1990 a "final solution to the farm question." Upon his election to the leadership of the Freedom Party, Haider rejected comparisons with the German Nazi Party, saying "The Freedom Party is not the descendant of the National Socialist Party. If it were, we would have an absolute majority."

Indeed, Haider first gained international attention in March 1986 during the controversy surrounding the return of Walter Reder, an Austrian born former major in the Nazi SS, who was freed by Italy from a life sentence he was serving for his role in the mass killing of Italian civilians in 1944. For Haider, the controversy was ridiculous, as Reder was "a soldier who had done his duty." Dismissing Reder's wartime activities, Haider stated: "If you are going to speak about war crimes, you should admit such crimes were committed by all sides."

Haider's most infamous comment came during a July 1991 debate in the Carinthia provincial parliament, when Haider, then governor, declared: "An orderly employment policy was carried out in the Third Reich, which the government in Vienna cannot manage." In face of a national and international uproar, Haider apologized for his remarks, but said "What I said was a statement of fact: that in the Third Reich a large number of workplaces were created through an intensive employment policy and unemployment was thereby eliminated." Haider, of course, did not mention to particulars of Nazi labor policy, including military buildup, slave labor, and concentration camps. Recently, Haider defended his 1991 statement, claiming he was referring to Nazi policy between 1933 and 1936.

In May 1992, while the government was embroiled in a scandal involving a provincial government's decision to honor a gathering of Waffen SS veterans, Haider defended the decision. Haider instead accused the Interior Minister in Parliament of engaging in "primitive

attacks" on "respectable" war veterans, while turning a blind eye to immigrant perpetrated crime.

More recently, Haider spoke out against the Austrian government's plans to compensate 30,000 Austrian victims of Nazi rule, including Jews, Communists and homosexuals, claiming that Austrian victims of the allies, such as civilians who fled Austria's occupation by US, Soviet, French and British troops, should also be compensated. As he told an elderly Austrian audience in April 1995, "It is not fair if all the money from the tax coffers goes to Israel." However, when the Parliament voted in June to set up a \$50 million compensation fund, Haider voted in its favor. Still insisting on the need for compensation for victims of the allies, Haider explained, "But we do not intend to be petty. Even though you will not join us to widen the scope of the fund we will not vote against the bill. We too want to draw a line under a chapter we are also responsible for."

In May 1995, the Freedom Party was the only major Austrian political party absent from ceremonies at Mauthausen death camp marking the 50th anniversary of the liberation of the liberation of the camp. Just before the anniversary, Haider had referred to Mauthausen as a "punishment camp," implying that those interred there were criminals.

While addressing the reunion of Waffen-SS veterans, Haider declared that the reason people opposed them was "simply that in this world there are decent people who have character and who have stuck to their beliefs through the strongest headwinds and who remained true to their convictions until today." Haider's appearance at the ceremony was unknown until days before amateur videotape of the gathering was broadcast on German television in December 1995.

Following these revelations, Haider defended his appearance at the event, saying: "The Waffen SS was a part of the Wehrmacht and hence it deserves all the honor and respect of the army in public life." "Everything I said in that video was completely acceptable." "I participated in this event and I don't see any reason not to. While I reject National Socialism, I certainly do not approve of the wholesale disparagement of the older war generation. I stand by this generation and I fight against the way it is disparaged." Haider claimed he did not know the Waffen SS had been branded a criminal organization by the post-war Nuremberg war crimes tribunal, adding: "It doesn't interest me in the least."

In December 1995, after viewing the video which captured Haider addressing and mingling with former SS officers, Austrian public prosecutors launched a criminal investigation into Haider's comments and speech on the basis of the law against reviving Nazism. Following the investigation by the public prosecutor's offices, the Austrian ministry of justice announced that it was to drop the proceedings because of insufficient grounds.

During a parliamentary debate in July 1998 on a proposed new law requiring applicants for

Austrian citizenship to prove knowledge of German, Franz Larfer, an MP of the Freedom Party, used the word *Umvolkung*. This term was used by the Nazis to define the forced change of the ethnic composition of a population by immigration or compulsory transfer. This happened in Eastern Europe during the Nazi-period leading consequently to the annihilation of the inhabitants. The term is comparable to the expression *ethnic cleansing*.

In reaction to the use of this expression, members of the Austrian parliament booed and shouted and the session had to be interrupted. After Heinz Fischer, the president of the Austrian parliament, explained to Larfer the meaning of this word, Larfer returned to the microphone apologizing for applying it. As the media reported extensively on this incident, Haider defended Larfer's use of this term, and reiterated in a press conference the following day that his colleague was right in using this expression, explaining that the government applying a liberal immigration policy allows for extensive "foreign infiltration," which subsequently leads to *Umvolkung*.

Attempts to improve image:

In recent years, Haider has taken a number of public steps in an attempt to redeem his international image. During a 1994 visit to the United States, Haider visited the Holocaust Museum in Washington, D.C., declaring afterwards: I think that even those individuals who don't know much about history will realize that we must do everything to enforce tolerance, everything to enforce human rights and everything to strengthen democracy."

In May 1995, Haider and four companions visited the Simon Wiesenthal Center's Museum of Tolerance in Los Angeles. The visit came in the midst of a Freedom Party advertising campaign opposing a plan to make Nazi-hunter Simon Wiesenthal (in whose honor the Center is named by who is unaffiliated with the organization) an honorary citizen. Haider and the Freedom Party claimed the Museum was questioning Austrian democracy by hanging the democratically elected Haider's photo alongside those of Idi Amin, Pol Pot and Saddam Hussein. In fact, Haider's photo hung alongside politicians described by the Center as "right-wing demagogues," including Jean-Marie Le Pen and David Duke. Haider's request for a meeting with the Center's leaders was rebuffed.

In 1996, Haider appointed Peter Sichrovsky, a Jewish Viennese journalist, as his number 2 candidate for the European elections in October. Many attributed Sichrovsky's appointment to a move by Haider to avoid criticisms of anti-Semitism. Sichrovsky, in response, maintained that such accusations were themselves anti-Semitic: rather than accepting him as a parliamentarian, commentators could only remark on his religion. Haider denies that Sichrovsky was only selected as the Freedom Party's deputy leader because he is Jewish. On October 16, 1996, Sichrovsky was elected as one of six members of the European Parliament on the Freedom Party ticket.

Austria's Jewish community considers Sichrovsky, who now divides his time between Vienna and Chicago, an embarrassment and a traitor. Sichrovsky, who in reference to Haider had once written, "the scum has come to the surface," is now praising Haider as the hope for Austrian democracy. In a November 1996 interview with *The Jerusalem Report*, Sichrovsky admitted that he and Haider used each other. "I got a short cut to a political career." When the interviewer asked why Haider had chosen him, Sichrovsky responded "He definitely used me as a Jew."

Conclusion

Haider has fended off accusations of anti-Semitism, although there is evidence that some of his followers are demonstrated anti-Semites. Nevertheless, Haider has exhibited insensitivity to Nazi brutality and a refusal to appreciate the suffering endured by those who lived under Nazi rule. Haider's recent attempts to promote a more moderate political agenda, for the purposes of attracting votes from the center and gaining acceptance from the international community, do not erase his record of xenophobic policies.

No one can deny Joerg Haider's democratic right to espouse his views, nor can one question the Austrian public's legitimate right to support him. But the rise of Joerg Haider and his Freedom Party are indeed troubling to those who continue to hope for a more tolerant and inclusive Europe.

Dr. Jörg Haider

Born January 26, 1959, in Bad Goisern, Upper Austria.

Jörg Haider attended grammar school in Bad Ischl, from 1968 to 1973 he studied law at the University of Vienna and received his degree as Doctor of Law in 1973.

From 1973 to 1976 he worked as assistant professor at the Institute for State and Administrative Law at the University of Vienna.

In 1970 Jörg Haider started his political career as Chairman of *Ring Freiheitlicher Jugend*, the youth organization of the FPÖe. From 1971 on he was also member of the FPÖe's executive board.

In 1976 Haider was appointed party secretary of the Carinthian FPÖe. From 1979 to 1983 he

was a Member of the Austrian Parliament and acted as the party's spokesman for social affairs.

In 1983 Jörg Haider was elected Chairman of the FPÖe of Carinthia and became a member of the regional government of Carinthia, where he was responsible for trade, tourism and road construction. At the FPÖe's 18th party convention Jörg Haider was elected Chairman of the FPÖe of Austria on September 13, 1986. Shortly afterward, in November 1986, federal elections took place. The FPÖe had its up to then greatest success with 9,7%, i.e. 18 seats in Parliament.

From 1986 to 1989 Jörg Haider was again a Member of Parliament and acted also as parliamentary party leader. In 1989 Haider was his party's leading candidate in the regional elections in Carinthia. For the first time the FPÖe succeeded in becoming the second strongest party and formed a coalition with the ÖVP (Christian Democrats). In May 1989 Haider was elected Governor of Carinthia by the regional legislature. In June 1991 the coalition in Carinthia broke up and Haider became Vice-governor. Since June 1992 Mr. Haider again serves in Parliament as the caucus leader of *Die Freiheitlichen*.

AUSTRIAN FREEDOM PARTY (FPÖ)

Following the restoration of the Austrian Republic in 1945, the four occupying powers allowed Conservatives and Socialists to form parties, the ÖVP and the SPÖ, but the liberal element among the population was initially refused independent political representation.

With the establishment in 1949 of the "Verband der Unabhängigen" (Association of Independents - VdU), the foundation was laid for a third political force in Austria. The Association had the support of "liberal-freiheitlich" circles and of voters disappointed by the People's Party and the Socialists; it proceeded to develop new social ideas based on the principle of partnership. Anti-Marxist in character, the new group was particularly opposed to all kinds of class-warfare.

The two parties which formed the coalition government(ÖVP and SPÖ) consistently prevented the "Verband der Unabhängigen" from assuming any political responsibility and when, as a result of this, the party began to disintegrate, the new "Freiheitliche Partei Österreichs(FPÖ) was founded in 1955 by Anton Reinthaller. It took over the other group's party organization and distinguished its ideology more clearly from that of the other parties.

From 1955 to 1966, the FPÖ provided the only parliamentary opposition to the coalition formed by the ÖVP and the SPÖ. When the coalition broke up, the FPÖ was able to assume a more significant political role.

Attempts by the ÖVP, during its period of one-party government, to render the FPÖ completely ineffective met with no success. The SPÖ drew its own conclusions from this and acknowledged the FPÖ as a political partner in 1970. When the Socialists formed a minority government, the FPÖ was called to assume political responsibility, and during the period of SPÖ one-party governments (1971-1983) it represented a negotiating partner, independent of both SPÖ and ÖVP, whose voice played a role in making parliamentary decisions on Austrian domestic politics. In 1983, for the first time in its history, the FPÖ joined the government as the coalition partner of the SPÖ.

In 1986 Jörg Haider was elected federal party leader. In the immediately following parliamentary election in the same year the FPÖ won 18 seats, which increased to 33 in the 1990 election. Despite the secession of some members, who founded the Liberal Forum, the Party made considerable gains in the 1994 parliamentary election. 42 parliamentary seats speak a clear language: the determined and consistent policies pursued in the interest of Austria were for the first time supported by more than one million voters.

This upswing reached its first peak with Jörg Haider being elected Provincial Governor of Carinthia in 1989.

On account of this strong voter support, which enabled the FPÖ to share governmental responsibilities in almost all the provinces, the party has been able to implement its freedom ideas in concrete form. At the same time, however, the party continues its role as an opposition party which offers constructive criticism and sees itself as the driving force behind Austria's political renewal.

The excellent election returns of the last few years, which reflect the growing confidence of the voters in the party's political work, are seen by the party leaders as making it incumbent upon them to defend the interests of Austrian citizens to the best of their ability. In order to meet the challenges of changing conditions, the traditional way of regarding the political landscape as being divided into opposing camps must be abandoned and the powers of political parties limited. This is the reason why the extraordinary Party Convention at Linz in 1995 decided to change its name to "Die Freiheitlichen" - The Freedom Movement -, demonstrating in this way that they saw themselves as a reform movement on the one hand and a citizens' movement on the other. The new name is conceived as being synonymous with a dynamic civil rights movement that will be open to independent candidates and enable without party affiliation to participate in elections as both candidates and voters.

The FPÖ's next reform effort was the "Compact with Austria" project, in which some thousand experts were commissioned to develop a program designed to develop the Austrian democratic system into a citizen's republic.

The Nationalrat election of 1995, which was held only one year after the previous one, gave the FPÖ more than one million votes. For the FPÖ, 1996 was dominated by the European Parliament elections. The FPÖ succeeded in narrowing the gap between itself and the governing coalition parties in terms of both votes and percentage. 6 of the 21 Austrian parliamentary delegates representing Austria's interests in Brussels and Strasbourg were members of the FPÖ.

In 1997, in the course of an extraordinary Party Convention, the new party programme of the "Freiheitliche Partei Österreichs" was adopted. This programme defines the "new" FPÖ's ideological principles and thus substitutes the 1985 programme. The various chapters, for example "Freedom as the supreme good", "Human dignity as unassailable", "Europe - community of fate", "Democracy reformed - a free republic", contain the basic principles of the party's policy of renewal regarding all relevant areas in government, society, culture and economy.

State elections in Austria

Landslide victory for right-wing extremists

13 March 1999

Last Sunday voters went to the polls in three of Austria's nine states (Kärnten, Tirol and Salzburg). The Austrian Freedom Party (FPÖ) of Jörg Haider, which employs racist and neo-fascist slogans, increased its vote in all three states. In Kärnten, the southern-most state of Austria bordering Slovenia, the increase was exceptionally large. There the FPÖ vote rose by 8.8 percent, giving the party 42.1 percent of the total, the first time it has gained the largest single party vote in a state election.

The FPÖ pushed the Social Democratic Party (SPÖ) into second place, with 32.9 percent--a 4.5 percent loss. For years, Kärnten was counted as a social democratic stronghold and the SPÖ played a key role in state politics. Up until 1989 the state president was almost always a social democrat. The conservative Austrian Peoples Party (ÖVP), from whose ranks the state president has come more recently, lost 3.1 percent of their vote, despite doing fairly well in the opinion polls before the election. Their total of 20.7 percent was less than half that of the FPÖ.

According to information from the Austrian polling institute SORA, voter movement was much stronger than usual. An exceptional number of former social democratic voters (26,000) cast their ballot for the FPÖ instead, with another 8,000 coming from the Christian

democratic ÖVP. Dissatisfaction with both the social and Christian democrats, who have dominated federal politics in Vienna for over 13 years, ruling in a grand coalition, was abundantly clear. In the past voters tended to switch between these two parties, and this was generally the pattern reflected in Tirol and Salzburg: the SPÖ gained in urban Salzburg, whereas in the rural areas and tourist centres of the Tirol it was the conservative ÖVP.

In Kärnten, where Haider stood as a candidate and the FPÖ concentrated its campaign, the right-wing extremists were able to benefit from growing social and political protests.

By the evening of the election, the SPÖ state chairman, and their lead candidate in the elections, had resigned. The former state premier Christof Zernatto (ÖVP), faced with an electoral debacle for his party, made it clear that he would not be putting his name forward as the next state prime minister. This means the road is open in Kärnten for Haider to take the post.

Kärnten is a small state with just half a million voters. However, the election result sent a shock wave throughout Austria and caused uproar internationally. It can no longer be excluded that the neo-fascist Freedom Party may become the strongest single party in Austria in June's European elections, and could even emerge as the victor in the federal elections this autumn.

Once already, in May 1989, Haider held the reins of power in Kärnten's capital Klagenfurt. However, at that time the SPÖ was the largest party and the FPÖ was only able to govern in a coalition with the Christian democrats. Nearly two years later, Haider was forced to resign after expressing his public admiration for Adolf Hitler and praising the "Nazi's employment programme" as a "model".

He then pursued his career at the federal level. In 1993 he initiated a referendum "Austria First!", which called for the rigorous expulsion of foreigners and asylum-seekers as part of a sweeping campaign against Austria's "überfremdung" (literally, "swamping with foreigners"). He systematically diverted the growing fear of rising unemployment and social decay into extreme right-wing, racist channels.

The recent election victory in Kärnten was also surprising because just last year the FPÖ was in a deep crisis and Haider had only been able to cling onto the leadership with great difficulty. As in other European parties of the extreme right, violent internal clashes had nearly led to the disintegration of the FPÖ. Following certain dark dealings and swindles, the party's former economic expert Peter Rosenstingl fled to Brazil, taking millions from the party coffers with him. Another leading member was found guilty of conspiracy to commit tax evasion.

Haider, who had often accused the other parties of corruption and dirty dealings, now faced

the same criticism. He was forced to admit that his family had made its millions from the Nazi policy of "arianisation". One of his great uncles used his position in the Nazi party in order to take control of a Jewish widow's possessions. The 30 million deutsche mark inheritance was able to bypass the taxman, and came into Haider's ownership in 1986. The self-proclaimed "champion of the little man" has since belonged to Austria's wealthiest elite.

In the face of internal criticism and inner-party disputes, Haider threatened several times to resign and withdraw from politics altogether. He hoped that the election in Kärnten would provide him with ammunition against his inner-party opponents. Even he was surprised at the scale of his victory. He told the press that he had expected to gain votes but had not thought the FPÖ would tally over 40 percent.

A similar political development can be observed in Austria as has been witnessed in other countries. The anti-social policies of the larger established parties--the social democrats and conservatives who had determined the fate of the country for many years--come more and more into conflict with the great majority of working people. Under the conditions of political crisis and paralysis in the working class, a political vacuum ensues that right-wing parties and groups can exploit, despite their own divisions and lack of orientation.

It is no accident that the racist demagogues have found support in Kärnten, where the social and political problems of Austria are concentrated most strongly. Unemployment is above average and the social crisis is most pronounced in this region with a weak infrastructure, and characterised by small-scale farming and tourism. The widening gulf between rich and poor is there for all to see. While millionaires swank about around (lake) Wörther See, and build opulent villas and castles in the other tourist centres, the European Union's agriculture policy is forcing more and more small farmers to abandon their holdings, facing entire families with ruin.

As well as whipping up racism, Haider very consciously stressed the social questions in his demagogic election speeches. He demanded that factories with more than 20 percent foreigners in their work forces should lose all state subsidies. He combined his well-known rabble-rousing against the European Union with the call for a guaranteed existence for farmers in the form of a "jobs premium". Families and single parents should receive more support, including state benefits. Symbolically, he distributed "family cheques" and promised a minimum benefit payment up to the age of six for every child. Moreover, he called for a drastic lowering of rents and for mass tax cuts. How he would finance his proposals was not spelled out. In any case, these promises were made to be broken.

There are also historical reasons why Haider did well in these elections, and in previous ones in Kärnten. There is still a strong Slovenian minority in southern Austria. In eight of Kärnten's districts, Slovenian is the second official language. Even before Haider there had been many racist attacks on Slovenians in Kärnten. In 1920 a referendum was held to

determine whether south Kärnten, the area around Klagenfurt and Villach, should become part of Yugoslavia. This provoked a strong German nationalist opposition that instead called for Anschluss (union) with Germany. Even before the vote was taken, violent battles fomented by the so-called "defence force" ensured that there was no question of the area joining Yugoslavia.

In the 1930s the Nazis were able to rely on this pro-German nationalist grouping, while Italian and Yugoslavian anti-fascists had to operate illegally in this area. After the war, these contradictions remained. The veterans of the anti-fascist struggle gathered inside the Communist Party. On the other side, many Nazi thugs hid away in Kärnten.

To counter the influence of the Communist Party, the social democrats also encouraged racist sentiments against the Slovenian minority and rested on German nationalist traditions. In the "Ortstafelsturm" (name-sign storm) of 1972, under social democratic state and federal governments dual-language street name signs were forcibly torn down, even though the Austrian constitution of 1954 obliged the provision of such signs. The signs have still not been replaced in some districts with a high percentage of Slovenians.

Haider has invented nothing new in Kärnten. In the past, the racism of the social democrats was hidden behind a thin façade of "social partnership". The end of this policy means that the social democrats are revealing their true colours. The social democrats could prevent Haider from becoming state premier by refusing to support him in the state legislature, where he would need a majority to enter office. But they do not want to do this. Instead, they are preparing to collaborate with him at the federal level. They are politically confounded and are striving to channel Austria's growing social conflicts in a racist direction.

Social democratic opposition to Haider consisted of making him superfluous by adopting his slogans. The policies of the two parties continued to merge. Increasingly, social democratic politicians came to applaud Haider. The mayor of Wolfsberg in Kärnten, Gerhard Seifried, said on the election eve that Haider had "proved to be the best social democrat". He became the first SPÖ politician to openly call for Haider to become state premier. Others then followed.

Despite certain exceptional circumstances in Austria, the election must be seen in the context of contemporary European and international relations. The coming to power of social democratic governments throughout much of Europe was an expression, if a limited one, of a mobilisation of the working class against the worsening attacks of the conservative governments on social conditions. This immediately created a political crisis in the ranks of the right-wing extremists. As these social democratic governments continued the anti-social policies of their conservative predecessors, and went even further, political frustration grew, providing the right with new impetus.

To prevent this requires a reckoning with the policies of social democracy and the building of a workers party that will not leave the social questions to the right-wing demagogues.

[Welcome to the Austrian Freedom Party](#)

The FPÖ - The Movement for a Political Renewal of Austria

The FPÖ is the Force for Change in Society

The FPÖ is the only force for change in society in Austria, as it pursues a strategy to change the system without conforming to given balances of power. The aim is to achieve the liberal ideas of fundamental rights and of liberty by liberating the citizen from political parties. The jurisdiction of the Establishment parties SPÖ and ÖVP which branches out throughout the whole country - from schools to pensioners and to sport and motoring clubs - and which especially aims to keep people dependent with regards to work and housing, should be smashed. This will deprive the great coalition's cartel of fear, to which both parties fled to preserve their spheres of power, of its meaning and purpose, and free competition will also be introduced in the political sphere. In this sense the Liberal Party regards itself as a large civil rights movement. Austria should no longer be the republic of the Reds and Blacks but the home of the Austrians. That is the challenge to the rule of the "proporz" parties who talk a lot about democracy but in truth strive to hinder the free citizen.

We see our liberal aim as a free democratic society in the sense of a community of solidarity. The creation of an open society with the courage to allow diversity, which on the courage to allow diversity, which on the basis of values combines achievement with a sense of responsibility for mankind and nature, occupies the centre of our political interests.

Our Fundamental Values

Liberty

Liberty needs to be protected from oppression by the prevailing political system. There is therefore no liberty without order. However, liberty also means responsibility. Responsibility for oneself is the best protection from outside domination. Private property is the best guarantee of this. The greater the sense of responsibility the less necessity there is for regulatory intervention. Decency, honour and morality should determine the use of liberty.

Justice

There is no liberty without law and there can be no law without justice. This does not only mean equality before the law, in legislation, in jurisdiction and administration but also social justice: not in the sense of redistribution but rather as the duty of the community to help the needy, the right of the individual to more salary for more work and better performance, the recognition of unjustified inequalities.

Home

The avowal of Austria as our homeland is the basis of our political action. We want to preserve and maintain the natural environment and cultural heritage inherited from our forefathers in order to hand them on to our descendants in a worthwhile condition. If the family is our smallest communal good, our home Austria with its natural cultural and ethnic diversity is the largest communal good. Love of ones own homeland corresponds to respect for the home countries of other peoples. This positive form of patriotism is the answer to exaggerated nationalism and chauvinism on the one hand, and the utopia of a multicultural society on the other. It thoroughly promotes the idea of being European an making a responsible contribution to Europe.

Democracy

We stand for a liberal democratic republic on the basis of general human and civil rights. Neither can these rights be abrogated by democratic means. Democracy guarantees the highest degree of liberty and justice, in it all law must in fact originate form the people. However, democracy may not lead to the oppression of a minority by the majority, nor to exclusion. Tolerance is also necessary for its realisation.

[20 Points for Austria](#)

ELECTION PLATFORM OF THE FPÖ

"To renew Austria"

Contract with Austria Austrians have been lied to in the past by the ruling coalition Socialist and People's Parties (SPÖ/ÖVP). They have broken all their pre-election promises before: on tackling the alarming budget deficit, on pensions reform, on administrative savings, on health reform, and on modernising the railways etc etc. We in the FPÖ (Austrian Liberal Freedom Party) have not duped the electorate and pledge in the future to keep our word in a signed "Contract with Austria". This should be put forward in the first hundred days of any new parliament. Our initiative consists of the following points:

1. A PLEDGE TO THRIFT

The constitution should be amended to limit the federal debt to 60% of the Gross Domestic Product (GDP). The maximum takings or "annual state grab" (taxes, fees, duties etc) should be limited to 40 % of the GDP instead of the current 44%. This amendment should be put to the people in a referendum. A transition period of three years is foreseen for these constitutional upper limits to become operational. Any government then violating these norms can be dismissed by the federal president.

2. A PLEDGE FOR MORE DEMOCRACY

A petition drive supported by over 100,000 citizens should suffice for a mandatory referendum, as in Switzerland. At present the forms of direct democracy such as the petition drive or referenda are ultimately controlled by the governing parties rather than the people. Parliament is only required to discuss, but not act upon, a successful petition drive and a referendum needs the consent of the government. Not only the federal president, but also key politicians at state and provincial levels such as governors and mayors, should be directly elected by the people.

3. A PLEDGE FOR MORE FREEDOM

The question of abolishing compulsory membership in the chambers should be put to the country in a referendum. At present people are forced to join the chambers and various other professional institutions. We believe this is archaic and infringes the right to freedom of assembly.

4. A PLEDGE TO SAFEGUARD FREEDOM OF THOUGHT

Austria operates the last state-run public opinion monopoly in Europe. This has already been condemned by the European Court for Human Rights. Private radio and television stations should be allowed.

5. A PLEDGE FOR MORE JUSTICE

The current practice whereby the Executive can direct or terminate legal proceedings shall be abolished. The appointment of High Court judges should not be influenced by political

parties.

6. A PLEDGE FOR MORE "CHECKS AND BALANCES"

Adverse findings and criticisms of the Central Auditing Authority must lead to action. This body is currently limited by parliament. This is a "watchdog" who can bark but not bite.

7. A PLEDGE TO PRUNE GOVERNMENT ADMINISTRATION

Austria leads the world in public administration and costs. Many services can be contracted out to the private sector. New laws and regulations should be cost-accounted. Reductions in the public payroll can be achieved through a hiring freeze. This forms part of a long term consistent savings programme.

8. A PLEDGE FOR LEAN GOVERNMENT

Bureaucracy has a habit of proliferating. Austria has three times as many ministers as Switzerland. Rationalisation in government could lead to more efficiency, and savings in luxuries such as ministerial cars and perks.

9. A PLEDGE TO SLASH PRIVILEGES

Politicians' privileges including exorbitant golden handshakes, severance pay and multi pensions must be abolished. Here government politicians get more than the US President and do less. Leading politicians in our party have voluntarily limited their salaries. "Jobs for the boys" should be abolished and appointments in the federal reserve bank and the state sector should be made on the basis of merit rather than the possession of the right party book.

10. A PLEDGE TO CUT SUBSIDIES

Austria is subsidised to death. More state and more taxes have solved nothing in the past. Many subsidies go to political hacks. The public funding of political parties should be halved and state support for the press should be totally eliminated. The latter is currently being examined by the European Union on the grounds that it distorts free competition.

11. A PLEDGE TO CUT TAXES

Austria is overtaxed and overregulated. Both damage the competitiveness of the Austrian economy and restrict the purchasing power of consumers. The tax system should be simplified and taxes cut. The top rate should be cut by three percentage points and for lower salaries by five points.

12. A PLEDGE TO SAFEGUARD ECONOMIC COMPETITIVENESS

Austrian industry suffers from high supplementary wage costs, permanent reductions in investment incentives and tax barriers which hinder the growth of domestic capital resources. The sell out of core areas of Austrian industry is well advanced. This has led to job losses. An active economic policy must foster private economic activities. Tax incentives must be selective, promote research and development and be accompanied by administrative

reforms.

13. A PLEDGE TO SAFEGUARD ALL EARNED PENSION BENEFITS

Austria holds the world record in early retirement schemes. The average retirement age is around 57 and going down. The system is widely abused and many so-called pensioners are in good health and continue to work doing lucrative part-time jobs in addition to pulling in the state pension. This waste and abuse has to end. A pension reform should have at its core the allowance of private provisions for retirement on top of those provided by the state. The transition to such a system has to assure the retention of full benefits already accumulated and paid for by employees to date. For pension benefits already earned, there shall be no reductions or other "penalty" payments. Older employees should be protected from early lay offs by a combination of partial pensions and continuance of salaried income from their firm. This would be an alternative to the current practice of early retirement.

14. A PLEDGE TO ALLEVIATE THE TAX BURDEN ON FAMILIES

The current system is unjust. A single monthly income is taxed much higher than the same income accrued from two jobs. We propose a minimum "per capita" tax free family income code. This would eliminate the current discrimination against those families who are less well off. This reform should be achieved through savings in the cost of government and not through greater tax burdens on singles.

15. A PLEDGE TO SAFEGUARD THE HEALTH SERVICE

The system is currently prone to waste and money is allocated not on the basis of performance but without any relation to services rendered. The actual budgeted cost for surgery or health services shall be reimbursed instead of the current practice where hospital stays are automatically reimbursed, however long it takes. Similarly a services based reimbursement of private doctors would take the pressure of the state hospitals.

16. A PLEDGE TO PRIORITISE THE SECURITY OF AUSTRIANS

Crime is on the rise but rates of conviction are sinking. Organised international crime is rising explosively. The police must be equipped with the same modern technology as the criminals. Sentences have to be harsher to have a deterrent effect and stop criminals from committing the same act again. For capital crimes, life long sentences should mean life sentence with no early release for "good behaviour". Foreigners sentenced for criminal acts should be deported.

17. A PLEDGE TO LIMIT IMMIGRATION

The existing immigration laws should not be softened up. Each potential immigrant should give proof that they have a job and accomodation. To enable the return of the numerous illegal immigrants in Austria, we propose ID or identification requirements such as exist in most industrial countries today. The current practice of granting citizenship well before the legally required ten year waiting period should be discontinued.

18. A PLEDGE TO STEM THE LOSS OF RIGHTS TO BRUSSELS

The inter-governmental reform conference next year will determine whether more powers should be surrendered to the European Union or whether Europe should become a confederation of states in which the member countries retain sovereignty. Austria should fight for the continuance of the the unanimity principle and limit the flow of power to the Brussels bureaucracy. Austria's vital interests must not be overruled by the EU. Austria should seek, as the United Kingdom did, to re-negotiate its high budgetary contribution to the EU coffers with the aim of reducing these payments by one third. Efforts to enforce clauses in the Maastricht Treaty which would mean majority rule by the EU over Austrian water resources must be resisted.

19. A PLEDGE TO ALLOW TENANTS OWNERSHIP OF PUBLIC HOUSING

Such tenants fork out the same as if they owned the dwelling outright. We would change the housing laws to allow tenants to become the rightful owners once they have made these payments, since there exists no reason to deprive them of such ownership.

20. A PLEDGE TO SAFEGUARD THE ENVIRONMENT

Environmental laws shall be reformed along the principle of "the polluter pays". When pollution emissions become expensive they will be reduced. Environmental burdens imposed on agriculture shall be reimbursed to farmers directly. This would protect farm incomes and at the same time reduce the use of environmentally damaging substances.

[Index of FPÖ-info](#)

[From a Party State to a Citizens' Democracy](#)

The Way to the Third Republic

The age of the party state with everything divided along party political lines is gone.

The result of a sober analysis of the current state of Austria is that the Second Republic as a party state with everything divided along party political lines has finally worn itself out.

This system - developed after World War II and tailored to meet the requirements of the franchise parties SPÖ, ÖVP and KPÖ has ended with a declaration of political bankruptcy in the face of the present and future challenges for our country.

This party political state, which is basically a state dominated by Chambers and Associations, is drawing its last breath on the threshold of the third century. New challenges demand new answers!

WE WANT:

- As little state as necessary, as much freedom as possible
- No nationalisation of the individual, but the humanisation of the state
- Less power for functionaries, more rights for the citizen
- Less demands by the public purse, more consideration for private wallets
- Less politicised morality, more morality in politics
- Less group egoism, more broad-ranging thought patterns
- Less pressure through the compulsion to join a political party, more freedom through more support for the citizen
- Fewer subsidies for the incompetent and more promotion of elites · Fewer bureaucratic chains, more intellectual and mental autonomy

Our Way of Achieving This is the Third Republic!

In spite of everything that is said to the contrary, the Third Republic as a new form of identity for the people and their representatives will lead to more democracy.

Politicians will have more responsibility because the citizen will also have more freedom and responsibility. Politicians will no longer be able to use anonymous institutions to hide from the electorate; the electorate will no longer be able to escape responsibility by delegating to anonymous institutions. Both sides will be drawn closer together.

The Third Republic is a Clear Concept for a Genuine Democratisation of Austria

- Citizens' democracy instead of a party state
- Direct elections instead of a deputy democracy
- Restructuring of state responsibilities instead of state omnipotence
- Tax limits instead of tax pressure · Identity between the people and their representatives

In this connection the academy of the Freedom Party has set up 45 working groups dealing with all politically relevant areas. Within the framework of the project Contract With Austria they will draw up measures and strategies designed to develop the democratic system in Austria with regards to a Third Republic.

The first results of these efforts, the "20 Points for a Contract with Austria" was published by the Academy in November 1995.

Kapitel III

Österreich zuerst

Artikel 1

Österreich ist mehr als ein bloßer Zweckverband. Seine Bevölkerung ist durch den Willen zur Eigenständigkeit und Zusammengehörigkeit in regionaler Vielfalt verbunden. Dieser Wille findet seinen Ausdruck in der demokratisch, föderalistisch, und rechtsstaatlich verfaßten Republik Österreich.

1. Der Österreichpatriotismus äußert sich als Wille zur Eigenständigkeit und Zusammengehörigkeit der Österreicher, als Wille zur Aufrechterhaltung von Demokratie, Menschenrechten, Rechtsstaatlichkeit und Föderalismus, als Wille zur Pflege des kulturellen Erbes Österreichs und als Wille zur Erhaltung der Umwelt, Landschaft und Natur.

2. Die Identität Österreichs ist durch eine Vielfalt und Vielzahl regionaler Identitäten geprägt. Die Bevölkerung Österreichs hat nach leidvollen historischen Erfahrungen ihren Willen zur Zusammengehörigkeit im Rahmen regionaler Eigenständigkeiten bekundet.

Artikel 2

Das Bekenntnis zu Österreich begründet den dauernden Auftrag, die Demokratie als Grundlage des Österreichpatriotismus zu erhalten und weiterzuentwickeln. Darüber hinaus besteht die Verpflichtung, für die Selbständigkeit und Eigenständigkeit Österreichs sowie für die Erhaltung der Verfassungsprinzipien einzutreten.

Da sich nach freiheitlichem Verständnis der österreichische Patriotismus ausdrücklich auf ein demokratisch verfaßtes Gemeinwesen bezieht, resultiert hieraus auch ein dauernder Auftrag für die Freiheitliche Bewegung, die Demokratie bürgernah auszubauen und zu erhalten. Dieser Auftrag schließt die Erhaltung der rechtsstaatlichen, föderalistischen, sozialen und liberalen Verfassungsprinzipien ein.

Artikel 3

Aus der Zusammengehörigkeit aller Österreicher ergeben sich nicht nur Bürgerrechte, sondern auch Bürgerpflichten: insbesondere zur Solidarität, zur Aufrechterhaltung eines funktionierenden staatlichen Gemeinwesens und zur Leistung eines Beitrages für die innere und äußere Sicherheit.

Unter den genannten Bürgerpflichten sind insbesondere die Pflicht zur Solidarität mit den Landsleuten - etwa hinsichtlich der Unterstützung für Alte und Schwache -, die Vermeidung sozialer Härtefälle und dergleichen, die Pflicht zur Leistung von Beiträgen zur Erhaltung der Staatsfunktionen - etwa durch Abgaben bis maximal zu einer verfassungsgesetzlich gezogenen Obergrenze oder etwa durch einen persönlichen Beitrag zur militärischen Landesverteidigung oder zur Aufrechterhaltung der inneren Sicherheit im Bereich des Zivil- und Katastrophenschutzes -, zu verstehen.

Artikel 4

Das historische und kulturelle Erbe Österreichs berechtigt zu Stolz auf die erbrachten Leistungen, Traditionen und Errungenschaften. Der daraus erwachsende Patriotismus verpflichtet zu einer selbstbewußten österreichischen Politik und zu Widerstand gegen die kulturelle Verflachung, gegen die stets stärker werdenden Bestrebungen, Traditionen zu verunglimpfen und Österreich mutwillig herabzusetzen.

1. Angesichts des großen Anteils des alten Österreichs an der gesamtdeutschen und gesamteuropäischen Geschichte und des hiervon herrührenden kulturellen Erbes ist es legitim, mit Selbstbewußtsein und Stolz auch auf internationaler Ebene aufzutreten.
2. Eine Politik wird abgelehnt, die sich insbesondere seit dem Beitritt Österreichs zur Europäischen Union den massiven Vereinheitlichungs- und Nivellierungsbestrebungen zu Lasten der geistigen und kulturellen Substanz Österreichs anschließt.
3. Die Zeitgeisterscheinung, mit massiven Österreichbeschimpfungen und mutwilligen Herabsetzungen österreichischer Eigenheiten, öffentliches Echo zu erzielen, erfordert einen entschlossenen geistigen Widerstand aller patriotischen Kräfte.
4. Gerade auf medialer Ebene ist seit Jahren eine von kultureller Verflachung gekennzeichnete Entwicklung erkennbar; dies erfordert einen neuen geistigen und kulturellen Aufbruch, um speziell österreichische Traditionen und regionale Eigenheiten lebendig zu erhalten.

[Index of FPÖ-info](#)

Kapitel IV

Recht auf Heimat

Artikel 1

Unter Heimat sind die demokratische Republik Österreich und ihre Bundesländer, die historisch ansässigen Volksgruppen (Deutsche, Kroaten, Roma, Slowaken, Slowenen, Tschechen und Ungarn) und die von ihnen geprägte Kultur zu verstehen, wobei von der Rechtsordnung denklogisch vorausgesetzt wird, daß die überwiegende Mehrheit der Österreicher der deutschen Volksgruppe angehört

1. Der Heimatbegriff wird in räumlicher, ethnischer und kultureller Hinsicht definiert.

2. Dadurch werden das Heimatland, die historisch über Jahrhunderte ansässigen Volksgruppen sowie ihre kulturellen Traditionen, Leistungen und Errungenschaften als Kulturträger zu Schutzobjekten.

3. Das österreichische Volksgruppenrecht listet als Schutzobjekte die einzelnen historisch ansässigen (autochthonen) Volksgruppen auf, wobei die Judikatur denklogisch voraussetzt, daß die überwiegende Mehrheit der Österreicher der deutschen Volksgruppe angehört.

Artikel 2

Heimat in diesem räumlichen, ethnischen und kulturellen Sinne ist zu bewahren, zu schützen und zu gestalten.

1. Dies beinhaltet insbesondere den Auftrag zur Erhaltung einer lebenswerten Umwelt, zum Schutz und zur Weiterentwicklung der zivilisatorischen und kulturellen Traditionen im Rahmen eines freiheitlich-demokratischen Rechtsstaates und schließlich den Schutz des Bestandes sowie der kulturellen Identitäten der angestammten (autochthonen) Volksgruppen, wie dies der im Verfassungsrang stehende Art. 19 des Staatsgrundgesetzes über die allgemeinen Rechte der Staatsbürger vom 21. Dezember 1867 bereits vorgesehen hat.

2. Das Nebeneinander und das Zusammenwirken der verschiedenen Volksgruppen haben die Eigenart Österreichs bewirkt. Sie kann nur durch die Sicherung des Weiterbestandes der historisch ansässigen Volksgruppen erhalten werden, was gerade in Zeiten der Entwicklung überregionaler Zusammenschlüsse besonders notwendig erscheint.

Artikel 3

Jeder Österreicher hat das Grundrecht, über seine Identität und Volkstumszugehörigkeit selbstbestimmt und frei zu befinden. Es darf ihm aus seinem Volkstumsbekenntnis kein Nachteil erwachsen.

1. Das Grundrecht jedes Österreichers, seine eigene Identität und Volkstumszugehörigkeit selbständig und frei zu bestimmen, ist zu garantieren.

2. Dieses Recht ist nicht auf die historisch ansässigen Volksgruppen, wie sie unter Abs. 1 als Schutzobjekte des Heimatbegriffes erwähnt sind, begrenzt. Vielmehr ist es jedem Bürger selbst überlassen, ob er sich überhaupt einer ethnischen Gruppe zugehörig fühlt. In weiterer Folge hat jeder Bürger das Recht selbst zu bestimmen, welcher Volksgruppe er seiner Identität nach zugeordnet werden möchte. Allerdings kann er aus seinem Volkstumsbekenntnis nur in bezug auf die historisch ansässigen Volksgruppen subjektive Rechte ableiten.

3. Umgekehrt hat der Staat jedoch nicht das Recht zu regeln und zu bestimmen, welche Sicht seiner selbst der Bürger zu haben hat. Keinem Österreicher darf jedoch eine staatliche Benachteiligung oder eine private Diskriminierung aus seiner freien und selbstbestimmten Volkstumszugehörigkeit erwachsen.

4. Das freie Bekenntnis zum jeweiligen Volkstum ist eine Grundvoraussetzung für die Bewahrung und Weiterentwicklung der kulturellen Werte und des historisch-kulturellen Selbstverständnisses jeder ethnischen Gemeinschaft. Dieses Bewußtsein der besonderen Wesensart des eigenen Volkes muß untrennbar mit der Bereitschaft verknüpft sein, das Besondere auch in jedem anderen Volk zu achten.

Artikel 4

Österreich ist auf Grund seiner Topographie, seiner Bevölkerungsdichte und seiner beschränkten Ressourcen kein Einwanderungsland.

1. Das Grundrecht auf Heimat gestattet daher keine unbeschränkte und unkontrollierte Zuwanderung nach Österreich. Das Schutzerfordernis des Grundrechtes auf Heimat stellt ferner klar, daß Österreich auf Grund seiner räumlich begrenzten Ausdehnung, seiner Bevölkerungsdichte und seiner beschränkten Ressourcen kein Einwanderungsland sein kann.

2. Eine unbeschränkte Zuwanderung würde die ansässige Bevölkerung hinsichtlich ihrer aktiven Integrationsfähigkeit überfordern und dadurch deren Recht auf Wahrung und Schutz der eigenen Heimat gefährden. Multikulturelle Experimente werden abgelehnt, weil durch sie mutwillig gesellschaftliche Konflikte geschürt werden.

3. Das Schutzinteresse der österreichischen Bevölkerung erfordert den Erhalt der vollen Souveränität in Ausländerrechtsangelegenheiten.

4. Österreich hat aber den aus rassistischen, religiösen oder politischen Gründen Verfolgten politisches Asyl zu gewähren, sofern sie nicht über ein sicheres Drittland ins Bundesgebiet einreisen. Jeder Verfolgte hat aber weiterhin das Recht, sich zu seinem angestammten Volkstum zu bekennen und in seine eigene Heimat zurückzukehren. Insbesondere die zahlreichen Heimatvertriebenen, welche im Verlauf der tragischen Ereignisse der letzten Jahrzehnte in ihrem Grundrecht auf Heimat durch gewaltsame Vertreibungsmaßnahmen massiv verletzt wurden, gehen dieses Grundrechtes nicht verlustig und behalten ein Rückkehrrecht in ihre Heimat.

[Index of FPÖ-info](#)

Kapitel V

Christentum - Fundament Europas

Artikel 1

Die vom Christentum und antiker Welt geprägte Wertordnung bildet das wichtigste geistige Fundament Europas. Darauf beruhen die wesentlichen geistigen Strömungen vom Humanismus bis zur Aufklärung. Die kulturelle Prägung durch christliche Werte und Tradition umfaßt auch Angehörige nichtchristlicher Religionen und Menschen ohne religiöses Bekenntnis.

1. Die europäische Zivilisation hat ihre ältesten Wurzeln in der Antike. Das Antlitz Europas wurde in entscheidender Weise vom Christentum in seiner konfessionellen Vielfalt geprägt. Darüber hinaus wurde Europa auch durch Judentum und andere nichtchristliche Religionsgemeinschaften beeinflusst.

2. Die europäischen Rechtsordnungen fußen auf einem christlichen Grundwertekonsens.

Artikel 2

Die Bewahrung der geistigen Grundlagen des Abendlandes erfordert ein Christentum, das seine Werte verteidigt. Im Bestreben um den Erhalt dieser Grundlagen Europas sehen sich die Freiheitlichen als ideale Partner der christlichen Kirchen, auch wenn es zu verschiedenen politischen Fragen unterschiedliche Standpunkte gibt.

1. Die geistigen Grundlagen des Abendlandes sind die Idee der Menschenwürde und der Grundfreiheiten, die daraus abgeleiteten Vorstellungen von Demokratie und Mitbestimmung und der Rechtsstaatlichkeit, die Idee der Solidarität sowie der Respekt vor dem Leben und der Schöpfung.

2. Durch vielfältige Strömungen sind diese Grundlagen jedoch gefährdet. Der zunehmende Fundamentalismus eines radikalen Islams und dessen Vordringen nach Europa, aber auch ein hedonistischer Konsumismus, ein aggressiver Kapitalismus, das Zunehmen von Okkultismus und pseudoreligiösen Sekten und schließlich ein in allen Lebensbereichen vermehrt feststellbarer Nihilismus bedrohen den Wertekonsens, der deshalb verlorenzugehen droht.

3. Den großen christlichen Kirchen kommt eine entscheidende Rolle zur Bewahrung des europäischen Wertekonsenses zu. Da dies auch der Freiheitlichen Bewegung ein politisches Anliegen ist, sieht sie sich als natürlicher Partner der christlichen Kirchen. Daraus folgt, daß die FPÖ auch

für die Erhaltung des Religionsunterrichtes an öffentlichen Schulen eintritt und Bestrebungen, statt dessen einen hinsichtlich seiner philosophischen und weltanschaulichen Grundlagen fragwürdigen "Ethikunterricht" einzuführen, eine klare Absage erteilt.

4. Allerdings erwarten viele Menschen in Europa wieder vermehrt Anstrengungen der Kirchen, sich entschlossener gegen die geistigen Bedrohungen zu wehren und sich nicht mit der Rolle sozialer Betreuungsinstitute zu begnügen.

5. Der Liberalismus hat sich in seiner historischen Entwicklung stets gegen weltanschauliche und religiöse Intoleranz gewandt, die sehr häufig von religiösen Institutionen selbst ausgeübt wurde. In dieser historischen Phase ist ein Antiklerikalismus entstanden, der angesichts der geänderten Rolle der kirchlichen und religiösen Institutionen in Österreich überholt ist.

Artikel 3

Die Sicherung der Autonomie der Kirchen und anerkannten Religionsgemeinschaften erfordert die institutionelle Trennung von Kirche und Staat. Diese Trennung ist darüber hinaus auch ein wesentlicher Garant für die Wahrung der Freiheit des Einzelnen.

1. Die Sicherung der Autonomie der Kirchen und Religionsgemeinschaften erfordert eine institutionelle, nicht aber eine geistige Trennung von Kirche und Staat. Dies ist vor allem auch notwendig, um den parteipolitischen Mißbrauch von Kirchen zu vermeiden und um so die Vereinnahmung des Gewissens durch Parteiideologien zu verhindern.

2. Die institutionelle Trennung von Kirche und Staat hat mitgeholfen, jene Freiräume zu schaffen, die für die freiheitliche Tradition Europas bestimmend wurden.

3. Der religiöse Auftrag und die Wertorientierung der Kirchen und anerkannten Religionsgesellschaften erfordert Autonomie, um dadurch maximale Entfaltungsmöglichkeit zu gewährleisten. Dies ist ein weiterer und unverzichtbarer Beitrag zur Sicherung der Freiheit des Einzelnen, wie die historische Erfahrung lehrt.

Date: June 14, 1999

The Austrian Ministry for the Interior last night announced the preliminary Austrian results of yesterday's Elections to the European Parliament. Austria has 21 seats in the European Parliament.

| Party | votes | % | seats in the EP | % change to 1996 elections | seats in the EP in 1996 |
|-------------------------------|---------|-------|-----------------|----------------------------|-------------------------|
| Social Democratic Party (SPÖ) | 882,005 | 31,74 | 7 (+1) | + 2,59 | 6 |
| People's Party (ÖVP) | 851,343 | 30,64 | 7 (±0) | + 0,99 % | 7 |
| Freedom Party (FPÖ) | 652,458 | 23,48 | 5 (-1) | - 4,05 % | 6 |
| Greens | 257,043 | 9,25 | 2 (+1) | + 2,44 % | 1 |
| Liberal Forum (LIF) | 73,276 | 2,64 | 0 (-1) | - 1,62 % | 1 |

GOVERNMENT AND POLITICS

AUSTRIA'S POSITION IN THE WORLD

As a result of the end of the Cold War, Austria, which long held a marginal position at the borderline between East and West, has moved more to the centre of the larger Europe. The East-West conflict, which was the most decisive political factor in Europe since World War II has given way to new forms of partnership and cooperation in Europe. The range of activities designed to meet these objectives is broad - from improving conditions regarding political, economic and social stability to agreements in the field of military security. While the changes referred to above have, amongst other things, fundamentally improved the geopolitical context in general, and in particular for Austria, the community of nations is now confronted with a number of new dangers and risks, which range from uncontrolled mass migrations, violations of human rights and economic destabilisation to international crime and terrorism.

AUSTRIA'S POSITION IN EUROPEAN SECURITY POLICY

Since 1995, Austria has been a member of the European Union with observer status in the Western European Union (WEU), sharing this status with Ireland, Sweden, Finland and Denmark.

In this position Austria seeks to enhance the role of the WEU as an "integral part of the Union's development" and a factor in European crisis management.

In the Inter-governmental Conference Austria strongly advocated an increase in security, efficiency and coherence within the EU's Common Foreign and Security Policy (CFSP). These points were taken into account in the Amsterdam Treaty: Decisions concerning "common positions" must be based on a qualified majority, a unit for strategic planning and early-warning was created and the position of a "High Representative for CFSP" for the Secretary General was established. Austria also supported the decision that the EU is entitled to call upon the WEU for aid regarding the tasks within the Petersberg programme, i.e. humanitarian, peace-maintaining and -keeping actions and rescue operations.

A major element in the process of creating a new NATO is to foster the relations between the Atlantic Alliance and the former members of the Warsaw Pact as well as other states in Europe and Central Asia. These relations were significantly strengthened by the creation of the Euro-Atlantic Partnership Council as a forum for a multi-lateral dialogue, the consolidation of the Partnership for Peace, the signing of the NATO-Russia Founding Act and the establishment of a specific partnership with Ukraine.

It is Austria's task in the Partnership for Peace to focus on the standardisation of the armed forces designated for peace-keeping missions and the civil units, and to coordinate the required training operations. In civil emergency planning, nother focal point of Austria's activities, the emphasis lies on an extensive exchange of experiences and joint training.

Within its efforts to enhance the structures of European security, Austria played an active role in the course of the Balkan crisis. The Dayton Agreement provides for a multi-national peace mission to supervise the military aspects of the agreement. This multi-national peace mission, with Austria's contribution being a transport contingent, was prolonged by a period of 18 months in January 1997.

COOPERATION AT THE UNITED NATIONS

Austria has been a member of the UN since December 14th, 1955 and has since played an active role in solving the wide range of problems facing the organisation. It has been a member of numerous commissions and committees, such as the Committee on the Peaceful Uses of Outer Space, whose chairman since 1961 has been an Austrian diplomat, the Sea Bed Committee, the Human Rights Commission, the board of the United Nations Conference for Trade and Development and the Industrial Development Board of the United Nations Industrial Development Organization (UNIDO).

In 1963, 1976, 1984 and 1991 Austria was elected a member of the Economic and Social Council (ECOSOC), the UN's main economic body, for a three-year term at a time. Twice it was chosen to serve on the Security Council: in 1972 for the 1973/74 term, and in 1990 for the 1991/92 term. Austria was also elected to the governing board of the United Nations Environmental Program (1990-1993), the governing board of the UN Development Program (1992/93) and the UN Human Rights commission (1991-1996).

Austria has always lent its active support to UN efforts to maintain world peace. Since 1960 Austria has contributed to many UN peace-keeping missions with more than 37,000 soldiers.

AUSTRIANS HOLDING INTERNATIONAL APPOINTMENTS

In 1971 former Austrian Foreign Minister and UNO ambassador Kurt Waldheim was elected Secretary General of the United Nations, a post which he held until late 1981. From 1986 to 1992 Kurt Waldheim was Austrian President.

Just as it is active at an international level in the framework of the United Nations, Austria also plays a part in Europe, of which it became a member in 1956. Two Austrians have been appointed Secretary General of the Council of Europe. Lujo Tonic-Sorinj served in this position from 1969 to 1974 and Franz Karasek from 1979 until 1984. From 1975 to 1978 the Austrian Parliamentarian Karl Czernetz was president of the Council of Europe's Parliamentary Assembly. Another Austrian, Peter Leuprecht, was Deputy Secretary General of the Council of Europe from 1993 to 1997. Austria is signatory to most of the council's conventions, including the European Convention for the Protection of Human Rights and Fundamental Freedoms.

From 1987 to 1994 Gerald Hinteregger was Executive Secretary of the United Nations Economic Commission for Europe (ECE). From 1993 to 1995, Benita Ferrero-Waldner served as Chief of Protocol to UN Secretary-General at that time and was thus Austria's highest-ranking international civil servant in the United Nations. Since May 1995, Ferrero-

Waldner has been State Secretary in the Federal Ministry of Foreign Affairs.

In 1997 the former Chancellor Franz Vranitzky was assigned the overall coordination of the international efforts to improve the situation in Albania by the OSCE.

VIENNA AS A CONGRESS CENTRE

Austria's neutrality, its geographical position at the heart of Europe and its active participation in world affairs have meant that its capital, Vienna, has emerged increasingly as a centre for international congresses and conferences. Major international organisations have also made the city their permanent headquarters.

Vienna has been one of the permanent seats of the United Nations since 1979. Apart from the two specialized UNO organisations, the [International Atomic Energy Agency](#) (IAEA, in Vienna since 1957) and the United Nations Industrial Development Organization (UNIDO, in Vienna since 1967) the Vienna International Centre houses a number of other UN organisations and units, such as the United Nations Drug Control Programme (UNDCP), the International Narcotics Control Board (INCB), the Crime Prevention and Criminal Justice Division (CPCJD), Office for Outer Space Affairs (OOSA), United Nations Commission on International Trade Law (UNCITRAL), and the United Nations Information Service (UNIS).

OPEC, the Organisation of Petroleum Exporting Countries, has also had its permanent headquarters in Vienna since 1965.

In 1961, Vienna was the scene of the meeting between John F. Kennedy and Nikita Khrushchev, and it was the venue in 1970, 1971 and 1972 for the Soviet-American talks on the limitation of strategic arms (SALT). It was here in June 1979 that Presidents Jimmy Carter and Leonid Brezhnev signed the SALT II agreement.

Vienna is the seat of the Organisation for Security and Cooperation in Europe (OSCE, former CSCE). The Permanent Council and the Forum for Security Cooperation as well as the Organisation as well as the Organisation's numerous working groups meet throughout the year in Vienna. From 1986 to 1989 the third follow-up of the CSCE was held in Vienna. It ended with a meeting of the OSCE Foreign Ministers. From 1989 to 1992 the Vienna Hofburg was the venue for the two negotiations initiated by the Final Document of the Third CSCE Follow-up, the Negotiation on Conventional Forces in Europe (CFE) and the Negotiations on Confidence and Security Building Measures (NCSBM). The common advisory group for the CSE-treaty, signed in 1992, as well as the advisory commission for the Open Sky treaty meet in Vienna.

In 1993 the Austria Center Vienna hosted the United Nations World Conference on Human

Rights.

AUSTRIA WITH IN THE EU

Austria joined the European Union on January 1, 1995 along with Sweden and Finland. Prior to that the Austrians confirmed that they believed in the idea of European integration: In the referendum on EU-membership held in June 1997 a clear majority of 67% voted in favour of Austria's joining the EU.

Through its EU-membership Austria became part of the Common Market, thus becoming more attractive to countries both inside and outside of the Union due to its location between Eastern and Western Europe. These factors combined have opened up new possibilities for both consumers and producers.

The economic effects should not by any means overshadow the political importance of the European integration process. Today the European Union plays a crucial role in the stability of the whole continent. In the past few years it has become the main focus for all European countries. With its continuation of the integration process it is setting the direction of the whole of Europe. More and more decisions concerning Europe's future are made within the EU-institutions.

Austria now participates in this "direction-setting" and this is one of the strongest arguments in favour of its EU-membership. The EU-membership allows Austria to bring its specific concerns to bear on EU-policy, to have an equal voice in the decision-making process that will shape the future of both Europe and Austria. Franz Fischler, the former Austrian Minister of Agriculture, has been put in charge of Agricultural Matters in the European Commission.

In the second half of 1998 Austria assumed the presidency over the Council of the EU. During its presidency Austria emphasised, for example, on labour policy, the EU-reforms within the framework of Agenda 2000, the enlargement of the EU and the preparations for the introduction of the common European currency "Euro" on January 1, 1999.

CENTRAL EUROPEAN INITIATIVE (C.E.I.)

Austria is particularly interested in stable developments in the neighbouring reform countries and in the creation of a New European Architecture, in whose context regional cooperation is an important element, side by side with the integration of Europe. Without detracting from the central role of European integration in the creation of this New European Architecture, Austria considers the promotion of regional cooperation and indispensable means to this end, and regards its commitment to the C.E.I. an important activity for the benefit of Central Europe.

Organisationally, the C.E.I. comprises sixteen working groups and a Committee of National Coordinators. It holds annual meetings of heads of government. In addition to that, the C.E.I. Center for Interpretation and Documentation was established in Trieste (Italy) in 1996 under the chairmanship of the C.E.I. Its first director is an Austrian.

ANTIFA INFO-BULLETIN, Number 220

Until this historic success for the FPO, extreme rightwing parties in Europe had been confined to much narrower voter acceptance. Germany's Republikaner and NPD, France's Front National and extremist parties elsewhere in western Europe are expected to study Haider's winning formula and emulate the FPO campaign in coming elections.

Commentators warned that the Haider win is an ominous sign for all of Europe. Israel's Justice Minister Yossi Beilin was quoted as calling FPO's surge, "terrible and frightening" and adding, "the world has not learned from history."

alt.politics.radical-left
Eigen Edelweiss Erst ?

Haiders' hete adem kleurt Europees asielbeleid

Met de verkiezingen zakt de sociaal-democratie - die in 1983 nog bijna 50% van de stemmen haalde - naar 33,4%. De extreem-rechtse FPO van Jorg Haider wordt met 27,2% de tweede grootste partij van het land.

Haider en zijn troepen vierden hun overwinning uitbundig in het Weense bierlokaal Napoleon. Op zulke bierfeesten zijn de gestrekte armen nooit ver weg. Vader Haider was voormalig nazi-jeugdleider in Oberdonau en moeder Haider was Bannmädchenführerin onder het nazisme. Zoon Jorg Haider werd miljonair door de erfenis van het Bärental, een enorm stuk land ter waarde van vijftiend miljoen Belgische frank dat tijdens de oorlog van de Joodse eigenaars werd gestolen. Haider komt snel bij de 'Freiheitliche Partei Osterreichs' (FPO) die in 1956 door de voormalige SS-officieren Anton Reinthaller en Friedrich Peter werd opgericht. Jorg Haider looft de SS als plichtsbewuste mannen en prijst openlijk Hitlers werkgelegenheidsbeleid aan.

Deutschland Uber Allesch?

Jorg Haider heeft zich alvast volop op het kanselierschap voorbereid. In 1997 volgde hij in Harvard cursus aan het 'Institute for International Development' en nam hij deel aan de zomercursus van de elitaire Boston-universiteit 'On Budgeting in the Public Sector'. Net zoals zijn vriend Filip Dewinter is Haider voorstander van het harde, naakte Thatcher-kapitalisme. Hij eist privatiseringen van overheidsdiensten, onderwijs en sociale zekerheid. Hij wil meer flexibiliteit en wil de vakbonden aan banden leggen. En natuurlijk staat hij, zoals het Vlaams Blok, volop achter het Duitse Europa.

Tijdens de 'viering' van vijftig jaar 'Anschluss' noemde hij in navolging van Hitler de Oostenrijkse natie een 'misgeboorte'. De overwinning in Oostenrijk toont in elk geval dat het opkomend fascisme, alsook de teloorgang van de sociaal-democratie, een internationaal fenomeen is. Alle extreem-rechtse krachten hebben zich verenigd rond het nieuwe revanchistische Europa van de Duitse Mark, of de Duitse Euro. Dat relativeert meteen de 'anti-Maastricht'-demagogie en de 'Tirolse' of 'Vlaamse' demagogie van extreem-rechts.

Eigen Edelweiss Eerst ?

Naar de kiezer toe is het vooral met het uitzinnige racisme tegen migranten en vluchtelingen dat Jorg Haider verkiezing na verkiezing wint. Met slogans zoals 'Tirol voor de Tirolers', 'Geen moskee in Salzburg zolang er geen kerk in Mekka staat' drijven de fascistische wedloop op.

En, zoals elders in Europa, volgde de rooms-rode regering in Wenen... Op 1 mei stierf de Nigeriaanse student Marcus Omofumas na politiemishandeling. Op 27 mei arresteerde de politie tijdens 'Operation Spring' - de grootste razzia sinds 1945 - meer dan 100 vreemdelingen. Haiders' succes echoot over heel Europa. De dag na zijn

verkiezingsoverwinning besloten de ministers van justitie van Groot-Brittannië, Frankrijk en Duitsland de repressie tegen de vluchtelingen verder op te drijven. De Duitse minister van justitie Otto Schily sprak in ware Dewinter-retoriek: 'het is genoeg, hele groepen in onze maatschappij hebben te maken met een massale inwijking.' De verzamelde ministers stelden dat de overwinning van de FPO hen 'tot optreden dwingt'. Of hoe Haider's hete adem Europa bruin kleurt'

Israël botst met Wenen over Haider

Oostenrijkse kardinaal deelt Israëlische bezorgdheid

TEL AVIV - Israël heeft gisteren gedreigd de betrekkingen met Oostenrijk te verbreken als Jörg Haider mag deelnemen aan de regering. De Oostenrijkse aartsbisschop Schönborn, op bezoek in Israël, vindt de bezorgdheid over Haider terecht.

Israëls minister van buitenlandse zaken, David Levi, had verleden week al gedreigd met 'heroverwegen van de betrekkingen'. Gisteren verscherpte hij zijn uitspraken na een keiharde confrontatie met zijn Oostenrijkse collega Wolfgang Schüssel. Het gesprek tussen beide heren, in Luxemburg, duurde een kwartier. Schüssel verzocht Levi zijn uitlatingen te matigen, en kreeg duidelijk nul op het rekest. Na het gesprek weigerde Schüssel Haider van regeringsdeelname uit te sluiten: „Een ieder die gekozen is, is een potentiële kandidaat voor onderhandelingen.”

Dit weekeinde had de Oostenrijkse bondskanselier Victor Klima premier Barak van Israël nog telefonisch verzekerd dat hij Haider van regeringsdeelname uitsloot. Maar tegelijkertijd verwierp Klima in een interview met de krant Ha'arets de Israëlische 'inmenging' in de Oostenrijkse aangelegenheden.

De Oostenrijkse aartsbisschop Schönborn toonde gisteren juist alle begrip voor zijn gastheren. De kardinaal zei de Israëlische bezorgdheid te delen over de verkiezingsuitslag in Oostenrijk, waarbij de Vrijheidspartij FPÖ van de de ultrarechtse Jörg Haider meer dan een kwart van de stemmen kreeg. „Velen van mijn landgenoten zijn zich terdege bewust van Oostenrijks problematische verleden en zullen alles in het werk stellen om het niet weer te laten gebeuren", verzekerde hij tijdens een bezoek aan het oorlogsmonument Jad wasjem.

Dat was nog eens andere taal dan de Israëlische tv-kijker de afgelopen dagen te horen kreeg in interviews. Eerst was daar Jörg Haider zelve. Hij vond dat de Israëliërs zich met hun eigen zaken moesten bemoeien. Hij was bereid advies te geven, want Israëls minister van buitenlandse zaken kan nog van hem leren als het gaat om de zorg voor de vrede.

Vervolgens kwam Peter Sichrovsky in beeld, een Oostenrijkse Joodse journalist, die ooit naam maakte met interviews met tweede generatie Oostenrijkse Joden en kinderen van nazi's. Sichrovsky, tegenwoordig FPÖ-lid en in Israël spottend 'hofjood van Haider' genoemd, vindt dat de Israëliërs zijn leider niet voor neo-nazi kunnen uitmaken. Haider groeide op in een nationaal-socialistisch gezin, maar „heeft een ontwikkeling doorgemaakt". De Israëlische interviewers begrepen hem niet, waarop Sichrovsky beloofde de zaak in Israël te komen uitleggen.

Austria

Introduction

[\[Top of Page\]](#)

Background: Once the center of power for the large Austro-Hungarian empire, Austria was reduced to a small republic after its defeat in World War I. After the annexation to Nazi Germany in 1938 and subsequent occupation by the victorious Allied powers, Austria's 1955 State Treaty declared the country "permanently neutral" as a condition of the Soviet military withdrawal. The Soviet collapse relieved the external pressure to remain unaligned, but neutrality had evolved into a part of Austrian cultural identity, which has led to an ongoing public debate over whether Vienna legitimately can remain outside of European security structures. A wealthy country, Austria joined the European Union in 1995 and, like many EU members, is adjusting to the new European currency and struggling with high unemployment.

Geography

[\[Top of Page\]](#)

Location: Central Europe, north of Italy and Slovenia

Geographic coordinates: 47 20 N, 13 20 E

Map references: Europe

Area:

total: 83,858 sq km

land: 82,738 sq km

water: 1,120 sq km

Area-comparative: slightly smaller than Maine

Land boundaries:

total: 2,562 km

border countries: Czech Republic 362 km, Germany 784 km, Hungary 366 km, Italy 430 km, Liechtenstein 35 km, Slovakia 91 km, Slovenia 330 km, Switzerland 164 km

Coastline: 0 km (landlocked)

Maritime claims: none (landlocked)

Climate: temperate; continental, cloudy; cold winters with frequent rain in lowlands and snow in mountains; cool summers with occasional showers

Terrain: in the west and south mostly mountains (Alps); along the eastern and northern margins mostly flat or gently sloping

Elevation extremes:

lowest point: Neusiedler See 115 m

highest point: Grossglockner 3,797 m

Natural resources: iron ore, oil, timber, magnesite, lead, coal, lignite, copper, hydropower

Land use:

arable land: 17%
permanent crops: 1%
permanent pastures: 23%
forests and woodland: 39%
other: 20% (1996 est.)

Irrigated land: 40 sq km (1993 est.)

Natural hazards: NA

Environment-current issues: some forest degradation caused by air and soil pollution; soil pollution results from the use of agricultural chemicals; air pollution results from emissions by coal- and oil-fired power stations and industrial plants and from trucks transiting Austria between northern and southern Europe

Environment-international agreements:

party to: Air Pollution, Air Pollution-Nitrogen Oxides, Air Pollution-Sulphur 85, Air Pollution-Sulphur 94, Air Pollution-Volatile Organic Compounds, Antarctic Treaty, Biodiversity, Climate Change, Desertification, Endangered Species, Environmental Modification, Hazardous Wastes, Law of the Sea, Nuclear Test Ban, Ozone Layer Protection, Ship Pollution, Tropical Timber 83, Tropical Timber 94, Wetlands, Whaling

signed, but not ratified: Air Pollution-Persistent Organic Pollutants, Antarctic-Environmental Protocol, Climate Change-Kyoto Protocol

Geography-note: landlocked; strategic location at the crossroads of central Europe with many easily traversable Alpine passes and valleys; major river is the Danube; population is concentrated on eastern lowlands because of steep slopes, poor soils, and low temperatures elsewhere

People

[\[Top of Page\]](#)

Population: 8,139,299 (July 1999 est.)

Age structure:

0-14 years: 17% (male 702,261; female 666,310)

15-64 years: 68% (male 2,792,484; female 2,713,397)

65 years and over: 15% (male 478,071; female 786,776) (1999 est.)

Population growth rate: 0.09% (1999 est.)

Birth rate: 9.62 births/1,000 population (1999 est.)

Death rate: 10.04 deaths/1,000 population (1999 est.)

Net migration rate: 1.32 migrant(s)/1,000 population (1999 est.)

Sex ratio:

at birth: 1.05 male(s)/female

under 15 years: 1.05 male(s)/female

15-64 years: 1.03 male(s)/female

65 years and over: 0.61 male(s)/female

total population: 0.95 male(s)/female (1999 est.)

Infant mortality rate: 5.1 deaths/1,000 live births (1999 est.)

Life expectancy at birth:

total population: 77.48 years

male: 74.31 years

female: 80.82 years (1999 est.)

Total fertility rate: 1.37 children born/woman (1999 est.)

Nationality:

noun: Austrian(s)

adjective: Austrian

Ethnic groups: German 99.4%, Croatian 0.3%, Slovene 0.2%, other 0.1%

Religions: Roman Catholic 78%, Protestant 5%, other 17%

Languages: German

Literacy:

definition: age 15 and over can read and write

total population: 99% (1974 est.)

male: NA%

female: NA%

Government

[\[Top of Page\]](#)

Country name:

conventional long form: Republic of Austria

conventional short form: Austria

local long form: Republik Oesterreich

local short form: Oesterreich

Data code: AU

Government type: federal republic

Capital: Vienna

Administrative divisions: 9 states (bundeslaender, singular-bundesland); Burgenland, Kaernten, Niederoesterreich, Oberoesterreich, Salzburg, Steiermark, Tirol, Vorarlberg, Wien

Independence: 1156 (from Bavaria)

National holiday: National Day, 26 October (1955)

Constitution: 1920; revised 1929 (reinstated 1 May 1945)

Legal system: civil law system with Roman law origin; judicial review of legislative acts by the Constitutional Court; separate administrative and civil/penal supreme courts; has not accepted compulsory ICJ jurisdiction

Suffrage: 18 years of age; universal; compulsory for presidential elections

Executive branch:

chief of state: President Thomas KLESTIL (since 8 July 1992)

head of government: Chancellor Viktor KLIMA (since 28 January 1997); Vice Chancellor Wolfgang SCHUESSEL (since 22 April 1995)

cabinet: Council of Ministers chosen by the president on the advice of the chancellor

elections: president elected by popular vote for a six-year term; presidential election last held 19 April 1998 (next to be held in the spring of 2004); chancellor chosen by the president from the majority party in the National Council; vice chancellor chosen by the president on the advice of the chancellor

election results: Thomas KLESTIL reelected president; percent of vote-Thomas KLESTIL 63%, Gertraud KNOLL 14%, Heide SCHMIDT 11%, Richard LUGNER 10%, Karl NOWAK 2%

Legislative branch: bicameral Federal Assembly or Bundesversammlung consists of Federal Council or

Bundesrat (64 members; members represent each of the states on the basis of population, but with each state having at least three representatives; members serve a four- or six-year term) and the **National Council or Nationalrat** (183 seats; members elected by direct popular vote to serve four-year terms)
elections: National Council-last held 17 December 1995 (next to be held in the fall of 1999)
election results: National Council-percent of vote by party-SPOe 38.3%, OeVP 28.3%, FPOe 22.1%, LF 5.3%, Greens 4.6%, other 1.4%; seats by party-SPOe 71, OeVP 53, FPOe 40, LF 10, Greens 9

Judicial branch: Supreme Judicial Court or Oberster Gerichtshof; Administrative Court or Verwaltungsgerichtshof; Constitutional Court or Verfassungsgerichtshof

Political parties and leaders: Social Democratic Party of Austria or SPOe [Viktor KLIMA, chairman]; Austrian People's Party or OeVP [Wolfgang SCHUESSEL, chairman]; Freedom Party of Austria or FPOe [Joerg HAIDER, chairman]; Communist Party or KPOe [Walter BEIER, chairman]; The Greens or GA [Madeleine PETROVIC, parliamentary caucus floor leader and Alexander VAN DER BELLEN, party spokesman]; Liberal Forum or LF [Heide SCHMIDT]

Political pressure groups and leaders: Federal Chamber of Trade and Commerce; Austrian Trade Union Federation (primarily Socialist) or OeGB; three composite leagues of the Austrian People's Party or OeVP representing business, labor, and farmers; OeVP-oriented League of Austrian Industrialists or VOeI; Roman Catholic Church, including its chief lay organization, Catholic Action

International organization participation: AfDB, AsDB, Australia Group, BIS, BSEC (observer), CCC, CE, CEI, CERN, EAPC, EBRD, ECE, EIB, EMU, ESA, EU, FAO, G- 9, IADB, IAEA, IBRD, ICAO, ICC, ICFTU, ICRM, IDA, IEA, IFAD, IFC, IFRC, ILO, IMF, IMO, Intelsat, Interpol, IOC, IOM, ISO, ITU, MINURSO, MTCR, NAM (guest), NEA, NSG, OAS (observer), OECD, OPCW, OSCE, PCA, PFP, UN, UNCTAD, UNDOF, UNESCO, UNFICYP, UNHCR, UNIDO, UNIKOM, UNITAR, UNMIBH, UNMOT, UNOMIG, UNTSO, UNU, UPU, WCL, WEU (observer), WFTU, WHO, WIPO, WMO, WToO, WTrO, ZC

Economy

[\[Top of Page\]](#)

Economy-overview: Austria has a well-developed market economy with a high standard of living. As a member of the European Monetary Union (EMU), Austria's economy is closely integrated with other EU member countries, especially with Germany. Austria's membership in the EU has drawn an influx of foreign investors attracted by Austria's access to the single European market. Through privatization efforts, the 1996-98 budget consolidation programs, and austerity measures, Austria brought its total public sector deficit down to 2.5% of GDP in 1997 and public debt-at 66% of GDP in 1997-more or less in line with the 60% of GDP required by the EU's Maastricht criteria. Cuts mainly affect the civil service and Austria's generous social system, the two major causes of the government deficit. To meet increased competition from both EU and Central European countries, Austria will need to emphasize knowledge-based sectors of the economy and deregulate the service sector, particularly telecommunications and energy. The strong GDP growth of 1998 is expected to dwindle back to 2.3% in 1999, and observers caution that this projection may be revised downwards in view of the Asian and Brazilian crises and Germany's lower growth projection.

GDP: purchasing power parity-\$184.5 billion (1998 est.)

GDP-real growth rate: 2.9% (1998 est.)

GDP-per capita: purchasing power parity-\$22,700 (1998 est.)

GDP-composition by sector:

agriculture: 1.4%

industry: 30.8%

services: 67.8% (1997 est.)

Population below poverty line: NA%

Inflation rate (consumer prices): 0.9% (1998)

Labor force: 3.7 million (1998)

Labor force-by occupation: services 67.7%, industry and crafts 29%, agriculture and forestry 0.7% (salaried employees, 1997 est.)

Unemployment rate: 7% (1999 est.)

Budget:

revenues: \$50.4 billion

expenditures: \$55.9 billion, including capital expenditures of \$NA (1998 est.)

Industries: construction, machinery, vehicles and parts, food, chemicals, lumber and wood processing, paper and paperboard, communications equipment, tourism (1997)

Industrial production growth rate: 4% (1998 est.)

Electricity-production: 52.15 billion kWh (1996)

Electricity-production by source:

fossil fuel: 34.4%

hydro: 65.6%

nuclear: 0%

other: 0% (1997)

Electricity-consumption: 56.1 billion kWh (1997)

Electricity-exports: 9.8 billion kWh (1997)

Electricity-imports: 9 billion kWh (1997)

Agriculture-products: grains, potatoes, sugar beets, wine, fruit; dairy products, cattle, pigs, poultry; lumber

Exports: \$62.5 billion (1998)

Exports-commodities: vehicles, machinery and equipment, paper and paperboard, metal goods, iron and steel, telecommunication equipment, textiles, medical and pharmaceutical products (1997)

Exports-partners: EU 62% (Germany 35.1%, Italy 8.3%), Central and Eastern Europe 17.6% (Hungary 4.9%), Japan 1.3%, US 3.7% (1997)

Imports: \$65.8 billion (1998)

Imports-commodities: vehicles, machinery and equipment, apparel, metal goods, oil and oil products, office and data-processing machinery, medical and pharmaceutical products, telecommunication equipment, textiles (1997)

Imports-partners: EU 68.9% (Germany 41.7%, Italy 8%), Central and Eastern Europe 11% (Hungary 3.1%), Asia 7.1% (Japan 2.2%), US 5.4% (1997)

Debt-external: \$24.33 billion (1997)

Economic aid-donor: ODA, \$513 million (1997); of which, bilateral \$298 million, multilateral \$215 million

Currency: 1 Austrian schilling (AS) = 100 groschen

Exchange rates: Austrian schillings (AS) per US\$1-11.86 (January 1999), 12.379 (1998), 12.204 (1997), 10.587 (1996), 10.081 (1995), 11.422 (1994)

note: on 9 January 1999, the European Union introduced a common currency that is now being used by financial institutions in some member countries at the rate of 0.8597 euros per US\$ and a fixed rate of 13.7603 Austrian shillings per euro; the euro will replace the local currency in consenting countries for all transactions in 2002

Fiscal year: calendar year

Communications

[\[Top of Page\]](#)

Telephones: 3.47 million (1986 est.)

Anti-Semitism Worldwide 1997/8

AUSTRIA

*A survey carried out in 1997 revealed that Austria had one of the highest levels of racism in the European Union. The Austrian Freedom Party continued to register electoral successes and its leader, Jörg Haider, declared his intention to run for chancellor in 1999. Only a few violent anti-Semitic incidents were registered. However, it seems that not all anti-Semitic incidents are reported to the authorities or by the press. Many racist and anti-Semitic publications continued to appear regularly. An article in the new weekly *Zur Zeit* revived an old anti-Semitic blood libel.*

JEWISH COMMUNITY

The majority of Austria's 10,000 Jewish citizens live in Vienna. Although only 0.1 percent of Austria's population of 8 million, the Jewish community' has a rich cultural life, which is reflected, *inter alia*, in the many periodicals appearing in Vienna, including *Gemeinde* and *Illustrierte Welt*. The Bundesverband der Israelitischen Kultusgemeinden (Union of Jewish Communities) is the umbrella organization of Austrian Jews.

EXTREMIST MOVEMENTS AND HATE GROUPS

According to Eurostat, the European Office of Statistics, increasing racism and xenophobia in contemporary Europe may partly be attributed to the high rate of unemployment. However this is not true of Austria. The country has the second lowest unemployment rate (after Luxembourg) in the European Union (EU), but racism, xenophobia and anti-Semitism are widespread. In fact, a survey carried out in 1997 by Eurostat and the Gallup Institute revealed that Austria had one of the highest levels of racism in the EU.

Extreme Right-Wing Political Parties

Since becoming party chairman in 1986, Jörg Haider has turned the **Freiheitliche Partei Österreichs** (Austrian Freedom Party -- FPÖ) into the most powerful and successful extreme right-wing party in Western Europe. With 40 deputies in the Austrian parliament and 6 in the European Parliament, the FPÖ continues to register electoral successes. At the end of January 1998, for example, it emerged as the sole winner of the elections in Graz, capturing 16 seats on the district council of Austria's second largest town.

Today, the FPÖ, whose leader is considered by 40 percent of the population to be a neo-fascist and who, according to a decision of Austria's High Court, may be called "the political foster father and ideologist of extreme right-wing terror," represents one-third of the Austrian population. Declaring as his goal in 1999 the chancellery and the establishment of what he calls the Third Republic, Haider introduced several fundamental changes into the FPÖ political program during the party's convention in Linz, on October 30. When, for electoral purposes, he proposed a policy of rapprochement with the church as well as abrogation of pro-German nationalist policies, he was sharply criticized by opponents within the party. The publication of

Haider's book, *Befreite Zukunft, jenseits von links und rechts* (Liberated Future beyond Left and Right) must also be seen as part of his effort to gain national as well as international respectability. Another example of these endeavors is his employment of a token Jew, the controversial Jewish writer Peter Sichrovsky, who organizes Haider's public relations in the US, and represents the FPÖ in the European Parliament.

In an attempt to portray himself as the defender of those concerned about the impact of the euro (the European currency) (on the employment situation and on purchasing power, Haider initiated a petition, between November 24 and December 1, demanding that a referendum be held on the introduction of the euro into Austria. This was in spite of the fact that the government had rejected the idea of holding a referendum, because it had already decided that Austria would become one of the pioneers and supporters of the euro. According to Haider, Austria should consider exchanging the schilling for the euro only after the planned EU currency proved to be stable, as Austria has a strong currency to defend. Only 254,077 people signed the petition, 4.4 percent of those entitled to vote in Austria.

Although Haider tried to mask the links of some party members with neo-Nazi activists, he was not able to prevent them from becoming public knowledge. For example, it was disclosed in early 1997 that FPÖ member Rene Schimanek, brother of the imprisoned neo-Nazi activist Jorg Schimanek, was deeply involved in the paramilitary neo-Nazi organization **Kameradschaft Langenlois**, founded in 1986 by his brother.

Extra-parliamentary Right-Wing Groups

Thousands of skinheads and militant neo-Nazis are active in groups and organizations that are considered dangerous to democracy in Austria (see *ASW 1996/7*). The banned **Volkstreue Ausserparlamentarische Opposition** (Ethnically Loyal Extra-parliamentary Opposition -- VAPO), the umbrella organization for many such groups, is still active underground, although its leaders are imprisoned.

Neo-Nazi support groups, such as **Nationalfreiheitliche Gefangenenhilfe** (National Freedom Aid for Prisoners) and **Forum für ein humanes und demokratisches Strafrecht und zur Erhaltung der Menschenrechte** (Forum for a Human and Democratic Penal Code and for the Defense of Human Rights -- FSM) continued their advisory work for Holocaust deniers and provided a cadre for neo-Nazi activities.

Several Austrian student organizations harbor racist and anti-Semitic sentiments. The **Österreichischer Kameradschaftsbund** (Austrian Comrades League) and **Österreichischer Turnerbund** (Austrian Gymnastics Association -- ÖTB) are the largest extreme right student associations. Anti-Semitic and Holocaust denial propaganda can often be found in *Der Kamerad* (The Comrade), published by the Austrian Comrades League, as well as in *Bundesturnzeitung*, of the Austrian Gymnastics Association. It should be noted that these organizations maintain links with like-minded groups in Germany. The Viennese radical right-wing student fraternity **Olympia**, for example, took over the presidency of the 20,000-member umbrella organization **Deutsche Burschenschaft** (German Student Fraternity -- DB), in 1997.

ANTI-SEMITIC ACTIVITIES

Violence, Vandalism, Threats and Insults

As in previous years only a few violent incidents were reported to the authorities or by the press, and only a few events become public. Nevertheless, three Jewish cemetery desecrations were recorded in 1997: in

Klagenfurth, St. Ruprecht, in March; in Matersburg, in April; and the small Jewish cemetery in Gmunden, in July. In addition, two bomb threats were received in October by Jewish institutions in Vienna. The anti-Semitic experience of a group of Italian Jews visiting Austria in August aroused public opinion. The tourists left their hotel and the country after the innkeeper shouted anti-Semitic insults and physically assaulted two of them.

Propaganda and Holocaust Denial

Racist and anti-Semitic publications such as *AFP-Information*, *Albus* (of the NSDAP section of Austria), *Braunauer Ausblick*, *Der Volkstreue* and *Halt*, continue to be distributed in Austria. The **Deutsch-Österreichisches Institut für Zeitgeschichte** (German-Austrian Institute for Contemporary History -- DÖIZ), headed by Walter Ochensberger, and the publishing house **Volkssturm**, owned by the Viennese FPÖ representative Helmut Kowarik, are the main distributors of Holocaust denial and anti-Semitic works in Austria today.

October 1997 marked the first appearance of the weekly *Zur Zeit*, of former FPÖ ideologue Andreas Mölzer. On December 5, a furor arose after it published an article by Prof. Robert Prantner reviving a ritual murder charge, and, indirectly, Jewish guilt for the death of Jesus. Prantner, a lecturer at the Heiligenkreuz Theological Academy, invoked the two main motifs of Christian anti-Semitism, ritual murder and deicide. The murder charge in question is connected to the Anderl von Rinn cult, which has been maintained in Austria since the 17th century when Jews were accused of the ritual murder of an Austrian boy, Anderl from Rinn. Although the pilgrimage to Anderl's birthplace was officially banned in 1985, and both the bishop of Innsbruck, Rein Stecher, and the Vatican issued a decree declaring that there had never been a ritual murder, the tradition has continued.

An anti-Semitic article, published in July 1997 in the monthly *Wiener*, by Thomas Köpf and editor Wolfgang Höllriegl, was directed against the Jewish community. As a result, *Wiener* was condemned by the Presserat (press association).

A book by Thomas Brezina, author of children's fiction, aroused protests because of its *Stürmer*-like illustrations by Robert Rottensteiner. The illustrations were eventually replaced.

During the month of November 1997, various pamphlets, such as "Huttenbriefe," as well as books with anti-Semitic and anti-democratic content, were distributed in Graz schools by sham organizations such as the **Institut für Geisteswissenschaftliche Didaktik** or **Steirische Kulturinitiative**. The **Presseclub Concordia**, the union of Austrian journalists, announced in its newsletter the release of Ernst Bauer's book, *Das Waldheim Komplott. Eine politische Sittengeschichte*, which depicts the Waldheim affair (see previous reports) as a conspiracy of the World Jewish Congress. The book is published by the **Ibera Verlag** in Vienna.

As in previous years, anti-Semitic propaganda in 1997 was mainly disseminated by the extreme right-wing media and through the Internet. Frank Swoboda and Peter Kurt Weiss continued to be the main operators in this field. The Ministry of Justice has been conducting investigations to decide whether the distribution of anti-Semitic materials through the Internet constituted an infringement of the criminal code. The most virulently anti-Semitic homepage of Austrian neo-Nazis is called **Bürgerschutz** (Citizens' Defense), operated by Weiss and Swoboda.

ATTITUDES TOWARD THE HOLOCAUST AND THE NAZI ERA

The exhibition "War of Extermination -- Crimes of the Wehrmacht 1941-1945" has been touring Austria since 1995. It should be borne in mind that tens of thousands of Austrians served in Hitler's Wehrmacht between 1939 and 1945. Public interest has been overwhelming and the exhibition has stimulated a wide public discourse.

As in Germany, the choice of site for erecting a Holocaust memorial to the 65,000 Austrian Jews murdered by the Nazis continued to be the subject of a public debate. This followed the discovery of remnants of the medieval Jewish community at the Judenplatz in Vienna, originally selected as the site.

RESPONSES TO EXTREMISM AND ANTI-SEMITISM

Although the Austrian authorities as well as concerned citizens invested efforts in the struggle against militant neo-Nazi groups, the establishment's attitude toward the extreme right, especially toward legal groups, appears to be equivocal and right-wing extremism is sometimes quietly accepted. For example, the head of Municipal Office 62, Hans Werner Sokop, responsible for residence permits for foreigners in Vienna, attracted attention because of his racist and anti-Semitic poems as well as his harassment of foreigners. In summer 1997 there were attempts to dismiss Sokop, which failed due to the lack of support from city councilors. Further, FPÖ member Walter Howadt has become the new Austrian ambassador in Pakistan, despite his repeated racist remarks.

Court Cases and Legal Proceedings

The suspected perpetrator of a series of bomb attacks that caused much harm in Austria from 1993 was arrested by chance in October 1997 (see previous reports).

During 1997 several activists of the militant neo-Nazi VAPO were found guilty of plotting to abolish the democratic system and replace it with a Nazi dictatorship, with Austria annexed to a Greater German Reich. They were given suspended sentences ranging from four to eight months. In addition, Herbert Schweiger, former Waffen SS member and publisher of the book *Evolution und Wissen. Neuordnung der Politik.* (Evolution and Knowledge. The New Political Order) was sentenced to 15 months imprisonment for neo-Nazi activities and publications.

A court case that aroused much interest in Austria was the suit filed by the film maker Andreas Gruber, against Helmuth Jossek, an FPÖ district councilor in Wels. Jossek called Gruber a *Volksschädling* (people pest) and *Stadtschädling* (town pest) after the latter described in his film *Hasenjagd* the escape of Soviet war prisoners from the Mauthausen concentration camp in early 1945. Gruber instituted proceedings against Jossek on the grounds that these expressions were part of the terminology of the Nazi regime.

Official and Public Action

Since October 1997 the Interior Ministry has been operating a site on its official Internet home page, where the public can report incidents of *NS-Wiederbetätigung* (revival of Nazism), meaning right-wing extremism, xenophobia and anti-Semitism. This may prove to be an important means to monitor and control hate crimes

in Austria.

The Stiftung Dokumentationsarchiv des Österreichischen Widerstandes, which monitors racist, extreme right and neo-Nazi propaganda on the Internet published in 1997 the book *Das Netz Des Hasses* (The Hate Net).

In summer 1997, the Anti-Defamation League opened a regional office for Middle and Eastern Europe in Vienna.

Heil Haider! The Revitalization of the Austrian Freedom Party since 1986. *Politics and Society in Germany, Austrian and Switzerland*, vol. 4, nr. 3 (Summer, 1992), pp. 18-47.

by

Max Riedlsperger

Introduction On September 22, 1986 the Austrian newsmagazine profil carried a cartoon showing the newly elected chairman of the Austrian Freedom Party (FPÖ), Jörg Haider, in Carinthian folk dress, standing before a painting showing another, brown-shirted Haider wearing a red armband with a partially obscured, but seemingly recognizable black insignia on a circular white field. Brownshirt Haider is shown strangling his liberal predecessor, Norbert Steger, representing at least the cartoonist's interpretation of the significance of Haider's defeat of Steger for the leadership of the party the week before.

Two months later, on November 23, Austrian voters handed both major political parties stunning losses in parliamentary elections and increased the FPÖ's representation in the Nationalrat by half. Since then Chairman Haider has led his party to an unbroken string of victories in every state parliament (Landtag) election and in October of 1990 improved its 1986 parliamentary result by 60 per cent with a 16.6 per cent share of the vote. In June, 1991 Haider, then Governor of Carinthia, again roused charges of pro-Nazi sentiment with a remark widely portrayed as glorifying the Third Reich, yet ten days later his FPÖ again improved its voter share in a state election in Burgenland.

Since its founding in 1956, primarily by repentant former National Socialists, the FPÖ has been largely disdained by the major parties and has been imputed with right-radical, German-nationalist sentiment to such a degree that many observers, both domestic and foreign, can only see the sky-blue of its banner through a fifty-year old brown reform haze. The view cleared somewhat under the party's liberal course from the late 60's until 1986, but settled in again under the influence of Chairman Haider's pandering to German-nationalist sentiment in the debate over bi-lingual education in his adopted state of Carinthia and because of his unabashed reemphasis of the FPÖ programmatic assertion that '. . . by far the overwhelming majority of Austrians belong to the German ethnic and cultural community'. Indeed, an article by Hans-Georg Betz on the German Republikaner in an earlier issue of this journal cited the FPÖ as an example of ". . . a rising tide of right-wing radical parties in Western Europe" and Haider has been widely portrayed as almost a son of Hitler. If the dramatic increase in electoral support for the FPÖ were indeed the result of a resurgence of right-radical German-nationalism then there would be cause for concern.

It is, however, the contention of this paper that the electoral upsurge of the FPÖ has not primarily been the result of a resurrection of neo-nazistic, pan-German sentiment, nor do its voters have much in common with the minimally educated, anti-modernist, anti-western constituency of the Republikaner. To some degree the FPÖ's success is attributable to its exploitation of typical conservative law and order and anti-

foreigner sentiment and its emphasis on traditional moral values and national identity as cited by Betz as characteristic of right-wing radical parties elsewhere. On the other hand, its neo-liberal, anti-statist stance causes the neo-Nazis, with their totalitarian inclinations, to disdain it as "national-liberal." Also, unlike the parties usually cited as part of the right-radical resurgence, neither the FPÖ nor its message is new. It is only eleven years younger than the majority parties it likes to call 'old' and its roots in the revolution of 1848 are even older than those of the Socialist, now Socialdemocratic Party (SPÖ) and the conservative Peoples' Party (ÖVP). Only its emergence as a middle-sized party of political significance is new and the fundamental reason for the breakthrough of the past five years lies not in any shift to the right in the party's ideology, nor in any radicalization of the Austrian electorate. The answer rather, is to be found in the accelerated breakdown of Austria's historic political camps (Lager) and in the new possibilities for an opposition party to capture the newly mobile voters. Disaffection with the established Lager-parties has long been apparent in opinion research, but the trend was manifested in voter behavior only after Haider's election as Chairman of the FPÖ triggered a return, after twenty years, to government by coalition of the two major parties after the parliamentary election of 1986. In a post-modernist environment marked by frustration with and anger against expensive, scandal-ridden big government, the FPÖ became the natural recipient of the votes of an increasingly independent electorate. Haider's image as a German-nationalist has made his party's success appear to be part of a Europe-wide, right-wing resurgence, obscuring the real reason for its new political significance that lies in the shift of Austria from what has been called a 'two-and-a-half' party system to a three- or multiple-party system. This is not to deny the important role Haider has played in making his party the alternative of choice for protest voters. His youthful, athletic good looks and aggressive, one-line attacks on the 'worn-out' politics of the established 'old parties' work well in an age of politics dictated by headlines and sound bytes and appeal to a modern, not historic populist sentiment, with just enough German-national rhetoric to hold the nostalgic vote.

Lager Theory and the Founding of the 'Third Force'

The political Lager, whose disintegration have made the recent emergence of the FPÖ possible, were first conceptualized for the Second Republic in 1954 by historian Adam Wandruszka to explain why Austria, despite the dramatic impact of rapid modernization and retarded social homogenization, remained politically stable. The answer, he postulated, lay in the fact that the heterogeneous elements of a still substantially pre-modern society had, during the last half of the nineteenth century, been assimilated into three 'naturally- or divinely-willed' Lager which were able to provide the unity necessary to a society in the process of rapid change. The military implication of the term Lager was thoroughly appropriate to describe the division and ultimately tri-polarization of the political culture into ideologically rigid, mutually hostile, and by the 1930's, armed camps. At the time of his seminal publication, Wandruszka intended to illustrate a continuity of the parties of the nascent Second Republic with the democracy that had been tenuously established in 1918 and then violently interrupted, first by 'clerical fascism' in 1934 and then by Anschluß to the Third Reich in 1938. The difference after 1945 was that the elites of Catholic-conservative and the Socialist Lager had learned through bitter experience the folly of ideological intransigence and instead founded the Second Republic on the basis of a 'social partnership'. Under the system of Proporz designed to cement this relationship

the Peoples' Party and the Socialist Party divided posts in the government, the bureaucracy and public agencies of the economy between them in proportion to their representation in parliament (Proporz). This provided for a division of power and the capacity for each party to serve in a control capacity on the other. Decisions were made behind the closed doors of the coalitions committees and parliament was a meaningless debating society where votes were predetermined and parties voted as a block. Its critics called the system a Demokatur (a combination of German words for democracy and dictatorship) which was democratic only by virtue of the fact that the proportional representation of the elites running it was determined by election.

Subsequent cross-national studies of comparable political systems have come to place this system in the category of consociational democracies in which elites engage in horizontal political cooperation between the Lager while exploiting class ideological hostilities to rally the party faithful within their respective, vertically integrated pillars of society. In Austria, the lingering memories of the civil war mentality that had destroyed the First Republic forced the Peoples Party and the Socialist Party to cooperate in coalition governments for over twenty years for fear of what single-party rule might bring. Unlike consociational democracies elsewhere in Europe, that fear forced Austria into a bi-polar structure because neither coalition partner could tolerate the emergence of an opposition party that might conceivably coalesce with one against the other. 'For decades', Pelinka explains,

- the Austrian Second Republic possessed no culture of opposition. Parliamentary opposition as an anti-thesis to the system-destroying fundamental conflict between the two ideological-political Lager of the First Republic hardly existed, nor was there any payoff in this system. There was only a bonus for being in the government-- a bonus for the opposition was a strikingly un-Austrian phenomenon.

In this context, an oppositional culture should be understood as the acceptance of oppositional behavior in parliament. The lack of this oppositional culture is expressed in a generally internalized inclination to value political yea-saying more than nay-saying. The long-retarded onset of parliamentarianism in Austria and the consociational democracy installed in 1945 to overcome the trauma of the civil war of 1934 can be posited as the most important factors in explaining this lack of a culture of opposition.

It was precisely this lack of an opposition that, according to Fritzl and Uitz, motivated Wandruszka to devise his concept of the Lager as a means of legitimating the reestablishment of a 'third force' linked by historical continuity to the national-liberal parties of the Monarchy and the First Republic. What Wandruszka saw in government by Proporz after 1945 was not a concerted effort to rebuild the state and the society from the ground up, but rather a selfish struggle to secure sinecures for the party faithful. He hoped that the 'League of Independents' (Verband der Unabhängigen: VdU), founded in 1949, would serve as a 'Third Force' to serve as a 'balance on the political scale' between the Socialist left and the Catholic-conservative right as had the national-liberal parties in the early years of the First

Republic.

Historically, the national-liberal Lager had its origin in the revolution of 1848 when German-Austrian liberals hoped to bring at least the western part of the Empire into a united Großdeutschland. The failure of that revolution, the conservative unification of Germany in 1871, the shock of the Vienna stock market crash of 1873 and the realities of trying to make an economically backward country competitive in the increasingly integrated, capitalistic world market caused them to retreat from a liberalism that was substantially identified with ruthless capitalism, profiteering and disdain for the economic and social needs of the masses. They retained the traditional liberal emphasis on individual achievement, freedom of expression and resistance to the overwhelming role of the Catholic Church and became increasingly strident proponents of Anschluß to Germany leading many into the Nazi movement in the inter-war years. Initially, after the Second World War, the national-liberal Lager appeared politically bankrupt. Economic liberalism seemed anachronistic in the face of the massive need for state involvement in the reconstruction of the country. The decreasingly ideological Socialist Party came to represent social liberalism and the Peoples' Party the interests of property and bourgeois capital. German-nationalism was utterly discredited by its association with Nazism. What the human remnants of the national-liberal Lager most needed was integration into the new democratic society. Had the parties that made up the governing coalition been able to escape the past and trust each other as well make their peace with the former German-Nationals, it is possible that the Lager might never have revived. Indeed, when the third party movement emerged, it grew, not out of a desire to reestablish a Lager party in the classic sense, but rather as a protest against the coalition and its clumsy handling of de-Nazification from marginally incriminated, reenfranchised former Nazis, unincriminated bourgeoisie and farmers, veterans and immigrant ethnic Germans from the east. Public opinion polls by the Austrian Research Institute showing as much as thirty per cent of the electorate uncommitted to either of the Lager-based major parties, led its director, Herbert Kraus, to try and build a centrist, reform party free from the Lager mentality of the past. In 1949, Kraus who was totally free of any ties to the National Socialist regime and Viktor Reimann, who had been a political prisoner of the Third Reich, founded the VdU with the intention of creating a liberal, third-party alternative to the Demokatur of government by Proporz. In the 1949 parliamentary election, it parlayed this dissatisfaction into what was, until the FPÖ success of 1990, the largest voter share for a third party in the history of the Third Republic. Its elected representatives entered parliament hopeful of breaching the Proporz and democratizing the parliament by providing an alternative partner for either of the major parties. Instead, the prospect of a small coalition of the VdU with either of the major parties so terrified the coalition leaders, that their commitment to the antagonistic collaboration of consociational democracy was only strengthened. Austrian political culture was still too fragmented and democracy too alien to permit the kind of openness that shifting coalitions would have brought. The VdU was treated as a Nazi party reincarnate and consigned to the right bank of benches in the parliament and the right wing of the political spectrum in the minds of most Austrians. Robbed of the possibility of realizing its reform program, the VdU lost many of its supporters, who, after all, needed the benefits that only a governing party could give them. After an attempt by the party's right wing to transform it into a German-national party failed, it fused with the movement forming around former National Socialist Agriculture Minister Anton Reinthaller to found the FPÖ in 1956.

Out of the Ghetto of the German-national Lager

In contrast to the VdU, the FPÖ was, at the time of its founding, little more than a vehicle for ex-Nazis to reintegrate themselves into Austrian politics and revive the old German-national Lager. Reinthaller, however, died less than two years after its founding and under the unlikely leadership of his successor, former Waffen-SS officer Friedrich Peter, the FPÖ began its evolution towards becoming a party of the present, not the past. As it turned out, Peter was the ideal choice for Chairman. As a former soldier for the German, albeit National Socialist nation he held the respect of the German-Nationals and the war veterans. As a pragmatist, however, he soon recognized that German-nationalism had been invalidated through its association with Nazism and committed himself ' . . . to again pick up the thread of that which in Austria was broken at the end of the last century-- namely the further development of liberalism'. Although retaining the identification of Austria as a member of the German ethnic and cultural community as a link with its Lager past, the party set about establishing a new profile. Barred from significance in the parliament by the consociational tactics of the coalition, the FPÖ sought to establish itself in the public mind as the watchdog of the people against the machinations of the coalition. Its style was loudly oppositional as was evidenced in its early support for European unity and its criticism of the coalition's decision to join EFTA rather than the Common Market. Additionally, it attempted to awaken populist protest with a running commentary on corruption and scandal in government, demands for privatization of the bloated socialized sector of the economy and advocacy of increased freedom for private initiative. It mounted campaigns for the implementation of an official, secret ballot, proportionally representative electoral districts, depoliticization of the electronic media and the adoption of the ombudsman system to name a few. Although the ultimate realization of many of these demands may vindicate the party in retrospect, at the time, the exclusionary politics of the Proporz prevented the FPÖ from becoming anything more than the fraction in the 'two-and-a-half-party system.'

By the 1960's however, the coalition began to show the strains of the constant compromise necessary to hold it together. Both major parties secretly courted the FPÖ in case a small coalition should become necessary. In 1963, the end of consociational politics was presaged when the SPÖ, for the first time, broke with the practice under which the members of parliament of the coalition parties voted as a block and joined the FPÖ in opposing an ÖVP proposal to permit the return of Otto von Habsburg to Austria. The FPÖ naturally hoped that this would lead to a small coalition government with the SPÖ that would end its years in isolation, but a lack of faith in the stability of democracy and the the continued antipathy of many in both parties for the putatively right-extremist FPÖ combined to force them back together again.

If the elites of both coalition parties were still wary of a situation that might place the one of them in opposition and continued to rely on Lager-style electioneering to recruit the party faithful, twenty years of political stability and rising prosperity had erased the fears of the voters. In 1966 they voted a majority to the Peoples' Party making possible the first single-party government in the history of the Second Republic. Polls, testing voter consistency in the seven year period immediately thereafter, permit the conclusion that the decisive source of votes upon which that

victory was built was not the 26 per cent of the electorate that still identified with the Lager then represented by the ÖVP, but rather the reservoir of voters uncommitted to either Lager that VdU-founder Herbert Kraus had indentified two decades before. By 1970, the identification of single-party rule with civil war had faded and both Catholicism and Marxism had sufficiently declined so as to make it possible for Bruno Kreisky tap this same reservoir of uncommitted voters and permit his SPÖ to govern alone for the next thirteen years. Building on the 33 per cent of the electorate the Socialist Lager still commanded, Kreisky refashioned the SPÖ as a majority, 'catch-all' party and in the process put Austria on the road from a consociational to a centripetal democracy. Similarly, in the mid-1960's the ÖVP moved to deemphasize its confessional origins, portraying itself as the party of 'technocratic conservatism' and after 1972 as a party of '"progressive" Catholicism with open borders to other humanistic positions' in order to court the decreasingly ideological, post-industrial middle-classes. By the mid-1980's, shifting party loyalties and latent alienation had become the dominant factors in electoral behavior.

This deconcentration of the Lager-based party system became apparent however, only in the parliamentary election of 1986 and its aftermath. Even six months before, an IFES poll found no reason to indicate that what had been thought to be a trend towards a two-party system would not continue. Indeed 73 per cent of Socialists and 75 per cent of Catholic-conservatives polled identified themselves with the Lager of their parents, while only 33 per cent of those raised in German-nationalist homes indicated a preference for the FPÖ. This caused political scientist Anton Pelinka to conclude that, '. . . this Lager is hardly still in the position to reproduce itself. The German-national Lager is coming to such a point where it is hardly sufficient to insure a stable foundation for even a small party for the long run'.

The 1986 FPÖ upsurge thus caught everyone by surprise. An analysis of this election is not within the scope of this paper, however a few facts should illustrate its significance as the effective end of Lager voting. First of all, Traar and Birk found that the decision whether to vote for the SPÖ or the ÖVP was primarily determined by materialistic concerns; of only secondary importance were social factors and ideological factors were insignificant. For FPÖ voters, personalities were the decisive factor, with the drop to 1 per cent in sympathy polls in the summer before the election tied directly to the decline in the popularity of Federal Chairman, Dr. Steger and the rise to almost 10 per cent by election day to '. . . hopes for a new, more successful course' under the new Chairman Haider. Plasser, Ulram and Grausgruber found 'negative voting' and the candidates, above all the personality of Haider, to have been the overwhelming determinants in the choice of voters for the FPÖ in the 1986 election. Ties to or identification with the party were of no significance and issues even had a negative correlation. The total absence of German-nationalist tones from the FPÖ campaign, the high degree of voter mobility, the relative youth of FPÖ voters and the fact that 27 per cent of the FPÖ voters had switched over from the ÖVP and 23 per cent from SPÖ repudiate assumptions that FPÖ victory was part of a general, western European rise in extreme right-wing nationalism. In response to belabored efforts, primarily by the SPÖ, to tar the Haider-led FPÖ as a neo-Nazi party, Die Presse caustically observed that these results '. . . may even force the foreign media to think again. No rational person could believe that disciplined comrades had become unreconcilable Nazis overnight.'

The 1986 election was not politically realigning in the sense that the relative order of the parties according to size was affected. The changes within the FPÖ and its increased strength in parliament did, however, cause a restructuring of the government. The SPÖ retained its plurality, but chose to coalesce with the ÖVP rather than continue governing with the, now, Haider-led FPÖ. Haider defiantly took the FPÖ into opposition and, in a political culture decidedly different from that at the time of its founding, led it to a string of election victories that has, at least for the moment, made it an alternative for many to the historic major parties. This electoral upsurge has been closely identified with the person of Haider since it is totally congruent with his leadership of the party. Critics are almost obsessed with Haider and seek evidence in his speeches and writings of racism, anti-semitism, pro-Nazi nostalgia and fascistic sentiments and see dark significance in the steadily rising FPÖ public popularity. Likewise, FPÖ publicity excessively personalizes its recent political good fortune, portraying Haider as almost a political Siegfried, single-handedly slaying corrupt, old dragons labeled ÖVP and SPÖ.

What these excessively personalized perceptions of the recent FPÖ successes ignore is the deconcentration of the party system that made them possible. For years, the dominance of Chancellor Kreisky and the lack of an attractive alternative masked the decline of the Lager. Since 1983 however, the unpopularity of the coalition of Kreisky's successor, the scandal-plagued Fred Sinowatz, with the FPÖ led by neo-liberal Norbert Steger, whom the opinion-making Viennese newsmagazine profil liked to call 'the stumbler', and the reconsolidation of the SPÖ-ÖVP coalition in 1987 have combined to make voters susceptible to the neo-populist politics of protest. According Plasser and Ulram,

- In order for the latent mode of protest to be translated into active protest voting and for citizens annoyed with the parties to be turned into 'anti-party' and 'send-them-a-message' voters, a crystallization point was necessary, a political actor, such as when Jörg Haider and the FPÖ that he put on a neo-populist course stepped on the stage. What is characteristic (and also productive) in this has been less the German-national elements and . . . those associated with right-radical movements. [More important has been] . . . the capacity to encompass the broadly-based anger of the voters and to concentrate their protest stance as a possible alternative in the person of an accountable, charismatic leader.

While the Greens have also emerged in the past five years as a protest party of some significance, it has been the FPÖ that has been the principal beneficiary of these phenomena.

the 1990 parliamentary election will illustrate the decline of the Lager and the emergence of a new political culture that now gives a 'bonus' to the opposition rather than to the traditionally governing major parties. To counter this trend, the major parties have sought to take advantage of the high name-recognition of their state and federal government leaders and market them as personalities in campaigns that have little to do with issues and virtually nothing to do with the ideologies that A survey of these state elections and a brief analysis of shaped the Lager from which they

originally emerged.

While the political system had been experiencing a quiet deconcentration for some time, it was the return in 1987 to government by major party coalition that gave the FPÖ behind the pugnacious leadership of Jörg Haider, the 'opposition bonus' that has permitted it to emerge as a middle-sized party.

Another factor that can only be mentioned here, but which is of enormous significance in the emergence of the FPÖ as a viable choice for middle-class voters, is the parallel decline of the ÖVP, due in part to its structural obsolescence in a post-industrial society, its obstinate support of the presidential candidacy and presidency of Kurt Waldheim and its own inability to find a personality with a strong enough image to lead the party in competition with the attractive Socialist Chancellor, Franz Vranitzky and the FPÖ media-star, Jörg Haider. It remains to be seen whether its new Chairman, Eduard Busek, the third since the reestablishment of the ÖVP coalition with the SPÖ in 1987, can reverse what appears to be a dissolution into its increasingly incompatible component parts.

1986-1990: The Transition into a Mittelpartei? The first of the state elections that has revealed the deconcentration of the political system came in eastern Austria not quite a year after the revitalization of the FPÖ in the 1986. In Burgenland, where the SPÖ had governed alone since 1945, the FPÖ had averaged a bare 3.08 per cent of the vote since its founding and stood before the question whether it 'could manage a return to the Landtag' after a decade of being unrepresented. The major campaign tactic was a two-pronged assault on the entrenched SPÖ's federal and state policies. In this traditionally agricultural hinterland between Vienna and the Hungarian border the potential for a large protest vote was significant. The year before, farmers had mounted a tractor blockade in Vienna to demonstrate against the federal agricultural policy of the Socialists. In its election campaign, the FPÖ the appealed for farmers to demonstrate their dissatisfaction with the SPÖ, but also to vote against the ÖVP for its failure to implement the reforms it had promised in the parliamentary campaign the year before. Unemployment, which lay 3.5 per cent above the national average, was also an issue and was attributed primarily to the failure of the SPÖ governor to promote construction, while at the same time doubling the number of bureaucratic jobs given to party favorites. On the eve of the election, the FPÖ's general attack on SPÖ corruption at all levels was given local substance when Governor Kery was charged by the Accounting Office with using his influence to obtain state-subsidized, low cost mortgages for Viennese friends to build vacation homes in Burgenland. Following the party's long-standing opposition to nationalized industry, the Burgenland FPÖ found what post-election analysis showed to be a telling issue in demanding privatization of state's energy monopoly (BEWAG), which, it charged, was not only inefficient, but also spent tax-payers' money in contributions to the major political parties. When the results came in, the FPÖ had not only achieved its goal of returning to the state parliament, but won three seats in the process with a total vote of 7.32 per cent. The SPÖ lost 5.9 per cent from its 1982 majority, the ÖVP a modest 1.5 per cent and the FPÖ increased by 4.5 per cent. Polls conducted before the election as well as exit polls and cross-sectional analysis of electoral districts according to the relative strength of the parties in previous recent elections revealed that, while there were regional differences, when seen in the aggregate, the FPÖ win was fashioned by a voter shift of

1.9 per cent from the SPÖ and 1.1 from the ÖVP. Additionally, 2.1 per cent of former SPÖ voters switched to the ÖVP and .6 per cent to the Greens, while 2.5 per cent of former ÖVP voters switched to the SPÖ and .4 to the Greens. (See above, Table II.) Dissatisfaction with politics, with Governor Kery and the SPÖ in general and with the excessive influence of political patronage in the state economy were decisive factors in the SPÖ defeat and the FPÖ victory. As in the federal parliament election the previous year, the number of late-, switch-, and protest-voters climbed significantly, primarily to the benefit of the FPÖ. Because of Haider's vigorous campaigning and the trend towards the personalization of politics, the results, when seen in combination with the dramatic impact the FPÖ Chairman had had on the party's fortunes in the parliamentary election the previous year, contributed to what was becoming known as the 'Haider-Effekt'.

In Viennese city and state elections five weeks later, the FPÖ proclaimed a 'sensational' further step in the 'victory march of the Haider-FPÖ', however, the low voter turnout was at least significant in revealing the inability of the Lager to mobilize their electorates. Here, in the citadel of Austrian socialism, the SPÖ, although gaining an absolute majority of 54.9 per cent of the votes cast, received the support of only 33.4 per cent of voters eligible. The ÖVP declined 6.4 per cent to 28.4 per cent, a scant 17.3 per cent of those eligible. Both parties making up the federal coalition governing the country from the neo-classical parliament building downtown on the Ringstraße lost massive numbers of votes compared with 1983, while the FPÖ increased its total number of votes by over 15,000, raising its voter share from 5.4 to 9.7 per cent. (See Table I.) Even when taken together, the major parties which represent the remnants of Austria's traditional political Lager had managed to win the support of only 50.75 per cent of Vienna's eligible voters. Analysis of exit poll data by the Fessel Institut showed 63.7 per cent of the FPÖ vote to have come from the two major parties, 23.8 per cent from the SPÖ and 39.87 from the ÖVP. Among FPÖ voters, 26 per cent stated protest as the reason for their choice along with another 7 per cent who chose one of two specific FPÖ criticisms of the policies of the coalition parties as their motive. Another 21 per cent simply cited Haider, himself strongly associated with populist protest. Although this was simultaneously a city and state election, in the federal capital of Vienna the dividing line between local and federal politics is murky, which the FPÖ was able to use to its advantage. The public mood regarding politics in general was negative and the SPÖ, which had won a majority in every city election since 1945 save one and had named the federal chancellor for the past seventeen years, was bound to lose votes. The FPÖ had focused its negative campaign on the Socialists, accusing them of mismanaging city government for decades and of breaking their promises of 1983 and continuing revelations of party favoritism, inefficiency and corruption in VOEST, the giant socialized industrial concern, implied the guilt of Vienna's SPÖ by association. To attract the votes of the growing middle-class sector of the electorate, the FPÖ criticized the ÖVP as the handmaiden of the Socialists and portrayed itself as the underdog, because of an electoral law that required it to win two-and-a-half times as many votes to elect a representative as the major parties. Its positive program proposed 'a new way' to a healthier, more secure, efficient and planned Vienna. While exit polls give substance to the personalization of politics that is illustrated by the preoccupation of both the party and the media with the 'Haider-Effekt', what deeper analysis of this election reveals is the importance of protest in the results, whether in increases for the FPÖ and the other smaller parties or in the enormous victory for 'none of the above'.

The next test for the Haider 'election locomotive' came a year later in Lower Austria. As in Burgenland, the FPÖ had no real party organization and since its founding had never won more than 3.2 per cent of the vote in a state election, with a catastrophic 1.7 per cent in 1983, the first year of its small coalition with the Socialists at the federal level. In contrast to Burgenland and Vienna, the ruling party in Lower Austria since the founding of the Second Republic was the ÖVP and unlike Burgenland, the question was not whether the FPÖ 'could manage a return to the Landtag', but whether it could win its first seats ever. Coming eighteen months after the formation of the SPÖ-ÖVP federal government, this election in the country's most populous state was a critical test of the popularity of the coalition. Coalition with the SPÖ had not been helpful to ÖVP across the country. Polls concluded just two weeks before the election showed the ÖVP six index points behind the SPÖ. Its Chairman and Vice Chancellor, Alois Mock, led his party by a scant .14 at +1.11 on a scale from -5 to +5, while Chancellor Vranitzky led his SPÖ by 1.36 at +2.92. This poll showing Chairman Haider at -.38 ahead of his party at -.71 would not seem to square with recent election results, but may be seen as evidence that the FPÖ's successes were not primarily due to Haider's popularity, but rather to his ability to attract the support of voters expressing their hostility to the politics of coalition. Another poll completed at the same time showed the hard cores of the SPÖ and ÖVP having dropped to 19.4 and 14.3 respectively and the potential protest vote as high as 50 per cent. The election also became a test of 'Haider-Effekt', when not quite two months before, Haider was widely reviled in the press for putatively Nazistic, right-wing extremist thinking in response to his comment that 'the Austrian nation was an ideological miscarriage, because membership in an ethnic group is one thing and in a state quite another'.

Again, the FPÖ campaign relied on dissatisfaction with politics at the federal level railing against the 'Red-Black Unity Party' in Vienna, a tactic that acquired local significance when the state chairmen of those same coalition parties both agreed to reject the FPÖ as a possible coalition partner. Led by the moderate, widely respected former businessman and short-time Defense Minister Helmut Krünes, the FPÖ appealed to farmers, charging the ÖVP's Farmers League had sold them out to the Socialists on price supports as the cost of coalition. It also tapped resentment against Vienna by demanding more local control for states and towns as a means of achieving savings and reducing taxes and criticized the ÖVP's resistance to measures to protect against ecological damage. Although he shared the spotlight of publicity with Krünes, Haider gave his usual energetic support to the state party, speaking in over 150 separate communities. Ten days before the election, a poll predicting a turn-out of only 70 per cent sent the ÖVP into a panic, fearing that this would insure FPÖ representation in the state parliament and endanger its, hitherto permanent, majority.

Although voter participation declined only 3.3 per cent to 80.6, the ÖVP's fears were nonetheless realized. The FPÖ polled a healthy 9.4 per cent. The ÖVP lost 6.9 per cent of its 1983 voter share, falling to 47.6 per cent, but due to a favorable apportionment law still won a majority of 29 seats against 22 for the SPÖ and 5 for the FPÖ. The FPÖ also won the right to send one representative in the upper house of the federal parliament costing the ÖVP its absolute majority there.

Despite Haider's 'miscarriage' remark, only a rudimentary party organization and

Krünes' exclusion from the television debate of ticket leaders, the FPÖ was the only party, despite the decline in voter participation, to increase its total number of votes. The press that had roasted him so thoroughly only weeks before, again attributed the FPÖ victory to the 'Haider-Effekt' implicitly raising the question whether it represented a dangerous rising of right-wing radicalism. The more sophisticated analyses, however, continued to point to the importance of the protest vote which not only was becoming more pronounced, but also was now denied to the ÖVP as the price of ending its seventeen year status as an opposition party at the federal level. Cross-sectional analysis of the results by electoral district along socio-economic lines show that the ÖVP lost between 6 and 8 per cent of its voter share in the predominantly rural communities that had been its traditional source of strength, while among the better educated and in communities with high percentages of civil servants and people employed in service industries, the losses ranged to ten per cent and more. The SPÖ also lost voters, also with the sizes of the losses increasing proportionally with the numbers of civil servants and service industry employees, but with a lower range of percentage losses than the ÖVP. In summary, the trends of Burgenland and Vienna were continued in Lower Austria with the media attention to Haider still obscuring the structural reasons for the results. (See above, Tables I and II and Fig. 1.)

The putative breakthrough of the FPÖ to become a 'Mittelpartei' came five months later, on March 12, 1989. This was the date for the regularly scheduled election in Salzburg, but became 'Super Sunday' when SPÖ and ÖVP strategists in Carinthia and Tyrol decided to move the elections of their own state governments forward to that day as well thinking to derail the Haider 'election locomotive' by keeping him busy at home. Their plan backfired however, because it gave the FPÖ the opportunity to turn the three campaigns into a 'referendum on the coalition in Vienna'. Thus in Tyrol the historically dominant ÖVP was put on the defensive for its unpopular federal coalition with the Socialists and in Salzburg, the 'bonus' that the popular ÖVP incumbent Governor Haslauer should have enjoyed against his only minimally known FPÖ competitors for the middle class vote was substantially diluted. This strategy also played well in Carinthia, where FPÖ-Chairman Haider had been conducting guerrilla war on Vienna for years. Where issues were discussed at all, matters of regional concern, but subject to federal legislation dominated. In Tyrol and to some degree in Salzburg the FPÖ stressed its support for entry into the EC, but warned the government about the need to control transit traffic through Austria and enact strict pollution controls on commercial vehicles. In all three states, but particularly in Carinthia, the personality of Haider and his populist attacks on behalf of the 'little man' against the comfortable cooperation of the corrupt 'old parties' and demands for political renewal dominated the campaign. An electoral program derived from populist themes enunciated since 1986 at the federal level demanded the elimination of party privilege in the awarding of state contracts or appointments to public office, privatization of the state banking and insurance enterprises and more frugality in government.

The SPÖ, optimistic at being able to trade on the popularity of Chancellor Vranitzky and rebound from its second worst showing in history in Tyrol and its absolute nadir in Salzburg in 1984, was badly damaged at the outset of the campaign by the revelation of tax evasion by its ticket leader and party secretary in Salzburg, the forced resignations of Federal Interior Minister Blecha and Parliament President Gratz in response to allegations of corruption in the investigation of the sabotage sinking of the highly insured freighter Lucona and the leak of information from the Ministry of

Justice that it had sufficient evidence to undertake legal proceedings against ex-Chancellor Fred Sinowatz for having lied under oath. In retaliation, the SPÖ insisted on an inquiry into the behavior of the ÖVP-inclined Bundesländer insurance group, which revealed that an official of the firm had intervened with the Ministry of Justice in 1983 to have a telling document regarding the Lucona scandal suppressed. This bickering between the federal coalition parties could only redound to the benefit of the opposition parties and even revelations of the underreporting of income by FPÖ-General Secretary Heide Schmidt, Chairman Haider and many in his state party and the admission by Haider before a parliamentary investigation commission that he had had a secret meeting with the main Lucona scandal suspect appear to have had little impact on the protest vote.

The trend against the major parties that had been gathering strength since 1986 worked in all three elections to make the FPÖ the party of choice among the protest voters and the only winner. (See Tables I, II and III.) The ÖVP lost its thin majority in Salzburg and suffered a catastrophic loss of votes and its historic majority in Tyrol. The SPÖ's percentage losses were less drastic, but in both Salzburg and Tyrol new all-time lows were reached while in Carinthia its loss of the absolute majority created a opportunity for the FPÖ, now the second-largest party, to use the downgraded ÖVP as 'the balance on the political scale' to forge a nonsocialist coalition with Haider as Governor.

In Salzburg, while dramatic relative to its disastrous 1984 results, the FPÖ victory may be seen more as restoring the party to its traditional strength than as a breakthrough. Cross-sectional analysis by electoral district shows a return of FPÖ strength in the prosperous and dynamic capital city and its suburbs as well as in outlying communities with high concentrations of public employees or strong tourist industries. More than a quarter of all 1984 voters either switched parties or abstained which worked particularly to the benefit of the FPÖ. Its traditional strength among the best educated voters improved only slightly, but a significant breakthrough was made among skilled workers and employees in service industries.

In Tyrol, unlike Salzburg where the Governor Haslauer's popularity undoubtedly mitigated the general decline of the ÖVP and limited the FPÖ's inroads into its electorate, the 15.91 per cent loss relative to 1984 was massive. Cross-sectional analysis shows a close correlation between ÖVP losses and FPÖ gains across the board, with the greatest percentages of shifts in urban industrial communities, in the capital city of Innsbruck and in rural, working class communities.

In Carinthia, personalities played an overwhelming role in the outcome. The SPÖ had to campaign for the first time in over a decade without its popular Governor Leopold Wagner who had had to withdraw because of injuries incurred in an assassination attempt. His successor, although widely recognized as coolly competent, lacked the personal appeal to collect on the incumbent's 'bonus'. On the other hand, FPÖ Chairman Haider, in his adopted home state, enjoyed somewhat of a 'bonus' of his own for having resurrected the cause of German-speaking children forced into bi-lingual elementary school classes and for his popular attacks on the 'Reds' and 'Blacks' in the Viennese intellectual and political establishments. As in Tyrol, cross-sectional analysis shows a strong correlation between ÖVP losses and FPÖ gains, with a particularly impressive

15.8 increase in the capital city of Klagenfurt and nearly as impressive showings in other urban-industrial, urban service-oriented and rural service-oriented communities.

The last state election in interval between federal elections came seven months later in Vorarlberg on October 8, 1989. The FPÖ had always been strong in the 'Ländle', Austria's western-most state, but in 1984 had lost votes and its place as the third largest party to the 'Alternatives-United Green' list at a time when it was unsuccessfully struggling to achieve its program in its coalition with the Socialists in the federal government. In 1989 however, with the momentum of six successive state election victories and Haider's naming as Governor of Carinthia behind it and the Greens in disarray, the party's mood was optimistic. The ÖVP made preservation of its absolute majority the focus of the campaign and its popular Governor used the threat of resignation in order to win his incumbent's 'bonus'. Unlike the campaigns earlier in the year, the FPÖ focus in Vorarlberg was on local issues, including support for a number of environmental protection proposals and above all on breaking the ÖVP majority. With a percentage increase of 5.62 per cent of the total vote and a doubling of its representation in the state parliament, the FPÖ claimed a 'continuation of its victory march', with Haider as the 'father of the success'. Exit polls showed the FPÖ winning 2.3 per cent of the 1984 ÖVP vote while losing only .4 per cent -- 1.2 per cent from the SPÖ with no corresponding loss, .6 per cent from the Greens with a .3 per cent loss and a 1.6 gain of new voters and former abstainers, with only a .4 per cent loss. Subsequent cross-sectional analysis shows parallels with the sources of FPÖ victories in other state elections, but indicates that in Vorarlberg the FPÖ gains were not only to be seen as due primarily to ÖVP losses. (See Table IV)

Despite these gains, the FPÖ did not achieve its goal of overturning the ÖVP majority, but at 16.12 per cent and only 5 points and two seats below the SPÖ, the FPÖ had arrived at the point where it could hope to challenge the SPÖ for second place as it had already successfully done in Carinthia.

Space does not permit here a detailed analysis of the 1990 parliamentary election, but the results summarized below will illustrate the confirmation of the trends in the state elections discussed above. Defying the Austrian and Europe-wide trend against traditional major parties the SPÖ escaped with a loss of only .34 per cent for a total voter share of 42.79 per cent. This feat was achieved by hiding the scandals and other problems of twenty years of entrenched rule behind the telegenic face of Chancellor Franz Vranitzky. An ingenious write-in campaign that implied that one could simply vote for the Chancellor and not his party succeeded in snaring a full 40 per cent of the votes posted to the SPÖ and was given credit in post election analysis for having stopped what might otherwise have been a substantial voter defection. The ÖVP had no such media star to arrest its collapse and the trend against it that had become apparent in the state elections since 1986 was confirmed with a catastrophic loss of 9.23 percent for a total voter share of 32.06 per cent, its worst in history. The FPÖ claimed 16.64 per cent of the vote for its best result and therewith the status of a 'Mittelpartei'. Its campaign was a continuation of the themes of the past four years and featured attacks on the coalition parties for their complicity in scandals, criticism of promises not fulfilled, demands for tax reform, more individual freedom, less bureaucracy, environmental protection, privatization and a freer marketplace. The only issue which could possibly lend credibility to charges that the FPÖ was appealing

to the radical right was Haider's challenge to Austria's thirty-five year tradition of neutrality. The choice of Munich on the day of the ratification of the treaty for German reunification for his declaration that neutrality was a 'home-made stumbling block' in the way of EC admission seemed almost designed to court nostalgic, German-national sentiment. Certainly this is the way it was seen by his political opponents back in Austria who accused him of appealing to old and neo-Nazis and with 'propagating Anschluß sentiment'. As a campaign issue however, neutrality was seen as important by only 9 per cent of undecided, primarily middle-class voters and if Haider had deliberately planned his comment as an campaign ploy, it backfired, causing 14 per cent of those interested in the matter to to decide for the ÖVP. Personalities dominated the campaign and in this sense the FPÖ benefited from the attractive youthfulness of its ticket leaders, parliamentary fraction chairman Norbert Gugerbauer, General Secretary Heide Schmidt and of course sportclothes-model handsome Jörg Haider.

In 1990 however, more important even than personalities was the public's receptivity for the FPÖ's brand of anti-government populism resulting from dissatisfaction with the coalition's responses to new problems posed by the eastern European revolutions of the previous year. Refugees were coming into the country at a rate above that that had swelled requests for asylum in 1989 to 21,882. In April, the Socialist Minister of Interior had already reported that the 2.4 per cent increase in the crime rate in 1988 had been due to the increased immigration from eastern Europe. The 5 per cent further increase for 1989 and the acceleration that in 1990 ultimately pushed crime up 8 per cent incensed Austrians and brought applause for the FPÖ's charges that the SPÖ-led Ministry of Interior was soft on crime and that the ÖVP-led Foreign Ministry was too lax on the refugee problem. Seizing on this burning issue, the FPÖ grudgingly supported the right of asylum for the politically, religiously and racially persecuted, but stated that Austria, for social, cultural and ethnic reasons must not become a refugee camp for all of Europe. Governor Haider then rejected a SPÖ plan agreed to by the governors of the other eight states to disburse 18,000 refugees, temporarily quartered in eastern Austria, proportionally among all the states and the FPÖ campaign exploited the fears of the 'alien flood', demanding 'no importation of crime, immigration only in cases of need on the labor market and where adequate housing exists, introduction of seasonal status for foreign labor'. Although leftist critics saw this as more evidence of the FPÖ's right-ward tilt, the new, global wave of immigration had made such appeals part of the political mainstream in most of the prosperous countries of Western Europe in 1990. In Austria, such concerns were most evident in the erstwhile socialist citadel of Vienna where the new immigrants were the most numerous. There, the local party's exhortation, 'Vienna must not become Chicago', played not very subtly on the anxieties of voters who voted FPÖ in particularly large numbers where the eastern European invasion was the most apparent. In 5 out of 23 clearly working-class precincts, the FPÖ passed the ÖVP to become the second largest party. Here, in contrast to most areas of Austria, the 1990 electoral upsurge appears to have been a consequence of the particularly pointed local FPÖ exploitation of the crime issue in combination with the high incidence of foreigners in the city. Elsewhere, the percentage increases were quite in keeping with the trend in the state parliament elections since 1986. (See Figure 1 above and Table V below.) The political alienation and dissatisfaction with the SPÖ-ÖVP coalition that the FPÖ had successfully exploited in its state election campaigns had again brought it victory. In 1990, 16.2 per cent of the total FPÖ electorate switched over from the SPÖ and 27.6 per cent from the disintegrating ÖVP. In contrast, 1.9 per cent of former FPÖ voters were convinced by the SPÖ write-in campaign

for 'Kaiser Franz', while a miniscule .2 per cent switched to the ÖVP.

The FPÖ did best among the young who were less likely to be influenced by Lager considerations, winning 19 per cent of all first-time voters and 18 per cent of those under thirty years of age. Some reflection of the FPÖ's appeal to latent German-nationalism may be found in its 19 per cent support among voters over 70 in sharp contrast to the below-average 13 per cent of the generation that came of political age during the early years of the Second Republic. The remaining age cohorts between 30 and 60 supported the FPÖ at a 15 per cent rate. By occupation, skilled workers, with one in four voting for the FPÖ, were the largest group of supporters, followed by the traditional back-bone of the national-liberal Lager, self-employed professionals, at 21 per cent. Even among civil servants for whom party affiliation could be important in appointment and promotion, the FPÖ increased its voter share from 8 to 14 per cent. Cross-sectional analysis by community according to economic profile and past preference showed increases in a range from 5.1 to 6.2 per cent across the board except in megalopolitan areas where the increase was 9.2 per cent. In the results of a poll probing the motives of FPÖ voters (see Table VI below), only motives 3 and 6 do not in some way indicate dissatisfaction with the major parties or the policies of the coalition.

Populist protest is the dominant factor here and only in the responses to motives 2 and 4 can even remote right-radical sentiment be inferred. Clearly, in the past four years the FPÖ had defined itself as the party of protest, which is further demonstrated by the fact that a full 76 per cent of its voters had decided before the final two weeks in contrast to the 51 per cent of late deciders in 1986. In 1990, the FPÖ was, without question, the beneficiary of the structural changes that had loosened traditional party ties and made it an acceptable alternative to the parties that made up the governing coalition. All this was, however, obscured by the overwhelming personalization of the campaign to which the FPÖ contributed with its decision to pit Haider against the SPÖ's write-in campaign for Vranitzky despite his absence from the head of the FPÖ ticket. Thus, when the FPÖ again increased its voter share, the victory was attributed to a continuation of the 'Haider-Effekt'. Grounds to challenge this facile explanation of yet the latest victory of the FPÖ arose in 1991 out of an unexpected series of events and an unscheduled state election that permit the electoral success of the party to be differentiated from the significance of its charismatic and controversial Chairman.

Conclusion

The Burgenland Landtag election, although falling beyond the timeframe originally conceived for this study, has relevance because its results appear to confirm the thesis presented at the outset. It was held in Burgenland June 23, 1991, fifteen months before normally scheduled, as a consequence of the ruling SPÖ's desire for a vote of confidence for its chairman, Governor Sipötz who stood accused of having spied on candidates for appointive office and for its native son and ex-Chancellor Fred Sinowatz who had just been convicted of perjury with the implication that the entire state Executive Committee was also guilty. The FPÖ, with the momentum of more than four years of 'Haider-Effekt' and an eighteen per cent standing in the polls, agreed, thinking to make even more gains at the expense of the ÖVP. The ÖVP was in a particularly

unfavorable position for the campaign. It had suffered a disastrous loss in the 1990 parliamentary election with a particularly worrisome erosion in traditionally strong agricultural sectors and stood at only 29 per cent in the polls. Additionally it had to bear the burden of running its campaign in the middle of a bitter mud-slinging battle for the federal chairmanship between warring factions of the party.

The mission of the FPÖ campaign was to again deny the Socialists their absolute majority and state Chairman Rauter expressed as his personal goal the winning of two seats additional seats which would bring his party into the government and earn for it the status of a Mittelpartei even in Burgenland. Haider gave his usual energetic support with the standard attacks on socialism and corruption given specific focus by the recent embarrassments of Sinowatz and Sipötz. Suddenly, only ten days before the election, Haider, who had frequently violated the accepted norms of political correctness, made a statement that converted the 'Haider-Effekt' into a boomerang. The incident occurred during a speech to the Carinthian parliament when he suggested that the reduction of unemployment benefits to persons offered acceptable alternative employment would be an incentive to return to work. When the chairman of the opposition SPÖ fraction shouted that this was akin to the forced labor of the Third Reich, Haider retorted:

- No, this was not the case in the Third Reich, because the Third Reich had a sound employment policy, which your government in Vienna can't even manage. That, for once, also has to be said.

He continued that it was the SPÖ, and implicitly not the FPÖ, that for almost forty years had been led by high-ranking members of the Hitler Youth and then returned to his speech. After he had finished, an ÖVP speaker opened his remarks with a criticism of Haider's outburst, but then continued with the discussion at hand with no further incidents. About fifteen minutes later, after coming to realize the potential opening that Haider's remarks had made in the ranks of the FPÖ-ÖVP coalition, the SPÖ fraction leader used a point of order to call for a meeting of the fraction chairpersons

- . . . with regard to the statement by the Governor by which he put forth the labor market policy of the Third Reich under National Socialism as the model for the democratic Second Republic.

When the session resumed, Haider distanced himself from this implication attached to his earlier statement saying that he '. . . in no way had intended a positive evaluation of the labor practices of the Third Reich' and that he regretted ever making the statement. Despite this retraction, Haider's many enemies leaped at his indiscretion, making him the focal point of a storm of criticism from the press and the major parties. Chancellor Vranitzky demanded his resignation as Governor, the federal government debated damage control and the judiciary considered whether to charge him

with a violation of the anti-Nazi law. Then, two days before the Burgenland election, the ÖVP joined with the SPÖ and voted no confidence in Haider, thus forcing his resignation as Governor.

Within the FPÖ, the reaction to Haider's statement was mixed. Third Parliament President Heide Schmidt and fraction leader Gugerbauer called it 'unacceptable' and other prominent FPÖ figures were also critical of their frequently uncomfortable Chairman. The Federal Executive Committee did however, after a bruising eight hour meeting, rally behind Haider with a resolution condemning the 'scandalous political and media campaign' against the FPÖ and its Chairman. In Carinthia there was a mass demonstration of support for Haider and a public opinion poll commissioned by the FPÖ showed the party there with a 38 per cent popularity standing, close behind the SPÖ. In Burgenland, Haider-sycophant Rauter, ignoring the pleas of many of his colleagues, stood firmly behind his Chairman expressing his disgust at the criticism of a man who had simply 'told the truth'.

Austria-wide, and presumably also in Burgenland where the FPÖ had never had any strength until 1986, Haider plummeted from 47 per cent in March to a 33 per cent in July in the continuing poll testing whether 'this politician should play a more important role in the future'. Haider-critic Heide Schmidt however, soared to 53 per cent and the FPÖ generally lost only 2 points from March, a scant .65 per cent below its election results the previous October. In the Burgenland election, the FPÖ, despite an overall drop in voter participation, increased its number of votes by thirty percent relative to 1987 (See Table I) while the major parties again declined. A precise assessment of the impact of Haider's 'remark' must await the results of the in-depth studies of voter behavior and the judgment of time. Nevertheless, some tentative conclusions can be reached:

1. The 9.75 per cent the FPÖ received in Burgenland relative to the projections of from 11 to 13 percent projections the week before 'the remark', and the 1.32 per cent decline from the recent federal election combined with Haider's loss of popularity in opinion polls seem to confirm the early exit polls' conclusion that the 'Haider-Effekt' had dissipated.
2. If this is the case, then the FPÖ successes may be seen as at least partially independent of its Chairman. Despite the wishful thinking of much of the media which portrayed the Burgenland election as an FPÖ defeat, the party's increase in voter share, even if less than projected, must still be seen as a victory when compared with the continuing losses of the major parties.

Landtag elections in two further states, voting for the first time since beginning of the timeframe established for this study, need to be mentioned. On September 22, despite numerous predictions of an electoral disaster and reports of scandal and dissension within the state party, the Styrian FPÖ exceeded its most optimistic hopes of a ten per cent voter share, leaping from 4.59 per cent in 1986 to 15.38 per cent. The ÖVP was unable to maintain its absolute majority of thirty years, losing a massive 7.52 per cent, while the SPÖ declined 2.71 percent. Two weeks later, the Upper Austrian FPÖ improved even on the Styrian success, jumping to 17.7 percent from its record low of 5.03 per cent in 1985 and exceeded even its voter share in the federal parliamentary

election at the peak of the 'Haider-Effekt' in 1990. The ÖVP and the SPÖ declined 5.92 per cent and 6.56 per cent respectively, with some of the losses attributable to the FPÖ's exploitation of anger with the federal coalition's policies on immigration and asylum as it had so successfully in Vienna in the parliamentary election twelve months before. Taken together, these three state elections of 1991 may be seen as a continuation of the trends in voter behavior manifested in the other state elections since 1987 and a confirmation of the contention made at the outset of this article: namely that the FPÖ electoral upsurge since 1986 has been due to the breakdown of the Lager and to the perception of protest voters that the FPÖ is their best means for speaking out against the 'tyranny of the majority' as exercised by the coalition parties.

Over the previous five years Jörg Haider's charismatic and aggressively critical style had been particularly well-suited to win the votes of many who otherwise might have cast blank ballots or stayed at home. That the FPÖ's success since 1986 is not to be attributed to a rise in right-radical voting sentiment in Austria appears to be evidenced by the fact that Haider's popularity plunged following his remark about the employment policies of the Third Reich while sympathy for the FPÖ remained stable. To be sure, among Haider's recruits have been former right-wing FPÖ voters who had defected to the neo-nazistic NPD during the years of FPÖ's liberal emphasis and above all during its three year coalition with the Socialists. The major growth of the FPÖ in the past five years however, has been shown by election analysis not to come from any revitalized national-liberal Lager, but to have been built on an electorate that spans the political spectrum '. . . from right-fringe groups, to anti-government protest voters (among them former ÖVP- and SPÖ core voters) and to the apolitical "trendy voters"'. Understandably, given its roots in the German-national Lager, the FPÖ, like the German Republikaner, captures the nostalgic vote of German-nationalists and former Nazis. Also, like the Republikaner, the FPÖ has become the Austrian party of protest against the political establishment with particularly strong support among the young. Here, however, the parallels cease. The new FPÖ constituency is largely to be found among the better educated, upward-striving, service-sector employees of the cities and towns who have been the winners in the modernization of post-industrial society. They are pro-capitalist, pro-modernist, pro-Western and pro-European in their sentiments and the FPÖ's continued affirmation of Austria's place in the German cultural and ethnic community seems irrelevant when compared with the new sources of the party's support and the issues which animate its voters. They may resonate to modern, populist appeals, but there is little to suggest that they are right-radical, much less neo-Nazi. Whether its recent electoral successes makes the FPÖ the 'Mittlepartei' that Heide Schmidt triumphantly proclaimed after the last parliamentary election or a party at all remains in question. Its constituency is broad and for the moment has little binding it together except protest against the ruling coalition. Jörg Haider has personified these cynical, critical and above all youthful voters. The remark that lost him his position as Governor of Carinthia may yet turn out to be the mistake that makes him unacceptable as a political leader. Indeed, ever since Haider's emergence as Chairman and his formation of almost a Führer cult around him, there has been dissatisfaction at the highest levels that could not be openly expressed for fear of killing the "Haider-Effekt" that has benefited them all. On the other hand, the reaction of the voters, whose support has brought about the revitalization of the FPÖ, was far less censorious than that of the media whose coverage of Haider's embarrassment was regarded as exaggerated by 42 per cent of those polled. The fact that 44 per cent did not see the "remark" as damaging to the reputation of Austria and one-third even felt it was an

acceptable statement of the facts may in fact enhance his capacity to capture the votes of those wanting to protest the major parties' domination of the government, the intellectual establishment and the media. It is too early to consign the enormous political talent of Jörg Haider to the history of the party, yet regardless of his fate, as long as the SPÖ-ÖVP coalition survives, the 'opposition bonus' for protest parties will be available. The most recent research on the political cultural of the country shows Austrias to be characterized by 'a difuse attitude of protest, public cynicism, emotional agression and populistc resentment'. Under these circumstances and with attractive, critical leaders like the Third Parliamentary President Heide Schmidt, floor-leader Norbert Gugerbauer and others in the parliamentary fraction, the FPÖ will continue to have the potential to elect enough of its candidates to remain a party of significance in a political environment increasingly dominated by personalities and populistc protest.

From Protest to radical Right-Populism

The Freedom Party of Austria 1990-1996

The deliberately provocative main title for this session was actually an afterthought which occurred to me as I was thinking about the Freedom Party plan: *From Party-State to Citizens' Democracy. The way to the Third Republic*. Its proposals are a reaction to the changes in the political landscape which has been the subject of Hans-Georg Betz's paper and to the obsolescence of Austrian corporatism addressed by Markus Crepaz. That the Second Republic should be replaced was viewed by those who see the Freedom Party and its Chairman Jörg Haider's as right-extremist and his proposal for a "Third Republic" as a cover for a "Fourth Reich."

I have long rejected the right-extremist label for the FPÖ and initially became acquainted with Hans-Georg when he called to chat about the FPÖ after reading the published version of my 1991 GSA paper analyzing "The Revitalization of the Austrian Freedom Party since 1986." In that paper I had taken exception with his inclusion of the FPÖ as part of ". . . a rising tide of right-wing radical parties in Western Europe," arguing a line similar to that subsequently taken by Michael Minkenberg regarding the New Right in Germany, namely that the resurgence of the FPÖ was due to structural changes in the Austrian electorate which had produced new cleavages and new lines of partisan conflict that place it outside the framework of right-wing extremism of the past. At that time I was reacting against the view of the *Dokumentationsarchiv des österreichischen Widerstandes* (DÖW) which effectively sees modern rightist political phenomena within the historical framework of fascism and National-Socialism and more recently has dramatized its position on the FPÖ by making Haider its "coverboy" posed with the symbolic flag of neo-Nazism for its 1993 *Handbuch des Österreichischen Rechtsextremismus*. The paper that follows does not represent a reversal of my earlier rejection of this interpretation, but rather a refinement that ensued when Hans-Georg asked me to contribute a chapter on the FPÖ to a book that he and Stefan Immerfall were planning to put together on right-radical populist parties. I initially declined, citing my preference to reserve the designation right-extremist for the abortion-doctor murderers, letter-bombers and the like. Distinguishing between right-radical and right-extremist, Hans-Georg expressed the belief that what I would write would be quite compatible with the foreseen orientation of the book and urged me to read his *Radical-Right-Wing Populism in Western Europe*, before refusing. Indeed I found that my perception of the FPÖ fit well within the framework of the book planned and agreed to participate. The remarks that follow are partially drawn from that contribution.

In reflecting on what is now almost exactly a decade of Haider leadership, I am presently inclined to divide the period into two parts, with the period from the October 1990 parliamentary election to the Vienna municipal election a year later as a period of transition. In the previous four years, the FPÖ had experienced dramatic increases in voter share in seven consecutive state elections. My 1991 GSA paper argued that these successes primarily benefited from a focus on problems that could be laid at the door of the SPÖ-ÖVP federal government coalition, e.g. unemployment, waste of tax monies, corruption and excessive political patronage, scandals, the need to privatize state-owned enterprises, lower taxes, reduce regulations on business and individuals and only in select cases on state issues. The statement that most

Austrians were part of the "German ethnic and cultural community" remained in the program, but overt appeals to the German-nationalism that has been at the core of the ideological camp from which the FPÖ emerged and which the DÖW sees as central to right-extremism were not evident.

The issues so effectively exploited in the period from 1986-1990 had been consistent FPÖ themes for thirty years, but had never made the FPÖ any more than the fraction in what was once described as a two-and-a-half party system. By the mid-80's however, the dissatisfaction with the modern welfare-state that had produced the successes of Margaret Thatcher in Great Britain and Ronald Reagan in the U.S. was beginning to develop in Austria as well. This had cost the SPÖ its absolute majority in 1983 and contributed to the 1986 revolt against the liberal leadership of its FPÖ coalition partner which made Haider chairman. When, following the 1986 election, the ÖVP accepted the invitation of the SPÖ to end its sixteen year absence from government, it moved to the Center, precisely at the time that a considerable segment of the electorate was becoming susceptible to the right-radical populism that had been growing in other Western-style democracies throughout the 80's.

Relatively protected from the currents that had stimulated the growth of right-radical populism elsewhere, *Die Wende* of 1990 brought Austria into the mainstream of those forces that Plasser/Uram have identified as responsible:

... erosion of the traditional social milieu, an increase in social fragmentation, the increasing individualization of economic and social risk, the splintering of the labor market, massive immigration, conflict between multiculturalism and ethnocentrism, dissolution of traditional party ties and the weakening of the ability of the traditional political figures to maintain party loyalty.

For Austria, they specifically cite "... a disgust with parties and politics that is significantly above average ... excessive manipulation of the political system by the parties ... pervasive patronage ... opposition reactions against an 'excessively powerful' government coalition" In applying the term radical right-populism to the FPÖ, Plasser/Uram have accepted a typology for these kinds of parties established by Hans-Georg Betz and I do as well, because it avoids the more typically used right-extremist label more appropriately reserved for those who act outside the democratic system and who either incite or resort to terror to promote their ends. The FPÖ definitely meets the socio-cultural, -political and -economic criteria of the radical right-populism. It is radical in its rhetoric against immigrants and "social parasites" and also because it wants to replace the statist Second Republic with a Third Republic based on the techniques of direct democracy, thus adding to the populist image it had long carried as the voice of the "little man" against the "big parties" and the dominance and privileges that their "social partnership" brought.

In 1990, the slogan, "Vienna must not become Chicago," used by the Viennese FPÖ in the 1990 federal parliamentary campaign, is perhaps the first evidence of the shift to a more radical and modern right-

populism. It implicitly connected immigration which had exploded in the wake of the fall of the "Iron Curtain" with the crime rate that had risen 5 per cent the previous year and was in the process of escalating to 8 per cent in 1990. Although it was less blatant than the ÖVP appeal, "Vienna for the Viennese," the FPÖ slogan was confirmation of its racism in the eyes of its critics. To the list of characteristics which they had long used to label the FPÖ right-extremist, were now added its exploitation of anxiety about immigration and antipathy for multiculturalism which in turn united the intellectual elites of the Left in what has become known as the "antifa" cause. Meanwhile, the erstwhile Socialist working class resonated to FPÖ complaints about the "social engineering" policies of the *schicki-micki* elites "up there," accepting its straight-line correlation between the increase in the numbers of foreigners and the rise in crime and unemployment. While the shrillness of its campaign was probably responsible for the loss of some better educated, white-collar voters, the gain among workers more than compensated and helped win the FPÖ the largest voter-share for a third-party in the Second Republic. (See Table 1.1). Elsewhere the FPÖ campaign retained more its protest-opposition character and the structural profile remained that of the 1986-1989 period.

The new radical right-populism that had surfaced in Vienna in 1990 became even more evident in that city's municipal elections the next year. There were three major issues: transportation, housing and foreigners and the FPÖ attributed revelations of mismanagement and waste in housing and subway construction to the essentially permanent rule of the SPÖ. Immigration, however, remained the burning issue. The FPÖ emphasized the pressure this put on housing and the availability of jobs, but focused on the schools where in some districts, it claimed, German-speaking children were reduced to a 20-25 percent minority. Despite charges of racism, almost 40 per cent of the population identified immigration as a serious, contemporary problem. Among them, every second voter saw the FPÖ as the most competent party to deal with the foreigner question, a factor that was cited as decisive for one third of FPÖ voters, particularly among those who defected from the SPÖ. Post-election analysis shows however, that protest remained the dominant factor behind the FPÖ success, with nothing to indicate nostalgic sympathy for German-national, fascist or National Socialist themes. Even Haider, who is so often portrayed as a "brown shirt" in modern dress, was among the least cited reasons for switching to the FPÖ. For the Viennese establishment, the consequences of this new political climate were stunning. The SPÖ slipped below 50 per cent for the first time in the Second Republic and the FPÖ climbed from 9.7 per cent in 1987 to 22.5 per cent. It tripled its number of seats in the city council and became the second largest party represented. Particularly striking was the fact that over 26 per cent of the working class and 35 per cent of all skilled workers voted for the FPÖ. In state elections in Styria and Upper Austria a few weeks before, the FPÖ also won successes attributed to a "... massive breach in the SPÖ core constituencies," the "foreigner question" and "welfare-cheating" and a transformation of the FPÖ "from a party of elites to a worker party."

Late in 1992, the FPÖ reached for even broader mass support when it attempted to capitalize on the government's rejection of its restrictive proposals on immigration by launching an initiative campaign entitled "Austria first." It proposed to add a statement to the Federal Constitution declaring that Austria was not a classic country of immigration and to institute a number of other measures to deal with public health, education welfare and housing that it contended were being adversely affected. A Gallup Poll initially showed 1.68 million in support, but then a high profile immigrants' rights group mounted a

counter-campaign that skillfully portrayed the initiative as a racist, implicitly nazistic, anti-foreigner crusade against industrious and indispensable guest workers and helpless refugees fleeing poverty, political repression and civil war and was given high-profile support by the SPÖ. Within the FPÖ, a handful of Liberals in the parliamentary fraction drew the same conclusion from a provision that would have limited the number of school-children who did not speak German as a mother-tongue to thirty percent of public school classes and set up parallel classes for the foreigners when that percentage was exceeded. When they failed to force its modification, former General-Secretary and 1992 FPÖ-presidential candidate Heide Schmidt, ex-Defense Minister Friedhelm Frischenschlager and a few others defected to form the Liberal Forum. When I questioned Haider on their contention that the mother-tongue stipulation meant ethnicity, not language competency, he denied the charge, arguing that the FPÖ had simply used the Berlin model adopted under the eminently respectable former mayor and subsequent Federal President Richard von Weizsäcker. While Berlin had indeed wrestled with the same problem, the criterion there was the "knowledge of the German language" of the "foreign children." It should, however, also be noted that the term "mother-tongue" was used in parliamentary discussions by both coalition parties and can by no means be seen as unique to the FPÖ. In response to further questions on this issue Haider left the impression that he is indeed concerned about more than mere language facility. The issue is culture and is related to his frequently-stated desire to protect "the homeland" against pressure for multicultural policies of the government. His statement that immigrants who were becoming integrated were "no longer a problem" suggests that the racist charge was bogus and that the real debate should have been about the FPÖ's real goal of preserving the cultural character of Austria against the inevitable changes that come with heavy immigration. That debate, however, did not occur and against the background of attacks on foreigners and counter-marches against right-wing terrorism in Germany and a massive candlelight parade against the "anti-foreigner" initiative in Vienna, fewer than half of those who had initially said they would support "Austria first" actually signed it. The media declared it a "flop," congratulated Austrians on having recovered from their recent drift to the Right and declared Haider politically dead.

Like Mark Twain upon hearing of a publication of his obituary, Haider might have remarked that the report of his death was an exaggeration. Less than two months later, the FPÖ extended its record of electoral successes in three state elections. In Carinthia it won 33.28 per cent and came within one seat of parity with the SPÖ and made small gains in both Salzburg and Tyrol. Exit polls in all three elections again showed protest against the SPÖ-ÖVP coalition, against its recently negotiated treaty for entry into the EU and fear of immigration to be dominant factors in the FPÖ vote. These motives are consistent with earlier gains and indeed the attitudes of the radical, populist "New Right" everywhere, but to suggest, as do the Austrian "Antifa," that they are a reflection of an unconquered past seems an exaggeration that fails to recognize that racism and xenophobia are modern phenomena that need not be and probably are not linked to National Socialism.

Illustrative of the volatility of this new electorate was the result of the June 1994 plebiscite to approve the treaty negotiated to join the EU. Thinking to exploit the populist trend where voters in EU-countries Denmark and France only narrowly approved the Maastricht Treaty and Switzerland declined to apply, the FPÖ urged a no vote, while trying to justify its retreat from its long-standing support for European integration on the grounds that the treaty gave too much power to the "Bureaucrats in Brussels." A

resounding 66.34 percent rejected this position, Haider's popularity ratings dropped into the cellar and his enemies in the media interpreted the vote as a defeat for the right-extremism they associated with the unsuccessful anti-EU campaign. What this interpretation failed to recognize was that the FPÖ successes of the past eight years had not been built on any kind of nostalgic right-extremist ideology, but rather on protest against the established order and more recently upon radical proposals to end the ossified status quo. A yes vote for the EU did not in any way temper the alienation of the electorate and the widely reported "Europhoria" did not rub off on the SPÖ-ÖVP coalition.

The FPÖ parliamentary campaign begun just three months later provides specific evidence to justify its categorization as a right-radical populist party according to the criteria outlined by Betz and Plasser/Ullrich cited above. Its themes however, do not represent extremism relative to a political mainstream which on the international level had already been diverted to the Right by Margaret Thatcher and Ronald Reagan. This new, populist Right is far from conservative however, and mirroring Newt Gingrich's "new American revolution," Jörg Haider proposed a "Third Republic" for Austria. For Americans simultaneously going through mid-term congressional elections, and particularly Californians who additionally were experiencing the high-spending Feinstein-Huffington senatorial race and Governor Wilson's bid for reelection against the background of the Proposition 187 campaign, the FPÖ's emphasis on crime, immigration and moral values would have been familiar. To emphasize the crime issue, Haider selected, as second on the FPÖ candidate list, a woman jurist and former ÖVP member who expressed her concern about crime and immigration and who implied her personal belief in the death penalty. In contrast to California where her support for the death penalty would have been too mild, *profil* unsubtly characterized her concern about crime as an obsession with "*Blut und Banden*" and criticized her statement that "life in prison must mean life" as simplistic. On immigration the FPÖ had established its credentials with the "Austria first" initiative. Even the easing of the problem due to highly restrictive legislation subsequently passed by the government may have redounded to the benefit of the FPÖ. Those who agreed with the criticism of *profil* that the legislation was excessive and just pandering to the voters to avoid defection were unlikely to have voted for the FPÖ anyway, and those anxious about immigration, even if they had shied away from an open admission of their concern by signing "Austria first" could attribute the improvement to FPÖ pressure. On the values front, with the ÖVP committed, "without any ifs, ands or buts," to continuing in coalition with an SPÖ that many Conservatives held responsible for the decline of values, the moral Right had no other place to go than to the FPÖ. Haider staked the FPÖ claim for this support in his book, *Die Freiheit die ich meine*, citing the social-welfare state and moral-free materialism as the source of the modern malaise. A good example of what is wrong with modern society he contends, is what has happened to the family, substantially because materialism has driven mothers to work. Taking on the feminists, Haider proposed tax incentives to permit mothers to remain home and raise their children and for those who must or want to work, he proposed more day-care centers unrestricted by class or party membership. In reaction, one critic drew the inevitable parallel with the Nazi policy of *Kinder, Kirche, Küche* and accused him of anti-foreigner racism for wanting to encourage the birthrate of Austrians. These ideological waters were however considerably muddied in the summer of 1994 by the wife of the SPÖ Chancellor, who, in an interview with *profil*, touted "family values" and criticized mothers who put their children in day-care at seven in the morning "... in order to earn maybe four- or five-thousand Shillings." The SPÖ was embarrassed and feminists exploded in rage, but a poll showed the public split virtually evenly on her

views. By extension then, it can be inferred that close to half the public does not see the views of Haider and the FPÖ on this issue as reminiscent of National Socialism.

Above all, in the 1994 FPÖ campaign, charges of scandal and patronage were critical. Accusations of party-favoritism, waste and corruption have been a hallmark of FPÖ campaigns since its founding and in his televised debate with SPÖ-Chancellor Vranitzky, Haider scored heavily on these issues. Taking a cue from Ross Perot, he held up a chart showing exorbitant salaries and pensions paid to the Chancellor's party colleagues in the Styrian Chamber of Labor and charged "secret deals" as just some examples of the "swamp" of finance, economics and housing policy created by the patronage of the "old parties" via the "social partnership" and exacerbated by twenty-five years of "Socialist" rule. Vranitzky declared these complaints "old hat," and not his responsibility, but they registered favorably for Haider in a post-debate poll. All these issues ended up matching closely with the most important motives cited for an FPÖ vote in exit polls.

*because the FPÖ seriously fights against scandals and patronage

*because the FPÖ represents proper right position in the foreigner question.

*because the FPÖ stands up against the power of the parties and for more rights for citizens.

Of the four remaining motives, three may be ascribed to diffuse protest and disgust with politics as usual. Only one: "the FPÖ most clearly represents my interests, or my tradition," may be interpreted as evidence of the German-nationalist ideology that is associated by FPÖ-critics with right-extremism, fascism and Nazism.

Nor was the party's biggest growth among voters typically associated with right-extremism. Shocking those who believed that the FPÖ had reached the limit of its natural constituency in 1990, it jumped almost 6 per cent to 22.5 per cent. While the FPÖ did lose middle-class voters to the Greens, the Liberal Forum and to abstentions, defections from the SPÖ alone accounted for two thousand votes more than its total increase. These SPÖ-defectors constituted almost a quarter of the entire FPÖ total, maintaining the position of workers as the largest single demographic group in the FPÖ that was achieved in 1990. (See Table 1.1 above.) 11.1 per cent of the total had voted ÖVP in 1990. Beyond the 6.7 per cent increase won by the FPÖ in urban centers with 'traditional' worker precincts, it won almost comparable increases in rural-agricultural and mixed regions as well as 5.6 per cent increases in industrial and service regions in economic problem zones in Styria, Upper Austria and Carinthia and in the western industrial and tourist regions. The smallest increase was 4.4 per cent in regions with a high concentration of well-qualified white-collar workers, who had traditionally been dominant in the FPÖ electorate.

Another issue which surfaced, but did not register on the voter's radar screens was Haider's provocative statement that the Second Republic was obsolete and should be replaced by a "Third Republic." Placed in the context of the history of the Second Republic, what Haider was effectively saying was that

Austrian democracy had out-grown the party- and neo-corporatism state upon which it had originally been based. Befitting contemporary reality, Haider argued, there should be a transition to a plebiscitary democracy in which the parties would serve only as a vehicle for electing representatives, who would then take their orders from an active citizenry rather than from a party *apart*. Appropriately, the FPÖ began calling itself the F-Movement, or "*die Freiheitlichen*," and adopted statutes in 1995 to incorporate the changes. It also proposed constitutional changes to provide for the direct election of governors and mayors and a strong Minister-President according to French and U.S. models. The federal government would be elected by Parliament and made responsive to the will of the people by frequent consultative referenda. While FPÖ-reformers see a future of increased local and regional freedom from the federal government and more active citizen participation, the "*Antifa*" called attention to Hitler's combination of his office of Chancellor with the office of President following Hindenburg's death in 1934.

This theoretical debate on the putative right-extremism of the FPÖ was overshadowed by a real extremist act, a bombing in the Burgenland village of Oberwart on February 5, 1995 where two Roma (gypsies) were killed. A link to the recent letter bombs of the German-nationalist, anti-foreigner "Bajuvarian Liberation Army" (BBA) was immediately suspected and later proven. Despite the lack of any evidence implicating the FPÖ, much of the quality press held the party responsible for creating a climate of hatred which encouraged such violence. In the parliamentary debate that took place three days after the Oberwart explosions, Haider rejected the "terror" that he anticipated "pious" Leftists would direct against him and his fraction, stating that the violence had no ideological stamp, but rather was the work of "... a network, that across Europe is working to destabilize democracies." Citing the minority rights problem as another possible cause, he touted his own success in Carinthia in this regard and indicted the SPÖ government of Burgenland and the ÖVP government of Oberwart for failing to integrate "... an ethnic minority that fifty years ago was practically exterminated in the penal camps National Socialism." The "pious terrorists" of the SPÖ did accuse him of minimizing the crimes of National Socialism by using the term "penal camp," but in this case, the criticism of a speech in which he specifically called attention to the genocide of National Socialism probably won him points among those fed up with the requirements of "politically correct" speech.

Yet another bomb exacerbated the tension between the FPÖ and the SPÖ in the early morning hours of April 20, when two young men were killed in an attempt to blow up an electrical tower in the village of Ebergassing near Vienna. Because "Nazi Hunter" Wolfgang Purtscheller had warned of the possibility of bombings around Easter and because April 20 is Hitler's birth date, there was some speculation that this might again be the work of right-extremists. Closer investigation however, revealed that the victims were autonomist/anarchist Leftists who had mistakenly blown themselves up in their attempt to protest the construction of the power line. Haider seized upon this to suggest that the other bombings were also the work of Left-extremists trying to discredit the FPÖ. The FPÖ-newspaper accompanied these charges with a diagram of "the network" tying together the headquarters of the bombers, the Communist, Social Democratic and Green parties, the Document Archive (DÖW), "antifa" writers, the state broadcasting service, *profil* and other prominent newspapers. The FPÖ attack grew even more shrill when it was discovered that the SPÖ Minister of Interior, Caspar Einem, had donated money to the left-radical publication *TATblatt* which it charged had encouraged left-terrorism. Einem had been appointed Minister of Interior only a few weeks before and had immediately become the darling of the media,

being touted as the new "anti-Haider" and a possible successor to Chancellor Vranitzky who had appeared lackluster in the election campaign the previous fall. Haider, whose reputation as a right-extremist had been established by the assigning of guilt by association, now turned the tactic to his own advantage, calling for a vote of no-confidence against the Minister of Interior. The Chancellor and speakers for the SPÖ responded in kind, charging that Haider's articles and interviews in rightist publications had been responsible creating a climate within which right-terrorism had arisen.

When this tantrum on both the Left and Right had passed, the problem of the deficit and how to deal with it still overshadowed all other political concerns. The SPÖ-ÖVP coalition that had been cobbled together following the 1994 election had been seriously strained in reaching a "savings package" in the spring. It then fell apart on Friday, the 13th of October, when the new ÖVP Chairman, Wolfgang Schüssel, withdrew from the coalition charging economic mismanagement and gambling that his popularity in the polls could bring a relative majority in new elections scheduled for 17. December and make him chancellor.

Jörg Haider had indirectly contributed to this chain of events when, following the election just a year before, he had offered to support a minority ÖVP government as a means of ending "business as usual." ÖVP Chairman Eduard Busek spurned the offer, honoring his pledge during the campaign to support the coalition "without any ifs, ands or buts." For those fed up with serving as handmaidens to the SPÖ, Busek's promise was the cause of the worst ÖVP showing in history. In April of 1995, Busek was replaced by Wolfgang Schüssel who then sought to define himself by trumpeting the newly fashionable, conservatives idea of smaller government, frugality and deficit reduction against his SPÖ partners in the government. Soon he was being touted as a "Haider-killer" who could sufficiently unite the middle-classes and bring an end to the twenty-five year dominance of the SPÖ, still called "Socialists" in conservative circles.

As if to cooperate, the SPÖ went into its own period of self-doubt. Vranitzky was widely reported to be "tired of office" and General-Secretary Josef Cap was fired causing *profil* to raise the question whether the SPÖ could "still be saved." In a poll published early in October by *profil*, the Chancellor ranked only fourth in the "Politicians' Hitparade," his worst showing ever and down 14 points from the previous poll. Jörg Haider, meanwhile, had gained 7 points and the top of the list was crowned by ÖVP-Chairman Wolfgang Schüssel who had become Austria's "political darling" by sitting back and letting the SPÖ wrestle unsuccessfully with the budget while criticizing it for wanting "to simply continue the frauds of the past for another year." Undoubtedly buoyed by his own personal popularity and the prospect that he might actually be able to lead his party to a majority, Schüssel grasped at the chance to become Chancellor and on Friday the 13. of October introduced a resolution, which then passed, setting 17. December as the date for the election..

The question that dominated the ensuing campaign even more than the budget impasse was whether Schüssel would form a coalition with the FPÖ. Haider indicated his openness to a coalition with the ÖVP, although stating that if the FPÖ were not the strongest party, he would remain in Parliament and nominate someone else as Vice-Chancellor. Nor would Schüssel rule out the possibility of a coalition with the FPÖ, thus prompting the SPÖ, the Greens and the Liberal Forum towards a decidedly "antifa"

campaign against Haider and the FPÖ. Schüssel, for his part, reversed the "politics of the Center" that had ruined his predecessor the previous year. Running as the "good Haider," he adopted much of the FPÖ's populist program for cutting the social-welfare state, writing off everything to the right of the ÖVP as "negative energy." For the first time, Haider was put on the defensive. Polls showed the budget, cutting government expenditures, the economy and taxes to be the dominant issues in the voters minds and the ÖVP as the more competent of the two conservative parties to deal with them. Moreover, the economy was improving and immigration, which the SPÖ-ÖVP government had brought under control, had declined in importance.

The center piece of the FPÖ campaign was a 20-point "Contract with Austria" which substantially meets the criteria for radical right-populism as outlined by Plasser/Ullrich and Betz. The "Contract" called for frugality, reduction in taxes, the replacement of subsidies to business with tax incentives, a reduction of subsidies to the parties and the elimination of those for the press, an end to early pensions while securing the stability of pension funds, the elimination of the national debt and the balancing of the federal budget, defense against a loss of rights to the EU, the strengthening of direct democracy through the initiative and referendum process and restricting immigration. It was packaged in a slick brochure with a picture of Haider against a gold background on the front with the text in party-color blue: "He has not lied to you! Simply honest, simply Jörg." The SPÖ countered with a brochure mimicking that of the FPÖ but entitled "the lies of Jörg Haider" and *profil* helped out with a cover replicating the FPÖ slogan, but reading: "He has lied to you!" and in the sub-text where the FPÖ boasted of Haider's honesty it promised in the related article: "His biggest lies collected and reproduced." Featured inside was a photograph of an F-billboard defaced to show Haider with a Pinocchio nose and a story charging him with conducting the most brutal campaign in the history of the Second Republic.

It was indeed a brutal campaign and a *profil* article, "Blood spots on a white vest" contributed. This was the title given to a report on the opening of an exhibition featuring graphic photographs of atrocities committed by the *Wehrmacht*, in which most Austrians have relatives who had served and like to think were not guilty of the war crimes attributed to the SS. *Profil* noted the visits by SPÖ, Green and Liberal Forum politicians and caustically reported on the ÖVP and FPÖ politicians who had been "too busy" to attend, but still found time to travel to the Ulrichsberg ceremony honoring Second World War veterans in far-off Carinthia. Real blood was shed that same week when there were more letter-bombings in the series that had targeted people sympathetic to immigrants. Most commentaries interpreted the new incidents as an effort to undermine the Second Republic and prepare the way for the third Republic urged by the FPÖ, while Haider reiterated his suggestion that the perpetrators were in fact left-terrorists conspiring to discredit him and his stand against excessive and illegal immigration and the party newspaper speculated that the culprits were autonomist-anarchists associated with those who had blown themselves up in an ill-fated bombing the previous spring and who were part of a "network" linked to the "Greens."

Despite the venom of the "antifa" campaign against the FPÖ and its commensurate response, the right-radical populist issues the FPÖ had so successfully exploited over the past five years had receded somewhat. A longitudinal poll over the period of the campaign showed that immediately before the election, the usual FPÖ themes of foreigners, costs and benefits of EU-membership, scandals and

corruption all at under ten per cent among questions cited as important. Early pensions and welfare cheating ranked at 16 per cent, with the budget, cutting government expenditures, the economy and taxes at 43 per cent and concern that savings be carried out with concern for the needy at 28 per cent. With its usual issues not resonating very loudly, a new "hot button" was found. It was art and focused on the role played by SPÖ Minister of Art, Rudolf Scholten, in subsidizing and directing its development. While conservatives in Austria, as in the U.S., have been long been uncomfortable with modern art and critical of government subsidization of it, what became a "culture war" in the 1995 election first began to develop in opposition to the production by the Claus Peymann, the leftist, German-born director of the venerable *Burgtheater*, of *Heldenplatz* by the renegade, "nest-befouler" Thomas Bernhard in October of 1988. In March of that year, Austria had struggled through a difficult commemoration of the fiftieth anniversary of the *Anschluß* by Nazi Germany and while the production's reminders of the enthusiasm with which the annexation was received by many and the implication that some of the same sentiment still existed were welcomed by the "antifa" Left, it outraged conservatives and was pilloried in the tabloids. Scholten's support and continued appointment of Peymann whose patronage of dramatists who promote the "antifa" campaign and multicultural agenda have made him an arch-enemy of both the ÖVP and FPÖ. Thus, in addition to its usual attack on "social parasites," particularly foreigners who misuse the welfare system, on waste, corruption, bloated salaries of party-appointed public officials and the like, the FPÖ posted a placard asking: "Do you love Scholten, Jelinek, Häupl, Peymann, Pasterk ... or art and culture? Given the recent letter-bombings, this targeting, not only of SPÖ politicians, but also of artists, caused dramatist Elfriede Jelinek to express her fear that "as a feminist, Leftist and not pure Aryan," she was also in danger." The real victim, Haider countered, was himself, targeted by "left cultural fascists" subsidized by Scholten. This attack may be seen as right-radical and populist on at least two levels: 1) The attack on modern art, which parallels that of Jesse Helms and U.S. Republicans on the work of the late Robert Mapplethorpe, et. al., reflects Haider's charge that such art is evidence of moral decline and the need to return to traditional values, and 2) it uses this moral position to call the very concept of state subsidies of art into question. At a time of drastic cuts in social programs across the board, the demand for the reduction or elimination of state subsidies in the "Contract with Austria" so transparently borrowed from the GOP legislative campaign of 1994, has wide appeal.

A journalistic bombshell that may have had more impact on the election than the real bombs of recent months was actually fired from across the border by the German ARD television network. It was the airing, just four days before the election, of an amateur video showing Haider speaking at a gathering of war veterans, including former *Waffen-SS* members, in Krumpendorf, Carinthia on 30. September held as part of the festivities surrounding the Ulrichsberg celebration the next day. In his prepared remarks Haider condemned the "political correctness" of the media which damned such "meetings of the older generation who just want to get together in comradeship and remember what they had been through together, what they had experienced and what they stand for today." There was no reasonable argument against such meetings he

said: "only that some people can't stand that in this world there are still respectable human beings, who have character and who stand by and have remained true to their convictions even against the tide.... We have money for terrorists, we have money for newspapers that urge terror [in reference to *TATblatt* and the anarchist/autonomist bombing of the past spring] and we have money for lazy rabble, but we don't

have money for respectable human beings." He then expressed his respect for

... this older generation, respect for their lives, respect for what they have been through and respect for everything that they have preserved for us.... And [in reference to an exhibit then on display with the support of public monies] whoever today says that the members of the war-generation and of the *Wehrmacht* were all criminals, he befouls his own parents, his own family his own father. And a people that doesn't honor its forefathers, is condemned to destruction. But since we want to have a future, we will teach the politically correct Leftists, that we are not to be destroyed and that respectability will ultimately be restored in our world, even if at the moment we are not in a majority, we are mentally and spiritually superior to the others and that is what is decisive.

Although ORF chose not to air the video showing Haider's speech at the gathering until after the election, it was widely and misleadingly reported in the press that he had called SS-veterans his "dear friends" and praised them for their character and convictions.

It is difficult to say precisely how much the Krumpendorf-video affected the election results, since it had been agreed that polling would stop ten days before the election and at that time 30 per cent were still undecided. A summary of the projections by four major polling institutes relative to the actual results suggests that the SPÖ, as might be expected, benefited the most. The Fessel-Institut exit polls also shows that of voters who had switched to the SPÖ, 56 per cent had made this decision in the last two weeks.

For the SPÖ, although this was its second lowest voter-share in history, the increase of 3.4 per cent from the previous year was significant and its first since 1975. Of the SPÖ total, roughly 2.75 per cent came from the FPÖ, presumably workers drawn back to the fold and approximately 1.85 per cent each from the Greens and Liberal Forum, probably a response to the threat of an ÖVP-FPÖ coalition. This was indicated already early in the campaign, at a time when the Gallup poll showed the SPÖ at 30-32%, the ÖVP at 25-27% and the FPÖ at 25-27%. When, however people were asked how they would vote if the decision whether Haider were to become chancellor were up to them, the FPÖ vote fell off to only 16%, while the SPÖ moved up to almost precisely what it actually won in the election. Beyond the fear factor, another ingredient in the SPÖ recovery was its promise to protect Austria from the excessive cuts in social programs that were causing massive strikes in France at precisely this time. Although the campaign against the possibility of an ÖVP-FPÖ coalition worked for the SPÖ, the losses of the Greens and the Liberal Forum meant that a "traffic-light" coalition (Reds-Greens-Liberals) was no closer to a working majority than before the election. Similarly, Schüssel's shift to the Right and "cat and mouse game" on the coalition question gained his party only 28.3 per cent, a scant .6 per cent above its historic low the previous year and left him no closer to power than before the election. The focused attack of all parties on Haider apparently had some effect. The FPÖ received 13,000 fewer votes than in 1994, and, when translated into voter-share, the 21.89 per cent this represented when the final adjustments were made in the count was well below the 24-26 per cent projected by the early polls and accepted as its goal. The .61 per cent decline and loss of two seats was also the first decline in either a state or federal election since Haider had assumed control of the party. The FPÖ however, continued to dramatically increase its standing as a party of skilled workers. (See above Table 1.1). Also, although the FPÖ may

have run another radical right-populist campaign, the motives of its voters were more diverse. Concern about immigration was indeed important, but it ranked only third, behind the stated motive: "because the FPÖ is for fiscal austerity and against abuse of the social-welfare system" and well behind its reputation for uncovering corruption and scandals. Haider, the tradition of the party, "sending them a message" and "lesser of the evils" ranked fourth through seventh in that order..

The results of the election really precluded anything other than a renewal of the grand coalition. In my chapter for the Betz-Immerfall book finished in late December, I agreed with the conventional wisdom and wrote that "...yet another edition of the SPÖ-ÖVP "grand coalition, albeit with the two-thirds majority necessary to pass constitutional amendments that was lost in 1994" would be concluded. I did not, however, subscribe to the speculation of some that the tide had turned against Haider and the FPÖ. Rather, I wrote:

... circumstances still seem to favor the FPÖ. Relations between the SPÖ and ÖVP are even worse now than they were before and Wolfgang Schüssel will be caught between a strengthened Vranitzky whom he viciously attacked during the campaign and a party disappointed over his failure to do much more than halt its hemorrhage of votes. The budget crisis remains, the ÖVP will continue to demand a smaller government and the SPÖ will try to salvage at least some of the social-welfare state.

Difficult negotiations for a new, grand coalition were indeed successfully concluded and a budget agreement was ultimately agreed upon, but the factors which contributed to growth *Politikverdrossenheit* over the past ten years and the commensurate popularity of the FPÖ remain. At this writing, the ÖVP again seems to be immersed in a internal ideological struggle and the increased prominence of conservative parliamentary fraction leader Andreas Khol promises only to increase tension vis-a-vis the SPÖ. Continuing public alienation was reflected in the Burgenland *Landtag* election on 9. June of this year when the FPÖ returned to its winning ways with a 14.57 per cent voter-share, up 4.83 per cent from 1991, while the SPÖ and ÖVP lost 3.66 and 2.17 per cent respectively. The magnitude of the FPÖ success was, however, less significant than it appeared. The previous election had taken place five years before at a time when the "*Haider-Effekt*" in *Landtag* elections had been dramatic. Only ten days before the Burgenland election however, Haider had made his comment to the effect that the "employment policy" of the Third Reich had had a favorable impact on reducing unemployment. In the ensuing uproar, he lost his position as Governor of Carinthia on a no-confidence vote engineered by the SPÖ with the support of the ÖVP whose Chairman was then made Governor. Thus the FPÖ won only 9.75% relative to the 11-13% projected in a poll the week before Haider's remark. In this context, half of the 1996 victory may be seen as a recouping of votes that were lost at the last minute in 1991. Indeed, the FPÖ did not claim a victory for its program, but instead interpreted it as a protest against the federal budget and as voice of disappointment with the results of EU membership in the only part of Austria designated as a "Goal-1-Region" and scheduled to receive the highest subsidies.

As we sit here, the votes are being counted for representation to the European Parliament and in the Vienna municipal elections. The 1. September submission date for this paper precludes any meaningful

discussion of these campaigns, but at the date of this writing it appears that disillusionment with the EU along with negative reactions to the austerity budget recently enacted by the SPÖ-ÖVP government and anger at the double- and triple-dipping salaries of its politicians will make the elections into a referendum on the latest iteration of the coalition. Protest may make the FPÖ into the second-largest fraction Austrian delegation in Strassbourg, perhaps only barely smaller than the SPÖ. In Vienna, polls show SPÖ-mayoral candidate Michael Häupl unchallenged in popularity, but his party incapable of holding the absolute majority it has enjoyed throughout the history of the Second Republic. The same issues that aid the FPÖ in the EU election are also at play in Vienna. Additionally, immigration has again become the "hot button" issue for the FPÖ in a campaign which *profil*, with a characteristic lack of subtlety, caustically calls "*Kraft durch Feinde*." In the spring, FPÖ opposition contributed to the decision of the government to postpone action on a controversial "integration packet" that would have permitted the entry of family members of immigrants who had been left behind. SPÖ mayoral candidate Michael Häupl would have liked to have let the immigration issue lie, but was subverted in August when his own party colleague, Interior Minister Einem, proposed opening the labor market to all foreigners who had lived legally in Austria for five years. This played right into the hand of the FPÖ which has called for the suspension of immigration and expulsion of all unemployed foreigners and those convicted of crime. With joblessness rising among Austrians and double-digit unemployment among foreigners, this core issue of right-radical populism seems certain to permit the FPÖ to further strengthen its position as the second strongest party in the Vienna municipal government. Furthermore, polls on the "Sunday question" indicate that if federal elections were also to be held today, the FPÖ would rebound from its loss last year and leap over the ÖVP into second position in the *Nationalrat* as well.

This recovery may suggest that the "Antifa" have "cried wolf" once too often. German political scientist Claus Leggewie implied as much in a forum entitled "This hysterical 'Nazi-Nazi' bellowing," published in the middle of the 1995 campaign by *profil*. He pronounced Austria an almost completely normal ("*stinknormale*") West-European democracy. One of the exceptions was a fixation on blocking a bourgeois coalition including Haider that reflected a failure to understand the modernization that had taken place in society. Only two conditions, he felt, would need to be changed to put Austria fully into the west-European democratic mainstream: 1) end neutrality and 2) join NATO. Ironically, Haider had proposed both in the wake of the end of the Cold War and German reunification and was charged with right-extremism for suggesting them. Writer and essayist Robert Menasse described Haider as an late-born Austrofascist, but admitted that he had been a "useful idiot" in that he had served as the catalyst in the process of democratic development that is now recontouring Austrian politics. Austrian political science professor Rudolf Burger disagreed with the Austro-fascist label calling Haider an eclecticist and sees those who profess to find in him the possibility of fascism as blinded by history and failing to understand modern Austrian and international realities.

Leggewie and Burger sustain the thesis posited at the outset of this essay, namely that the threat posed by the FPÖ is not that of a recrudescence of fascism. While other parties, intellectuals and journalists may believe that they know what is best for the country and frequently find totalitarian tendencies in its radical right-populism, the public in Austria, as here, seems to be dismissing their warnings as the irrelevant outrage of Left/liberal elites whose game is finally up. As long as Austrian governments continue to be constituted by parties with fundamentally opposed philosophies, then the current gridlock

seems destined to continue and the FPÖ stands to benefit in the opposition, despite the fact that its politicians are overwhelmingly cited as the most damaging to the image of the country. The increasing disgust of the voting public with "politics as usual" and the continuing erosion of party loyalty suggests that looser, electoral movements of the type foreseen by the F-reorganization of 1995 may be in the offing. An optimistic view of this trend is that the result will be the end of the "party-state" and a stronger parliament with closer ties of its members to their constituents and not the chaos and ensuing *Führer*-state dictatorship that the "Antifa" see reflected in Haider's proposed Third Republic. Certainly strong presidents and plebiscites recall the techniques used by Napoleon III, Mussolini and Hitler. Their dictatorships were, however, built in societies without any lengthy experience with representative democracy. Austria today, despite the budget crisis and debt problems that exploded as political issues in 1995, enjoys one of the world's highest standards of living and has matured as a democratic republic in the past fifty years. In a comparison of the responses of Austrians and Americans to the same or similar questions testing opinions on the issues identified with radical right-populism I found FPÖ voters quite close in their *Politikverdrossenheit* to the general American electorate, while the general Austrian electorate was somewhat less alienated. In any case Austrians show no support for warmed-over fascism and the technology that earlier generations feared would contribute to totalitarianism now seems more likely to weaken the power of central government. The changes proposed by the FPÖ are indeed radical and the sentiments driving them are right-populist, but would be mainstream among the American futurist-conservatives from whom Haider admits he has drawn ideas and inspiration.

Der Haider, Jörg (HJ) and the FPÖ Election Victory of 1986*

I. The Haider "Putsch"

On September 22, 1986 the Austrian newsmagazine *profil* carried a cartoon of the newly elected chairman of the *Freiheitliche Partei Österreichs* (FPÖ), Jörg Haider, portrayed in Carinthian folk dress, standing before a painting showing another, brown-shirted Haider wearing a red armband with a partially obscured, but seemingly recognizable black insignia on a circular white field. Brownshirt Haider is shown strangling his liberal predecessor, Norbert Steger, representing at least the cartoonist's interpretation of the significance of Haider's defeat of Steger for the leadership of the party the week before. Haider's past pandering to the German nationalist emotions of his adoptive Carinthian homeland earned him the affectionate designation, *der Haider, Jörg* or simply HJ, suspiciously coincidental with the initials of the old Hitler Youth organization. While it is not unusual in Austrian colloquial expression for names to be reversed, the fact that the designation appeared to so amuse the new FPÖ chairman caused many to see the cartoon as an accurate reflection of the state of affairs in the party.

Two months later, on November 23, Austrian voters handed both major political parties stunning losses in parliamentary elections and increased the FPÖ's representation in the *Nationalrat* by half. At a time when the Waldheim affair has reawakened the world to memories of Austrian Nazism, an assessment of the campaign, the election results and the FPÖ's behavior since the election is of more than usual interest. Is history repeating itself as suggested by the cartoon? This brief, critical study of the 1986 election as a reflection of Austria's historical consciousness challenges the presumption that the FPÖ election victory represents a resurrection of Nazi tendencies and contends that it was a highly personal victory for Jörg Haider, who exploited a modern, rather than a historic populism, with just enough traditionalist rhetoric to hold the nostalgic vote.

Three months before the Haider "*Putsch*" against Steger, the FPÖ seemed on the verge of extinction. Public opinion polls showed only 2 per cent of the population inclined to vote for the party, which, since its founding in 1955, had informally claimed the legacy of the traditional national-liberal *Lager*. In reality, the *Lager* had lost most of its liberal character before the turn of the twentieth century, although retaining the "old-" or what is presently called right-liberal aversion to interference by either government or Church in business or individual affairs.

Attempts to place the FPÖ on a linear political spectrum have always been confounded by the fact that it is, or has been, a *potpourri* of liberals, ex-Nazis, undoubtedly some neo-Nazis and both conservative- and liberal-German nationalists. In 1955, when the FPÖ succeeded its more broadly-based predecessor the VdU, its leadership was substantially composed of repentant former Nazis. By the early 1970's however, a new, youthful leadership cadre had arisen and ultimately took power with the intention of reducing the importance of the German nationalism relative to liberalism. Virtually all these "neo-liberals" came from families that at the very least had been *großdeutsch* if not outright Nazi. Although they were, on the one hand, content with the intellectual liberalism and some of the social policy of the SPÖ and with the free market rhetoric of ÖVP on the other, remnants of *Lager* mentality precluded them

from activity in parties still bearing traces of either Marxism or Catholic Church domination. For them, German nationalism was obsolete and liberalism, even if long dormant, was an element of continuity in the *Lager* which could be used to transcend the German nationalist and ex-Nazi basis upon which the FPÖ had been built. But many of the basic values of these FPÖ liberals had been shaped in homes where Nazi crimes were not discussed and industriousness, efficiency, and attention to family and social obligations, were stressed as distinctively German virtues. Thus, while these young "neo-liberals" were genuinely committed to escaping the shadow which Nazism had always cast on the FPÖ, their unconscious language and actions frequently gave occasion for critics to see them as neo-Nazis clothed in trendy liberal jargon.

Friedhelm Frischenschlager, party ideologue and later controversial FPÖ Defense Minister in the SPÖ-FPÖ coalition government from 1983-1986, fits this description precisely. Under his leadership, at the beginning of the 1970's, a group of FPÖ-oriented students, young academics and other intellectuals formed the so-called "Atterseer Circle" and made it into a party "think tank." Out of the Atterseer discussions arose the momentum which ultimately resulted in the *Freiheitliches Manifest* which became the *de facto* program for liberalizing the FPÖ from its adoption in 1973 until 1985 when a new program incorporating most of the *Manifest* was adopted. This young, rising FPÖ elite, including future enemies Jörg Haider and Norbert Steger, was also growing increasingly uncomfortable with the chairmanship of former SS-officer Friedrich Peter and ultimately was able to force him out in 1978. After a short interlude with Graz mayor, Alexander Götz, as chairman their ultimate capture of the party was confirmed in 1980 when 36 year-old Norbert Steger was elected chairman over Dr. Harald Ofner, who has been described as "national" and a rightist. In his acceptance speech, Steger reiterated the centrist principles of the *Freiheitliches Manifest*, reminding the delegates that "the first real democrats in Austria were the National-Liberals. We can be the reincarnation of this movement if we have the courage to adopt political policy oriented toward the future." The FPÖ showing in the parliamentary election of the previous year seemed to support Steger's optimism. The party received over six per cent of the vote for the first-time since 1962 and had done well among first time voters, white collar and public employees and their managers, skilled and unskilled workers and many retirees. The 1979 acceptance of the FPÖ into the Liberal International, albeit as a right-liberal party, and Steger's election as Vice-President of the international body the next year further promoted the liberal image of the party. The culmination of the transition of the party from right-wing, nationalist splinter party to a modern, liberal party of the center appeared complete in 1983, when the SPÖ lost its ruling majority in the parliamentary elections and turned to the FPÖ to strike a coalition pact. But the price of respectability came high. Despite its rhetoric and a new party program in 1985 which praised individualism and a free market economy, the FPÖ was tied to the continuing Socialist program of subsidies for inefficient nationalized industries and generous social welfare benefits, while annual budgets grew more unbalanced and the public debt spiraled. Furthermore, scandal after scandal rocked the country. The fallout contaminated Steger as Vice Chancellor and toppled him from the position of respect he had enjoyed in the early 1980's as a consequence of his chairmanship of a parliamentary committee investigating corruption in the construction of a new General Hospital in Vienna. In a poll testing the correctness of ten politicians in both public and private life, Steger was ranked last.

By 1986 the party's liberal tilt had alienated much of its German nationalist wing, but no new

constituency had emerged. While the FPÖ liberals had correctly recognized that "the nationalist vote was increasingly to be found in the cemetery," they failed to understand that there was no significant liberal reservoir to tap for support. Furthermore, the protest voters who had always made up a significant segment of the FPÖ electorate were not likely to vote for a coalition party. As the FPÖ prepared for its September convention preparatory to the scheduled 1987 *Nationalrat* campaign, some observers mused that the coming election might be the party's last. An insurrection against the arrogance of Steger and his "eastern liberal establishment" had been developing for some time among the party leaders outside the capital and its environs. Already in December of 1984 Carinthian party chairman Jörg Haider demanded the withdrawal of the FPÖ from the coalition in anger over the submission of Steger and other members of the federal leadership to an SPÖ plan for a hydroelectric dam across the Danube at Hainburg. Finally in the late summer, Haider challenged Steger for the chairmanship to be decided at the party's mid-September convention in Innsbruck.

In an attempt to ward off a divisive floor battle at the convention, Steger warned that a Haider victory would spell the end to the coalition, while the press predicted chaos and a splintering of the party into oblivion. On September 14, chaos did reign in the Innsbruck *Kongresshaus*. Catcalls, footstamping, and whistles met pleas for solidarity by long-time chairman Friedrich Peter as well as from the FPÖ members of the coalition. One delegate used Frankfurt School "authoritarian typology" to describe some of the pro-Haider delegations ". . . as blindly predisposed to their idol and closed to any rational argument." In a last-gasp effort to salvage some semblance of unity, Steger took the stage and offered to step down as chairman in favor of Defense Minister Helmut Krünes if Haider would likewise withdraw and "end his murderous attack on the party." With this he held out his hand and in a dramatic gesture exclaimed "Jörg! Take this hand. Don't slap it away." But "Jörg" remained in the darkness of the auditorium surrounded by his jeering sycophants who shouted obscenities at the Steger ranks. As Haider supporters then paraded to the speaker's podium, the tumult grew and fistfights between the factions were only narrowly averted. Shortly before midnight the vote for chairman was taken and Haider emerged the victor with 57.7 per cent to Steger's 39.2 per cent.

A few Steger loyalists resigned from the party, but most of the "new guard" liberals easily shed the political deadweight of Steger and made their peace with their new chairman while FPÖ headquarters reported hundreds of new memberships. Even Haider's enemies did not tar him with the right-wing, German nationalist brush; Steger refused to call Haider a right-wing radical and contented himself with worrying about "Nazistic tendencies" which had again been unleashed. Certainly the behavior of some Haider's supporters during the convention gave cause for such concern. The journalistic "Waldheim hunters" of the spring who had again swarmed to the scent of a "Nazi story," gave prominent coverage to Steger's bitter ruminations and celebrated the resignation of each liberal as proof that the party had been captured by right-wing extremists. A number of newspapers reported an unconfirmed rumor that Haider supporters had shouted that Steger and his liberal gang deserved to be shot or gassed and showed off Hitler medallions at the least provocation. The party took immediate action to bring the man responsible for displaying the Nazi medals before a party tribunal to answer to his actions, but expressed ignorance about the gassing comments. In a *Profil* interview six months later, Chairman Haider expressed disbelief that any member of his party could be responsible and attributed the report to "a propaganda of lies that started immediately after the election." He supported this contention by stating that he and his General

Secretary Norbert Gugerbauer had tried to track down the story, but found no one to confirm it. The very next week, three Austrian television reporters in a letter to *Profil* confirmed that they had indeed witnessed the incident in the Innsbruck *Kongresshaus* bar-TV lounge immediately after the close of the convention in response to Steger's comment in a television interview that he might consider founding a new, liberal party. They furthermore stated that they had called Gugerbauer with this information, but when they admitted they had not seen any nametag on the person they thought was responsible, Gugerbauer responded: "How can you say this was a delegate? It could have been a stranger." Given the fact that the incident occurred when and where it did, it seems highly likely that the comment was a reflection of a "Nazistic tendency" unleashed as the consequence of the inebriated euphoria of a Haider supporter after years of bitterness against FPÖ liberalism and Steger's pact with the Socialists.

II. The Election Campaign

Even before Haider's victory at Innsbruck, *Die Presse* speculated that early elections would be propitious for the ruling SPÖ vis-à-vis the ÖVP and would leave the FPÖ and various Green and Alternative parties in total disarray. Chancellor Vranitzky surely hoped that his party might benefit as a consequence of the modest improvement in public support that had followed his replacement of the hapless Fred Sinowatz only a few months before and the change in the leadership of his coalition partner gave him an excuse to dissolve the government and call an election. The strategy worked to a degree. The SPÖ captured a slim relative majority, the Greens failed to realize the vote potential that public opinion polls in recent years had projected, and the ÖVP suffered its worst defeat in history. The FPÖ was the only real winner, almost doubling its percentage share of the total vote relative to the last election.

The foreign press typically saw the FPÖ victory as a shift to the right in Austrian politics. Coming six months after the controversial election of Kurt Waldheim as Federal President, some, particularly British, journalists made good press for their newspapers by painting dark images of a revival of National Socialism and anti-Semitism. In contrast, the German-language press outside Austria discounted any Nazistic flavor to the Haider victory. *Neue Züricher Zeitung* wrote that ". . . it would be false to characterize Haider as a neo-Nazi; it would be equally false to overlook the fact that he did not frighten away the 'never-say-die-ers.' Unfortunately neither of the major parties can reproach him on this." It further observed that the FPÖ kept its liberals with only a few prominent exceptions, and also captured much of the protest vote from the Greens. The somewhat left-leaning *Süddeutsche Zeitung* and *Frankfurter Rundschau* agreed that the Haider victory illustrated a move to the right away from the erstwhile liberalism of the FPÖ, but rejected the interpretation that it represented any increase in Nazi sympathies. The conservative *Frankfurter Allgemeine Zeitung* and *die Welt* of Hamburg agreed that the FPÖ victory represented a conservative trend and rejoiced that young people were finally beginning to reject the bankrupt ideals of the left.

If the end of a forty-one year reign of Socialists in the Austrian presidency and the further decline from the Socialist majorities in Parliament won under the leadership of Bruno Kreisky are what is meant by a "shift to the right," then the description fits. In this sense, the FPÖ success was part of a conservative retreat of many contemporary Austrians from what they regard as the excessively expensive, frequently

inefficient and sometimes corrupt policies of the social welfare state. It resembles similar developments elsewhere in Western Europe and North America and does not represent an upsurge in right-wing extremism any more than do the victories of Margaret Thatcher or Ronald Reagan, both of whom have exploited nationalism, racism, anti-unionism and militarism to an extent not even hinted in the FPÖ campaign. It was also a personal triumph by a telegenic, and boyishly attractive Jörg Haider, who, like Oliver North in the United States, won personal popularity not by the appeal of his ideas, but rather by the image he presented and the passion he evoked.

The opportunity for this victory was, in substantial measure, presented to Haider by the major parties themselves. Pre-election polls conducted by both parties showed a close race with neither likely to win a majority. Thus the two large parties campaigned as if preparing for an ultimate Viennese coalition waltz after the election, an analogy which the cartoonists loved to sketch. In this political dance, Jörg Haider, as the "defender of the little man," was portrayed as the courageous mouse biting the elephants about the ankles. His platform remained the electoral program worked out before the change in the party chairmanship and based on the right-liberal party program of 1985. It demanded the reduction of government controls over the economy and incentives for individual initiative, an end to privileges for party members, more direct democracy and an active environmental program. To these ends, during the campaign the FPÖ floated a tax plan which proposed a drastic reduction in the progressivity of the income tax to be paid for by reducing loopholes in the law and the reduction of State expenditures on social programs. Incentives were to be given to single-income families, so as to encourage women to return to the role of wife and mother. When questioned about the relationship between nationalism and liberalism Haider reiterated the program's liberal emphasis on preserving the basic rights and freedoms of the citizen, expansion of market economy and the promotion of competition and competitiveness; its national component was a commitment to the promotion of the freedom and self-respect of all nationalities within the world order. Although Haider frequently responded to questions of political philosophy with paraphrases of the 1985 program, the most effective aspect of his campaign was not an elucidation of FPÖ proposals, but rather a negative attack on the major parties, and the coalition it was widely presumed they would soon make. This strategy presupposed sufficient weakness in the traditional *Lager* so as to permit significant defections from the major parties in protest against the accumulation of problems neglected by both major parties, as well as by the Steger-led FPÖ. It was a non-ideological campaign, but Haider's past reputation held or recaptured the German-nationalist votes and the lack of any desirable alternatives kept the liberals loyal. In contrast to the dismal predictions before Haider's accession to the chairmanship, the FPÖ not only again captured the somewhat less than 6 per cent average share of the electorate it had held for the past two decades, but added almost another 4 per cent.

These results seem to confirm Kurt Steiner's tentative 1972 conclusion that Austria was being transformed into a mature or *depoliticized* democracy from the *consociational democracy* of the post-war era. In 1945, erstwhile political enemies from the Socialist and Christian-social camps manifested coalescent elite behavior as a means of imposing a new democratic structure on a fragmented political culture, while reverting periodically to at least the rhetoric of class-struggle to mobilize the *Lager* for elections. Bruno Kreisky broke with this pattern and reached beyond the Socialist *Lager* to build an electorate which gave the SPÖ absolute majorities from 1971 until 1983. During this period the mass

political culture became more homogeneous. Politics became identified with personalities and immediate issues and voters began to move across *Lager* lines. The absence of historic, ideological issues in the 1986 *Nationalrat* campaign was reflected in a high degree of voter mobility which saw 34 per cent of the FPÖ supporters decide only in the last two weeks of the campaign and 17 per cent only in final days before the election. *Die Presse* estimated that SPÖ and ÖVP voters had shifted over to Haider in equal numbers and caustically observed: "the fact that 24 per cent of new FE voters were ex-SPÖ voters may even force the foreign media to think again. No rational person could believe that disciplined comrades had become unreconcilable Nazis overnight."

Although the SPÖ-ÖVP coalition that has emerged from the failure of either major party to achieve a governing majority would appear to be a return to the practices of the past, the dynamics of elections are considerably different from those of period from 1945 until 1966. The political culture has become homogenized; party elites no longer coalesce to make a fragmented political culture governable, but rather compete for many of the same votes and coalesce when the electorate finds none of the lesser evils sufficiently attractive to entrust with the sole formation of government. As the *Lager* dissolve, single issues become more important as is illustrated by the emergence of the Austrian Greens and alternative parties, and the Haider victory points to the capacity of a "hot" personality to mobilize the protest vote.

III. The Haider Victory: neo-Nazism or populist opportunism?

To test the thesis that the 1986 FPÖ election victory does not reflect an upsurge in Nazistic tendencies, the remainder of this paper will focus on assessing the degree to which German nationalism, nostalgia for the era of the Second World War, and anti-parliamentarianism as indicators of pro-Nazi sympathy, were used to attract votes and whether they, in any way, direct the political behavior of the party since the election. Subsumed under German nationalism are racism and *Anschluss* sentiment, under anti-parliamentarianism, are totalitarianism, support for the suppression of civil and political liberties for political enemies and indifference or support for the elimination of parliamentary government. Under nostalgia for the era of the Second World War are subsumed the denial or minimization of Nazi war crimes and the glorification of militancy and military service. This list of sentiments was extrapolated from six questions posed by the Social Science Research Association in a 1976 field survey and cross-checked by another three questions in a follow-up survey in 1985 to test the degree to which opinions supportive of the principal features of Nazi ideology are still held by Austrians. Many of the subsumed sentiments simply can not be uttered openly, but may be inferred from support for the test items. In analyzing the electoral strength of the FPÖ in the 1986 election it must be assumed that these data are relevant only for that segment of the electorate that has traditionally voted FPÖ and may not be used to infer the sentiments of former SPÖ, ÖVP, independent and new voters who came to support the party after the succession of Haider. With the FPÖ success in the 1986 parliamentary election so closely tied to its new chairman, it is necessary to evaluate his putative sympathy for right-wing extremism as measured by German nationalism, anti-parliamentarianism and nostalgia for the war era.

German nationalism

Given the background of the FPÖ, it is not surprising that Social Science Research Association data show that German nationalists were more supportive of the FPÖ than any party. (See Table II below.) The reasons why Haider is so often seen as a panderer to Nazi-style, German nationalism lie in a combination of the political opportunism that has marked his entire political career and his choice of Carinthia as basis for his climb to political prominence. Like most of the recent leadership of the FPÖ, Haider comes from a *großdeutsch* family, but became active as a university student in the genuinely liberal party in his home state of Upper Austria. He was part of the movement to liberalize the party program in the 1970's and first attracted public attention in 1976 as one of the liberals who were attempting to force the resignation of former SS-officer Friedrich Peter as party chairman. At this time he was recruited by the Carinthian party chairman Mario Ferrari-Brunnenfeld to come with him to Klagenfurt as party secretary. Once in Carinthia, the youthful Haider quickly learned to pander to right-wing German nationalist elements as a means of mobilizing the political support which made him Austria's youngest member of parliament at the age of twenty-nine and soon the chairman of the state party organization. The issue which enabled him to unseat his former patron as Carinthian party chairman in 1983 and has brought the FPÖ within striking distance of becoming the state's second largest party, was the federal law that in Carinthia requires bi-lingual education in classes where Slovenian children desire instruction in their mother tongue. Since language is at the heart of nationalism, this issue is a good one to analyze relative to the test criterion. When the SPÖ convinced the ÖVP and Ferrari-Brunnenfeld on behalf of the FPÖ to support a progressive, minority rights law, Haider, who had initially supported the legislation, discovered the political popularity to be gained by opposition and became the champion of German-speaking children. At this point, according to Ferrari-Brunnenfeld, Upper Austrian Haider ". . . cozied up to the *Kärntnerheimatdienst* (KHD)," a right-wing, German-nationalist, patriotic organization and ". . . began to sleep in his Carinthian folkcostume." He supported the KHD proposal to eliminate the need for bi-lingual education by placing the Slovenian children in regional schools keeping "Carinthia German, free and undivided." While many have seen Haider's stance on this issue as the tip of a neo-Nazi iceberg, Ferrari-Brunnenfeld believes that he is just an opportunist who will affect virtually any political belief that furthers his career. But "blood and soil" politics, important in Carinthia, play less well or not at all in other parts of Austria. An illustration of how opportunist Haider has already begun to adapt to the needs of his new, federal position may be seen in his compromise with the SPÖ and the ÖVP on the school issue. In the 1986 parliamentary campaign and the months thereafter Haider assiduously avoided German nationalist themes which might have lent support to charges of neo-Nazism. This evaluation is corroborated by a report of an observation team sent by the Liberal International to evaluate whether the FPÖ should be permitted to remain in the organization. The attitude of the team before going to Austria was one of grave suspicion about the political turn taken by the FPÖ with the accession of Haider to the Chairmanship. The investigation confirmed the Liberal International's fears about the lack of liberalism in Haider's FPÖ, but the confidential report also stated: "We have found no evidence of neo-Nazism, fascism or right-extremism in Haider's speeches.

TABLE II QUESTIONS TESTING THE CRITERION OF GERMAN NATIONAL

1.

A breakdown of the responses is as follows: %

- All are equal 42 %
- Some are superior 23
- Some are inferior 16
- Other answers 8
- Don't know 11

1. 2. It was once said: "German-ness will one day solve the problems of the world." What do you think of it? (1976)

- It was once correct 14 %
- It is no longer correct 30
- It has always been nonsense 35
- It is correct 9
- Other answers 6
- Don't know 17

3. If there should be a vote on an Anschluß, as in 1938, how do you think Austrians would decide? (1976)

As before, almost all in favor 5 %

Not as before, almost all against 22

Majority would be in favor 7

Majority would be against 51

Other answers 4

Don't know 12

Nostalgia for the era of the Second World War

Haider's manipulation of the nostalgia issue was also the result of his Carinthian detour on the road from young party staffer in Vienna to party chairman. Some sense for the depth of feelings of nostalgia may be gained from the Social Science Research Association poll. (See Table III below.)

TABLE III QUESTIONS TESTING THE CRITERION OF NOSTALGIA FOR THE ERA OF THE SECOND WORLD WAR

1. What do you think of the following statement: "If Germany had won World War II, it would bein a better position in today's Europe"? (1985)

- True 14 %
 - False 51
 - Don't know 34
-
- 2. Should boys be raised to be peaceable or militant?
 - Peaceable 72
 - Don't know 7

In historically German-nationalist Carinthia, Haider found it expedient to defend the honor of those "who had only done their duty" as German soldiers during the war. As a member of the post-war generation he says that young people have more pressing problems than to argue about *Trauerarbeit*, mourning the crimes of the past. In this sense he not only appeals to the war generation, but to those in the younger generations who reject the need for a sense of collective guilt. As party secretary and later as chairman in Carinthia he had responsibility for the FPÖ newspaper, the *Kärntner Nachrichten*, and did not block stories about "the Holocaust lie," or the publication of complimentary articles about ex-Nazi politicians and military figures who had been convicted of war crimes. Haider denies culpability for these articles and argues that most of the so-called stories, were in fact letters to the newspaper and resemble those written to other Carinthian newspapers as well. His attempts to escape responsibility here lack credibility, but there seems little doubt that now, in a much larger political arena, he is trying disassociate himself from his apologetic image regarding Nazism, while at the same time refusing to withdraw his statements of respect for the soldiers who performed the military service required of them. Haider initially defended Waldheim with his blanket exculpation of veterans who "just did their duty," but when public criticism began to mount in the spring of 1987, Haider's sensitive, political antennae told him that a shift in course was opportune. The situation was ideally suited to his populist style and permitted him to make political capital at the expense of both major parties. Waldheim was, after all, the candidate of the ÖVP and Haider expressed the disappointment of many over the dishonesty of the symbolic head of the country. Haider also expressed the outrage of Austrians of all political colors, who felt betrayed by the Reagan administration's action against Waldheim on the basis of previously known documents which did not prove any guilt, but only cited "concrete suspicion." It was hypocritical, he charged, for the United States, which after all had bombed Dresden and dropped the world's only nuclear weapons on human beings, to assume that all soldiers who fought on the losing side in the war were guilty of war crimes, while at the same time providing asylum for human rights violator Ferdinand Marcus. Finally, he attacked Chancellor Vranitzky for his supplicatory trip to the United States immediately after Austria had been so unjustly humiliated.

Anti-parliamentarianism

Anti-parliamentarianism is the one test criterion of which Haider can not be accused, although a

substantial segment of the traditional FPÖ electorate appears to hold totalitarian views. (See Table IV below.) Activity in or around both federal and state

TABLE IV

QUESTIONS TESTING THE CRITERION OF ANTI-PARLIAMENTARY SENTIMENT

1. What should be done with dangerous political political opponents?

(1976)

- Imprison them 20 %
- Bring them to their senses by putting them under pressure 9
- Banish them 16
- Not worry about them 10
- Try to persuade them 30
- Other answers 9
- Don't know 6

2. If any part of the population or any organization were to try to abolish Parliament, what would you do?

(1985)

- I wouldn't care 11 %
- I would take action against this group with all the means at my disposal 35
- I would be against it, but would not get involved in the fight 40
- I would support all those who would abolish parliament 3
- Other answers and don't know 12

- 3. Is it better for a nation if one important politician determines what is to be done, or is it better if many citizens participate in the decision and discussion? (1976)
 - One person should determine alone 21 %
 - Many should participate 64
 - Other answers 10
 - Don't know 5

parliaments has been the central focus of Haider's political existence. If he has not been critical of the system, he certainly has been disparaging of its practice in Austria. Coalition politics, including those of his own party, are seen as built on compromise by party elites on behalf of themselves and the

bureaucrats they appoint and against the interests of the people. Haider ran his 1986 campaign against the probable coalition that would produce a "Red-Black Unity Party" and he promised to seek a coalition with the people expressed through the vigorous use of citizens initiatives to force reform on the coalition. Thus the FPÖ is to function as a "control party" through its criticism of coalition policies in parliament and by mobilizing a broad array of single-issue constituencies against the "*Demokrat*" of the grand coalition. Unencumbered by the burden of maintaining reasonable levels of employment while at the same time reducing the federal debt by the reform of nationalized industry, the FPÖ is free to mount populist attacks on "government by compromise." Haider is unsurpassed in present-day Austria as a popular, demagogic orator and the FPÖ can expect to continue to find support on environmental issues, political favoritism, inefficiency in government and nationalized industry and the like.

In conclusion, the question must be raised whether the FPÖ is now on the threshold of becoming a third major party or whether the 1986 victory was just a transitory phenomenon. Haider's victory was fashioned out of equal parts of German nationalism, liberalism and populist protest. For the future however, the party has no real need for a nationalist agenda. 1986 voter exit polls revealed that the FPÖ surprise victory was substantially built on the protest vote, mostly of people under the age of 45 who had experienced their political socialization in the years following independence. One-third of the under-30 cohort and 45 per cent of the 30-45 year-old age group cohort voted for Haider. This contrasts starkly with a pre-election analysis of the influence of generation on electoral behavior that showed only 3 per cent of the sample from these generations inclined to vote for the FPÖ. While this analysis states no firm correlation between age and values, it strongly implies that political values are significantly conditioned by the era within which a voter becomes politically conscious. It may therefore be concluded that nationalist issues such as whether Austria is a nation or is a constituent state of a larger cultural Germandom are becoming increasingly irrelevant. Similarly, anti-semitism as a subset of the German nationalist category is self-defeating. A recent opinion poll has shown strongly anti-semitic opinions held by only 7 per cent of the general population and a broad public rejection of politicians who would exploit such views. This contrasts markedly with the 24 per cent strongly inclined towards anti-semitism in 1973. The statistical decline suggests that, precisely in the under-45 age cohorts which voted in such large numbers for the Haider-led FPÖ, anti-semitism has no popular appeal. Even the Slovenian-school problem, which must certainly be seen in nationalist and racist terms, is a modern issue of a type similar to the rejection of bi-lingual education in Los Angeles and the English-as-an-official-language movement making headway across the United States. On this matter the FPÖ accepted a compromise that is far less right-extremist than policies being implemented today in areas of the United States where the Hispanic population is rising. Nationalists will continue to vote for Haider because of his past credentials and his continued ability in speeches to stroke resonant strings in "German hearts." What they do not realize is that Jörg Haider was never really a traditional German nationalist anymore than he was, and is again, a liberal. He has always been a political chameleon willing to don which ever suit of ideals is opportune. For the moment, in order to hold the votes of those whose political socialization has occurred first in an era of rising prosperity, democracy and Austrian state independence and now of high federal deficits and environmental threats, it appears that the FPÖ is fashioning its appeal on issues other than those subsumed under the category of German nationalism.

Although for different reasons, the FPÖ's liberal agenda is also empty. Haider's past support for liberal

programmatic development and continued lip service to the 1985 program was sufficient to retain all but the most embittered Steger supporters in the party. The substance of this liberalism consists of little more than hollow phrases of support for the little man and pious encouragement for individual achievement in the face of the leveling and oppressive social welfare state. Nevertheless, given joint ÖVP-SPÖ responsibility for managing nationalized industry as well as the stigma that will ensue from the inevitable layoffs resulting from rationalization measures, FPÖ criticism and sloganeering can be expected to find a sympathetic response in the electorate.

For a politician with political antennae as sharply tuned as those of Jörg Haider, the message of the 1986 elections must be clear. The recovery of lost German-nationalist voters and the retention of most FPÖ liberal voters would have produced, at best, two-thirds, of the vote total. The new and perhaps transforming element of the FPÖ success in 1986 was Haider's ability to mobilize the protest vote. It came in part from new voters, but also from the growing reservoir of swing voters, mostly under the age of 45 and relatively unencumbered by a *Lager* political mentality. Many had voted for the charismatic Kreisky, but were lost by his ineffectual successor Fred Sinowatz and not recaptured by Vranitzky. If the ÖVP, as the major alternative, continues to be unable to find an attractive leader, then the FPÖ could well parlay its advantage as an opposition party in a time of relative social-economic difficulty into voter support that would turn it into a third major party occupying a position from the right center to the right of the political spectrum. Its anti-big business, anti-big labor stance won strong support in the west and particularly in the rural tourist areas and service-oriented sectors of towns and cities. But in every *Land* the Haider-led FPÖ improved over

the performance of 1983, even in the "eastern liberal" citadels of Vienna and Lower Austria. A surprising number of workers even voted for the FPÖ, undoubtedly reflecting anxiety stemming from Socialist Chancellor Vranitzsky's cutbacks in the huge VOEST concern.

Given the tenacity of the current problems and the difficulty the coalition is having reaching agreement on solutions, the FPÖ may well continue to prosper either as a voice of protest against the coalition or as a balance on the political scale in an open parliament should the coalition founder. While this would not necessarily make the FPÖ into a party of the center between the SPÖ and ÖVP, it would create the opportunity for it to become a major, pluralistic party that speaks to current issues on behalf of a broad range of Austrians.

To put the 1986 electoral upsurge of the FPÖ back into historical perspective, there are certainly some parallels and a thread of continuity with the rise of the NSDAP in Austria. German nationalist sentiment and anti-semitism are more prevalent in the FPÖ than they are in any other Austrian party and its anti-big business, anti-labor rhetoric is also reminiscent of the populist appeal of early Nazism. But the populism of Haider is not that of Hitler and the 1980's are not the 1930's. Austria has become a mature democracy and the issues which Haider has to exploit to make himself more than a figure of transitory significance must appeal to values that are incompatible with traditional Nazism. But apathy, the splintering effect of single-issue constituencies, and the increasing importance of media personalities as the negative hallmarks of mature democracies make Austria no more susceptible to populist extremism than other democracies in Western Europe and North America. In a time of crisis, the demagogic,

telegenic Haider could emerge as a major political force in Austria. But just because he was born in Austria and speaks German should not make him more dangerous or feared than men or women of a similar cut from France or Great Britain or the United States.

From the " World Socialist Website" wsws.org

By Ulrich Rippert

13 March 1999

Last Sunday voters went to the polls in three of Austria's nine states (Kärnten, Tirol and Salzburg). The Austrian Freedom Party (FPÖ) of Jörg Haider, which employs racist and neo-fascist slogans, increased its vote in all three states. In Kärnten, the southern-most state of Austria bordering Slovenia, the increase was exceptionally large. There the FPÖ vote rose by 8.8 percent, giving the party 42.1 percent of the total, the first time it has gained the largest single party vote in a state election.

The FPÖ pushed the Social Democratic Party (SPÖ) into second place, with 32.9 percent--a 4.5 percent loss. For years, Kärnten was counted as a social democratic stronghold and the SPÖ played a key role in state politics. Up until 1989 the state president was almost always a social democrat. The conservative Austrian Peoples Party (ÖVP), from whose ranks the state president has come more recently, lost 3.1 percent of their vote, despite doing fairly well in the opinion polls before the election. Their total of 20.7 percent was less than half that of the FPÖ.

According to information from the Austrian polling institute SORA, voter movement was much stronger than usual. An exceptional number of former social democratic voters (26,000) cast their ballot for the FPÖ instead, with another 8,000 coming from the Christian democratic ÖVP. Dissatisfaction with both the social and Christian democrats, who have dominated federal politics in Vienna for over 13 years, ruling in a grand coalition, was abundantly clear. In the past voters tended to switch between these two parties, and this was generally the pattern reflected in Tirol and Salzburg: the SPÖ gained in urban Salzburg, whereas in the rural areas and tourist centres of the Tirol it was the conservative ÖVP.

In Kärnten, where Haider stood as a candidate and the FPÖ concentrated its campaign, the right-wing extremists were able to benefit from growing social and political protests.

By the evening of the election, the SPÖ state chairman, and their lead candidate in the elections, had resigned. The former state premier Christof Zernatto (ÖVP), faced with an electoral debacle for his party, made it clear that he would not be putting his name forward as the next state prime minister. This means the road is open in Kärnten for Haider to take the post.

Kärnten is a small state with just half a million voters. However, the election result sent a shock wave throughout Austria and caused uproar internationally. It can no longer be excluded that the neo-fascist Freedom Party may become the strongest single party in Austria in June's European elections, and could even emerge as the victor in the federal elections this autumn.

Once already, in May 1989, Haider held the reins of power in Kärnten's capital Klagenfurt. However, at

that time the SPÖ was the largest party and the FPÖ was only able to overn in a coalition with the Christian democrats. Nearly two years later, Haider was forced to resign after expressing his public admiration for Adolf Hitler and praising the "Nazi's employment programme" as a "model".

He then pursued his career at the federal level. In 1993 he initiated a referendum "Austria First!", which called for the rigorous expulsion of foreigners and asylum-seekers as part of a sweeping campaign against Austria's "überfremdung" (literally, "swamping with foreigners"). He systematically diverted the growing fear of rising unemployment and social decay into extreme right-wing, racist channels.

The recent election victory in Kärnten was also surprising because just last year the FPÖ was in a deep crisis and Haider had only been able to cling onto the leadership with great difficulty. As in other European parties of the extreme right, violent internal clashes had nearly led to the disintegration of the FPÖ. Following certain dark dealings and swindles, the party's former economic expert Peter Rosenstingl fled to Brazil, taking millions from the party coffers with him. Another leading member was found guilty of conspiracy to commit tax evasion.

Haider, who had often accused the other parties of corruption and dirty dealings, now faced the same criticism. He was forced to admit that his family had made its millions from the Nazi policy of "arianisation". One of his great uncles used his position in the Nazi party in order to take control of a Jewish widow's possessions. The 30 million deutsche mark inheritance was able to bypass the taxman, and came into Haider's ownership in 1986. The self-proclaimed "champion of the little man" has since belonged to Austria's wealthiest elite.

In the face of internal criticism and inner-party disputes, Haider threatened several times to resign and withdraw from politics altogether. He hoped that the election in Kärnten would provide him with ammunition against his inner-party opponents. Even he was surprised at the scale of his victory. He told the press that he had expected to gain votes but had not thought the FPÖ would tally over 40 percent.

A similar political development can be observed in Austria as has been witnessed in other countries. The anti-social policies of the larger established parties--the social democrats and conservatives who had determined the fate of the country for many years--come more and more into conflict with the great majority of working people. Under the conditions of political crisis and paralysis in the working class, a political vacuum ensues that right-wing parties and groups can exploit, despite their own divisions and lack of orientation.

It is no accident that the racist demagogues have found support in Kärnten, where the social and political problems of Austria are concentrated most strongly. Unemployment is above average and the social crisis is most pronounced in this region with a weak infrastructure, and characterised by small-scale farming and tourism. The widening gulf between rich and poor is there for all to see. While millionaires swank about around (lake) Wörther See, and build opulent villas and castles in the other tourist centres, the European Union's agriculture policy is forcing more and more small farmers to abandon their holdings, facing entire families with ruin.

As well as whipping up racism, Haider very consciously stressed the social questions in his demagogic election speeches. He demanded that factories with more than 20 percent foreigners in their work forces should lose all state subsidies. He combined his well-known rabble-rousing against the European Union with the call for a guaranteed existence for farmers in the form of a "jobs premium". Families and single parents should receive more support, including state benefits. Symbolically, he distributed "family cheques" and promised a minimum benefit payment up to the age of six for every child. Moreover, he called for a drastic lowering of rents and for mass tax cuts. How he would finance his proposals was not spelled out. In any case, these promises were made to be broken.

There are also historical reasons why Haider did well in these elections, and in previous ones in Kärnten. There is still a strong Slovenian minority in southern Austria. In eight of Kärnten's districts, Slovenian is the second official language. Even before Haider there had been many racist attacks on Slovenians in Kärnten. In 1920 a referendum was held to determine whether south Kärnten, the area around Klagenfurt and Villach, should become part of Yugoslavia. This provoked a strong German nationalist opposition that instead called for Anschluss (union) with Germany. Even before the vote was taken, violent battles fomented by the so-called "defence force" ensured that there was no question of the area joining Yugoslavia.

In the 1930s the Nazis were able to rely on this pro-German nationalist grouping, while Italian and Yugoslavian anti-fascists had to operate illegally in this area. After the war, these contradictions remained. The veterans of the anti-fascist struggle gathered inside the Communist Party. On the other side, many Nazi thugs hid away in Kärnten.

To counter the influence of the Communist Party, the social democrats also encouraged racist sentiments against the Slovenian minority and rested on German nationalist traditions. In the "Ortstafelsturm" (name-sign storm) of 1972, under social democratic state and federal governments dual-language street name signs were forcibly torn down, even though the Austrian constitution of 1954 obliged the provision of such signs. The signs have still not been replaced in some districts with a high percentage of Slovenians.

Haider has invented nothing new in Kärnten. In the past, the racism of the social democrats was hidden behind a thin façade of "social partnership". The end of this policy means that the social democrats are revealing their true colours. The social democrats could prevent Haider from becoming state premier by refusing to support him in the state legislature, where he would need a majority to enter office. But they do not want to do this. Instead, they are preparing to collaborate with him at the federal level. They are politically confounded and are striving to channel Austria's growing social conflicts in a racist direction.

Social democratic opposition to Haider consisted of making him superfluous by adopting his slogans. The policies of the two parties continued to merge. Increasingly, social democratic politicians came to applaud Haider. The mayor of Wolfsberg in Kärnten, Gerhard Seifried, said on the election eve that Haider had "proved to be the best social democrat". He became the first SPÖ politician to openly call for Haider to become state premier. Others then followed.

Despite certain exceptional circumstances in Austria, the election must be seen in the context of contemporary European and international relations. The coming to power of social democratic governments throughout much of Europe was an expression, if a limited one, of a mobilisation of the working class against the worsening attacks of the conservative governments on social conditions. This immediately created a political crisis in the ranks of the right-wing extremists. As these social democratic governments continued the anti-social policies of their conservative predecessors, and went even further, political frustration grew, providing the right with new impetus.

To prevent this requires a reckoning with the policies of social democracy and the building of a workers party that will not leave the social questions to the right-wing demagogues.

Haider's Reach for Power

by

Max Riedlsperger (Cal Poly State University SLO)

Prepared for the the 1999 meeting of the German Studies Association

Atlanta, Ga. 8. October 1999

Introduction

The title of this paper and the question posed by this magazine cover refer to FPÖ-Chairman Jörg Haider's claim that he should be elected head of government (*Landeshauptmann*) in Carinthia if his party were to capture a relative majority in the 7. March *Landtagswahl*. Simply the fact that Austria's leading newsmagazine would pose the question indicates the controversy surrounding his person. For most of Austria's literati, artists and intellectuals, the answer to the question on the cover of *profil* was clearly no! As Jennifer Michaels will note in her paper to follow, "there is little love lost between contemporary Austrian writers and Jörg Haider," and, I might add, the feeling is mutual. The reasons are too complex to be explored in any depth here, but some of them lie in deep and contentious differences over history and the way in which Austrian identity is perceived. The observations of the Trieste *Germanist* Claudio Magris are to the point. Writers, according to Magris, have embraced the idea of a "hinternational" Central Europe, "nowadays idealized as the harmony between different peoples ? of the Habsburg Empire, a tolerant association of peoples understandably lamented when it was over ?." While recognizing a certain legitimacy in this view, he notes that it was rooted in myth:

? in some measure a makeshift ideology, arising from the failures of Austrian policy in Germany. Incapable of bringing about the unity of Germany, the Austria of the Habsburgs sought a new mission and a new identity in the supra-national empire, the crucible of peoples and of cultures --- the "hinternational Danube basin." Writers almost always, tend to see only the "hinternational Danube," while historians also take account of the German-ness of Danubian Austria, with the Rheingold often gleaming in the blue Danube. The Austro-German outlook does not simply mean German nationalism: at certain moments in history -- it has indicated identification with the culture, which appeared likely to bring progress.

This latter view, of itself, is not racist, but it does see German culture as central to the integration, civilization and perpetuation of ethics and values for Central Europe. Following the collapse of the old Habsburg Empire in 1918, virtually all the political and cultural elites saw Austria as a part of the cultural German nation even if the victorious Allies prohibited the realization of a true, "greater

German" nation-state. Even the Nazi take-over of Germany did not end this view. Some simply saw Austria as the "better" German state, while others longed for inclusion in the "greater German Reich." The experiences between the *Anschluss* in 1938 and 1945 ended any illusions or desires for unity within a political German nation, but as late as 1956, the first poll on the question of identity showed 46 per cent identifying Austrians as part of the German ethnic, linguistic and cultural community.

The general ideological conflict described by Magris describes one of the fundamental reasons for the antipathy between the contemporary Austrian literary community and Haider. For writers, the "hinterland" is now the multicultural view while those of Haider and his FPÖ are contemporary iterations of the Austro-German outlook. Many of today's literary elite are of the student generation that revolted against the "Establishment" represented by the government of ÖVP-Chancellor Josef Klaus (1966-1979). To be Left and radical was chic, and the 68-er reveled in their "anti-Establishment" status as a kind of political "Other." In 1970, however, came a major transition, when Socialist Party-Chairman Bruno Kreisky became Chancellor. Kreisky was a darling of the 68-ers. To be sure, he was not of their generation, but as a Jew, even if one who had declared this inconsequential, and as a fighter against the "clerical-fascist" government of the 1930's and then a refugee from Nazism, Kreisky personified "the Other," both ethnically and politically. Under Kreisky, some of the 68-er became apprentice politicians while their friends took up junior positions in the schools, universities and the media and began their "march through the institutions" of the society. This was the "golden Age" of the Second Republic with a prosperity that afforded social-welfare benefits for everyone, including a rich and heavily subsidized cultural life. Many of the writers, artists and intellectuals who benefited, extrapolated, from what Magris describes as the "idealized harmony" of the Habsburg Empire, a model for the Second Republic that would be elevated and enriched by the contributions of the new "Other" who immigrated into what had been a largely German Austria. This pedagogic goal is described in an article in this year's *Contemporary Austrian Studies* as a manifestation of the motives of Kreisky and the *Linksintellektuellen* who rose to prominence under his leadership and the unbroken string of Socialist Chancellors who have succeeded him. Expressing the Austro-Marxist concepts of the 1930's,

?, the intellectuals first designed a leading role for themselves: only they provided the allegedly "scientific world view?." From this knowledge and the circumstances of the general unawareness and unpreparedness of the proletariat for their historical role resulted the second role of intellectuals: *the position of educators?*.. In the concept of the left intellectuals the attempt to create a synthesis between the intellectuals and moral leadership was realized: the intellectuals as educators acted no longer as mere articulators of the conflict, but also as the political "solution."

One of the goals of these writers-as-pedagogs was to end the myth of Austria as the victim of "Hitlerite aggression" as proclaimed by the expedient 1943 Moscow Declaration of the Allies and to force Austrians to acknowledge the factors that had led them into enthusiastic support for National Socialism and made them its willing agents. Without question, one of the most important factors had been the goal of *Anschluss* as a means of completing German national unification. While no one any longer expressed this hope, there were those who still insisted that they were part of the German ethnic, linguistic and cultural community. These problematic Austrians have been portrayed by modern writers as reactionary

provincials, nostalgic Nazis and neo-fascist right-wing extremists. A recent example of this attitude that has now become known as "*antifa*" is *Wiener Blut*, chosen by *Burgtheater* Director Claus Peymann as one of his last shots against the philistines of Vienna. In the words of the playwright Johann Kresnik: "Just a bunch of murderers, suicides and people in despair who don't know what they are supposed to do. That is Austria. That is *Wiener Blut*."

For the *Linksintellektuellen*, whether in politics, academia, the media, literature or the arts, Haider is a right-extremist whose success is rooted in his successful appeal to the kind of society that is portrayed by Kresnik and others. Some of the reasons are:

- The Nazi background of Haider's parents, his own early enthusiasm for German cultural nationalism and his purported nostalgia for National Socialism.
- Haider's support for traditional (read German-Austrian) values, his antipathy towards multiculturalism and his view that immigration is one of the major causes of the decline in the civility of modern society.
- Haider's drive to reduce the social-welfare state along with its generous subsidies to the press, literature and the performing arts, particularly the *Burgtheater* of Claus Peymann and the contemporary writers whose works he promoted.

In contrast, in a number of papers at GSA meetings, published articles and chapters in books, I have argued that the "Haider Phenomenon" was made possible by the erosion of the old *Weltanschauung*- or *Lager*-based political appeal with which Austrian parties had traditionally mobilized their electorates. Haider has understood how to exploit these changes and has transformed the FPÖ from a tiny German-national *Lager*-party that his predecessors Friedrich Peter and Norbert Steger had been trying to return to its liberal roots into a modern, radical, right-populist party at virtual numerical parity with the traditional parties that have dominated Austria since 1945.

The Haider-FPÖ is, to be sure, right -- first of all, because it is relentless in its opposition to the "Lefties" of the media and the academic, artistic and cultural "Establishment" and the "Reds" of the SPÖ. It demands a change from the SPÖ-ÖVP coalition that has stood since 1986 and the unbroken string of Socialist chancellors since 1970. It is radical in much the same sense that the U.S. Republicans were in 1994 when they touted a "New American Revolution Revolution." Haider even reworked Newt Gingrich's "Contract with America" as a "Contract with Austria" and studied Governor Pete Wilson's anti-immigration measures in California. In an essay for *Contemporary Austrian Studies* I explained my reasons for differentiating between what I see as the modern radical-right-populism of the FPÖ and the view that has been developed by *Dokumentationsarchiv des Österreichischen Widerstandes* (DÖW) which essentially contends that the Haider-FPÖ is a right-extremist reincarnation of the NSDAP. Since the DÖW position is widely accepted by the media, in academic and cultural circles as well as within the SPÖ, I was pleased to find that my view was paralleled by the eminent British historian of Austria, Peter Pulzer, in his review of the DÖW *Handbuch des Österreichischen Rechtsextremismus* in the same issue of *Contemporary Austrian Studies* where I made my case.

To be sure, Haider has made comments that give ammunition to those who portray him as a neo-Nazi, or at best as an apologist for Nazism who lacks remorse for its crimes and sensitivity for its victims. These "slips," they assume, reveal the "true Haider" who has been successful because he strikes pro-Nazi chords deep in the hearts of the many Austrians. In contrast, I believe his success has been not because of what he said, but rather because his disdain for the "political correctness" of his critics is widely shared. A substantial body of research shows that electoral support for the FPÖ has grown because it gives critical voice to modern concerns that a growing segment of the public feels have been ignored or mishandled by the "Tweedle-dum and Tweedle-dee" coalition of what Haider calls the "SPÖVP *Einheitspartei*." Haider is an unusually astute populist and as such is always ready to change. He is a moving target and his enemies have failed to move their sights to keep up with him. The consequence is that their continuing reminders of "slips" long past have become irrelevant and increasingly, people have come to question whether Haider's past political incorrectness is any reason to bar him from governmental responsibility. In Carinthia, this past March, voters answered the question posed by the *profil* cover with a convincing yes and at the same time, in elections in Tyrol and Salzburg, continued the trend in protest voting that has been characteristic of the period since 1986.

These three election campaigns gave me my first opportunity to test my past evaluations of the party which had been based on printed sources, interviews and video against the actual behavior of FPÖ politicians in their rallies in the *Gasthäuser* and in their one-to-one contacts with people in the streets. I assumed that if the "antifa" critics of the FPÖ were correct, I would see evidence of right-extremism in the numerous meetings I attended. These included a regional strategy meetings of local precinct leaders, a number of *Gasthaus* speeches with question-answer sessions to one large rally with over 500 in attendance. I found no evidence to compell a revision of my earlier analysis and the election results seem to have moved significant numbers of politicians and journalists to a similar position.

The *Landtag* Elections of 7. March 1999

The Background:

Since 1989, "Super Sunday" elections have been held at five year intervals for the state parliaments in Carinthia, Salzburg and Tyrol. Given my title and the fact that the stunning FPÖ success in Carinthia gave Jörg Haider the power to organize the government and claim the prize of *Landeshauptmann* there, this paper will focus on that election and its immediate consequences. The other elections are, however, also important and not only because my goal was also to gain impressions about the FPÖ as a whole. Since they involve three states at one time and particularly because they are in Alpine Austria, well-removed from the dominance of Vienna, they have acquired more than just a provincial significance. They are particularly important this year as a possible harbinger of the Federal Parliament election that will take place the Sunday before this conference. For these reasons, I will begin with a short summary of the elections in Salzburg and Tyrol before turning to Carinthia. Although the circumstances in each state were different, common issues in all the campaigns were the following:

- **Unemployment.** Consistent with its positions on immigration and the demands to limit public

spending, even before the election campaign, Haider had proposed that foreigners unemployed for more than three months be expelled from Austria. The FPÖ seized upon the report of record unemployment of among foreigners in January 1999 and made this a campaign issue in all the March elections.

- **The Eastern Expansion** of NATO and subsequently the EU was portrayed as a danger that would increase the problem of cheap labor and would price Austrians out of jobs.
- **Rising Crime** and the abuse of public assistance were blamed on illegal immigrants.
- **Tax Reform** proposals focused on the FPÖ plan for a flat-tax.
- **Favoratism**, patronage, corruption, inefficiency and the waste of tax-money have long been part of the FPÖ populist appeal. In these elections the FPÖ laid these problems at the door of governments dominated by the same parties since 1945 and loudly asserted the need for a change.

Unlike Carinthia, Salzburg and Tyrol had to do without the energetic campaigning of Haider who helped so much in 1989 and 1994. With Haider's involvement limited to the opening rallies, the media widely predicted FPÖ losses in these states.

Salzburg:

Background:

Salzburg has always been a citadel of FPÖ support, averaging 12.77 percent of the electorate in state elections over a period when the party was barely above the 5 per cent barrier in federal elections. In the March 1989 *Landtag* election, the Salzburg FPÖ was an early beneficiary of the "*Haider Effekt*," almost doubling its voter share with a total of 16.37 per cent. In 1992, Haider carried out what has been called the "*Knight of the Long Knives*" against the "*old guard*" state leadership and won the election of his own man, Karl Schnell, a youthful, aggressive physician from Saalbach who became a willing executor of his policy of "*total opposition*." In 1994, the party won 19.5 per cent of the vote and for Schnell a seat in the state government under the system of proportional representation then in effect. By 1997, the FPÖ had reached 28-30 per cent in the polls giving reason to believe it might become the second largest party in the state in the 1999 election. Then, however, a crisis struck that made even stasis look optimistic by the time the campaign began. The problems started in October of 1997 when Schnell was accused of complicity in the theft of data on immigration from the computer of SPÖ-Chairman Buchleitner. Schnell had long been a thorn in the side of the SPÖ, exploiting his position to attack Chancellor Vranitzky's government in Vienna as well as to conduct a "*muck-racking*" campaign against the ÖVP leadership of Salzburg. The SPÖ had moved several votes of no-confidence to remove him, but without success. This time was different. Anticipating the need for SPÖ cooperation in the future, ÖVP-Chairman and head of government Franz Schausberger supported the SPÖ vote of no-confidence in what amounted to a coalition to expell Schnell from the government. Schnell's unlikely direct involvement in the petty crime was certainly not the reason. Even *profil*, which is usually hostile to the FPÖ, speculated that Schausberger had gone along with the SPÖ in return for its support of a his proposal for a constitutional amendment to replace proportional representation in state government with majority rule. Given the probability that the ÖVP would not win an absolute majority in the March 1999 election, Schausberger

seemed clearly to be firming up relations with his likely coalition partner.

Although the case against Schnell in the computer-theft matter was dropped for lack of evidence in May, 1998, the scandal created the opportunity for an attack on his leadership. The "old guard" who wanted revenge for the 1992 purge found common cause with some members of the state parliament fraction who wanted to end Schnell's version of Haider's politics of "total opposition" and work constructively with the ÖVP. Schnell supporters go so far as to see the fine hand of the ÖVP behind the challenge. The bickering tore the party apart throughout the first nine months of 1998 making the prospects for March 1999 election look bleak. Under heavy pressure from Haider, Schnell finally resigned in April throwing the party into a virtual civil war that was resolved only when Haider sent a "Diktat" via his two "King-Cobras," Gernot Rumpold and Susanne Riess-Passer to end the crisis. Rumpold and Riess-Passer degraded all but one of the 700 party functionaries to simple party members and took over temporary control of the party themselves. "That is the beginning of the end for Jörg Haider," *profil* reported one disgruntled functionary to say. This, added to internal crises in Tyrol and Carinthia had already made 1998 an "annus miserabilis" for Haider when a financial scandal broke involving FPÖ member-of-parliament Peter Rosenstingl. Polls showed the FPÖ at a three year low of 21 per cent at the federal level and the fractured Salzburg party was projected to win only 17 per cent in the March 1999 election. In Salzburg, new functionaries were elected at the precinct level and preparations made for a state convention in September to restore order. In the meantime, Haider, who had been rumored to be backing one of the dissidents, returned to his support of Schnell after the latter had made his trip to Canossa at Haider's estate in the Carinthian *Bärenthal*. Although the dissidents continued to criticize Schnell down to the eve of the convention, most of them did not appear for the show-down on 21. September in Saalfelden. With the blessing of Jörg Haider who flew in by helicopter to dramatize his support, Schnell was reelected state party Chairman with 82.2 per cent of the vote.

The Campaign:

As in every Salzburg *Landtagswahl* since 1945, the issue was how large the ÖVP majority would be. Franz Schausberger had taken over as ÖVP-Chairman and head of state government in 1996, two years after his predecessor had led the party to its worst (38.6%) showing ever. In order to increase his margin of victory and therefore ÖVP strength in the coalition with the SPÖ that was widely anticipated, Schausberger tried to mobilize all anti-SPÖ voters behind the ÖVP. Raising the specter that the "Reds" might try to make a coalition with "the blue enemy that besoils the state," he argued that a vote for the FPÖ would be wasted.

While suggesting that cooperation with the FPÖ-dissidents might be possible, he argued that a party headed by Schnell would never be allowed any governmental responsibility. In this campaign of personal smears, the FPÖ depicted Schnell as the candidate whose influence could not be bought. Schnell, with virtually no media presence, traveled through record winter snows to walk the streets and troop through butcher-shops, bakeries, stores and other businesses to make his case as the candidate of "the little man." Taking advantage of the fact that elections for town councils were also scheduled for 7. March, Schnell piggy-backed his appearances on to rallies for local FPÖ candidates. At the rallies I observed, he was not only *per-du* with the local candidates, but appeared to make close personal contact with the curious who

turned out. His message was everywhere the same: the permanent ÖVP government of Salzburg, now under the arrogant "Professor" Schausberger was mismanaged, wasteful and corrupt and ignored the interests of the people. The only evidence of that which the "Antifa" typically uses to impute anti-democratic or neo-Nazi characteristics to the FPÖ was the issue of foreigners. In the rally with more than 1000 in attendance that opened the campaign, Schnell echoed the Federal-FPÖ position stating "that the city and state of Salzburg do not need any new foreigners."

In the functions I attended, and these included two major *Gasthaus* rallies for Schnell, a forum for town council candidates, a strategy meeting of *Bezirksleiter* in Pinzgau and two walking tours with candidates through shopping districts, on only one occasion was the foreigner question a major issue. It arose when SPÖ candidates for the town council in Saalfelden attacked an article in an FPÖ campaign newspaper which criticized the policy they had pursued in allotting spaces in the communal Kindergarten for children below the age of five. The FPÖ article asked:

"Did you know preference must be given ...

1. to the children of foreigners so that they will learn German
2. to the children of welfare recipients so that they escape their poor social milieu and are gotten off the streets
3. to the children of single mothers and only then
4. to the children of the married couples of Saalfelden."

For this, mayorial candidate Hannes Jäger was accused of anti-foreigner racism. He angrily responded that it was not he and his party that discriminated on the basis of race, but rather the SPÖ-council majority which had established the priorities. I subsequently suggested to Jäger and independently to other *Gemeinderat*- and *Landtag*-candidates that perhaps these were precisely the children who needed this kind of early-schooling the most and that this stance was strongly reminiscent of the "Austria first" initiative of 1993 that had been so widely condemned as xenophobic and racist. To a person, these candidates responded that they had nothing against the hard-working foreigners who, over the years, had integrated themselves into Austrian society. They were, however, highly critical of what they call the "SPÖVP Unity Government" in Vienna for failing to deal with the allegedly many hundreds of thousands of illegal immigrants who had "submerged" into Austrian society. The legitimacy of this concern was given credibility by the figure of almost 20,000 would-be immigrants reported by the Minister of Interior to have been captured trying to illegally enter the country the previous year. Beyond this, the FPÖ exploited resentment against recent refugees who had stayed on in Austria at public expense rather than return to their homes once order had been restored. A doubling of the applications for asylum produced by the crisis then developing in Kosovo added to the fact that of the 95,000 Bosnian refugees who had come to Austria, 65,000 had stayed provided immediacy to this FPÖ campaign issue. An article in the party newspaper criticized the SPÖ of a conscious policy of making Vienna into a "multicultural city of immigrants?". As a consequence, Vienna, with thirty percent, already has the highest percentage of foreigners in Europe and is losing its identity."

The foreigner issue was also near the surface in other themes of the FPÖ campaign in Salzburg as well as in the campaigns in Tyrol and Carinthia:

- **Unemployment**. In addition to linking the unemployment problem to foreigners, the Salzburg FPÖ charged the Schausberger regime with responsibility for 1,250 bankruptcies during his two years in office and challenged the rosy economic picture being painted by the ÖVP by contending that that real unemployment was the "highest in decades."
- **The "Sell-Out"** of domestic banks, businesses and industries to foreigners was reputed to have exacerbated the unemployment problem.
- **The Eastern Expansion** of NATO and subsequently the EU.
- **Rising Crime** and the abuse of public assistance were blamed on illegal immigrants while Salzburg's intellectual and political elites simply covered up the evidence. The danger was, the FPÖ asserted, that without knowing what was going on, the public was simply accepting a higher level of criminality.
- **Other issues** were consistent with the FPÖ effort to portray itself as the party to reform the excesses of the welfare-state. Schausberger was criticized for wasting money on unnecessary mega-projects, for drawing a salary that was approximately 90% of that of President Clinton, the practice of awarding highly paid jobs to political cronies, too much welfare for "social-parasites," and too little for seniors, single-mothers, families, etc. Schnell proposed that all members of the state legislature who either retired or were not returned in the election voluntarily give up their right to a separation payment. All FPÖ-candidates took a pledge to abide by this in an attempt to imply that those in the other parties who didn't were guilty of taking advantage of their political positions. Although not really a state issue, the party's flat-tax proposal was introduced in an apparent effort to start the federal parliamentary election campaign early.

At the rallies I attended, the ticket-leader for the local town council began the meeting, introduced his team and addressed the local issues. He then introduced "Charlie" Schnell" who blasted the Schausberger government using quotations from the *Salzburger Nachrichten* to document his points, e.g. an article about a prostitute who who been receiving welfare. In the last week of the campaign each precinct put out a flier with its own message on the back, while on the front there appeared a picture of Schausberger and Buchleitner with SPÖ-Chancellor Klima. The text pointed out that two Salzburg candidates had engineered the expulsion of Karl Schnell from the government on bogus grounds and then amended the constitution to eliminate proportional representation in the state government. Using the picture to imply that the ÖVP and SPÖ had already agreed on a post-election coalition without bothering to wait for the decision of the voters, the flier urged Salzburg citizens to vote for Karl Schnell and his team as the only protection against this "arrogance of the mighty."

The FPÖ candidates and functionaries with whom I spoke exhibited enormous enthusiasm for "Charlie" Schnell and those who attended his rallies responded with the kind of indignation that his populist diatribe against Schausberger would be expected to elicit among those who would turn out for such an event. Among the general public, I found little enthusiasm for Schausberger and significant agreement with the FPÖ picture of him as out-of-touch and arrogant, but there seemed to be no real expectation that

his ÖVP would not win the relative majority necessary to keep him at the head of government. Indeed, a *Standard/Spectra* poll published the week before the election projected the ÖVP at 40% with the young and dynamic team fielded by the SPÖ at a likely 30 per cent. In contrast, the FPÖ was projected to win only 16 per cent (-3.5%) and I heard much speculation that the outcome might be as low as 14 per cent. Without the usual pre-election optimism, the Salzburg FPÖ set its goal at only 20 per cent, a scant, but realistic half-point above its 1994 showing.

The results came as a modest, but pleasant surprise for the FPÖ. Although losing one seat due to changes in the electoral law, it actually improved its voter share to 19.6 per cent, its highest ever. Even if the increase was only .1 per cent, given the difficult circumstances, the outcome was considered enough of a victory to rescue Schnell from his promise to resign if he did not reach his goal --- at least for the time being. The victory for Schnell may, however, not be definitive. His critics remain in the party and appear to be just waiting for Schnell's people in the new and difficult environment created by the end to proportional representation to make mistakes that will permit them to launch another attack. Susanne Riess-Passer, who is credited with having imposed order in Salzburg, expressed to me her feeling that the appearance of unity behind Schnell was only superficial and implied that she expects future problems with the Salzburg party. A devoted Schnell-supporter, bitter at the manner in which Riess-Passer and Rumpold on orders from Haider had handled last year's crisis, likewise expressed the belief that the problems between the Salzburg and Federal Party are by no means past.

Tyrol:

Background:

Tyrol, was also an early beneficiary of the "*Haider Effekt*." In 1989, the FPÖ rocketed into prominence, increasing its voter-share by more than 250 per cent. Most of this gain came at the expense of the ÖVP which lost 15.91 per cent and the absolute majority in votes cast, if not in seats in the parliament, but also at the expense of the SPÖ which lost 2.5 per cent. The 1994 election saw a slight continuation in the erosion of the ÖVP and the SPÖ, but no change in power.

The campaign:

The major question in 1999 was whether the ÖVP would be able to continue its political dominance? Polls projected narrow margins for the ÖVP on either side of a magic number of somewhat more than the 47 per cent that would be necessary to win an absolute majority of seats in the state parliament. The major issue, cited by 41 per cent of those polled, was concern about what was now inner-EU truck traffic across Tyrol between Italy and Germany. Far behind was concern about the health of families at 21 per cent and about foreigners at 20 per cent. Here, rhetoric against the EU and its transit policy which is blamed for bespoiling the air and the tranquility of the mountain landscape has had almost as much populist appeal as the foreigner issue in Vienna. As the head of the state government, ÖVP-Chairman Governor Wendelin Weingartner had cultivated an image of opposition to the EU-transit policy and distanced himself from the treaty negotiated by the Federal Government in which the Foreign

Ministry has been held by his own party since 1986. Indeed, ÖVP-Chairman-Schüssel was not even invited to participate in the campaign and from the labels on Weingartner's posters it would appear that he was a candidate of the Tyrolean- not the Austrian Peoples' Party. Weingartner's image as a fighter for Tyrol against Vienna and the EU made him a favorite of 58 per cent in a pre-campaign IMAS-poll, with the SPÖ candidate at 20 per cent, roughly his party's voter-share in the most recent elections. Franz Linser, ticket-leader of the FPÖ, was far behind at 9 per cent, probably indicative of the crisis his party had gone through the previous year.

As in Salzburg, the reasons for the 1998 crisis were complex, rooted in a traditional division between the Innsbruck party and the rest of the state, in tactical and ideological disagreements, in an organizational power vacuum and personal differences. For our purposes, they are less significant because the "fire brigade" sent out from the Federal Party in Vienna had successfully purged the dissidents and the establishment of Susanne Riess-Passer as the "chief *profi*" solved the organizational problems. Nevertheless, the FPÖ was not expected to improve significantly.

Among the three states electing new governments, the results were expected to have the least impact on Tyrol. Weingartner was, however, vulnerable. He did not have a personal powerbase in one of the three sub-groups which constitute the ÖVP and was under attack by the leader of its worker organization. Also, although he had long played the populist on the transit issue, against highway tolls and the like, as a banker-type, he was stiff and personally ill-suited to the role. Fixing on the unlikelihood that Weingartner would be able to continue what had been the permanent ÖVP absolute majority, the FPÖ pictured the probable coalition partners on a poster that made them look more like convicts than candidates. The one word title, "Trust?" raised the question of the credibility of a coalition based on a partnership of the same parties that made-up the barely functioning government in Vienna. The subtitle, "control is better" echoed the traditional theme, "power needs control" that was the subtitle for the considerably more photogenic posters of the leading FPÖ candidates.

In addition to general FPÖ themes similar to those identified above as part of the Salzburg campaign, they focused on issues specific to Tyrol, including the unemployment rate, which they claimed was the highest in western Austria, the cost of living which was the highest in the entire country and on specific scandals which had wasted public tax monies. Linser accused Weingartner of having made a lot of noise about the transit problem, but of "having done absolutely nothing." Only the FPÖ had

voted against the treaty under which the problem had grown worse. Although not realistic issues in a state where the FPÖ was certain to remain the third-largest party and without governmental responsibility, the Tyrol-FPÖ also show-cased its proposals for child-care and a flat-tax that were the center-pieces of the campaign in Carinthia and a prelude to the federal election campaign later in the year. These, it argued, could be financed by eliminating waste and corruption in government.

Despite their best efforts, Riess-Passer complained that the FPÖ campaign had not attracted much notice, primarily because the ÖVP dominated the local press and because of an ORF policy that neutralized any influence television might have by scheduling the candidates' presentations for 11:30 in

the morning. From my impressions, this criticism of the media coverage is accurate. If the FPÖ complained that campaign was buried in the back pages of the newspapers and the dead hours of television coverage, the metaphor became tragically literal when avalanches struck the Paznauntal on 22. February. Weingartner, citing his need to manage the crisis, declared an end to active campaigning and the FPÖ went along out of a stated respect for the dead. The SPÖ candidate urged that a television debate with Weingartner be held as planned, while the other parties tried to woo votes without appearing too aggressive. Political Scientist Fritz Plasser predicted that this might give a "bump" to candidate Weingartner, who as head of government, "could now end the campaign and dedicate himself to crisis management which would be covered by television." Indeed the group MediaWatch quantified the media presence of the candidates during the avalanche crisis and found that no one was mentioned or had any speaking time other than Weingartner who dominated the coverage and may have won sympathy by showing tears on camera as he reported on the progress of the rescue effort. A "market"-Institut poll just a few days before the election confirmed Plasser's suspicions:

Before this catastrophe a bitter defeat was indicated for Governor Weingartner. In the meantime however, four-fifths of Tyroleans are satisfied with his crisis management and therewith increases the political acceptance of his party."

In an attempt to counter Weingartner's omnipresence in the media, FPÖ-Chairman Franz Linser remarked:

Instead of pushing for the attention of the cameras of international television, it would be better to develop plans for action in the case of crisis for those areas that are the most threatened by avalanches.

The extent to which the avalanches had an impact on the election results is disputed. While a poll conducted for the *Tiroler Tageszeitung* by the University of Innsbruck found "tradition and stability" to have been decisive for ÖVP-voters, 95 per cent of them denied that the catastrophe had affected their vote. Professors Pelinka and Plasser, both members of the university's political science department, separately ventured the same opinion, namely that Weingartner's stability and crisis-management had been significant in saving the ÖVP from the significant loss that had been anticipated when the campaign began. The only surprise was the relatively strong improvement of the FPÖ. Projected at the beginning of the campaign only to retain the 16 per cent it had won in 1994, the FPÖ, despite internal upheaval and a tax-scandal involving one of its delegates to the federal parliament, gained 3.6 per cent for a total of 19.7 per cent, only 2.1 per cent behind the SPÖ, which gained 2 points. The results of the two "voter-stream analyses" that were published, were contradictory, and given the fact that there was no change in the relative standing of the parties and little movement in the overall results of the remaining parties (ÖVP: -.1; Greens: - 1.7; Liberal Forum: -.2), it is better not to draw any firm conclusions. Although the initial results appeared to cost the Greens two seats in the *Landtag*, with one each going to the SPÖ and FPÖ, the absolute majority of the ÖVP seemed to have been preserved. Then, however, came allegations that some three hundred ballots had been incorrectly invalidated. In the

ensuing recount, the ÖVP lost only .02 per cent, but that was enough to force it to surrender a seat to the Greens and therewith the absolute majority it had held since 1945. In the absence of the proportional representation of all parties in the government, a coalition was necessary. For a time Weingartner appeared ready to go back on his vow never to coalesce with the FPÖ as long as it was headed by Haider, but ultimately and under reportedly heavy pressure from some party colleagues in Tyrol as well as members of the Grand Coalition in Vienna, he formed a government with the SPÖ. The official reason given was that the FPÖ insistence on a seat in government for Susanne Riess-Passer was intolerable because she would operate under "remote control" by Haider from Carinthia where it was expected he would become *Landeshauptmann* on the strength of the FPÖ victory there.

Carinthia:

Background:

Haider had been *Landeshauptmann* once before. In 1989, when the SPÖ lost its absolute majority, the ÖVP jumped at the chance to make a deal with the second-place FPÖ to achieve their mutual goal of denying leadership to the "Reds" for the first time ever. After a little more than two years of a relationship that had proved more difficult and less fruitful than it had anticipated, the ÖVP agreed to support the SPÖ in a vote of no confidence against Haider following his infamous remark about the employment policy of the Third Reich. ÖVP-Chairman, Christoff Zernatto became *Landeshauptmann* in return for a promise to support the candidate of the party with the most votes after the next election. Evidently, ÖVP distaste for Haider was less than working with the "Reds." Following the 1994 election when the FPÖ picked up two seats and the ÖVP one at the expense of the SPÖ, Zernatto agreed to a deal that would leave him *Landeshauptmann*, but would give the FPÖ a preponderance of control in the government. In the face of massive disapproval from Haider-enemy, then-Chancellor Franz Vranitzky, as well as Vice-Chancellor and ÖVP-Chairman Eduard Busek and a revolt among some members of his own state party, Zernatto went back on his agreement with the FPÖ and was subsequently elected *Landeshauptmann*, again with the support of the SPÖ. Haider turned his attention back to federal politics promoting "total opposition" and reasserting his goal of becoming Chancellor by 1998.

Although the FPÖ continued to establish itself as *Mittelpartei* capable, on occasions, of overtaking one or the other of the old *Großparteien*, neither an absolute majority nor a coalition that would enable Haider to reach his goal of becoming Chancellor appeared possible. 1997 closed with Chancellor Klima at an all time high in public opinion and a disappointing result for an FPÖ-sponsored initiative against adoption of the Euro left Haider in an evident state of depression. At a New Year's meeting he was critical of the "laxity" shown by some party's functionaries and threatened to resign unless "enthusiasm again becomes evident. I am not tired. Rather, my weariness is disappointment." When *profil* questioned FPÖ *Landeshauptmann-Stellvertreter* Karl-Heinz Grasser about Haider's evident frustration, he responded that his boss wasn't always right and that at this moment he wasn't particularly motivated. Haider responded by dressing down his lieutenant in a six-hour "crisis session" of the state party Leadership. He underscored his commitment to fight against a continuance of the "SPÖVP-embrace not only at the federal level, but in Carinthia where the election was about which party would be number

one." Haider's statement, "that in Carinthia, the strongest team would be presented" for the March 1999 election began speculation that he would be the ticket-leader. Ironically, SPÖ-Chairman Ausserwinkler's statement that he believed the party with the most votes should name the *Landeshauptmann* probably encouraged Haider to make the move back to Carinthian politics. Ausserwinkler undoubtedly thought that the specter of Haider would galvanize his own splintered party behind him and stem the flow of SPÖ voters to the FPÖ that had recently been the trend most everywhere. Thus, almost a year before the election, the SPÖ became fixated on what became virtually its only campaign theme: "Stop Haider." For his part, Haider remained coy stating that he would not announce his intentions until Fall. This changed however, when, in early June, Karl-Heinz Grasser announced his decision to withdraw from politics to work in the private sector. He stated that the primary reason for his decision was the extraordinary economic opportunity offered him, but added that he had become alienated by "the internal conditions of the party." He named a number of high-ranking functionaries as responsible and criticized Haider for not pursuing "... a more constructive course."

Grasser's statement capped a horrible six months for the FPÖ. The January furor in Carinthia had then been followed in short order by crises in Tyrol and Salzburg and the Rosenstingl Affair. When Haider finally announced his decision to head the ticket for the *Landtag* election, he said that all this had thrown him into such a state of despair that he had actually decided to withdraw from politics. Then, however, "? the general attack on the FPÖ" of which the seduction of Grasser into the private sector by a firm close to the SPÖ was "only a part of a higher strategy, " made him realize that it was "? his responsibility to the voters and citizens to remain constant and keep on." This was an "historic chance" to make the FPÖ the strongest party in Carinthia. "To become *Landeshauptmann* is the chance to prove that we can govern." To allay any charges that he was just using Carinthia as a stepping-stone towards his earlier dream of becoming Chancellor, he promised to serve a full term, as "? as long as the Carinthians want me."

The Campaign

Public opinion polls as campaign was getting underway showed *Landeshauptmann* Zernatto as distinctly the most popular candidate with 33 per cent, well ahead of Haider with 24 per cent and SPÖ-leader, Michael Ausserwinckler, who had recently dropped from 19 to 15 per cent. Despite Zernatto's personal popularity, his ÖVP was a distant third to the FPÖ and SPÖ which most polls were showing about even, in the 33-35 per cent range. But the SPÖ was in disarray, not the least because of a lack of enthusiasm for its ticket-leader. Michael Ausserwinkler had been a protégé of former Chancellor Vranitzky who had been called to Vienna as Minister of Health. There he made himself thoroughly unpopular for his efforts against public smoking and was then later basically thrust back on the Carinthian SPÖ where he was never really accepted. His relationship with the new Chancellor, Viktor Klima, was cool at best and there were even rumors that a group of SPÖ mayors was trying to dump him as the ticket-leader in the middle of the campaign. A physician by profession, "Auwi" was stiff in public appearances and attempted to soften his image by driving around the state in his "cute," red V-W Beetle to make personal contact with the voters. The Carinthian edition of *Kleine Zeitung*, described his approach as "*süß*" in contrast to the "*hart*" image of the FPÖ conveyed by its advertising line keyed to the rough and tumble

game of ice-hockey played in the stadium where its opening rally was to be held. Unmentioned, but implicit was also the tough image that the FPÖ had built through its negative, oppositional politics and emphasis of wedge issues over the past years. The slogan on the poster advertising the rally suggested that if the voters would penalize the SPÖ and ÖVP for their mismanagement and leave them short-handed in the state parliament, then, just as in hockey, the FPÖ could mount a "powerplay" on behalf of the people of Carinthia. Haider's two hour speech opening the Carinthian campaign and outlining the FPÖ line for all the elections in this *Superwahljahr*, took the usual tough positions against the privileges of politicians, urged protest against the political correctness of the government's cultural policy and warned of the dangers of the expansion of the EU to the East. He ridiculed the government parties in their clumsy efforts to find a compromise between their widely divergent views on reforming the elephantine tax code and announced: "We have the solution." It was a less radical version of a proposal worked out for the FPÖ by Prof. Alvin Rabushka, the U.S. originator of the flat-tax that has been embraced by Steve Forbes and many other

Republicans. Described by one off Haider's most consistent journalistic critics as a "wild idea of American ultra-conservatives," the flat-tax was touted by the FPÖ as a means of bringing significant savings to every income group from workers to entrepreneurs. It would end the unfairness and hopeless complexity of the existing system and, because of a temporary fall in revenue during the phase-in period, it would force government to become more efficient. Capital would be released to the private sector creating an economic boom that would increase employment, reduce welfare costs and, in the long run, even produce higher tax revenues.

In contrast to the hockey motive, another poster advertising the opening rally presented a line that was by no means "*hart*." The three laughing babies on this poster were thanking Jörg for what they were holding in their hands --- a *Kinderbetreuungsscheck*. This, Haider announced, was the centerpiece of the FPÖ's program to chart a "non-socialist path to renewal." On the back of a campaign handout that looked like a check, Haider promised that if elected *Landeshauptmann* as a consequence of the outcome of the election on 7. March, "every woman will receive a ÖS 5700 (\$460) monthly for each child from 1 to the age of 6." The reason, he said in his speech opening the campaign, is because "it is no shame when a woman receives the right to be with her children. But it is a shame when a policy is pursued that tears children of one or two out of the family."

In analyzing Haider's reincarnation as a "*blauer Softie*," *profil* was probably at least partially correct in presuming "electoral arithmetic," to be the motive. It should not, however, be forgotten that Haider, as spokesman on social matters in his early days in parliament was, in the U.S. use of the term, quite liberal. In an article criticizing Haider's expedient, zig-zag policy in all matters, a conservative defector from the FPÖ described him as "left of SPÖ-Social Minister Dallinger" at the time. However, since Haider assumed leadership and discovered the power of the right-radical populism, the growth of the FPÖ has been proportionally much greater among men causing the percentage of women in the electorate to sink from about 52 per cent in 1983 to 38-40. In response to the flattening of its growth curve by the mid-nineties, the FPÖ, in its strategy for the *Superwahljahr* of 1999, turned to women's issues. As Haider noted in an interview with *profil*: "The mistake in 1995 was presenting only '*hart*' issues, that we certainly won't do again." The *Kinderbetreuungsscheck* was to present the "softer side" of

the FPÖ and the male-bonding poster "my brother, Jörg and I," illustrates Haider's belief that "on themes such as children, the men will also go along. I don't see any problem with this."

His "powerplay" then, was on behalf of children and their mothers who were "hard-pressed because of their multiple roles." By the week before the election when I arrived on the scene, this "softer side" appeared dominant and the hockey pucks with the party logo that had been given out as campaign gifts in January were replaced by a cuddly "*Jörgl Bär*."

In the past, critics had attacked FPÖ proposals designed to encourage women to be stay-at-home mothers as reminiscent of the "*Kinder, Küche, Kirche* slogan of the Nazi era" Understanding that the unenunciated root of this criticism lay in the socialist view of the interrelationship of labor and value, the FPÖ proposed a "Charter for Women," attacking the government for failing to address the higher unemployment and lower wage rates of women. The *Kinderbetreuungsscheck* was the centerpiece of this agenda and was to go to mothers with children under school-age regardless of whether they chose to stay home and collect the money themselves or use it to pay for child care while they worked. To enthusiastic applause, Haider admitted that the FPÖ believed that it was better for the child and for society that a mother be able to remain at home as long as she could with her small children. Nevertheless, if a mother wanted or needed to return to work, the *Kinderbetreuungsscheck* would aid her as well. Labeling Ausserwinkler's charge that the program would destroy jobs for Kindergarten teachers "completely absurd," the FPÖ contended that it would promote the growth of a private, child-care industry and create new jobs. Among other benefits for mothers, the "Womens Charter" urged the expansion of the pension program to include mothers who were left out of the current system because they did not meet the criterion of fifteen years of work outside the home. While the view that these proposals were designed to send women back to the stove was not completely silenced, most of SPÖ criticism focused on what it considered questionable means for financing the schemes. Nevertheless, under this pressure from the FPÖ, family issues rose to the top of the political agenda in *Superwahljahr* 1999. The ÖVP pushed its proposal for financial support (*Karenzgeld*) for all mothers, to which the SPÖ responded that this money should only go to those who need it. Seeking to take advantage of this split and perhaps pave the way for a position in government following Federal elections in October, the FPÖ announced that it could work with the ÖVP on this, while taking credit for having initiated the discussion.

Another campaign handout was a postcard-sized glossy picture of Haider with "nine good reasons to vote" for him printed on the back. Four of these were common to the other state campaigns:

- reduction of taxes and the bureaucracy.
- opposition to the expansion of the EU, but with a particular emphasis on any

early admission of neighboring Slovenia.

- the flat-tax and other tax incentives to small and middle-sized businesses.
- the need to eliminate patronage and the waste of tax money.

Others were specific to Carinthia:

- the above-mentioned *Kinderbetreuungsscheck*,
- A promise to improve the standard of living, with a promised reduction in rents as the most specific proposal.
- A promise to reduce the cost of electricity and other fees
- The protection of agriculture and the environment, but not at a cost to the tax-payers. A promise to defend against efforts to divert water from Carinthia to water-poor regions to the south.
- Value should be accorded to *Volkskultur*; there should be an end to the monopoly over subsidies to the arts by the elites of the cultural bureaucracy and an end to subsidies for art that was scornful of traditional values.

A tenth reason, the postcard said, was SPÖ candidate Michael Ausserwinkler, but number one was the person pictured on the front.

The FPÖ campaign relied little on the media and instead concentrated on traditional rallies with free beer, speeches and a lot of handshaking. The nine themes on the postcard were those that Haider emphasized in his speeches at the two rallies I attended. He reminded his listeners that his election ten years ago had ended forty years of rule by the "Reds" and cited a list of changes he had made. But then, he said, collusion between the "Reds" and the "Blacks" had deprived him of the opportunity to make more progress for Carinthia and under his successor, ÖVP-Landeshauptmann Zernatto and his SPÖ enablers, the debt had quadrupled, income had dropped to the lowest in all Austria, there was record unemployment and the health system presided over by Michael Ausserwinkler had come to the edge of collapse. High rent and electricity prices had historically been SPÖ issues, but Haider asked:

What have they done? Nothing. In January the Socialist Chancellor said that rents were too high. He's right and particularly here in Carinthia. But for fifty years the Socialists have been responsible for housing.

This was particularly difficult for single-mothers and young families. Referring to his party's 'Womens Charter,' Haider asserted that the solution lay in providing low-cost housing in buildings where the construction costs had already been paid off. "But," he asked rhetorically, "has anyone ever heard of the rents being lowered? No!" The money, instead had gone to Socialist-dominated housing co-ops and for land speculation by banks in the control of one or the other of the coalition parties rather than being returned to the rent-payers. He also asserted that the government had paid too much for loans for new construction just as it had for contracts for electrical production, producing costs that were more than twice as high as in Bavaria. The *Kinderbetreuungsscheck* was enthusiastically received at both gatherings. Haider noted the criticism of the nay-sayers and explained how the program could be financed by diversion of surplus funds from paid-up housing contracts.

Haider also exploited popular anger at the EU on several counts. First, the eastward expansion of the EU, which he accused the coalition parties of favoring, must be stopped. "Schüssel [Foreign Minister]

says we must pay thousands of billions of Schillings to prepare these countries for the EU. Nobody says we should take care of our own?" To repeated applause Haider said: "Czechs and Poles work for one-third the wages of Austrians; if they are in the EU they will come in and take the jobs and Austrians will collect unemployment money?. Already, cheap labor from Portugal, Greece and elsewhere in the EU is depressing wages." To deal with this, Haider said, foreigners should be limited to twenty per cent of the labor force in any firm. The EU, which the **SPÖVP**-government in Vienna had joined via acceptance of what the FPÖ had criticized as the disastrous Maastricht Treaty, was, itself, part of the problem. Haider condemned EU-agricultural policy and excoriated the Minister of Agriculture who was a member of the ÖVP. The FPÖ was not alone in its criticism Haider noted, reminding his audience of a recent demonstration by farmers in Brussels. To indignant *jawohls* from the audience, Haider said: "They they were beaten back by the police while the Kurds [whose terrorist organization the PKK was then involved in some violent demonstrations throughout Europe on behalf their leader Abdullah Ocalan] can protest here under the protection of the Socialists without any action being taken against them!"

With regard to culture, Haider elicited ironic laughter from his listeners when he noted that support for childrens' singing clubs had been eliminated. "For that they have no money. But because Herr Ausserwinkler is so enthusiastic about the cultural contributions of Herr Kolig, he gave him ÖS 23,000 (\$1849) for a glass walking-stick which he filled with his own urine?. And they call that art. And you pay for that with your tax-money!" All this, Haider said, was due to "Betrayal by 7 years of **SPÖVP**-Dominance." With an SPÖ loss becoming increasingly apparent, Haider charged, that a move was underway to dump Ausserwinkler as soon as the election was over. Evidence of this was the 13 January meeting between Ausserwinkler's frequent critic and presumed successor, Helmut Manzenreiter and Zernatto. The purpose he guessed was to cook up a deal to divide the term of *Landeshauptmann* between them regardless of how the election came out. "This, my friends," he said,

we can stop only if we have a greater percentage of the voter share than the Socialists. Then Herr Klima will say "it is ok that Jörg Haider becomes *Landeshauptmann*, then at least he'll be out of my hair in Vienna." (Laughter and applause.) If you will give us the chance we will bring Carinthia forward. In the meantime I have also learned to keep my mouth shut so they won't have another excuse to get rid of me." (Laughter and extended applause.)

Haider's performance at both rallies was masterful. He appeared to know all of the local party functionaries personally, addressed them by their first names and with the *du*-form He used *ihr* with with his audiences and they returned the linguistic friendship addressing him as Jörg and with *du*. He spoke earnestly with many individuals on his way to and from the podium and showed an extraordinary ability to connect with people. This was particularly evident in the case of a young physician who loudly posed an aggressive question after Haider's speech and then followed him into the restaurant where the local functionaries and my group of observers were having lunch following the rally. Haider invited the man to sit down and have something to eat and drink while he explained his perception that that the FPÖ program was insufficiently attentive to the needs of rural medicine. Haider listened carefully and said he would look into the problems mentioned The man left this encounter apparently won over by Haider.

In many respects, the FPÖ campaign with its demands for lower rents and electricity prices, and money for child-car was almost socialist. The FPÖ admitted this, but pointedly noted that the reason these issues had to be addressed was that the SPÖ, which had held the absolute or relative majority in the land since 1945, had not. The FPÖ campaign was issue-driven, a high road it could afford to follow with polls showing it with a likely plurality in the election. Left with little but the issue of Haider, the SPÖ and the media aligned with it let no opportunity go by without calling attention to the incidents when Haider had putatively praised "the employment policy of the Third Reich" and "the values of the SS." These were, however, old charges and the Haider whom they targeted was not evident in this campaign. The FPÖ message in the final days of the campaign was that it was "time for a change." Carinthians were urged to initiate "a new phase of political renewal" which was personified by Haider. They were told "whoever wants Haider, must also vote for him" and they did, and in numbers that exceeded even Haider's expectations of 35-37 per cent.

The results brought the FPÖ its highest vote ever. With almost ten per cent less in the popular vote than the SPÖ, the SPÖ lost the majority that it had held since 1945. Nor could Zernatto's supposed popularity and the bonus that has traditionally accompanied incumbency save the ÖVP from its worst-ever showing.

Results of Carinthian Landtag Election of 7. March 1999 compared with 1994

| Year | SPOe | | FPOe | | OeVP | | Bund-99 | | KPOe | |
|------------|---------|-------|---------|-------|---------|-------|---------|------|-------|------|
| | Votes | % | Votes | % | Votes | % | Votes | % | Vote | % |
| 1999 | 108,469 | 32.89 | 138,816 | 42.09 | 68,308 | 23.79 | 12,895 | 3.91 | 1,354 | 0.41 |
| 1994 | 130,768 | 37.37 | 116,419 | 33.27 | 83,224 | 20.71 | none | none | none | none |
| Difference | -22,229 | -4.48 | 22,397 | 8.82 | -14,916 | -2.08 | | | | |

The results are even more dramatic when the electoral districts in which the FPÖ won an absolute or relative majority (blue) are seen relative to those won by the SPÖ (red) and ÖVP (gray).

The "voter-stream analysis" of the SORA-Institut published in *profil* and *Salzburger Nachrichten* showed the FPÖ having won approximately 10 per cent of the ÖVP voters from 1994. In agricultural districts that were formerly strongholds of the ÖVP, the FPÖ inroads ran from 8 to 12 per cent. The reason, given in the exit polls was the FPÖ stance against the EU-Maastricht Treaty. Also, the ÖVP lost almost 5 per cent to the FPÖ in the lake district west of the capital city of Klagenfurt where the FPÖ was able to exploit resentment over the failure of the Zernatto government to stem the decline of tourism. Even stronger gains were, however, made at the expense of the SPÖ which lost almost 20 per cent of its 1994 voters to the FPÖ. These gains were registered in industrial centers where there were defections of between 8.7 and 12.2 per cent from the SPÖ and even more impressively in the cities. For former SPÖ

voters, the *Kinderscheck* and promises to lower rents and energy prices seem to have been persuasive. While the SPÖ and ÖVP were only able to hold 73 and 77 per cent of their 1994 voters respectively, the FPÖ held 90 per cent

Without extensive exit-poll data on voter motives, any comments on why the FPÖ did so well in Carinthia is highly speculative. If, however, election results are a reflection of their campaigns and the public's response to them, then the success seems largely unrelated to right-radical appeal imputed to Haider and his party and summarized at the beginning of this paper.

- **Nostalgia for the Third Reich or neo-Nazi sentiment**: Aside from the effort of Christa Zöchling, a constant and bitter critic of Haider in *profil*, to call attention to the fact that FPÖ did not send representation to commemorations of the sixtieth anniversary of *Kristallnacht*, Haider and the FPÖ gave no further fodder to his critics and the press. Indeed, this is a difficult issue for either of the other major parties to use against the FPÖ in Carinthia. A long-time SPÖ head and *Landeshauptmann* from 1974-1988 had never denied, nor been hurt by his service as a high-ranking member of the *Hitlerjugend* and the stridently German-nationalist *Kärntner Heimatdienst*, which is characterized by the *Dokumentationsarchiv* as right-extremist, has close ties to the ÖVP.
- **German-national issues**: Haider's past stance on the German character of Austria and hard-line on bi-lingual education have been important reasons for the enmity of the *Linksintellektuellen* towards him. In 1988, these would-be defenders of the Carinthian Slovenes protested the passage of legislation by the Federal Parliament on the grounds that it provided too little support for bi-lingual education for Carinthian Slovenes and were constantly critical of Haider as he implemented it during his earlier tenure as *Landeshauptmann*.

Now, ten years later, in more than half of those districts where bi-lingual education was mandated, the FPÖ won a relative or absolute majority. (See graphic above.) The lack of attention paid by Carinthian-Slovenes to the concerns expressed by the *Linksintellektuellen* was revealed by a campaign leader for the combined Green-Slovene-LiF list, *Bündniss 99*. In reflecting with satisfaction on his group's 32.32 per cent voter-share in the Zell-Pfarre district, he grudgingly admitted: "98 per cent Slovenes live there. More and more of us are voting for Haider."

Multiculturalism wasn't really an issue except as it related to immigration. Haider's enemies see an underlying German-nationalism and racism in his demands for a stop to immigration and the repatriation of the unemployed foreigners, but FPÖ insistence that its position is simply a matter of jobs and the need to save money in social-welfare benefits for non-citizens seemed to defuse this criticism.

- **Demands for the reduction of the social-welfare state and subsidies to the press, literature and the performing arts**: The FPÖ campaign, with its emphasis on the *Kinderbertragungsscheck*, can certainly not be described as either right or extreme. The FPÖ readily admitted that this was an example of one area where big government could be beneficial and limited itself to criticizing

SPÖ favoritism, inefficiency and corruption in administering the social-welfare state. Its populism was, however, quite strident in attacking **SPÖ** cultural policy. Here the assault was against radicalism in art and on behalf of diverting subsidies to cultural programs in the schools and communities which by their nature would be traditional, rather than the experimental and *avantgarde* projects favored by the *Linksintellektuellen*.

Some of the FPÖ baggage commonly cited by its critics right-extremist may have indeed played a role, even though unexpressed in the campaign. For example, on one occasion, among people gathering for a rally, I heard some grumbling that the Slovenes were excessive in their bi-lingual demands. "Jörg knows how to take care of them," seemed the concensus. Also unmentioned, as far as I could tell, was the highly controversial traveling exhibit that makes the case that the *Wehrmacht* must bear a significant share of guilt for the war crimes of the Third Reich that has previously been shoved off on the SS. Haider is highly critical of this *Wehrmacht* Exhibit and has vigorously opposed the attribution of any blanket guilt to veterans or even to members of the SS unless they were specifically implicated in war crimes. This was the substance of his much-criticized speech to *Wehrmacht*- and SS-veterans at Krumpendorf in 1995. In contrast, Michael Ausserwinkler sponsored the staging of the exhibit in Carinthia. This exhibit is painful for veterans and even their children and I suspect his sponsorship worked either consciously or unconsciously against him and in favor of Haider among many voters. Having said this, I must also stress that the FPÖ did not try to exploit either issue in the campaign.

It is common, particularly in SPÖ and Green circles, among academics and other intellectuals to see the FPÖ victory in Carinthia as a reflection of this traditional borderland where "the clocks run differently." In contrast to this view that sees Carinthians voting for the FPÖ because they are closet Nazis, I believe that they perceive Haider's politically incorrect interpretations of history to be irrelevant and vote for the FPÖ in protest against an SPÖ-ÖVP-dominated status quo and in defiance of Vienna, *profil* and the "quality" press, academics, artists and other cultural elites who constantly dredge up what many voters consider to be ancient history. Fritz Plasser, Innsbruck political science professor and respected pollster for the ÖVP, saw the results of the elections as a "habitualized protest," not only in Carinthia but also in Salzburg and Tyrol where the FPÖ, despite serious internal problems, improved its standing as well. A vote for the FPÖ was based on the feeling that neither the formal nor the informal coalitions of ÖVP and SPÖ were working any longer and that it was time for a change. Herbert Dachs of the University of Salzburg agreed that the FPÖ vote was "massively a matter of feelings" and expressed the belief that "finally something has to change." Franz Birk of the IFES-Institut took a similar line emphasizing that in Carinthia it was "a vote for Haider and against frustration" to which could be added Plasser's belief that the focus of both SPÖ and ÖVP on blocking the election of Haider as Landeshauptmann even if the FPÖ were to win the most seats was a serious error. As Haider-intimate Gernot Rumpold put it, "when Manzenreiter tried to make that deal with Zernatto --- that was like Christmas."

Conclusion:

The continued growth in electoral support of the FPÖ, slight in Salzburg with all its background problems, and significant in Tyrol, provides evidence to sustain the interpretation that I have developed over the years and have summarized at the beginning of this paper. The interpretations of Plasser, Dachs

and Birk cited immediately above support this view. In a previous article I argued that *Landtag* elections, particularly the three falling together in Salzburg, Tyrol and Carinthia, constituted a trend for subsequent FPÖ growth at the federal level. Whether the elections of 1999 and particularly the election in Carinthia is the breakthrough that I heard FPÖ politicians and partisans talking about at their victory celebration election night in the Klagenfurt *Landhaus* remains to be seen. On the one hand, the capture of the relative majority by a party other than one of the two that founded the Second Republic was a first and suggests that the FPÖ has moved beyond being just a vehicle for the expression of frustration and protest. The election of Haider as *Landeshauptmann* on 8. April, is another indication that a corner has been turned in Austrian politics. His election in 1989 represented the first time that a head of government from a party other than the SPÖ or ÖVP had ever been elected, but then the FPÖ was only the second-largest party and needed the positive support of the ÖVP to end what both had styled the permanent dominance of the "Reds." This time, the loss of the voter support for both the SPÖ and the ÖVP was so great that their ticket-leaders resigned leaving Haider as the only candidate for the position of *Landeshauptmann* who had run for the office. Initially, there was much discussion about blocking the election of Haider. The SPÖ had focused its entire campaign on this promise and ÖVP-Federal Chairman Wolfgang Schüssel had stated that even if the FPÖ were to win the relative majority, Haider would not be elected *Landeshauptmann* with the help of the ÖVP. Under the circumstances however, these pre-election threats dissolved. Even the SPÖ was divided on what to do, but ultimately nominated its own candidate so as to at least contest Haider's election. The ÖVP was courted by Haider with conciliatory language about common goals that could now be realized and with promises of influence in his government. Confronted with the specter of voter wrath that might bring an absolute majority for the FPÖ in the new elections that Haider had threatened to force should he be denied the fruits of a victory, or the even worse possibility of unleashing him on the entire country as a martyr in the campaign for the federal election in October, the ÖVP backed away from its earlier threats. Technically, it honored Schüssel's promise to not help elect Haider by abstaining from the vote in the *Landtag*. In reality this was just as good as voting for him since it gave the FPÖ a majority of the votes cast and brought the election of Haider as *Landeshauptmann*.

Even beyond Carinthia, the election seemed to have effected a sea change in attitude towards Haider and his party. While artists and *Linksintellektuellen* predictably warned about the dangers of allowing Haider access to power, commentary in the press, even in normally hostile publications such as *Standard*, and *profil*, grudgingly acknowledged that the will of the people in Carinthia was for Haider to become *Landeshauptmann*. Public opinion was less equivocal. According to a poll conducted nationwide for *Kurier* immediately after the election, 57 per cent supported the election of Haider as *Landeshauptmann* and 73 per cent of FPÖ voters were sufficiently emboldened by the Carinthian victory to be willing to declare their party preference, up from 50 per cent in 1996. Likewise, the percentage of people who declared themselves absolutely opposed to voting for the FPÖ had dropped from 52 per cent to 38 per cent. An IMAS-poll conducted two weeks later showed similar results: 35 per cent of those questioned said they would be inclined to support participation by the FPÖ in the federal government and 13 per cent they would enthusiastically support such an option against an equal number who were opposed. The FPÖ climbed into a statistical dead-heat with the ÖVP on the question about which party one would support if the election were the next Sunday and Haider climbed 5 points to 37 per cent in the "Politiker-Hitparade" in response to the question: "Of which politician do I have a good opinion." Although light-

years behind Viktor Klima at 65 per cent in the popularity contest for Chancellor, Haider, with 14 per cent, nosed out ÖVP-Chairman and Vice-Chancellor Wolfgang Schüssel by one point.

Whether this momentum can be sustained is not clear at this writing. In the campaign for the EU-election on 13. June, the FPÖ, as an outspoken opponent of the Maastricht Treaty, stood to benefit from disillusionment over what membership had brought and the corruption scandal in the EU-Commission that broke the week after the March elections. However, with the air war against Serbia raging, the SPÖ, as the party in power benefited from the crisis. Moreover, the SPÖ had steadfastly maintained its commitment to neutrality which has become one of the central pillars of Austrian identity. With NATO bombing Serbia, public opinion against joining NATO soared to almost eighty per cent. Under these circumstances, it is small wonder that the SPÖ gained two percentage points in the EU-election to 31.74 per cent, while the FPÖ, which has argued for NATO membership as a realistic recognition of the end of the Cold War and the new geo-strategic threats to its security, slipped over four points to 23.58 per cent.

Stung by this defeat, the FPÖ announced a shake-up in several areas of its organization and immediately began its campaign for the federal parliament elections to take place on 3. October. Another IMAS-poll conducted in the wake of the EU-elections showed the FPÖ still in a statistical dead-heat with the ÖVP on the so-called "Sunday Question," but with both parties five points below their March levels while the the SPÖ and the pacifist Greens enjoyed a resurgence. Haider's relative absence from the federal political scene also seems to have had an effect on his personal standings in the polls costing him six points in the "Politiker-Hitparade" and dropping him back one point on the Chancellor question, into a tie with Wolfgang Schüssel at 13 per cent. The real test will, of course, come in the parliamentary elections the Sunday before this paper is presented. At that time we will better be able to speculate on the significance of the March elections examined here.

APPENDIX

Summary of the Criticisms of Haider

1. Although Haider enjoys what he calls "the blessing of a late birth" on 26. January 1950, that is, well after the end of the Nazi era, his parents had been enthusiastic, although unimportant Nazis.
2. The FPÖ, while adamantly denying any desires for another *Anschluss* to Germany, has always regarded the concept of Austrian nation as ahistorical political correctness. It regards the Austrian experience as part of German history and contends that the overwhelming majority of Austrians belong to the German linguistic, cultural and ethnic community, that is, the German nation in the apolitical, ethno-romantic sense.
3. In 1983, Haider led the Carinthian ticket to the FPÖ's only success in the otherwise catastrophic federal election of that year. A substantial reason for his success was his pandering to the discontent of the parents of German-speaking children in the 98 schools where Slovene-German bi-lingual education was mandated. This made Haider the darling of the traditional right-wing of

the FPÖ, but also provided ammunition for those who saw German-nationalism as a cover for pro-Nazi nostalgia if not outright neo-Nazism. The following are typically cited by his Haider's opponents as evidence.

- a. His comment that concept of the Austrian nation was an ideological miscarriage.
 - b. His comment about the effectiveness of the employment policies by which the Third Reich solved the unemployment problems of the 1930's.
 - c. His use of the term "penal camp" rather than "concentration camp" in a speech otherwise condemning the ethnic extermination policies of the Third Reich.
 - d. His criticism of "the Lefties of political correctness." Typical in this regard is Haider's September 1995 speech at Krumpendorf where he criticized the controversial *Wehrmacht* Exhibition that has been traveling throughout Germany and Austria in recent years for creating the impression "that the members of the war generation, the *Wehrmacht*, were all criminals. He expressed his party's commitment to a future in which the "older generation will be treated with respect" and to a society in which "order, justice and respect are still principles." This has been widely reported as praise for the values of the SS. This leap by his critics is justified only by the fact that the group to which he was speaking included not only *Wehrmacht* veterans, but also former members of the Waffen-SS. Haider only compounded the problem when justified his comments on the grounds that "Waffen-SS was a part of the *Wehrmacht* and that its members were entitled to the honor and recognition of regular army veterans unless it was proven that they had been involved in war crimes.
4. Despite Haider's 1995 internal party memorandum decreeing "*Schluß mit Deuschtümmelei*," his substitute appeal was no more welcome to the literati he dismisses as the "*multi-kulti Schicki-Micki*." In rejecting "ethno-Romanticism," Haider asserted that the FPÖ had "developed into the only Austria-conscious and patriotic party in the current party spectrum," as evidenced by its "Austria first" initiative to stop immigration and deal with the negative consequences for public health, education, welfare and housing as well as its opposition to the Maastricht criteria as the basis for entry into the EU.
5. Haider and the FPÖ decry the decline in what they call traditional (read German-Austrian) values. This they see as the result of the dominance of "*Multikultis*" in the government, the media, artist and intellectual circles and the schools and of the excessive immigration of the past decade. Hoping to parley broad anxiety about the perceived threats posed by the collapse of the Communist system in Eastern Europe and the civil war in Yugoslavia, the FPÖ mounted the "Austria-first" initiative campaign declaring that Austria was not a classic country of immigration and proposing measures to deal with the increased stresses on public health, education, welfare and housing. Led by "*Allroundkünstler*" Andre Heller, writers, artists and other intellectuals succeeded, along with the governing-SPÖ, in reshaping the initiative in the public mind as a racist, anti-foreigner campaign. Their efforts were crowned by a massive candlelight protest march, symbolically converging on *Heldenplatz* where Hitler had ceremoniously celebrated the *Anschluss* of his homeland just short of fifty-five years before.

FPÖ wants to substantially reduce the scope of the state, which not only means the paring down of social-welfare benefits, but also its generous subsidies to the press, literature and the visual and performing arts.

Rise of Right in Europe

May Presage Same Result in the U.S.

by Samuel Francis

Everything seemed to be coming up roses for the New World Order. The European Union finally agreed to issue a new currency for the happy peasants of what used to be the European nations to spend, and the U.S. Senate voted to expand NATO to the East, thus helping to insure that the happy peasants could count on their American counterparts to do their killing and dying for them in future wars.

Then the peasants went to the polls in Germany, and suddenly the New World Order roses started to stink.

On April 26, an obscure German political party called the German Peoples Union, or DVU as it's known by its German initials, walked out of the voting booths with a hefty 13 percent of the vote in parliamentary elections in the state of Saxony-Anhalt. The returns were twice what the tame pollsters had been predicting, and for the next week or so the tame world press screeched and screamed in a fit of paranoia.

The DVU, muttered the New York Times, was "seeking to capitalize on the frustrations of eastern German voters." The party, blathered the Washington Post, is "fiercely anti-immigrant" and is "feeding on voter resentment toward the 9 million foreigners living in Germany." The party's founder, Gerhard Frey, elegantly described as a "rich Munich publisher" "lavished enormous sums of money" on the elections, even though its main candidate, Helmut Wolf, is a "political unknown" and an "unemployed engineer," according to the Times. It might have been more convenient if Herr Wolf had been an unemployed housepainter, but the shoe was made to fit anyway.

The London-based Economist weighed in with its own contributions to unbiased reporting. In a story headlined "The ugly side of European politics," the magazine called up all the demons that lurk beneath the stagnant surface of the globalist consciousness. Not only is the DVU on the march, but also the leader of the rising French National Front, Jean-Marie LePen, "congratulated his German comrades," and in Austria, the local reincarnation of Der Fuehrer, Jorg Haider, is also moving up in the political world. It might not be Hitler and Mussolini embracing each other, but the world press made sure that was the image that came to mind.

In fact, the rise of the European right, for all the efforts of the press to explain it away as a fluke due to lavish spending by eccentric millionaires, may be an event of world-historical importance. What mainly drives these parties of the fringe in France, Austria and now Germany toward political power are two issues --- immigration and the construction of the transnational political regime known as the European Union --- and what these parties are saying, as difficult as it is to hear it above the mewling of the press, is a clear and firm affirmation of nationality.

Both immigration and the European Union appear to be swallowing national sovereignty and the ethnic and cultural identity that underlies national existence, but while nationalism is the powder in the new Euro-right artillery, its trigger is economic. In France, unemployment currently stands at some 12 percent, while in Saxony-Anhalt it's 25 percent, the highest in Germany.

You don't have to invoke the irrational in the form of "frustrations" and "resentments" to explain the emergence of the Euro-right. Frenchmen, Germans, Austrians and others have plenty of sound reasons to worry about perfectly legitimate and important issues concerning the future of their nations and their own personal futures in the new political megalith that rises over the continent. But of course in the mind of the globalists and their pet media, they're not legitimate issues. Anyone who worries about, let alone actually votes on, issues related to curtailing immigration or national sovereignty is obviously a crackpot and might well be an outright Nazi.

But it is precisely that attitude that allows the Euro-right to rise from obscurity. Having ignored or even welcomed immigration and the European Union for decades, the establishment parties of right and left in Europe now face political revolution, and they have good reason to worry --- at least for the future of their myopic agendas.

In the United States, the same kind of establishment, with the same mentality, the same globalist and anti-nationalist agenda and the same myopia, prevails in both parties, and neither one shows any serious inclination to resist the challenge to nationality. Here too, sooner or later, by ignoring those challenges and even allying with them, our political establishment is setting itself up for a fall. Here too, the peasants will walk into the voting booths, and what walks out will scare the globalist elites.

The Skinhead International: United Kingdom

Newsgroups: alt.skinheads,alt.politics.white-power,alt.politics.nationalism.white

Subject: ADL: Skinhead International; United Kingdom

Summary: The ADL's "Skinhead International: A Worldwide Survey of Neo-Nazi Skinheads"

Followup-To: alt.skinheads

Archive/File: pub/orgs/american/adl/skinhead-international skins-united-kingdom

Last-Modified: 1995/09/19

The Skinhead phenomenon had its birth in the United Kingdom, arising as a youth cult in the early 1970's, and Britain is still regarded as the fountainhead of the movement worldwide. It was there that the Skinhead aspect and regalia developed - shaved heads, boots, tattoos - designed to symbolize tough, angry, rebellious working-class youths. (The steel-toed Doc Martens boots, de rigueur for Skins everywhere, are manufactured in Britain.) Along with the style went fixed attitudes: an extreme nationalism, a brash male chauvinism, a glorification of brute violence. Before long, a large number of British Skinheads were also displaying hostility towards non-whites, Jews, foreigners and homosexuals.

Filling out the format was "oi" music ("oi" is a Cockney greeting), which - for the racist Skins - meant the threatening sound of "white power."

Present estimates of the number of British Skinheads vary from some 1,500 to as many as 2,000. These figures represent a slight decline over the past year or two.

Blood and Honour

The main Skinhead "organization" is Blood and Honour, a loose sort of structure founded in 1987 by Ian Stuart Donaldson - professionally (and hereinafter) "Ian Stuart" - a Skinhead musician who was killed in an automobile crash in Derbyshire late in 1993. Stuart's band, Skrewdriver, has been for years the most popular Skinhead group in Britain and throughout the world. Under the name The Klansmen, the band has made records for the United States market - one of their songs was titled "Fetch the Rope." Stuart always preferred being called a Nazi rather than a "neo-Nazi." He once told the London Evening Standard: "I admire everything Hitler did, apart from one thing - losing."

Stuart's legacy, Blood and Honour (its name is the translation of an SS slogan) is a frenzied amalgam of racist lore and music. Organically it has been described as not so much a political organization as "a neo-Nazi street movement." Influential among Skinheads throughout Europe and the United States, Blood and Honour acts as an umbrella organization for 30 or more Skin rock groups, publishes a magazine (also called Blood and Honour)[1] and runs a mail order service for "white pride" paraphernalia, which is said to have thousands of accounts.

The Skinhead bands affiliated with the Blood and Honour movement have their own security guards. Not known for their restraint, these guards often battle perceived enemies at clubs where the bands perform and out in the street.

Since Stuart's death, Blood and Honour has reportedly fallen under the influence of Combat 18 (18 is a code for Adolf Hitler's initials), a violent neo-Nazi group that counts Skinheads and football hooligans among its followers.

"You don't become a member of Blood and Honour," a BBC report stated. "You support it by buying the records, carrying the flag, wearing the T-shirts and the tattoos."

And sometimes by other means...

"Paki-bashing"

Assaults on Asians ("Paki-bashing") and homosexuals ("fag-bashing") have become standard forms of Skinhead brutality, as have desecrations of synagogues and Jewish cemeteries. A march through South East London protesting racial violence recently was disrupted by Skinheads who pelted the marchers with bricks and bottles. The Skins then turned on the police whom they forced to retreat by attacking

them with stones and crash barriers.

On the night of September 11, 1993, 30 neo-Nazi Skinheads marched through Brick Lane in the heart of a predominantly Asian neighborhood, breaking shop windows and menacing residents. "We're being deprived of what's ours," a young Skinhead was quoted in the newspapers a few nights later, "but we're fighting back now!"

Many Skins have served time. Kev Turner, leader of the popular Skin band Skullhead, for example, can boast a 20-month sentence for assault. Another Skullhead regular, Neil Carter, was jailed for nine months for his part in an attack on a nightclub owner.

Football Hooligans

Skinheads are fanatical supporters of certain English soccer (football) teams. Along with the more numerous football hooligans - many of whom share their neo-Nazi views - Skinheads are among the ringleaders of the racism and violence that plague English soccer. Skinheads are frequently seen at matches making Nazi salutes and taunting black players with vicious racist barbs. Violence, however, is their specialty. Joined by non-Skinhead members of Combat 18 and unaffiliated hooligans, Skins attack other fans (both rivals and fellow supporters) and run riot through stadiums, pubs and train stations. While the mayhem is often spontaneous, there is increasing evidence that soccer-related violence is sometimes planned in advance and orchestrated by a few dozen individuals, many of whom have a neo-Nazi agenda.

Neo-fascist Connections

A number of hard-core Skinheads have been active in several neo-fascist groups that have long tried to control the Skinhead scene. Most prominent among these are the racist and anti-Semitic British National Party (BNP), and the aforementioned Combat 18. The BNP participates in elections and enjoys small pockets of support in areas of London, Yorkshire, and Lancashire. Combat 18, with a core of between 100 and 150 members, is committed to violence and harassment rather than political gains. While Skinheads formerly identified with the BNP - and reportedly assisted in some of its initial modest electoral success - they have increasingly switched their allegiance to Combat 18 in recent years.

Rock 'n' Roll

The message of the Skinheads booms from their music. It is violent, racist, paranoid, and "Nordic." All of the bands seem to catch the spirit of one called British Standard when it sings:

The Iron Guard of Europe
Has risen from the grave
They march along as one now
A New Order they must save.

Skrewdriver's "White Rider" brays:

You feel love for your people
Disdain for the fools
The enemies led by the Zionist tools...

Last Chance, a now-defunct British skinzine, recently reviewed the first Skrewdriver album to be recorded after Ian Stuart's fatal car crash in late 1993: Tunes such as "Hail Victory," "vampire," and "White Noise," would, it said, "bring a tear to many eyes."

Another auto accident - this one in March 1992 - killed three of the four members of the group Violent Storm, whose home was Cardiff, Wales. They were on their way to Heathrow Airport for a flight to Spain, where they were scheduled to perform at a Skinhead concert that featured other British bands. The lone survivor, "Billy," later joined "Miffy," "Clarkey," and "Stinko" in a new band, Celtic Warrior, to "sing about the things we feel are important" - such as the "evils of Zionism" and the struggle for "our race."

The visions of the Skinhead mind are starkly reflected in some of the bands' names: Brutal Attack [...], Battle Zone, Razor's Edge, No Remorse (this last referring specifically to the memory of the Holocaust). The recurrent theme of British Skinhead music is that only a race war, with the inner cities as battlegrounds, will bring about the reclamation of British soil. "White Warriors," epitomizes this:

Fighting in the city,
It's a matter of life and death,
It's as easy as black and white,
You'll fight till your last breath...
When the battle is over,
And the victory is won,
The White man's lands are owned
By the White people,
The traitors will all be gone.

The steamy enthusiasm of Britain's Skinheads is kept at a high pitch by an abundance of zines published by a huge amateur underground network. The zines, such as Blood and Honour, Boots and Braces, Truth at Last, British Oi!, Offensive Weapon and Aryan Warrior, are mostly crude, slapdash photocopy productions comprising events calendars, ads, interviews, fan photos, letters, Skin gossip, etc. and abounding in Nazi and Odinist imagery. They also serve as effective links with their brethren on the Continent and across the globe.

Whether or not the reports of a slow decline in Skinhead numbers are accurate, it is generally agreed by those who monitor their activities that the Skinheads of Britain represent no mere passing fad - as the

very longevity of the phenomenon shows. Having weathered 20 years of ebb and flow, it continues to poison young minds, perpetrate group violence and sing its vicious joy to the bewitched. (Anti-Defamation League, 73-76)

1. Similarly named publications have also appeared in California and Sweden.

Brann i rasenes leir

Fredag den 17. januar ble den dansk/japanske nazisten, Thomas Derry Nakaba, arrestert etter å ha postet tre brevbomber. En politimann ble skadeskutt under arrestasjonen. 7 andre nazister ble også arrestert i det som ser ut til å være opprullingen av en terrorgruppe med tilknytning til det britiske Combat 18.

Nakaba var tidligere medlem av Danmarks nasjonalsocialistiske bevegelse (DNSB). Etter den fiaskopregede Hess-marsjen i Roskilde i Danmark i 1995, meldte han seg ut og dannet sin egen gruppe. De tre avsendte brevbombene var adressert til svarte idrettsstjerner i Storbritannia. I 1994 mottok svenske musikere og journalister tilsvarende bomber, uten at det hittil har lyktes noen å finne avsenderen.

Væpnet nazikonflikt

Det ser imidlertid ut til at hatet mot andre nazister er like sterkt som hatet til folk med annen hudfarge. I følge det elektroniske nyhetsbrevet til det amerikanske nazimagasinet Resistance, ble samtidig fire andre

brevbomber sendt til nazister i Storbritannia. De påtenkte mottakerne har det til felles at de står på motsatt side av C18 i den pågående krigen innbyrdes mellom nazister. Resistance går svært langt i å hevde at det er en sammenheng mellom alle brevbombene, og at C18 står bak.

Krig om penger

Striden, som står mellom C18 og deres allierte på den ene siden, og det svenske Nordland og det amerikanske Resistance på den andre, dreier seg om inntektene fra salg av nazirock. Sentralt i konflikten står gjensidige påstander om at motparten er engasjert i nazirocken bare for å tjene penger på den. I en artikkel i det svenske nazirock-bladet Nordland skriver Resistance-sjef George (Hawthorne) Burdi at C18 gjennom sin praksis Çer fiender av den hvite rase og hvit makt-bevegelsenÈ. En rekke naziband som har fått platene sine utgitt på C18 tilknyttede selskaper som White Terror, ISD og NS88 har ikke fått betalt til tross for relativt god omsetning. C18 dermot beskylder Hawthorne & co for å monopolisere nazirocken og kun være opptatt av profitten. For å gjøre rotet komplett finnes det en tredje, såkalt uavhengig retning, Hammerskins, som oppstod i USA. Problemet er bare at den franske seksjonen har sluttet seg til C18, mens den britiske støtter kretsen rundt Resistance.

Hvor står norske rasister?

Norske høyreekstremister har forsøkt å ri to hester i striden. De eneste uttalelser som har kommet i sakens anledning har vært vage formuleringer av typen -La oss nå være venner alle sammen. Fritt Forums salgsorganisasjon, NordEffekter, har ufortrødent solgt plater og materiale fra begge sider. Kretsen rundt Fritt Forum har startet en norsk versjon av Blood and Honour. Blood and Honour kommer opprinnelig fra England, hvor det ble etablert som et nettverk av rasistiske og nazistiske rockeband. Nettverket stod for utgivelsen av blader og plater, samt arrangering av hvit makt-konserter. De siste årene har Blood and Honour vært underlagt C18. Norske Blood and Honour har i midlertid tilbydd effekter fra alle leire. Nå ser det imidlertid ut til at den norske fløyen må revurdere sin nøytralitet. Nordland/Resistance-fløyen har nemlig erklært at alle som fortsatt har kontakt med C18, eller overhodet overveier å ha det, er ute av den internasjonale bevegelsen.

<http://www.bloodandhonour.com/jewwatch.html>

"BALKAN JEW WATCH": THEY ARE ALL CHOSEN!

The war raging in Eastern Europe is a text book case of all that which National Socialists have been preaching for decades. AND it gives the national revolutionary resistance movement a unique potential to organize on a grand scale, winning not only new supporters but also new allies, while our enemies stand out more and more like the cosmopolitan aggressors and imperialists they really are.

Still, it looks like our people once again are missing the train. While a conflict of world-shattering dimensions are raging, most of the so-called national socialists in western Europe seem to be more

occupied with who will play on the next WP gig or when the next memorial party will take place. While all the time deep down you can sense the rotten stench of outdated chauvinism and ethnic arrogance. Serbs are "reds", Serbs were "our enemies", Serbs are "only" Slavs, or "our boys" are fighting down there... Well, I shouldn't even bother to answer these arguments if it were not for their cursed frequency among "our" people.

Firstly, most Serbs are NOT "reds". The second biggest party in Serbia is the Nationalist Radical Party with close ties to both Le Pen and Sjinovski. And as for Milosovic, he is no more "red" than Saddam Hussein - and anyhow he is the sworn enemy of our enemies, which in my book makes him a friend now. Secondly, how long shall we decide the politics of our future and the company we keep by who was and who wasn't Germany's allies more than half a century ago? The Muslims of Bosnia were allies of the 3rd Reich too, as were many Albanians. (Plus a range of far more exotic people further eastS) Credit where credit is due, but that hardly makes them our present allies! Thirdly, the Slavs are Whites too, no matter what certain xenophobics blinded by the mirror image of their own imaginary superiority burp up between the bottles of beer and McDonald's burgers (most likely served to them by some Turkish wage slaveS). And finally, "our boys" are - unfortunately - fighting nowhere (not counting the real warriors in Serbia itself). Pompous teabaggers, braindead MTV warriors, ghetto soldiers and fancy frog eaters playing war from the safety of their command centres or cockpits high above the suffering civilians, are not, and never shall be, "our boys". Those who still believe that a passport is the proof of common identity and destiny are as much our enemies as those who issue the passports.

Which brings us to the nature of our real enemy. (In case someone forgot!) Just who is organizing the war against Serbia? The answer is an easy one. Naturally, it is none other than the chosen plague that has cursed this world with war and aggression since it once upon a time emerged from the deadly deserts of the unholy land. We won't bother with any analytic exercises this time. Just a few plain facts:

1. Nominally in charge is the errand boy Bill Clinton, whose cabinet by the words of American organized Jewry is more Jewish than ever before in the history of USA. Privately, Bill's lower head was dominated by the Jewess Monica Lewinsky, while the upper one is ordered about by his wife Hillary, who is at least believed to be of Jewish descent. Whatever, Mr. Clinton is, as pointed out, a mere front figure. The executers of the Zionist schemes are of the through-and-through Kosher variety.
2. Madelaine Albright, the old witch who initiated the bombing campaign, is a much publicized Czech Jewess.
3. The US minister of defence, is the Jew Cohen.
4. The press spokesman for the secretary of state, leading the verbal attacks on Serbia, is the Jew James Rubin.
5. US ambassador for war crimes (!) is the Jew David Scheffer. His bizarre excuse for NATO murdering civilians in Serbia and the Serb province of Kosovo, is that the Serbs are to blame for putting the

civilians in the way of the NATO bombs! (See interview in the Danish daily Politiken 19th of May.)

6. The general who is leading NATO's military aggression against Serbia, Wesley Kanne Clark, is son of the Jew Benjamin Jacob Kanne. Not too eager to make his ancestry public, the pseudo-protestant general, who learnt about his Jewish roots when he was 20, refused to comment on the case when International Herald Tribune questioned him. (See IHT 4th of May.)

7. The US negotiator of the Dayton "peace plan" Richard Holbrooke, who may very well be a Jew himself, disclosed to the International Herald Tribune that "my wife discovered she was Jewish in her 30s".

These Kosher conspirators, plotting for world Zionism, are on the side of NATO and its war against the White and proud nation of Serbia. On which side are you?

ALFRED SLAYERMAN

POLICE KEPT NEO-NAZI ON PAYROLL

The Observer, sunday, 5 april 1998

Race crimes ignored as Met exploited Combat-18's links with Ulster loyalists, reports Henry McDonald

Special Branch officers turned a blind eye to racist violence in Britain by a neo-Nazi terror group because its founder was spying on Ulster loyalists for the police.

Charlie Sargent, the former leader of Combat 18 now serving a life sentence for murder, worked as a paid informer for the Metropolitan Police gathering intelligence on the Ulster Defence Association.

Combat 18's crimes went unpunished as Sargent provided information to the security forces about UDA gun-running operations in Britain. He was recruited to spy on the loyalist terrorists at the height of their murder campaign in the early Nineties.

All through this period the former Combat 18 leader planned and formulated arson attacks on anti-racism activists. This is contrary to Home Office guidelines which state that informants must "not actively engage in planning and committing a crime".

The revelation is made on ITV's World In Action programme tomorrow evening. The disclosure will confirm the already widely-held suspicions of other loyalist organisations that Combat 18 members were working as agents for the security services.

A Combat 18 cell in East Belfast was shut down at gunpoint by the Ulster Volunteer Force just before the loyalist ceasefire four years ago. UVF commanders in the area told The Observer that they believed the fascist grouping was infiltrated by police and MI5 agents acting on orders to inform on loyalists.

Combat 18 linked up with members of the UDA's London cell in the early Nineties when the loyalist organisation was seeking to buy detonators for bombs to be used in a campaign in the Irish Republic against what it claimed was the re-emergence of a pan-nationalist front consisting of the Dublin government, the SDLP and Sinn Fein.

A new more militant UDA leadership had emerged after the Stevens inquiry into the leaking of security files to loyalists in 1989. These younger leaders such as the Shankill Road UDA commander Johnny Adair and his "2nd Battalion" had links in the mid-1980s with neo-Nazi groups like the National Front in Belfast. Several members of the battalion were in a Nazi-skinhead group called Offensive Weapon.

They used their British fascist contacts to obtain detonators. Meanwhile, the RUC and other branches of the security services were finding it increasingly difficult to infiltrate the new UDA.

The RUC had just lost its prize loyalist informant, Tommy "Tucker" Lyttle, the former UDA commander, removed from the organisation in a hardline coup in 1989.

The police saw Combat 18 as a perfect vehicle to infiltrate the UDA, which by 1993 was out-killing all other paramilitary organisations in Northern Ireland.

A former Combat 18 activist tells the programme of their involvement with the UDA: "All the leadership... the generals of Combat 18, are known UDA members. They're in close contact with the commander of the UDA. They organise and run socials, provide security for visiting loyalists in this country."

Sargent's connection with the UDA came to light in 1993 when Frank Portinari and Eddie Whicker were arrested for their part in an attempt to smuggle handguns to Northern Ireland. World In Action claims these guns - and two other assignments that got through - were supplied by Combat 18.

After the arrests of Portinari and Whicker, Sargent began to work directly with the UDA's commander in East Belfast, regularly visiting the city. The East Belfast UDA leader also asked Sargent at a meeting in a central London pub to provide detonators and ecstasy tablets. This loyalist is known by the RUC to have amassed a small fortune from selling ecstasy in Northern Ireland.

In the World In Action programme an undercover policeman who infiltrated Combat 18 says he believed Sargent worked for Special Branch.

"I would get a call [from the police]: "Can you confirm this?" This was before I put any reports in.

Someone was getting intelligence before I could. I was in no doubt it had to be someone in the top two or three. Then I concluded it had to be Sargent himself, it had to be him," he said. While Sargent was developing links with the East Belfast UDA man and reporting back to his police handlers, he was also organising attacks on anti-racism activists and journalists.

In January 1995 police from Scotland Yard's Special Branch raided the home of fellow Combat 18 activist Will Browning. Among bomb manuals and an instruction booklet for snipers, the police found documentary evidence that Combat 18 was watching targets, including World In Action journalist Quentin McDermott who had worked on a previous investigation into the neo-Nazi group.

The programme asked a handwriting expert to examine one of the documents. He concluded it was written by Sargent. So, although a police informant, Sargent was still selecting people for attack.

The programme also alleges that McDermott was not warned about his name being on a Combat 18 hit list.

Two weeks after the raid on Browning's home, Combat 18 firebombed the home of Jill Emerson, an Anti-Nazi League activist in Gravesend, Kent. She and her three children survived because a fire door had been installed after an earlier threat. She had been running a campaign against a local Combat 18 member who was a friend of Sargent's.

The former Combat 18 activist on the programme admits that "Charlie wanted her torched" - implying that the police informant was still targeting victims.

Sargent's "career" as an informant came to an abrupt end after his expulsion from Combat 18. His fellow fascists accused him of being an informer after Danish and London police foiled a letter-bomb plot against media and sports celebrities towards the end of 1996. Sargent reacted violently to the accusation, and the furore caused a split in the far-right faction. In February last year Sargent and his close friend Martin Cross ambushed and stabbed Combat 18 supporter Chris Castle, an ally of rival leader Will Browning. Unknown to Sargent, Browning had been with Castle that day and had also been arrested.

The programme has a copy of a tape on which Browning's lawyer demands to know Sargent's relationship with Special Branch. Sargent allegedly told police that he was a Special Branch informer and demanded to see his handler during the interrogation.

In January this year Sargent and Cross were both found guilty of murder and jailed for life. Sargent has refused to discuss his role as a police agent inside Combat 18.

It is understood that the UDA leadership in Belfast has conducted an investigation into its members' links with Combat 18. Several members of the Inner Council, the UDA's ruling body, have expressed disquiet about contacts with the British far Right believing them to be untrustworthy and a security risk.

Meanwhile, Combat 18 has shifted its allegiance to hardline loyalists opposed to the UDA-UVF ceasefires. Combat 18 has published pictures of the "Trick or Treat" murderers led by Torrens Knight inside the Maze prison.

These killers belonged to the UDA when they carried out the Greysteel massacre of six Catholics and one Protestant at a bar on Halloween 1993. A year after they were convicted the killers were expelled from the UDA wings inside the Maze for opposing the peace process.

Eighteen months ago the Greysteel killers joined the anti-ceasefire Loyalist Volunteer Force wing, where they maintained a correspondence with Combat 18 activists in Britain.

One of Combat 18's supporters in Northern Ireland is Shaun Leighton, a convicted Ulster Resistance terrorist who has also switched allegiance to the LVF since the ceasefires. Leighton has written letters to Sargent's younger brother and also writes articles for Combat 18 publications.

Loyalism's relationship with the British far-Right has been a mixture of menace and high farce. In the Seventies the now defunct British Movement attempted to set up links with the UDA. As a gesture of their contempt, UDA commander Andy Tyrie sent Louis Scott, a prominent black member of the loyalist organisation, to meet the British Movement and inform them they were not interested.

In the Eighties the UVF met representatives of the Belgian Flemish Military Order, or VMO, with a view to buying explosives from the Euro-Nazi grouping. The VMO, which had a frighteningly large arsenal of guns and explosives, offered the UVF weapons on condition that the loyalists attacked Jewish targets in Ireland. The UVF declined and the connections with the VMO were severed.

The UVF's political wing, the Progressive Unionist Party, now denounces any loyalists who look for support among the micro-factions of the British far-Right. David Ervine, the PUP's chief negotiator, said Combat 18's politics were "an anathema" to Ulster loyalists.

"They tried to get a foothold in some clubs in East Belfast in 1994 and I personally threw their leaflets away where they belong - in the bin," he said.

Neonazi-Anschlag in London

Fünf Verletzte im Immigrantenviertel Shoreditsch - Reaktion auf Rassismus-Debatte

London - Neonazis haben offenbar zum zweiten Mal in acht Tagen einen Bombenanschlag in einem Ausländerviertel in London verübt.

Dabei wurden am Samstag im Stadtteil Shoreditch fünf Menschen verletzt. Zu der Tat bekannte sich die Neonazi-Gruppe „Combat 18“. Die Polizei geht nach eigenen Worten von einem „rassistischen Verbrechen“ aus.

Der Chef der Anti-Terror-Abteilung von Scotland Yard, Alan Fry, verwies auf die Gemeinsamkeiten mit dem ersten Anschlag am Samstag vergan ener Woche, bei dem 39 Menschen zum Teil schwer verletzt worden waren. In beiden Fällen explodierte die Bombe am Nachmittag in einem Ausländerviertel in der Nähe eines belebten Straßenmarktes, war in einer Sporttasche versteckt und mit Nägeln gespickt.

Die herumstehende Sporttasche hatte nach Polizeiangaben den Verdacht eines Passanten erregt. Der Mann brachte die Tasche in seinem Kofferraum zur nächsten Polizeiwache, doch noch in seinem Auto explodierte die Bombe. Der Mann wurde nur leicht verletzt. Die britische Presse feierte ihn am Sonntag als Held.

Shoreditch in Ost-London wird vor allem von Immigranten aus Bangladesch bewohnt. Vor 20 Jahren hatte dort der Antirassist Blair Peach gewirkt, an dessen gewaltsamen Tod an diesem Samstag mit einer Gedenkfeier erinnert wurde. Ladenbesitzer und Gastwirte in Shoreditch waren in der vergangenen Woche von anonymen Anrufern gewarnt worden: „Ihr seid die nächsten.“ Der britische Premierminister Tony Blair bezeichnete den Anschlag als empörend. „Wir werden alles tun, um die Verantwortlichen zu finden und sie vor Gericht zu stellen“, sagte er.

„Combat 18“ hatte sich auch zu dem ersten Anschlag in dem als „Schwarzenviertel“ bekannten Stadtteil Brixton bekannt. Die Zahl 18 im Namen der Gruppe verweist auf den ersten und den achten Buchstaben des Alphabets - A und H, die Initialen von Adolf Hitler. „Combat 18“ ist eine Absplitterung der rechtsextremen British National Party und war in den vergangenen Jahren schon mehrmals für Gewalttaten verantwortlich gemacht worden. Im Januar wurden bei Mitgliedern der Gruppe Todeslisten mit den Namen bekannter Antirassisten gefunden. Die Gruppe soll auch Verbindungen zu Fußballgewalttätern und protestantischen Extremisten in Nordirland haben.

Menschenrechtsgruppen und Ausländervereinigungen warnten am Sonntag vor einer „Kampagne des Rassenterrors“. Fachleute für die rechtsextreme Szene erläuterten, die Neonazis reagierten mit den Anschlägen auf eine breite gesellschaftliche Diskussion über Rassismus.

Die Debatte war durch die Veröffentlichung eines Untersuchungsberichts ausgelöst worden, der der Londoner Polizei vorwarf, „strukturell rassistisch“ zu sein.

Gewonde bomaanslag Osdorp gearresteerd

Geplaatst: 7/2/99 11:29:00 AM

VIANEN/AMSTERDAM. - De 44-jarige man die donderdag bij de bomaanslag in Amsterdam-Osdorp gewond raakte, is gearresteerd. De politie onderzoekt welke rol de man bij het incident heeft gespeeld. Bij de aanslag kwam zijn 27-jarige vriendin om het leven.

Uit onderzoek is gebleken dat het om een afrekening gaat in het criminele circuit en dat het explosief niet voor de vrouw was bedoeld. Het is nog niet duidelijk voor wie wel, aldus de politie.

De Volkswagen Polo waarin de vrouw zat explodeerde op de Bonhoeffersingel in een rustige woonwijk, vlak nadat zij in de auto was gestapt en was weggereden. De man reed achter haar aan toen de auto explodeerde.

De man raakte gewond toen hij probeerde de vrouw, met wie hij samenwoonde, uit de auto te halen die na de explosie in brand was gevlogen. De brandwonden die de man opliep toen hij de vrouw uit de auto haalde bleken mee te vallen.

Na de explosie heeft de politie een woning doorzocht, waar het stel op bezoek was geweest, maar dit heeft niets opgeleverd. De recherche heeft zestien man op de zaak gezet.

<http://www.telegraaf.nl/krant/vandaag/teksten/bin.vrouw.html>

Vrouw (27) gedood bij bomaanslag op auto

vrijdag 2 juli 1999

AMSTERDAM, vrijdag. Een 27-jarige vrouw uit Amsterdam-Zuid is gistermiddag in Amsterdam-Osdorp geliquideerd door middel van een zware autobom.

De vrouw reed door een nieuwbouwwijk, toen haar zwarte Volkswagen Polo explodeerde. Over de vraag of het toeval is dat de auto op deze plaats ontplofte, laat de politie zich niet uit.

De politie spreekt van een "zeer zware autobom die onder of in de auto is geplaatst".

Haar vriend, een 44-jarige Joegoslaaf met wie de vrouw in Amsterdam-Zuid woonde, reed tijdens de explosie vlak achter haar. Hij probeerde de vrouw nog te redden, sleurde haar uit haar auto en liep zware brandwonden op.

Het drama voltrok zich gistermiddag even na twee uur, toen de vrouw stapvoets over de Bonhoeffersingel reed. Ter hoogte van nummer 13 explodeerde de auto. De knal was tot in de wijde omtrek te horen.

De Polo vloog onmiddellijk in brand. Buurtbewoners wisten het vuur vrij snel te blussen, maar net als haar vriend konden ook zij de vrouw niet meer te redden.

De politie zette de straat direct af, terwijl de auto door ME-busjes aan het oog van de vele nieuwsgierigen werd onttrokken.

"De klap die we hoorden, was niet normaal meer. Zo verschrikkelijk hard", zei een geschokte buurman.

In het wegdek onder de auto zaten forse gaten. In de buurt sneuvelde een garagedeur en enkele ruiten.

Diverse auto's raakten beschadigd.

De politie heeft een team van rechercheurs op de zaak gezet en met een helikopter luchtfoto's gemaakt op de plaats van het delict. Om wat voor bom het exact gaat, is niet duidelijk.

Vorig jaar ontplofte ook al een autobom in Osdorp. Die wagen, een Audi, stond geparkeerd voor een school. Er vielen toen geen slachtoffers.

De 27-jarige Amsterdamse vrouw ligt in levenloos naast haar zwarte Volkswagen Polo, waarin even tevoren een zware bom is ontploft. Het drama voltrok zich gisteren even na twee uur in de Bonhoeffersingel, een straat in een keurige woonwijk in Amsterdam-Osdorp. Over de achtergrond van de aanslag heerst onduidelijkheid.

<http://www.volkskrant.nl/indruk/310020132.html?history=/i25000006>

Vrouw gedood door autobom in Amsterdam

2 juli 1999

Een autobom die donderdag in Amsterdam-Osdorp explodeerde, heeft het leven gekost aan een 27-jarige vrouw uit Amsterdam. Haar vriend, een man van Joegoslavische afkomst, liep zware verwondingen op toen hij haar uit het brandende autowrak sleurde. De politie gaat uit van een aanslag.

De bom ontplofte rond twee uur op de Bonhoeffersingel, toen de vrouw enkele tientallen meters had gereden. De auto had volgens buurtbewoners maandenlang ongebruikt in de buurt gestaan. Haar vriend reed in een auto achter haar. De identiteit van het stel is niet vrijgegeven.

Voordat ze met de auto's wegreden, waren de twee op bezoek geweest in de Marianellastraat, bij een uit

Macedonië afkomstig gezin. Volgens burens was het hier meestal een komen en gaan van bezoekers, maar meer is niet bekend. De politie doorzocht gisteren het hele huis.

De explosie, die de auto totaal verwrong, ging gepaard met een vuurzee. De buurtbewoonster die de politie alarmeerde, zegt dat ze vanwege de hitte niet dichterbij dan een paar meter in de buurt kon komen. Bovendien was ze bang dat meer ontploffingen zouden volgen. De vriend van het slachtoffer ging wel de brand in en slaagde erin zijn partner uit de auto te halen.

<http://www.telegraaf.nl/krant/vandaag/teksten/bin.autobom.html>

Autobom was voor ander bedoeld

3 juli 1999

De 27-jarige vrouw die donderdag om het leven kwam toen de auto waarin zij reed werd opgeblazen, is het verkeerde slachtoffer van een afrekening in het criminele milieu.

De bom die in de zwarte Polo was geplaatst was niet voor haar bedoeld, maar voor een ander. De 44-jarige Joegoslavische vriend van de vrouw is door de politie gearresteerd omdat de Amsterdamse politie wil weten welke rol de Joegoslaaf in het geheel speelt. Hij is een bekende van de politie.

Zeer waarschijnlijk kwamen de vrouw en haar vriend terug van een vakantie en hadden zij de bewuste auto voor enkele weken in de straat van een vriendin van de vrouw geparkeerd.

Preface

Congress has requested that the Intelligence Community produce annual reports on ballistic missile developments. We produced the first report in March 1998 and an update memorandum in October 1998 on the August North Korean launch of its Taepo Dong-1 space launch vehicle (SLV). Our 1999 report is a classified National Intelligence Estimate, which we have summarized in unclassified form in this paper.

This year we examined future capabilities for several countries that have or have had ballistic missiles or SLV programs or intentions to pursue such programs. Using intelligence information and expertise from inside and outside the Intelligence Community, we examined scenarios by which a country *could* acquire an ICBM by 2015, including by purchase, and assessed the *likelihood* of various scenarios. (Some analysts believe that the prominence given to missiles countries "could" develop gives more credence than is warranted to developments that may prove implausible.) We did not attempt to address all of the potential political, economic, and social changes that could occur. Rather, we analyzed the level of success and the pace countries have experienced in their development efforts, international technology transfers, political motives, military incentives, and economic resources. From that basis, we projected *possible* and *likely* missile developments by 2015 independent of significant political and economic changes. Subsequent annual reports will be able to account for such changes.

Our projections for future ICBM developments are based on limited information and engineering judgment. Adding to our uncertainty is that many countries surround their ballistic missile programs with secrecy, and some employ deception. Although some key milestones are difficult to hide, we may miss others. For example, we may not know all aspects of a missile systems configuration until flight testing; we did not know until the launch last August that North Korea had acquired a third stage for its Taepo Dong 1.

We took into account recommendations made in July 1998 by the Commission to Assess the Ballistic Missile Threat to the United States and incorporated the results of several academic and contractor efforts, including politico-economic experts to help examine future environments that might foster ICBM sales and missile contractors to help postulate potential ICBM configurations that rogue states could pursue.

Key Points

We project that during the next 15 years the United States most likely will face ICBM threats from

Russia, China, and North Korea, probably from Iran, and possibly from Iraq. The Russian threat, although significantly reduced, will continue to be the most robust and lethal, considerably more so than that posed by China, and orders of magnitude more than that potentially posed by other nations, whose missiles are likely to be fewer in number—probably a few to tens, constrained to smaller payloads, and less reliable and accurate than their Russian and Chinese counterparts.

We judge that North Korea, Iran, and Iraq would view their ICBMs more as strategic weapons of deterrence and coercive diplomacy than as weapons of war. We assess that:

- North Korea *could convert* its Taepo Dong-1 space launch vehicle (SLV) into an ICBM that could deliver a light payload (sufficient for a biological or chemical weapon) to the United States, albeit with inaccuracies that would make hitting large urban targets improbable. North Korea is *more likely to weaponize* the larger Taepo Dong-2 as an ICBM that could deliver a several-hundred kilogram payload (sufficient for early generation nuclear weapons) to the United States. Most analysts believe it could be tested at any time, probably initially as an SLV, unless it is delayed for political reasons.
- Iran *could test* an ICBM that could deliver a several-hundred kilogram payload to many parts of the United States in the last half of the next decade using Russian technology and assistance. Most analysts believe it could test an ICBM capable of delivering a lighter payload to the United States in the next few years following the North Korean pattern.

—Analysts differ on the likely timing of Iran's first test of an ICBM that could threaten the United States—assessments range from *likely before 2010 and very likely before 2015* (although an SLV with ICBM capability probably will be tested in the next few years) to *less than an even chance* of an ICBM test by 2015.

- Iraq *could test* a North Korean-type ICBM that could deliver a several-hundred kilogram payload to the United States in the last half of the next decade depending on the level of foreign assistance. Although less likely, most analysts believe it *could test* an ICBM that could deliver a lighter payload to the United States in a few years based on its failed SLV or the Taepo Dong-1, if it began development now.

—Analysts differ on the likely timing of Iraq's first test of an ICBM that could threaten the United States—assessments range from *likely before 2015, possibly before 2010* (foreign assistance would affect capability and timing) to *unlikely before 2015*.

- By 2015, Russia will maintain as many nuclear weapons on ballistic missiles as its economy will allow but well short of START I or II limitations.
- By 2015, China is likely to have tens of missiles capable of targeting the United States, including

a few tens of more survivable, land- and sea-based mobile missiles with smaller nuclear warheads—in part influenced by US technology gained through espionage. China tested its first mobile ICBM in August 1999.

Sales of ICBMs or SLVs, which have inherent ICBM capabilities and could be converted relatively quickly with little or no warning, could increase the number of countries able to threaten the United States. North Korea continues to demonstrate a willingness to sell its missiles. Although we judge that Russia or China are unlikely to sell an ICBM or SLV in the next fifteen years, the consequences of even one sale would be extremely serious.

Several other means to deliver weapons of mass destruction to the United States have probably been devised, some more reliable than ICBMs that have not completed rigorous testing programs. For example, biological or chemical weapons could be prepared in the United States and used in large population centers, or short-range missiles could be deployed on surface ships. However, these means do not provide a nation the same prestige and degree of deterrence or coercive diplomacy associated with ICBMs.

The proliferation of medium-range ballistic missiles (MRBMs)—driven primarily by North Korean No Dong sales—has created an immediate, serious, and growing threat to US forces, interests, and allies, and has significantly altered the strategic balances in the Middle East and Asia. We judge that countries developing missiles view their regional concerns as one of the primary factors in tailoring their programs. They see their short- and medium-range missiles not only as deterrents but also as force-multiplying weapons of war, primarily with conventional weapons, but with options for delivering biological, chemical, and eventually nuclear weapons. South Asia provides one of the most telling examples of regional ballistic missile and nuclear proliferation:

- Pakistan has Chinese-supplied M-11 short-range ballistic missiles (SRBMs) and Ghauri MRBMs from North Korea.
- India has Prithvi I SRBMs and recently began testing the Agni II MRBM.
- We assess these missiles may have nuclear roles.

Foreign assistance continues to have demonstrable effects on missile advances around the world, particularly from Russia and North Korea. Moreover, some countries that have traditionally been recipients of foreign missile technology are now sharing more amongst themselves and are pursuing cooperative missile ventures.

We assess that countries developing missiles also will respond to US theater and national missile defenses by deploying larger forces, penetration aids, and countermeasures. Russia and China each have developed numerous countermeasures and probably will sell some related technologies.

Discussion

Introduction

The worldwide ballistic missile proliferation problem has continued to evolve during the past year. The proliferation of technology and components continues. The capabilities of the missiles in the countries seeking to acquire them are growing, a fact underscored by North Korea's launch of the Taepo Dong-1 in August 1998. The number of missiles in these countries is also increasing. Medium- and short-range ballistic missile systems, particularly if armed with weapons of mass destruction (WMD) warheads, already pose a significant threat to US interests, military forces, and allies overseas. We have seen increased trade and cooperation among countries that have been recipients of missile technologies from others. Finally, some countries continue to work toward longer-range systems, including ICBMs.

We expect the threat to the United States and its interests to increase over the next 15 years. However, projecting political and economic developments that could alter the nature of the missile threat many years into the future is virtually impossible. The threat facing the United States in the year 2015 will depend on our changing relations with foreign countries, the political situation within those countries, economic factors, and numerous other factors that we cannot predict with confidence.

- For example, 15 years ago the United States and the Soviet Union were superpower adversaries in the midst of the Cold War, with military forces facing off in central Europe and competing for global power. Today, by contrast, the differences that separated the two countries during that period have been replaced by differences expected between modern nation states.
- Iraq is another example; 15 years ago it shared common interests with the United States. Since Iraq's invasion of Kuwait in 1990, Washington and Baghdad have been in numerous military and diplomatic conflicts.
- Finally, we do not know whether some of the countries of concern will exist in 15 years in their current state or as suppliers of missiles and technology.

Recognizing these uncertainties, we have projected foreign ballistic missile capabilities into the future largely based on technical capabilities and with a general premise that relations with the United States will not change significantly enough to alter the intentions of those states pursuing ballistic missile capabilities. Future annual reports will be able to take account of any contemporary information that alters our projections.

The Evolving Missile Threat in the Current Proliferation Environment

The new missile threats confronting the United States are far different from the Cold War threat during the last three decades. During that period, the ballistic missile threat to the United States involved relatively accurate, survivable, and reliable missiles deployed in large numbers. Soviet—and to a much lesser extent Chinese—strategic forces threatened, as they still do, the potential for catastrophic, nation-killing damage. By contrast, the new missile threats involve states with considerably fewer missiles with less accuracy, yield, survivability, reliability, and range-payload capability than the hostile strategic forces we have faced for 30 years. Even so, the new systems are threatening, but in different ways.

First, although the majority of systems being developed and produced today are short- or medium-range ballistic missiles, North Korea's three-stage Taepo Dong-1 SLV demonstrated Pyongyang's potential to cross the 5,500-km ICBM threshold if it develops a survivable weapon for the system. Other potentially hostile nations could cross that threshold during the next 15 years. While it remains extremely unlikely that any potential adversary could inflict damage to the United States or its forces comparable to the damage that Russian or Chinese forces could inflict, emerging systems potentially can kill tens of thousands, or even millions of Americans, depending on the type of warhead, the accuracy, and the intended target.

Classification of Ballistic Missiles by Range

| | |
|---|-------------------|
| Short-range ballistic missile (SRBM) | Under 1,000 km |
| Medium-range ballistic missile (MRBM) | 1,000 to 3,000 km |
| Intermediate-range ballistic missile (IRBM) | 3,000 to 5,500 km |
| Intercontinental-range ballistic missile (ICBM) | Over 5,500 km |

Second, many of the countries that are developing longer-range missiles probably assess that the *threat* of their use would complicate American decision-making during crises. Over the last decade, the world has observed that missiles less capable than the ICBMs the United States and others have deployed can affect another nation's decision-making process. Though US potential adversaries recognize American military superiority, they are likely to assess that their growing missile capabilities would enable them to increase the cost of a US victory and potentially deter Washington from pursuing certain objectives. Moreover, some countries, including some without hostile intent towards the United States, probably view missiles as a means of providing an independent deterrent and war-fighting capabilities.

Third, the probability that a WMD-armed missile will be used against US forces or interests is higher today than during most of the Cold War. Ballistic missiles, for example, were used against US forces

during the Gulf war. More nations now have longer-range missiles and WMD warheads. Missiles have been used in several conflicts over the past two decades, although not with WMD warheads. Nevertheless, some of the regimes controlling these missiles have exhibited a willingness to use WMD.

Thus, acquiring long-range ballistic missiles armed with WMD will enable weaker countries to do three things that they otherwise might not be able to do: deter, constrain, and harm the United States. To achieve these objectives, these WMD-armed weapons need not be deployed in large numbers; with even a few such weapons, these countries would judge that they had the capability to threaten at least politically significant damage to the United States or its allies. They need not be highly accurate; the ability to target a large urban area is sufficient. They need not be highly reliable, because their strategic value is derived primarily from the threat (implicit or explicit) of their use, not the near certain outcome of such use. Some of these systems may be intended for their political impact as potential terror weapons, while others may be built to perform more specific military missions, facing the United States with a broad spectrum of motivations, development timelines, and resulting hostile capabilities. In many ways, such weapons are not envisioned at the outset as operational weapons of war, but primarily as strategic weapons of deterrence and coercive diplomacy.

The progress of countries in Asia and the Middle East toward acquiring longer-range ballistic missiles has been dramatically demonstrated over the past 18 months:

- Most notably, North Korea's three-stage Taepo Dong-1 SLV has inherent, albeit limited, capabilities to deliver small payloads to ICBM ranges. Although the Taepo Dong-1 satellite attempt in August 1998 failed, North Korea demonstrated several of the key technologies required for an ICBM, including staging. As a space launch vehicle, however, it did not demonstrate a payload capable of surviving atmospheric reentry at ICBM ranges. We judge that North Korea would be unlikely to pursue weaponizing a three-stage Taepo Dong-1 as an ICBM, preferring instead to pursue the much more capable Taepo Dong-2, which we expect will be flight tested this year, unless it is delayed for political reasons.
- Pakistan flight-tested its 1,300 km range Ghauri missile, which it produced with North Korean assistance. (Pakistan also flight-tested the Shaheen I SRBM.)
- Iran flight-tested its 1,300 km range Shahab-3—a version of North Korea's No Dong, which Iran has produced with Russian assistance.
- India flight-tested its Agni II MRBM, which we estimate will have a range of about 2,000 km.
- China conducted the first flight test of its DF-31 mobile ICBM in August 1999; it will have a range of about 8,000 km.

Many of these countries probably have considered ballistic missile defense countermeasures. Historically, the development and deployment of missile defense systems have been accompanied by the

development of countermeasures and penetration aids by potential adversaries, either in reaction to the threat or in anticipation of it. The Russians and Chinese have had countermeasure programs for decades and are probably willing to transfer some related technology to others. We expect that during the next 15 years, countries other than Russia and China will develop countermeasures to Theater and National Missile Defenses.

Threat Availability Before "Deployment"

Emerging long-range missile powers do not appear to rely on robust test programs to ensure a missile's accuracy and reliability—as the United States and the Soviet Union did during the Cold War. Similarly, deploying a large number of long-range missiles to dedicated, long-term sites—as the United States and the Soviet Union did—is not necessarily the path emerging long-range missile powers will choose. In many cases, a nation may decide that the ability to threaten with one or two long-range missiles is sufficient for its doctrinal or propaganda needs. China, for example, has only about 20 ICBMs; its doctrine requires only that it be able to hold a significant portion of an aggressor's population at risk.

With shorter flight test programs—perhaps only one test—and potentially simple deployment schemes, the time between the initial flight test and the availability of a missile for military use is likely to be shortened. Once a missile has performed successfully through its critical flight functions, it would be available for the country to use as a threat or in a military role. Thus, we project the year for a first flight test rather than the projected date for a missile's "deployment" as the initial indication of an emerging threat. Moreover, using the date of the first projected flight test as the initial indicator of the threat recognizes that emerging long-range missile powers may not choose to deploy a large number of missiles and that an adversary armed with even a single missile capable of delivering a WMD-payload may consider it threatening. Using the first flight test results in threat projections a few years earlier than those based on traditional definitions of deployment, which may not apply as well to the emerging threats.

Potential ICBM Threats to the United States

We project that during the next 15 years the United States most likely will face ICBM threats from Russia, China, and North Korea, probably from Iran, and possibly from Iraq, although the threats will consist of dramatically fewer weapons than today because of significant reductions we expect in Russian strategic forces.

- The Russian threat will continue to be the most robust and lethal, considerably more so than that posed by China, and orders of magnitude more than that posed by the other three.
- Initial North Korean, Iranian, and Iraqi ICBMs would probably be fewer in number—a few to tens rather than hundreds or thousands, constrained to smaller payload capabilities, and less reliable and accurate than their Russian and Chinese counterparts.

- Countries with emerging ICBM capabilities are likely to view their relatively few ICBMs more as weapons of deterrence and coercive diplomacy than as weapons of war, recognizing that their use could bring devastating consequences. Thus, the emerging threats posed to the United States by these countries will be very different than the Cold War threat.

North Korea. After Russia and China, North Korea is the most likely to develop ICBMs capable of threatening the United States during the next 15 years.

- North Korea attempted to orbit a small satellite using the Taepo Dong-1 SLV in August 1998, but the third stage failed during powered flight; other aspects of the flight, including stage separation, appear to have been successful.
- If it had an *operable* third stage and a reentry vehicle capable of surviving ICBM flight, a converted Taepo Dong-1 SLV *could* deliver a light payload to the United States. In these cases, about two-thirds of the payload mass would be required for the reentry vehicle structure. The remaining mass is probably too light for an early generation nuclear weapon but could deliver biological or chemical (BW/CW) warfare agent.
- Most analysts believe that North Korea *probably will test* a Taepo Dong-2 this year, unless delayed for political reasons. A two-stage Taepo Dong-2 could deliver a several-hundred kilogram payload to Alaska and Hawaii, and a lighter payload to the western half of the United States. A three-stage Taepo Dong-2 could deliver a several-hundred kilogram payload anywhere in the United States.
- North Korea is much *more likely* to weaponize the more capable Taepo Dong-2 than the three-stage Taepo Dong-1 as an ICBM.

Iran. Iran is the next hostile country most capable of testing an ICBM capable of delivering a weapon to the United States during the next 15 years.

- Iran *could test* an ICBM that could deliver a several-hundred kilogram payload to many parts of the United States in the latter half of the next decade, using Russian technology and assistance.
- Iran *could pursue* a Taepo Dong-type ICBM. Most analysts believe it could test a three-stage ICBM patterned after the Taepo Dong-1 SLV or a three-stage Taepo Dong-2-type ICBM, possibly with North Korean assistance, in the next few years.
- Iran is *likely to test* an SLV by 2010 that—once developed—could be converted into an ICBM capable of delivering a several-hundred kilogram payload to the United States.
- Analysts differ on the likely timing of Iran's first flight test of an ICBM that could threaten the

United States. Assessments include:

- likely* before 2010 and *very likely* before 2015 (noting that an SLV with ICBM capabilities will *probably be tested within the next few years*);
- no more than an *even chance* by 2010 and a *better than even chance* by 2015;
- and *less than an even chance* by 2015.

Iraq. Although the Gulf war and subsequent United Nations activities destroyed much of Iraq's missile infrastructure, Iraq could test an ICBM capable of reaching the United States during the next 15 years.

- After observing North Korean activities, Iraq *most likely would pursue* a three-stage Taepo Dong-2 approach to an ICBM (or SLV), which could deliver a several-hundred kilogram payload to parts of the United States. If Iraq could buy a Taepo Dong-2 from North Korea, it *could have a launch capability* within months of the purchase; if it bought Taepo Dong engines, it *could test* an ICBM by the middle of the next decade. Iraq probably would take until the end of the next decade to develop the system domestically.
- Although much less likely, most analysts believe that if Iraq were to begin development today, it *could test* a much less capable ICBM in a few years using Scud components and based on its prior SLV experience or on the Taepo Dong-1.
- If it could acquire No Dongs from North Korea, Iraq *could test* a more capable ICBM along the same lines within a few years of the No Dong acquisition.
- Analysts differ on the likely timing of Iraq's first flight test of an ICBM that could threaten the United States. Assessments include *unlikely* before 2015; and *likely* before 2015, possibly before 2010—foreign assistance would affect the capability and timing.

Russia. Russia's strategic offensive forces are experiencing serious budget constraints but will remain the cornerstone of its military power. Russia expects its forces to deter both nuclear and conventional military threats and is prepared to conduct limited nuclear strikes to warn off an enemy or alter the course of a battle.

- Russia currently has about 1,000 strategic ballistic missiles with 4,500 warheads.
- Its strategic force will remain formidable through and beyond 2015, but the size of this force will decrease dramatically—well below arms control limits—primarily because of budget constraints.
- Russia will maintain as many strategic missiles and associated nuclear warheads as it believes it can afford, but well short of START I or II limitations.

—If Russia ratifies START II, with its ban on multiple warheads on ICBMs, it would probably be able to maintain only about half of the weapons it could maintain without the ban.

- We judge that an unauthorized or accidental launch of a Russian strategic missile is highly unlikely so long as current technical and procedural safeguards are in place.

China. Chinese strategic nuclear doctrine calls for a survivable long-range missile force that can hold a significant portion of the US population at risk in a retaliatory strike.

- China's current force of about 20 CSS-4 ICBMs can reach targets in all of the United States.
- Beijing also is developing two new road-mobile, solid propellant ICBMs.

—It conducted the first flight test of the mobile DF-31 ICBM in August 1999; we judge it will have a range of about 8,000 km and will be targeted primarily against Russia and Asia.

—We expect a test of a longer range mobile ICBM within the next several years; it will be targeted primarily against the United States.

- China is developing the JL-2 SLBM, which we expect to be tested within the next decade. The JL-2 probably will be able to target the United States from launch areas near China.
- By 2015, China will likely have tens of missiles targeted against the United States, having added a few tens of more survivable land- and sea-based mobile missiles with smaller nuclear warheads—in part influenced by US technology gained through espionage.
- China has had the technical capability to develop multiple RV payloads for 20 years. If China needed a multiple-RV (MRV) capability in the near term, Beijing could use a DF-31-type RV to develop and deploy a simple MRV or multiple independently targetable reentry vehicle (MIRV) ¹ for the CSS-4 in a few years. MIRVing a future mobile missile would be many years off.
- China is also significantly improving its theater missile capabilities and is increasing the size of its SRBM force deployed opposite Taiwan.
- We assess that an unauthorized launch of a Chinese strategic missile is highly unlikely.

Foreign Assistance

Foreign assistance continues to have demonstrable effects on missile advances around the world. Moreover, some countries that have traditionally been recipients of foreign missile technology are now sharing more amongst themselves and are pursuing cooperative missile ventures.

- Russian missile assistance continues to be significant.
- China continues to contribute to missile programs in some countries.
- North Korea may expand sales.

Moreover, changes in the regional and international security environment—in particular, Iran's Shahab-3 missile test and the Indian and Pakistani missile and nuclear tests—probably will fuel missile and WMD interests in the region.

Sales of ICBMs or SLVs, which have inherent ICBM capabilities, could further increase the number of countries that will be able to threaten the United States with a missile strike. North Korea continues to demonstrate a willingness to sell its missiles and related technologies and will probably continue doing so, perhaps under the guise of selling SLVs. In the past, we judged that political conditions made the sale of a Russian or Chinese ICBM unlikely and that the geopolitical situation would not change enough for either to decide that the sale of an ICBM would be in its national interest. We have not detected the transfer of a complete ICBM by Russia or China, nor do we have any information to indicate either plans to transfer one. Projecting the likelihood of such a transfer 15 years into the future is very uncertain, driven in part by unpredictable future economic conditions, how Moscow will perceive its position vis—vis the West, and future Russian and Chinese perceptions of US ballistic missile defenses. As we attempt to project the politico-military-economic environment for that period, we continue to judge it unlikely that Moscow or Beijing would decide that the financial and perhaps strategic inducements to sell a complete ICBM, SLV, or the technologies tantamount to a complete ICBM, would outweigh the perceived political and economic risks of doing so. ²

[Warning Times and our Ability to Forecast Missile Development and Acquisition](#)

In our 1998 annual report, we stated we had high confidence that we could provide warning five years *before deployment* that a potentially hostile country was trying to *develop and deploy* an ICBM. Because countries of concern could threaten to use ballistic missiles following limited flight-testing and before a missile is *deployed* in the traditional sense, we broadened our warning in the 1998 update memorandum to encompass the first successful flight test as the beginning of an "initial threat availability."

Our ability to provide warning for a particular country is depends highly on our collection capabilities. For some countries, we have relatively large bodies of evidence on which to base our assessments; for others, our knowledge of the programs being pursued is limited. Our monitoring and warning about

North Korea's efforts to achieve an ICBM capability constitute an important case study on warning. In 1994, we were able to give five years warning of North Korea's efforts to acquire an ICBM capability. At that time, the Intelligence Community judged that:

- The Taepo Dong-1 was a two-stage, medium-range missile that could be tested in 1994 and deployed as early as 1996.
- The Taepo Dong-2 was a larger two-stage missile that would provide P'yongyang and other countries the potential to deliver nuclear weapons to parts of the United States, and biological and chemical weapons further. The Community judged that the Taepo Dong-2 flight test program would begin within a few years of 1994 with initial deployment in 2000 or later.

Thus, the Intelligence Community warned that North Korea was pursuing an ICBM capability and would flight test an ICBM (the Taepo Dong-2) in the mid- to late 1990s. When North Korea did not flight test either Taepo Dong missile until 1998, and then used the Taepo Dong-1 as a space launch vehicle, it became clear that the Intelligence Community had:

- Overestimated that North Korea would begin flight testing the Taepo Dong-1 and Taepo Dong-2 missiles years earlier than turned out to be the case.
- Projected correctly the timing of a North Korean missile with the potential to deliver payloads to the ICBM range of 5,500-km.
- Underestimated the capabilities of the Taepo Dong-1 by failing to anticipate the use of the third stage.

North Korea demonstrated intercontinental-range booster capabilities roughly on the timetable projected in 1994, but with a completely unanticipated vehicle configuration. The Intelligence Community had expected North Korea to achieve an ICBM-range capability initially with the two-stage Taepo Dong-2, not the Taepo Dong-1 with an unguided third stage. North Korea's use of the Taepo Dong-1 with a third stage as a space launch vehicle was completely unexpected. Until the flight test, the Intelligence Community was unaware of the third stage and the intended use of the Taepo Dong-1 as a space launch vehicle.

Detecting or suspecting a missile development program and projecting the timing of the emerging threat, although difficult, are easier than forecasting the vehicle's configuration or performance with accuracy. Thus, we have more confidence in our ability to warn of efforts by countries to develop ICBMs than we have in our ability to describe accurately the missile configurations that will comprise that threat, especially years prior to flight testing. Furthermore, countries practice denial and deception to hide or mask their intentions—for example, testing an ICBM as a space launch vehicle.

We continue to judge that we may not be able to provide much warning if a country purchased an ICBM

or if a country already had an SLV capability. Nevertheless, the initiation of an SLV program is an indicator of a potential ICBM program. North Korea and other countries, such as Iran and an unconstrained Iraq, could develop an SLV booster, then flight-test it as an ICBM with a reentry vehicle (RV) with little or no warning. Thus, we consider space launch vehicles, especially in the hands of countries hostile to the United States, to have significant ballistic missile potential.

We also judge that we may not be able to provide much, if any, warning of a forward-based ballistic missile or land-attack cruise missile (LACM) threat to the United States. Moreover, LACM development can draw upon dual-use technologies. We expect to see acquisition of LACMs by many countries to meet regional military requirements.

Space Launch Vehicle (SLV) Conversion. Nations with SLVs could convert them into ICBMs relatively quickly with little or no chance of detection before the first flight test. Such a conversion would include the development of a reentry vehicle (RV). A nation could try to buy an SLV with the intent to convert it into an ICBM; detection of the sale should provide a few years of warning before a flight test, although we are not confident that we could detect a covert sale. Finally, many SLVs would be cumbersome as converted military systems and could not be made readily survivable, a task that in many cases would be technologically and economically formidable.

Countries might mask their ICBM developments as SLV programs. They could test the complete booster and in most cases the guidance system, which would have to be reprogrammed to fly a ballistic missile trajectory. They could not mask a warhead reentry under the guise of a space launch. Nevertheless, they could develop RVs and maintain them untested for future use, albeit with significantly reduced confidence in their reliability.

- If the country had Russian or Chinese assistance in a covert development effort, it could have relatively high confidence that the RV would survive and function properly.
- If a country developed an untested RV without foreign assistance, its confidence would diminish, but we could not be confident it would fail. Significant amounts of information about reentry vehicles are available in open sources. A low performing RV with high flight stability would be a logical choice for developing an ICBM RV with minimal, or no, testing. The developing country could have some confidence that the system would survive reentry, although confidence in its proper delivery of the weapon would be lower without testing.

Alternative Threats to the United States

Several other means to deliver WMD to the United States have probably been devised, some more reliable than ICBMs that have not completed rigorous testing and validation programs. The goal of an adversary would be to move the weapon within striking distance without a long-range ICBM. Most of these means, however, do not provide the same prestige and degree of deterrence or coercive diplomacy associated with long-range missiles, but they might be the means of choice for terrorists.

Forward-Based Threats. Several countries are technically capable of developing a missile-launch mechanism to use from forward-based ships or other platforms to launch SRBMs and MRBMs, or land-attack cruise missiles against the United States. Some countries may develop and deploy a forward-based system during the period of the next 15 years.

A short- or medium-range ballistic missile could be launched at the United States from a forward-based sea platform positioned within a few hundred kilometers of US territory. If the attacking country were willing to accept significantly reduced accuracy for the missile, forward-basing on a sea-based platform would not be a major technical hurdle. The reduced accuracy in such a case, however, would probably be better than that of some early ICBMs. The simplest method for launching a ship-borne ballistic missile would be to place a secured TEL onboard the ship and launch the missile from its TEL. If accuracy were a major concern, the missile and launcher would be placed on a stabilization platform to compensate for wave movement of the ocean, or the country would need to add satellite-aided navigation to the missile.

A concept similar to a sea-based ballistic missile launch system would be to launch cruise missiles from forward-based platforms. This method would enable a country to use cruise missiles acquired for regional purposes to attack targets in the United States.

- A country could launch cruise missiles from fighter, bomber, or commercial transport aircraft outside US airspace. US capability to detect planes approaching the coast, and the limited range of fighter and bomber aircraft of most countries, probably would preclude the choice of military aircraft for the attack. Using a commercial aircraft, however, would be feasible for staging a covert cruise missile attack, but it still would be difficult.
- A commercial surface vessel, covertly equipped to launch cruise missiles, would be a plausible alternative for a forward-based launch platform. This method would provide a large and potentially inconspicuous platform to launch a cruise missile while providing at least some cover for launch deniability.
- A submarine would have the advantage of being relatively covert. The technical sophistication required to launch a cruise missile from a submarine torpedo or missile tube most likely would require detailed assistance from the defense industry of a major naval power.

Non-Missile WMD Threats to the United States. Although non-missile means of delivering WMD do not provide the same prestige or degree of deterrence and coercive diplomacy associated with an ICBM, such options are of significant concern. Countries or non-state actors could pursue non-missile delivery options, most of which:

- Are less expensive than developing and producing ICBMs.

- Can be covertly developed and employed; the source of the weapon could be masked in an attempt to evade retaliation.
- Probably would be more reliable than ICBMs that have not completed rigorous testing and validation programs.
- Probably would be more accurate than emerging ICBMs over the next 15 years.
- Probably would be more effective for disseminating biological warfare agent than a ballistic missile.
- Would avoid missile defenses.

The requirements for missile delivery of WMD impose additional, stringent design requirements on the already difficult technical problem of designing such weapons. For example, initial indigenous nuclear weapon designs are likely to be too large and heavy for a modest-sized ballistic missile but still suitable for delivery by ship, truck, or even airplane. Furthermore, a country (or non-state actor) is likely to have only a few nuclear weapons, at least during the next 15 years. Reliability of delivery would be a critical factor; covert delivery methods could offer reliability advantages over a missile. Not only would a country want the warhead to reach its target, it would want to avoid an accident with a WMD warhead at the missile-launch area. On the other hand, a ship sailing into a port could provide secure delivery to limited locations, and a nuclear detonation, either in the ship or on the dock, could achieve the intended purpose. An airplane, either manned or unmanned, could also deliver a nuclear weapon before any local inspection, and perhaps before landing. Finally, a nuclear weapon might also be smuggled across a border or brought ashore covertly.

Foreign non-state actors, including some terrorist or extremist groups, have used, possessed, or are interested in weapons of mass destruction or the materials to build them. Most of these groups have threatened the United States or its interests. We cannot count on obtaining warning of all planned terrorist attacks, despite the high priority we assign to this goal.

Recent trends suggest the likelihood is increasing that a foreign group or individual will conduct a terrorist attack against US interests using chemical agents or toxic industrial chemicals in an attempt to produce a significant number of casualties, damage infrastructure, or create fear among a population. Past terrorist events, such as the World Trade Center bombing and the Aum Shinrikyo chemical attack on the Tokyo subway system, demonstrated the feasibility and willingness to undertake an attack capable of producing massive casualties.

Immediate Theater Missile Threats to US Interests and Allies

The proliferation of MRBMs—driven primarily by North Korean No Dong sales—has created an

immediate, serious, and growing threat to US forces, interests, and allies in the Middle East and Asia, and has significantly altered the strategic balances in the regions.

- Iran's flight test of its Shahab-3, which is based on the No Dong, and Indian and Pakistani missile and nuclear tests may fuel additional interest in MRBMs.
- Pakistan has M-11 SRBMs from China and Ghauri MRBMs from North Korea; we assess both may have a nuclear role.
- India has Prithvi I SRBMs and recently began testing the Agni II MRBM; we assess both may have a nuclear role.

We judge that countries developing missiles view their regional concerns as one of the primary factors in tailoring their programs. They see their short- and medium-range missiles not only as deterrents but also as force-multiplying weapons of war, primarily with conventional weapons but with options for delivering biological, chemical, and eventually nuclear weapons.

Penetration Aids and Countermeasures

We assess that countries developing ballistic missiles would also develop various responses to US theater and national defenses. Russia and China each have developed numerous countermeasures and probably are willing to sell the requisite technologies.

- Many countries, such as North Korea, Iran, and Iraq probably would rely initially on readily available technology—including separating RVs, spin-stabilized RVs, RV reorientation, radar absorbing material (RAM), booster fragmentation, low-power jammers, chaff, and simple (balloon) decoys—to develop penetration aids and countermeasures.
- These countries could develop countermeasures based on these technologies by the time they flight test their missiles.

Foreign espionage and other collection efforts are likely to increase. China, for example, has been able to obtain significant nuclear weapons information from espionage, contact with scientists from the United States and other countries, publications and conferences, unauthorized media disclosures, and declassified US weapons information. We assess that China, Iran, and others are targeting US missile information as well.

Footnotes

1 An MRV system releases multiple RVs along the missile's linear flight path, often at a single target; a MIRV system can maneuver to several different release points to provide targeting flexibility.

2 The sale of an ICBM is prohibited by the START Treaty.

Francisco Franco Bahamonde

Francisco Franco Bahamonde (1892-1975)

He started his military career in the Infantry at the Academy of Toledo when he was thirty years old he was in charge of the Legion and continued his professional promotion being the youngest Brigade general in Europe. He was the Director of the Military Academy of Zaragoza, the Division General and the Chief of the Central Head State.

He was born at María street on the 4th of December in 1892. He was the second children of a middle-class family of sailors, he went to Sagrado Corazón school which was directed by Manuel Comellas. It seems he did not have a happy childhood. His father left the house and his mother was in charge of his education in an environment of pity and pompous modals. He was a boy with a meticulous aspect, obstipated, prudent and smart.

He could not enter the Naval School following the familiar tradition as it was closed for budgetary reasons after the disaster of 1898. Then he decided to become an Infantry officer and when he was fifteen years old he enters the Academy of the Alcázar of Toledo. Along the three years of his military training he got the respect of his mates in spite of his short height and his extremely fluted voice. He was destined to Ferrol and requested a transfer to Morocco.

There he discovered his passion for giving orders. He was an austere, shy man, with cold eyes and long silences, prudent and calculating, calm and authoritarian. Very soon he called the attention of politician and militaries for his value. In 1916 he was nominated a commander for his merits in campaign. After being seriously wounded he was sent to Oviedo. During the revolution of Asturias in 1917 he repressed with his usual coldness the miners.

In 1920 the Legion was created under the command of another Galician Millán Astray, and Franco accepted his incorporation in Ceuta. His book Marruecos. Diario de una bandera (Madrid, 1922), collected his memories of this time. He came back to the peninsula after being rewarded with a second medal for his military merit. Alfonso XIII promoted him to colonel lieutenant which meant the

command of the Legion when he was thirty years old. The King would be his best man when he married Carmen Polo in 1923. He continued his bright military career and in 1926 he was promoted to Brigade General, being the youngest person with this military grade in Europe.

Primo de Rivera revived the Academy of Zaragoza and Franco was nominated his director. He transformed it in a model of its kind.

After the proclaiming of the Republic, some reformations done by Azaña -as the suppression of the Academy of Zaragoza or the decree which abolished the promotions for war merits- annoyed Franco deeply who did not say anything but felt despised. When the government demanded a promise of fidelity to the militaries Franco did not accept his passing to the reserve. In 1932 he took up the command of the Brigade of Infantry of A Coruña and again -as he had done when he was in Africa for the second time- applied for the entrance in a Masonic lodge but he was rejected by the militaries.

After the triumph of the right in the elections of 1933 Franco promoted to Division general. During the revolution in Asturias in 1934 he received the charge from the government to suffocate it and at the front of the colonial troops he crushed the worker's movement. Lerroux rewarded him with the command of the military forces in Morocco. Then he would be nominated Chief of the Central Head State.

With the victory of the Popular Front he lost his hope that the Government requested the Army to re-establish the social order. He was sent to the Canary Islands as a general commander by he considered this decision as an exile, because they wanted to apart him from the peninsula.

The social tension grew everyday and after Calvo Sotelo's Murder, Franco did not believe that the government changed its behaviour. He abandoned his traditional caution because he considered that the situation was the suitable for a coup d'état. On the 17th of June the Army in Morocco arose against the democratic regime. Franco did not take part in the Defence Council created in Burgos by Mola but the war seemed to be on his hands.

On the 30th of January in 1938 he took up the name of Caudillo of Spain, all the State powers, as the General of the Armies supported by his mates in the Army and the Falange. He thought that he was only responsible in front of God and the History. On the 1st of April in 1939 the war finished. For Franco the most important as Tuñón de Lara said was not peace but victory.

The new state would continue for 37 years of absolute personal power. Franco was the most powerful of the rulers in Spain from Felipe II. But when he died in 1975 the regime died.

His ideology came from fascism and it was the ideology of a man with culture and a limited economic training with political ideas rooted in his experience in military life. Thus the Army guaranteed the order and the authority. Enemy of the masons and communism, monarchical without faith and republican without conviction, he had a non-liberal and centralist idea of the State.

In 1942 he wrote under the name of Jaime de Andrade, Raza, an exaltation of traditional values and an overestimation of militaries which would be taken to the cinema.

The international factor conditioned his political behaviour. During the second world war when Franco had an interview with Hitler in Hendaya on the 23rd of October in 1940 he did the least possible concessions in spite he believed in their victory. He avoided the commitment of entering the war with some evasive conditions like territorial vindication and the state of the country after the civil war. After the defeat of fascism he had to face the international isolation which although was not very strong made difficult the diplomatic and economic actions. The new circumstances or the cold war allow him to sign in 1953 the Alliance Treaty with USA and a Concordat with the Holy See. Two years later the UNO recognised his regime and in 1956 he had to accept the independence of Morocco.

After the failure in the autarchic policy of the first years he had to adapt to the necessities of the monopolist capital, starting the contradiction between the Confessional State and the Church. With the process of Burgos in 1970 his power was not so firm. He had a great confidence in his faithful Carrero Blanco but he died violently in 1973 and this was a deep blow for Franco. During his illness in the summer of the following year he did not want to yield the power to prince Juan Carlos. In September of 1975 Franco confirmed five executions. The repressive hardness came into contradiction with the growing crisis in the political system which could not continue after his death. On the 20th of November he was buried at the Valle de los Caídos which he had ordered to be built by the war prisoners.

An order from the Ministry of Interior on the 30 of September in 1938 agreed the unanimous request of the Town Council of calling his native town " El Ferrol del Caudillo" . This name was lost with the conquest of democracy when the first municipal corporation decided on the 28th of December in 1982 to recover the name of Ferrol.

Franco visited his town more than twenty times. The first one was on the 21st of June in 1939. His speech with the pronunciation from Ferro which he never lost was:

"Dear fellows. In this moment in which I live again hours from my childhood, I want to speak to you in this new daybreak of the country. This is a town full of virtues which the poison from Moscow could not destroy. We are raising the building of the Empire of Spain (...). I don't want a Ferrol which watches A Coruña or itself but which watches the sea. Why haven't I come to Ferrol before? Because I wanted to bring the victory (...)"

Many inaugurations he presided were carried out due to his personal initiative.

Francisco Franco, the Catholic Church and 2 million murders

Note: the quotes you'll find here are from *FRANCO* by Paul Preston, Copyright 1994 by Basic Books, a division of HarperCollins Publishers, Inc.

Franco was raised a devote Catholic, but saw no contradiction in wanton murder, cruelty and terrorism when he fought for the Spanish Army in Morocco, where he was a commander in Spain's Foreign Legion:

"Despite fierce discipline in other matters, no limits were put by Millin Astray or by France on the atrocities which were committed against the Moorish villages which they attacked. The decapitation of prisoners and the exhibition of severed heads as trophies was not uncommon. The Duquesa de la Victoria, a philanthropist who organized a team of volunteer nurses, would receive in 1922 a tribute from the Legion. She was given a

*basket of roses in the center of which lay two severed Moorish heads. When the Dictator General Primo de Rivera visited Morocco in 1926, he was appalled to find one battalion of the Legion awaiting inspection with heads stuck on their bayonets. Indeed, Franco and other officers came to feel a fierce pride in the brutal violence of their men, reveling in their grim reputation. That notoriety was itself a useful weapon in keeping down the colonial population and its efficacy taught Franco much about the exemplary function of terror. In his *Diario de zona bandera*, he adopted a tone of benevolent paternalism about the savage antics of his men. In Africa, as later in the Peninsula during the Civil War, he condoned the killing and mutilation of prisoners."*

After the army revolted against the Republican government of Spain in 1936, Franco quickly rose to be the leader of the insurrection, which was supported by the Catholic Church. Franco's propaganda presented him as a modern Catholic Crusader:

"The analogy was given the sanction of the Church on 30 September by the long pastoral letter, entitled 'The Two Cities', issued by the Bishop of Salamanca Dr Enrique Pli y Deniel. The Church had long since come out in favour of the military rebels but not hitherto as explicitly as Pli y Deniel. His pastoral built on the blessing given by Pius XI to exiled Spaniards at Castelgandolfo on 14 September in which the Pope had distinguished between the Christian heroism of the Nationalists and the savage barbarism of the Republic. Pli y Deniel's text quoted St Augustine to distinguish between the earthly city (the Republican zone) where hatred, anarchy and Communism prevailed, and the celestial city (the Nationalist zone) where the love of God, heroism and martyrdom were the rule. For the first time, the word 'crusade' was used to describe the Civil War."

The text was submitted to Franco before being published."

"Once established as Head of State, and with the eyes of Nationalist Spain now upon him, Franco's propagandists built him up as a great Catholic crusader and his public religiosity intensified. From 4 October 1936 until his death, he had a personal chaplain, Father Josi Maria Bulart. He now began each day by hearing mass, a reflection of both political necessity and the influence of Dona Carmen. In order to please his wife, when he was available he would join in her regular evening rosary, although, at this stage of his career at least, without any great piety." No one can say with total certainty what part Carmen Polo played in encouraging her husband's ambition nor how much he had been affected by Bishop Pli y Deniel's declaration of a crusade. Dona Carmen believed in his divine mission and such fulsome ecclesiastical support made it easier for her to convince him of it."

The Catholic Church was pleased at Franco's savagery, but the [atheist] Musolini and his Fascists were far more humane, and appalled: "Away from the pomp of Salamanca, Roatta, Faldella and other senior Italian officers were shocked by the relentless repression behind the lines.' Cantalupo requested instructions from Rome and on 2 March Ciano told him to inform Franco of the Italian Government's view that some moderation in the reprisals would be prudent because unrestrained brutality could only

increase the duration of the war. When Cantalupo saw Franco on 3 March, the Caudillo was fully prepared for the meeting. Cantalupo appealed to him to slow down the mass executions in Milaga in order to limit the international outcry. Denying all personal responsibility and lamenting the difficulties of controlling the situation at a distance, Franco claimed that the massacres were over 'except for those carried out by uncontrollable elements'. In fact, the slaughter hardly diminished but its judicial basis was changed. Random killings were now replaced by summary executions under the responsibility of the local military authorities. Franco claimed to have sent instructions for greater clemency to be shown to the rabble (*masse incolte*) and continued severity against 'leaders and criminals' as a result of which only one in every five of those tried was now being shot. Nevertheless, Rome continued to receive horrifying accounts from the Italian Consul in Milaga, Bianchi."

Even the Catholic Basques were not spared by Franco:

"With the Nationalist forces inexorably marching westwards, the Basques finally agreed to surrender to the Italians at Santona to the east of Santander on 26 August, 1948. In accordance with the agreement made, Basque political personalities embarked on two British ships, the SS *Seven Seas Spray* and the SS *Bobie*, under Italian protection. On 27 August, with Nationalist warships blockading the port, on Franco's orders, Divila told the Italians to disembark the refugees, which they refused to do, although they advised the Basques to go ashore. The prisoners were held by the Italians for four days but, on 31 August, Franco ordered Bastico to hand them over. He hesitated and only after assurances from Barroso that the surrender conditions would be respected did he relinquish the captives on 4 September. Summary trials began at once and hundreds of death sentences were passed. The Italians were appalled by Franco's duplicity and cruelty. Bastico sent Roatta to Salamanca to plead with Franco to stop the executions and allow the Basque leaders to leave the country. Roatta reminded the Caudillo that the Basques had surrendered after being offered such terms and pointed out that Italian honour was at stake. The Generalissimo simply ignored his arguments."

It wasn't just the athiest anarchists and socialists that the Catholic Church wanted Franco to slaughter: anyone who even believed in democracy was executed:

"Indeed, the Republican will to resist was kept alive only by the fear born of Franco's much-publicized determination to eradicate liberals, socialists and Communists from Spain. Baron von Stohrer wrote to the Wilhelmstrasse on 19 November 1938: 'the main factors which still separate the belligerent parties are mistrust, fear and hatred.'"" Franco told James Miller, Vice-president of the United Press, that a negotiated peace was out of the question 'because the criminals and their victims cannot live side-by-side'. Committed to a post-war policy of institutionalized revenge, he rejected the idea of a general amnesty and declared that the Nationalists had a list of two million reds who were to be punished for their 'crimes'. The political files and documentation captured as each town had fallen to the Nationalists were gathered in Salamanca. Carefully sifted, they provided the basis for an immense card index of members of political parties, trade unions and masonic lodges. The Republican zone was kept on a war footing by terror of Nationalist reprisals."

"Nationalists entered an eerily silent Madrid on 27 March. A delighted Ciano wrote in his diary. 'Madrid has fallen and with the capital all the other cities of Red Spain. The war is over. It is a new,

formidable victory for Fascism, perhaps the greatest one so far.'" By 31 March, all of Spain was in Nationalist hands. A final bulletin was issued by Franco's headquarters on 1 April 1939. Hand-written by Franco himself, it ran 'Today, with the Red Army captive and disarmed, our victorious troops have achieved their final military objectives. The war is over.' Franco had the gratification of a telegram from the Pope thanking him for the immense joy which Spain's 'Catholic victory' had brought him. It was a victory which had cost well over half a million lives. It was to cost many more."

"WITH THE end of the Civil War, Franco's euphoria knew few bounds. Two closely cherished illusions had come together in the triumph. Victory gave substance to his carefully constructed self-image as the medieval warrior- crusader, defender of the faith and restorer of Spanish national greatness, with his relationship to the Church as an important plank in the theatrical panoply. On 19 March, Gomi wrote to Franco that the newly elected Pontiff Plus XII (Eugenio Pacelli) had sent him his blessing. On 3 April, Gomi again wrote to him in terms which can only have inflated his notion of his God-given mission: 'God has found in Your Excellency the worthy instrument of his providential plans.' The identification between the Church and the Caudillo was emphasized on 16 April in a broadcast in Spanish made by Plus XII on Vatican Radio. 'With immense joy', the Pope gave his apostolic blessing to the victors reserving special praise for 'the most noble and Christian sentiments' of the Chief of State. The text had been prepared by Gomi."

At least as late as 1940 Franco's prisons still held hundreds of thousands of political prisoners, who were being executed as fast as they could be `tried.' Even the Nazi Himmler was appalled - he believed most political prisoners should be rehabilitated rather than executed.

Not counting soldiers on the Republican side actually killed in the fighting, the probably total of executions carried out by Franco was in the vicinity of 2 million. The Catholic Church not only did not make any effort to stop the slaughter. Priests reported citizens who had not attended mass during or before the Civil War; than in itself was enough to result in execution.

The Catholic Church remains committed, in the 20th century, to any and all means to eliminate those who do not submit to its authority.

Kiro Gligorov

President, The Republic of Macedonia

For decades a high-ranking official in Yugoslavia's communist government, Gligorov became the president of Macedonia when it broke away from Yugoslavia in 1991. Now 81, Gligorov has carefully kept his small state (about the size of Ireland) out of trouble despite being surrounded by what locals call "the Four Wolves" -- Albania, Bulgaria, Greece and Serbia. Experts say it is a potential flash-point, because all four "wolves" have claims of one sort or another on Macedonia. It also has a weak economy and religious and ethnic tension between the Macedonian majority and an ethnic Albanian minority numbering 30 percent. But Gligorov has downplayed nationalism as obsolete and favors a political solution in Kosovo.

[*Return to Home*](#)

Christopher Hill

U.S. Ambassador to Macedonia

A principal aide to Dayton peace accord architect Richard Holbrooke, Hill was a key member of the diplomatic team that helped negotiate an end to the 1992-95 Bosnian war.

Hill served as the State Department's most senior expert on the Balkans, directing the Office of South Central European Affairs.

In 1996, U.S. President Bill Clinton nominated Hill to become the first U.S. ambassador to Macedonia, a former Yugoslav republic that declared its independence in September 1991. The United States formally recognized Macedonia three years later.

Born in Paris in 1952, Hill graduated from Bowdoin College in 1974 and met his wife while they were both serving in the Peace Corps in Cameroon.

Profile:

Richard Holbrooke

Richard Holbrooke is in 1941 uit Duits-Joodse ouders in Scarsdale, New York, geboren. Na zijn studie aan de Brown- en Princeton University vervult hij zijn militaire dienstplicht in Vietnam, bij het ministerie van Buitenlandse Zaken. Hij is lid van de staf van president Johnson en van de Amerikaanse delegatie bij de vredesonderhandelingen voor Vietnam in Parijs in 1968 en 1969.

In de jaren tachtig is hij assistent-staatssecretaris onder president Carter (1979). Onder Reagan verlaat Holbrooke de diplomatieke dienst en wordt investeringsbankier op Wall Street.

De jaren negentig. Bill Clinton zorgt voor de terugkeer van Holbrooke op het politieke toneel. Als staatssecretaris op Buitenlandse Zaken krijgt hij Bosnië als speciale opdracht. Clinton wil Holbrooke als ambassadeur bij de Verenigde Naties. Holbrooke's optreden als diplomaat zorgt voor veel bewondering.

Holbrooke heeft er nooit tegen opgezien om te onderhandelen met mensen die immorele dingen doen. "Als je de dood van mensen kunt voorkomen die nog steeds leven, dan bewijs je hen die al gestorven zijn een dienst door juist dat te doen", aldus Holbrooke.

In 1995 brengt Richard Holbrooke de strijdende partijen bij elkaar. Resultaat, de ondertekening van Vredesakkoorden van Dayton. Het levert hem een nominatie voor de Nobelprijs voor de Vrede en twee bijnamen op: de Bulldozer en Raging Bull.

Holbrooke en Milosevic onderhandelingen hebben met name betrekking op de oplossing voor de etnische oorlog in Bosnië. Deze gaan gepaard met de ochtendborrels, lange diners en informele gesprekken waarbij Holbrooke zijn minachting voor Milosevic nooit onder stoelen of banken stopt.

Zo maakten de twee in de zomer van 1995, aan de vooravond van de NAVO-acties tegen Bosnisch-Servische doelen, een wandeling door de bossen. Holbrooke verdedigde al lopend de NAVO-actie terwijl Milosevic hem probeerde mild te stemmen door de geur van koffie in Manhattan te prijzen. Maar Holbrooke, New Yorker in hart en nieren, was niet onder de indruk.

The man President Clinton sent to keep a lid on the Balkans is best-known internationally as "the architect" of the Dayton peace accords which ended the fighting in Bosnia in 1995. Holbrooke has been described by insiders as tenacious and tough, abrasive and arrogant and "an s.o.b." In the Balkans, he is also known as "The Bulldozer." Critics say he courts famous people and is very ambitious, but they also concede that he is brilliant and a clever tactician -- gifts that should serve him well in his encounters with wily Serb president Slobodan Milosevic. Holbrooke supplants Robert Gelbard, who is thought by some to have encouraged Serbian repression in Kosovo last in February 1998 by saying that the Kosovo Liberation Army was "without question a terrorist group."

If anyone knows Slobodan Milosevic, or can stand up to him, it's the special U.S. envoy to the Balkans. Holbrooke was the man who put together the 1995 Dayton peace accords that ended the shooting in Bosnia and brought a modicum of stability to that war-devastated region. Holbrooke has built a reputation as a tough negotiator with a penchant for arrogance and abrasiveness. His tenacity this time failed to budge Milosevic, but he will be around to pick up the diplomatic pieces once the Kosovo action ends. Holbrooke has been nominated by the President to be the next U.S. ambassador to the United Nations.

Van boerenzoon tot dictator Saddam Hussein

Mesopotamië was ooit het meest geciviliseerde land ter wereld. Met het sprookjesachtige Bagdad als cultureel en politiek centrum. Duizenden jaren later leeft het land op de rand van de diepste afgrond. Executies, martelingen, verdwijningen, leugens, hongersnood, armoede en oorlogen hebben hun tol geëist.
Aangenaam kennis te maken meneer Hussein...

Saddam Hussein wordt op 28 april 1937 geboren in het gehucht al-Awja (Tikrit). De arme boerenzoon wordt thuis door papa dagelijks afgeranseld. Kleine Saddam vindt dat natuurlijk niet zo leuk en zoekt heil bij zijn oom in Bagdad.

Hij probeert aangenomen te worden op de militaire academie van Bagdad. Zonder succes! Teleurgesteld driipt Saddam af en meldt zich in 1956 aan bij de revolutionaire en socialistische Arab Baath Partij. Op twintigjarige leeftijd maakt hij duidelijk dat het hem menens is. Saddam vermoordt een fervent aanhanger van de toenmalige dictator van Irak, Abdul-Karim Qassim.

Drie jaar later waagt Saddam het met een aantal anderen president Qassim om zeep te helpen. De aanslag mislukt echter. Hij wordt bij verstek ter dood veroordeeld en vlucht vermomd als vrouw op een ezel naar Syrië.

Hij keert in 1963 terug naar Irak nadat de Baath Partij de macht heeft gegrepen (Ramadan Revolutie). Tijdens dit negen maanden durende bewind houdt Saddam zich vooral bezig met het ondervragen en martelen van 'andersdenkenden' in het beruchte 'Paleis des Doods'.

De Baath Partij wordt echter op haar beurt weer omver geworpen en Saddam belandt in de gevangenis. In die tijd behoort Saddam al tot de top van de partij en weet zich zelfs tijdens zijn gevangenschap steeds verder op te werken. In 1966 wordt hij gekozen tot secretaris-generaal.

Nauwelijks een jaar later ontsnapt Saddam en bereidt een coup voor. Deze coup vindt plaats op 17 juli 1968 en heeft succes. Saddam's neef, Hassan al-Bakr, wordt president met Saddam als tweede man.

Al-Bakr vindt het op 16 juli 1979 welletjes en Saddam Hussein wordt zijn opvolger. Nog geen zes dagen daarna veroordeelt hij twintig top-functionarissen binnen zijn

eigen partij ter dood. Op 42-jarige leeftijd heeft Saddam Hussein de absolute heerschappij verkregen over het land van de Eufraat en de Tigris.

Martelingen, verdwijningen, executies en...

De afgelopen negentien jaar heeft Saddam met ijzeren hand over Irak geregeerd. Niets en niemand ontziend worden tegenstanders met honderden zo niet duizenden tegelijk uit de weg geruimd. Burgers worden zomaar opgepakt en verdwijnen in het niets... Martelingen, doodsvonnissen en mishandelingen zijn aan de orde van de dag.

Hoe meedogenloos Saddam is liet hij zien door chemische wapens in te zetten tegen de Koerden en tegen Iran. Door de oorlog met Iran kreeg het land acht tellen. De daarop volgende [Golfoorlog](#) en de VN-sancties hebben voorlopig het licht uitgedaan. Het land is knock out geslagen. Mits er niet heel snel, heel veel dingen gaan veranderen...

(copyright: World Online)

Bullebak of Lieve Leider?

Kim Jong-il

Noord-Korea is een land van tegenstellingen. Over misoogsten en hongersnood staat weinig in de krant. Meer aandacht is er voor politieke propaganda. De dood van president Kim Il-sung luidt een rouwperiode in van drie jaar en het land raakt verder in de problemen. Zoon Kim Jong-il volgt zijn vader op maar het ziet er niet naar uit dat hij het tij kan keren.

Kim Jong-il wordt geboren op 15 februari 1942. In zijn jonge jaren volgt hij in Duitsland een militaire opleiding, maar hij is snel weer thuis. Hij kan de strenge discipline niet verdragen.

Al in 1973 wijst zijn vader hem aan als opvolger, maar het Volkscongres is tegen. Zij willen hem niet tot een van de vier vice-presidenten benoemen. Na de dood van Kim Il-sung moet Kim Jong-il zijn gezag nog vestigen in militaire kringen, al is hij met het overlijden van zijn vader meteen opperbevelhebber van het 1,1 miljoen manschappen tellende leger.

Kim krijgt achtereenvolgens de titel van secretaris-generaal van de Arbeiderspartij en de presidentstitel. Hij mag zich voortaan Grote Leider noemen, een titel gereserveerd voor zijn vader. In het vervolg is iedereen verplicht om hem zo aan te spreken.

Veel is niet bekend over de Lieve Leider, zoals het volk hem daarvoor moest noemen. Lief is hij bepaald niet: hij zou zijn tegenstanders koelbloedig uit de weg ruimen. Het westen heeft hem altijd verdacht van terreurdaden, zoals de bomaanslag op een Zuid-Koreaans vliegtuig in 1987, waarbij 115 mensen het leven laten.

Vrouwenverkrachter

Een Zuid-Koreaans studiecentrum schrijft 'The True Story of Kim Jung-il'. Hierin komt de dictator naar voren als een zware drinker en een vrouwenverkrachter. Er schijnen vele bastaardkinderen van hem rond te lopen. Daarnaast is Kim een ijdelruit: hij draagt schoenen met hoge hakken en extra dunne pakken die dunner afkleden.

De Noord-Koreaanse media dichten hem vele artistieke en intellectuele kwaliteiten

toe. Hij zou de belangrijkste filmmaker, uitvinder, dichter, componist van Noord-Korea zijn, en een militair genie. De nationale media is dan ook een instrument van de politieke leider om de bevolking zoet te houden en klaar te maken voor zijn overtuigingen.

Kim Jong-il schrijft zelf ook honderden epistels over zijn politieke ideeën. Hij vindt net als zijn vader dat ieder in zijn eigen onderhoud moet voorzien (de leer van 'Juche'). Hij is socialist en communist. Grote voorbeelden van Kim Jong-il zijn Lenin, Marx, Confucius en koning Herodes. Zijn lievelingskleur is rood, hoe kan het anders. Zijn motto is: 'revolutie is de grootste liefde'. Met revolutie komen de arbeiders aan de macht.

Reünie van Noord- en Zuid-Korea

Zijn doel is de reünie van Noord- en Zuid-Korea, waarna de revolutie moet plaatsvinden. Hiervoor moet hij enkele principes laten varen. Het land verkeert in een economische crisis en er heerst een ernstig voedseltekort. Door de hongersnood moet Kim Jong-il de leer van Juche opgegeven. Zijn eerste prioriteit is nu het terugdringen van armoede.

Kim Jong-il lijkt niets structureels te doen aan de problemen. Hij heeft niet genoeg in huis om de crisis te keren. Tot nu toe doet hij weinig om relaties met invloedrijke landen te herstellen, om te beginnen met Japan.

Japan verdenkt Noord-Korea er van enkele diplomaten te hebben ontvoerd. Tot dusver trekt Kim Jong-il zich weinig aan van de politieke situatie. Hij neemt liever prijzen en titels in ontvangst.

De Noord-Koreaanse autoriteiten publiceren tussen 1992 en 1994 ruim 700 gedichten en liederen waarin Kim Jong-il bejubeld wordt. Toch blijft Kim volhouden niet van gevele en pluimstrijkerij te houden. Kim Jong-ils favoriete bloem is een katoenplant, maar waarom gaf hij zijn naam toch liever aan een kleuriger exemplaar?

Terrorist of Verlosser?

Muammar Khaddafi

Voor de een is Khaddafi de grootste crimineel op aarde. Hij wordt namelijk in verband gebracht met tientallen terroristische aanslagen. De ander beschouwt hem als een broer en de leider van de wereldrevolutie voor een nieuwe beschaving.

De geschiedenis van Khaddafi lijkt erg veel op die van Saddam Hussein. Khaddafi wordt in 1942 in de buurt van Sirte straatarm geboren als zoon van een Bedoeïense boer en handelaar. De precieze datum van zijn geboorte is onbekend. Als een goede Bedoeïen betaamd heeft Khaddafi een hekel aan de Italianen en Engelsen die het min of meer voor het zeggen hebben in Libië.

In 1956 - als het land inmiddels zelfstandig is geworden - keert Koning Idris I zich af van het Westen en sluit zich aan bij de Arabische Liga. Khaddafi wordt een groot aanhanger van Nasser van Egypte die een pan-Islamitische werelddominatie voor ogen heeft.

Reeds op zestien-jarige leeftijd begint Khaddafi een groep getrouwen en vrienden om zich heen te verzamelen. Het doel: totale zeggenschap over Libië. Jarenlang bereidt het selecte groepje diverse coup-pogingen voor. Maar onderneemt vooralsnog geen actie...

Nadat Khaddafi in 1964 is afgestudeerd als meester in de rechten aan de universiteit van Libië, meldt hij zich aan bij de militaire academie in Bengasi. Een jaar later volgt hij een spoedcursus 'Moderne oorlogsvoering' in Engeland.

Kolonel Khaddafi roept in 1969 via de radio de republiek uit **COUP**

In 1969 sluiten Khaddafi en zijn revolutionaire vriendjes zich aan bij een groepje bejaarde militairen en gooien het bewind van koning Idris I omver. Khaddafi heeft de coup al jaren voorbereid en zijn legertje bezet alle sleutelposities in het land. Binnen de kortste keren heeft Khaddafi het koninklijke paleis, de ministeries, alle radio- en televisiestations en de kranten in handen. Voordat de bejaarde militairen goed en wel begrijpen wat er is gebeurd, worden ze door Khaddafi op straat geschopt. Khaddafi is op 27-jarige leeftijd de absolute alleenheerser over Libië. Hij wordt tot voorzitter van de Revolutionaire Raad en tot opperbevelhebber der strijdkrachten benoemd.

De nieuwe leider laat er geen gras over groeien. Alle buitenlanders worden gesommeerd het land te verlaten. Britse en Amerikaanse bases worden ontruimd. Khaddafi propageert Arabische eenheid onder islamitische vlag. In het [Groene Boekje](#) ontwikkelde hij zijn ideeën over een politiek stelsel dat noch communistisch noch kapitalistisch is. Hij ziet zijn plannen echter doorkruist door zijn eigen impulsieve, ondiplomatieke uitspraken en initiatieven. De betrekkingen met zo'n beetje alle landen in de wereld verslechteren.

In de tweede helft van de jaren zeventig gaat Libië openlijk diverse links-extremistische en terroristische groeperingen steunen. Khaddafi voorziet hen van van geld en de terroristen kunnen in Libië opleidingskampen oprichten. Khaddafi steunt bovendien [Idi Amin](#) van Oeganda, die een waar schrikbewind uitoefent.

Als de ontevredenheid onder de bevolking over zijn optreden toeneemt - vooral onder de intellectuelen en handelaren - worden er op grote schaal zuiveringen uitgevoerd.

Lockerbie

In 1979 doet Khaddafi afstand van zijn officiële regeringsfuncties, maar hij blijft de belangrijkste man van het land.

Wegens vermeende betrokkenheid bij internationaal terrorisme voert de Amerikaanse luchtmacht op 15 april 1986 een bombardement uit op zijn hoofdkwartier. Sindsdien lijkt hij een gematigder opstelling te kiezen. Alhoewel? De Verenigde Staten houden Khaddafi verantwoordelijk voor de bomaanslag op een Amerikaans passagiersvliegtuig boven het plaatsje Lockerbie in december 1989.

Pandeli Majko

Prime Minister, Albania

Until September 29, the 30-year-old Majko was the secretary general of the Socialist Party. But after [Fatos Nano](#) resigned suddenly as Prime Minister September 28, the party chose Majko over two other candidates to replace him. A mechanical engineer by training, Majko led student demonstrations in 1990 that ended four decades of communist rule. Although Albanians supplied weapons to ethnic Albanians in Kosovo, Albania is Europe's poorest country and has teetered on the edge chaos. It is in no position to play a significant role in Kosovo. Of further concern, former President [Sali Berisha](#), still lurks in the shadows as a potential spoiler and it is feared that if he returns to power he might lead Albania into a Kosovo war.

Back to the [Return to Home](#)

Profile:

Slobodan Milosevic

Slobodan Milosevic, geboren op 29 augustus 1941 in Pozarevac, Servië. Hij studeerde rechten aan de Universiteit Belgrado en haalde in 1964 zijn titel. In militaire dienst is Milosevic nooit geweest.

In de beginjaren van zijn carrière (1968-1978) is hij manager bij Technogas in 178 verandert hij van baan en wordt lid van de raad van bestuur van de BEObank (United Bank van Belgrado).

In 1984 neemt zijn politieke carrière een serieuze wending. Hij neemt het leiderschap van de Communistische Partij Belgrado op zich. Tijdens interne etnische conflicten in Polje belooft hij de Serviërs dat zij nooit meer zullen worden bedreigd door de Albanezen.

Drie jaar later promoveert hij tot leider communistische partij Servië, waarna hij in 1989 wordt gekozen tot president van de Republiek Servië en wordt gezien als de aanstichter van de geweldadige Servische demonstraties. Doel is gebiedsuitbreiding van Servië. In 1997 volgt zijn benoeming tot president van Joegoslavië.

Milosevic dankt zijn enorme populariteit aan zijn toewijding voor de Servische eenwording. Bij de tegenpartij staat hij vooral bekend als 'de slager van de Balkan'

Few public figures have been targeted for the harsh criticism leveled at Milosevic. He has been called "the perfect Stalinist" for his stealthy rise to power. He has shown a willingness to turn on friends and allies and used wars, scapegoats and fear to acquire and consolidate power. The Observer of London has noted that "everything he touches turns to dust." A critic writing in a Scottish newspaper wrote that while Milosevic has played on Serbian nationalism in his repression of Kosovar Albanians, "he would switch to cubism if it would get him a bit of Spanish coastline."

The Yugoslav president has built his power base on one major pillar since his rise in 1989 as Serbia's president: his drive, sometimes at all cost, for a Greater Serbia. The mission has led his military, either directly or indirectly through surrogates, into murderous campaigns against Croatia, Bosnia and now Kosovo. Milosovic's take-no-hostages approach has earned him the title of "Butcher of the Balkans." His policy of ethnically cleansing areas where his opponents reside -- by removing entire populations -- has led to worldwide outrage. A wily master of bluff and brinksmanship, Milosevic, by his stubbornness this time, has led his nation over the brink and into military conflict with NATO.

Who wants to die for Slobodan Milosevic? He is one of the great losers of history. He failed to hold together the former Yugoslavia, and he failed to build in its place a Greater Serbia. In the past 10 years, he has launched four wars and lost three. He is currently on the verge of losing a piece of real estate held especially dear by Serbs. As Europe's most disruptive dictator since the fall of the Berlin Wall, he bears responsibility for the extermination of 250,000 in Bosnia and Croatia, for the European revival of concentration camps and massacres, for the displacement of millions in Bosnia and Croatia and Kosovo, for the impoverishment and ostracism of his own country.

Now Milosevic has again chosen war. Like a shark that has to keep moving to stay alive, he is willfully exposing the withered state of Serbia to the might of NATO for the sake of his own power. As always, he gambled that talk, hopes, threats and indecision would wear his enemies into retreat. When that didn't happen, he put in jeopardy virtually everything left to him, courting death for his people and damage to his country, the destruction of his military machine, the hastened secession of Kosovo and Montenegro, and perhaps even the end of his regime. He has wagered a single, grand bet that stakes his own and his country's future on a staggeringly high-risk confrontation. The West stands confounded by leaders who play by such rules.

For Milosevic, opportunism has been a way of life. The Serb standard bearer does not talk about his parents' immigration from Montenegro to the town where he was born, Pozarevac in Serbia. He was the son of a teacher who had studied to be an Orthodox priest and a puritanical schoolteacher. They orphaned him through suicide while he was still a young man--his father first, and his mother a decade later. Despite his father's interest in religion, Milosevic never embraced the church. At 18 he turned himself into a Communist Party zealot, assuming so thoroughly the image of a dedicated functionary that admiring colleagues dubbed him "Little Lenin." While still a student, he fell in love with and married Mirjana Markovic, daughter of a distinguished partisan and party family, and together they climbed her connections up through party ranks. Educated in the law, he filled high posts at Tehnogas and Beobank, but he was not really a lawyer, technician or banker. He was a party "fixer." By 1984 he was fixing his way through the national party, and by 1987, he led Serbia's Communist Party.

Yet for him communism was just a passing phase. His wife, a fervent Marxist, says ideology has never meant as much to Milosevic as it does to her. When he saw a chance to grab power, he pushed the communists aside and refashioned himself as a nationalist. In 1987 he went to Kosovo, the cradle of Serbian identity, to soothe the grievances of local Serbs, and he made his name by declaring, "No one shall be allowed to beat you." Milosevic was moved less by Serb nationalism than by its power to electrify. "After that night," recounted a Serb

Above all, Milosevic is a crafty autocrat. He relies exclusively on his own judgment, and little is done without his consent. While other institutions of state exist--a government, an elected Chamber of Citizens, ministries--he has limited their capacity to function. Only the police force works--an organization full of "his guys" that is exhausting in its myriad forms of harassment. The state is Slobodan Milosevic.

Much of his strength lies in the weakness of his enemies. In 1996 the Serb President did suffer a scare when three months of protests over fraudulent elections filled the streets with disillusioned citizens demanding democratic change. But he held out long enough to allow the opposition to self-destruct in personal rivalries. Since then his strongest potential challengers have opted to join his government instead of fight it. In 1997, when the constitution barred him from a third term as President of Serbia, he stuck to legal niceties and "won" election as President of the Yugoslav Federation, transforming that ceremonial post into his new seat of power.

Yet despite having proved himself a cunning politician, he is said to be insecure, even paranoid. U.S. diplomats, eager to point up what they see as limits to his popularity, say he is so fearful for his personal security that he refuses to go out in public. While he may partly be cultivating the dictator's aura of mystery, some Serbs say he is fundamentally a deeply suspicious, withdrawn and secretive person.

Still, observers say he commands a solid 20% core of support. Some of that may be the result of the undiluted populist propaganda that is fed relentlessly through the state media. And some of it may simply be old-fashioned pride and nationalism, emotions no less powerful and gripping in Yugoslavia than in any other country. But that loyal core is enough, in the words of one Serb, to allow Milosevic "to steal any election." It also gives him the causes and crises that make him irreplaceable. "We are for Sloba because he is for us," explained Velimir Djurica at his plumbing stall in Belgrade's black market last week. "The foreign boot must not be on us."

At once immoderate and capricious, Milosevic has made himself one of the West's most difficult enemies. Lessons learned from one encounter do not necessarily apply to the next. Washington concluded after Dayton, when NATO bombers seemed to bring him to the negotiating table, that he respected what he feared and would give in to force and threats. Milosevic learned something different: how to exploit the West's hesitation. Diplomats who thought that Dayton showed they "could work with him" discovered he rarely works well with anyone. He enjoyed his combat with Richard Holbrooke, whose status as special American envoy to the Balkans he considered worthy of attention. But he is said to detest Secretary of State Madeleine Albright as the archetype of all those trying to do in the Serbs. Pride drives the man, says a Western diplomat, "and

journalist, "there was a psychological change in him. All at once he discovered he had this power over people." Says Veran Matic, director of the independent Radio B-92, which was a target in Milosevic's crackdown last week: "He understands perfectly the mentality of the people, what political culture demands here, what rhetoric sells."

Defender of the Serbs--it was a seductive image, one that reached back across 600 years of Slavic victimization and imbued the solid, fleshy-faced and silver-haired man with the mystique of historical destiny. In a nation searching for a post-cold war identity, the aura served as an express ticket to total power. Conducting a new symphony of ethnic hate, Milosevic stepped into the top slot once occupied by Tito. Virtually his first act was to revoke the autonomy Tito had granted to the Albanians in Kosovo. Playing up nationalist passions, Milosevic helped ignite full-scale ethnic rivalry among some of the country's other republics. During that period, even the intellectual elite supported his nationalist euphoria. But once he had used them to cement his position, he cast them aside. He is faithful, says biographer Slavoljub Djukic, to no one except his wife once a person's usefulness is past.

Firmly ensconced as Serbia's boss, Milosevic proved to be smart, articulate and cunning. "He does not believe in ideas," says a Russian-born observer. "He makes no value judgments." So far as anyone can tell, he brought with him no grand plan for Serbia. His ambition appeared to consist of staying on top--forever. While he has showed a genius for tactics, he is perpetually forced to react to events, even ones he provokes.

Perhaps it is no accident that Kosovo, the venerated scene of Serbia's great defeat by the Ottoman Turks in an epic battle fought in 1389, marks both the beginning and possibly the end of Milosevic's career. Milosevic has displayed an uncanny knack for defeats. His 1991 war in Croatia to retain control of the old Yugoslavia eventually ended with hundreds of thousands of Serbs forced out of their homes, farms and villages. Today they make up a refugee population living hand to mouth inside Serbia, not even granted the privilege of Yugoslav citizenship. Yet the war served to polish Milosevic's nationalist credentials with the Serb masses.

Milosevic's war in Bosnia to expand Greater Serbia ended in another defeat. To save himself, he had to knuckle under to international diplomacy. Ever ready to discard what has become harmful, he dropped his backing for Serb kin in the breakaway state, eventually making peace at their expense at Dayton in 1995. He turned this humiliation into another kind of triumph when he paraded on the world stage as a peacemaker equal to the superpower leaders negotiating with him. Yet he was no more a man of peace than he was a communist or nationalist. He simply did what he had to do to stay in power.

rational analysis may not matter if he is humiliated in the process."

Certainly his Kosovo strategy has been confounding. In part, says a U.S. official, Milosevic seems closed off to reality. When negotiating, he relies on a mix of charm and tirades about the victimization of the Serbs. Says the official: "Every second sentence is wrong or a lie. He pours out his soul, but you don't know if he believes all that rubbish." He never says yes or no, never puts his own name to a formal agreement. While his vicious behavior in Kosovo has evoked comparison to Hitler, those who know him say Milosevic doesn't dream so large. "He wants to be the tinhorn dictator of Serbia forever," says a U.S. official. "Beyond that, nothing."

All these contradictions have kept Washington and its allies guessing. Few believe Milosevic's attachment to Kosovo is more than skin deep. Some Serbs say he stirred up the crisis to distract attention from the foundering economy. Yet in considering whether to placate the West or defy it, he is operating according to his own calculus of the risk to himself and his regime. The issue comes down to his feeling about the place where the myth of his own power was built. "He doesn't know," says a top U.S. official in Belgrade, "whether caving in makes him lose face to a point that challenges his power, or whether suffering the damage that would be inflicted on his security forces would undermine their control and their loyalty to him."

Many analysts have suggested that he wants to absorb enough punishment to provide cover for handing over Kosovo to international peacekeepers. "It's very Slavic," says the Russian observer. "He needs to be seen as compelled, so he can sell it to the 90% of Serbs who cling to Kosovo emotionally." But it is equally possible that he has something else in mind. Perhaps he thinks he can successfully endure all the bombing the West can muster and still continue to defy its plans for Kosovo, as his enemies exhaust their will before he exhausts his. "He truly believes he is tougher than the West," says a U.S. diplomat.

Milosevic has miscalculated disastrously before, but he has also brilliantly calculated his hold on power. Which will it be this time? There are those in Washington and Europe who hope that he has gone too far in presiding over death and destruction. Perhaps all those NATO missiles and bombs may finally convince the Serbs that they do not need Milosevic ruining their lives any longer. But reports from Belgrade suggest that the air attacks have Serbs rallying to Milosevic as never before. Once again, in Milosevic's Balkans, it is far from clear who has calculated best.

Power, say those who know him, is the one thing he truly loves. He exercises it daily, in matters large and small. From his subordinates, he brooks no challenges. When Serb officials began several months ago to obstruct the work of international monitors in Kosovo, it was clearly at his orders, a way of saying, notes a diplomat involved, "This is my turf, and I'm boss." He does not flaunt decorative symbols of office or stage showy ceremonies and cares nothing for state protocol. But if he shirks the glamour of power, he still loves delicious moments of control. When foreign diplomats appear at his door, he glows as he picks the chairs on which they will sit.

Slobodan Milosevic

BORN Aug. 20, 1941; in Pozarevac, Serbia

EDUCATION Graduated from Belgrade University, where he studied law, 1964

FAMILY He and wife Mirjana ("Mira") Markovic have a son and a daughter

BUSINESS YEARS Became chief of state-owned Tehnogas, 1973; served as president of Beobank (United Bank of Belgrade), 1978 to 1983

POLITICAL POSITIONS Belgrade Communist Party chief, 1984; Serbian Communist Party boss, 1987; President of Serbia, 1989; Yugoslav President, 1997

Chileense desperado **Augusto Pinochet Ugarte**

Augusto Pinochet is geboren op 25 november 1915 in Valparaiso, Chili. Ook de carrière van deze dictator begint in het leger. Als generaal is hij in 1971 tot opperbevelhebber benoemd door de toenmalige president Allende. Chili bevindt zich op dat moment in een ernstige crisisperiode.

Allende heeft toendertijd niet geweten dat hij met vuur speelde. In 1973 komt door een bloedige staatsgreep een einde aan zijn socialistische bewind. De hoofdrol is voor Augusto Pinochet. Als leider van één van de junta's heeft hij zich ten doel gesteld alles wat Allende op beleidsgebied bereikt heeft teniet te doen.

Nog geen half jaar later, op 1 juli 1974, wordt Pinochet benoemd tot president van Chili. Jaren van terreur volgen. Op 11 september 1980 verstevigd Pinochet zijn positie nadat via een volksstemming een nieuwe Grondwet is aangenomen. Hiermee is het dictatoriale regime van Pinochet gelegaliseerd. Tot 1989 is het presidentschap van Pinochet verzekerd.

Tijdens het grondwettelijk vereiste referendum op 5 oktober 1988 stemde een meerderheid van de kiezers tegen Pinochet. In 1989 is het einde van zijn politieke carrière in zicht. Democratische verkiezingen leveren voor het eerst sinds jaren weer een burgerpresident op. Zijn naam is Patricio Aylwin. Na zijn aftreden als president op 11 maart 1990 blijft Pinochet nog militair actief als opperbevelhebber van het leger.

Uit de hele wereld klinkt protest als hij in hetzelfde jaar tot 'Senator voor het leven' wordt gekozen. Alleen het aangezicht van de Dwaze Moeders op het plein, die hun verdwenen kinderen onder de aandacht brengen, bevestigt dat deze man geen plek met een gouden rand in geschiedenis verdient.

Op dit moment is Pinochet weer volop in het nieuws. Zijn ziekenhuisopname in Londen kan een eventuele arrestatie tot gevolg hebben. Het is echter de vraag welke staat hiervoor de verantwoordelijkheid wil nemen.

Yevgeny Primakov

If Slobodan Milosevic has any sort of a friend, it is Moscow -- and unlike ailing President Boris Yeltsin, Prime Minister Yevgeny Primakov is a wily diplomat and former top spook renowned for his skill in playing Russia's admittedly weak geopolitical hand. Under pressure from the Communist and nationalist majority in his legislature, Primakov has fiercely opposed NATO air strikes. While Russia's desperate need for Western loans will limit any counterstrokes, Moscow has indicated that it will ignore the arms embargo against Yugoslavia in response to air strikes on Kosovo.

Arkan

Zeljo Raznatovic

Arkan is een uit Bosnie afkomstige leider van de paramilitaire 'Tijgers'. Zijn soldaten zijn "nog niet" in Bosnie maar zullen dat wel zijn "als er ook maar één NAVO-soldaat voet op Joegoslavische bodem zet".

Arkans militie van circa duizend man pleegde in de oorlog in Bosnië tussen 1991 en 1995 tal van massamoorden. Aan de etnische zuiveringen in de regio's Bijeljina (800 doden), Brcko (tussen de 3000 en 6000 doden) en Zvornik (2000 doden) zou Arkan persoonlijk leiding hebben gegeven.

Volgens de Vereniging voor bedreigde volkeren was Arkans specialiteit in de oorlog in Bosnië het liquideren van intellectuelen en belangrijke personen uit het publieke leven.

Arkan is getrouwd met Svetlana (zie foto)

Ibrahim Rugova

Leader, Democratic League of Kosovo

Although he has been called "the father" of the Democratic League of Kosovo (LDK) and was chosen "president" of Kosovo in an underground election by Kosovar Albanians, some believe Rugova's star has faded. His non-violent approach was too passive for the Kosovo Liberation Army (KLA) and Western officials say his authority has declined. No one has stepped forward to replace him yet, although one candidate is Jakup Krasniqi of "the New LDK" and spokesman for the KLA. Another is Bujar Bukoshi, "prime minister" of the ethnic Albanians' so-called government-in-exile. A third is Rugova's old rival, Adem Demaqi, who is known as "the Balkan Mandela" after spending 28 years in Serbian jails as a political prisoner.

Javier Solana

NATO Secretary-General

NATO Secretary-General Javier Solana has repeatedly threatened to intervene in Kosovo to prevent a full-scale war between ethnic Albanian separatists and Serbian security forces.

When he learned of a civilian massacre near the village of Racak in January, Solana warned that NATO "will not tolerate a return to all-out fighting and a policy of repression in Kosovo."

So far, his threats of military force have not been carried out. Yugoslav President Slobodan Milosevic managed to avert NATO airstrikes in October through a U.S.- brokered cease-fire. But Milosevic's failure to withdraw troops from Kosovo as promised has again pushed Solana and his fellow NATO leaders to the brink.

Solana served as Spain's foreign minister for three years before being picked to succeed Willy Claes as head of NATO in 1995. Claes resigned over a corruption scandal in his native Belgium.

Solana was educated in the United States. Prior to serving as foreign minister, he was a university physics professor. He evolved from an anti-military student activist during the regime of Gen. Francisco Franco to a minister in a firmly pro-NATO government.

The NATO secretary-general has been big with forceful pronouncements on the importance of getting Slobodan Milosevic and his Serbian forces to back off in Kosovo, and he has also been a backer of NATO military intervention. Now Solana faces the difficult task of keeping NATO's notoriously fractious allies together politically, at least publicly, as the uncertainties of war unfold. Before assuming NATO's political leadership in 1995, Solana served as Spain's foreign minister.

Profiel:
UÇK

Ushtria Clirimtare E Kosoves (UÇK) is het bevrijdingsleger van de Albanezen. Tijdens de oorlog in voormalig Joegoslavië vechten meer dan 5000 Albanezen samen met de Kroatische- en Moslim milities. Aan het eind van de oorlog, waarbij een staakt-het-vuren wordt overeengekomen, gaan de Serviërs door met hun geweldadige acties. Deze blijven in eerste instantie, tot verbijstering van de Albanezen, onbestraft.

Uit onvrede met de voortgang van het vredesproces ontstaat een groep van getrainde professionals, waaronder oud-soldaten van het Joegoslavische leger. Het UÇK is geen militaire organisatie en is niet verbonden aan een politieke organisatie. Het functioneert eerder als een lichtbewapende guerilla-beweging. De activiteiten van de organisatie spelen zich voornamelijk af onder de grond. Het vlekkeloze verloop van activiteiten is te danken aan de oud-medewerkers van de Nationale Veiligheidsdienst, die de leiding van de UÇK op zich hebben genomen.

In 1992 laat het UÇK voor het eerst van zich horen. De aanvallen tegen de Servische politie vinden voor het eerst in 1995 plaats. De aanvallen op Servische politiebureaus in juni 1996 leveren hen de titel terroristische organisatie op. Vanaf 1997 richten hun aanvallen zich op de Servische politie, hoogwaardigheidsbekleders en Albanezen die geheuld hebben met de Serviërs.

CHRONOLOGY OF KLA's (UCK's) TERRORISM AND AGGRESSION, APR. '96 - FEB. '98

In an act of aggression against Serbia and its citizens, the Albanian terrorist organization calling itself the "Kosovo Liberation Army" (KLA) has carried out dozens of attacks against Serb civilians and police officers in Kosovo and Metohija in the past two years.

Many of the KLA's terrorist acts were also carried out against moderate Albanians loyal to Serbia, who were labeled "collaborators" by the KLA because they accepted and worked toward preserving the multiethnic structure of Kosovo. The KLA's goal is to "ethnically cleanse" Kosovo and Metohija of all Serbs so that an ethnically pure Kosovo could be swallowed by Albania to form a "Greater Albania".

1996

April 22:

Blagoje Okulic, a Serb refugee from Croatia, was sitting with a friend in a cafe when a masked member of the KLA opened fire on the customers with an automatic weapon. Okulic died in hospital. He was the first victim of the KLA.

Armand Daci (20), an ethnic Albanian student in dentistry school, was shot and killed by a sniper.

June 16:

In an attack against a police patrol near Podujevo, police officer Goran Mitrovic was heavily wounded.

June 17:

Around 11:55 p.m. a police patrol in the village of Siplje near Kosovska Mitrovica was attacked, resulting in the killing of Predrag Djordjevic (28) from Krusevac, and the wounding of Zoran Vukocic (30) from Nis.

The same day a bomb was hurled at the police station in Luzani, and the police officers on duty in the station were fired on by automatic weapons. No one was injured.

July 11:

One hour after midnight in the center of Podujevo terrorists carried out an armed attack against police officers, resulting in a heavy wounding of police officer Sredoje Radojevic.

Aug. 2:

Armed attack on three police stations (in Pristina, Podujevo, and the village of Krpimej) around 10 p.m.

Aug. 28:

Three bombs were hurled in the village of Celopek (border of the towns Pec-Klina-Decani), around 3 a. m. No one was injured.

In the village of Donje Ljupce police inspector Ejup Bajgora (44), an ethnic Albanian who worked at the Pristina Precinct, was shot and killed.

Aug. 31:

In the night hours two bombs were hurled into the courtyard of the Yugoslav Army's barracks in Vucitrn.

In the village of Rudnik (Srbica municipality) an armed attack was carried out on the police station.

In Podujevo, police officers at the juncture of the road Pristina- Podujevo-Kursumlija were fired on. No one was hit.

The police station in Glogovac was fired on with automatic weapons.

Oct. 25:

Two police officers were killed by automatic weapons near the village of Surkis in the Podujevo municipality -- Milos Nikolic, a police inspector of the Pristina Precinct, and Dragan Rakic from the village of Velika Reka, who was a police officer in the reserves and a manager of a company in Podujevo.

Nov. 16:

In the village of Rznica, in Decan municipality, around 10:30 p.m. a terrorist attack was carried out on the police station. No one was killed.

Dec. 26:

Faik Belopolja, an ethnic Albanian from Podujevo who was a forest worker in the Serbia Forest Service, was shot and killed.

1997

Jan. 9:

In the center of Podujevo at 5:30 p.m. Malic Saholi (52), an ethnic Albanian who was the manager of the supermarket "Vocar" and a deputy in the municipal council of Podujevo as a member of the Socialist Party of Serbia, was shot and killed.

Jan. 11:

In the Vucitrn village of Mijalic, around 7 p.m. more than 26 bullets were fired at the house of Ljubisa Mitrovic. No one was killed.

Jan. 13:

Shooting Fazil Hasani, an ethnic Albanian forest worker from the village of Brabonic (Srbica municipality) in the neck, KLA terrorists killed him and issued a statement denouncing Mr. Hasani as a "traitor".

Jan. 16:

Using remote-controlled explosives, the KLA attempted to assassinate the Dean of Pristina University, Mr. Papovic, at 8 a.m. as he was driving to the University. Both he and his driver Nikola Lalic were heavily wounded. The explosives were set off when their car was some 50 meters from Dean Papovic's apartment in Pristina.

Jan. 17:

In the village of Reketnica (Srbica municipality), at 1 a.m., ethnic Albanian Zen Durmisi (52) was shot and killed and his son Nazmi Durmisi was heavily wounded. The Durmisi family was labeled "pro-Yugoslav" by the terrorist KLA.

Feb. 1:

KLA terrorists from a moving vehicle fired on police officers. The officers fired back and killed all three terrorists.

March 5:

At 10:47 a.m., in front of the Pristina University School of Languages, a bomb in a container exploded. Four people were wounded, two ethnic Albanians -- Adrijana Dremka and Lindita Maksuti - - and two ethnic Serbs, Borivoje Popovic and Ivan Maksimovic.

A second explosives device weighing 4.2 kilograms, which had been placed at the base of the Vuk Karadzic monument in front of the School of Languages, was found and deactivated by members of the Anti-Ballistics Unit of the Pristina Precinct.

March 21:

Around 8 p.m., in the center of Podujevo, KLA terrorists fired five shots at police officer Branislav Milovanovic, wounding him heavily. In a statement, the KLA claimed responsibility denouncing officer Milovanovic as a "Serbian policeman, well known blood-sucker and anti-Albanian".

March 25:

Near the village Sicevo, Klin municipality, a group of attackers killed ethnic Albanians Jusuf Haljiljaj and Fehmi Haziraj (who were well known as loyal citizens of Serbia) and wounded ethnic Albanian Mehmet Gasi.

April 10:

In the village of Banjica near Glogovac, using automatic firearms, KLA terrorists killed ethnic Albanian

Ramiz Ljeka, who worked at the Glogovac Municipal Council.

May 6:

Around 10:30 p.m. in the village of Lozica near Klina, ethnic Albanian Hetem Dobruna (30), a farmer from the village, was shot and killed.

May 16:

In Srbica near Kosovska Mitrovica police officers Miomir Kicovic and Radisav Blanic were shot and heavily wounded.

June 19:

On the Pristina-Podujevo-Nis road near the village of Donje Ljupce in the Podujevo municipality, terrorists fired 12 bullets from automatic weapons at a police patrol. No one was injured.

July 3:

In the village of Trstenik, Glogovac municipality, in the early morning hours the KLA shot and killed ethnic Albanian Ali Calapek, a farmer who was a member of the Socialist Party of Serbia and a member of the local Election Commission in the 1996 elections.

July 21:

The Assistant District Attorney in Pec, Miroljub Petrovic, was shot and killed.

Aug. 3:

A police vehicle was fired on at 7 p.m., in the village of Bradis which is 10 kilometers from Podujevo.

Aug. 4:

At 9:30 a.m., on the road from the village of Rudnik to Srbica, KLA terrorists from Drenica fired on a police vehicle using automatic weapons. Police officers Milomir Dodic and Zoran Boskovic were heavily wounded, and a civilian who was in the car was lightly wounded.

Aug. 23:

Forest worker Sadi Morina, an ethnic Albanian, was killed in Srbica. Mr. Morina had already been receiving threats from KLA terrorists for a long time because he remained to work "in the service of Serbia".

Aug. 24:

In the village of Zub near Djakovica an ethnic Albanian, Kcira Ndue (32), was shot and killed, while his brother Bekim Ndue was wounded.

The police station in the village of Rznic near Decani was sprayed with gunfire.

Sept. 2:

At 10:55 p.m. Ljimon Krasnici, an ethnic Albanian denounced by the KLA terrorists as a "traitor", was killed in his home.

Sept. 12:

A dozen attacks were carried out on police stations in the municipalities of Pec, Glogovac, Decani, and Djakovica around 11 p.m. No one was injured.

Sept. 13:

Around 10 p.m. a hand grenade was hurled at the police station in Luzano, near Podujevo.

Sept. 14:

A hand grenade was hurled at the police station in Kijevo, near Klina.

Sept. 23:

Around 11 a.m. in the vicinity of the village of Kijevo, the KLA opened fire on a motorized police patrol. Milan Stanojevic, the commander of the Djakovica Precinct, was in the vehicle. No one was injured.

Oct. 13:

The police station in Calopek near Pec was attacked.

Oct. 16:

Around 1:30 a.m. there was a terrorist attack on the police station in the village of Klincina, which lies on the road Pec-Pristina. Adrijan Krasnici (25) from Vranovci near Pec died in the ensuing gun battle.

Oct. 17:

Around 1 a.m. the residential community Babaloc, located between Decani and Djakovica, where 120 Serbian refugee families who fled from Albania several years ago are situated, was attacked.

Oct. 20:

The OVK claimed responsibility for attacks on police stations in Babaloc, Calopek, and Klincina, as well as police patrols in Gerlica near Urosevac and Balinac near Klina, about which the public had not been informed earlier.

Nov. 18:

Around 7 p.m. in the village of Komoran near Glogovac, Camil Gasi, an ethnic Albanian deputy in the Parliament of the Federal Republic of Yugoslavia and the chairman of the Municipal Board of the Socialist Party of Serbia for Glogovac, was wounded heavily. His driver was wounded as well.

Nov. 25:

KLA terrorists held the police station in Srbica surrounded for 15 hours.

Around 7 p.m. in Decani, and after midnight in the village of Rznic, two terrorist attacks were carried out in which police officer Dragic Davidovic (32) from Berane was killed, and Ljubisa Ilic from Srbica, also a policeman, was heavily wounded. Bojan Trboljevac from Leposavic, Srdjan Pavlovic (26) from Zubin Potok, and Nedeljko Aksentijevic (30) from Kragujevac all subsequently died from mortal wounds.

Dec. 4:

The KLA claimed responsibility for an attack on Pristina Airport, claiming that it shot down a "Cessna 310" on Nov. 26 killing all five people on-board.

Dec. 15:

Around 1 a.m. on the road Srbica-Klina three masked KLA terrorists stopped a convoy of three cars with 16 Serbian civilian passengers. According to the civilians' testimonies, the terrorists -- who were armed with machine-guns and hand grenades -- threatened them with death.

Dec. 19:

Around 6 p.m. on the road Klina-Srbica, near the village of Josanica, eight masked and heavily armed KLA terrorists stopped the car of the civilian Milan Sapic from Lazarevac threatening, insulting, and searching his family and him.

Dec. 25:

Two terrorist attacks were carried out shortly after 3 p.m. against police officers in the Podujevo municipality: In the village of Zakut a police vehicle was fired on, and in the center of Podujevo explosives devices were hurled at the residential building where police officers live. There were no victims.

1998

Jan. 4:

The KLA claimed responsibility for a series of terrorist activities in the Former Yugoslav Republic of Macedonia: planting a bomb in front of the police station in Prilep, which caused no injuries but demolished five cars; attacking the police station in Kumanovo; and attacking the Municipal Court in Gostivar on Dec. 16, '97.

Jan. 9:

Shortly after 8 p.m., Djordje Belic (57) was shot and killed with an automatic weapon at the doorstep of his house in the village of Stepanica near Kijevo. Belic was the head of one of the three remaining Serbian households in that village.

Jan. 12:

In the town of Stimlje near Urosevac, shortly after midnight on the night of Jan. 11/12, there was an armed attack on the building in which seven families of police officers reside. The shots ended up in the

bedrooms of some of their apartments. Miraculously, there were no victims.

Around 8 a.m., in the vicinity of the village Gradac near Glogovac in Drenica, forest worker Sejdi Muja, an ethnic Albanian, was shot and killed. He and another Albanian had been stopped by a masked and armed three-member group of KLA terrorists, and after checking his ID card established that Muja was on their list of "traitors". They dragged him out of the car and shot him, leaving his body by the road. He was a "traitor" just because he worked in the Serbia Forest Service.

Jan. 13:
The KLA issued a statement stating that its headquarters was in Pristina. It also claimed responsibility for a series of terrorist actions carried out in the Former Yugoslav Republic of Macedonia: an attack on the Municipal Court in Gostovar and the police stations in Prilep and Kumanovo. It announced that it would expand its actions into Montenegro.

Jan. 14:
The headquarters of the Socialist Party of Serbia for Djakovica were stoned overnight, Jan. 13/14. All windows were broken. These were greetings for the "Serbian New Year" which is marked on Jan. 14.

Jan. 19:
In Srbica all graves at the Serbian Orthodox Cemetery were desecrated and vandalized. The monuments at the graves were completely destroyed.

Jan. 22:
After a KLA patrol had been stopping, harassing, and threatening citizens with death in the Srbica municipality the previous night, there was a confrontation between that patrol and a patrol of police officers. While chasing the KLA terrorists, who barricaded themselves in the house of Saban Jasari in the village of Donji Prekaz near Srbica, police officers killed the terrorist Hasan Mandzol and lightly wounded two Jasari brothers.

A three-member KLA group kidnapped the taxi driver Metus Skodru, an ethnic Albanian, and then took his cab, an Audi 90. They told him he could buy his cab back if he showed up at a designated place at a designated time, under the threat that he would be liquidated if he called the police.

Jan. 23:
On the night of Jan. 22/23, on the road Srbica- Klina near the village of Josanica, Desimir Vasic, a deputy in the Municipal Assembly of Zvecan was shot and killed.

On the same road, the same night, near the village Lausa Blagoje Nikolivc from the village of Drsnik near Klina was severely beaten until he became unconscious.

During the same night, KLA terrorists stopped, harassed, and threatened with death a group of Serbian women heading to Monastery Devic.

Jan. 25:

On the night of Jan. 24/25, in the town of Malisevo, in the very center KLA terrorists heavily wounded two police officers.

During the same night, KLA terrorists attacked the house of the Djuricic family in the village of Grabanica, near Klina in Drenica.

Terrorists hurled a bomb at the house of a police officer in Urosevac.

Jan. 26:

In the vicinity of the village of Turicevac, which is located between Klina and Srbica, KLA terrorists opened fire using automatic weapons on a helicopter belonging to Serbia's Ministry of Internal Affairs.

Jan. 27:

Again in the vicinity of Turicevac, an armed terrorist group stopped Veroslav Vukojcic from Leposavic and his neighbors Radmila and Zvezdana Vukajlovic. They beat them severely. The victims paid the terrorists to let them go -- Vukojcic paid 500 German marks, and Vukajlovic paid 850 marks.

Jan. 28:

A police patrol which was on its way to Decani to confiscate illegal weapons from the family Tahirsuljaja fell into a trap and was greeted with heavy gunfire from several houses. Nevertheless, the officers managed to arrest seven members of the Tahirsuljaja clan.

That evening, KLA terrorists fired at the house of Dragoljub Spasic in the village of Sibovac near Obilic.

Feb. 10:

A group of KLA terrorists appeared at a fundraising event for the KLA in New York City. They received funding from over 150 Albanians attending the event. On that occasion, the KLA terrorists proclaimed that they had killed 50 Serbian police officers and "corrupt" Albanians in 1997.

Feb. 12:

In Gornji Obrinj, in front of the village convenience store, Mustafa Kurtaj, an ethnic Albanian who worked at the post office in Glogovac, was shot and killed. He was shot in broad daylight, in front of twenty onlookers, as a warning to others. Prior to this, he had been repeatedly warned by KLA terrorists that they would kill him unless he quit his job at the state-run post office.

Feb. 15:

Nik Abdulahu, an ethnic Albanian employee of the Serbia Electric Utility, was shot and killed while at work, at the electricity substation in the village of Staro Cikatovo near Glogovac.

Feb. 18:

In the night between Feb. 17/18, KLA terrorists collected firearms from ethnic Albanians in Drenica, for whom they suspected that they did not support their cause. Those who did not turn over their weapons were given a deadline to do so, "otherwise," they were told, "you will be shot".

The police checkpoint near the village Dobre Vode in the Klina municipality was attacked with automatic weapons.

Feb. 19:

While returning from work, an employee of the state security service of Pristina Nebojsa Cvejic was shot and killed near the village of Luzani.

In Podujevo, KLA terrorists hurled bombs at a refugee center housing Serbian civilians who were "ethnically cleansed" from Croatia.

Feb. 20:

On the road Srbica-Klina, near the village of Lausi, KLA terrorists shot and killed Milorad Ristic, a private entrepreneur from Djakovica, and heavily wounded truck driver Zdravko Djuricic from Orahovac.

On the same day, on the same road, near the village of Josanica KLA terrorists opened fire on another truck, which was being driven by an ethnic Serb. However, an ethnic Albanian hitchhiker from the village of Lausi, who was sitting in the passenger seat and whom the driver had picked up in Klina, was killed by the KLA terrorists' gunfire.

That evening, on the road Klina-Djakovica, KLA terrorists set up a roadblock where they beat up police officer Milenko Kandic.

Feb. 22:

Ali Raci, an ethnic Albanian working at a Serbian- owned agriculture company, was shot and killed in the village of Dobre Vode at the entrance of the agriculture company. He had refused to give in to the KLA's earlier warnings and blackmail that he quit his job.

Feb. 26:

Using hand grenades and automatic weapons, terrorists attacked Serbian refugees from Albania housed in the refugee camp Babaloc (located on the road Decani-Djakovica) for the third time.

Feb. 27:

KLA terrorists attacked the houses in Srbica where Serbian refugees from Croatia are temporarily housed.

At Monastery Devic, KLA terrorists harassed the head nun for 30 minutes. They ordered her to tell the police that they will all be killed.

A KLA warehouse containing 12 kilograms of explosives with clocks, several trunks of shells, and over 120 rocket launchers was discovered in Prizren. Several terrorists were arrested.

Feb. 28:

The house of the Culafic family in the village of Donji Ratis (Decani municipality) was bombed.

Separately, in a confrontation between police officers and KLA terrorists in Drenica (Glogovac municipality), four police officers were killed: Miroslav Vujkovic, Goran Radojcic, Milan Jovanovic, and Radojica Ivanovic. Police officers Pavle Damjanovic and Slavisa Matejevic were heavily wounded. The exact number of terrorists who were killed is still unknown.

William Walker

Head of the Kosovo Verification Mission

Walker is head of the Kosovo Verification Mission, an unarmed force of peace monitors in Kosovo charged with overseeing a cease-fire between the Yugoslav government and ethnic Albanian rebels.

Before the Kosovo post, Walker headed the U.N. Transitional Administration for Eastern Slavonia (UNTAES), responsible for the peaceful return of Eastern Slavonia to Croatian control. The region witnessed heavy fighting between Yugoslav and Croatian forces shortly after Croatia declared independence in 1991.

During 37 years in the U.S. Foreign Service, Walker served as ambassador to El Salvador from 1985-88 and also held diplomatic assignments in Bolivia, Honduras, Brazil, Japan and Peru.

About PTSD

(Posttraumatic Stress Disorder)

Course/Prognosis: When it starts, How it seems to progress

PTSD occurs in response to a severe traumatic event. The person experiencing the traumatic event either witnesses or believes that death or very serious injury to themselves or others has, or is likely to occur. PTSD does not occur in response to mild or non-life threatening events such as losing a job. In that case the person may have adjustment disorder.

Symptoms will often begin immediately after the traumatic event. However, it is possible to have delayed onset of symptoms in which PTSD is developed many months or years later (i.e. after the abuse or combat has ended). If the symptoms do not begin until 6 months after the event the PTSD is coded as occurring "with delayed onset."

PTSD symptoms can last for many years (in fact for the rest of the person's life). Recent research on delayed onset has indicated that without treatment the consequences of a traumatic event can reoccur at any time. While it is possible to experience a traumatic event and not develop PTSD, for many people some form of treatment (either formal or informal) will be needed for them to overcome the effects of the trauma.

Common Symptoms

A key feature of PTSD is the re-experience of the traumatic event. This re-experiencing usually occurs in dreams (nightmares) and results in a significant sleep disturbance. The person can also have intrusive thoughts or images of the traumatic event during the day.

The person with PTSD usually displays increased arousal and responsiveness both in general and to stimuli related to the traumatic event. The person may become hypervigilant, in which they seem to be always on guard. They will often have a strong startle response in which their body responds very quickly and forcefully to even a sight stimuli. A common example of this was found in combat veterans who would dive for the floor and have major a physiological reaction to a car back firing, even blocks away.

People with PTSD also tend to avoid stimuli that is related to the traumatic event. For example if a woman was raped outside of a Wal Mart store they may avoid even driving on the street on which the Wal Mart is located.

People with PTSD may also have major depression, somatoform or substance abuse disorders (or symptoms from those disorders).

[DSM Criteria](#)

How others tend to view a person with this disorder

The person with PTSD may be viewed as very uptight, nervous, or on-edge. They may be seen as emotional, or someone who "over reacts" to everything. The person may also seem flat or blunted, and someone who doesn't connect to anyone else. They will probably have trouble developing relationships, and may seem to be preoccupied with the traumatic event, discussing it and thing about it over and over.

[*Return to Home*](#)

Diagnostic criteria for Posttraumatic Stress Disorder

The person has been exposed to a traumatic event in which both of the following are present:

The person experienced, witnessed, or was confronted with an event or events that involved actual or threatened death or serious injury, or a threat to the physical integrity of self or others.

The person's response involved intense fear, helplessness, or horror. Note: in children, this may be expressed instead by disorganized or agitated behavior.

The traumatic event is persistently reexperienced in one (or more) of the following ways:

Recurrent and intrusive distressing recollections of the event, including images, thoughts, or perceptions. Note: in young children, repetitive play may occur in which themes or aspects of the trauma are expressed.

Recurrent distressing dreams of the event. Note: in children, there may be frightening dreams without recognizable content.

Acting or feeling as if the traumatic event were recurring (includes a sense of reliving the experience, illusions, hallucinations, and dissociative flashback episodes, including those that occur on awakening or when intoxicated). Note: in young children, trauma-specific reenactment may occur.

Intense psychological distress at exposure to internal or external cues that symbolize or resemble an aspect of the traumatic event.

Physiological reactivity on exposure to internal or external cues that symbolize or resemble an aspect of the traumatic event

Persistent avoidance of stimuli associated with the trauma and numbing of general responsiveness (not present before the trauma), as indicated by three (or more) of the following:

Efforts to avoid thoughts, feelings, or conversations associated with the trauma

Efforts to avoid activities, places, or people that arouse recollections of the trauma

Inability to recall an important aspect of the trauma

Markedly diminished interest or participation in significant activities

Feeling of detachment or estrangement from others

Restricted range of affect (e.g., Unable to have loving feelings)

Sense of foreshortened future (e.g., Does not expect to have a career, marriage, children, or a normal life span)

Persistent symptoms of increased arousal (not present before the trauma), as indicated by two (or more) of the following:

Difficulty falling or staying asleep
Irritability or outbursts of anger
Difficulty concentrating
Hypervigilance
Exaggerated startle response

Duration of the disturbance (symptoms in Criteria B, C, and D) is more than 1 month.

The disturbance causes clinically significant distress or impairment in social, occupational, or other important areas of functioning.

Specify if:

Acute: if duration of symptoms is less than 3 months
Chronic: if duration of symptoms is 3 months or more

Specify if:

With Delayed Onset: if onset of symptoms is at least 6 months after the stressor

What is Criminal Profiling?

by Brent E. Turvey, M.S.

I get a lot of email from students and law enforcement asking me about criminal profiling. Most would like access or directions to information, to open a dialogue with a sympathetic professional (having been laughed out of the offices of their advisors), and/or need some guidance in choosing graduate programs. But most importantly is the question that is repeated time and time again by those who contact me: What is Criminal Profiling?

I find this very heartening. It's good to know that there is such avid interest in my particular field from such a variety of upcoming and established professionals. It's not only good, but it's reassuring both professionally and personally, for reasons that I will get into.

If you have ever written me with any of the above requests, and you are interested in criminal profiling, you will take notice that I immediately turn the question around and throw it back at you, rather than actually taking the time to answer it myself. The question is frequently phrased as, "How do I become a good criminal profiler?" I almost always respond, "What do you think a good profiler is?"

As you can imagine, the responses that I get to this question are many and varied.

Below are some examples of the better answers that I have received. The authors of these statements will remain nameless, but if you recognize yourself here, take it as a compliment; you were brave enough to even ask the question to begin with. The willingness to take a risk and ask a question is a victory in the battle of education that is not won with any great frequency, I assure you.

"My definition [of a criminal profiler] is an investigator that studies the characteristics of criminals and how their mind works to solve cases."

"...in short, I view this discipline [criminal profiling] as a part of the totality of conducting criminal investigations. It can be used proactively and reactively."

"I believe criminal profiling to be examining evidence and deducting a possible suspect, or suspects of a crime."

All of the above are excellent answers, and in their own way are correct. This is, as I mentioned earlier, very promising, because it tells me that most serious students of the art of profiling see through the fallacies of television and film, and are able to think critically about the profiling process.

In fact, I rarely get inquiries about my potential need for people with psychic abilities anymore. Would that it were never, but some people still believe that criminal profiling has something to do with being psychic. In fact there's even this guy who's an ex-New York beat cop with his own web-site who calls

himself a psi-cop. Let me just set that record straight; criminal profiling involves no psychic abilities whatsoever. That is an artifact of the popular media.

But why does the perception pervade? It pervades because of the nature and the extent of training and attention to detail that criminal profiling involves. Most investigators and Forensic Scientists are trained to be experts in their specific discipline, with an eye to their specific forensic sphere. Even investigators are trained specifically in investigative techniques, perhaps only for one type of crime.

The criminal profiler should ideally be cross-trained in several disciplines. The profiler need not necessarily be an expert, but should have a deep appreciation and intermediate understanding of the tenets of at least the following disciplines:

Psychology: the study of individual behavior.

Sociology: the study of group behavior, groups being comprised of individuals.

Criminalistics: a general term for the scientific study of recognition, collection and preservation of physical evidence as it is related to the law. Some criminalists are specialists, some are generalists.

Forensic Pathology: A branch of medicine that applies the principles and knowledge of the medical sciences to problems in the field of law-from DiMaio.

Anyone without specific training from qualified experts, or experience in at least the above fields is not, in my opinion, capable of the complex processes involved in rendering a criminal profile.

This will no doubt make many of those in academia scream foul, as they have been the criminal statisticians for the past century and believe their studies of criminal behavior data to be paramount to the field of criminal profiling. While I would agree that collection and analysis of criminal data sets is a very helpful tool in an investigative process, I would not agree that it by any means constitutes criminal profiling. It's databasing, like ViCAP or ViCLAS, and it is only one part of a total profiling process (which is why computers will never replace profilers, because even a neural network cannot elicit individual meaning from individual behavior; it is simply too far complex and dynamic a heuristic to work with for the current technology).

This will also no doubt make many clinical psychiatrists and psychologists without training or experience in any of the forensic sciences cry foul. To that I say "Tough." Go out to some crime scenes. Get some training. Learn to appreciate the nature of physical evidence, learn to interpret autopsy reports, and learn what offenders do at crime scenes with their victims first-hand.

Now these statements probably will not upset many law enforcement officers because most of them

already have a deep appreciation of the forensic sciences from their local lab people (thank you lab people---you guys are the best) and from their local ME or Coroner (thanks forensic pathology type people--you guys can sleep in 'cause it's going to be a few hours before we're ready for you). However, more training is still needed by most law enforcement and they additionally will have to avail themselves to university courses in criminal psychology as they are available. And that's just to start.

What is involved in rendering a criminal profile, now that we've upset everyone who is in a position to utilize it as a tool?

To begin with, profiling is not studying data and taking a generalization and applying it to a particular offense to say, "This crime was most likely committed by a white male, age 26-40, who hates women and lives with his mother." That is generalizing and generalizing is bad. And it is also how you wind up on TV, stating that Richard Jewell is the Olympic Park Bomber, and subsequently looking like a "slapped ass" in front of the whole world (to coin a phrase from Halbert Fillinger, M.D., used many times in his lecture at the Arnold Markle Symposium this year).

Profiling is a process that begins, in the initial phase, with a careful and deliberate analysis of physical evidence at individual crime scenes. It is subsequently used to help explain the behaviors and motivations of specific offenders involved at those specific crime scenes. There are tendencies and typologies that can be helpful guidelines, but each crime is its own snowflake. One should appreciate that profiling is a deductive process; it involves reasoning from the specific out to the general--not the other way around, which is the inherent short-coming of simple statistical analysis.

Accepting, then, that criminal profiling is necessarily a deductive process, it becomes quite clear why criminal profilers must educate themselves as to the tenets of the above mentioned disciplines. In doing so, the criminal profiler becomes an expert observer of factual forensic evidence, and the subsequent deduction from factual forensic evidence to individual behavioral inferences. So the profiler must necessarily be able to reconstruct criminal behavior from factual forensic analysis.

The next part of the profiling process is the most difficult, because it includes inferring offender motivation from the reconstructed crime scene behavior. Two important rules about behavior; all behavior fulfills a need, and no one acts without motivation. Each individual offender has their own deeply personal motivations based on their experiences as a human being. And the behavior motivations in a crime scene must be considered in light of all the behavior, not just single instances. For example, an offender who covers the victim's eyes or face during an offense may do so because they know or are acquainted with the victim, or it may be that the offender is enabling a fantasy of some other individual that the victim is standing in for, or it may simply be that the offender is unable to look into the victim's eyes while doing horrible things to them. One behavior--many potential motivations. A careful analysis inclusive of the other crime scene behavior and forensic evidence may point to which motivation is most likely.

That's much of what criminal profiling is, at it's very core. And almost anyone with the right training,

experience and a lot of guidance can learn to do it. If someone tells you differently, it has been my experience that they are selling you a load of goods for some secondary gain.

What you get as a result of criminal profiling is a narrowed pool of suspects, potential investigative strategy based on that narrowed suspect pool, potential interrogation techniques once a suspect is developed, and, most importantly to the subsequent criminal prosecution of an offender--insight into motivation. I can assure you that these pieces of information can make a world of difference in any investigative effort.

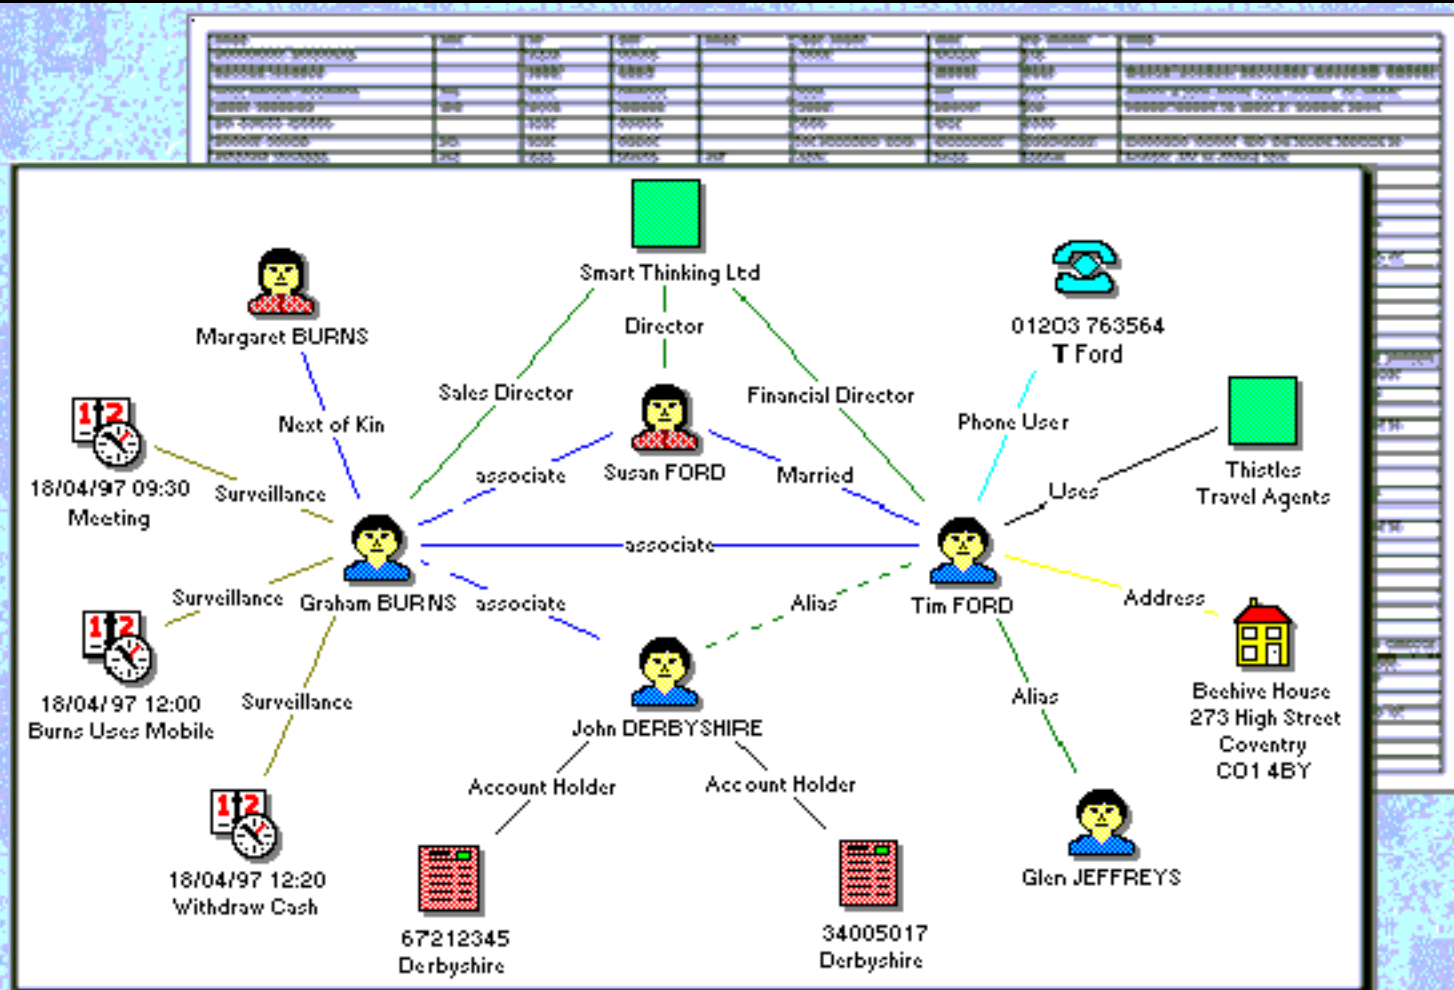

So that gets us back to the pervasive perception that profilers are psychic: The ability to be acutely observant to fact, which comes with deliberate training and experience, appears almost other-worldly to those without it. But it is not other-worldly, psychic, or anything remotely like that.

Now don't misunderstand me. I'm not saying it's easy, because it certainly isn't. Criminal profiling is demanding professionally, personally, and emotionally. If you can't guess how much, just read John Douglas' book *Mindhunter* and you'll see I've made the understatement of the century. But criminal profiling can be taught to those who are able and willing to learn just like any other discipline.

So much of my email is from people who are eager to learn, who are well grounded in the need for cross-professional training, and who have a deep appreciation for psychology and the forensic sciences. This is why I am so heartened to receive it and hope to continue to receive it. If this trend is any indication of the nature and background of future profilers, then I believe the profession is heading in a good direction. So keep it coming!

Comparative Case Analysis

Crime Pattern Analysis (CPA) is one of the most abused terms in the current Police/Criminology world. Many systems claim to perform crime pattern analysis however when looked at more closely, they are often found to be different beasts altogether. A favourite is the rash of text-based search engines used by an increasing number of police forces for major incident investigation. They work by searching large databases looking for links between one crime and another. If you enter 'blood-splattered kitchen knife' they will go out and bring home every other reference to 'blood', 'splattered', 'kitchen', and 'knife' (more or less).

Although these systems deal with crime, all the system is doing is searching for matching similar strings of text. There is a distinctive lack of analysis taking place and the onus is still on the user to do all the thinking and come up with the right choice of search string. Until the text-based search engines develop the capability to analyse then they will remain clever database managers with attached graphical packages. Many of these systems are better described as Comparative Case Analysis systems.

Crime Pattern Analysis (CPA) in its true spatial sense can only be performed by systems which map crime distributions and then analyse these for significant patterns. At the simplest level this is the ability

to examine a number of different areas, such as police beats for example, and tell you which has the highest level of a certain type of crime. If this is performed by a mapping or Geographical Information System (GIS) package which can show you the output on a map, then all the better. If you have patience (and a sense of humour) you don't even need a computer for true CPA (though they do help when you are examining thousands of burglaries!).

At higher levels the system might be able to detect crime hotspots from the data by examining the whole area and focus on the highest concentrations of crime. It should be able to do this irrespective of where boundaries such as police beats are located. Criminals have an annoying tendency to ignore police station demarcation areas, and on occasion they make deliberate use of county boundaries by crossing from one side to another to commit their crimes in an attempt to confuse police detection techniques. Just like a GIS, the defining trait of a CPA systems is the ability to perform specific spatial analysis techniques.

Deductive Criminal Profiling: Comparing Applied Methodologies between Inductive and Deductive Criminal Profiling Techniques

by Brent E. Turvey, MS
January, 1998

The mental health community christened the first psychological "syndrome" in 1980, when Posttraumatic stress disorder (PTSD) was officially recognized by inclusion in the Diagnostic and Statistical Manual of Mental Disorders (DSM-III). Since that time, the investigative term "profile" has slowly become synonymous with the psychological term "syndrome" in the eyes of the legal community. The process of *criminal profiling* in its original form, as taught by Howard Teten and Pat Mullany at the FBI beginning in 1969, was completely different in origins and methodology from the construct of the *psychological syndrome*. With time, however, the two terms "profile" and "syndrome" have been wrongfully confederated because of the way some profiles are constructed, and the subsequent litigation [1], [2].

As the above infers, not all profiling methodology is the same, due largely to the fact that not all profilers are equally trained or able. In fact, this author will propose that there are essentially two very different types of profiling being done by criminal investigators and criminologists in the United States. The first profiling method will be termed Inductive Criminal Profiling, and is related conceptually to the construction of psychological syndromes and subsequent syndrome evidence. The second, less common, method of profiling will be termed Deductive Criminal Profiling. The purpose of this work is to overview the nature of Deductive Criminal Profiling, and demonstrate how its origins, assumptions, and methodology are fundamentally different from the origins, assumptions, and methodology of Inductive Criminal Profiling, and by inference syndrome evidence.

Inductive Criminal Profiling & Syndromes

For legal purposes, according to *Moenssens et al [3]*, a syndrome or a profile is "a set of behavioral indicators forming a very characteristic pattern of actions or emotions that tend to point to a particular condition." (note an emphasis on pointing to a condition, lending itself to purposes of treatment).

A more useful description comes from *State of Oregon v. Lawson [4]*, where the defense tried to introduce expert testimony stating that their client, Mr. Lawson, did not match the profile of a sex offender, and by extension of that logic could not therefore be one. The court in that case found that "Whether it is labeled a 'syndrome' or a 'profile', the type of evidence...involves comparing an individual's behavior with the behavior of others in similar circumstances who have been studied in the past."

An Inductive Criminal Profile is one that is generalized to an individual criminal from initial behavioral and demographic characteristics shared by other criminals who have been studied in the past. It is the product of incomplete, statistical analysis and generalization (very often without comparison to norms), hence the descriptor *Inductive*. This author takes the descriptor from the phrase Inductive Statistics, which is the branch of statistics involving generalizations, predictions, estimations and decisions from data initially presented [5].

The datasets currently used to compile and statistically generalize Inductive Criminal Profiles are collected largely from three sources:

1. **Formal and informal studies** of known, incarcerated criminal populations, and the inherent clinical and non-clinical interviews upon which those studies are based;
2. **Practical experience**, from which isolated anecdotal data is recalled by the profiler; and
3. **Public data sources**, including the popular media (for example, the FBI readily admits that newspaper articles are collected by its personnel and used to fill out its computerized database of violent criminal offender activity in the United States).

| | |
|---|--|
| <p>Inductive Criminal Profiling:</p> | <p><u>The process of profiling criminal behavior, crime scenes, and victims from the known behaviors and emotions suggested by other criminals, crime scenes, and/or victims.</u></p> <p>In essence, as the term suggests, this is reasoning from initial statistical data to specific criminal offender behavior. In any event, Inductive Criminal Profiling is generally the result of some kind of statistical analysis, or finds it's reasoning in cases outside of the case at hand.</p> |
| <p>Example of the logic:</p> | <p>80% of known serial killers that attack college students in parking lots are white males age 20-35 who live with their mothers and drive Volkswagen Bugs-- Our offender has attacked at least three female college students on separate occasions; our offender has attacked all three victims in parking lots.</p> <p>Therefore, our offender, who is part of this large group who fit this "profile" called "serial killers" is a white male age 20-35, lives with his mother, and drives a VW Bug.</p> |

The advantages of the Inductive Criminal Profiling model are readily apparent. Foremost is that Inductive Profiling is a very easy tool to use, for which no specialized forensic knowledge, education, or training in the study of criminal behavior or criminal investigation is required. Additionally, general

profiles can be assembled in a relatively short period of time without any great effort or ability on the part of the profiler. The result is often a one or two page list of unqualified characteristics. These generalizations can accurately predict some of the non-distinguishing elements of individual criminal behavior, but not with a great deal of consistency or reliability.

There are currently a number of separate initiatives under way in both the United States and Canada to automate part or all of this process with databasing tools and neural computer networks.

The major disadvantages of the Inductive Criminal Profiling model are equally apparent to the critical thinker. Firstly, the information itself is generalized from limited population samples, and not specifically related to any one case, therefore it is not by its nature intended for reconstructing a "profile" of an individual person. It is a generalized set of representations, averaged from a small group of individuals who may or may not have been appropriately sampled, depending on the knowledge and ability of the person collecting and assembling the data. Secondly, and perhaps most commonly noted, is that Inductive profiles are generalized and averaged from the limited data collected only from known, apprehended offenders. An Inductive Criminal Profile does not fully or accurately take into account current offenders who are at large, therefore it is by its very nature missing datasets from the most intelligent or skillful criminal populations; the criminals who are successful in continually avoiding detection by law enforcement. A third major disadvantage is that, as with any such generalization, an Inductive Criminal Profile is going to contain specific inaccuracies that can and have been used to implicate innocent individuals. This occurs when an Inductive Criminal Profile is used as some sort of infallible predictive measure by an unprofessional, trigger-happy profiler. Recent examples include the 1996 case of Richard Jewell in the "Olympic Park Bombing" and, also in 1996, the Colin Stagg profile debacle in Great Britain.

Assumptions of the Inductive Criminal Profiling model include:

- * Small groups of known offenders, who commit the same types of crimes as unknown offenders, have commonly shared individual characteristics that can be accurately generalized back to initially similar individual unknown offenders.
- * Offenders who have committed crimes in the past are culturally similar to current offenders, being influenced by at least similar environmental conditions and existing with the same general and sometimes specific motivations.
- * Individual human behavior and characteristics can be generalized and even predicted from the initial statistical analysis of characteristics and behavior in very small samples.
- * Behavior and motivation do not change within an individual over time, being static, predictable characteristics

Inductive Profilers include the following groups of professionals, who have various backgrounds:

- * **FBI and ex-FBI profilers** who have been trained since John Douglas took over the Behavioral Sciences Unit in 1984. Current FBI profiles are on average less than a page long and offer no explanation for the content of the profile. Most law enforcement agencies that this author has

discussed the issue with have had little or no use for those types of profiles. Nor do most courtrooms.

* **Forensic Psychologists and Forensic Psychiatrists**, who rely solely on clinical personality measurements such as the MMPI when formulating any kind of criminal personality profile.

* **Many of the law enforcement profilers** who have received FBI training since 1984, including Georgia Bureau of Investigation, ATF, and various state and local detectives. GBI, as has been highly publicized, is the agency responsible for generating the Richard Jewell profile.

* **Criminologists**: a criminologist is defined as someone who studies criminal behavior. It does not imply training, education, or experience. The term criminologist generally refers to someone who does scholarly, scientific and professional study concerning the etiology, prevention, control, and treatment of crime and delinquency, including the measurement and detection of crime, legislation, and the practice of criminal law, the law enforcement, judicial, and correctional systems. It is a category that, despite its ambitious definition, can include almost anyone in actual application.

The professional backgrounds of those listed does not necessarily include forensic training in criminal psychology, abnormal psychology, or psychopathology, and certainly does not imply any kind of experience with investigating violent serial criminals. For example, most people are not aware that FBI agents do not have jurisdiction at any homicide unless it occurs in a federal building or on an Indian Reservation, giving most FBI agents no applied experience investigating this type of crime whatsoever.

Deductive Criminal Profiling

A descriptive, applied definition of the *Deductive Criminal Profiling* model, according to this author, is: "The process of interpreting forensic evidence, including such inputs as crime scene photographs, autopsy reports, autopsy photographs, and a thorough study of individual offender victimology, to accurately reconstruct specific offender crime scene behavior patterns, and from those specific, individual patterns of behavior, deduce offender characteristics, demographics, emotions, and motivations."

Note the heavy emphasis on an informed forensic reconstruction, and the exclusion of information from other similar offenders, or other similar offenses.

A Deductive Criminal Profile is one that is deduced from the careful forensic examination and behavioral reconstruction of a single offender's crime scene(s). After the offender's behaviors have been reconstructed, the crime scene characteristics are analyzed, and the victim characteristics are analyzed. From those combined characteristics, a profile with the characteristics of the individual who could have committed that specific offense(s), with that specific victim(s) under the conditions present at that specific crime scene(s) is deductively inferred. It is a forensically and behaviorally contained process. The process of deductive profiling is most appropriately termed *Behavior Evidence Analysis*, and depends on the analyst's abilities to recognize patterns of behavior within a single offender to deduce

meaning.

Offender emotions during the offense, individual patterns of offense behavior, and offender personality characteristics are deduced from that particular offender's crime scene behavior and victimology only.

| | |
|--------------------------------------|--|
| Deductive Criminal Profiling: | The Behavioral Evidence Analysis a specific criminal, crime scene(s), and victim(s) exclusively from forensic evidence relating to the crime scene(s) and victim(s) of that offender alone. |
| Example of the logic: | <p>The body of a female victim is found nude in a remote forest location with 4 shallow, careful incisions on the chest, cutting across the nipples. The victim's genital areas have all been removed with a sharp instrument. Petechiae are evident in the eyes, neck and face above pattern compression on the neck. No blood is found at the crime scene. No clothes are found at the crime scene. The victim bears ligature furrows around her wrists with abraded contusions but no ligature is present. Fresh tire impressions are found in the mud approximately 20 yards from where the body is located.</p> <p>Therefore the offender in this particular offense bound the victim to restrain her while she was still alive indicated by the abrasions around the wrists associated with struggling. Our offender removed the ligature before disposing of the body, indicated by the fact that we didn't find it at the scene. The victim was likely asphyxiated with a material ligature about the neck, indicated by the pattern compression and the petechiae. The location where the body was found is a disposal site and not the actual location of the offense indicated by the fact that no blood was present at this location. The offender has a vehicle consistent with the tire impressions and is mobile. All of these details together indicate a competent, intelligent offender whom is likely able to sustain employment, and is very likely a sexual sadist. This is deductively suggested by the vehicle, the use of a secondary scene to dispose of the body to avoid transfer evidence, the removal of the victim's genitals, and the deliberate cutting to the victim's nipples intended to cause pain but not seriously injure.</p> |

The data used to infer a Deductive Criminal Profile for a particular criminal includes the following:

1.Forensic Evidence: A full equivocal forensic analysis must be performed before profiling can begin, to insure the integrity of the behavior and the crime scene characteristics that are to be

analyzed. Nothing can be assumed by the profiler.

2. Crime Scene Characteristics: Crime scene characteristics are determined from all forensic reports, all forensic analysis, and all forensic documentation which provides the nature of the interaction between the victim(s), the offender, and the location(s) of the offense during the occasion of a specific offense. In cases involving a related series of offenses, such as in serial rape, or serial homicide, crime scene characteristics are determined individually and analyzed as they evolve, or fail to evolve, over time. An offender's crime scene characteristics, in a single offense or over multiple offenses, can lend themselves to inferences about offender motive, modus operandi, and the determination of crime scene signature.

3. Victimology: Victimology is the thorough study and analysis of victim characteristics. The characteristics of an individual offender's victim population of choice, in a single offense or over time, can lend themselves to deductive inferences about offender motive, modus operandi, and the determination of crime scene signature. In Deductive Profiling, almost as much time is spent profiling each victim as the offender responsible for the crime(s).

The advantages of the Deductive Criminal Profiling model are very important. This model requires specialized education and training in forensic science, crime scene reconstruction, and wound pattern analysis. Because of this requisite specialized knowledge, Deductive Criminal Profiles tend to be more specific than Inductive Criminal Profiles, assisting greatly in the major goal of the profiling process, which is to move from a universal set of suspect characteristics to a more unique set of suspect characteristics.

Deductive Criminal Profiling is also useful for thoroughly establishing Modus Operandi behavior, as well as offender signature behavior, which assists in the linkage of seemingly unrelated crimes. According to Geberth [6], the Modus Operandi, or MO behavior, or method of operation, is a dynamic, learned behavior, changing over time, as the offender becomes more experienced. It involves only those actions that are necessary to commit the offense.

Signature behavior, or the signature aspect of criminal behavior, as Geberth [7] defines it, is comprised of those behaviors not required to commit the offense. Signature is comprised of significant personality identifiers that distinguish the nature of the offender's crime scene methodology. These significant and highly individualized personality identifiers are evident in such things as:

- * When an offender repeatedly engages in a specific order of sexual activity;
- * When an offender repeatedly uses a specific type of binding;
- * When an offender inflicts similar types of injuries to different victims;
- * When an offender displays the body in a certain manner for shock value;
- * When an offender tortures and/or mutilates his victims, and/or engages in some other form of specific ritualistic behavior.

Another very tangible advantage of the Deductive Criminal Profiling method is that, because it so

thoroughly explores victimology, and the nature of the interaction between the victim(s), the crime scene (s), and the offender, it can very pointedly demonstrate an individual offender's motivations in even the most bizarre or seemingly senseless offenses. As Geberth insightfully reminds us in his foundational work *Practical Homicide Investigation, 3rd. Ed.*, "No one acts without motivation." Deductive Criminal Profiling techniques explore offender actions through the physical evidence, through the victimology, and through the crime scene as the primary behavioral and motivational documentation, and illuminate that particular offender's motivation. The whole profile is logic statement, based solidly on the arguments made through an analysis of behavior patterns.

Also, due to this same thoroughness, learned or experiential generalizations can be kept from obscuring or misleading investigations. Investigators with a lot of years on the job, or a lot of experience investigating a particular type of crime, tend to formulate theories about a case early on. Instead of investigating the case, they may instead spend their efforts attempting to prove a theory. Deductive Criminal Profiling precludes theory generation, and subsequent bruised egos, until a full investigative analysis has been done.

The final major advantage of the Deductive Criminal Profiling method is that it examines behaviors of individual offenders as they occur over time. Change and growth are allowed for, analyzed, and recompiled back into the criminal profile. As something like offender MO behavior or motivations change or evolve over the course of multiple offenses in an offender's career, it is noticed and it used to better understand the offender.

The disadvantages of Deductive Criminal Profiling are somewhat few, but well worth noting. First is that it is not a quick fix or a cure all; it requires a great deal of effort and multi-disciplinary skill on the part of each member of the investigative team. Second, because it is such an intensive process, it can be extremely emotionally exhausting. Investigators that learn to use these techniques should take care to be emotionally grounded individuals and not be afraid to discuss any emotional difficulties with those close to them. And third, a Deductive Criminal Profile cannot not point out a specific known individual and say with confidence that they are likely responsible for a certain crime or series of crimes unless that offender's unique signature is known and established.

Assumptions of the Deductive Criminal Profiling method include:

- * No offender acts without motivation.
- * Every single offense should be investigated as its own unique behavioral and motivational existent. Given the nature of human behavior, no two cases are really ever alike.
- * Some offenders have unique motivations and/or behaviors that should be individuated from other similar offenders.
- * All human behavior develops uniquely, over time, in response to environmental and biological factors.
- * Criminal MO behavior can evolve over time and over the commission of multiple offenses.
- * A single offender is capable of multiple motives over the commission of multiple offenses, or even during the commission of a single offense.

* Statistical generalizations and experiential theorizing, while sometimes helpful, are incomplete and can ultimately mislead an investigation, and encourage investigative laziness. When we think that we have all of the answers in a case, not only might we only collect evidence that fits those answers, we might think that a thorough investigation is no longer requisite at all.

Conclusions

The Inductive Profiling model, due largely to the lack of uniform training and education on the part of those who use it, has proven time and time again to be an unreliable source of investigative guidance. No standard terminology exists to describe offender behavior, and no classifications that have been developed have ever been validated, such as the crime scene classification efforts in the *Crime Classification Manual* [8]. Furthermore, those classifications have been developed using the same structure as the DSM, despite the intention that the DSM be used for the purposes of treatment, and not being designed for the purposes of criminal investigation. The adoption of this clinical model, then, serves no other real purpose than to lend pseudo-clinical credibility to the classification. The model does not serve the purpose that it was designed for.

Furthermore, initial statistical analysis based on unproven classifications and non-uniform terminology are no replacement for a thorough forensic reconstruction, crime scene analysis, and victimological assessment in either a criminal investigation or in a court of law. Given this fact, and given the extensive liability of police departments in high profile cases involving overzealous investigators armed with Inductive Profile evidence, and the general inadmissibility of Inductive "Profile" evidence in a court of law, the practice of teaching investigators purely Inductive Profiling methods should end.

The multi-disciplinary Deductive Profiling method, though more time consuming in the investigative end, will prove to be more effective because of its usefulness as an investigative guide, its competency at linking crimes, and because of its very high probative value in terms of thoroughly establishing signature and motivation. In short, the Deductive Profiling method encourages deliberation, competency, thoroughness, and requires a high degree of intra- and extra-departmental cohesiveness and communication. The Inductive Profiling method encourages egocentricity, investigative short-cuts, and has been used in the past to replace a competent forensic investigation into fact.

In the past, when this author has attempted to explain the Deductive Profiling process to individuals involved in criminal investigations, those investigators have said, "It sounds like you're trying to trick us into doing more work." To which this author has always responded, "You're right."

FBI PROFILE OF SCARBOROUGH RAPIST
DESCRIPTION: INVESTIGATIVE ANALYSIS, F.B.I. VIRGINIA

NOVEMBER 17, 1988

Unsub:

[H.L.] - Victim

[J.R.] - Victim

[R.Z.] - Victim

[K.J.] - Victim

[L.A.] - Victim

[M.J.] - Victim

[I.A.] - Victim

Metropolitan Toronto Police, Toronto, Ontario, Canada, May 4, 1987, May 14, 1987, July 27, 1987, December 16, 1987, December 23, 1987, April 18, 1988, May 30, 1988. NCAVC - Serial Sexual Assaults (Criminal Investigative Analysis) Foreign Police Co-operation (F.P.C.)

The following criminal investigative analysis was prepared by Special Agent Gregg O. McCrary, in consultation with Supervisory Special Agent James A. Wright and other members of the national Centre for the Analysis of Violent Crimes (NCAVC). The analysis is based upon a review of the materials submitted by our agency, and the conclusions are the result of knowledge drawn from the personal investigative experience, educational background and research conducted by these crime analysts as by other NCAVC members. It is not a substitute for a thorough well planned investigation and should not be considered all inclusive. This analysis is based upon probabilities noting however, that no two criminal acts or criminal personalities are exactly alike and, therefore, the offender at times may not fit the analysis in every category. This analysis contains information of a confidential and sensitive nature; and is provided for your investigative assistance. It should not be disseminated except to other criminal justice agencies with a legitimate investigative or prosecutorial interest in this matter.

VICTIMOLOGY:

Analysis of the victims in an effort to determine their risk factor is of significance. The susceptibility of these women becoming victims of a sexual assault was examined in conjunction with their individual

lifestyles, background, and overall social and physical environments. We found nothing in any of these women's backgrounds or lifestyles that would elevate their risk of becoming victims of a violent crime and/or sexual assault. We consider all of these victims to be low-risk victims.

There are observable similarities in that the victims are white females 15-21 years of age, with six out of seven living in the Scarborough area and three of those living in extremely close proximity to one another. The significance of this will be discussed in greater detail in the crime analysis section of this report.

The fact that four of the victims either traveled from or through the downtown area immediately prior to the attack is noted, but is not felt to be of significance in this analysis. If the offender was selecting his victims from a downtown location and surveilling them to their residential area for the attack, we would expect to see a far more random geographical pattern to the attacks than there is. With the exception of the Mississauga attack, all are clustered in the Scarborough area.

Another notable similarity among the victims is their small physical stature, ranging from 5'1" and 95 pounds to 5'3" and 135 pounds. This will be discussed in more detail in the crime analysis section also.

HOSPITAL AND LABORATORY EXAMINATIONS:

The result of the medical and laboratory examinations of each of the victims is complete and specific details are readily retrievable from those reports, therefore, no attempt will be made to summarize the findings.

All reports are consistent with and tend to corroborate the individual victim's specific allegation regarding each attack.

CRIME ANALYSIS:

A meaningful behavioral analysis of a series of sexually motivated attacks is best accomplished by examining the assailant's verbal, sexual, and physical behavior during the commission of the attacks. In conjunction with these considerations, the following aspects are being set forth as significant.

The process by which an offender targets and/or selects his victims is of obvious importance.

We feel your offender uses bus stops for staking out points. He surveils streets rather than homes and does so at night. Some victims were victims of opportunity while others appear to have been previously targeted to a degree. We believe the offender has seen victims or potential victims in passing, but had no urge to attack and at other times has seen victims, had the urge to attack, but the moment was inopportune.

The successful attacks occurred when the urge, opportunity and victims coincided. The victims are being

targeted by the offender in the areas in which the attacks are occurring. He is following them short distances before attacking them.

The six victims in Scarborough were all approached from behind, while the victim in Mississauga was approached from the front. He gained control over all the victims by the immediate application of injurious physical force. He maintained control of the victims through the use of physical force and verbal threats of bodily harm and or death, all of which were often accomplished while brandishing a knife in a threatening and intimidating manner.

All victims were attacked outdoors, while walking alone, near their residence during the hours of darkness.

Typically, this type of offender starts his attacks in an area with which he is familiar. This familiarity is usually the result of the offender living or working in that area and gives him a sense of security and comfort as he knows the neighbourhood well, can plan escape routes etc. The behaviour exhibited by your offender is consistent with this premise.

We believe your offender resides in the Scarborough area, specifically within walking distance of the first, second and fifth attacks. Because he lives in his attack area it is of utmost importance to him that the victims not see him. This is one of the reasons he prefers to approach the victims from the rear. Upon contact he forces them face down into the ground and or demands they keep their eyes closed to ensure they do not see him.

The victim in Mississauga was approached in a slightly different manner. After following her for a distance on foot, he approached her under the guise of asking directions. This approach allowed the victim to see his face, but was short in duration as the offender did not finish his first sentence before physically assaulting this victim and forcing her face down to the ground. It is our opinion that the offender was less concerned about being seen by his victim as he does not spend a great deal of time in the Mississauga area and believes that it is unlikely he would be recognized or seen there again.

Another reason your offender approaches his victims from behind is that he harbours some inadequacies. These inadequacies are further evident in his verbal behaviour as he scripts many of his victims to say, "Tell me you hate your boyfriend and you love me." "Tell me you love me, tell me it feels good" and other ego-gratifying statements.

Another indication of his inadequacies is evident in his victim selection. He selected victims that appeared non-threatening to him. As noted in the victimology section, the victims are physically small and could offer no real resistance to the attack. Each victim was walking alone at the time of the attack and was virtually defenseless.

Anger, however, is the primary behaviour exhibited by your offender. His intent is to punish and degrade the victims as he is angry at all women. This is evident in the blitz style approach and the

majority of his verbal behaviour as well as the type and sequence of sexual acts forced upon the victims in conjunction with the punishing physical force used against them.

The typically profane verbal behaviour combined with scripting the victims to describe themselves as a bitch, a cunt, a slut etc., evidences his anger and his need to punish and degrade his victims.

This anger is also apparent in your offender's sexual behaviour. By forcing the victims to perform oral sex on him after he has repeatedly vaginally and anally assaulted them he is punishing, degrading the humiliating them. The type and sequence of sexual assault is consistently observable in the series of attacks.
